Governor and Commander-in-Chief, His Excellency Sir Edwin Porter Arrowsmith, K.C.M.G. (1957) ..... (+ *duty allce.* £650) £2,500
Colonial Secretary, A. G. Denton-Thompson, O.B.E., M.C. £1,600
Senior Medical Officer, R. S. Slessor, O.B.E. 1,550
Agricultural Officer (vacant) 1,000
Colonial Treasurer, L. C. Gleadell 1,350

CHIEF TOWN, Ψ Stanley. Estimated population 1,135.

DEPENDENCIES.—*South Georgia*, an island 800 miles east-south-east of the Falkland Group, with an area of 1,450 square miles. An Administrative Officer and other officials reside there. In the *South Shetlands*, Deception Island contains the harbour at Port Foster, ice-free for about five months of the year. On the *South Orkneys* the Argentine Government has, with the permission of H.M. Government, established a meteorological station, in connection with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina 3½ years later. The other dependencies, of which the principal units are the *South Sandwich Islands* and *Graham's Land* (a peninsula of the Antarctic Continent) and that part of the Antarctic Continent lying between the longitudes of 20° W. and 80° W., are even more inhospitable than those already named, being covered with snow and ice and almost completely destitute of plant life. In spite, however, of the climatic and other disadvantages, the revenue derived from all the dependencies in 1958–59 amounted to £450,070 and the expenditure to £556,111. There is a whaling industry in South Georgia. One British, 1 Argentinian and 1 Norwegian company operated during the 1958–59 season, 21,526 tons of whale oil being exported. Sealing operations yielded 12,562 barrels of seal oil in 1959. A chain of meteorological stations is maintained in the Dependencies.

Trade of the Dependencies

	1958	1959
Total imports	£2,395,883	£1,284,887
Total exports	3,642,733	2,253,435
Imports from U.K.	435,554	350,777
Exports to U.K.	2,079,308	1,771,473

See also p. 721.

Ψ Stanley, the capital of the Falkland Islands, is distant from England about 8,103 miles; transit by steamer *vid* Montevideo. Telegrams by wireless U.K. direct. The journey from U.K. to Falkland Isles can be accomplished in 6 days travelling to Montevideo by air and thence by local steamer to the Falklands.

FIJI

This is a group of 322 islands (of which only 106 are inhabited) in the South Pacific Ocean, about 1,100 miles north of New Zealand. The gross area of the group, which extends 300 miles from east to west, and 300 north to south, between 15′ 45′—21° 10′ S. lat. and 176° E.—178° W. long. is 7,083 square miles. Many of the islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu, Vanua Levu, Taveuni and Kandavu. The climate is oceanic. Shade temperatures seldom rise above 93°F. or fall below 60° except in the mountains. On the windward sides of the larger islands rainfall is copious and vegetation luxuriant; on the leeward (or dry) sides the vegetation is sparse and scattered. The chief products are coconuts, sugar cane, gold, rice, bananas, pineapples, yams, and dalo or taro (colocasia).

The population (estimated 1959) was 387,646 (191,328 Indians, 162,483 Fijians, 8,464 part Europeans, 9,784 Europeans, 4,862 Rotuman, 5,841 other Pacific Islanders, 4,809 Chinese and part Chinese and 75 others).

FINANCE

	1958	1959
Public income	£F6,775,403	£F7,160,202
Public expenditure	6,734,739	6,516,687
Public debt (Dec. 31)	4,654,124	5,481,548

TRADE

	1958	1959
Total imports	£F17,602,727	£F16,900,997
Total exports	14,551,957	13,251,405
Imports from U.K.	£4,346,591	£3,411,052
Exports to U.K.	5,063,343	4,807,758

Fijian currency—£111 Fiji=£100 sterling.

The principal exports are sugar, coconut oil, gold, copra, bananas, biscuits, trocas shell, manganese ore and clothing. The chief imports are drapery, machinery, motor vehicles, petroleum products, timber, foodstuffs and electrical goods. The tourist industry is growing.

GOVERNMENT

The Governor is appointed by the Crown, and is assisted by an Executive Council. Laws are passed by a Legislative Council (of which the Governor is president) containing 16 official members, 5 European members (3 elected, 2 nominated), 5 Native members (nominated from a panel submitted by the Council of Chiefs), 5 Indian members (3 elected and 2 nominated), and a Speaker (H. M. Scott, C.B.E., D.F.C.).

The executive officer for the native administration is the Secretary for Fijian Affairs, who is responsible to the Governor and, in appropriate matters, to the Legislative Council. The controlling financial authority is the Fijian Affairs Board whose members are the Secretary for Fijian Affairs (Chairman), the five native members of Legislative Council, a legal adviser, and a financial adviser. The Board has power to make regulations affecting the Fijians, but such regulations are subject to approval by the Legislative Council.

Governor of Fiji, His Excellency Sir Kenneth Phipson Maddocks, K.C.M.G., *apptd.* 1958 (+*duty allowance* £1,750)	£5,000
Chief Justice, A. G. Lowe (+*duty allowance* £150)	3,200*
Colonial Secretary, P. D. Macdonald, C.M.G. (+*duty allowance* £150)	3,200

Puisne Judge, C. J. Hammett	2,800
Deputy Financial Secretary, H. P. Ritchie	2,400
British Council Representative, Suva, J. T. Harrison.	

* The Chief Justice and all subsequent officers in this list have a Post Allowance of £300.

CAPITAL, Ψ Suva, in the island of Viti Levu. Population (1958), 37,371.

Suva is 11,000 miles from London; transit from London, *viâ* Auckland, about 30 days; *viâ* Vancouver or San Francisco, about 30 days; *viâ* Panama, about 30 days; by air, *viâ* Canada, U.S.A., or Sydney, about 4 days. Fiji is on the main air route between North America and Australia and New Zealand. It is a base for South Pacific regional air services, covering New Zealand, Western Samoa, New Caledonia, Tahiti, Cook and Norfolk Islands.

GAMBIA

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth I. being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognized, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,003 sq. miles. The population of the Island of St. Mary, at the census of 1951 was 27,297, and that of the Protectorate was 260,160 (estimated, 1957, 236,421). The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is pleasant and generally healthy. The rainfall is extremely variable from year to year, ranging between 30 and 59 inches. Internal communication is by motor vessels and launches; there are no railways. There are 5 Government wireless stations.

Education.—Government expenditure on education amounted to about £139,200 in 1959. In Bathurst there are 10 primary schools with an enrolment of 3,400 pupils; all but one of these schools are financed entirely by Government. Pupils enter school at 5 years of age and have 3 years infants' schooling followed by 4 years primary; some 30 per cent. of the pupils obtain entry to secondary schools and the remainder spend a further 3 years in primary school. There are 2 secondary schools, run by the Missions—1 boys, 1 girls. There is also a technical school, a clerical school in Bathurst and a co-educational secondary school financed by the Government. In the Protectorate there are 25 District Authority schools and 11 Mission schools. Pupils enter school at 6–7 years of age for a 6 year course. There is also a secondary modern school at Georgetown.

FINANCE

	1958	1959
Public revenue	£1,689,279	£1,538,439
Public expenditure	1,814,239	1,816,449
Public debt	238,760	238,760

TRADE

	1958	1959
Total imports	£3,910,361	£3,148,308
Total exports	4,553,386	2,956,822
Imports from U.K.	1,632,794	1,449,500
Exports to U.K.	1,167,266	667,303

The chief export is ground-nuts, which form over eighty-nine per cent. of the total exports; practically all of this crop is sent to Europe, where the oil is extracted and used for the same purpose as olive oil. Palm kernels, hides and skins, and beeswax are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are apparel, cotton goods, flour, kola nuts, oil, rice, soap, spirits, metals of all kinds, sugar, tobacco and motor vehicles.

Total tonnage of vessels entered and cleared in 1959 was 921,479.

CHIEF TOWN, ΨBathurst. Population (1951), 19,602.

GOVERNMENT

At present, the Colony is administered by an Executive Council consisting of the Governor, 4 *ex officio* members and 6 appointed members. There is a House of Representatives consisting of the Governor as President, a Speaker, 4 *ex officio* members, 8 Chiefs' members, 2 nominated members and 19 elected members representing the town of Bathurst, Kombo St. Mary Division and the Protectorate. The Governor presides only on formal occasions.

Governor and Commander-in-Chief, His Excellency Sir Edward Henry Windley, K.C.M.G. (1957)	£3,600
Civil Secretary, K. G. S. Smith, C.M.G.	2,500
Chief Justice, J. A. L. Wiseham	2,280
Financial Secretary, P. A. Gore	2,160
Attorney-General, L. Weston, Q.C.	2,160
Director of Medical Services, Dr. S. H. O. Jones, C.B.E.	2,280
Director of Agriculture, J. A. Austin, O.B.E.	1,620
Director of Public Works, J. S. Pullinger	1,740
Commissioner for Local Government, M. H. Orde	2,160
Principal Auditor, D. W. Dunlop	1,500
Commissioner of Police, E. C. Eates	1,620
Director of Education, A. M. Gregory	1,620
Director of Marine Lt.-Cdr. G. H. Cunningham, M.B.E., R.N. (*ret.*)	1,620
Accountant-General, H. R. Monday, O.B.E.	1,500
Collector of Customs, J. G. Forster	1,500
Postmaster-General, E. C. Sowe, O.B.E.	1,500
British Council Representative, Bathurst, E. R. Evans.	

Bathurst is distant from London, 2,600 miles; transit about 10 days. A twice weekly air service reduces transit time to 34 hours.

GIBRALTAR,

a rocky promontory, 3¾ miles in length, ¾ of a mile in breadth and 1,396 feet high at its greatest elevation near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. The estimated population (1959) is 25,721.

Ψ Gibraltar is a naval base of vital strategic importance to Great Britain. It was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and was ceded to Great Britain by the Treaty of Utrecht, 1713. Several attempts have been made to retake it, the most celebrated being the great siege in 1779–83, when General Elliot, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. It is a popular tourist centre. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit, perfumery, coffee, fuel oil, motor vehicles, radios, cameras and cinematograph projectors, mechanical lighters, razor blades, watches and clocks.

The Department of Education runs 8 secondary schools and 14 primary and infant schools. There are also 3 private infant schools. Teacher training and University Scholarships have been provided. 4,142 pupils are at present in Government schools, and the Government expenditure on education in 1959 was £116,092.

FINANCE AND TRADE

	1958	1959
Revenue	£1,463,236	£1,480,610
Expenditure	1,452,853	1,592,445
Imports from U.K.	3,988,467	3,645,359

GOVERNMENT

Under the Constitution promulgated in 1950 and amended in July, 1956, the Governor is assisted by a Legislative Council and an Executive Council. The Governor is the President of the Legislative Council, which has 3 *ex officio* members, 7 elected and 2 nominated members (of whom both may, and one must, be unofficial). An independent Speaker for the Legislative Council was appointed on May 24, 1958, and normally presides over sittings of the Council.

Governor and Commander-in-Chief, His Excellency General Sir Charles Keightley, G.C.B., G.B.E., D.S.O. (1959) (*including* £750 *entertainment allowance and* £500 *from Army funds*)	£6,250
Flag Officer, Gibraltar, and Admiral Supt., H.M. Dockyard, Gibraltar, Rear Admiral P. F. Powlett, D.S.O., D.S.C.	
Deputy Fortress Commander and O.C. Troops, Brigadier C. G. Buttenshaw, D.S.O., O.B.E.	

Chief Justice, H. J. M. Flaxman, C.M.G.	£2,050
Speaker, Maj. J. Patron, O.B.E., M.C.	
Colonial Secretary, J. D. Bates, C.M.G., C.V.O.	2,050

Director of Labour and Social Security, D. I. Goodwin..... £1,400

Distance, 1,209 miles; transit, 3½ days. B.E.A. have a daily air service from U.K. *vià* Madrid (transit time 4 hrs. 25 mins.).

HONG KONG

The Crown Colony of Hong Kong, consisting of a number of islands and of a portion of the mainland, on the south-eastern coast of China, is situated at the eastern side of the mouth of the Pearl River, between 22° 9′ and 22° 37′ N. lat. and 113° 52′–114° 30′ E. long.

The capital city, Victoria, situated on the island of Hong Kong, is 91 miles S.E. of Canton and 40 miles E. of the Portuguese colony of Macao at the other side of the Pearl River. It lies along the northern shore of the island and faces the mainland; the harbour (16 sq. miles water area) lies between the city and the mainland, on which is situated Kowloon with a population equalling that of Victoria. The total area of the Colony is 398½ sq. miles with a population which has varied considerably during recent years owing to unsettled conditions in China. In Dec. 1959 it was thought to be about 2,919,000.

The island of *Hong Kong* is about 11 miles long and from 2 to 5 miles broad, with a total area of 29 square miles; at the eastern entrance to the harbour it is only separated from the mainland by a narrow strait (Lei Yue Mun), 500–900 yards in width. It was first occupied by Great Britain in January, 1841, and formally ceded by the Treaty of Nanking in 1842; *Kowloon* was subsequently acquired by the Peking Convention of 1860; and the *New Territories*, consisting of a peninsula in the southern part of the Kwangtung province, together with adjacent islands, by a 99-year lease signed June 9, 1898.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is 1,805 feet high. The New Territories contain several peaks higher than this, the highest being Tai Mo Shan, 3,140 feet. The summer weather is continuously hot and humid and often cloudy and showery. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The mean monthly temperature ranges from 59°F. in February to 82°F. in July, the average for the year being 72°F. The temperature rarely exceeds 95°F. in summer or falls below 40°F. in winter. The average annual rainfall is 84·76 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Communications.—Hong Kong, one of the world's finest natural harbours, possesses excellent wharves and dry docks, capable of holding vessels up to 750 ft. in length. Shipping tonnage for the year ending March, 1960, was 32,490,405. A railway, 22 miles in length, owned by the Government, runs between Kowloon and the Chinese frontier. It forms a direct overland communication with Canton, Hankow and Shanghai, but since October, 1949, all through passenger traffic has been suspended.

Hong Kong Airport is at Kai Tak on the north and west shores of Kowloon Bay, some 4 miles from the centre of Kowloon, and is regularly used by 19 international airlines including one locally registered airline, which provide frequent services to Europe, U.S.A., Canada, Australia and neighbouring territories, China excepted. The Colony is an important link on the main air routes of the Far East. B.O.A.C. operates 11 services per week to London, two of these being on the longer route *vià* Singapore, two *vià* Tokyo and San Francisco, three on the more direct route *vià* Bangkok, two *vià* Rangoon and one *vià* New Delhi. A new runway was completed at Kai Tak in September, 1958, and the completion of approach lighting in June, 1959, permits 19-hour operations by the most modern types of aircraft. A flying boat base is adjacent to the airfield.

Education.—In March, 1960, there were 1,600 schools with 516,157 pupils. 32 per cent. of all schools are financed wholly or in part by the Government. The University of Hong Kong has a full-time residential student strength of 1,243 (including 338 women) in Faculties of Arts, Science, Medicine, Engineering and Architecture. There are also an Institute of Oriental Studies and a Department of Extra-Mural Studies.

Finance

	1958–59	1959–60

Public expenditure....	589,958,367	709,953,995

$=Hong Kong Dollar=1s. 3d.

Trade

Since the United Nations embargo on trade with China imposed severe limitations on Hong Kong's traditional *entrepôt* economy, the pattern and direction of the Colony's trade have changed fundamentally. A different type of *entrepôt* trade has developed on a smaller scale, involving all countries in the Far East, with Hong Kong as an intermediary. However, re-exports now represent little more than 25 per cent. of total exports. This has been due to the rapid growth of domestic industry, mainly manufacturing for consumers, which now provides the bulk of goods for the export trade. The Colony's products include a wide range of cotton piecegoods, cotton yarn, rayon and silk brocades, clothing, household enamel and aluminium ware, plastic articles (including toys and artificial flowers), rattan and hardwood furniture, foodstuffs and beverages, basketware, jade and ivory, and an extensive range of metal products.

Recent industrial developments include the manufacture of stainless steel cutlery and a rapid expansion of heavy industry in ship-breaking and steel-rolling. Progress has been made also in the production of cameras and, more recently, transistor radios. A new factory is also in operation which is capable of manufacturing to order industrial component parts of all types for which precision engineering is required.

The adverse balance on visible trade is offset by a favourable balance on invisible account—remittances from overseas Chinese, exchange, shipping and insurance profits, and the spending of tourists, etc. In 1959 Hong Kong's principal customers for its domestic products, in order of value of trade, were U.S.A., the United Kingdom, Malaya, Japan, Thailand, the Federal Republic of Germany, Canada and Australia. China continued to be the Colony's principal supplier, followed by Japan, the United Kingdom, U.S.A., Thailand, Pakistan and the Federal Republic of Germany.

Trade with U.K.

	1958	1959
Imports from U.K.....	£30,507,065	£35,145,079
Exports to U.K.....	27,068,887	33,526,107

Government

Hong Kong is administered as a Crown colony with a Governor, aided by an Executive Council, consisting of 6 official and 6 unofficial members, and a Legislative Council, which consists of nine official and eight unofficial members. There is also an Urban Council in which is vested, *inter alia*, power of making bye-laws in respect of certain matters of public health and sanitation.

KENYA

The Colony and Protectorate of Kenya is bisected by the equator and extends approximately from latitude 4° N. to latitude 4° S. and from longitude 34° E. to 41° E. From the coast of the Indian Ocean in the east, the borders of Kenya are with Somaliland in the east and Ethiopia and Sudan in the north and north-west. To the west lie the Uganda Protectorate and Lake Victoria. On the south is Tanganyika Territory. The total area is 224,960 square miles (including 5,224 square miles of water). The total estimated population in mid 1959 was 6,450,000, including 66,400 Europeans, 170,000 Indo-Pakistans and Goans, and 37,100 Arabs.

The Territory is divided into 6 Provinces (Nyanza, Rift Valley, Central, Coast, Southern and Northern) and an Extra-Provincial District (Nairobi).

Kenya Protectorate consists of a strip extending 10 miles inland along the coast from the Tanganyika mandated territory frontier to Kipini and the islands of the Lamu Archipelago. The Protectorate also includes the Witu Protectorate, a small tract of country at the mouth of the Tana River.

Production.—Although the Colony lies astride the Equator, the range of altitude from sea level to 17,000 feet enables most types of crops, both indigenous and introduced, to be grown. In the coastal region the principal crops are copra, maize, sisal, sugar and cotton, while the yield of a comparatively new crop, cashew nuts, is steadily increasing. Passing from the coastal strip the country becomes flat, dry and in some places semi-desert of very little agricultural value. At about two hundred and fifty miles inland the first rise of the Kenya Highlands is met. Part of this extremely fertile upland area at altitudes between 5,000 feet and 9,000 feet is cultivated by some thousands of European farmers who produce among other crops wheat, coffee, maize, sisal, wattle, pyrethrum and tea. Extensive herds of native and imported stock are maintained, and there is considerable production of meat and butter. Some 7,000,000 acres are under white occupation in this area. There are also very extensive forests in the Highlands, cedar for the pencil industry being a valuable export. The value of domestic exports in 1958 was £29,300,000. Contributing to this total were sisal (£228,000), coffee (£10,405,000), hides and skins (£1,081,000), tea (£3,217,000), and pyrethrum (£1,289,000).

Prospecting and mining are carried on in many parts of the Colony, the principal minerals at present produced being soda ash, salt, limestone, gold, kyanite and diatomite. The value of the production of main minerals in 1958 was as follows: refined gold, £96,269, soda ash £1,275,826, cement £1,895,542, salt £146,810, diatomite £60,044, carbon dioxide gas £48,629, graphite £32,987.

Hydro-electric power has been developed, particularly on the Upper Tana River and electricity is now available in Nairobi from the Owen Falls Dam scheme in Uganda.

Since the end of the war there has been a great increase in the number of secondary industries, many of which are engaged in processing agricultural produce but which also manufacture an increasing range of products from local and imported raw materials to meet the needs of the East African Territories. Industrial areas are being developed or planned in all the principal towns.

The main imports are manufactured goods, classified chiefly as materials, machinery and transport equipment, mineral fuels, lubricants and related materials.

Communications.—The postal service handled 65,658,904 postal packets in 1958. The telegraph and telephone system has nearly 122,000 miles of line. The number of telephones exceeds 34,000. A cable connects Mombasa with Zanzibar, and a wireless station in Nairobi works direct with the United Kingdom, providing both telegraph and telephone facilities. There is a coast wireless station at Mombasa with a radio-telephone service for the marine mobile service. Telephone and/or telegraph communication by both line and radio exists in the majority of the settled areas of the Colony and to Uganda, Tanganyika, Belgian Congo, Nyasaland and South Africa.

The East African Railways and Harbours are a self-contained and self-financing service of the East Africa High Commission; the railway, which is metre gauge, has a total route mileage of open line of 3,402 miles, made up as follows: Kenya and Uganda Section—Main Line: Mombasa–Kampala–Kasese (1,081 miles); Principal Lines: Nakuru Junction–Kisumu (131), Tororo–Soroti (100), Voi–Kahe Junction (94); Minor and Branch Lines: Rongai–Solai (27), Kisumu–Butura (43), Lseeru–Kitale (41), Mbulamuti–Namasagali (19), Kampala–Port Bell (6), Gilgil–Thomson's Falls (48), Nairobi–Nanyuki (145). The Konza–Lake Magadi Line (91 miles) is worked but not owned by East African Railways

and Harbours. Tanganyika Section—Main Line; Dar-es-Salam–Kigoma (779 miles); Principal Line; Tabora–Mwanza (236): Branch Line: Kaliuwa–Mpanda (231). The Tanga Line runs from Tanga to Arusha (273 miles). Southern Province Railway: Mtwara–Nachingwea (132 miles); Chilingula–Masasi (25 miles). In addition the Administration operates a marine service on Lakes Victoria, Kioga, Albert and Tanganyika, and also on the River Nile, with a route mileage of 6,311 miles. There are also 2,685 miles of road services connecting the Central and Tanga Lines and providing regular transport to the Southern and Usambara Highlands, with subsidiary road services in Kenya and Uganda. East African Railways and Harbours control the five seaports of Mombasa, Tanga, Dar-es-Salaam, Lindi and Mtwara. Mombasa, Dar-es-Salaam and Mtwara have deep-water berths and Tanga and Lindi are lighterage ports.

Scheduled trunk airline services during 1957 were operated to or through Kenya, from Embakasi airport near Nairobi, by B.O.A.C., Air India, South African Airways, Air France, Central African Airways, Scandinavian Air Services, Airwork and Hunting Clan, while regional scheduled services were also run by East African Airways, Sabena, Ethiopian Air Lines, Aden Airways and Alitalia.

Road affairs are under the control of the Road Authority. Capital funds are allocated to the Authority by the Colony's Development Committee.

There are in the Colony 3,780 miles of trunk roads, 5,490 miles of secondary roads and 6,695 miles of grant earning minor roads, and in the Northern Frontier Province and African Areas there are in addition approximately 8,900 miles of administrative tracks. Fewer than 500 miles of road throughout the Colony are as yet bitumen surfaced and funds for the extension of this mileage are urgently required, as the gravel (murram) roads are proving increasingly difficult to maintain in the light of the growing traffic density. At the end of 1958 more than 73,000 vehicles were licensed, an increase of approximately 8 per cent. over the previous year.

Finance

	1957–58	1958–59*
Revenue	£39,698,674	£33,928,191
Expenditure	41,008,003	41,489,375

* Revised estimates.

The funded public debt at June 30, 1958, was £54,506,600.

Trade

	1957	1958
Imports	£87,995,252	£77,029,000
Exports	26,361,341	29,300,000

Trade with U.K.

	1958	1959
Imports from U.K.	£27,179,386	£29,343,830
Exports to U.K.	12,711,667	14,361,476

Since 1949 the Customs Departments of Kenya, Uganda and Tanganyika have been amalgamated under the title of the East African Customs and Excise Department as an East Africa High Commission Service.

Government

The Colony and Protectorate is administered by the Governor and Commander-in-Chief, who is advised by a Council of Ministers. There is provision for 16 Ministers, of whom not more than 8 and not less than 6 shall be public officers. There is also provision for not more than 6 Assistant Ministers who may be appointed by the Governor to assist the Ministers.

The Legislative Council consists of a Speaker, appointed by the Governor; *ex officio* members, who are for the time being Ministers or temporary Ministers, but not otherwise members of the Legislative Council; 36 constituency elected members of whom 14 are European; 14 are African; 6 are Asians, of whom 2 are Muslims; and 2 are Arabs; specially elected members, at present 12, elected by the legislative members sitting as an electoral college, of whom 4 are European, 4 are African, 2 are non-Moslem Asian, 1 is a Moslem Asian and 1 is an Arab; and nominated members, at present 20, nominated by the Governor. In addition a Council of State has been established and may consist of a chairman with not more than 16 and not less than 10 members. At present a chairman and 10 members have been appointed.

Governor and Commander-in-Chief, His Excellency Sir Patrick Muir Renison, K.C.M.G., (1959) *(and allowances)*	£10,500

Nairobi, the Capital City and seat of Government is situated at latitude 2° S. and longitude 36° 8′ E. at 5,500 feet above sea level, and has a population of about 100,000. It is 307 miles by road from Mombasa, the Colony's port and is also the site of Africa's most modern airport, opened in 1958. Mombasa possesses what is perhaps the finest harbour on the East Coast of Africa and is well served by shipping lines from Europe and Asia besides a frequent coastal service. Other centres are Eldoret, Kisumu, Lamu, Nakuru and Nyeri.

Nairobi: transit from London about 16 days by sea; by air, 1 day.

LEEWARD ISLANDS

(*See* WEST INDIES)

THE MALDIVE ISLANDS

The Maldive Islands 420 miles south-west of Ceylon, are a number of islands naturally divided into groups. There are 17 such groups, forming 17 atolls. The total number of islands is over 7,000, some being very small indeed. They are richly covered with coconut palms, and yield millet, fruit and edible nuts. About 215 islands are inhabited. The old form of Government was abolished in 1932, and a new Constitution was introduced. In February, 1954, after a short period of republican government, the Sultanate was restored. The international relations of the Maldives, which is a Protected State, are conducted by the United Kingdom Government, which continues to protect the Islands.

Population is from 85,000 to 90,000. The people are Moslems. They are highly civilized and are great navigators and traders.

The Capital of the Maldives is Malé, on King's Island.

U.K. Representative, H. A. Arthington-Davy M.B.E. (1960).

MALTA, G.C.

an island in the Mediterranean Sea, 60 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 94·9 square miles. The colony includes also the adjoining island of *Gozo* (area 25·9 sq. miles): *Comino* and several islets. The estimated population in January, 1959 was 323,970.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in A.D. 58. In 870 it was taken by the Arabs, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Normandy. It passed successively under the rule of the Angevins and Aragonese, and followed the fortunes of their kingdoms. In 1530 it was handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grandmaster La Valette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and, with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then, at their own wish, admitted into the British Empire, the act being confirmed by the Treaty of Paris in 1814.

Malta was again closely besieged in the last war and again withstood the attacks of all its enemies. From June, 1940, to the end of the war, 432 members of the garrison and 1,540 civilians were killed by enemy aircraft, and about 35,000 houses were destroyed or damaged.

The Parliament of the United Kingdom made a free grant of £10,000,000 for restoring war damage, and a further grant of £20,000,000 was subsequently made for the same purpose and for general construction and replanning.

The climate, although not tropical, is hot in summer. The islands are intensively cultivated. The chief export crops are potatoes and onions. Wheat, barley, clover and tomatoes are extensively grown on dry lands, while on irrigated land all the usual temperate climate and sub-tropical vegetables are grown. Tomatoes are grown on irrigated and non-irrigated land. Agriculture and fishing are among the principal occupations of the inhabitants.

Mdina (Notabile), the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Old Seminary; its population has now dwindled to 836, but its suburb, Rabat, has 12,977 inhabitants. Notabile has been entirely eclipsed in importance by the modern capital, Ψ Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet and N.A.T.O. Mediterranean Command.

Malta possesses a University (about 300 students) and 2 Lyceums (1,632 boys); 4 grammar schools (1,558 girls); 109 Government primary schools (55,251 pupils); and 5 technical schools (875 students). There are numerous private elementary and secondary schools. English and Maltese are the only languages taught in the Government primary schools. In religion the Maltese are Roman Catholics. The Maltese language is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phœnician tongues. There is a Maltese order of nobility, recognized by the Crown, consisting of 28 families.

English and Maltese are the official languages of administration and Maltese is the official language in all the Courts of Law and the language of general use in the islands. The Court may order the use of the English language in any proceedings before it where any party or any accused person does not speak Maltese as the principal language to which he is accustomed; but when all parties or accused persons are English-speaking, the use of English is obligatory. Where the proceedings are in a language not known to the party or parties or to the accused they are translated. In 1934, Maltese was substituted for Italian as the principal language of the Courts of Law.

FINANCE

Only notes issued by the Commissioners of Currency are now legal tender. In addition, British coins, including silver, cupro-nickel and bronze coins, are legal tender.

TRADE WITH U.K.

	1958	1959
Imports from U.K.....	£10,842,094	£10,822,952
Exports to U.K.....	1,020,475	991,141

The principal imports for home consumption are foodstuffs—mainly wheat, meat and bullocks, milk and fruit—fodder, beverages and tobacco, fuels, chemicals, textiles and machinery (industrial, agricultural and transport). The chief domestic exports are scrap-metal, hides and skins, potatoes and onions, smoking requisites, gloves, hosiery, buttons, beer, mineral waters, canned fruits, edible oil and tallow.

CAPITAL, Ψ Valletta. Population (1958) 18,515.

MALTA'S NATIONAL DAY is September 8, commemorating the raising of the sieges of 1565 and 1940–43.

GOVERNMENT

By Letters Patent dated September 5, 1947, self-government was re-established in Malta, on the basis of a division of responsibility between the Maltese Imperial Government (representing the interests of the United Kingdom) and an elected government of Malta. Under this system the Maltese Legislature could not pass laws touching the public safety or defence of Her Majesty's dominions and the general interests of British subjects outside Malta. In addition to this general reservation, certain subjects were specifically withheld from the Legislature's competence. The principal subjects so reserved dealt with the defence of the island and naval, military or air force matters generally, aliens, immigration, currency and treaties and relations with foreign states. Laws dealing with "reserved matters" could be made by the Governor subject to Her Majesty's approval, or by Order in Council.

The Governor was assisted by two Councils: the Executive Council, containing Maltese Ministers, which was in effect a cabinet, and the Nominated Council, consisting of the Lieutenant-Governor, the Legal Secretary (as *ex officio* members), and the three Heads of Services from the Royal Navy, Army and Royal Air Force. There was also a Privy Council consisting of the members of these two bodies together.

Following protracted and unsuccessful negotiations between the Maltese Cabinet and the United Kingdom Government on economic matters, the then Ministers resigned on April 21, 1958, and the Legislative Assembly was dissolved. The Governor assumed direct responsibility for the administration of the islands and on April 29 proclaimed a state of public emergency in view of the necessity to legislate in the absence of Ministers and of the disturbances which had taken place.

On August 18, 1958, Her Majesty's Government announced its intention of inviting the Maltese political parties to join in discussions on future constitutional arrangements in November of that year. These discussions were duly held in London, but no common basis for progress could be found. In consequence, Her Majesty's Government revoked the 1947 Constitution and introduce on April 15, 1959, a new interim Constitution, whereby the former "dyarchy" disappeared, and a unitary form of government took its place, headed by the Governor himself, who is advised by an Executive Council comprising both officials and nominated members. Her Majesty's Government has announced its intention of holding further constitutional talks with the Maltese political parties, with a view to the restoration of self-government, when the political situation offers the prospect of such discussions proving fruitful.

MAURITIUS

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17′–57° 46′ E. long. and S. lat. 19° 58′–20° 33′, and comprising with its dependencies an area of 895 square miles. The resident population at the census of 1952 was 501,415, made up of Indians, Europeans (mainly French), and persons of mixed descent. The total population, including dependencies, was estimated (Dec. 31, 1958) at 632,721.

Mauritius was discovered in 1511 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1638 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Isle de France, but did not settle it until 1721. Under the French it became a great centre of trade. In 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule though the ancient name, Mauritius, was restored.

Of the total cultivable area of about 220,000 acres, 204,000 are under sugar, about 1,700 under aloe (regular plantations), 1,000 under maize, 4,000 under tea, 1,100 under tobacco and the rest under other foodcrops and mixed farming. The sugar crop of 1959 was about 580,000 metric tons.

Situated just within the tropics but being a small land mass in a large ocean area, Mauritius has a climate more subtropical than tropical except at low altitudes. In summer conditions are sometimes trying because of high humidities and light winds rather than because of the relatively high temperatures. The island lies in that region of the South Indian Ocean where tropical cyclones are most frequent. At times, as in 1892, 1931, 1945 and 1960 they are very severe and do much damage to crops and buildings.

Railways and Shipping.—There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes entirely through Port Louis. The shipping entered in 1959 amounted to 1,384,967 tons, and the shipping cleared to 1,391,220 tons. In 1959 there were 82 miles of railway (4 ft. 8½ in. gauge). 76 post-offices and postal agencies, 48 telegraph offices and 15 telephone-exchange offices in the island, with 210 miles of telegraph, including block telegraph of the railway and 11,140 miles of underground and overhead (Government) telephone wires and 8,673 telephone installations.

Civil Aviation.—The island is linked by air with Africa, U.K. and Europe through the scheduled services of *Air France*, twice weekly with Starliner aircraft. South African Airways, flying DC7B aircraft, and Qantas Empire Airways with Super Constellations, provide scheduled services from South Africa and Australia respectively, *viâ* Mauritius and Cocos Islands.

The inhabitants of European descent are mostly Roman Catholic. Educational facilities are available up to University entrance level. Primary education is provided in 559 schools, of which 113 are Government, 76 aided and 370 unaided schools. There are 4 Government secondary schools, 3 for boys (one being a Technical Institute) and 1 for girls, and 66 non-Government secondary schools, 8 of which are grant-aided.

The necessities of life have all to be imported from abroad. 85 per cent. of the island's trade was with Great Britain and other Commonwealth countries in 1959.

GOVERNMENT

The Government is vested in a Governor with an Executive and Legislative Council. The Mauritius (Constitution) Order in Council, 1958, provides for a Legislative Council consisting of the Speaker (appointed by the Governor from outside the Council), three *ex officio* members (the Colonial Secretary, the Attorney-General and the Financial Secretary), forty elected members and such nominated members not exceeding 12 in number as the Governor may appoint.

The Colony is divided into 40 single member Constituencies and every person (male or female) has the right to vote who—(*a*) is a British subject of the age of 21 years or upwards; and (*b*) has resided in the Colony for a period of at least 6 months immediately before the date of registration or is domiciled in the Colony and is residing therein at that date; and (*c*) has resided in the constituency in which he claims to be registered as a voter for a period of at least 6 months immediately before the date of registration.

The Executive Council consists of the 3 *ex officio* members above mentioned and 9 appointed members. The appointed members are persons who are elected or nominated members of the Legislative Council and are appointed by the Governor acting in his discretion. The *ex officio* members and the appointed members are all styled Ministers. The Ministerial system was established in July, 1957 in anticipation of the constitution provided in 1958.

CAPITAL, ΨPort Louis. Population (1959), 87,550; other centres are Curepipe (27,900), Beau Bassin and Rose Hill (35,550), Vacoas and Phoenix (35,250), Quatre Bornes (22,000) and ΨMahebourg (11,550).

DEPENDENCIES OF MAURITIUS

Rodrigues, 350 miles east-north-east of Mauritius, area, 40 square miles. Population (1959) 17,443. Cattle, beans, salt fish, sheep and goats are the principal exports. The island is under the administration of a Magistrate and Civil Commissioner from Mauritius, who takes his orders from the Governor of Mauritius. *Magistrate*, C. Rochecouste.

Trade with Mauritius

	1958	1959
Total imports	Rs.3,857,514	Rs.4,425,040
Total exports	1,709,575	1,250,985

Other Dependencies.—Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coconut oil. The most important are the Oil Islands Group, the largest of which, Ψ*Diego Garcia* (pop. 1958, 625), lies on the direct route from the Red Sea to Australia, and possesses a good harbour; other islands are Six Islands, Peros Banhos, Agalega, St. Brandon, Salomon, and Trois Frères. The island's and the "Other Dependencies" is about 47½ square miles, with a population (1958) of 1,815.

Trade with Mauritius

	1958	1959
Imports	Rs.955,663	Rs.554,491
Exports	1,263,244	1,362,895

THE NEW HEBRIDES

The New Hebrides Group, in the South Pacific Ocean, situated between the 13th and 21st degrees of South latitude and the 166th and 170th degrees of East longitude, of an area of roughly 5,700 square miles, is administered by a British-French Condominium Government.

The principal islands are Espiritu Santo, Malekula, Epi, Ambrym, Efate or Sandwich, Erromanga, Tanna, Aneityum, Aoba, Maewo and Pentecost. The British Resident Commissioner, exercising powers delegated to him by the High Commissioner for the Western Pacific, and the French Resident Commissioner, representing the High Commissioner for France in the Pacific Ocean, are the joint heads of the Administration. They each have small staffs of national officers who assist them in general administrative work and the running of social services (health and education) financed from national funds, part of which come from the Metropolitan Governments. In addition they jointly control the "mixed" public services (posts and telegraphs, public works, mines, meteorology, etc.) which are financed from funds raised in the Territory. The population (1959) was 61,210, of which 56,739 is the estimated number of native inhabitants. Principal products are copra, coffee, cocoa, kauri timber and sandalwood. Imports for 1959 totalled £2,036,020, of which £1,021,730 was the value of imports from Australia. Exports in 1959 were valued at £2,666,424, £2,033,768 being the value of exports to France. Joint revenue, 1959, £549,604; expenditure on joint services, £497,102.

Attached to the New Hebrides are the Banks (309 sq. miles, pop. 2,475) and Torres (40 sq. miles, pop. 164) Islands.

Seat of New Hebrides Administration—Ψ Vila, Efate, pop. about 1,900.

British High Commissioner, D. C. C. Trench, C.M.G., M.C.
French High Commissioner, L. Péchoux.
British Resident Commissioner, J. S. Rennie, C.M.G., O.B.E.
French Resident Commissioner, B. M. Favreau.

FEDERATION OF NIGERIA

The Federation of Nigeria is situated on the west coast of Africa. It is bounded on the south by the Gulf of Guinea, on the west and north by Dahomey and French Niger and on the east by the French Cameroons. A small portion of the old German colony of the Cameroons is administered by the United Kingdom under United Nations' Trusteeship as an integral part of Nigeria. The area including this portion is about 373,250 sq. miles. A belt of mangrove swamp forest 10–60 miles in width lies along the entire coastline. North of this there is a zone 50–100 miles wide of tropical rain forest and oil-palm bush. North of this the country rises and the vegetation changes to open woodland and savannah. In the extreme north the country is almost desert. There are few mountains except along the eastern boundary, where the highest peak is the 13,350-foot Cameroon Mountain. In Northern Nigeria, the central plateau rises to 6,000 feet, with an average level of 4,000 feet. The Niger, Benue, and Cross are the main rivers.

The climate varies with the types of country described above, but Nigeria lies entirely within the tropics and temperatures are high. Temperatures of over 100° in the north are common while coast temperatures are seldom over 90°. The humidity at the coast, however, is much higher than in the north. The rainy season is from about May to October; rainfall varies from under 25 inches a year in the extreme north to 150 inches on the eastern coast line. An area at the foot of the Cameroon Mountain has a freak rainfall of over 350 inches. During the dry season the *harmattan* wind blows from the desert: it is laden with fine particles of dust.

The 1952–53 Census returns gave a total population of 31,200,000 (Northern Region 16,800,000; Eastern Region 8,000,000; Western Region 6,400,000). It is estimated that at mid-1959 the total population was about 35,000,000. The population is almost entirely African. There are some 17,000 Europeans, Americans, Lebanese and others engaged in Government posts, commerce and Missionary work. The most important towns are Ψ Lagos (pop. 350,000), Ibadan (500,000), Kano (230,000), Iwo (100,000), Ogomosho (139,000), Oyo (72,000), Oshogobo (122,000), Onitsha (77,000), Ife (111,000), Abeokuta (84,000), Ilesha (72,000), Enugu (63,000), Aba (58,000), Yerwa (55,000), Katsina (53,000), Port Harcourt (72,000), Sokoto (48,000), Zaria (54,000).

Health Services.—The country has many formidable health problems, chief among which are annual outbreaks of smallpox and cerebrospinal fever (mainly in the Northern Region), and of yellow fever (mainly in the Eastern Region), and the widespread prevalence of malaria, yaws, bilharziasis, intestinal helminth infestations and malnutrition. These are being combated by the expansion of medical facilities as fast as finance and the training of staff will allow, the emphasis being on preventive medicine, raising the standard of living and education of the people. A University undergraduate teaching hospital was opened at Ibadan in November, 1957. Extensive campaigns have been organized against malaria, blindness and leprosy.

Education.—Education is the responsibility of the Regional Governments, the Federal Government retaining responsibility for education in Lagos and for those institutions of higher learning which have Nigerian significance, such as the University College and the University College Teaching Hospital at Ibadan, the Nigerian College of Arts, Science and Technology with branches at Zaria, Ibadan and Enugu, and the Man O' War Training Centre. Free and universal primary education for all children within the 6–12 year age group is now available in West and East Nigeria and in the Federal Territory of Lagos. About 3,000,000 pupils were enrolled at primary and higher schools in 1959.

Production and Industry.—Nigeria is mainly an agricultural country. Five of the country's main agricultural products, *viz.* palm-oil and palm kernels, cocoa, cotton, bananas (from the Cameroons) and ground-nuts are of the greatest importance in Nigeria's export trade (see figures under "Trade" below). Other crops include benniseed, capsicums, cassava, coffee, copra, guinea-corn, gum arabic, kola-nuts, maize, millet, plassava, rice, rubber, tobacco and yams. There are important tin and coal-mining industries, at Jos and Enugu respectively. The coal is mainly used within the country; in 1958, 860,128 tons were produced. Nigeria is the principal source of supply of the world's requirements of columbite. Timber and hides and skins are other major exports. Industrial products include soap, cigarettes, beer, margarine, groundnut oil, meal and cake, concentrated fruit juices, soft drinks, canned food, metal containers, plywood, textiles, ceramic products, cotton cloth and rubber shoes.

Railways.—The Nigerian railway system, which is controlled by the Nigerian Railway Corporation,

is the most extensive in any British Colonial territory. There are 1,770 route miles of lines. Construction of a 400-mile extension to Maiduguri was begun in Sept. 1958. There are two major bridges, one over the Niger at Jebba and one over the Benue at Makurdi. The latter is 2,624 ft. long, and it is believed to be the second longest in Africa. The North-western main line runs from Lagos to Kano (700 miles) through the important towns of Abeokuta, Ibadan, Ilorin, Jebba, Minna, Kaduna and Zaria. From Kano the line continues for another 143 miles in a north-easterly direction to its terminus at Nguru, and there is a branch line from Zaria *vid* Gusau to Kaura Namoda to serve north-western Nigeria. This line is also linked with Sokoto by a scheduled railway road service from Gusau. The eastern line runs from Port Harcourt deep-water quay on the Bonny river through the thickly populated oil palm area to Enugu, where it serves the collieries. It then crosses the Benue and joins the north-western line at Kaduna, 569 miles from Port Harcourt. A branch line of 63 miles from Kafanchan serves the tin mines at Jos. The railway hauled 2,739,000 tons of freight in 1958, and its passenger traffic totalled over 7,863,000 passengers. Train mileage exceeded 6,988,000.

Roads.—There are 36,007 miles of motorable road. Most of the roads have gravelled or earth surfaces, but about 4,031 miles are tarred. An extensive programme of bituminous surfacing is now being carried out.

Civil Aviation.—Trunk route services operated by British, Netherlands, French and Belgian airlines bring Nigeria within less than 20 hours of the Western European capitals and South Africa. There are also connections to French Africa and the United States. A network of internal air services connects the main internal centres. Passenger traffic on internal services totalled 73,473 during 1958. Comprehensive radio navigational aids are installed at Kano and Lagos airports, and basic radio navigational facilities are provided at the twelve other aerodromes in regular use. There is a network of meteorological reporting stations.

Federal Finance

	1958–59	1959–60*
Revenue	£74,172,005	£83,923,990
Expenditure	72,672,005	76,121,150
Public debt	17,050,000	17,050,000

* Estimated.

Revenue and Expenditure figures include statutory appropriations from Federal to Regional revenues.

Trade.—Exports to the U.K. include about one-third of the U.K.'s total cocoa imports, one-quarter of her tin imports, one-quarter of her dry hides, and 10 per cent. of her hardwoods.

	1957	1958
Total imports	£152,468,000	£166,906,000
Total exports	124,177,000	132,919,000
	1958	1959
Imports from U.K.	£65,898,052	£72,378,633
Exports to U.K.	79,806,966	87,354,258

The principal imports (1958) were cotton piece goods (£16,296,000), unmanufactured tobacco and cigarettes (£1,611,000), jute bags and sacks (£2,192,000), artificial silk piece-goods (£10,790,000), motor-vehicles and spares (£10,790,000), bicycles and spare parts (£1,390,000), other machinery (£28,179,000), cement (£4,101,000), corrugated iron sheets (£2,472,000), stockfish (£6,841,000), beverages (£3,934,000), and petroleum products (£6,208,000). The principal exports were cocoa (£26,795,000), tin ore (£3,937,000), groundnuts (£26,948,000), palm-kernels (£20,450,000), palm oil (£12,633,000), timber, sawn and logs (£6,251,000), hides and skins (£3,258,000), cotton (£7,845,000), bananas (£3,264,000), columbite (£1,457,000) and rubber (£7,626,000).

Government

Nigeria is divided into three Regions known as the Northern Region, the Eastern Region and the Western Region (with Regional Headquarters at Kaduna, Enugu and Ibadan respectively), the quasi-Federal Trusteeship Territory of the Southern Cameroons (with Headquarters at Buea), and the Federal Capital of Lagos. Eastern and Western Nigeria became self-governing in 1957 and Northern Nigeria in 1959.

The Federal Council of Ministers is an all-Nigerian body except for the Governor-General of the Federation, who presides over its meetings. A system of Ministries is now established and, with few exceptions, all Government departments are integrated into ministries as divisions. Provision exists for the creation of an upper house or senate.

In Western and Northern Nigeria there are a House of Assembly and a House of Chiefs. The Executive Council in each region is presided over by a Premier, and the Governor in each case has limited power and acts on the advice of his ministers. Eastern Nigeria has a House of Assembly, and legislation has been approved for the creation of a House of Chiefs. The Premier is the chief minister, presiding over the Executive Council, and the Governor acts as above.

The executive authority of the Federation extends to such subjects as external affairs, aviation, banks, census, customs, defence, police, shipping, mines and minerals, posts and telegraphs, trunk roads and railways. Regional Governments have administrative and executive responsibility for regional legislation, development plans, health, education, local government, agriculture, justice, finance, natural resources, regional public works, communications (other than those under Federal control), regional trade, industry and production and welfare.

Governor-General and Commander-in-Chief, His Excellency Sir James Wilson Robertson, G.C.M.G., G.C.V.O., K.B.E. (1955).

Federal Cabinet

Prime Minister, Hon. Sir Abubakar Tafawa Balewa, K.B.E.

Minister of Lands and Lagos Affairs, Hon. Mohammadu Ribadu, M.B.E.

Minister of Communications, Hon. Olu Akinfosile.

Minister of Transport and Aviation, Hon. R. A. Njoku.

Minister of Finance, Hon. Chief Festus Okotie-Eboh, C.M.G.

Minister of Commerce and Industries, Hon. Zana Bukar Mohammadu Dipcharima.

Minister of Health, Hon. Waziri Ibrahim.

Minister of Information, Hon. Theophilus Benson.

Minister of Education, Hon. A. Wachuku.

Minister of Labour and Welfare, Hon. J. M. Johnson.

Minister of Works and Surveys, Hon. Mohammadu Inua Wada.

Minister of Mines and Power, Hon. Maitama Sule.

Minister of Economic Development and Natural Resources, Hon. Shehu Shageri.

Minister of Internal Affairs, Hon. Usman Sarki.

Minister of Pensions, Establishment and Nigerianisation Hon. Yisa Yaradua.

Ministers of State, Hon. Matthew Mbu; Hon. M. Olarewanju.

EXECUTIVE COUNCIL, NORTHERN REGION

Governor, Northern Region, His Excellency Sir Gawain Bell, K.C.M.G., C.B.E.

Premier and Minister of Local Government, The Sardauna of Sokoto, K.B.E.

EXECUTIVE COUNCIL, EASTERN REGION

Governor, Eastern Region (vacant)

Premier and Minister of Internal Affairs, Dr. the Hon. Nnamdi Azikiwe.

EXECUTIVE COUNCIL, WESTERN REGION

Governor, Western Region, His Excellency the Oni of Ife.

Premier, Hon. Chief Samuel Ladoke Akintola.

JUDICATURE

Chief Justice, Federal Supreme Court, Sir Adetokunbo Ademola.

Chief Justice, High Court of Lagos and the Southern Cameroons, Sir Marie de Lestang.

Chief Justice, Northern Region High Court, Sir Algernon Brown.

Chief Justice, Eastern Region High Court, Louis Mbanafo.

Chief Justice, Western Region High Court, R. Y. Hedges.

Commissioner in U.K., Abdul Maliki, Nigeria House, 9 Northumberland Avenue, London, W.C.2.

British Council Representative in Nigeria, A. W Steward, O.B.E.

CAMEROONS

(Trusteeship Territory of the Cameroons)

The German Protectorate of *Kamerun* on the west coast of Africa between (British) Nigeria and French Congo was obtained by conquest by Franco-British forces during the War of 1914–18.

The approximate geographical limits of the German territory were 2°–12° 30′ N. lat. and 8° 30′–16° E. long. and the area was about 177,496 square miles. By the Milner-Simon Agreement of July 10, 1919 the whole area was divided into a British sphere (about 34,081 square miles) and a French sphere (about 143,415 square miles). In 1922 the territories were placed by the League of Nations under British and French Mandates, and in 1946 by the United Nations under British and French Trusteeship. The Cameroons under United Kingdom administration marches the whole distance of the Nigerian Eastern boundary, save for one short break. A census conducted in 1952 and 1953 showed the population of the British sphere to be 1,440,000.

The two narrow strips of territory reach from the Atlantic Ocean to Lake Chad, a distance of 700 miles, and lie diagonally between 4° 12 30′ N. lat. and 8° 30′–14° 45′ E. long. The nature of the country varies to a remarkable extent, from the coastal mangrove swamps and thick forest regions to the grasslands at heights of 4,000 ft. to 7,000 ft. and more, and again to sandy and swampy areas in the region of Dikwa and Lake Chad. The highest point is the peak of the Cameroon Mountain, which rises to a height of 13,350 ft. It is volcanic and erupted in 1959, when a considerable volume of lava was discharged without doing any serious damage.

The Cameroons under United Kingdom administration is administered as part of Nigeria. The Northern areas, which are administered as part of the Northern Region of Nigeria, are administered by the Residents of the adjoining Provinces of Adamawa, Bornu and Benue. The Executive Council of the Northern Region of Nigeria includes a Minister with a portfolio for Northern Cameroons Affairs who is a representative of the Territory. The Southern section, formerly administered as two provinces of the Eastern Region of Nigeria, became, on October 1, 1954, quasi-federal territory within the Federation of Nigeria, with its own Legislature (known as the Southern Cameroons House of Assembly) and Executive Council, competent, subject to the assent of the Governor-General of Nigeria, in all matters reserved to the Regions by the Federal constitution of Nigeria. In 1958 further changes were made in the constitution, the first Premier was appointed and portfolios distributed to unofficial members of the Executive Council.

Cattle breeding and the production of guinea corn are the chief occupations of the population of Dikwa, which consists mainly of Shuwa Arabs and Kanuri. The inhabitants of the areas which for administrative purposes form part of the Adamawa Province are mostly primitive hillmen whose chief occupation is agriculture. Cattle breeding and agriculture, of which coffee is becoming the main economic crop, are the chief occupations in the Bamenda area, which consists mostly of high grassland.

The country nearer the sea-coast is rich in timber, and the volcanic soil of the lower slopes of the Cameroon Mountain is particularly fertile. 250,000 acres of this land, formerly German-owned plantations, have been leased to the Cameroons Development Corporation, which was set up in 1946 for the production of bananas, oil palm products, rubber and cocoa, almost all of which are exported. Profits earned by the Corporation accrue to the general revenue of the Southern Cameroons, in which section the properties operated by the Corporation are situated

The chief exports from the Territory are bananas, cocoa, rubber, palm oil and kernels, coffee and timber; the chief imports are textiles, motor spirit, provisions, ironware and salt.

A Colonial Development and Welfare allocation of about £1,500,000 will be available for the territory's development plan for 1955–60. The major part of this is devoted to the improvement of the territory's road system. Other schemes will include the provision of water supplies in urban and rural areas, the development of medical and health services and the expansion of educational facilities in the territory.

The seaports ΨVictoria and ΨTiko are connected with Buea and all divisional headquarters by motor road.

PACIFIC ISLANDS

(Western Pacific High Commission)

High Commissioner, His Excellency David Clive Crosbie Trench, C.M.G., M.C., (1961).....	(+*allce.* £A1,315)	£A4,375
Chief Secretary, M. D. I. Gass, C.M.G.....		£A2,800
Financial Sec., A. M. Wilkie		2,450
Legal Adviser and Attorney-General of British Solomon Islands Protectorate, J. N. Glover.....		2,450
Secretary for Protectorate Affairs, V. L. Andersen, O.B.E.		2,250
Senior Assistant Secs., T. Russell; L. M. Davies (*Finance*); D. G. Cudmore ..		1,885

The principal groups under the High Commissioner in, over, and for the Western Pacific Islands are (1) The Gilbert and Ellice Islands Colony; (2) The British Solomon Islands Protectorate; (3) The New Hebrides; (4) There are also a number of scattered groups and isolated islands, including Caroline, Flint, Malden, Starbuck and Vostock Islands, which are not attached to any group.

The Gilbert and Ellice Islands Colony, which includes Ocean, Christmas, Fanning and Washington Islands, besides the Gilbert, Ellice and Phoenix Groups, was formerly a Protectorate, and was formally annexed to the Empire in November, 1915. The total land area of the Colony is about 360 sq. miles with a population (Census, 1947) of 36,000 (304 Europeans, 142 Chinese, 29,923 Micronesians and 5,066 Polynesians), estimated at 44,993 at the end of 1959. Expressed in Australian currency, the estimated revenue of the Colony in 1959 was £539,876; expenditure £472,646.

The Government maintains one boys' boarding school and 21 primary schools. Village school primary education is mainly run by missionary societies, with financial assistance from the Government, and at the end of 1959 these schools were attended by 8,155 pupils.

The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° E. longitude, consists of 16 islands, Makin, Butaritari, Marakei, Abaiang, Tarawa (Headquarters of the Colony), Maiana, Abemama, Kuria, Aranuka, Nonouti, Tabiteuea, Beru, Nikunau, Onotoa, Tamana and Arorae. The area of the group is 114 sq. miles and the population (estimated 1959) 34,406. The *Ellice Group* of 9 islands (Nanumea, Nanumanga, Niutao, Nui, Vaitupu, Nukufetau, Funafuti, Nukulaelae and Nuilakita) lies between lat. 5° 30′ and 11° SE. and long. 176° E. and 180° E. The area of the group is 9½ sq. miles and the population (estimated 1958) 4,938. *Ocean Island* (or Banaba), in lat. 0° 52′ S. and long. 169° 35′ E. was proclaimed British in 1900. The *Line Islands* between lat. 4° 40′ and 2° N. and long. 160° 20′ and 157° W. include Fanning, Washington and Christmas Islands. *Fanning* and *Washington Islands* were included in the Colony in 1916, *Christmas Island* in 1919. Christmas Island is the largest atoll in the Pacific. The boundaries of the Colony were extended (March 18, 1937) to include the *Phœnix Islands* (Birnie, Canton, Enderbury, Gardner, Hull, McKean, Phœnix and Sydney Islands), between 3° and 5° S. and 170° and 175° W. Enderbury and Canton Islands are for common use of Gt. Britain and U.S.A. for aviation and communications, under an agreement made on April 6, 1939. Canton Island is an international airport on the Trans-Pacific route between Fiji and Honolulu.

In each island of the Gilbert and Ellice Groups (except Niulakita) and in two islands in the Phœnix Group there is a native Government under an appointed native magistrate whose court administers a code of native laws. The Colony is administered by the High Commissioner through a Resident Commissioner.

Resident Commissioner, Gilbert and Ellice Islands, Michael Louis Bernacchi, C.M.G., O.B.E., (1952) .....(+allce. £175) £A3,645

The British Solomon Islands Protectorate, established in 1893, now includes all the islands in the Solomons Archipelago S. and S.E. of the large island of Bougainville. The main islands in the Protectorate are Choiseul, Santa Ysabel, Shortland Group, Vella Lavella, Kolumbangara, Ganongga, Gizo, New Georgia, Florida, Guadalcanal, Russells, Malaita and San Cristobal, and the outlying islands of Bellona, Rennell, Santa Cruz, Vanikoro, Tikopia, Cherry, Mitre, Utupua, Swallow (or Reef Islands) and Duff Groups, Sikaiana (or Stewart) and Ontong Java (or Lord Howe Atoll). The Protectorate is situated between 5°–13° S. lat. and 155°–170° 20′ E. long. It has a total land area of about 11,500 square miles and ocean area of about 270,000 square miles, and an estimated population of 700 Eueopeans, 650 Chinese, Indians and Fijians, 108,000 Melanesians and 5,000 Polynesians. Estimated revenue (1960) £A1,576,340 (including Colonial Development and Welfare Funds (£A389,620) and Grant-in-Aid from the United Kingdom (£A408,270)); estimated expenditure (1960) £A1,576,340; imports (1959) £A1,554,741; exports £A2,436,951. The main imports are foodstuffs, consumer goods and building materials. Principal exports are copra and timber. The headquarters of the Western Pacific High Commission were moved from Suva in Fiji to Honiara, the capital of the British Solomon Islands Protectorate, in December, 1952, and the High Commissioner for the Western Pacific assumed the direct administration of the Protectorate on Jan. 2, 1953.

SOUTH PACIFIC COMMISSION

The South Pacific Commission, an advisory and consultative body set up by the six Governments responsible for the administration of island territories in the South Pacific region, recommends to the member Governments means for promoting the well-being of the peoples of these territories. It is concerned with social, economic and health matters. *Headquarters*, Nouméa, New Caledonia.

The Commission was established by an Agreement between the Governments of Australia, France, the Netherlands, New Zealand, the United Kingdom and the United States of America, signed at Canberra in 1947 and ratified on July 29, 1948. Until November 7, 1951, the area of the Commission's activities comprised territories lying generally south of the Equator from and including Netherlands New Guinea in the west to the French Establishments in Oceania and Pitcairn in the east. On November 7, 1951, an additional Agreement was signed extending the scope of the Commission to include Guam and the Trust Territory of the Pacific Islands under United States administration. The Commission consists of twelve Commissioners, two from each Government, and normally holds one session each year. The first Session was held in May, 1948.

There are two auxiliary bodies, the Research Council and the South Pacific Conference. There is a Research Council meeting yearly, which may be either a meeting of the full Council, or of one or other of its three main sections, specializing in health, economic development and social development. Members of the Council are appointed by the Commission and are selected for their special knowledge of the questions with which the Commission is concerned, and the problems of the Territories in these fields. The chief function of the Research Council is to advise the Commission what investigations are necessary. Arrangements to carry out those which are approved are the responsibility of the Secretary-General and other principal officers. The South Pacific Conference, which meets at intervals not exceeding three years, consists of delegates from the territories who may be accompanied by advisers.

Secretary-General, T. R. Smith.

Executive Officers, J. Barrau (*Economic Development*); Dr. R. Seddon (*Social Development*); T. K. Abbott (*Health*).

FEDERATION OF RHODESIA AND NYASALAND

AREA AND POPULATION

The Federation of Rhodesia and Nyasaland covers an area of over 485,000 square miles (S. Rhodesia, 150,333; N. Rhodesia 290,323; and Nyasaland 46,066 square miles), including approximately 9,380 square miles of water.

Population.—The estimated total population of the Federation (December, 1959) is 8,220,000 of all races (S. Rhodesia 3,030,000; N. Rhodesia 2,390,000; Nyasaland 2,800,000).

PHYSIOGRAPHY

Boundaries.—The Federation extends from latitude 22° 30′ South to latitude 8° 15′ South. On the South it is bordered by the Union of South Africa, on the West by the Bechuanaland Protectorate, and Portuguese West Africa, on the North-West and North by the Belgian Congo, on the North by Tanganyika and on the East by Portuguese East Africa.

Relief.—Most of Rhodesia is at an altitude of between 3,000 and 5,000 feet above sea level, the highest land lying on the eastern border of Southern Rhodesia where some mountains rise above 8,000 feet above sea level. In the large river valleys, the Zambezi, Sabi, Kafue and Luangwa, the level of the land falls to below 2,000 feet.

In Nyasaland the level of the littoral of Lake Nyasa and of parts of the Shire River Valley is 1,500 feet above sea level. Elsewhere the altitude varies between 2,500 and 7,000 feet with the crest of the Mlanje Mountain massif rising to 10,000 feet above sea level. Lake Nyasa itself, the greatest depth of which is 1,226 feet, is a southward extension of the Great Rift Valley.

Rivers.—Portions of the Zambezi River, Lake Nyasa, Lake Bangweulu, the Luapula River and the Chambeshi River are navigable and are extensively used by waterborne transport. The Federation has, however, no great natural waterways, either to provide access to the sea or to connect major industrial centres, but there are a number of large rivers which could be brought into the service of agriculture for irrigation and of power supplies for hydro-electric schemes. The recently completed Kariba Dam, on the Zambezi, is 284 miles long and 1,800 sq. miles in area, irrigates an area of 2,000 sq. miles, and provides hydro-electric power from the Copper Belt to Bulawayo. The principal rivers, in addition to the Zambezi, are—in Southern Rhodesia: the Sabi River and its tributaries (irrigation and power potentialities); the Hunyani River (already dammed at several points); and the Umfuli River (irrigation potentialities). In Northern Rhodesia: the Kafue River (power potentialities); the Mulungushi and Lunsemfwa Rivers (already supplying hydro-electric power to Broken Hill mine and town); and the Zambezi River at the Victoria Falls (supplying hydro-electric power to Livingstone). In Nyasaland: the Shire River (power and irrigation potentialities).

Climate.—Though the entire Federal area lies within the tropics most of it is at an altitude which gives climatic conditions favouring permanent European settlement. The main rainfall throughout the area is concentrated into a season extending from about November to March. Average rainfall (except for certain somewhat arid low-lying regions on the one hand and some high altitude areas of very heavy rainfall on the other) is in the vicinity of 25 to 30 inches a year.

GOVERNMENT

The Federation of Rhodesia and Nyasaland came into being on September 4, 1953, when the first Governor-General assumed office. The Order-in-Council authorizing the setting up of the Federation was approved by Her Majesty the Queen on August 1, 1953. An interim Ministry was sworn in on September 7. The first elections to the Federal Assembly took place on December 15, 1953. In the first months of the Federation only the minimum administrative machine was created and the Federal Government assumed its functions from the territories by degrees. By July 1, 1954, the Federal Ministries had taken over most of their duties.

GOVERNOR-GENERAL AND STAFF

Governor-General, His Excellency the Earl of Dalhousie, G.B.E., M.C.; *born* Oct. 17, 1914; *assumed office*, October, 1957
(+£3,500 *allce.*) £5,000
Official Secretary and Comptroller, Commander J. P. P. Michell, M.V.O., O.B.E., R.N. (*ret.*).
Aides-de-Camp, Capt. D. F. Myddelton; Flt.-Lt. J. Mussell.

THE FEDERAL MINISTRY

(November, 1956)

Prime Minister and Minister of External Affairs, Rt. Hon. Sir Roy Welensky, K.C.M.G.
(+£1,000 *tax free allce.*) £4,000
Minister of Transport, Hon. W. H. Eastwood, C.B.E. *£3,250
Minister of Commerce and Industry and of Posts, Hon. F. S. Owen *£3,250
Minister of Finance, Hon. D. Macintyre, C.B.E. *£3,250
Minister of Agriculture, Hon. J. C. Graylin *£3,250
Minister of Law, Hon. J. M. Greenfield, C.M.G., Q.C. *£3,250
Minister of Home Affairs and of Power, Hon. Sir Malcolm Barrow, C.B.E. *£3,250
Minister of Defence, Economic Affairs and for the Public Services, Hon. J. M. Caldicott, C.M.G. *£3,250
Minister of Education and of Health, Hon. B. D. Goldberg *£3,250
Minister of Works, Hon. G. W. R. L'Ange, C.B.E. *£3,250
Secretary, Office of the Prime Minister and External Affairs, F. H. N. Parry, C.B.E.
Deputy Secretary for Defence, M. B. Benoy.
Secretary for Transport, T. G. Gisborne, C.B.E.
Secretary for Commerce and Industry, D. H. Cummings, O.B.E.
Secretary for Home Affairs, A. D. Evans, C.B.E.
Attorney-General, R. A. Yates, Q.C.
Solicitor-General, M. W. Dennison, M.C.
Postmaster-General, W. Davidson.
Secretary for Education, D. C. Ferrer.
Secretary for Agriculture, C. A. Murray, O.B.E.
Secretary for Health, Dr. D. M. Blair, O.B.E.
Under Secretary for Power, T. S. Bell.
Secretary for Law and Government Solicitor, D. D. O'Donovan.
Secretary for Economic Affairs, J. Ward.
Secretary for the Public Service Commission, D. R. Allen.
Secretary for Finance, H. M. McDowell, C.B.E.
Under Secretary for Works, R. W. Petheram, M.B.E.
Comptroller and Auditor General, D. J. Morris.

* *Plus* £500 tax free allowance.

REPRESENTATIVES ABROAD

UNITED KINGDOM

Rhodesia House, 429 Strand, W.C.2

High Commissioner, Sir Gilbert Rennie, G.B.E., K.C.M.G., M.C.

UNITED KINGDOM

High Commissioner, M. R. Metcalf, C.M.G., O.B.E.
Deputy High Commissioner, H. G. M. Bass.
Military Adviser, Brig. C. J. R. Yeo, M.C.
Air Adviser, Wing Commander E. Evans.
Economic Adviser, J. W. Stoodley.

LEGISLATURE

The Federal Assembly consists of 59 members and is composed as follows: forty-four elected members (Southern Rhodesia, 24; Northern Rhodesia, 14; Nyasaland, 6); eight African elected members (Southern Rhodesia, 4; Northern Rhodesia, 2; Nyasaland, 2); 4 specially elected African members (Northern Rhodesia, 2; Nyasaland, 2); and three European members charged with special responsiblity for African interests, of whom one is elected in Southern Rhodesia and the other two appointed, one each by the Governors of Northern Rhodesia and Nyasaland.

The main matters on which the Federal Legislature has power to make laws are external affairs, defence, immigration, financial and economic affairs, inter-territorial roads, railways, European agriculture in the Rhodesias, posts and telegraphs, education except African primary and secondary education and Federal courts. In addition, there are a number of matters on which both the Federal and Territorial Legislatures have powers to make laws. They include the development of industries, electricity, scientific and industrial research, health, town planning, archives, census and statistics.

African Affairs Board.—A Standing Committee of the Federal Assembly, known as the African Affairs Board, consists of the three European members representing African interests and one of the elected African members from each territory. The Board makes representations to the Federal Government on matters within the authority of the Federation in the interests of Africans; to assist a Territorial Government, at its request, in the study of matters affecting Africans, and to draw attention to any Federal legislation of a differentiating character and to ask that it should be reserved for the signification of Her Majesty's pleasure.

Speaker of the Federal Assembly, Hon. T. I. F. Wilson, C.M.G.
Clerk of the House, Col. G. E. Wells, C.B.E., E.D.

FEDERAL SUPREME COURT

The Court, constituted under the Federal Constitution of 1953, came into being on July 1, 1955.

Chief Justice of the Federation, Rt. Hon. Sir Robert Tredgold, K.C.M.G.

Federal Justices, Hon. Sir John Clayden; Hon. F. A. Briggs.

The Chief Justices of Southern Rhodesia, Northern Rhodesia and Nyasaland are *ex officio* members of the Court.

DEFENCE

The Army of Rhodesia and Nyasaland, with headquarters in Salisbury is comprised of regular and territorial forces. The regular forces include a battalion of The Rhodesian African Rifles, a battalion of the Northern Rhodesia Regiment and two battalions of the King's African Rifles, units of the Rhodesia and Nyasaland Corps of Engineers, the Rhodesia and Nyasaland Corps of Signals, the Rhodesia and Nyasaland Army Service Corps, the Rhodesia and Nyasaland Medical Corps and the Rhodesia and Nyasaland Army Pay Corps. The Territorial Force comprises three active force battalions and four reserve battalions of the Royal Rhodesia Regiment, with headquarters at Salisbury, Bulawayo and Kitwe. There are also three major training establishments. The Federation has its own regular air force, the Royal Rhodesian Air Force, which is equipped with Canberra and Vampire jet aircraft, as well as trainers and transport aircraft.

EDUCATION

The Federal Government is responsible for all education other than that of Africans, that is for European, Asian and Coloured children. In July, 1959, the numbers of such children at school were as follows: Southern Rhodesia, 47,913 (170 schools); Northern Rhodesia, 16,822 (71 schools); Nyasaland, 3,819 (29 schools). In addition to the Government Schools, there are 59 State-aided private schools, attended by a further 79,456 children.

FINANCE

The seventh Federal Budget was presented on June 30, 1960. Loan vote estimates for 1960–61 totalled £12,214,825. £2,900,000 of the loan vote was applied towards meeting part of the fiscal year's expenditure on the Kariba hydro-electric project. This project is now estimated to cost £80,000,000 in its first stage. A total of £46,600,000 has been secured from external sources the International Bank contributing £28,600,000, the Colonial Development Corporation £15,000,000, the Commonwealth Development Finance Co. Ltd., £3,000,000 and £33,400,000 is being found from internal sources.

Revenue vote expenditure in 1960–61 is estimated at £63,073,068 against a total estimated revenue of £62,188,000.

	(1959–60) (Provisional)	(1960–61) (Estimated)
Revenue.....	£53,137,000	£62,188,000
Expenditure from revenue funds....	£54,211,000	£63,073,068
Expenditure from loan funds.....	£18,515,000	£12,214,825

The public debt amounted to £242,000,000 (provisional) at March 31, 1960.

Currency.—Federal currency is linked to British sterling and currency backing is held in London in balances, in British Treasury Bills and in Government securities issued in the United Kingdom. The Bank of Rhodesia and Nyasaland, which was established by an Act of the Federal Assembly in 1956, is responsible for the issue of the currency.

PRODUCTION, TRADE AND INDUSTRY

Agriculture.—European agriculture in Southern and Northern Rhodesia is the administrative responsibility of the Federal Government, the remainder of the agricultural industry of the Federal area being in the charge of the various Territorial Governments. Production of principal crops in 1959 was:

	Southern Rhodesia '000 lb.	Northern Rhodesia '000 lb.	Nyasaland '000 lb.	Total '000 lb.
Tobacco‡	180,428	7,344	36,825	230,597
Cotton	1,089	17	21,520	22,626
Tea	2,085	—	24,351	26,436
Wattle Extract	29,970	—	—	29,970

‡ All types except Turkish. Production of flue-cured tobacco, mainly in Southern Rhodesia, totalled 195,229,000 lb. and of fire-cured tobacco, mainly in Nyasaland, 26,478,000 lb.

NUMBERS OF LIVESTOCK, 1959

	Southern Rhodesia	Northern Rhodesia	Nyasaland	Total
Cattle	3,640,000	1,134,000	357,000	5,131,000
Sheep	315,000	154,000	75,000	1,428,000
Goats	423,000		461,000	
Pigs	108,000	65,000	120,000	293,000

MINERAL PRODUCTION, 1959

	Quantity	Value
Copper	590,000 tons	£113,676,000
Gold	567,000 oz.	7,081,000
Asbestos	120,000 tons	7,405,000
Chrome	543,000 tons	3,031,000
Zinc	33,000 tons	2,158,000
Coal	4,143,000 tons	3,839,000
Lead	16,000 tons	933,000
Cobalt	—	2,741,000

Manufactures.—Since 1955–56, the census of industrial production has been held on a federal basis, giving a gross output of £126,117,000 and a net output of £53,405,000 for the year 1957–58. Tobacco, textiles and garments, foodstuffs and metal products remain the most important groups, drawing largely for their materials on local sources.

EXTERNAL TRADE

In 1959, the sixth year for which statistics of external trade were available for the Federation as a single trading entity, total external trade was valued at £330,220,000.

With exports valued at £186,950,000 and imports at £150,150,000, there was a favourable balance of trade of £43,731,000.

About 70 per cent. of the exports consisted of minerals—copper, gold, asbestos, lead, zinc, chrome being the most important. About 17 per cent. of all exports consisted of tobacco.

The remaining 13 per cent. was made up of a wide range of products, including manufactured articles of which textiles are the most important.

More than 45 per cent. of imports in 1958 were metals and machinery, a high proportion being mining, electrical and agricultural machinery, railway materials and other durable producers' goods required for the growth of industry, agriculture and basic services such as communications and the provision of electric power.

The most important market for the Federation's products and supplier of its requirements was the United Kingdom. Exports to the United Kingdom in 1959 were made up mainly of copper (£50,000,000), tobacco (£23,000,000), asbestos and tea.

Total	1958	1959
Imports from U.K.	£52,167,253	£49,357,716
Exports to U.K.	67,811,807	90,330,242

COMMUNICATIONS

Railways.—The two Rhodesias are served by the Rhodesia Railways which connect with the South African Railways at Mafeking. The main line forks at Bulawayo; the northern section runs *via* the Victoria Falls through Northern Rhodesia to the Copperbelt and on to the Belgian Congo Border where it connects with the Belgian system. The eastern section runs along the watershed of Southern Rhodesia to serve the main centres and ends at Umtali where it joins the Portuguese system to provide access to Beira. With branch lines, the total mileage of the Rhodesia Railways is over 2,700 miles, including the line linking the Midlands of Southern Rhodesia with the port of Lourenço Marques in Portuguese East Africa, which was completed in 1955.

Nyasaland is served by the Nyasaland Railway system (the Trans-Zambezi Railway, the Central Africa Railway and the Nyasaland Railways) which connects Beira with Nyasaland. The total length of the system is nearly 500 miles.

Roads.—Main roads, which are in process of modernization, connect all the main centres of the Federation with one another and with adjacent territories, and secondary roads serve rural areas. The total route mileage of roads is nearly 52,000 miles (28,500 miles in Southern Rhodesia, 18,000 miles in Northern Rhodesia and nearly 5,400 miles in Nyasaland) of which some 12,000 miles are designated as main or principal roads (5,000 miles in Southern Rhodesia, excluding roads in towns, 4,300 miles in Northern Rhodesia and 2,300 miles in Nyasaland). Major bridges, many of which were the gift of the Beit Trustees, span the larger rivers on main roads, the Beit Bridge over the Limpopo, the Ottobeit Bridge at Chirundu over the Zambezi and the Birchenough Bridge over the Sabi River being noteworthy.

Air Services.—Civil aviation has made rapid progress in the Federal area since the war. The existing airline was reconstituted in partnership between the three territories as the Central African Airways Corporation. Flying Viscount, Dakota and Beaver aircraft, Central African Airways provide daily services between the major towns of the Federation and between them and Nairobi and Johannesburg, as well as a weekly service to London, and services to out-lying parts of the Federation. In addition there are many air charter firms and the major world airlines link the Federation with overseas countries. The new international airport at Salisbury is in full use and the Federal capital is now about 24 hours from London by Comet aircraft.

CAPITAL

SALISBURY, the Federal capital, is also the principal city of Southern Rhodesia. It is built round the site where the Pioneer Column ended its march into Mashonaland in 1890. Situated in the north-east of Southern Rhodesia, it is on the main railway

line which traverses the more closely settled areas of the Colony. Branch railway lines run north-east and north-west. It is the centre of the tobacco industry—the tobacco auction sales at Salisbury are the largest in the world—and an industrial centre of considerable importance. Estimated population, including townships on the periphery of Salisbury: Europeans, 86,000; Africans, 186,000; Asians and Coloured (mixed race), 5,000.

SOUTHERN RHODESIA

Southern Rhodesia, comprising Matabeleland, Mashonaland and Manicaland, is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, its political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S. and W.; and Portuguese East Africa on the E. The total area is 150,333 square miles. The estimated population, at Dec. 31, 1959, numbered 219,000 Europeans, 15,800 Asiatics and Coloureds and 2,800,000 Africans, giving a combined total of approximately 3,030,000. In 1959 there were 5,734 European births and 1,279 deaths, giving a birth-rate of 27 and a death-rate of 6 per 1,000.

The majority of the natives of Southern Rhodesia (members of the so-called Bantu race), are known as Mashona. In the Western portion of the Colony are the descendants of the Amandebele who conquered and settled down among the Mashona, and from whom the Province of Matabeleland derives its name.

Southern Rhodesia was administered by the British South Africa Company from the date of occupation (1890) to 1923, when responsible government was granted. On this latter date the Company relinquished all rights and interests in the land of Southern Rhodesia except in those estates which it was already developing on July 10, 1923. A Land and Agricultural Bank grants loans for farm development and acquisition of residential property on easy terms of repayment. Of the Colony's 97,184,000 acres, 21,020,000 have been allocated for Native Reserves, 8,052,000 for Native Purchase Areas and 12,878,000 for Special Native Areas.

FINANCE

	1959–60	1960–61*
Revenue.....	£20,041,000	£21,858,000
Expenditure from revenue funds.....	21,504,000	22,338,000
Expenditure from loan funds.....	6,977,000	7,618,000

* Estimated.

(A large proportion of the Public Debt has been taken over by the Federal Government.)

EDUCATION

Native education is controlled by Government and comes under the Minister for Native Education. Expenditure is now approaching £3,000,000 per annum: Capital expenditure in addition to revenue funds, amounts to more than £120,000. There are over 2,700 schools enrolling 457,000 pupils with 11,800 teachers. Both Mission and Government training centres provide for lower and higher primary teachers' courses. Secondary schools provide a standard of education up to Cambridge Certificate, while post primary schools include such subjects as building, carpentry, agriculture and home craft. In addition four special schools cater for the blind, the deaf and dumb. Eighty per cent. of pupils of school-going age are now able to attend schools.

GOVERNMENT

The Colony obtained self-government in 1923 and has a Parliament of 30 members and a Cabinet of 6 members. The Queen is represented by a Governor who presides over the Executive Council. The Southern Rhodesian Government is responsible for native affairs, bridges, irrigation, roads, power, local government, labour, housing and social welfare. All discriminatory legislation is reserved for the consent of the British Government.

Municipal self-government has been established in the city of Salisbury, the city of Bulawayo, and in the towns of Umtali, Gwelo, Gatooma, Que Que and Fort Victoria. Smaller areas are administered by Town Management Boards. Over the past ten years local self-government among the Africans has been encouraged and by the end of 1959 there were 60 Native Councils raising their own rates.

Governor, His Excellency Hon. Sir Humphrey Vicary Gibbs, K.C.M.G., O.B.E. (1959).

MINISTRY

(Feb. 18, 1958)

Prime Minister, Hon. Sir Edgar Whitehead, K.C.M.G., O.B.E.

Minister of Labour, Social Welfare and Housing, Hon. A. E. Abrahamson.

Minister of the Treasury and of Mines, Hon. C. J. Hatty.

Minister of Roads, of Irrigation and of Lands, Hon. A. R. W. Stumbles.

Minister of Justice and Internal Affairs, Hon. R. Knight, Q.C.

Minister of Local Government and of Native Education, Hon. R. M. Cleveland, O.B.E.

Minister of Native Affairs, Hon. H. J. Quinton.

Speaker, Legislative Assembly, Dr. the Hon. W. Alexander.

Secretary, Department of the Prime Minister and Cabinet Office, G. B. Clarke, I.S.O.

Secretary, Division of Justice and Internal Affairs, J. W. Pithey.

Director of Mines, W. Ralston, M.B.E.

Secretary for Native Affairs and Chief Native Commissioner, S. E. Morris, C.M.G.

Secretary to Treasury, C. E. M. Greenfield, C.M.G., M.B.E.

Secretary, Division of Labour, Social Welfare and Housing, C. L. Honey.

SALISBURY, the capital, is situated on the Mashonaland plateau, altitude 4,850 ft.. population (estimated) 277,000, including 86,000 Europeans. BULAWAYO, the largest town in Matabeleland, altitude 4 450 ft.,. estimated population 195,000, including 50,000 Europeans. Other centres are Umtali, Gwelo, Gatooma, Que Que and Fort Victoria.

Salisbury is 5,600 miles from London (air route) transit 17 hours; by sea, *viâ* Cape Town, 17 days (approx.).

NORTHERN RHODESIA

The Protectorate of Northern Rhodesia lies on the plateau of Central Africa between the longitudes 22° E. and 33 33′ E. and between the latitudes 8° 15′ S. and 18° S. Its area is 288,130 square miles, and its boundaries are 3,515 miles in length.

With the exception of the valleys of the Zambezi, the Luapula, the Kafue and the Luangwa Rivers the greater part of Northern Rhodesia has a flat to rolling topography, with elevations varying from

3,000 to 5,000 feet above sea level, but in the north-eastern districts the plateau rises to occasional altitudes of over 5,000 feet. In many localities the evenness of the plateau is broken by hills, sometimes occurring as chains which develop into areas of broken country. The highest group of hills is the Muchinga Mountains which form part of the Great Escarpment running down the western edge of the Luangwa River Valley, and of these, individual peaks rise to about 8,000 feet.

Although Northern Rhodesia lies within the tropics, and fairly centrally in the great land mass of the African continent, its elevation relieves it from the extremely high temperatures and humidity usually associated with tropical countries. The lower reaches of the Zambezi, Luangwa and Kafue rivers in deeper valleys do experience high humidity and trying extremes of heat, but these areas are remote and sparsely populated.

The census of May 8, 1956, showed a European population of 64,800, a Coloured population of 1,550 and an Asiatic population of 5,400. At June 30, 1958, the estimated African population was 2,180,000.

FINANCE

	1958–59	1959–60*
Revenue	£16,652,086	£15,837,855
Expenditure	14,804,802	16,179,899

* Estimated.

With the coming into being of the Federation of Rhodesia and Nyasaland, the Federal Government assumed, under the Constitution, powers to impose certain important taxes formerly enjoyed by the Northern Rhodesia Government and also took over responsibility for the administration of various departments and services.

GOVERNMENT

Government is carried on by a Governor appointed by the Crown, assisted by an Executive Council of four officials and six unofficial members, of whom two must be Africans. The Legislative Council consists of thirty members, of whom six are official, two are nominated by the Governor and the rest are elected. Of the elected members in the present Council, 14 are European and eight are Africans. The Governor's nominees consist of one African and one Asian, and the official members are all European. The Legislative Council is presided over by a Speaker who is an unofficial but not a member of the Council.

Governor of Northern Rhodesia, His Excellency Sir Evelyn Dennison Hone, K.C.M.G., C.V.O., O.B.E. (1958).

British Council Representative in N. Rhodesia, R. P. R. Sangster.

CAPITAL AND SEAT OF GOVERNMENT, Lusaka, situated in the Midlands (1956 Census, European pop. 9,440). Other centres are Livingstone, Broken Hill, Fort Jameson, Mazabuka, Abercorn, Kasama, Mongu, Ndola, Luanshya, Mufulira, Chingola, Bancroft and Kitwe (the main copper mining town of the copper belt—European pop. 9,680).

Commissioner in London, J. H. Wallace, C.M.G., 57 Haymarket, S.W.1.

NYASALAND PROTECTORATE

The Nyasaland Protectorate comprises the western shore of Lake Nyasa, with the high tableland separating it from the basin of the Luangwa River, and the region lying between the watershed of the Zambesi and Shire Rivers on the west, and the Lakes Chiuta and Chilwa and the River Ruo (a tributary of the Shire) on the east, including the mountain systems of the Shire Highlands and Mlanje.

The Protectorate is bounded on the North by Tanganyika Territory, on the West by Northern Rhodesia and on the South and East by Portuguese East Africa (Mozambique). The rainy season is from November to March, and it is dry for the rest of the year.

Nyasaland has a total area of 46,257 sq. miles (land area, 36,879) with an estimated population in 1959 of 2,801,400 (2,780,000 Africans, 9,000 Europeans and 12,400 Asians and other races).

The seat of Government is Zomba (est. pop., 1959, 6 000), other centres being Blantyre and Limbe in the Shire highlands, ΨFort Johnston (on Lake Nyasa), Lilongwe, Mlanje and Mzimba.

FINANCE

* Financed by loans, grants under the Colonial Development and Welfare Acts, contributions from recurrent revenue, etc.

† Estimated.

In 1953, the Government of the Federation of Rhodesia and Nyasaland assumed responsibility for the servicing of the public debt of the Protectorate, then amounting to £6,228,488. The Nyasaland Government is responsible for the servicing of the Public Debt raised since Oct. 23, 1953, totalling (at June 30, 1959) £5,476,798.

GOVERNMENT

The Government consists of the Governor and an Executive and Legislative Council. The Executive Council is presided over by the Governor and consists of three *ex officio* members, two nominated official members and four nominated unofficial members two of whom are Africans. The Legislative Council is presided over by a Speaker, appointed by the Governor, who is not a member

of the Council, and consists of four *ex officio* members, ten official members and thirteen elected members of whom six are non-Africans and seven Africans. The non-African members are elected by direct vote and the African members by electoral colleges.

In 1944 and 1945 African Provincial Councils were established in each of the three provinces. These councils, which are advisory, are composed of chiefs and other responsible African members under the presidency of the Provincial Commissioner.

Trade Enquiry Office in London, The Office of the High Commissioner for the Federation of Rhodesia and Nyasaland, Rhodesia House, Strand, W.C.2.

ST. HELENA

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55′ S. lat. and 5° 42′ W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with an estimated population at Dec. 31, 1959, of 4,644. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, João de Nova, in 1502 (probably on St. Helena's Day) and remained unknown to other European nations until 1588. It was used as a port of call for vessels of all nations trading to the East until it was annexed by the Dutch in 1633. It was never occupied by them, however, and the English East India Company seized it in 1659. In 1834 it was ceded to the Crown. During the period 1815 to 1821 the island was lent to the British Government as a place of exile for the Emperor Napoleon Bonaparte who died in St. Helena on May 5, 1821. It was formerly an important station on the route to India, but its prosperity decreased after the construction of the Suez Canal. A phormium (flax fibre) and lacemaking industry has been established. ΨSt. James's Bay, on the north-west of the island, possesses a good anchorage.

GOVERNMENT

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of up to 4 official and 3 unofficial members. The Governor is also assisted by an Advisory Council of up to 10 unofficial members chosen to represent, as far as possible, all unofficial sections of the community, the Governor alone making all ordinances.

CAPITAL, ΨJamestown, population (1956), 1,568.

Governor, His Excellency Sir Robert Edmund Alford, K.B.E., C.M.G. (1958)
(+*allce.*) £2,000
Government Secretary, B. J. Weston, C.M.G., O.B.E. 1,400
Colonial Treasurer and Collector of Customs, R. F. Bond-Taylor 1,200
Senior Medical Officer, Dr. W. J. Jackson .. 2,500
Agricultural and Forestry Officer, R. B. Johnston ..... (+*allce.*) 1,150
Distance from London: 4,472 miles; transit 14 days.

Imports from U.K.	203,501	209,065
Exports to U.K.	39,582	53,767

ASCENSION

An isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55′ 55″ S. lat. and 14° 25′ 55″ W. long. It is said to have been discovered by João de Nova, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7⅞ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and, being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabitated till 1815, when the English took possession of it; on Dec. 31, 1959, the population was 418. Ascension was administered by the Board of Admiralty until 1922, when by Royal Letters Patent it became a Dependency of St. Helena, and was transferred to the Colonial Office. ΨGeorgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited from January to May by the sea-turtle, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month.

Resident Magistrate, A. R. Harrison, O.B.E.

TRISTAN DA CUNHA

Is the chief of a group of islands of volcanic origin lying in lat. 37° 6′ S. and long. 12° 2 W., discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. They have a total area of 45 square miles and in 1921 the inhabitants numbered 127, increased in 1959 to 292; they are stated to be very long-lived. The main island is about 1,800 miles W. of the Cape of Good Hope, 3,600 miles N.E. of Cape Horn, and about 1,320 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale island. On August 14, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn in 1817, William Glass, a corporal of artillery (*died* 1853),

remaining at his own request, with his wife and two children. This party, with two ex-Navy men, Alexander Cotton and John Mooney, and three masons imported for the purpose of housing the garrison, formed the present settlement. In 1827 five coloured women from St. Helena, and afterwards others from Cape Colony, joined the party. The inhabitants are of mixed blood, but the British strain is predominant. In 1885 many of the able-bodied men were drowned through the loss of a boat, and in 1886 a grant of stores and provisions was made by Parliament. The principal settlement (Edinburgh) is in a fertile tract in the north-west of the island, its name being in honour of a visit from the former Duke of Edinburgh in 1867. The inhabitants grow potatoes and some vegetables, and possess cattle, sheep, pigs and donkeys. They are also able to earn money by fishing for the canning factory.

From the death of Corporal Glass until 1933 the oldest inhabitant acted as Governor; in 1933 a council of four was set up (with one of its members as Chairman), the chairman, or chief, acting as island spokesman and conducting marriages in the absence of a chaplain. In 1948 an Administrator was appointed by the Governor of St. Helena. The Council now has 24 members, including the Administrator as President, and 6 women members. The separate women's Council has been abolished. Communications with the outside world were infrequent until the outbreak of war in 1939, but have improved since that time. There is now a South African Government meteorological station equipped with wireless. The recent commencement of operations by a South African fishing company has led to more frequent visits of vessels to the island.

CAPITAL, ΨEdinburgh.

Administrator, P. A. Day, (1959).
Resident Chaplain, Rev. P. H. Bell.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl. Cultivation was started in 1937.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ¾ mile wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Seals, innumerable penguins, and vast numbers of sea-fowl visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20′ S. and 9° 44′ W., lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and sea-elephants and has valuable guano deposits. There is no permanent population, but there is a meteorological station maintained on the island by the South African Government and manned by South Africans.

By Letters Patent dated January 12, 1938, the Islands of *Tristan da Cunha*, *Gough*, *Nightingale* and *Inaccessible* in the South Atlantic were made Dependencies of the Island of St. Helena.

SARAWAK

Sarawak is a British Colony on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of about 50,000 square miles, and a population estimated in 1960 at 738,983, composed of various races, of whom the Sea Dyaks (Ibans), Malays, Chinese, Land Dyaks, Melanaus, Kayans and Kenyahs are the most numerous. The government of Sarawak was granted in 1841 by the Sultan of Brunei to Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions were made in 1861, 1882, 1885, and 1890, when the Limbang River was obtained. The Lawas River was added in 1905. In 1864 Great Britain recognized Sarawak as an independent State, and under an agreement of 1888 the State was placed under British protection. In 1941 the centenary of Brooke rule was celebrated throughout the State.

Sarawak was ceded to Great Britain by the Rajah on July 1, 1946.

The territory of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of North Borneo. The southern boundary is, except for a few short stretches, formed by outstanding ridges of hills; the eastern boundary is a broken range of mountains with peaks rising to 5,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (23 miles).

The country produces rubber, oil, sago, rice, illipe nuts, birds' nests, gold, pepper, rattans and jungle produce. There are also known coal and cinnabar deposits.

FINANCE	1958
Revenue	$60,045,666
Expenditure	57,956,447*

* Including a contribution of $10,228,661 to a Capital Account to finance the country's development programme.

TRADE WITH U.K.

	1958	1959

Exports to U.K.	6,107,453	11,631,487

GOVERNMENT

By the Sarawak (Constitution) Order in Council, 1956, a new constitution was granted to Sarawak, which came into force on April 1, 1957. Under this the Council Negri, in which legislative powers and the control of finance are vested, has a majority of elected unofficial members. There are 24 elected members, 14 *ex officio* members, 4 nominated members and 2 standing members who were elected for life prior to cession. The new Supreme Council (i.e. Executive Council) has 3 *ex officio* and two nominated members and 5 members elected by the elected members of the Council Negri by secret ballot from among the elected, nominated or standing members of the Council Negri. The elected members of Council Negri are elected by divisional advisory councils (except for the Kuching Municipal and Sibu and Miri Urban District Councils which each elect one representative directly). The divisional advisory councils are elected by district and other local councils.

Governor and Commander-in-Chief, His Excellency Sir Alexander Nicol Anton Waddell, K.C.M.G., D.S.C. (1959) (*duty allowance* £2,500)	£4,500

Chief Town, Ψ Kuching; estimated population 147,716. Distance from London 8,700 miles; distance from Singapore 400 miles.

SEYCHELLES

The Seychelles Islands, in the Indian Ocean, which number altogether 92, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By Letters Patent of Sept., 1903, they were erected into a separate colony. The principal islands of the group are Mahé (56 sq. miles), Praslin (9,700 acres), Silhouette (4,900 acres), La Digue (2,500 acres), Curieuse (900 acres), Félicité (680 acres), North Island (525 acres), St. Anne (500 acres), Providence (500 acres), Frigate (700 acres), Denis (340 acres), Cerf (290 acres), and Bird, or Sea Cow Island (160 acres), and the total area of the Colony, with dependencies, is estimated at 156½ square miles; the dependencies are the Amirantes, Alphonse, Bijoutier, St. François, St. Pierre, the Cosmoledo Group, Astove, Assumption, Coëtivy, Aldabra and Farquhar Island. The population on Dec. 31, 1958, was estimated at 42,415. Although only 4° S. of the Equator, the islands are healthy, the death-rate in 1957–58 being 10·7 per 1,000 and the birth-rate 37·1 per 1,000. There are 37 primary schools, 7 secondary schools, and a teachers' training college. Aldabra, one of the dependencies of the Seychelles, and about 630 miles from Mahé, is famous for the gigantic land tortoises, while the unique double coconut, *Coco de Mer*, is found in Mahé, and, in larger quantitites, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 4 *ex officio* members and 4 unofficial members appointed by the Government, and by a Legislative Council of 4 *ex officio*, 5 elected and 3 nominated members. One of the nominated members is an official.

Finance

Recurrent	1958	1959

Letters to and from London—2 to 6 weeks.

SIERRA LEONE

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs to be used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony, including those portions administered as Protectorate, lies along the coast, extending from the boundary of French Guinea—north of the mouth of the Scarcies River—to the boundary of Liberia at the mouth of the Mano River, a distance of approximately 210 miles; having an approximate area of 2,500 square miles. Those portions of the Colony which are strictly administered as Colony (viz. the Sierra Leone Peninsula, Tasso Island, Banana Islands, the township of Bonthe on Sherbro Island and York Island) cover areas totalling approximately 256 square miles, with a population (1956) of approximately 130,000. The total area of the Colony and Protectorate is about 27,925 sq. miles, and the total population about 2,005,000. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 212 miles, lying between 6° 55′, and 10° N. lat., and the extreme breadth from east to west is 207 miles, between 10° 16′ and 13° 18′ of W. long. For administrative purposes the Protectorate is divided into 3 Provinces covering 12 Districts, each administered by a Commissioner. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

Communications.—A railway runs inland from Freetown to Pendembu (227½ miles) and a branch

line of 83 miles extends in a north-easterly direction from Bauya to Makeni. A mining company, the Sierra Leone Development Company, owns a railway which runs for 57 miles from the iron ore deposits at Marampa to the shipping port of Pepel. There are about 3,000 miles of road in the country, of which about 200 miles are bitumen-surfaced. There is a trunk line network of 951 miles of telephone and telegraph routes connecting Freetown with most of the more important centres and towns in the Colony and Protectorate. The Freetown international airport is situated at Lungi, across the Sierra Leone River from Freetown. The main port is Freetown, which has one of the largest natural harbours in the world, and where a deep water quay, capable of berthing two medium-sized ships, came into operation in 1954. There are smaller ports at Pepel, Bonthe and Sulima. Inland waterways total some 493 miles, but several are only navigable for about three to four months of the year. The Sierra Leone Broadcasting Service operates a direct service, and is responsible for the Freetown Rediffusion System. Broadcasts are made daily in several of the more important indigenous languages, in addition to English.

Education.—There are more than 500 schools in Sierra Leone, of which 497 are primary, 25 secondary, 6 teacher-training and the rest technical and vocational. There are more than 60,000 pupils enrolled in secondary schools, 600 in teacher-training institutions and 1,000 in technical and vocational institutions. Higher education is provided at Fourah Bay College, the University College of Sierra Leone, with courses in divinity, arts, commerce, education and science.

Finance

	1957	1958
Public revenue	£10,358,296	£10,517,385
Public expenditure	9,351,285	10,886,157
Net public debt (Dec. 31)	5,660,582	6,680,152

Trade

	1958	1959
Total imports	£23,914,856	£23,520,151
Total exports	16,541,145	16,399,598
Imports from U.K.	10,570,287	9,235,873
Exports to U.K.	6,374,230	6,343,149

The principal exports are iron, palm kernels, diamonds, cocoa, piassava, raw coffee, chrome ore, ginger and kola nuts. Some of the largest diamonds known have been found in Sierra Leone; in 1943 one of 530 carats and in 1945 one of 770 carats. The chief imports are cotton piece goods apparel, ale and stout, artificial silk piece goods, machinery, motor vehicles, petroleum products, potable spirits, wheaten flour, tobacco, cement, corrugated iron sheets, sugar, soap, fish and fish preparations, electrical machinery, apparatus and appliances and rice.

Government

Under the Constitution of 1958, there is a House of Representatives consisting of the Speaker (who is not an *ex officio* member of the House or a person who holds any public office), fifty-one elected members and 2 nominated members. 14 members are elected in the Colony and 37 elected in the Protectorate. The House has full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by a Cabinet consisting of the Prime Minister and not less than 7 other ministers, who shall be elected members of the House of Representatives. The Ministers are appointed by the Governor on the recommendation of the Prime Minister. Ten members of the Cabinet hold ministerial portfolios, and the remaining two are Ministers without portfolio.

Governor, His Excellency Sir Maurice Henry Dorman, K.C.M.G. (1956) (*and* £1,750 *duty allce.*) £4,500
Deputy Governor, A. F. F. P. Newns, C.M.G.

Prime Minister and Minister of Internal Affairs and of Development, Sir Milton Margai.
Minister of Finance, M. S. Mustapha.
Minister of Mines, Lands and Labour, Dr. J. Karefa-Smart.
Minister of Communications, D. L. Sumner.
Minister of Works and Housing, K. Bureh.
Minister of Trade and Industry, I. B. Taylor-Kamara.
Minister of Education and Welfare, H. E. B. John.
Minister of Health, T. Ngobeh.
Minister of Natural Resources, A. J. Demby.
Minister of Information and Broadcasting, Y. D. Sesay.
Ministers without Portfolio, Paramount Chief R. B. S. Koker; Paramount Chief Bai Koblo Pathbana, M.B.E.
Chief Justice, Sir Vahe Bairamian £3,250
Deputy Governor (vacant) 3,250
Attorney-General, A. C. Spurling, Q.C. 2,850

Director of Medical Services, T. P. Eddy, C.B.E. 2,850
Puisne Judges, E. F. Luke, C.B.E.; S. A. Benka-Coker, O.B.E.; R. B. Marke, C.B.E.; P. Watkin-Williams; S. B. James 3,650
British Council Representative, J. Sanderson.

Sierra Leone Commissioner in London, Dr. R. E. Keifa-Caulker, 29 Weymouth Street, W.1.

Capital, ΨFreetown (population, 1947, 64,576). Freetown, which possesses the finest and most important harbour in West Africa, is 3,078 miles from Liverpool; transit, 9 days by sea; 2 days by air; there are also air connections with most of the capital cities of the world, and an internal air service between Freetown and some of the more important towns in Sierra Leone.

SINGAPORE

The State of Singapore consists of the island of Singapore and the adjacent islets with a total area of 224·5 sq. miles.

Singapore Island is situated off the southern extremity of the Malay Peninsula, to which it is joined by a causeway, carrying a road and a railway, across the Straits of Johore, which are about three-quarters of a mile in width; its length is 26 miles and its breadth 14 miles; its population at Dec. 31, 1959 was estimated at 1,611,900, comprising 1,213,600 Chinese, 222,800 Malaysians, 137,300 Indians and Pakistanis 12,200 Eurasians and 26,000 Europeans and others.

Finance

	1958	1959
Revenue	$271,361,594	$275,000,000
Expenditure	266,924,623	258,000,000

The currency is linked to Sterling and the rate of exchange is $1.00=2s. 4d.

Production and Trade

Singapore is primarily a commercial and strategic centre. It handles 68·4 per cent of the external trade of Malaya and is the chief *entrepôt* centre for South-east Asia and Indonesia. Its

total trade in 1959 was M$5,826,000,000. Seventy-two major shipping lines and 12 international airlines serve Singapore. Tin smelting, rubber milling, the manufacture of rubber goods, sawmills, brickworks, ship building and repairing, oil mills, and the canning of pineapples are the more important aspects of industry. Products of secondary importance are beer and soft drinks, biscuit, soap, paint, plywood, rope, rattanware, furniture made of cane and of wood, asbestos packing, aluminium manufactures, wearing apparel, glassware, sago starch, etc.; but the prosperity of Singapore mainly depends on trade with the surrounding territories.

TRADE WITH U.K.

	1958	1959
Imports from U.K.....	£35,686,950	£31,213,661
Exports to U.K.....	26,159,019	21,058,209

GOVERNMENT

Singapore achieved statehood in 1959 after 140 years of British colonial rule. An agreement signed in London on April 11, 1957, provided for the constitution of a State of Singapore with full internal self-government and the creation of a Singapore citizenship, with, as the Queen's representative, a Malayan-born *Yang di-Pertuan Negara* or Head of State, a Cabinet of 9 members presided over by the Prime Minister and a fully-elected Legislative Assembly of 51 members presided over by a Speaker of their own selection. The U.K. Commissioner remains responsible for external defence and external affairs other than cultural and commercial matters.

While the Singapore Government is responsible for internal security, an Internal Security Council with 7 members, 3 each appointed by the U.K. and Singapore Government, and one member by the Federation of Malaya (with in effect the casting vote) has over-riding authority on matters of internal security.

Head of State, The Yang di-Pertuan Negara, Inche Yusof bin Ishak (Dec. 3, 1959).
U.K. High Commissioner, The Earl of Selkirk, P.C., G.C.M.G., O.B.E., A.F.C.
Prime Minister, Lee Kuan Yew.

British Council Representative, D. Hardwick, M.B.E.

TANGANYIKA

The *Trust Territory of Tanganyika* (formerly *German East Africa*, 1884–1918) occupies the east central portion of the African continent, between 1°–11° 45′ S. lat. and 29° 20′–40° 38′ E. long. The Territory is bounded on the N. by Kenya and Uganda; on S.W. by Lake Nyasa, Nyasaland and N. Rhodesia; on S. by Portuguese E. Africa; on the W. it is bounded by the Belgian trust territory of Ruanda-Urundi and Belgian Congo; on the E. the boundary is the Indian Ocean. Tanganyika has a coast-line of about 500 miles and an area of 361,800 square miles (including 20,650 square miles of water). The coast-line extends from the mouth of the Umba to the mouth of the Rovuma.

The greater part of Tanganyika is occupied by the Central African Plateau from which rise many mighty mountains, including Mt. Kilimanjaro, the highest point in the Continent of Africa (19,340 ft.) and Mt. Meru (14,979 ft.). The Rovuma, Rufiji, Pangani, Wami and Ruvu rivers flow into the Indian Ocean; the Mara and Kagera into Lake Victoria; the Malagarasi into Lake Tanganyika; the Songwe into Nyasa; and the Rungwa and Lupa-Songwe into Lake Rukwa. The Serengeti National Park, which covers an area of 5,000 square miles in the Northern and Lake Provinces, is famous for its variety and number of species of game.

The native population consists mostly of tribes of mixed Bantu race. The estimated population (mid-1959) is 9,077,000, made up of 8,942,000 Africans, 23,100 Europeans and 111,700 other non-Africans, mainly Asians. Swahili, the language of the coastal people, is understood throughout the country, and forms an invaluable *lingua franca*. It has been adopted as the basic standard dialect for literature, both for educational and general purposes.

Estimated expenditure by Government on education in 1960–61 is £4,806,000. Schools for Africans are maintained by Government, the Native authorities and by voluntary agencies, mainly missions, the latter two being subsidized by grants-in-aid paid by Central Government. In 1959 there were 2,681 primary schools, mostly co-educational, with an enrolment of 253,720 boys and 130,103 girls. Of these 742 were maintained by Government and Native authorities and 1,938 by voluntary agencies. There were 292 middle schools for boys and 47 for girls. Government or Native authorities managed 230 of the boys' and 9 of the girls' schools. The enrolments were 32,914 boys and 6,839 girls. There were 12 secondary schools run by Government and 16 by voluntary agencies. The enrolments were 3,791 boys and 421 girls. Five teacher-training centres were maintained by Government and 25 by voluntary agencies. The number of students in training were 1,074 men and 408 women. There are 2 trade schools run by Government, each offering a 3-year course in the various engineering and building trades. Each has 600 boarders.

Educational facilities for Europeans are financed from the European Education Fund, which is controlled by the European Education Authority and derives its revenue from education tax paid by Europeans, fees paid by parents to Government European Schools and a contribution from Government.

There are 8 Government primary schools of which 2 are boarding schools and 13 private schools receiving financial assistance from the fund as well as 10 unassisted private schools. There is also a Government correspondence course for children who cannot attend a school. In 1959 there were 2,092 primary pupils. There is one aided secondary boarding school with 500 pupils, and, in 1959, 132 European Secondary pupils attended other assisted schools, the largest being St. Joseph's Convent, Dar es Salaam, which admits children of all races.

There is also a separate authority for Indian education with its own fund. There are Government primary schools in Dar es Salaam and Tanga with 3,286 pupils and secondary schools in Dar es Salaam, Tanga, Moshi, Dodoma, Lindi and Tabore, with 5,600 pupils, but most of the education facilities for Indians are provided by non-Government schools receiving grants in respect of staff, buildings and equipment; in 1958 there were 111 assisted primary schools with 12,536 pupils and 25 assisted schools providing a full or partial secondary course, with 4,216 pupils. A teacher training centre has been opened for training Asian primary school teachers. It is non-residential and provides a 2-year course for about 30 students each year.

There are 3 Mission schools providing primarily for Goans and other non-natives, but also admitting Asians and Europeans, and 1 school run by the Goan community. They all receive grants from the Other Non-Native (including Goan) Education Fund. In 1959 there were 1,440 pupils at these schools. There is also one mission school for half-castes.

The Technical Institute in Dar es Salaam provides technical and commercial education for both sexes of all races. Although all the planned buildings are not yet complete, there were 112 students attending full-time courses during 1959 and students attended part-time evening courses for a total of 54,987 student hours during the year.

There are no institutions for higher education in Tanganyika but facilities are available at the University College of East Africa, Makerere College, at Kampala, Uganda and 196 students from Tanganyika attended the College in 1959. There were 26 students at the Royal Technical College of East Africa in Nairobi in 1959. All these students and many of the increasing number of Africans and Asians from Tanganyika who go to the United Kingdom for higher education receive financial assistance from the Tanganyika Government in the form of bursaries.

Production, etc.—The economy is based mainly on the production and export of primary produce and the growing of foodstuffs for local consumption. The chief commercial crops are sisal, coffee, cotton and oilseeds. The most important minerals are diamonds, gold, lead and mica. Hides and skins are another valuable export. Industry is at present largely concerned with the processing of raw materials for either export or local consumption, but in Dar es Salaam and other towns there is also a healthy growth of secondary manufacturing industries. A factory for the manufacture of leather and rubber footwear was opened in 1959, two knitwear factories are now operating and the production of razor blades has started in Dar es Salaam. A cigarette factory will shortly be completed. A wheat flour mill of large capacity was opened in 1958.

The value of Tanganyika's principal exports in 1959 was: sisal, £13,057,000; coffee, £5,745,000; raw cotton, £6,657,000; diamonds, £4,548,000; cashew nuts, £1,562,000; hides and skins, £1,919,000; meat and meat preparations, £1,512,000. Other exports include beeswax, beans, peas and pulses, animal feeding stuffs, groundnuts, castor and sunflower seeds, wood and timber, lead, gold, tea and unmanufactured tobacco.

Live Stock.—In 1959 there were 7,720 cattle, 2,805,000 sheep, 4,124,000 goats, 17,500 pigs and 240 horses in the Territory.

Minerals.—The provisional value of mineral production in 1959 was £7,176,000. Principal exports were as follows: diamonds, £4,548,000; gold, silver, copper and lead, £2,021,000; sheet mica, £52,000; salt, £251,000; tin concentrates, £50,000: other, £45,000.

Communications.—The Railways in Tanganyika are operated by the East African Railways and Harbours Administration. They are metre gauge and comprise the following lines:—*Tanga Line.* Tanga to Moshi, 218 miles, with a branch line 54 miles in length from Moshi to Arusha. There is a connection with the Kenya and Uganda Section at Kahe near Moshi. *Central Line.* Dar es Salaam to Kigoma on Lake Tanganyika, 780 miles, with branch lines from Tabora to Mwanza on Lake Victoria (236 miles); and Kaliuwa to Mpanda (131 miles). *Southern Province Line.* Mtwara to Nachingwea (132 miles) with a branch to Masasi (24 miles). Steamers run on Lakes Victoria (to Uganda and Kenya) and Tanganyika (to Rhodesia and the Belgian Congo). Railway road services operate over 2,200 miles, the main routes being from Morogoro to Korogwe (178 miles), Dodoma to Arusha (273 miles), Dodoma to Mbeya (406 miles), Itigi to Mbeya (305 miles) and Morogoro to Iringa (200 miles). A first-class bitumen-surfaced road, 131 miles long, runs from Namanga (on the Kenya border) to Himo, *viâ* Moshi and Arusha and new roads connect Dar es Salaam-Morogoro-Itinga and Tanga-Korogwe. The Tanganyika section of the Cape to Cairo road, from the Northern Rhodesian border to the Kenya border, is 810 miles in length and a new mountain section of this road, north of Mbeya, has been re-aligned and bitumenized. A section of the East-West road from Morogoro to Dodoma has been improved. A new 132 mile trunk road and a ferry on the 2½ mile crossing of an arm of Lake Victoria complete a direct trunk road route round the Southern half of Lake Victoria from the Kenya border, *viâ* Mwanza, Biharamulo and Bukoba to the Uganda border.

Tanganyika has an extensive telephone and telegraph network consisting of 66 telephone exchanges and 215 telegraph offices. These services are available to Kenya and Uganda. A radio telephone service is also available to most countries of the world and to suitably equipped ships in East African coastal waters within a range of 400 miles. There are 175 Post Offices.

East African Airways Corporation operates 3 Comet IV services weekly from East Africa to London. One is a direct service from Dar es Salaam and for the other two there are connecting services. The Corporation also serves 15 stations in Tanganyika and 10 stations in Southern Africa from Dar es Salaam.

Ψ The chief seaports are Dar es Salaam, Tanga, Lindi, Mtwara and Kilwa. Dar es Salaam has three deep-water berths and Mtwara two. Tanga is a lighterage port.

FINANCE AND TRADE

	1959–60	1960–61
Estimated Revenue:		
Territorial	£19,926,000	£20,277,000
Development	4,088,000	6,180,000

Exports to U.K.	9,973,087	11,456,773

CAPITAL, Ψ Dar es Salaam. Population (1957), Europeans, 4,479; other non-natives, 30,900; Africans, 93,363; total, 128,742.

GOVERNMENT

The Trust Territory of Tanganyika is administered by a Governor assisted by a Council of Ministers. In April 1960, Government announced details of changes in the Executive Government to be implemented after the general elections to be held on August 30. These involved the creation of a post of Chief Minister and the reconstitution of the Council of Ministers to comprise 10 unofficial ministers and two official ministers—the Attorney-General and the Minister of Information Services; abolition of the post of Chief Secretary and the creation of a new post of Deputy Governor, who would sit on the Council of Ministers but not in the Legislature.

The general elections, based on a vastly increased franchise, are for a Legislative Council to comprise 50 "open" seats and 21 reserved seats, 11 for Asians and 10 for Europeans. In addition the Governor retains power to nominate a small number of members whose specialised knowledge and experience would assist the Council in its deliberations.

Governor and Commander-in-Chief, His Excellency Sir Richard Gordon Turnbull, K.C.M.G., *assumed office* July, 1958 (*and* £2,500 *duty allowance*) £5,500
Chief Justice, Sir Ralph Windham 3,500
Chief Minister, Julius Nyerere.
Attorney-General, J. S. K. Cole, Q.C.
Financial Secretary and Minister for Finance, Sir Ernest Vasey, K.B.E., C.M.G.
Minister for Education, O. S. Kambona.
Minister for Information, M. J. Davies, O.B.E.
Minister for Lands, Surveys and Water, Chief A. S. Fundikira.
Minister for Health and Labour, D. N. M. Bryceson.
Minister for Home Affairs, C. G. Kahama.
Minister for Communications, Power and Works, A. H. Jamal.
Minister for Agriculture and Co-operative Development, P. Bomani.
Minister for Commerce and Industry, A. Z. N. Swai.
Minister for Local Government and Housing, R. M. Kawawa.
Speaker of the Legislative Council, A. Y. A. Karimjee, O.B.E. 800

Puisne Judges, E. J. E. Law; E. B. Simmons; L. P. Mosdell; R. H. Murphy 2,900
British Council Representative, W. R. Keight, M.B.E..
Trade Enquiry Office in London, The East Africa Office, Grand Buildings, Trafalgar Square, W.C.2.

TONGA

The Tongan or *Friendly Islands* form a self-governing State under the protection of Great Britain, in accordance with the terms of the revised Treaty of Friendship signed at Nuku'alofa on Aug. 26, 1958. These islands are situated in the Southern Pacific some 300 miles to the E.S.E. of Fiji, with an area of 270 square miles, and population (September 26, 1956) of 56,838, made up of 55,156 Tongans and 1,682 others, including 277 Europeans. The largest island, Tongatapu, was discovered by Tasman in 1643. Most of the islands are of coral formation, but some are volcanic (Tofua, Kao and Niuafoou or "Tin Can" Island). The limits of the group are between 15° and 23° 30′ S., and 173° and 177° W. Nukualofa, on the island of Tongatapu, is the seat of government. The present Queen Salote Tubou, G.C.V.O., G.B.E., succeeded her father the late King George Tubou II on April 12, 1918. The constitution provides for a Government consisting of the Sovereign, a privy council and cabinet, a legislative assembly and a judiciary. The legislative assembly has 21 members, with a Speaker, and includes the Ministers of the Crown, the two Governors of island groups, and the representatives of the Nobles and of the people (seven of each), who are elected triennially. Soil generally is fertile, the principal export is copra. Revenue 1958–59 £T704,660; expenditure £T786,239. There is no debt. Total imports (1959) £T1,669,063; total exports £T1,860,499. The total shipping cleared in 1959 was 176,372 tons. Tongan currency is on parity with Australian currency in relation to sterling.

British Commissioner and Consul, E. J. Coode (1960) (*and duty allowance* £200) £2,225.

TRINIDAD AND TOBAGO

(*See* WEST INDIES)

THE UGANDA PROTECTORATE

The territories now comprised within this Protectorate came under British influence in 1890. The present limits are approximately as follows:—On the north, the Sudan; on the east, the western boundary of Kenya Colony; on the south, Tanganyika Territory and Belgian Ruanda-Urundi; and on the west, the eastern boundary of the Belgian Congo. Within these boundaries lie Lake Victoria (part), Lake Edward (part), Lake George, Lake Albert (half), Lake Kyoga, Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to the Sudan frontier post at Nimule. Total area, 93,981 square miles, including 13,689 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:—

(1) *Buganda* (East Mengo, West Mengo, Masaka and Mubende).

(2) *Eastern* (Teso, Busoga, Bugisu, Bukedi, Mbale Township).

(3) *Western* (Bunyoro, Toro, Ankole and Kigezi).

(4) *Northern* (Acholi, Lango, West Nile and Karamoja).

The estimated population of Uganda (1959) was 6,538,175, composed as follows: Africans 6,451,117; Asians 71,933; Europeans 10,866; Arabs, 1,946; other races 2,313. About 2,500,000 Africans, who occupy the Central and Southern parts of the Protectorate, speak Bantu languages of which the most important is Luganda (the language of the Baganda tribe, from whom the present name of the Protectorate was originally derived). Ki-Swahili in a debased form is also spoken as a trading language and is used by the Police. The tribes occupying the North of the Protectorate are closely related to various tribes in the South of the Sudan. They speak a series of widely differing languages, now distinguished as belonging to the Sudanian, Nilotic and Nilohamitic clusters.

Development.—A five-year development plan involving the expenditure of approximately £34,000,000, was completed in 1960.

A dam at the Owen Falls on the Nile, near Jinja, provides hydro-electric power for industrial development. An eighth generator was installed in 1959, bringing the generating capacity up to 120,000 kW. The potential generating capacity of the dam is 150,000 kW. Power is now available over a wide area.

Mineral resources are mainly concentrated in two widely separated areas. In the west on the slopes of the Ruwenzori Mountains are found limestone, copper, cobalt and salt whilst around Tororo in the east the Sukulu mineral complex includes limestone, magnetite, apatite (phosphate), and pyrochlore (niobium).

In 1952, the Uganda Development Corporation Limited was established with a capital of £5,000,000 now increased to £8,000,000, of which £6,400,000 has been issued. Its object is to promote and assist the further expansion of the economy of the Protectorate by the establishment of enterprises with the co-operation of private capital wherever possible. The Corporation's Technical Development Division also undertakes research into technical aspects of industrial development and its

services are available not only to its own associated and subsidiary companies but to industry generally. Developments which the Uganda Development Corporation has sponsored in participation with private enterprise include the mining and production of copper and cobalt from Kilembe, in the Ruwenzori Range, plans for the exploitation of the apatite and pyrochlore deposits at Tororo, and the manufacture of textiles at Jinja from locally grown cotton.

A subsidiary of the Corporation, the Uganda Cement Industry Limited, at Tororo, can produce sufficient cement to meet all Uganda's requirements with a surplus for export. The Corporation is also concerned through subsidiaries with fish marketing, building, hotel development, cattle ranching and tea growing.

Education.—Separate schools are provided for members of the African, Asian and European communities, though since 1957 an effort has been made to extend multi-racial schools. The majority of African schools are managed by voluntary agencies, especially by Mission Societies. Substantial grants are provided by Government towards teachers' salaries, boarding and equipment, and there are about 354,500 children in grant-aided primary schools and about 21,000 in post-primary institutions, including training colleges and technical schools. There are 20,180 in Government and grant-aided Asian schools. Over 1,200 European children attend Government and grant-aided schools in the Protectorate, but there are no secondary schools in Uganda for European children and the majority of them attend secondary schools in Kenya or the United Kingdom. Total expenditure by the Protectorate Government in 1959–60 was £5,008,903. Makerere College, the University College of East Africa, is an autonomous inter-territorial foundation. It was granted special relationship with London University in 1949, and London external degrees were awarded for the first time at the end of 1953. In 1959 there were 881 students attending the College, of whom 304 (37 of them women) came from Uganda.

Communications.—The main line of the East African Railways in Kenya and Uganda extends from Mombasa, *viâ* Nairobi, Tororo, Jinja and Kampala to Kasese near the Belgian Congo border. There are branches from Tororo to Soroti, from Jinja through Mbulamuti to Namasagali on Lake Kyoga, and from Kampala to Port Bell on Lake Victoria. The Railway Administration maintains a regular steamer service on Lake Kyoga between Namasagali and Masindi Port; and on Lake Victoria between Port Bell, Entebbe, Kisumu and Tanganyika Ports. A service is maintained on Lake Albert and the Nile between Butiaba and Nimule (connected by motor road with Juba in the Sudan) and between Butiaba and the Belgian Congo port of Kasenyi. A road transport service operates between Masindi Port and Butiaba, and a freight service between Butiaba and Kampala. A through service is thus provided by the Railway Administration from Mombasa to the Sudan and the Belgian Congo. The Uganda Public Works Department maintains 2,964 miles of main roads, of which 520 miles are tarmac; the various African local governments between them maintain a further 8,300 miles of roads of variable standard. There is a joint East African Posts and Telecommunications Service which operates throughout Kenya, Uganda and Tanganyika. Entebbe has a first-class international airport, and is a principal stopping place on the main B.O.A.C. routes through East Africa. Other airlines operating regularly through Entebbe include Alitalia, Sabena, Central African Airways and E.A.A.C. and British United Airways. It is also a stopping point on many charter flights. There are landing grounds at Jinja, Tororo, Masindi, Gulu, Soroti, Arua, Lira, Mbarara, Moroto, Murchison Falls, Kisenyi (on Lake George) and Kasese. There are hotels at Entebbe, Kampala, Jinja, Tororo, Mbale, Kasese, Masindi, Fort Portal, Kabale, Mbarara, Gulu and Masaka.

Production.—Agricultural production is largely in the hands of Africans, the most important crops being cotton, coffee, tobacco, maize and groundnuts. Sugar, coffee and tea are the main crops on non-African estates. The potential mineral wealth is considerable, tin ore, wolfram and copper being won in the Western Province.

Finance

A. *Revenue Budget:*

	1957–58	1958–59
Revenue	£18,788,478	£20,248,397
Expenditure (excluding loans)	19,227,431	20,285,751
B. *Capital Budget:*		
Revenue	3,652,515	3,857,201
Expenditure	6,290,395	5,398,073

Trade

	1958	1959
Total imports	£27,002,482	£25,534,133
Total exports	45,409,024	42,091,433
Imports from U.K.	6,295,944	4,973,219
Exports to U.K.	6,647,261	5,890,822

The Customs Services of Uganda, Kenya and Tanganyika are administered jointly by the Customs and Excise Department of the East Africa High Commission. The country's export trade is mainly in raw cotton, coffee, oil seed cake, tea, hides and skins and groundnuts. The chief imports are cotton and rayon fabrics, machinery and transport equipment, base metals and metal manufactures. The trade is chiefly with Great Britain, India, Japan and West Germany.

Government

The Executive Council consists of the Governor and 12 members. Of these 12 members, the Chief Secretary, the Attorney-General and the Minister of Finance are *ex officio* members. The remaining places are filled by the Ministers of Local Government, of Natural Resources, of Education and Social Development, of Commerce and Industry, of Lands and Mineral Development, of Works, of Health and Labour and the present Resident, Buganda, in his personal capacity. The Legislative Council consists of 3 *ex officio* members (the Chief Secretary, the Attorney-General and the Minister of Finance), 11 Ministers, 3 Parliamentary Secretaries and 15 other members (total 32) on the Government side and 30 representative members, of whom 18 are African, 6 Asian and 6 European. The Governor is President of the Council, but the Speaker now normally presides.

The new constitution, which is to come into force in 1962, provides for a Legislature, a largely African elected membership, and an Executive Council with a majority of unofficial members.

The whole territory is under British Administration; but in particular areas local powers are specifically reserved by treaty or "Agreement" to the local tribal government.

There are four "Agreement States," all monarchical in constitution—Buganda, Ankole, Toro and Bunyoro.

Generally throughout the whole country, government has been and still is administered through a system of county, sub-county and parish chiefs, first developed during the latter half of the 19th century in Buganda and extended by British

and Ganda influence to all parts of the country. Chiefs consequently are to be regarded everywhere not as hereditary leaders of the original social groups, but as salaried civil servants selected and promoted by merit. Native courts of varying limited jurisdiction deal with cases, both civil and criminal, involving Africans only, but certain classes of cases are reserved to the Protectorate courts. Such native courts are supervised, in Buganda, by a judicial adviser, and elsewhere by the administrative staff, the High Court having appellate powers in such cases in Buganda and exercising appellate and revisional jurisdiction over such courts elsewhere. There are Protectorate Courts dealing with certain reserved offences, and cases in which a non-African is a party. Appeal from these courts lies to the High Court of Uganda and ultimately to the Court of Appeal for Eastern Africa. During the last twenty years a system of councils extending from the parish through the sub-county and county up to the District Councils has been established; the District Councils are being developed as local government bodies which will gradually take over from the Central Government responsibility for certain local services. The Legislative Council of the Protectorate is representative of all races, and has African members from all Districts.

Governor and Commander-in-Chief, His Excellency Sir Frederick Crawford, K.C.M.G., O.B.E. (Jan. 1957) (*and £2,500 duty allowance*)	£5,300
Chief Justice, Sir Audley McKisack	3,500
Chief Secretary, G. B. Cartland, C.M.G.	3,400
Speaker, Legislative Council, Sir John Griffin, Q.C.	1,200
Attorney-General, R. L. E. Dreschfield, C.M.G., Q.C.	3,200
Minister of Finance, C. G. F. F. Melmoth, C.M.G.	3,100
Minister of Local Government, C. A. L. Richards, C.M.G.	3,100
Minister of Natural Resources, A. B. Killick, C.M.G.	3,100
Minister of Commerce and Industry, Sir Amar Maini, C.B.E.	3,100
Minister of Lands and Mineral Development, Z. C. K. Mungonya, C.B.E.	3,100
Minister of Education and Social Development, Y. K. Lule	3,100
Minister of Works, A. K. Kironde	3,100
Minister of Health and Labour, H. J. Croot	3,100
Commissioner on Special Duty, C. C. Spencer, C.M.G.	3,100
Chairman, Public Service Commission, Sir Peter Gunning, C.M.G.	3,100
Resident, Buganda, R. E. Stone	2,900

CAPITAL (Administrative Hdqrs.), ENTEBBE (8,000). Commercial centre, Kampala. Other chief towns are Jinja and Mbale.

THE WEST INDIES

Trade Enquiry Office in London, Trade Commissioner for the British West Indies, British Guiana and British Honduras, 6–10 Bruton Street, W.1.

The West Indies are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 59° 30′ to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, *Cuba* (44,000 sq. miles) and *Hispaniola* (Haiti and the Dominican Republic) (30,000 sq. miles), Jamaica and Puerto Rico; II. BAHAMAS, which are entirely British. III. LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, the United States and Venezuela: the British colonies in the Lesser Antilles are Barbados, Leeward and Windward Islands and Trinidad and Tobago. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are *Independent*, 12,300 *British*, 3,890 *United States*, 1,350 *French*, 430 *Netherlands*, and 90 *Venezuelan*.

The West India Islands that lie nearest the East have been called the *Windward Islands*; the others the *Leeward Islands*, on account of the winds blowing generally from the eastern point in those quarters.

CARIBBEAN ORGANIZATION

A new organization for economic and social co-operation in the Caribbean area, to replace the Caribbean Commission, was devised by agreement between the United Kingdom, France, the Netherlands and the United States in June, 1960. Membership of the new organization, which was intended to start operations in 1961 from San Juan, Puerto Rico, is open to all Caribbean territories. French Guiana, Guadeloupe and Martinique, which have the status of French Departments, will be represented by France.

FEDERATION OF THE WEST INDIES

The Federation of the West Indies was set up on January 3, 1958, by Order in Council as provided for in the British Caribbean (Federation) Act, 1956, and consists of ten colonies with dependencies.

Area and Population.—The Federation has an area of 8,028 square miles and an estimated total population of 3,153,000.

TERRITORIES

	Area sq. miles	Population
Antigua, Barbuda, Redonda ..	171	57,000
Barbados	166	238,000
Dominica	305	59,000
Grenada	133	87,003
Jamaica	4,706	1,685,000
Montserrat	32	15,000
St. Kitts-Nevis-Anguilla	152	59,000
St. Lucia	233	94,000
St. Vincent	150	82,000
Trinidad and Tobago	1,980	801,000

Government.—The Federal Legislature consists of a Senate and a House of Representatives. The executive authority in the Federation is exercised on behalf of Her Majesty by the Governor-General. Legislation by Order in Council may be enacted for the Federation in the United Kingdom on matters relating to defence, foreign relations or the maintenance of financial stability. As to other internal matters, division of legislatory powers between the Federal and Territorial Legislatures is defined in two Legislative Lists, the Exclusive and the Concurrent Legislative Lists. The Federal Government may legislate on matters in either list; Territorial Legislatures have power to make laws for the territory on any subject included in the Concurrent List. In the event of inconsistency between federal and territorial law, the federal law prevails. No federal law is applicable to the Cayman Islands or Turks and Caicos Islands except where explicitly stated.

Governor-General, The Lord Hailes, P.C.

The Senate.—The Governor-General appoints a Senate of 19 members on a basis of 2 members from each Territory except Montserrat (1 member). Senators may not simultaneously be members of the House of Representatives or of the Legislative or Executive Council of a Territory. Bills, other than money bills, may be introduced in the Senate which has a term of 5 years. A quorum of 8 members is required.

President of the Senate, A. S. Cato (*Barbados*).

The House of Representatives.—On March 25, 1958, elections were held in the Federation for the first House of Representatives. The House consists of 45 members elected for a term not exceeding 5 years: from Jamaica, 17; Trinidad and Tobago, 10; other territories, 2 each, except Montserrat (1). An alternate member is elected for Montserrat who does not sit unless the member is absent or the seat vacant. Principal parties contesting the elections were the *Federal Labour Party*, which won 25 seats, and the *Democratic Labour Party* (anti-socialist), 19 seats, the remaining seat being won by the *Barbados National Party*. 26 per cent. of the electorate of 1,500,000 voted. The quorum of the House is 17, of which 4 members must be elected in different territories. The English language is used in the Senate and House of Representatives. On April 20, 1958, Princess Margaret inaugurated the first Federal Parliament at Port of Spain, on behalf of Her Majesty the Queen.

Council of State.—The Council of State consists of the Prime Minister and ten other Ministers, of whom at least three must be Senators. The Council is the principal instrument of policy for the Federation and advises the Governor-General in the exercise of his functions. Ministers are appointed by the Governor-General on the advice of the Prime Minister. The Constitution provides for three persons holding office in the public service of the Federation to be nominated by the Governor-General to attend any meetings of the Council of State and to take part in discussions at such meetings.

COUNCIL OF STATE

Prime Minister, Sir Grantley Herbert Adams, C.M.G., Q.C.

Minister of Finance, R. L. Bradshaw (*St. Kitts*).

Trade and Industries, C. D. La Corbiniere (*St. Lucia*).

Natural Resources, F. B. Ricketts (*Jamaica*).

Communications and Works, W. A. Rose (*Trinidad*).

Social Affairs, Mrs. P. Allfrey (*Dominica*).

Ministers without Portfolio, V. B. Vaughan (*Barbados*); N. H. Richards (*Antigua*).

Senators

A. G. Byfield (*Jamaica*); J. L. Charles (*St. Lucia*); J. W. Liburd (*Nevis*).

Judicature.—The Constitution provides for a Federal Supreme Court with jurisdiction *inter alia* in proceedings between the Federation and a territory, or between one territory and another; and for the appointment by the Governor-General of a Chief Justice and three Federal Justices. Responsibility for the initiation and conduct of criminal proceedings is vested in the Attorney-General of the Federation.

Federal Justices, J. F. Marnan; Sir Alfred Rennie.

Finance.—In each calendar year 1958–1962 the Federal Government will derive its revenue from a mandatory levy on the territorial governments, provided that the total amount levied in a year does not exceed $B.W.I.9,120,000. Each territory is required to contribute proportionately.

CAPITAL.—Ψ Port of Spain, Trinidad (pop. 100,950). FLAG.—"Sun and Seas": white wavy lines on a background of Caribbean blue with an orange sun in the centre.

BARBADOS.

the most easterly of the West India Islands, is situated in 13° 4′ N., and longitude 59° 37′ W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 166 sq. miles, about 68,000 acres being cultivated. The population is estimated (1959) at 238,000. The principal exports are sugar, molasses, rum, margarine, lard and laundry soap, and the imports meat, rice, salted fish, dairy products, flour, corn meal, lumber, textiles, animal foods and chemical fertilizers.

Barbados $=4s. 2d.

Net tonnage of merchant shipping entered and cleared in 1958, 1,933,361 tons (906,616 tons British).

GOVERNMENT

Barbados has always remained in the possession of Great Britain, by which it was settled in 1627. The Crown has a veto on legislation. The Legislature consists of the Governor, a Legislative Council of 15 members appointed by the Sovereign, and a House of Assembly of 24 members elected every five years by adult suffrage.

A ministerial system of Government was introduced in 1954 and a cabinet system in Jan. 1958. There are a Premier and five other Ministers, responsible for the executive functions of Government except defence and security, personnel, establishment and external affairs.

Governor, Sir John Montague Stow, K.C.M.G. (1959) (+*duty allowance* $4,800) $14,400

Premier and Minister of Finance and Police, Dr. Hon. H. G. Cummins, C.B.E.
Minister of Social Services, Hon. F. E. Miller.
Minister of Trade, Industry and Labour, Hon. M. E. Cox.
Minister of Communications, Works and Housing, Hon. R. G. Mapp.
Minister of Agriculture, Lands and Fisheries, Hon. D. D. Garner.
Minister of Education, Hon. L. St. A. Thorne.

Chief Secretary, G. T. Barton, C.M.G., O.B.E. $11,520
Chief Judge, K. S. Stoby 12,000
President of Legislative Council, Hon. Sir Hallam Massiah, C.B.E.
Speaker, House of Assembly, K. N. R. Husbands.
Attorney-General, C. A. Burton, Q.C. 10,320
Solicitor-General, D. E. Malone 8,160
Financial Secretary, E. S. S. Burrowes, C.M.G. 10,320
Accountant-General, M. I. Phillips 7,680
Auditor-General, C. D. Gittens 8,160
Director of Agriculture, A. de K. Frampton, C.M.G. 9,360
Director of Medical Services, Dr. M. A. Byer, O.B.E. 9,360
Comptroller of Customs, (vacant) 7,680
Director of Education, S. Moffett, M.C. 8,640

The CAPITAL and port is ΨBridgetown (estimated pop., 18,850), on the shores of an open roadstead (Carlisle Bay); ΨSpeightstown (pop. 2,600).

JAMAICA,

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 43′—18° 32′ North lat. and 76° 11′—78° 21′ W. long.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the *Treaty of Madrid*.

Area and Population.—It is the largest and most valuable island of the Federation of the West Indies, being 146 miles in length and 51 in extreme breadth, containing an area of 4,411 square miles (with Dependencies 4,680 sq. miles). The island is divided into 3 counties (Surrey, Middlesex and Cornwall) and 14 parishes. The census taken on January 4, 1943, shows a total of 1,237,063 persons resident on the island (598,267 males and 638,796 females). The estimated population at the end of 1959 was 1,685,178. A further census was taken in April, 1960.

The climate attracts many winter visitors, mainly from U.S.A.

Physical Features.—From the sea-level on all sides of Jamaica a series of ridges gradually ascends towards the central ranges, dividing the large rivers, and attaining, in the culminating Blue Mountain Peak, in the eastern part of the island, an elevation of 7,402 feet. From these mountains at least 70 streams descend to the north and south shores, but none is navigable except the Black River, and that only for small craft.

Communications.—There are several excellent harbours, and the island is intersected by good roads. There are 249 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages. The Palisadoes Airport at Kingston (now capable of handling the largest civil jet aircraft) is used by British West Indian Airways Ltd., British Overseas Airways Corporation, Pan-American Airways, K.L.M., Trans-Canada Air Lines, Avianca, RANSA and Aerovias Panama Airways, which provide air communications with Europe, North, Central and South America and the Caribbean Islands. The Montego Bay Airport is also used by many airlines. A number of non-scheduled airlines operate through the Colony for non-traffic purposes in accordance with the provisions of International Air Services Transit Agreement.

Production and Industry.—Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the word, and the coffee raised in certain districts of the Blue Mountains is of fine quality and fetches a high price. There is an extensive trade in fruits, chiefly bananas, with the U.K. Citrus (and juices), cocoa and pimento are important export crops. Jamaica has developed a breed of dairy cattle known as the Jamaica Hope which is being exported to other tropical countries on an increasing scale. Good beef cattle are also raised. Jamaica is now the largest producer of bauxite in the world. The bauxite deposits are worked by one Canadian and two American companies; the Canadian company processes bauxite into alumina. Two new companies are now prospecting for bauxite. In 1959 the production and export of kiln-dried ore was 4,878,703 long tons (4,197,117 tons on dry basis). In addition 928,486 tons of bauxite (dry basis) were converted into alumina. Alumina exports totalled 399,210 tons.

Gypsum is also mined, production for 1959 being 385,567 tons. Cement is manufactured locally, the output of the factory being 193,600 tons in 1959.

There is a textile mill and local factories also manufacture garments, knitted fabrics, shoes, paints, corrugated cardboard containers, small plastic articles, drugs, blankets, aluminium furniture and hollowware, gin, corn meal, soap, condensed milk, beer, baseballs, typewriters, radio sets, brake linings and brake shoes and electric light fittings.

FINANCE

	1959–60	1960–61*

Exports to U.K.	20,721,359	19,289,265

Chief exports (1959): bauxite, £11,075,895; sugar, £11,669,811; rum, £1,231,112; bananas, £4,949,128; raw coffee, £360,449; pimento seeds, £857,103; alumina, £9,405,839; fruit juices, £730,519; prepared and preserved fruits, £602,409; prepared cocoa, £361,692.

GOVERNMENT

With the coming into effect of the Jamaica (Constitution) Order in Council, 1959, on July 4, 1959, internal self-government was fully attained.

The House of Representatives, whose normal term is five years, has become a 45-seat chamber. The Premier is appointed by the Governor. The Cabinet is appointed by the Governor on the

recommendation of the Premier and is collectively responsible to the Legislature, the House of Representatives and the Legislative Council. It consists of 12 ministers, including not fewer than 2 or more than 3 from the Legislative Council. Official members are excluded from the Legislative Council. The Council consists of not fewer than 20 or more than 21 members, of whom 2 or 3 are appointed on the advice of the Premier and are available for appointment as Ministers without Portfolio, while the others are appointed by the Governor after consultation with the different political parties. The Legislative Council has no power to delay money bills for longer than one month or other bills for longer than seven months against the wishes of the House of Representatives.

The Governor has no reserved powers save in matters which appear to him to affect the Royal Prerogative, international relations or the constitution itself. Her Majesty retains the power to disallow any law which adversely affects the interests of stockholders in such Jamaican Government stock as, at the request of the Government of Jamaica, is treated as trustee stock in the United Kingdom. In civil service matters, the Governor is required to act on the recommendation of three Commissions—the Judicial Service, Public Service and Police Service Commissions—save in cases of appeals in disciplinary matters, when he acts on the advice of the Privy Council. The Chief Justice, however, is appointed by the Governor after consultation with the Premier and special procedure governs the removal of a judge of the Supreme Court. Of the Privy Council's six members, four may be public officers.

British Council Representative, Kingston, C. Hentschel.	

The principal city is ΨKingston, the seat of government and the largest port and town, pop. (1959) 179,542.

Kingston is distant from London 4,000 miles; transit, 12 days.

The Cayman Islands

The Cayman Islands, forming a dependency of Jamaica, between 79° 44′ and 81° 26′ W. and 19° 15′ and 19° 46′ N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 100 square miles. Population (estimated Dec. 31, 1959), 8,803. The constitution provides for an Administrator, Legislative Assembly and an Executive Council. The Legislative Assembly consists of the Administrator, not less than two nor more than three nominated members, not less than two nor more than three official members and 12 elected members. The Executive Council consists of the Administrator, when the Governor is presiding but not otherwise, two official members appointed by the Governor from among the official members of the Assembly, one nominated member appointed by the Governor from among the nominated members of the Assembly and two elected members, elected by the non-official members of the Assembly from among the elected members of the Assembly. The normal life of the Assembly is three years.

The Governor of Jamaica has a supervisory power over the government of the islands and his assent to the Bills of the Legislature is necessary. Laws passed by the Legislature of Jamaica which are in express terms made applicable to the Cayman Islands have effect there. The Supreme Court of Jamaica has power to hear and determine appeals from the Grand Court of the islands, except in certain matters which lie exclusively within the province of the Federal Supreme Court of the West Indies, or those matters in which the laws of the islands provide that the decision of the Grand Court of the islands shall be final.

The principal town is ΨGeorge Town, in Grand Cayman, population (1943) 1,462.

Finance

	1957–58	1958–59
Revenue	£156,130	£187,167

Total imports	£530,000	£901,528
Total exports	36,526	39,596

Administrator, His Hon. Jack Rose, M.B.E., D.F.C. (+*allce.* £300) £2,000

Stipendiary Magistrate and Judge of the Grand Court, E. M. Robinson. £1,200 to £1,400

Turks and Caicos Islands

These West India islands geographically form a sort of annexe of the Bahamas group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from which they are distant about 450 miles. They have an area of about 166 square miles, and a population of

about 6,500 of which the principal island, Grand Turk, contains about 1,800. ΨGrand Turk is an important cable station. The islands are celebrated for producing some of the finest salt in the world. Other exports are sisal, crawfish and conches. A considerable number of men are employed overseas in the Bahamas. There is a U.S. Air Force base and a Naval facility at Grand Turk, and a government-owned airstrip at South Caicos, at present used mainly for emergency purposes.

FINANCE

	1958	1959
Revenue	£130,334	£94,104

TRADE

	1958	1959
Total imports	£162,324	£189,132
Total exports	52,741	55,627

The Constitution provides for an Administrator, a Legislative Assembly and an Executive Council. The Legislative Assembly consists of the Administrator, not less than two nor more than three official members, not less than two nor more than three nominated members and nine elected members. The Executive Council consists of the Administrator, when the Governor is presiding but not otherwise, two official members appointed by the Governor from among the official members of the Assembly, one nominated member appointed by the Governor from among the nominated members of the Assembly and two elected members, elected by the non-official members of the Assembly from among the elected members of the Assembly. The normal life of the Assembly is three years.

The Governor of Jamaica is also the Governor of the islands. He has a supervisory power over the government of the Turks and Caicos Islands and his assent to the Bills of the Legislature is necessary. Laws passed by the Legislature of Jamaica and made applicable to the Turks and Caicos Islands in express terms have effect there. The Supreme Court of Jamaica has been constituted a Court of Appeal from the Supreme Court of the Islands. There are, however, certain matters of appeal which lie exclusively within the province of the Federal Supreme Court of the West Indies, and some in which the laws of the islands provide that the decision of the Supreme Court of the islands shall be final.

Administrator, His Hon. Geoffrey Colin Guy, M.B.E. (+ *allce.* £100) £1,700
Assistant Administrator, L. H. Boothe, (+ *overseas allce.* £150) 1,100

THE LEEWARD ISLANDS

The Leeward Islands consist of the four colonies of (1) Antigua, with Barbuda and Redonda; (2) St. Christopher, Nevis and Anguilla; (3) Montserrat; and (4) the British Virgin Islands (*see* p. 769); all having their own Legislature. These colonies are administered by a Governor to whom the Administrators are subordinate. By the Leeward Islands Act, 1956, the federation of the colony of the Leeward Islands was abolished and each of the four presidencies became a colony, and the Federal Executive and General Legislative Councils were dissolved. In each colony there is an elected majority in the Legislature. In Antigua and St. Christopher-Nevis-Anguilla, there is also a ministerial system of Government. The post of Governor of the Leeward Islands was abolished on Dec. 31, 1959. The area of the Leeward Islands is 422 sq. miles, with an estimated population at December 31, 1957, of 135,635.

TRADE WITH U.K.*

	1958	1959
Imports from U.K.	£1,831,017	£2,190,280
Exports to U.K.	3,740,521	2,288,893

*Including British Virgin Islands.

Attorney-General, W. E. Jacobs, O.B.E., Q.C. 1,680
Principal Auditor, J. D. Warwick 1,350

(1) ANTIGUA AND BARBUDA

Antigua is the seat of government and residence of the Governor of the Leeward Islands. It lies in 17° 6′ N. lat. and 61° 45′ W. long., and is nearly 108 square miles in area with a coast line of about 70 miles. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which one central sugar factory has been erected. Cotton is now planted on a large scale and the island also exports molasses, tomatoes and rum. The population, with Barbuda, is estimated at 57,000.

Finance and Trade

	1954	1955
Revenue	£898,347	£1,270,531
Expenditure	858,063	1,288,171

Total imports	1,545,224	2,154,375
Total exports	541,323	1,025,208

Government

A new constitution, which came into effect on January 1, 1960, provides for the office of Chief Minister and three other Ministers making the number four in all as against three formerly. All the members of the new Executive Council are unofficials except the Attorney-General, who is an official. The Administrator continues to preside in Executive Council.

Administrator, His Hon. I. G. Turbott (*plus* £300 *allce. and house*) £1,740
Financial Secretary, P. N. Reynolds (*acting*) . . . . . £900 to £1,200
Senior Medical Officer, K. H. Uttley, M.D. . . . 1,500
Labour Commissioner, C. A. Rodgers 1,140
Director of Agriculture, M. Park, O.B.E. . . . 1,600

Barbuda, formerly a possession of the Codrington family, is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35′ N., long. 61° 42′ W. Area, 62 square miles. Population, 1,000. The island is flat and mostly stony, producing cotton, corn and ground-nuts. Wild deer are found, and there is good tarpon and other fishing.

Warden, J. H. Joseph (*and quarters*), £660 to £750.

Redonda is uninhabited.

CAPITAL ΨSt. John. Population (1948), 11,000.

(2) ST. KITTS-NEVIS WITH ANGUILLA

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they have a population (1958) of 58,170, and a total area of about 153 square miles. The climate is decidedly healthy for the tropics, the temperature being from 66° to 88°.

St. Kitts (population 1958, 37,450), the principal island, was the first possession of the British West Indies to be colonized (1623); it is situated in lat. 17° 18′ N. and long. 62° 48′ W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,792 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital, ΨBasseterre, is a port of registry.

Nevis (population 1958, 15,890) is separated from St. Kitts by a strait 3 miles wide and has an area of 50 sq. miles. Cotton and coconuts are exported, and cattle and vegetables are raised. Its greatest elevation is 3,596 feet. The chief town. ΨCharlestown, is a port of entry.

Anguilla (population 1958. 4,830) is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised.

Finance and Trade

	1957	1958
Public revenue	£995,555	£1,185,986
Expenditure	1,065,747	1,183,948

Imports	2,155,391	2,368,282
Exports	2,055,348	1,964,186

Government

The Administrator is assisted by an Executive Council and a Legislative Council. The Executive Council consists of the Governor of the Leeward Islands (who seldom sits), the Administrator, two official members, one nominated unofficial member and five members chosen by the Legislative Council from among the elected members of that body. The Legislative Council consists of two official members, three nominated members and eight elected members. Since January 19, 1956, three of the five elected members in the Executive Council have held the portfolios of Ministers of Trade and Production, Public Works and Communications and Social Services respectively.

CAPITAL, ΨBasseterre (St. Kitts). Estimated population (1958), 18,000.

(3) MONTSERRAT,

is situated in 16° 45′ N. lat. and 62° 15′ W. long., 27 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, estimated population (1959), 14,620. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1783. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest well cultivated. The chief exports are sea island cotton, tomatoes, carrots, onions, limes and lime products. There is a wireless station on the island.

Finance and Trade

Medical Officers, C. N. Griffin, O.B.E. (*acting*) Z. P. Walczak; D. C. Wooding	1,200 to £900

CHIEF TOWN. ΨPlymouth (2,500).

(4) BRITISH VIRGIN ISLANDS, *see* p. 769.

TRINIDAD AND TOBAGO

Trinidad, the second largest and most southerly of the West Indian Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between 10° 2′—10° 50′ N. lat. and 60° 55′—61° 56′ W. long., and is about 50 miles in length by 37 in breadth, with an area of 1,864 square miles, and a population estimated (1959), at 801,000 (including Tobago). The racial groups at the 1946 census were: African 47 per cent., East Indian 35 per cent., Mixed or Coloured 14 per cent., European 3 per cent., Chinese 1 per cent. The island was discovered by Columbus in 1498, was colonized in 1532 by the Spaniards, capitulated to the British under Abercromby in 1797, and was ceded to Britain under the Treaty of Amiens (March 25, 1802). Two mountain systems, the Northern and Southern Ranges, stretch across almost its entire width and a third, the Central Range, lies somewhat diagonally across its middle portion; otherwise the island is mostly flat. The highest peaks are in the Northern Range (Aripo 3,085 ft., El Tucuche 3,072 ft.). The climate is tropical with temperatures ranging from 70° to 90°F. and a rainfall ranging from 100 inches in the north east to 50 inches in the west. There is a well-marked dry season from January to May and a wet season from June to December. The nights are invariably cool. The main tourist season is from December to April.

Oil is the principal export. A remarkable phenomenon is the asphalt lake, 114 acres in extent, near the village of La Brea, from which in 1958 133,042 tons of natural asphalt were removed. The soil of Trinidad is rich and productive, the most important products being sugar, molasses, rum, cocoa, coconuts and coconut products, citrus and coffee. Agricultural exports totalled $55,048,551 in 1958.

In 1958 there were 67 Government and 347 denominational (assisted) primary and intermediate schools, with an enrolment of 166,845 and average attendance of 141,720.

There are 109 miles of public railway and the total mileage of main and local roads maintained during 1958 was 2,510. There are 188 post offices and postal agencies, 57 of which transact savings bank and money order business. There is an internal telegraph system and two local broadcasting stations.

Trinidad is well served by steamship lines and there are deep water wharf facilities at Port of Spain. Eleven international scheduled airlines operate to and through Trinidad (Piarco), which acts as a focal point for air traffic between the Americas. There were 12,843 movements of aircraft in 1958. A domestic air service between Trinidad and Tobago is operated by B.W.I.A. Flights in 1958 averaged two per day.

Finance

	1957	1958
Revenue	$108,610,026	$129,298,217
Expenditure	90,158,952	139,856,735
Public debt	72,865,032	—

Trade

	1958
Imports	$412,492,692
Exports	393,539,493
Imports from U.K. 1959	£27,471,198
Exports to U.K. 1959	34,794,817

The chief town and port of entry, ΨPort of Spain (pop. 121,150), is one of the finest towns in the West Indies, with sewerage, electric lighting, trolley-bus and telephone services. Other towns of importance are ΨSan Fernando (pop. 39,800), about 33 miles south of the capital, and Arima (pop. 12,650).

Tobago lies between 11° 8′ and 11° 21′ N. lat. and between 60° 30′ and 60° 50′ W. long., about 75 miles south-east of Grenada, 19 miles north-east of Trinidad, and 120 miles S.W of Barbados. It was ceded to the British Crown in 1814 and amalgamated with Trinidad in 1888. The island is 26 miles long, and 7½ broad, and has an area of 116 square miles, with a population estimated (1958) at 36,900. It is one of the healthiest of the West Indies and a popular tourist resort. The main town is ΨScarborough (estimated pop. 15,000)

Other Islands.—Corozal Point and Icacos Point, the N.W. and S.W. extremities of Trinidad, enclose the Gulf of Paria, and west of Corozal Point lie several islands, of which Chacachacare, Huevos, Monos and Gaspar Grande are the most important. On Chacachacare is a leper settlement, the Medical Superintendent of which appeals for Sunday and weekly editions of British newspapers.

Government

The Colony is administered in accordance with the provisions of the Trinidad and Tobago (Constitution) Order in Council, 1950, as amended in 1956 and 1959, which provides for Executive and Legislative Councils, on which there are unofficial elected majorities. The Cabinet, which is the chief instrument of policy, consists of a Premier, as chairman, 8 Ministers and 2 *ex officio* members. The Legislative Council consists of a Speaker who presides, 2 *ex officio* members, 5 nominated members and 24 elected members.

Governor of Trinidad and Tobago, His Excellency Sir Solomon Hochoy, K.C.M.G., O.B.E. (+*allees.* $11,520)	$24,000
Governor's Secretary (vacant)	8,640
Premier and Minister of Finance, Dr. Hon. E. Williams	$10,800
Minister of Home Affairs, Dr. Hon. P. V. J. Solomon	9,600
Minister of Education and Culture, Hon. J. Donaldson	9,600
Minister of Health, Water and Sanitation, Dr. Hon. W. Mahabir	9,600
Minister of Industry, Commerce, Tourism and External Communications, Hon. J. O'Halloran	9,600
Minister of Agriculture, Lands and Fisheries, Hon. K. Mohammed	9,600
Minister of Housing and Local Government, Hon. G. Montano	9,600
Minister of Labour, Hon. D. Granado	9,600

Chief Justice, Sir Stanley Gomes	13,440
Speaker, Legislative Council, Hon. E. M. Duke	7,200
Puisne Judges, Hons. F. J. Camacho; A. H. McShine; M. H. A. Corbin; N. A. M. Peterkin; C. E. G. Phillips; K. P. de la Bastide; I. E. Hyatali	9,600
British Council Representative, J. A. Danford, M.B.E.	

CAPITAL, ΨPort of Spain (pop. 121,150); transit 10 to 12 days to U.K.; 5 days to U.S.A.; by air—36 hours to U.K., 24 hours to U.S.A.

THE WINDWARD ISLANDS

The Windward Islands consist of the four colonies of Grenada, St. Vincent, St. Lucia and Dominica with their dependencies; the Grenadines being divided between Grenada and St. Vincent. The total area is 821 square miles, with a population estimated (1958) at 328,625. There is an Administrator in each of the four islands and an elected majority in each of the four Legislative Councils. The ministerial form of government was introduced in 1956.

Trade with U.K.

	1958	1959
Imports from U.K.	£2,743,506	£3,065,430
Exports to U.K.	5,695,034	7,609,786

Grenada and the Grenadines

Grenada is situated between the parallels of 12° 13′–11° 58′ N. lat. and 61° 20′–61° 35′ W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 133 square miles: estimated population (including some of the Grenadines), 88,608 (1960). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Colombus in 1498, and named Conception. It was originally colonized by the French, and was ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, sugar cane, cotton, coconuts, limes and fruit are grown. The imports chiefly comprise dry goods, wheat flour, dried fish, bread-stuffs, hardware, etc.

ΨSt. George's (population approximately 7,305), on the south-west coast, is the chief town, and possesses a good harbour.

Finance

	1958	1959
Public revenue	$5,459,883	$6,917,507
Expenditure	5,877,682	7,096,540

Total exports	4,606,796	8,346,705
Imports from U.K.	4,179,025	4,192,283
Exports to U.K.	3,390,446	5,081,615

Government

There is a Legislative Council of 13 members, of whom 2 are nominated and 10 elected and one (the Principal Law Officer) is an *ex officio* member.

Administrator, His Honour J. M. Lloyd (*including allce.*) £3,350
Financial Secretary, G. E. C. Stanford £1,500
Senior Medical Officer and Registrar-General, F. C. Alexis £1,560
Magistrates, J. J. Copland (*S. District*); E. G. Knight, M.B.E. (*acting*) (*W. and N. Districts*); R. G. John (*E. District*) £720 to £1,025
Secretary to Government, H. H. Williams £1,500
Superintendent of Police, J. H. Holley, M.B.E. ..... £1,080 to £1,260

The Grenadines are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. 6,431.

ST. LUCIA,

the second largest and the most picturesque of the Windward group, situated in 13° 54′ N. lat. and 60° 50′ W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 238 square miles with an estimated population (1959) of 93,755. It possesses perhaps the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are sugar, bananas, copra, coconuts, cacao, edible oil, lime oil, fresh fruit and vegetables. The chief imports are flour, machinery, cotton-piece goods, sacks and bags.

ΨCastries, the capital (estimated population, 25,000) is recognized as being one of the finest ports in the West Indies on account of its reputation as a safe anchorage in the hurricane season. In 1959, 1,217 vessels with a total gross tonnage of 1,429,493 called at Castries.

Finance and Trade

	1958
Public revenue	$5,259,072
Expenditure	5,509,128
Public debt	3,536,145
Total imports	9,034,106
Total exports	4,459,356

Government

There is an Executive Council over which the Administrator presides, consisting of a Chief Minister, three other ministers, one nominated member and one *ex officio* member, (the Principal Law Officer). There is a Legislative Council consisting of the Administrator, (President), 2 *ex officio* members (the Principal Law Officer and the Financial Secretary), 3 nominated members and 8 elected members.

Administrator, The Earl of Oxford and Asquith (+*allce.* $2,880) $12,000
Crown Attorney, W. Macintyre 7,440
Chief Secretary, G. S. Da Breo 7,200
Financial Secretary, Col. A. G. Tubb, O.B.E. 7,200

ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10′ N. lat. and 60° 57′ W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (1958) of 81,782. In 1846, a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the three other islands of the group. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, copra, coconuts, rum, sugar, bananas, cassava, cocoa, ground provisions, and spices. Its chief imports are foodstuffs (including canned and pickled meat, salted and pickled fish, butter, rice and flour), cotton and woollen piece goods, hardware, lumber, iron and steel manufactures, cement and fertilizers.

There were 50 primary schools with 19,651 pupils in 1958, and 2 Government secondary schools with an attendence of 467. In addition, there are 2 grant-aided secondary schools with an attendance of 394.

CAPITAL, ΨKingstown. Population (1957), 8,100.

Total exports	6,041,952	5,766,520

Government

There is a Legislative Council of 2 *ex officio* members, 3 nominated and 8 elected members.

Administrator, A. F. Giles, C.M.G., M.B.E. (1955) (+*allce*, $2,496) $9,936
Crown Attorney, B. F. Dias ..... $4,320 to $5,280
Financial Secretary, B. R. Thomas $4,320 to $5,280
Senior Medical Officer, Dr. A. D. Low ... $6,000
Magistrates, C. A. E. Rawle; K. Lewis $2,880 to $4,080
Registrar and Additional Magistrate, H. M. Squires ..... $2,880 to $4,080

DOMINICA

Dominica, the loftiest of the Lesser Antilles, was transferred from the Leeward to the Windward Group on Jan. 1, 1940. It is situated between 15° 20′—15° 45′ N. lat. and 61° 13′—61° 30′ W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad comprising an area of 305 sq. miles, or 195,200 acres, of which about 35,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The climate is healthy, and during the winter months very pleasant. The exports consist almost entirely of agricultural produce, principally bananas, lime oil, lime juice, oranges, bay oil, cocoa, copra and vanilla. A census of population was held in 1960 and preliminary figures showed a population of 59,479. The principal towns are ΨRoseau, on the south-west coast, population (1960), 12,415, and Portsmouth, population (1960), 2,209.

Education.—There are 52 elementary schools, of which 49 are Government and 3 assisted. Of the

4 secondary schools, 3 receive a grant-in-aid and one is maintained by the Government.

Finance and Trade

Director of Works, T. H. Shillingford £1,500

ZANZIBAR

(*The Zanzibar Protectorate*)

Sultan, H. H. Seyyid Sir Khalifa bin Harub, G.C.B., G.C.M.G., G.B.E., *born* Aug. 26, 1879; *succeeded* Dec. 9, 1911.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tunghi Bay and north to Warskeikh; but they are now confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kiamboni (Dick's Head) and the islands of Lamu, Manda, Patta, and Siu.

Zanzibar has an area of 640 square miles with a population of 165,253 (1958 Census); Pemba (380 square miles) population, 133,858; total area, 1,020 square miles; total population, 299,111.

Production, etc.—The islands produce a large percentage of the world's supply of cloves and clove oil (cloves exported in 1959 were valued at £2,657,767 and clove oil at £107,225). They also exported £170,800 of coconut oil, £557,931 of copra, and £122,388 of coconuts in 1959. Other important products are chillies, oil cake, coir fibre, sea shells, seaweed and frozen lobsters. Rice and cassava are grown extensively for local consumption.

Education.—In 1959 there were 78 primary schools, out of which 63 were government schools, 10 government-aided and 4 private. Six secondary schools are open to all pupils from all communities. There are government training colleges for men and women primary teachers in Zanzibar. The total enrolment in all government and grant aided primary and secondary and assisted schools in November, 1959 was 19,798. The total expenditure from local revenue in 1959 was £393,956.

Communications.—There are 339 miles of road suitable for motor traffic in Zanzibar and 107 miles in Pemba. Radio telephone communication is available from Zanzibar to the three mainland territories. The town of ΨZanzibar, on the island of the same name, has a population of 45,284. It possesses a magnificent harbour, which presents great facilities for shipping and trade generally.

A civil aerodrome is situated 4 miles south-east of the town, linked with Tanganyika and Kenya by charter and daily scheduled services. There is also a civil aerodrome in Pemba linking the island with Zanzibar, Kenya and Tanganyika by regular services with the East African Airways Corporation.

FINANCE

	1958	1959
Revenue	£2,382,408	£2,254,691
Expenditure	2,530,527	3,674,263

TRADE

The principal imports are rice, grain, groceries, sugar, tobacco, ivory, petroleum and piece-goods; the exports are cloves, copra, marine products, clove oil, coconut oil, oil cakes and coir fibre in addition to re-exports of previously imported ivory and piece-goods.

	1958	1959
Imports	£5,346,755	£5,509,128
Exports	5,203,100	4,775,596
	1958	1959
Imports from U.K.	£1,113,711	£791,174
Exports to U.K.	177,500	228,432

GOVERNMENT

The government is administered by a British Resident. His Highness the Sultan presides over a Privy Council, and the British Resident presides over the Executive Council, on which there are 4 *ex officio*, 3 official and 5 representative members, and the Legislative Council of 25 members (4 *ex officio*, 9 official and 12 representative members). In 1957 the first general election for 6 of the representative members was held in the Protectorate.

British Resident, Sir George Mooring, C.M.G. (1959) (*and duty allowance £1,250*) £3,600
Chief Justice, G. M. Mahon 3,000
Chief Secretary, P. A. P. Robertson, C.M.G. 2,900
Attorney-General, P. N. Dalton 2,800
Senior Commissioner, J. D. Stringer, C.M.G. 2,700
Financial Secretary, G. L. Lawrence, O.B.E. 2,700

Director of Education, S. F. Hann, O.B.E. 2,500
Director of Medical Services, I. W. Mac-Kichan 2,500
Director of Public Works and Land Survey, J. M. Jackson 2,500
Commissioner of Police, R. V. H. Biles 2,500
Comptroller of Customs, A. Bishop 2,300
Administrator General, E. J. Stiven 2,400

Trade Enquiry Office in London, The Commissioner, H.M. Eastern African Dependencies, Grand Buildings, Trafalgar Square, W.C.2.

Zanzibar is distant 6,850 miles; transit, 20 days by sea; 2 days by air.

Ireland

See also Northern Ireland, pp. 687–690; Republic of Ireland, pp. 806–8.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,408 sq. miles and its geographical position between 51° 26′ and 55° 21′ N. latitude and from 5° 25′ to 10° 30′ W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Annagh Head), is 174 miles. On the N. coast of *Achill Island* (Co. Mayo) are the highest cliffs in the British Islands, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coastline. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2,240 ft.) of County Tyrone; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.); the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway; *Macgillicuddy's Reeks* (Carrantuohill 3,414 ft., the highest point in Ireland); and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Harbour, and the *Suir*, *Barrow* and *Nore*, to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough *Neagh* (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of *Allen*, *Boderg*, *Forbes*, *Ree* and *Derg*, and the Erne Chain of *Gowna*, *Oughter*, *Lower Erne*, and *Erne*; *Melvin*, *Gill*, *Gara* and *Conn* in the north-west; and *Corrib* and *Mask* (joined by a hidden channel) in the west. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous *Lakes of Killarney*. The climate of Ireland is more equable than that of Great Britain, the extreme range of temperature readings being from 2° F. to 90° F. (compared with −17° F. to 100° F. over Great Britain). The average annual rainfall varies from 27 inches at Dublin to more than 100 inches in the mountains of Connemara. The rainfall is also more uniform from year to year than in Great Britain.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island; a grave containing a polished stone axehead assigned to 2,500 B.C. was found at Linkardstown, Co. Carlow, in 1944, and the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

History.—According to Irish legends, the island of Ierne was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardri* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Antrim with Scotland (Staffa).

Hibernia was visited by Roman merchants but never by Roman legions, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as Findgaill (White Strangers) and the Danes as Dubgaill (Black Strangers), names which survive in "Fingall," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaids-tir, Laigins-tir, Mumans-tir and Kunnak-tir). The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermod MacMurrough (Diarmait MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidhri O'Connor (the high king of Ireland), and visited Henry II., the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermod enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermod's daughter. In 1172 (Oct. 18) Henry II. himself landed in Ireland. He received homage from the Irish kings and established his capital at Dublin. The invaders subsequently conquered most of the island and a feudal government was created. In the 14th and 15th centuries, the Irish recovered most of their lands, while many Anglo-Irish lords became virtually independent, royal authority being confined to the "Pale," a small district round Dublin. Though under Henry VII., Sir Edward Poynings, as Lord Deputy had passed at the *Parliament of Drogheda* (1494) the act later known as *Poynings' Law*, subordinating the Irish Legislature to the Crown, the Earls of Kildare retained effective power until, in 1534, Henry VIII. began the reconquest of Ireland. Parliament in 1541 recognized him as King of Ireland and by 1603 English authority was supreme.

Christianity.—Christianity did not become general until the advent of St. Patrick. *St. Patrick* was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organize the Christian religion throughout the island.

Republic of Ireland

Area and Population.—The Republic has a land area of 26,600 sq. miles, divided into the four Provinces of LEINSTER (Carlow, Dublin, Kildare, Kilkenny, Leix, Longford, Louth, Meath, Offaly, Westmeath, Wexford and Wicklow); MUNSTER (Clare, Cork, Kerry, Limerick, Tipperary and Waterford); CONNACHT (Galway, Leitrim, Mayo, Roscommon and Sligo); and part of ULSTER (Cavan, Donegal and Monaghan). Total population of the Republic at the last Census (1956) was 2,898,264, a density of 109 persons per sq. mile. Provisional figures showed 60,189 births, 15,255 marriages and 34,245 deaths in the year 1959.

THE PRESIDENT

Uachtaran na hÉireann (President of Eire), Éamon de Valéra, *assumed office* June 25, 1959.

MEMBERS OF THE GOVERNMENT

Taoiseach, Seán F. Lemass	£3,000
Tánaiste, Minister for Health and Minister for Social Welfare, Seán Mac an tSaoi (Seán MacEntee)	2,000
Finance, An Dr. Séamas ó Riain (Dr. James Ryan)	2,000
External Affairs, Proinsias Mac Aogáin (Frank Aiken)	2,000
Justice, Oscar Mac Tréinfhir (Oscar Traynor)	2,000

Transport and Power, Erskine H. Childers	2,000
Industry and Commerce, Seán ó Loinsigh (John Lynch)	2,000
Local Government, Niall Bléine (Neil T. Blaney)	2,000
Defence, Caoimhghin ó Beoláin (Kevin Boland)	2,000
Lands, Michael Ó Móráin (Michael Moran)	2,000
Posts and Telegraphs, Micheál Hilliard (Michael Hilliard)	2,000
Education, An Dr. Padraig ó hIrighile (Dr. Patrick J. Hillery)	2,000
Gaeltacht, Gearóid Mac Pharthaláin (Gerald Bartley)	2,000

GOVERNMENT

The Constitution.—The Constitution of Ireland, approved by a plebiscite on July 1, 1937, came into operation on December 29, 1937.

The Constitution declares that Ireland is a sovereign independent democratic State and affirms the right of the Irish Nation to choose its own form of Government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions. The national territory is declared to be the whole island of Ireland, its islands and the territorial seas. Pending the re-integration of the national territory, and without prejudice to the right of the Parliament and the Government established by the Constitution to exercise jurisdiction over the whole of the national territory, the laws enacted by that Parliament shall have the like area and extent of application as those of the Irish Free State, which did not include the six counties of Northern Ireland. The national flag is the tricolour of green, white and orange. The Irish language, being the national language, is the first official language. The English language is recognized as a second official language.

The President.—The President—*Uachtarán na hÉireann*—is elected by direct vote of the people for a period of seven years. A former or retiring President is eligible for a second term. The President summons and dissolves Dáil Éireann on the advice of the *Taoiseach* (Head of the Government). He signs and promulgates laws. The supreme command of the Defence Forces is vested in him, its exercise being regulated by law. He has the power of pardon. The President, in the exercise and performance of certain of his constitutional powers and functions, is aided and advised by a Council of State.

The Legislature.—The Parliament—*Oireachtas*—consists of the President and two Houses: a House of Representatives—*Dáil Éireann*—and a Senate—*Seanad Éireann*.

Dáil Éireann is composed of 147 members elected by adult suffrage on a basis of proportional representation.

Seanad Éireann is composed of 60 members, of whom 11 are nominated by the Taoiseach and 49 are elected; three by the National University of Ireland, three by the University of Dublin, and 43 from panels of candidates, established on a vocational basis.

The Executive.—The executive authority is exercised by the Government subject to the Constitution. The Government is responsible to Dáil Éireann, meets and acts as a collective authority, and is collectively responsible for the Departments of State administered by the Ministers.

The Taoiseach is appointed by the President on the nomination of Dáil Éireann. The other members of the Government are appointed by the President on the nomination of the Taoiseach with the previous approval of Dáil Éireann. The Taoiseach appoints a member of the Government to be the *Tánaiste* who acts for all purposes in the place of the Taoiseach in the event of the death, permanent incapacitation, or temporary absence of the Taoiseach. The Taoiseach, the Tánaiste and the Minister for Finance must be members of Dáil Éireann. The other members of the Government must be members of Dáil Éireann or Seanad Éireann, but not more than two may be members of Seanad Éireann.

THE LEGISLATURE

The Legislature (*Oireachtas*) consists of the President and two Houses—a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*). Dáil Éireann is composed of 147 Members, elected on the system of Proportional Representation by means of the single transferable vote. All citizens who have reached the age of 21 years and are not disqualified by law have the right to vote. The same Dáil does not continue for a longer period than seven years, but a shorter period of five years has been fixed by existing legislation. The present (16th) Dail was elected on March 5, 1957, and met on March 20, 1957.

Party Strength (Dáil Éireann)

	1958	1959	1960

*** Members of Dáil Éireann are paid an allowance of £1,000 per annum (and members of Seanad Éireann £750) and are allowed free travelling facilities between Dublin and their constituencies.

Parliamentary Secretaries.

Parliamentary Secretary to the Taoiseach and to the Minister for Defence, Donnchadh Ó Briain.
Do. to Minister for Social Welfare, Micheal S. Ó. Cinnéide (Michael J. Kennedy).
Do. to the Minister for Finance (vacant).
Do. to the Minister for Justice, Cathal Ó hEochaidh (Charles Haughey).

Attorney-General, Aindrias Ó Caoimh, A.S.
Secretary to the Government, Muiris Ó Muimhneacháin (Maurice Moynihan).
Assistant Secretary to the Government, Nioclás Ó Nualláin, Ph.D. (Nicholas G. Nolan).

United Kingdom Ambassador to the Republic of Ireland

H. E. Sir Ian Maclennan, K.C.M.G., 39 Merrion Square, Dublin.
Counsellor, G. D. Anderson.
First Secretary (vacant).
Military Attaché, Brig. R. N. Thicknesse.
Trade Commissioner, G. L. Pearson, M.C.

Diplomatic Representatives Abroad

The Holy See: L. T. McCauley (*Ambassador*).
Argentina: W. B. Butler (*Minister*).
Australia: S. Kennan (*Chargé d'Affaires*).
Austria: (*Minister*) (vacant).
Belgium: D. R. McDonald (*Ambassador*).
Canada: T. J. Kiernan (*Ambassador*).
France: W. P. Fay (*Ambassador*).
Federal Republic of Germany: W. Warnock (*Minister*).
Great Britain: H. J. McCann (*Ambassador*), 17 Grosvenor Place, London, S.W. 1.
Italy: T. V. Commins (*Ambassador*).
Netherlands: B. Gallagher (*Ambassador*).
Norway: J. A. Belton (*Minister*).
Portugal: F. Biggar (*Minister*).
Spain: M. Rynne (*Ambassador*).
Sweden: J. A. Belton (*Ambassador*).
Switzerland: T. J. Horan (*Minister*).
Turkey: (*Minister*) (vacant).
U.S.A.: J. J. Hearne (*Ambassador*).

THE JUDICIARY

The Judiciary consists of Courts of First Instance and a Court of Final Appeal called the Supreme Court—*Cúirt Uachtarach*. The Courts of First Instance include a High Court—*Ard-Chúirt*—invested with full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction, with a right of appeal as determined by law. The High Court alone has original jurisdiction to entertain the question of the validity of any law having regard to the provisions of the Constitution. The Supreme Court has appellate jurisdiction from all decisions of the High Court, subject to exceptions and regulations prescribed by law. No law may, however, be enacted excepting the question of the validity of any law from the appellate jurisdiction of the Supreme Court.

Chief Justice, Hon. Conor Maguire	£4,850
President of the High Court, Hon. Cahir Davitt	3,700
Judges, Supreme Court, Hon. Martin C. Maguire; Hon. Cecil Lavery; Hon. T. C. Kingsmill Moore; Hon. C. O'Daly, each	3,700
Judges, High Court, Hon. Kevin Haugh; Hon. Kevin J. Dixon; Hon. F. G. O. Budd; Hon. R. McLoughlin; Hon. Thomas Teevan; Hon. George Murnaghan; Hon. W. G. Shannon (*ex officio*) each	£3,250
Master of the High Court, John O. Leary, S.C.	

DEFENCE

Under the direction of the President, and subject to the provisions of the Defence Act, 1954, the military command of the Defence Forces is exercised by the Government through the Minister for Defence. To aid and counsel the Minister for Defence on all matters in relation to the business of the Department of Defence on which he may consult it, there is a Council of Defence consisting of the Parliamentary Secretary to the Minister, the Secretary of the Department of Defence, the Chief of Staff, the Adjutant-General and the Quartermaster-General. Establishments provide at present for a Permanent Defence Force of approximately 13,000 all ranks, including the Air Corps and the Naval Service. The Defence Estimates for the year ending March 31, 1961, provide for approximately 25,500 all ranks of the Reserve Defence Force. Recruitment is on a voluntary basis. Minimum term of enlistment for the Army is three years in the Permanent Defence Force with, in most cases, nine years in the Reserve Defence Force. Suitable men may complete twenty-one years service in the Permanent Defence Force. For the Naval Service, enlistment is for six years in the Permanent Defence Force and six years in the Reserve Defence Force. The Naval Service comprises three corvettes and auxiliary vessels. The Defence Estimates for the year ending March 31, 1961, provide for an expenditure of £7,472,740.

FINANCE

	1959–60 (Actual)	1960–61 (Estimated)
Revenue	£129,855,000	£136,633,000
Expenditure	146,793,000	154,210,000

The expenditure figures include certain services of a capital nature regarded as proper to be met from borrowing. Issues for these services in 1959–60 amounted to £18,111,000 and for 1960–61 are estimated at £17,577,000.

The estimated *Revenue* for 1960–61 includes: Customs and Special Import Levy, £40,675,000; Excise, £30,465,000; Estate, etc., Duties, £2,750,000; Income Tax, Sur-tax and Super-tax, £26,085,000; Corporation Profits Tax, etc., £3,300,000; Motor Vehicle Duties, £6,000,000; Stamp Duties, £2,800,000; Post Office Services, £9,650,000.

The principal items of estimated *Expenditure* for 1960–61 are Debt Service, £28,240,000: Agriculture, land division, etc., £23,723,000: Army, £7,473,000: Police, £4,537,000: Education, £15,470,000: Social Insurance, £4,410,000: Social Assistance, £21,804,000: Health Services £8,817,000; Postal Services, £8,199,000: Superannuation, £6,116,000.

The *Gross Debt* on March 31, 1960, was £465,000,000 with *Assets* £250,000,000, leaving the *net* total of the debt at £215,000,000.

RELIGION

(Census of 1946)

Catholics	2,786,033
Protestant Episcopalians	124,839
Presbyterians	23,870
Methodists	8,355
Others	12,020
Total	2,955,107

EDUCATION

Primary Education is directed by the State (4,878 schools with an enrolment of 505,363, and average daily attendance 86·2 per cent.). Secondary Education is in private hands and is largely conducted by Religious Orders (511 recognized schools with 73,392 pupils 12–20 years of age). Vocational (Continuation and Technical) Education is conducted by 38 local Committees in 272 permanent schools (excluding 12 residential schools of domestic training and one day trades preparatory school) and a large number of temporary centres (24,604 whole-time day students and 64,055 other students). There are two Universities in Dublin, of which the National University has 3 constituent colleges (Dublin, Cork and Galway) with 533 professors, etc., and 6,832 students; and Trinity College, Dublin with 196 Professors, etc., and 2,567 students in the academic year 1958–59. The estimated State expenditure on education in 1960 61, excluding administration and inspection, is Primary £10,478,240; Secondary £2,629,490; Vocational £1,478,440; Science and Art £244,320. The vote for Universities and Colleges for 1960–61 amounts to £986,630, while in addition grants of £121,284 are provided in respect of the Faculties of General Agricultural and Dairy Science.

PRODUCTION AND INDUSTRY

Agriculture and Live Stock.—In 1959 there were 1,084,000 acres under corn crops, 557,400 under root and green crops, 200 under flax, 12,400 under fruit, and 1,880,600 under hay, a total of 3,534,600 acres. The principal produce in 1959 was: oats, 474,800 tons: wheat, 363,600 tons: barley, 452,400 tons: turnips, 1,923,900 tons: potatoes, 2,592,400 tons: mangolds, 1,210,600 tons: sugar beet, 927,600 tons: and hay, 3,707,900 tons. The *Live Stock* included 4,683,800 cattle, 4,411,900 sheep, 852,200 pigs, and 233,600 horses.

Minerals.—1,396 persons were employed in the coal mines in 1958 and 201,000 tons of coal won.

Sea Fisheries.—6,173 persons were employed in the fisheries in 1959, the total value of all fish (excluding salmon) landed being £1,609,000.

COMMUNICATIONS

Railways.—There were (1959) 2,192 miles of railway of which 2,003 miles are of standard (5ft. 3 in.) gauge. 12,631,000 passengers and 2,406,323 tons of merchandise were conveyed. The gross receipts (1958) were £16,296,519* and the net loss £409,340.*

* Figures relate to the year ended March 31, 1959 for *Córas Iompair Eireann*, to the calandar year 1958 for other railways.

These figures include receipts from road transport services, canals, etc., operated by the railway companies.

Road Motor Services.—In 1959 road motor vehicles carried 296,939,223 passengers, the gross receipts being approximately £6,234,962.

Shipping.—In 1959 the number of ships with cargoes and in ballast entered at the various Ψ ports, Dublin, Cobh (Queenstown), Dún Laoghaire (Kingstown), Cork, Galway, Waterford, Rosslare, Limerick and Foynes, Dundalk, etc., was 9,299 of 9,582,000 tons, of which 1,456 (1,270,000 tons) were Republic of Ireland flag, and 4,522 (5,302,000 tons) British.

CIVIL AVIATION

Shannon Airport, 15 miles W. of Limerick, is on the main transatlantic air route. In 1959 the airport handled 407,495 passengers and 45,149,636 lbs. of cargo.

Dublin Airport, 6 miles N. of Dublin, serves the cross-channel and European services operated by the Irish national airline *Aer Lingus* and other airlines. During 1959 the airport handled 646,836 passengers and 20,591,151 lbs. of cargo.

Licensed private aerodromes include: Weston, 9 miles W. of Dublin; Dunmore East, 10 miles S.E. of Waterford; Coonagh, 2 miles W. of Limerick; Oranmore, 5 miles E. of Galway; Killarney Racecourse, 1 mile S. of Killarney; Farmers' Cross, 4 miles S.W. of Cork; Rosapenna Strand, 16 miles N. of Letterkenny.

OVERSEAS TRADE

PRINCIPAL ARTICLES

Imports (1959)

The principal groups were food £31,496,799; vehicles £20,486,761; machinery and electrical goods £21,838,107; oils, fats, resins and gums £20,143,335; textiles (excluding clothing) £19,367,587; non-metalliferous mine and quarry products £11,283,007; iron and steel £9,128,954; live animals £9,565,512; chemicals, perfumery, dyes and colours £11,169,959; paper and cardboard £6,398,689; fertilizers £6,360,916.

Domestic Exports (1959)

Principally, live animals £39,128,056; food £36,684,097; textiles (excluding clothing) £9,811,114; drink £6,825,648.

CAPITAL

Dublin (*Baile Átha Cliath*) is a City and County Borough on the River Liffey at the head of Dublin Bay. In April, 1956, its population was 539,476. There are many notable public buildings in the City, among them the two Cathedrals of Christ Church and St. Patrick, the Bank of Ireland (formerly the House of Parliament) and Trinity College (the only constituent College of the University of Dublin). University College is a constituent college of the National University of Ireland. A large export trade of agricultural products passes through the city and there is a considerable brewing industry, while there is an increasing amount of light manufacturing.

Other cities and towns are Cork (pop. 80,011), Dún Laoghaire, formerly Kingstown (47,553), Limerick (50,886), Waterford (28,878), Galway (21,219), Dundalk (20,154), Drogheda (17,008), Sligo (12,947), Wexford (10,838), Bray (10,856), Kilkenny (10,607), Tralee (10,928), Clonmel (10,697) and Athlone (9,393).

*Preliminary Figures.

†Includes Midway, Wake, Canton, Enderbury, Johnston, Sand, Swan, Corn, Navassa, Baker, Howland and Jarvis Islands. ‡Figures for military, &c. abroad and for small islands, are excluded.

The former Japanese Mandates in the Pacific (*Mariana, Caroline* and *Marshall* Islands) are a trust territory of the United Nations, administered by the U.S.A. The land area of these islands is 687 sq. miles and their population was estimated at 70,594 in 1958.

DENSITY OF POPULATION.—The following figures, based on preliminary figures of the 1960 census, were published on Aug. 1, 1960: The 50 States, 50 persons per sq. mile; the 48 conterminous States 57 persons per sq. mile; Hawaii only, 97 persons per sq. mile; Alaska only, 1 person to each 2½ sq. miles. The figure is that of population divided by number of square miles of *land* area.

REGISTERED BIRTHS AND DEATHS

Calendar Year	Live Births		Deaths	
	Number	Rate per 1,000	Number	Rate per 1,000
1950	3,554,149	23·6	1,452,454	9·6

§1959	4,240,000	24·1	1,660,000	9 4

* Births based on 50 per cent. sample. § Estimated. Includes data for Alaska.

Note—Continental United States only. Deaths exclude fœtal death and deaths among armed forces overseas. Birth and death rates for 1950 are based on the population at census of April 1; for other years as estimated on July 1. Birth rates exclude armed forces overseas.

IMMIGRATION AND NATURALIZATION

From 1820 to 1959, 41,575,563 immigrants were admitted to the United States. Of those admitted in 1959, 20,954 were born in the United Kingdom; 33,777 in Germany and Austria; 6,702 in Scandinavia; 16,251 in Italy; 4,487 in France; 30,098 in Hungary; 24,312 in Asia; 23,082 in Canada; and 23,061 in Mexico. The total number of immigrants admitted in 1959, was 260,686. 103,932 alien residents of the United States became naturalized citizens during that year.

MARRIAGE AND DIVORCE

Laws of marriage and of divorce are within the exclusive jurisdiction of each State. Each State legislature enacts its own laws prescribing rules and qualifications pertaining to marriage and its dissolutions.

Year	Marriages	Per 1,000 Pop.	Estimated Divorces	Per 1,000 Pop.
1950	1,667,000	11·1	385,000	2·6
1951	1,595,000	10·4	381.000	2·5
1952	1,539,000	9·9	392,000	2·5

The total number, including countries not specified, was 10,161,168 in 1950 compared with 11,419,138 in 1940. 1950 figures include a total of 180,024 from all Asian countries, 120,297 from countries in America other than Canada and Mexico and 86,375 from European countries not listed above.

PHYSIOGRAPHY

The conterminous States of the Republic occupy nearly all that portion of the North American Continent between the Atlantic and Pacific Oceans, in latitude 25° 07′-49° 23′ North and longitude 66° 57′-124° 44′ West, its northern boundary being Canada and the southern boundary Mexico. The separate State of Alaska reaches a latitude of 71° 32′ N., at Point Barrow, a distance of 2,502 miles from the geographic centre of the United States.

Its coast-line has an estimated length of about 3,651 miles on the Atlantic, 1,672 miles on the Pacific, 2,908 miles on the Gulf of Mexico, and 2,470 miles on the Great Lakes. The principal river is the mighty Mississippi-Missouri-Red Rock, traversing the whole country from north to south, and having a course of 3,860 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, James, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Albana and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri-Red Rock. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Appalachian Highlands, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense prairies. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, etc., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium, the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, mined chiefly in Colorado, California, Montana, Utah, and Idaho. The highest point is Mount McKinley (Alaska), 20,320 feet above sea level, and the lowest point of dry land is in Death Valley (Inyo, California), 282 feet below sea-level. The mean elevation of the United States is approximately 2,500 feet.

GOVERNMENT

The United States of America is a Federal Republic consisting of 50 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organization as Territories, and 30 were admitted after such organization), and of 1 organized Territory. Hawaii formally entered the Union as the 50th State on Aug. 21, 1959, from which date the flag of the United States has 13 stripes and 50 stars in 9 horizontal rows of six and five alternately.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to twenty-second Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 16, 1920, Aug. 26, 1920, Feb. 6, 1933, Dec. 5, 1933 and Feb. 26, 1951), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the judicial.

THE EXECUTIVE

THE *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election to one additional term. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the *first Tuesday after the first Monday in November* of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet in their respective States on the *first Monday after the second Wednesday in December* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *sixth day of January* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the highest on the list (not exceeding three) the House of Representatives elects a President, the votes being taken by States, the

representation from each State having one vote. There is also a Vice President, who, on the death of the President, becomes President for the remainder of the term. Under the XXth Amendment to the Constitution the terms of the President and Vice President end at noon on the 20th day of January of the years in which such terms would have ended if the Amendment had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice President, a statute provides for the succession.

The President must be at least 35 years of age and a native citizen of the United States. He receives a taxable salary of $100,000 with a taxable expense allowance of $50,000 and a non-taxable travelling allowance of not exceeding $40,000. Under the XXIInd Amendment to the Constitution, the tenure of the Presidency is limited to two terms. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT

President of the United States (January 20, 1953, to January 20, 1961), DWIGHT D. EISENHOWER, *born* Oct. 14, 1890, *sworn in as President* (in succession to Harry S. Truman) Jan. 20 1953, *Republican.*

Vice-President, Richard Milhous Nixon, of California, *born* Jan. 9, 1913, *elected* Nov. 4, 1952. *Republican.*

THE CABINET

(Each $22,500).

Secretary of State, Christian A. Herter, of Boston (*born* Mar. 28, 1895), *appointed* April 22, 1959.

Secretary of the Treasury, Robert B. Anderson, of Texas (*born* June 4, 1910), *appointed* July, 29, 1957.

Secretary of Defence, Thomas S. Gates, Jr., of Pennsylvania (*born* April 10, 1906), *appointed* Dec. 1, 1959.

Attorney-General, William P. Rogers, of Maryland (*born* June 23, 1913), *appointed* Nov. 8, 1957.

Postmaster-General, Arthur E. Summerfield, of Michigan (*born* Mar. 17, 1899), *appointed*, Jan. 21, 1953.

Secretary of the Interior, Fred. A. Seaton of Nebraska (*born* Dec. 11, 1909), *appointed* May 28, 1956.

Secretary of Agriculture, Ezra T. Benson, of Utah (*born* Aug. 4, 1899), *appointed* Jan. 21, 1953.

Secretary of Commerce, Frederick H. Mueller, of Michigan (*born* Nov. 22, 1893), *appointed* Aug. 10, 1959.

Secretary of Labour, James Paul Mitchell, of New Jersey (*born* Nov. 12, 1900), *appointed* Oct. 8, 1953.

Secretary of Health, Education and Welfare, Dr. Arthur S. Flemming, of Ohio (*born* June, 12. 1905), *appointed* Aug. 1, 1958.

THE CONGRESS

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years The number of Representatives for each State is allotted in proportion to its population—at present 1 for 301,164. The *Senate* consists of 100 members. The salary of a Senator is $22,500 per annum, with mileage at 20 cents per mile each session. The *House of Representatives* consists of 437 Representatives, and a resident commissioner from Puerto Rico. The salary of a Representative is $22,500 per annum with mileage as for Senators. By the XIXth Amendment, sex is no disqualification for the franchise. On July 1, 1950, there were 47,860,228 men and 49,556,137 women of voting age, excluding members of the armed forces overseas.

The Eighty-Sixth Congress

Noon of Jan. 3, 1959, to Noon of Jan. 3, 1961.

President of the Senate, Richard M. Nixon, *Calif.* $30,000

Speaker of the House of Representatives, Sam Rayburn, *Tex* $30,000

Secretary of the Senate, Felton M. Johnston, *Miss.*

Clerk of the House of Representatives, Ralph R. Roberts, *Ind.*

Members of the 86th Congress were elected on Nov. 4, 1958.

The 86th Congress is constituted as follows:

Senate.—Democrats, 65; Republicans, 35. Total, 100.

House of Representatives.—Democrats, 280; Republicans, 153. Four vacancies. Total 437.

CAPITAL OF THE U.S.

In 1790 Congress ratified the cession of 100 sq. miles by the States of Maryland and Virginia as a site for a Federal City to be the national capital of the United States. In 1791 it was decided to name the capital *Washington* and in 1793 the foundation-stone of the Capital building was laid. In 1800 the seat of government was removed to Washington, which was chartered as a city in 1802. In 1846 the Virginia portion was retroceded and the present area of the *District of Columbia* (with which the City of Washington is considered co-extensive) is 69.245 square miles, with a population at the Census of 1960 of 746,958 (preliminary figure).

The District of Columbia is ruled directly by the President and Congress through a Board of Commissioners appointed by the President.

The *City of Washington*, the Capital of the United States, is considered co-extensive with the District of Columbia. It is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia, 107 miles from Chesapeake Bay and 186 from the Atlantic Ocean.

LIBRARY OF CONGRESS

(National Library),

Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, Congress purchased Thomas Jefferson's library of some 6,000 volumes as the basis for a new collection, which was partially destroyed by fire in 1851. Since that date increased (1) by regular annual appropriations by Congress; (2) by deposits under the copyright law; (3) by gifts and exchanges. The collection is the largest in the Western Hemisphere and one of the largest in the world. Exclusive of unbound newspapers and parts of serials awaiting binding, its collections contained, on June 30, 1960, more than 38,863,000 items. These included more than 12,075,000 volumes and pamphlets; 167,000 bound newspaper volumes; 16,219,000 manuscripts; 2,563,000 maps and views; 46,000 microcards; 63,000 reels and strips of newspapers on microfilm; 127,000 reels and strips of microfilm; 126,000 reels of motion pictures; 2,049,000 pieces of music; 109,000 phonograph records; 445,000 "talking books" for the blind; 3,024,000 photographic negatives, prints, and slides; 584,000 fine prints and reproductions and 956,000 other items such as broadsides, photostats, posters, etc. The main building was first occupied in 1897. Considerable additions, including an annex completed in 1939, have brought the total cost to approximately $18,880,000 and the floor space to 1,563,189 square feet (nearly 36 acres) with more than 250 miles of shelving. During the fiscal year 1960, $21,534,975 was available for use by the Library. Of this sum $14,346,663 was appropriated directly by Congress; $5,081,680 was transferred from other Government agencies and $2,106,630 was derived from gifts. During the fiscal year 1960, the Library registered copyright claims for 243,926 works and received $975,192 as earned fees. The sale of 32,037,490 catalogue cards to approximately 10,000 subscribers and the sale of other library publications produced $2,171,284. Receipts from these fees and sales are transferred to the U.S. Treasury. As the national library, the Library of Congress serves other Government agencies, other libraries throughout the world, scholars, and the general public as well as the Congress. In addition to providing reference service on the materials in its collections and publishing catalogues and other guides, the Library administers a national programme to provide books for the blind, participates in international professional and cultural activities, and (through gift funds) sponsors music concerts, literary readings, and other cultural affairs.

Librarian of Congress, L. Quincy Mumford.
Chief Assistant Librarian of Congress, Rutherford D. Rogers.
Deputy Chief Assistant Librarian, Lucile M. Morsch.
Assistant Librarian for Public Affairs, Mrs. Elizabeth E. Hamer.
Assistant Librarian for the American Collections, David C. Mearns.
Director, Administrative Department, Robert C. Gooch.
Director, Legislative Reference Service, Hugh L. Elsbree.
Director, Processing Department, John W. Cronin.
Director, Reference Department, Roy P. Basler.
Law Librarian, W. Lawrence Keitt.
Register of Copyrights, Arthur Fisher.

THE SMITHSONIAN INSTITUTION

The Mall, Washington, 25 D.C.

Secretary, Leonard Carmichael.
Assistant Secretaries, A. R. Kellogg; J. C. Bradley (*acting*).
Administrative Assistant, Louise M. Pearson.
Treasurer, E. L. Roy.
Chief, Editorial and Publications Division, P. H. Oehser.
Librarian, Ruth E. Blanchard.

Board of Regents

Chancellor, The Chief Justice of the U.S.
Chairman, Executive Committee, R. V. Fleming.

Directors of Bureaux

National Museum, A. K. Kellog.
Museum of Natural History, A. C. Smith.
Museum of History and Technology, F. A. Taylor.
Bureau of American Ethnology, F. H. H. Roberts, Jr.
Astrophysical Observatory, F. L. Whipple.
National Gallery of Art, J. Walker.
National Collection of Fine Arts, T. M. Beggs.
Freer Gallery of Art, A. G. Wenley.
National Zoological Park, T. H. Reed.
International Exchange Service, J. A. Collins.
National Air Museum, P. S. Hopkins.
Canal Zone Biological Area, M. H. Moynihan.
Chairman, National Cultural Center, A. S. Fleming.

NATIONAL COMMISSION OF FINE ARTS

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Act of Congress on May 17, 1910, to advise upon the selection of designs and locations for statues, fountains and monuments in the District of Columbia; and to advise generally upon questions of art when required to do so by the President or by any Committee of the Congress. Subsequent Executive Orders require contracting officers to request the advice of the Commission on the merits of designs for all important plans for parks and for all public buildings, which in any essential way affect the appearance of the City of Washington and the District of Columbia. The Advice of the Commission is also given on essential matters relating to the design of medals, insignia and coins produced by the Executive Departments of the Federal Government. The seven members of the Commission are appointed by the President of the United States for terms of four years, and they serve without remuneration, receiving only travel expenses and subsistence while attending meetings. Traditionally, the membership consists of three architects, one landscape architect, one sculptor, one painter, and a layman qualified in the arts.

Chairman, David E. Finley.
Members, Felix W. de Weldon; Peter Hurd; Douglas W. Orr; William G. Perry; Michael Rapuano; Ralph Walker.
Secretary and Administrative Officer, L. R. Wilson.

THE JUDICATURE

The *Federal Judiciary* consists of three sets of Federal Courts: (1) The *Supreme Court* at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from the decisions of the highest Courts of the States. (2) The *United States Courts of*

Appeals, dealing with appeals from District Courts, and consisting of the justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The 93 *District Courts*, served by 199 District Court Judges.

THE SUPREME COURT

(U.S. Supreme Court Building, Washington, D.C.)

Chief Justice, Earl Warren, *Cal.*, *born* March 19, 1891, *appointed* Sept. 30, 1953 ..... $35,500

DEFENCE

Department of Defence.

Secretary of Defence (*in the Cabinet*), Thomas S. Gates, Jr. (Dec. 2, 1959).
Secretary of the Army (*not in the Cabinet*), Wilbur M. Brucker.
Secretary of the Navy (*not in the Cabinet*), William B. Franke.
Secretary of the Air Force (*not in the Cabinet*), Dudley C. Sharp.

The Defence Reorganization Act, making important changes in the organization of the United States armed forces, came into effect on Jan. 1, 1959. It provided for unified command of the three services and their central control by the Defence Department, which also became responsible for research and development of new weapons. The Secretary of each service, Army, Navy and Air Force, became responsible to the Secretary of Defence for the operation and efficiency of his department. Existing practice by which service chiefs and individual departments might approach Congress on their own initiative was, however, continued. The Secretary of Defence assumed powers under the Act to abolish, merge or transfer functions of the individual services, provision being made for proposals of this kind to be laid before Congress and the Senate for thirty days, with the possibility of a veto if objections were raised.

Unified Defence Commands

U.S. European Command, Paris.—*Cdr.*, Gen. Lauris Norstad (concurrently *NATO Supreme Allied Commander*).
Caribbean, Panama Canal Zone.—*Cdr.*, Lt.-Gen. Ridgely Gaither (*U.S. Army*).
Atlantic, Norfolk, Virginia—*Cdr.*, Adm. R. L. Dennison (*U.S. Navy*) (concurrently *NATO Supreme Allied Commander, Atlantic*).
Pacific, Hawaii.—*Cdr.*, Vice-Adm. Herbert R. Riley (*U.S. Navy*).
E. Atlantic and Mediterranean, London.—*Cdr.*, Adm. H. L. Smith (*U.S. Navy*).
Continental Air Defence Command, Colorado Springs, —*Cdr.*, Gen. Lawrence S. Kuter (*U.S.A.F.*).
Strategic Air Command, Omaha.—*Cdr.*, Gen. Thomas S. Power (*U.S.A.F.*).
Alaska Command, Elmendorff Air Base, Alaska.—*Cdr.*, Lt.-Gen. Frank A. Armstrong, Jr. (*U.S.A.F.*)

Army.—The Army of U.S. had a strength of 8,291,336 on V.E. Day, reduced by June 30, 1959, to 591,700 (excluding Air Corps). The strength on April 30, 1960 was 870,244. *Strategic Army Corps* (STRAC).—It was announced in May, 1958, that a force of over 150,000 paratroopers and infantry ready to deal with "limited war" situations in any part of the world had been created. Organized in two airborne and one infantry divisions, it is trained and equipped for combat in jungle, arctic or any other conditions and is operationally ready at all times. A new standard rifle, the M-14, will be issued to troops. It is capable of automatic fire at a rate of about 750 rounds per minute or semi-automatic fire, using the standard NATO 7·62 mm. cartridge. A new standard machine gun, the M-60, also using the standard NATO cartridge, is on order as a replacement for three existing machine guns.

Navy.—The peak strength of the Navy (including Marine Corps) in the summer of 1945 was 3,855,497. The strength on June 30, 1950, was 454,800, and on April 30, 1960, it was 784,651.

SHIPS OF U.S. NAVY

	1940	1945 Aug. 31	1960 May
Attack Carriers	4	28	14
Support Carriers	8	71	9
Cruisers	37	73	15
Destroyers and Destroyer-type craft	220	737	229
Submarines	94	234	116

In May, 1960, there were also 81 minecraft, 45 patrol craft, 110 amphibians and 198 auxiliary vessels.

A nuclear-powered submarine, the *George Washington*, designed to fire ballistic missiles either from the surface or submerged, was launched by President Eisenhower on July 9, 1959. With a displacement of 5,400 tons, length 380 feet, the new submarine cost about $100,000,000 and carries 16 vertical tubes of *Polaris* missiles.

A further nuclear submarine, the *Skipjack* of 2,830 tons, capable of submersion to 400 feet and a speed of at least 20 knots was commissioned in April, 1959.

Aircraft Carriers.—4 of the *Forrestal* Class of aircraft carrier (60,000 tons) have now been commissioned—*Forrestal* (1955), *Saratoga* (1956), *Ranger* (1957) and *Independence* (1959). The last vessel of this class, *Constellation*, was under construction in 1960. Each has a crew of 3,000 to 4,000 men and can carry 100 jet aircraft. They are powered by conventional engines. A contract was placed in 1957 for an atomic-powered carrier with a displacement of 75–85,000 tons and a length of 1,088 feet. *Guided Missile Carriers.* A nuclear powered cruiser, *Long Beach* (14,000 tons), designed to carry *Talos* and *Terrier* guided missiles was launched on July 14, 1959. Powered by two nuclear reactors

the new cruiser will have a speed of over 30 knots and almost unlimited cruising range. The cruisers *Boston* and *Canberra* (13,600 tons) have been converted to carry guided missiles and recommissioned. The *Gyatt*, a destroyer of 2,250 tons, has been converted to carry *Terrier* missiles and two conventional powered submarines *Growler* and *Grayback* to carry *Regulus* missiles. New atomic depth charges have been successfully tested and a rocket-assisted anti-submarine torpedo has been adopted for operational use.

Air.—The U.S. Air Force was formerly the Army Air Corps and directly under command of the War Department. In 1947 an independent Department of the Air Force was established under a Secretary of the Air Force. The Navy and Marine Corps retained separate air organizations. Strength of the Air Force (April, 30 1960), 817,224.

On June 27, 1958, a nation-wide radar screen against possible air attack came into effect on a 24-hour basis; known as SAGE (*Semi-automatic ground environment*) it includes radar equipment in towers built off the coast. Information gathered is collated and interpreted electronically. It has been stated that, by the ultra-long-range radar system, instant warning can be given of inter-continental ballistic missiles at a range of 3,000 miles.

FINANCE

Estimated revenue and expenditure for the fiscal year 1960 showed a surplus of $217,000,000, compared with the actual deficit of $12,427,000,000 in 1959.

(Fiscal year)

Budget Receipts	1959 Actual	1960 Estimated*
Budget Receipts:—		
Individual Income Taxes	$36,719,000,000	$40,306,000,000

GOLD AND SILVER MOVEMENTS

Year	Gold		Silver	
	Imports $	Exports $	Imports $	Exports $
1956	132,667,000	26,562,000	129,068,000	7,049,000
1957	272,641,000	168,332,000	158,354,000	11,163,000
1958	290,585,000	31,022,000	138,046,000	3,719,000
1959	304,378,000	1,933,000	62,743,000	9,935,000

PUBLIC DEBT

On June 30, 1959, the *Federal Public Debt* of the United States stood at $284,706,000,000; the level at the end of the fiscal year 1958 was $276,343,000,000.

COST OF LIVING IN U.S.A.

The Consumer Price Index (for city wage-earner and clerical worker families in 46 cities representative of all cities in the United States) showed a monthly average during the calendar year 1959 of 124.6 (the basic figure of 100 being the 1947–49 average). The average of consumer prices for the first four months of 1960 was: January, 125.4, February, 125.6, March, 125.7 and April, 126.2.

According to figures prepared by the Bureau of Labour Statistics, the index of consumer prices (all items) rose from 123.7 to 125.5 during the calendar year 1959, displaying a persistent upward movement. Most groups increased. In the year to April, 1960, transportation rose from 145.4 to 146.1, medical care from 150.2 to 155.5, and food from 117.7 to 119.5. Personal care rose from 130.7 to 132.9, apparel from 107.3 to 108.9, rent from 139.3 to 141.4, and reading and recreation from 117.8 to 121.1. During the first four months of 1960, the consumer price index for transportation fell from 147.6 to 146.1, but all other major groups increased.

The wholesale price index of all commodities

showed a monthly average during 1957 of 117·6 (the average for the years 1947–49=100). The monthly average rose to 119·5 in 1959 and rose further to 119·6 in June, 1960. Wholesale prices for farm products rose from 90·9 in 1957, to 94·9 in 1958, but declined to 89·1 in June, 1960. Industrial prices rose from 125·6 in 1957 to 126·0 in 1959 and further to 128·3 in June, 1960.

PERSONAL INCOMES IN U.S.A.

Personal incomes in the United States rose from $350·6 billion in 1957 to $359 billion in 1958 and further to $380·2 billion in 1959. In the year 1959–60, labour income rose by $19·1 billion, business and professional income by $2·1 billion and personal interest income by $2 billion. Non-agricultural personal income rose by $23,3 billion. Other main groups of personal income rose slightly, but farm proprietors' income declined by $2·4 billion. Preliminary estimates for May, 1960 (seasonally adjusted annual rate) showed personal income at $399·4 billion, an increase of $23·2 billion over the 1959 level. Labour income rose from $267·8 billion in 1959 to $282·6 billion in May, 1960, an increase of $14·8 billion. Transfer payments rose from $26·8 billion in 1959 to $28·0 billion in May, 1960, business and professional incomes rose from $34·5 billion in 1959 to $35·8 billion in May, 1960, and personal interest income rose from $22·4 billion in 1958 to $25·2 billion in May, 1960. All other types of personal income also rose from 1959 to May, 1960, except farm proprietors' income, which fell from $11·8 billion to $11·6 billion.

PRODUCTION

AGRICULTURE AND LIVE STOCK

Agriculture.—The total land surface, excluding island possessions and Alaska, is 1,903,824,640 acres of which about 61 per cent. is in farms. The total number of farms in 1954 (1954 Census of Agriculture) was 4,782,416. The cash income from crops in 1953 was $14,193,000,000; in 1954, $13,669,000,000; in 1955, $13,676,000,000; in 1956, $14,252,000,000; in 1957, $12,461,000,000; in 1958, $14,259,000,000 and in 1959, $14,441,000,000. Cash income from livestock and livestock products in 1952, $18,252,000,000; 1953, $16,933,000,000; in 1954, $16,284,000,000; in 1955, $15,880,000,000; in 1956, $16,304,000,000; in 1957, $17,376,000,000 and in 1958, $18,846,000,000.

Another good crop season maintained output of crops in 1959 at the record level of 1958. The all crop production index was 118 per cent. of the 1947–49 base. The effects of lower yields for many crops were offset by higher production of corn and cotton on sharply expanded acreages. The composite yield per acre index was 135 compared to the record 143 in 1958. Acreage of crops planted for 1959 harvest was 338,000,000 acres, slightly above 1957 and 1958 but otherwise the lowest since 1917.

Live Stock on Farms, Jan. 1.

	1958	1959	1960*
All cattle...	93,350,000	96,650,000	101,520,000
Cows.....	22,233,000	21,488,000	21,331,000
Hogs.....	50,980,000	56,924,000	58,464,000
Sheep.....	31,337,000	32,945,000	33,621,000
Stock Sheep	27,327,000	28,497,000	29,481,000

Leather and products.....	350,000	1,148,000,000	1,913,000,000
Stone, clay and glass products.....	559,000	2,616,000,000	5,522,000,000
Primary metal products	1,073,000	6,178,000,000	11,265,000,000
Fabricated metal products.....	1,044,000	5,274,000,000	9,153,000,000
Machinery (except electrical).....	1,553,000	8,412,000,000	14,103,000,000
Electrical machinery.....	1,016,000	5,046,000,000	9,362,000,000
Transportation equipment.....	1,626,000	9,664,000,000	16,397,000,000
Instruments, etc.....	299,000	1,539,000,000	2,932,000,000
Miscellaneous.....	603,000	2,706,000,000	4,767,000,000
Administration and Auxiliary.....	492,000	3,627,000,000	—
Total.....	16,015,000	$77,809,000,000	$142,093,000,000

billion. The comparable value for 1958 was $16·5 billion and for 1957 was $18·1 billion.

Nearly 70 per cent. of the mineral production of the United States (in value) consists of fuels. In 1959 U.S. production of crude petroleum amounted to 2,575 million barrels, 126,000 barrels more than in 1958.

Bituminous coal and lignite produced in 1959 totalled 410 million tons, the same as for 1958. The average value of soft coal at the mine was estimated at $4·86 a ton, unchanged from 1958.

MANUFACTURES

The leading five States according to value added by manufacture (unadjusted) at the 1958 Annual Survey were: New York ($16,092,000,000) California ($12,102,000,000), Pennsylvania ($11,510,000,000), Ohio ($11,162,000,000), and Illinois ($10,759,000,000).

The average number of employees in 1958 for the United States as a whole was 16,126,000, salaries and wages totalling $65,977,000,000. The value added by manufacture (value of output less cost of materials and supplies) was $116,913,000,000.

LABOUR IN THE UNITED STATES

Organized Labour.—On December 5, 1955, the American Federation of Labour (AFL), founded in 1881, and the Congress of Industrial Organizations (CIO), formerly established in 1938, merged into an organization called the American Federation of Labour and Congress of Industrial Organizations. The combined membership is now 15,000,000 (including 1,050,000 members in Canada). There are also 3,090,000 members of unions not affiliated to the AFL–CIO.

Approximately one-third of the non-agricultural labour force of the United States is estimated to be organized.

Work Stoppages.—There were 3,708 stoppages recorded in 1959, involving 1,880,000 workers. There were 69,000,000 man-days of idleness, representing 0·61 per cent. of estimated working time of all workers.

Employment and Unemployment.—The civilian labour force (working population) was 70,667,000 in May, 1960. This includes self-employed, wage and salary-earners, employed and unemployed. Unemployment was estimated at 3,459,000 (4·9 per cent.). In addition there were 2,086,000 temporarily stopped, and 12,396,000 working fewer than 35 hours a week.

Wages.—In March, 1960, gross average weekly earnings by industry ranged from $146,69 per week in electrical work to $40·1 in the manufacture of workshirts (33·7 hours and $1·19 average hourly earnings). The average for all manufacturing was $90·91, almost a four-fold increase since 1939 but in terms of 1947–49 purchasing power, the increase was 1¾ times.

March 1960	Average Weekly Earnings	Hours Per Week	Average Hourly Earnings
Manufacturing	$90·91	39·7	$2·29
Durable	98·74	40·3	2·45
Non-durable	79·93	38·8	2·06
Coal Mining:			
Anthracite	99·91	36·2	2·76
Bituminous	127·26	38·8	3·28
Building construction	115·60	34·2	3·38
Electrical work	146·69	38·1	3·85
Gas and Electricity	108·26	40·7	2·66
Wholesale trade	91·37	39·9	2·29
Retail trade except eating and drinking places)	66·95	37·4	1·79
Laundries	46·68	38·9	1·20

A minimum wage of $1 an hour is set by federal law for employees engaged in interstate commerce or in the production of goods for interstate commerce, or in activities directly essential to such production. The act requires time and a half for all hours over 40 a week. While national averages by industry are generally above the minimum, rates for individuals in some occupations are close to the minimum.

In addition to cash wages, most workers receive some type of "fringe" benefits—the most common forms being paid vacations, and public holidays, various types of insurance and health funds financed by the employer or by employer and employees jointly.

RECLAMATION

Bureau of Reclamation, Department of the Interior, Interior Building, 18th and 19th Streets (between C and E streets), N.W., Washington, D.C. *Commissioner*, Floyd E. Dominy.

The Bureau of Reclamation constructs and operates irrigation, power and other multiple-purpose projects in the area west of the 97th meridian and is the Federal agency with principal responsibility for water conservation in this region. Eight million acres of lands in the arid and semi-arid west can be irrigated by works constructed by the Bureau. In June, 1959, the Bureau had in operation, under construction or authorized, 129 irrigation and multiple-purpose projects. Among them is the *Missouri River Basin* project, authorized by the Flood Control Acts of 1944 and 1946. In 1956 construction started on the *Colorado River Storage Project* which will permit economic expansion in five Western States—Colorado, Utah, Wyoming, Arizona, and New Mexico—in an area of rich resources now virtually untapped. The total harvest from all reclamation projects in 1958 was valued at $987,441,504, increasing the cumulative value of all reclamation harvests since 1902 to $14,265,102,495.

Grand Coulee Dam, on the Columbia River in the State of Washington, the largest concrete structure in the world by volume (10,585,000 cubic yards), and with the greatest hydro-electric power-plant capacity in the U.S., began operating in March, 1941; its installed capacity is 1,974,000 kW.

Hoover Dam (Arizona and Nevada), on the Colorado River, is the highest dam in the United States (726 ft.), and has an operating power plant with a capacity of 1,344,800 kW.

Shasta Dam (602 ft. high), on the Sacramento River in California, is the second highest in the United States. It was completed in 1944, and the power plant has a rated capacity of 379,000 kW.

Hungry Horse Dam, completed in 1952, on the Flathead River in Montana, is 564 ft. high, the third highest in the United States. It has a power capacity of 285,000 kW.

Glen Canyon Dam, just south of the Utah-Arizona line on the Colorado River, was started in October, 1956. It is a concrete arch structure, 710 feet high, and when completed in 1965 its power plant will have a capacity of 900,000 kW.

POST, TELEGRAPHS AND TELEPHONES

On June 30, 1959, there were 35,750 post offices and postal branches and several thousand stations in the U.S., handling 61,247,219,801 "pieces" of mail matter. The postal revenue was $3,050,259,335, and the expenditure $3,640,368,053 for the fiscal year of 1959. The telegraphs and telephones are operated by private companies.

On June 30, 1959, the postal savings deposits amounted to $1,041,971,528, compared with $1,212,671,942 on June 30, 1958.

EXTERNAL TRADE OF THE UNITED STATES

MERCHANDISE.

From the figures of the Bureau of the Census, U.S. Department of Commerce.

Year	General Imports	Total Exports and Re-exports	Excess of Exports
1951	$ 10,967,000,000	$ 15,032,000,000	+ $4,065,000,000
1952	10,717,000,000	15,201,000,000	+ 4,484,000,000

Railways

Data pertaining to Class I and II Carriers and their non-operating subsidiaries:—

	1958
Capital Stock outstanding	$7,508,783,635
Funded Debt outstanding	9,093,753,378
Total Railway capital actually outstanding	16,602,537,013
Dividends declared	444,982,037
Interest accrued	398,848,096
Total dividends and interest	843,830,133
Railway operating revenues	9,686,288,852
Railway operating expenses	7,631,341,410
Number of passengers carried earning revenue	*Number* 381,623,376
Number of passenger-train cars in service	28,992
Number of freight-train cars in service	1,761,024
Number of railway employees	853,196
Miles operated	231,494

Roads

In 1958 there were 3,478,787 miles of roads and streets in the United States, of which 3,074,193 miles were in rural areas and 404,594 miles were in urban areas. Surfaced roads and streets account for 2,447,559 miles of the total; 1,031,228 miles are unimproved and graded and drained. State primary roads, including extensions in urban areas, total 434,357 miles (429,741 surfaced). Other roads under State control total 255,798 miles (216,143 surfaced); 2,687,806 miles are under local control (1,778,012 surfaced); and 100,826 miles (23,633 surfaced) are under Federal control (in National forests and parks).

An estimated total of $10,321,000,000 was spent in 1959 for roads and streets in the United States. Of this total $6,743,000,000 was spent for State highways, $1,769,000,000 was spent for county and local rural roads, $1,580,000,000 was spent for city streets, and $229,000,000 was spent on roads in Federal areas. Capital outlay accounted for 65·9 per cent. of the total expenditures; 23·1 per cent. was spent for maintenance; 5·2 per cent for administration; 2·1 per cent. for highway police and safety; and 3·7 per cent. for interest on highway bonds.

Motor Vehicles and Taxation.*—The number of motor vehicles registered in 1959 in the United States was 71,502,394, an increase of 4·3 per cent. over the 1958 total of 68,554,103. In 1941 the registrations in the U.S.A. were 34,894,134. The State Governments received $1,468,554,000 in 1941 and $5,090,916,000 in 1959, respectively, from motor-fuel, motor-vehicle and motor-carrier taxes. In 1959 the Federal Government received $3,873,029,000 from excise taxes on motor vehicles and parts, tyres and tubes, gasoline, diesel and special fuels and lubricating oil.

Accidents.—In 1958 there were 37,800 deaths caused by motor vehicle accidents. The death rate per 100,000,000 miles of travel was 5·4 in 1959. compared with 5·6 in 1958.

* Including data for the new States of Alaska and Hawaii, 1958 and 1959.

Shipping

The active ocean-going Merchant Marine of the U.S. on June 1, 1960, consisted of 959 vessels of 1,000 gross tons and over, of which 920 were privately owned and 39 were government-owned ships under charter or general agency agreement with private companies. There were 1,991 government-owned vessels in the reserve fleets. Of the active vessels, 630 were dry cargo ships, 37 were combination passenger and cargo and 292 were tankers.

Air Transport

United States domestic and international scheduled airlines in 1959 were estimated to have carried 56,002,000 passengers over 36,370,952,000 passenger miles. The combined express and freight flown by the scheduled airliners during 1959 totalled 646,143,000 ton-miles. In addition, the airlines flew 200,284,000 tons-miles of mail.

Nine principal classes of commercial air carriers can be distinguished in the United States, (*a*) The Domestic Trunk Lines (12); (*b*) Local Service Lines, operating the low-density traffic routes between the smaller traffic centres and between small and large centres (13); (*c*) The International and Overseas Group, including all U.S. flag air carriers authorized to operate between the U.S.A. and foreign countries, between foreign countries and into Mexico and the Caribbean (19); (*d*) Intra-Hawaiian Air Carriers, operating in Hawaii (2); (*e*) Alaskan Carriers, providing service between the continental United States and Alaska and within Alaska (15); other classes are (*f*) Certified All Cargo Lines (6); (*g*) Helicopter Airmail Operators (3); (*h*) Supplemental transport carriers (23); and (i) air freight forwarders (72), air taxi operators and Alaskan pilot owners and air carriers.

721 stations of the United States are served by domestic trunk and local service airlines. In 1959, 162,029 persons were employed by the domestic and international airlines.

The Federal Aviation Act, 1958, set up the Federal Aviation Agency to provide for the safe and efficient use of the airspace by both civil and military operations, and to provide for the regulation and promotion of civil aviation in such manner as to foster its development and safety. The new Agency incorporates the Civil Aeronautics Administration, the Airways Modernization Board and the safety-rules authority of the Civil Aeronautics Board. The Administrator has authority to regulate and operate air navigation facilities; to prescribe air traffic rules; and to conduct related research and development.

EDUCATION

State School Systems

Almost every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 16 years of age, and those from 14 to 16 must attend school or be lawfully employed. In the States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

In 1957–58 the total number of children in the United States of 5 to 17 years of age was 40,164,000, of whom 33,528,591 were enrolled in public elementary and secondary schools. The average daily attendance in the public schools was 29,722,275, the average length of school term was estimated at 177.6 days, and the average number of days attended by each pupil enrolled at 157. In 1957–58, 1,260,000 teachers were employed. The average annual salary of all teachers was $4,702.

The total revenue receipts for school purposes, excluding balances on hand, was about $12,181,513,000. Of this amount, about $486,484,000 was received from Federal sources, $1,824,620,000 from Statesources and $6,833,557,000 from county and local sources. Current expenditure was $10,374,494,000. $2,852,747,000 was expended for sites, buildings, furniture and equipment and $341,922,000 for interest.

Institutions of Higher Education

In the autumn of 1959 enrolment in institutions of higher education numbered 3,402,299.

Institutions of higher education include universities, colleges, professional schools, teachers' colleges and normal schools, and junior colleges. The 1959 survey of enrolments covered 1,952 institutions classified as follows: 1,440 universities, colleges and professional schools enrolling 2,990,802 students; and 512 junior colleges enrolling 411,595 students. There are 106 institutions of higher education attended predominantly by Negroes, enrolling 90,097 students included in the foregoing figures.

During the school year 1958–59, 385,151 bachelor's degrees were conferred, 254,868 to men and 130,283 to women; 69,497 masters' degrees, 47,321 to men and 22,176 to women; and 9,360 doctor's degrees, 8,371 to men and 989 to women. Education, Business and Commerce, and Engineering, were, in that order, the fields in which most students received baccalaureate degrees. There were 87,877 bachelor's degrees in Education, 53,108 in Business and Commerce, and 38,134 in Engineering. The three leading fields of study for the master's degree were Education (31,569), Engineering (6,753) and Business and Commerce (4,436). The most popular fields of study on the doctorate level were Education (1,614), Chemistry (1,009) and Engineering (714).

Particulars of some of the Universities are: Harvard (11,213 students, including 325 women in 1959), founded at Cambridge, Mass., on Oct. 28, 1636, and named after John Harvard of Emmanuel College, Cambridge, England, who bequeathed to it his library and a sum of money in 1638; Yale (7,868 students, including 603 women, in 1959), founded at New Haven, Connecticut, in 1701; Bowdoin, Brunswick, Me. (founded 1794) (810 men); Brown, Providence, R.I. (founded 1764; 3,791 students, including 1,030 women, in 1959); Columbia, New York, N.Y. (founded 1754; 25,523 students, including 9,903 women, in 1959); Cornell (founded at Ithaca, N.Y., 1865; 11,171 students, including 2,709 women, in 1959); Dartmouth, Hanover, N.H. (founded 1769, 3,137 students including 1 woman in 1959); Georgetown, Washington, D.C. (founded 1789); 6,017 students, including 820 women, in 1959); North Carolina, Chapel Hill, N.C. (founded in 1789; 8,169 students, including 1,758 women, in 1959); Pennsylvania, Philadelphia, Pa. (founded 1740; 17,839 students, including 4,782 women, in 1959); Pittsburgh, Pittsburgh, Pa. (founded 1787; 14,410 students, including 3,888 women in 1959); Princeton, Princeton N.J. (founded 1746; 3,842 men); Tennessee, Knoxville, Tenn. (founded 1794; 15,944 students, including 5,280 women, in 1959); William and Mary, Williamsburg, Va. (founded 1693; 9,025 students, including 3,678 women, in 1959); New York University, founded in 1831 at New York, had 32,631 students, including 7,842 women, in 1959.

Private Schools and Colleges

In 1957–58 it was estimated that there were about 4,466,000 pupils in private kindergarten and elementary schools, 942,000 pupils in private high schools and academies, an estimated 35,000 pupils in elementary and secondary departments of private universities and colleges, and 1,407,000 students in privately controlled institutions of higher education. In addition there were some 10,000 pupils enrolled in privately controlled elementary and secondary schools for exceptional children.

RELIGIONS IN U.S.

	Year	Members
Adventist	1958	302,000
Baptist	1957	23,525,000
Congregationalist	1958	1,381,000
Disciples of Christ	1958	1,944,000
Lutheran	1957	8,417,000
Methodist	1957	16,676,000
Presbyterian	1957	6,656,000
Protestant Episcopal	1958	3,042,000
Jewish	1959	5,255,000
Roman Catholic	1958	39,510,000
Latter Day Saints	1958	1,541,000
Eastern Orthodox	1958	2,454,000

WEIGHTS, MEASURES AND CURRENCY

The *Weights and Measures* in the United States in common use are of British origin and in the case of weights and linear units correspond in large part with those now employed in Great Britain. The *short ton* of 2,000 pounds (20 hundred weight of 100 pounds each) is generally used instead of the *long ton* of 2,240 pounds. The old "Winchester" bushel and the wine gallon and their subdivisions are used instead of the British Imperial units of capacity; 1 U.S. bushel=0.9689 British bushel, and 1 U.S. gallon=0.83268 British gallon. The U.S. *liquid quart* is divided into 32 fluid ounces. The Metric System of Weights and Measures is permissive, but is not extensively used except in scientific and pharmaceutical work. The unit of currency is the *dollar* of 100 *cents*. The rate of exchange with sterling will be found on p. 84.

INDIAN POPULATION

On January 1, 1959, the estimated Indian population of the United States exclusive of Alaska, was 524,301. There are many persons of Indian blood who are not enrolled with any recognized tribe, have no rights in tribal property, and receive no services from the Government. The States with the largest estimated number of Indians still residing in reservation areas and receiving some services from the Government are: Arizona, 73,000; Oklahoma, 57,800; New Mexico, 52,200; South Dakota, 23,500; Montana, 18,750.

33. Dwight D. Eisenhower*	Rep.	1890, Oct. 14	1953	.. ..	..

* Re-elected Nov. 6, 1956. † Died in office. § Assassinated. (*a*) Elected as Vice-President.
‡ Re-elected Nov. 5, 1940, the first case of a third term; re-elected for a fourth term Nov. 7, 1944.

TERRITORIES AND PRINCIPAL ISLAND POSSESSIONS OF THE UNITED STATES

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: Palmyra Island; Kingman Reef (about 1 sq. mile); Johnston (or Cornwallis) Island and Sand Island (about 1 sq. mile in all); Canton and Enderbury Islands (jointly administered with Great Britain); Midway Islands; Wake Island; Guam; Howland, Baker and Jarvis Islands (about 3 sq. miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other Islands of the Samoan group east of longitude 171° west of Greenwich together with Swains Island); the Commonwealth of Puerto Rico; the Virgin Islands of the United States, and Navassa Island (2 sq. miles).

The Canal Zone is under the jurisdiction of the United States.

The Trust Territory of the Pacific Islands is under the jurisdiction of the United States pursuant to a trusteeship agreement between the U.S. Government and the Security Council of the United Nations. It consists of the Mariana (except Guam), Caroline and Marshall Islands, with a land area of 687 square miles and a population of 73,052 in 1959. Nine individual languages are spoken in the Territory. Copra is the principal export of importance.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570–5578 of the Revised Statutes, are considered as appertaining to the United States. Responsibility for territorial affairs generally is centred in the Office of Territories, Dept. of the Interior, Washington, D.C.

CANTON AND ENDERBURY

Under the Anglo-American Pact of Aug. 10, 1938, Canton and Enderbury (of the Phoenix Island Group in the Central Pacific) were declared to be for the common use of Gt. Britain and U.S.A. for aviation and communications. The islands, which are about midway between Hawaii and Australia, extend to a total of 27 sq. miles with a population of 272 (Census, 1950).

On April 6, 1939, the U.S. and Great Britain agreed to set up a joint regime for Canton and Enderbury Islands. Provision for the joint control of these islands was made by exchange of notes between the two Governments on April 6, 1939.

GUAM

Guam, the largest of the Ladrone or Mariana Islands in the North Pacific Ocean, lies in 13° 25′ N. lat. and 144° 39′ E. long., at a distance of about 1,506 miles east of Manila. The area of the island is estimated at 206 square miles, with a population of 66,910 in April, 1960 (Census preliminary figure). The Guamanians are of Chamorro stock mingled with Filipino and Spanish blood. The Chamorro language belongs to the Malayo-Polynesian family, but has had considerable admixture of Spanish. English is the language used throughout the island, although Chamorro is also used in Guamanian homes.

Guam was occupied by Japanese in Dec., 1941, but was recaptured and occupied throughout by U.S. forces before the end of August, 1944. Under the Organic Act of Guam of August 1, 1950 (Public Law 630 of the 81st Congress), Guam has

statutory powers of self-government, and Guamanians are United States citizens. A governor is appointed for a four-year term. A 21-member unicameral legislature is elected biennially. There is also a District Court of Guam, with original jurisdiction in cases under federal law.

Governor, Joseph Flores.
Secretary, Marcellus Boss.
CAPITAL, Agaña. Port of entry, Ψ Apra.

WAKE AND MIDWAY ISLANDS

Wake Island, annexed in 1898, has an area of about 3 sq. miles and lies in the N. Pacific about 2,300 miles from Hawaii on the direct route to Hong Kong. Wake Island was occupied by Japanese Dec. 27, 1941: it was re-occupied by U.S. on Sept. 15, 1945. Population (1950), 349.

Midway Islands, with a total area of 28 sq. miles and a population (1950) of 416, lie in the N. Pacific about 1,300 miles from Hawaii. There is no indigenous population. The group is under the jurisdiction of the U.S. Navy.

PUERTO RICO

Puerto Rico (Rich Port) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50′–18° 30′ N. lat. and 65° 30′–67° 15′ W. long., with a total area of 3,435 square miles and a population of 2,353,297 (1960 Census, preliminary). The majority of the inhabitants are of Spanish descent and Spanish and English are the official languages. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,399 miles distant from New York, and 963 miles from Key West. Puerto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508. It continued a Spanish possession until Oct. 18, 1898, when the United States took formal possession as a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified on April 11, 1899. Sugar is grown along the coastal plain and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, and yams are also grown. The trade is principally with the U.S. 4,536 miles of paved roads were in use in 1958. There are good harbours at San Juan and Ponce. The Constitution approved by the Congress and the President of the United States, which came into force on July 25, 1952, establishes the Commonwealth of Puerto Rico with full powers of local self-government. Legislation functions are vested in the Legislative Assembly, which consists of 2 elected houses; the Senate of 27 members (2 from each of 8 senatorial districts and 11 at large) and the House of Representatives of 51 members (1 from each of 40 representative districts and 11 at large). Membership of each house may be increased slightly to accommodate minority representatives. The term of the Legislative Assembly is 4 years. The Governor is popularly elected for a term of 4 years. A Supreme Court of 7 members is appointed by the Governor, with the advice and consent of the Senate. There are 8 similarly appointed Secretaries at the head of permanent departments, but the selection of the Secretary of State must be approved also by the House of Representatives. The Governor appoints all judges. Puerto Rico is represented in Congress by a Resident Commissioner, elected for a term of 4 years, who has a seat in the House of Representatives, but not a vote. Great improvement has been made in the progress, industrialization and welfare of the Island during the present century. A programme of tax exemption has raised income from industry to a level higher than that from agriculture. Public schools are established throughout—enrolment in 1958 reached 717,871. The capital, Ψ San Juan, had 448,500 inhabitants in 1959, other major towns being Ψ Ponce 177,000, Ψ Mayaguez 86,000, Caguas 61,400, Ψ Arecibo 78,700 and Bayamón 62,600.

FINANCE	1959
Receipts	$224,150,000
Expenditure	249,000,000

TRADE	1959
Total Imports	$808,722,885
Total Exports	503,234,777

Governor, Luis Muñoz Marín, *elected* 1948; *re-elected* 1952 and 1956.
Resident Commissioner, Antonio Fernós Isern.

AMERICAN SAMOA

American Samoa consists of the island of Tutuila, Aunu'u, Ofu, Olosega, Ta'u, Rose and Swains Islands, with a total area of 76·5 square miles and a population of 20,154 in 1956, distributed as follows:—Tutuila and Aunu'u 17,307; Rose Island, uninhabited; Manu'a Group (Ofu and Ta'u Islands) 2,767; and Swain's Island (annexed May 13, 1925) 80. Total population (1960 Census, preliminary), 20,040.

Tutuila, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at ΨPago Pago (pop. 1950, 3,531), the capital and seat of government. The remaining islands have an area of about 30 square miles. Tuna and copra are the chief exports.

Under an Executive Order of the President, which became effective on July 1, 1951, civilian administration under the Department of the Interior replaced the Naval administration which had existed since 1900. At present the Government consists of an executive, an advisory bicameral legislature and a judiciary. Most of the Samoans are U.S. nationals, but some have acquired citizenship through service in the United States armed forces.

Governor, Peter T. Coleman.
Secretary, Alan M. MacQuarrie.

TRUST TERRITORY OF THE PACIFIC ISLANDS

The Trust Territory of the Pacific Islands consists of the Mariana (excluding Guam), Caroline and Marshall Islands which extend from latitude 1° to 20° north and from longitude 130° to 172° east. They cover an ocean area of 3,000,000 square miles but have a total land area of only 687 square miles. There are 96 separate islands and island groups in the Trust Territory. The population in 1959 was 73,052. The inhabitants of the Trust Territory are broadly classed as Micronesians. The native cultures vary markedly among island groups and even more among islands and atolls in the same geographic area. Nine mutually unintelligible languages are spoken in the territory.

The Trust Territory is administered by the United States pursuant to a Trusteeship Agreement with the Security Council of the United Nations of July 18, 1947. From the cessation of hostilities to that date, the area was administered under United States Military Government. On July 18, 1947, the islands were placed under the jurisdiction of the Secretary of the Navy. On July 1, 1951, civilian government was established with the transfer of responsibility for the Trust Territory to the Secretary of the Interior. By July 17, 1953, responsibility for the administration of all the islands in the Northern Marianas, except Rota, had been retransferred to the Secretary of the Navy.

Ψ Seaport.

For administrative purposes, the territory is divided into seven districts: Saipan, Rota, Palau, Yap, Truk, Ponape and the Marshalls. Local governments exist within each district.

High Commissioner, Delmas H. Nucker.
Deputy High Commissioner, Joseph C. Putnam.
Temporary seat of government: Agaña, Guam.

VIRGIN ISLANDS

Purchased by the United States from Denmark for the sum of $25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 133 sq. miles, with a population of 31,904 (1960 Census, preliminary). *St. Thomas* (28 sq. miles) has a population of 16,388; *St. Croix* (84 sq. miles) has a population of 14,023; *St. John* (20 sq. miles) has a population of 839. St. Croix exports sugar and rum; ΨSt. Thomas is famous for its harbour.

CAPITAL, ΨCharlotte Amalie contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months.

Governor, John D. Merwin.
Government Secretary, Roy W. Bornn.

THE PANAMA CANAL

The Panama Canal and its adjuncts, including the related commercial enterprises in the Canal Zone, are operated by the Panama Canal Company, which was formed on July 1, 1951, under the provisions of the Panama Canal Company Act. The Canal Zone is governed by the Canal Zone Government, which was established simultaneously with the new Canal Company. Both organizations are headed by Major-General W. A. Carter, U.S.A., who holds the joint title of Governor of the Canal Zone and President of the Panama Canal Company.

In 1523, Charles V of Spain ordered an investigation as to the possibility of a canal through the Isthmus of Panama. From then until 1904, the principal maritime nations of the world gave earnest consideration to the project. In 1876 a concession for the construction of a canal was granted to a French promotion corporation which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company, of which de Lesseps was nominal head. The amount of work to be accomplished proved to be greater than was estimated, and resulted in the failure of the company, a receiver being appointed in 1889. A new company was formed to carry on the work, and excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government acquired the effects of the French company in Panama.

Congress authorized the President in 1902 to purchase the rights and property of the French company for $40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of $10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognized by the United States, and a treaty was ratified on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the isthmus, were ceded to the United States. The U.S. guaranteed the Republic of Panama's independence and agreed to pay it $10,000,000 and an annuity which was to begin nine years after the ratification of the treaty. The canal is built through the centre of this territory. Under the terms of a treaty between Panama and the United States, signed at Panama in January, 1955, the United States increased its annual annuity to Panama from $430,000 to $1,930,000 and agreed to hand over to the Republic land and railroad yards valued at $25,000,000, to construct a high-level bridge over the Pacific entrance to the Canal at a cost of about $25,000,000 and to extend various commercial and other privileges to the Republic. The Canal Zone has an area of 533 sq. miles and a population of 42,684 (Census 1960, preliminary).

The canal is fifty statute miles long (44·08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks in twin flights; 3 steps at Gatun on the Atlantic side, 1 step at Pedro Miguel and 2 at Miraflores on the Pacific side. Each lock chamber is 1,000 feet long and 110 feet wide. Transit from sea to sea usually takes 8 hours. The least width is in Gaillard Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The Panama Canal Company is engaged in a $26,000,000 Canal Improvement programme. Gatun Lake is 85 feet above sea-level. The Canal's channel through all parts of the Lake including Gaillard (Culebra) Cut is 42 feet.

Including only ocean-going commercial vessels, 300 Panama Canal net tons measurement or over, against which tolls were collected, the volume of commercial traffic passing through the Canal during each of the last 23 fiscal years is shown below:—

Fiscal Year	No. of Transits	Canal Net Tons *	Cargo Tons
1937	5,387	25,430,000	28,108,373
1938	5,524	25,950,000	27,385,921
1939	5,903	27,170,007	27,866,627

BRITISH REPRESENTATIVES IN U.S.

BRITISH EMBASSY

3100 Massachusetts Ave., N.W. Washington 8, D.C.

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Harold Caccia, G.C.M.G., K.C.V.O. £7,000

Minister, The Viscount Hood, K.C.M.G.

Minister (Economic), The Earl of Cromer, M.B.E.

Minister (Commercial), O. Rennie, C.M.G.

Minister (Rhodesia and Nyasaland Affairs), H. W. Jeffreys.

Minister (Information), L. C. Glass, C.M.G.

Defence and NATO Adviser, Air Chief Marshal Sir George Mills, G.C.B., D.F.C., A.D.C.

Naval Attaché, Vice Adm. W. G. Crawford, C.B., D.S.O.

Military Attaché, Maj-Gen. J. M. McNeill, C.B.E.

Air Attaché, Air Vice Marshal W. C. Sheen, C.B., D.S.O., O.B.E.

Attaché for Defence Research, L. T. D. Williams.

Counsellors, D. A. Greenhill, C.M.G., O.B.E.; T. Brimelow, C.M.G., O.B.E.; R. T. D. Ledward; J. A. Briance; P. L. Carter; C. P. Scott, O.B.E.; M. Gale, M.B.E. (*Commercial*); J. A. McCall-Judson; P. S. Rankine; H. F. B. Fane, O.B.E. (*Labour*); W. E. Taylor, C.B.E. (*Commercial*); R. B. N. Wetmore, M.B.E. (*Rhodesia and Nyasaland Affairs*); K. H. Huggins, C.M.G. (*Commercial*); N.M.P. Reilly, C.M.G.

1st Secretaries, P. J. E. Male, M.C. (*Commercial*); H. C. M. Stone; C. D. Wiggin, D. F. C., A.F.C.; D. J. Spears; Miss G. G. Brown; The Hon. R. J. M. Wilson; Miss P. M. Hutchinson (*Commercial*); M. S. Weir; S. E. D. Barff, O.B.E.; F. A. de Moleyns (*Commercial*); J. B. Denson; R. W. H. Du Boulay; J. A. Thompson; J. L. B. Garcia (*Labour*); R. W. Morris; H. S. H. Stanley; M. C. Kennedy; R. A. G. Clark.

2nd Secretaries, Lord Nicholas Gordon Lennox, M.V.O.; G. F. Anderson, M.B.E., D.F.C.; D. J. Graybrook; B. Oattes (*Commercial*); Miss A. M. Wood; D. M. Harrison; G. T. Burgess (*Commercial*); D. G. Madgett (*Rhodesia and Nyasaland Affairs*).

Attachés, R. L. Mathews, M.B.E.; G. M. Wilson (*Financial*); Col. E. J. Younson, O.B.E.; E. I. R. MacGregor (*Civil Air*); W. C. C. Rose, C.B.E. (*Petroleum*); Col. H. B. Somerville, C.B.E., T.D. (*Telecommunications*); G. R. W. Brigstocke (*Shipping*); J. E. Poulden, C.B.E.; J. D. Hennings (*Colonial*); Dr. H. T. Hookway, (*Scientific*); Dr. D. G. Avery (*Atomic Energy*); Miss J. Trower.

UNITED STATES REPRESENTATIVES IN GREAT BRITAIN

EMBASSY
(1 Grosvenor Square, W.1)
(GROsvenor 9000)

Ambassador Extraordinary and Plenipotentiary in London, His Excellency John Hay Whitney (1957).

Minister and Deputy Chief of Mission, Hon. Walworth Barbour.

Minister for Economic Affairs, Hon. Wilson T. M. Beale, Jr.

Counsellors, Brewster H. Morris (*Political*); Donald W. Smith (*Consular*); William L. Clark (*Public Affairs*); Clinton L. Olson (*Administration*),.

1st Secretaries, Harold Shullaw; Ralph N. Clough; Thomas T. Carter (*Economic*); John W. Evans; William C. Trueheart; Fred L. Hadsel; Daniel F. Margolies; Francis J. Galbraith; John F. Correll (*Labour*); Albert E. Irving; Edward T. Lampson; George R. Jacobs; William O. Webb; Robert Klaber (*Administration*); Edward N. Cooper; John T. Sinclair (*Administration*); Edgar L. McGinnis, Jr.; James H. Sherrerd; Carleton B. Swift, Jr.; Joseph A. Greenwald (*Commercial*); Robert O. Waring (*Administration*); Grant V. McClanahan; Hugh W. Wolff; Sam L. Yates.

2nd Secretaries, Rockwood H. Foster; Paul J. Campbell (*Administration*); John B. Penfold; Catherine A. Rock; Mary E. Lyddane; Jack L. Vrooman (*Administration*); F. Willard Caldwell; Lillie Levine; Thomas J. Hunt; Gertrude M. Meyers; Robert J. Ballantyne; Malcolm Lawrence; Paul J. Hoylen; Marjorie L. Scott; Raymond J. Swanson; Calvin E. Mehlert; Frazier Meade; Arthur E. Breisky (*Administration*); James O. Belden; Bernice M. Kelly.

Naval Attaché and Naval Attaché for Air, Rear-Admiral Robert W. Cavenagh, U.S.N.

Senior Assistant Naval Attaché for Air and Assistant Naval Attaché for Air, Captain William A. Sullivan, U.S.N.

Air Attaché, Brig.-Gen. Grover C. Brown, U.S.A.F.

Deputy Air Attaché, Col. John F. Splain, U.S.A.F.

Army Attaché, Brig.-Gen. James O. Boswell, G.S., U.S.A.

Deputy Army Attaché, Lt.-Col. Benjamin B. Maxwell, G.S., U.S.A.

Attachés, Frank G. Wisner; Robert N. Anderson (*Agriculture*); Robert W. Bean (*Financial*); Emil A. Kekich (*Commercial*); Dr. S. Everett Gleason (*Cultural*); Dr. Thomas H. Osgood (*Scientific*); Harry O. Swanson; Donald K. Taylor (*Information*); William E. Weld (*Public Affairs*); Ernest J. Warlow (*Administration*); Gordon O. Harrison (*Public Affairs*); Elmer O. Hallowell (*Agriculture*).

The United Nations

CHARTER OF THE UNITED NATIONS

The foundations of the Charter of the United Nations were laid at the Conference of Foreign Ministers in Moscow in 1943, and upon those foundations a structure was built at the meetings at Dumbarton Oaks, Washington, D.C., Aug. 21–Oct. 7, 1944. The design was discussed and criticized at San Francisco from April 25 to June 26, 1945, on which date representatives of 50 Allied Nations appended their signatures to the Charter.

The United Nations formally came into existence on October 24, 1945. It was later decided that its seat should be in the United States. Permanent headquarters have been erected at Manhattan, New York.

The following States are members of the United Nations:—

Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Burma, Byelorussian Soviet Socialist Republic, Cambodia, Canada, Ceylon, Chile, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Ecuador, Ethiopia, Finland, France, Ghana, Greece, Guatemala, Guinea, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iraq, Republic of Ireland, Israel, Italy, Japan, Jordan, Laos, Lebanon, Liberia, Libya, Luxemburg, Malaya, Mexico, Morocco, Nepal, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Persia, Peru, Philippines, Poland, Portugal, Roumania, Salvador, Saudi Arabia, Spain, Sudan, Sweden, Thailand, Tunisia, Turkey, Ukrainian Soviet Socialist Republic, Union of South Africa, Union of Soviet Socialist Republics, United Arab Republic, United Kingdom, United States of America, Uruguay, Venezuela, Yemen, Yugoslavia.

By August 24, 1960, 25 further States had been recommended for membership—12 in West and Central Africa; Somalia and Madagascar in East Africa; and the Republic of Cyprus—and all were admitted in September, 1960. The Federation of Mali, also recommended, has since been dissolved.

The principal organs of the United Nations are:—(1) The General Assembly; (2) The Security Council; (3) The Economic and Social Council; (4) The Trusteeship Council; (5) The International Court of Justice; (6) The Secretariat.

1. The General Assembly

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five representatives, but has only one vote. The General Assembly meets once a year in regular session normally beginning on the third Tuesday in September. Special Sessions may also be held.

The work of the General Assembly is divided between seven Main Committees, on each of which every Member has the right to be represented:—(1) Political and Security (including the regulation of armaments); (2) Economic and Financial; (3) Social, Humanitarian and Cultural; (4) Trusteeship (including Non-Self Governing Territories); (5) Administrative and Budgetary; (6) Legal. There is also a Special Political Committee, to relieve the burden on the first Committee.

The Main Committees consider items referred to them by the General Assembly and recommend draft resolutions for submission to the Assembly's plenary meetings.

The Assembly has two procedural committees—a General Committee and a Credentials Committee; and two standing committees—an Advisory Committee on Administrative and Budgetary Questions and a Committee on Contributions.

The General Assembly appoints such *ad hoc* committees as may be required from time to time for special purposes. The Assembly is also assisted in its work by subsidiary bodies such as a Board of Auditors, an Investments Committee, a United Nations Staff Benefit Committee, and an International Law Commission.

2. The Security Council

The Security Council consists of eleven Members, each of which has one representative and one vote. There are five *permanent Members* (China, France, U.K., U.S.A., U.S.S.R.) and six non-permanent Members elected for a two-year term.

The Security Council bears the primary responsibility for the maintenance of peace and security. Decisions on procedural questions are made by an affirmative vote of seven Members. On all other matters the affirmative vote of seven Members must include the concurring votes of the *permanent Members*, and it is this clause which makes the *Veto* possible. The only exception to this rule is that in regard to measures for peaceful settlement a party to a dispute must refrain from voting.

Until 1952 two separate Commissions, the *Atomic Energy Commission* and the *Commission for Conventional Armaments*, reporting to the Security Council, dealt with different aspects of the armaments problem. On January 11, 1952, the General Assembly approved the establishment of a new *Disarmament Commission*, bringing atomic and conventional armaments under one body. A subcommittee of the Disarmament Commission, consisting of representatives of Canada, France, U.K., U.S.A. and U.S.S.R., held its fourth session in London in 1957. During the first half of 1958, the Disarmament Commission and its sub-committee were virtually inactive, owing to the refusal of the U.S.S.R. to take part in their work in their present form.

A *Committee on the Admission of New Members* was set up by the Security Council on May 17, 1946, for the purpose of examining applications for admission to membership in the United Nations which may be referred to it by the Security Council. It is composed of a representative of each of the members of the Security Council.

The Security Council also establishes *ad hoc* committees and commissions which may be required from time to time for special purposes.

3. The Economic and Social Council

This body is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters.

It has established the following Commissions: Statistical, Human Rights, Social, Status of Women, Narcotic Drugs, Population, International Commodity Trade, Regional Economic Commissions for Europe, Asia and the Far East, Latin America and Africa. The Council also supervises and co-ordinates the work of twelve specialized agencies established to cover the main fields of international co-operation.

United Nations Children's Fund (*UNICEF*), London Office, 14–15 Stratford Place, W.1.—Established by the United Nations in 1946, to meet the emergency needs of children, particularly in war-devastated countries. In 1950 emphasis was

shifted to long-range needs of children in underdeveloped areas. In 1953 the United Nations General Assembly approved unanimously the indefinite extension of the Fund's mandate. UNICEF is financed by voluntary contributions from Governments and from the public, which amounted to £8,500,000 in 1959 and assisted 387 projects in 105 countries and territories.

4. Trusteeship Council

The establishment of a Trusteeship Council in connection with territories placed under United Nations supervision through individual Trusteeship Agreements was made possible after the General Assembly on December 13, 1946, approved the following eight Trusteeship Agreements: *New Guinea* (with Australia); *Ruanda-Urundi* (Belgium); *French Cameroons and French Togoland* (France); *Western Samoa* (New Zealand); *British Cameroons, British Togoland*, and *Tanganyika* (the United Kingdom); a ninth agreement was afterwards approved concerning *Nauru* (administered by Australia on behalf of Australia, New Zealand and U.K.). The Trusteeship Agreement for British Togoland ceased to have effect in March, 1957, when that country was united with Ghana. The trusteeships in the French Cameroons and French Togoland came to an end in 1960 with the achievement of full independence by these States.

A Trusteeship Agreement for the former Japanese mandated islands, the *Marshalls, Marianas* and *Carolinas*, was submitted by the United States to the United Nations, and after approval by the Security Council, came into force on July 18, 1947.

A Trusteeship Agreement for the former Italian Colony of *Somaliland*, in force from Dec. 2, 1950, ended on July 1, 1960, with the establishment of the Somali Republic.

The Trusteeship Council is composed of countries administering Trust Territories, permanent members of the Security Council, and enough other countries (elected by the General Assembly for three-year terms) to make an equal division between countries which administer Trust Territories and countries which do not.

The Trusteeship Council considers reports from administering authorities; examines petitions in consultation with the administering authority; makes periodic inspection visits; and checks conditions with an annual questionnaire on the political, economic, social, and educational advancement of the inhabitants of trust territories.

5. International Court of Justice

The International Court of Justice is the principal judicial organ of the United Nations. The Statute of the court is an integral part of the Charter and all Members of the United Nations are *ipso facto* parties to it. The Court is composed of 15 judges, no two of whom may be nationals of the same State, and meets at The Hague.

If any party to a case fails to adhere to the judgment of the Court, the other party may have recourse to the Security Council.

THE SECRETARIAT

The Secretariat is composed of the Secretary-General, who is the chief administrative officer of the Organization, and an international staff appointed by him under regulations established by the General Assembly. The Secretary-General is appointed for a term of five years.

Secretary-General, Dag Hammarskjöld (*Sweden*).
Executive Assistant to Secretary-General, Andrew W. Cordier (*U.S.A.*).
Under Secretaries, Ralph J. Bunche (*U.S.A.*) (*Special Political Affairs*).
Do. (*Conference Services*), Victor Hoo (*China*).
Do. (*Economic and Social Affairs*), Philippe de Seynes (*France*).
Do. (*Trusteeship and Information from Non-Self-Governing Territories*), Dragoslav Protitch (*Yugoslavia*).
Do. (*Political and Security Council Affairs*), G. P. Arkadev (*U.S.S.R.*).
Do. (*Public Information*), H. Tavares de Sa (*Brazil*).
Director of Personnel, W. A. B. Hamilton (*U.K.*).
Commissioner for Technical Assistance, Roberto M. Heurtematte (*Panama*).
U.N. Special Fund, Director-General, Paul G. Hoffman (*U.S.A.*); *Deputy Director-General*, C. V. Narasimhan (*India*).
Executive Chairman, Technical Assistance Board, David Owen (*U.K.*).
U.N. European Office, Pier P. Spinelli (*Italy*).
U.N. Information Centre, 14–15, Stratford Place, W1.

BUDGET OF THE UNITED NATIONS

The financial year coincides with the calendar year. On February 13, 1946, the General Assembly established a Working Capital Fund of $25,000,000 (U.S.).

For the year 1960, the gross appropriation was $61,823,000 (£22,000,000). The scale of assessments for the 1960 budget for British Commonwealth countries was: Australia, 1·79 per cent.; Canada, 3·11 per cent.; Ghana, 0·07 per cent.; India, 2·46 per cent.; Malaya, 0·17 per cent.; New Zealand, 0·42 per cent.; Pakistan, 0·40 per cent.; Union of South Africa, 0·56 per cent.; United Kingdom, 7·78 per cent. The United States contribution was 32·51 per cent.; U.S.S.R. was 13·62 per cent.; France was 6·40 per cent.; and China was 5·01 per cent. The contribution of Guinea for each year 1959–1961 was fixed at 0·04 per cent.

INTERNATIONAL ATOMIC ENERGY AGENCY

Kärntnerring 11–13, Vienna I.

Set up on July 29, 1957, to accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world and to ensure that assistance provided by it is not used to further any military purpose. Agreements have been reached concerning the Agency's working relationship with the United Nations and its international agencies. In 1960, 70 states were in membership.

A General Conference of all members meets in regular annual session and in such special session as may be necessary. A Board of Governors (23 members) carries out the functions of the Agency.
Director-General, Sterling Cole (*U.S.A.*).

INTERNATIONAL AGENCIES

Twelve other international organizations, having wide responsibilities in economic, social, cultural, educational and other related fields, carry out their functions in co-operation with the United Nations under agreements made with a standing committee of the Economic and Social Council.

International Labour Organisation (ILO) Geneva (London Office, 38–39 Parliament Street, S.W.1).—Established in 1919 as an autonomous institution associated with the League of Nations and recognized in 1946 by the United Nations as a special agency, the ILO exists to contribute to the establishment of lasting peace by promoting social justice and by international action to improve labour conditions and living standards, and to promote economic and social stability.

A *General Conference*, composed of national delegations of two government delegates, one delegate representing management and a fourth representing labour, meets annually and formulates international social standards.

A 40-member *Governing Body*, composed of the representatives of 20 Governments, ten worker members and ten employer members, supervises the work of the *International Labour Office* and of the various committees and commissions. Ten Governments hold seats on the Governing Body because of their industrial importance. These are at present Canada, China, France, Federal Republic of Germany, India, Italy, Japan, U.S.S.R., the United Kingdom and the United States.

The International Labour Office provides the Secretariat of the Organization, collects and distributes information, assists governments upon request in drafting legislation on the basis of decisions of the Conference and issues publications.

Director-General, David A. Morse (*U.S.A.*).

Food and Agriculture Organization of the United Nations (FAO), Viale delle Terme di Caracalla, Rome.—Established on October 16, 1945, to advance the raising of levels of nutrition and standards of living, to secure improvements in the efficiency of the production and distribution of all food and agricultural products and by bettering the condition of rural populations to contribute towards an expanding world economy. FAO collects, analyses, interprets and disseminates information relating to nutrition, agriculture, forestry and fisheries. Among its many activities the Organization promotes the global exchange of new types of plants, combats epidemics of animal diseases in many countries and provides technical assistance in such fields as nutrition and food management, soil erosion control, re-afforestation, irrigation engineering, control of infestation of stored foods and production of fertilizers. The 1959 Conference approved a budget of $18,980,050 for 1960–61 biennium. In addition to these funds, FAO receives a share of the UN Special Fund for the Expanded Technical Program (ETAP). For 1960 this amounted to $8,004,686.

The policy of the Organization is directed by a two-yearly Conference of the 87 members and associates. A council (25 members) acts for the Conference between its sessions.

Director-General, B. R. Sen (*India*).

United Nations Educational, Scientific and Cultural Organization (UNESCO), 9 Place de Fontenoy, Paris, 7 éme.—Unesco was established on Nov. 4, 1946, to contribute to peace and security by promoting collaboration among the nations through education, science and culture in order to further universal respect for justice, for the rule of law and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations; to collaborate in the work of advancing the mutual knowledge and understanding of peoples, . . . to give fresh impulse to popular education and to the spread of culture, . . . to maintain, increase and diffuse knowledge.

The three main bodies of the Organization are: a *General Conference* which meets every two years to approve the programme and budget, an *Executive Board* of 24 members and the *Secretariat*. In addition, National Commissions are set up in Member States to serve as a link with Unesco and carry out the programme of the Organization.

This programme is essentially designed to stimulate and expand international co-operation and national efforts in the fields of education, natural sciences, social sciences, cultural activities, mass communication and exchange of persons for study and educational travel abroad. Current activities of the Organization focus on development of international co-operation among specialists and non-governmental organizations, the collection and dissemination of information and the preparation of international agreements related to Unesco's interests.

Director-General, Vittorino Veronese (*Italy*).

World Health Organization (WHO), Palais des Nations, Geneva. Established on April 7, 1948, the World Health Organization exists to forward the attainment by all peoples of the highest possible level of health. Its services are of two kinds—advisory, to spread knowledge and help to train personnel on such subjects as malaria, tuberculosis, venereal diseases, maternal and child health, nutrition, and environmental sanitation—and technical, including such services as biological standardization and unification of pharmacopœias, collection and dissemination of epidemiological intelligence, special international research projects on parasitic and virus diseases, and publication of technical and scientific works. Expenditure in 1960 was estimated at $16,918,700 and at $18,975,354 for 1961. Membership (June, 1960), 101, including 11 Associate Members.

Organs are a *World Health Assembly* meeting annually to frame policy, an *Executive Board* (18 members), meeting at least twice a year, and a *Secretariat*.

Director-General, Dr. M. G. Candau (*Brazil*).

International Bank for Reconstruction and Development, 1818 H Street, Washington, 25 D.C.—Established on Dec. 27, 1945, to assist in the reconstruction and development of territories of members by facilitating the investment of capital for productive purposes; to promote private foreign investment and, when private capital is not readily available on reasonable terms, to supplement private investment by providing loans for productive purposes out of its own capital, funds raised by it, and its other resources; and to promote the balanced growth of international trade and the maintenance of equilibrium in balances of payments by encouraging international investment for the development of the productive resources of the International Bank's members. Loans made by the Bank since its inception to June 30, 1960, totalled $5,070,000,000. Subscribed capital, Sept. 16, 1959, $18,358,000,000.

The *Board of Governors* consists of one Governor and one alternate appointed by each of the 68 member countries.

Eighteen *Executive Directors* exercise all powers of the Bank except those reserved to the Board of Governors. The *President*, selected by the Executive Directors, conducts the business of the Bank, with the assistance of an international staff.

President, Eugene R. Black (*U.S.A.*).

International Finance Corporation (IFC), 1818 H Street, Washington 25, D.C.—Established in 1956, and a special agency in relationship with the United Nations since Feb. 20, 1957, IFC exists to encourage the growth of production private enterprise in its member countries, particularly the less developed areas. It invests in private enterprises, in association with private investors and without government guarantee of repayment, in cases where sufficient private capital is not available on reasonable terms; serves as a clearing house to bring together investment opportunities, private capital and experienced management; and helps to stimulate the production investment of private capital both domestic and foreign. Total authorized capital $100,000,000.

IFC is controlled by a *Board of Directors* consisting of the President (*Chairman*) and those Executive Directors of the International Bank who represent

at least one government which is a member of IFC. A President is selected by the Board of Directors.

President, Robert L. Garner (*U.S.A.*).

International Monetary Fund, 19 and H Streets, Washington 25, D.C.—Established on Dec. 27, 1945, the Fund exists to promote international monetary co-operation and the expansion of international trade; to promote exchange stability, maintain orderly exchange arrangements and avoid competitive exchange depreciations; and to assist in the establishment of a multilateral system of payments in respect of current transactions between members and in the elimination of foreign exchange restrictions which hamper world trade. Total transactions of the Fund up to April 30, 1960, amounted to $3·4 billion.

Managing Director, Per Jacobsson (*Sweden*).

International Civil Aviation Organization (ICAO), 1080 University Street, Montreal, 3—Established on April 4, 1947, to study problems of international civil aviation and the establishment of international standards and regulations for civil aviation. ICAO encourages the use of safety measures, uniform regulations for operation, and simpler procedures at international borders. It promotes the use of new technical methods and equipment. With the co-operation of members, it has evolved a pattern for meteorological services, traffic control, communications, radio beacons and ranges, search and rescue organization, and other facilities required for safe international flight. It has secured much simplification of government customs, immigration, and public health regulations as they apply to international air transport. 78 states are now members of ICAO. The net budget for 1960 was $3,865,000 (Canadian).

An *Assembly* of delegates from member states meets annually. A *Council* of 21 members is elected by the Assembly, taking into account the countries of chief importance in air transport and the need for representation of the main geographical areas of the world. The Council is the executive body, working through subsidiary committees.

Secretary-General, R. M. Macdonnell (*Canada*).

Universal Postal Union (UPU), Schosshaldenstrasse 46, Berne.—Established on July 1, 1875, UPU exists to form a single postal territory of all the countries, members of the Union, for the reciprocal exchange of correspondence in order to secure the organization and improvement of the various postal services and to promote in this sphere the development of international collaboration. Every member agrees to transmit the mail of all other members by the best means used for its own mail. The Union comprises all the countries of the world with the exception of the Maldive and Laccadive Islands. Budget, 1960, about $600,000.

A *Universal Postal Congress* meets at five-yearly intervals.

Secretary-General, Dr. Fritz Hess (*Switzerland*).

International Telecommunication Union (ITU), Palais Wilson, Geneva.—Founded at Paris in 1865 as the International Telegraph Union, ITU was re-organized in 1947 and since 1954 has been governed by the Convention adopted by the Buenos Aires Conference held in 1952. The Convention signed at Geneva in 1959 will enter into force on Jan. 1, 1961. ITU exists to set up international regulations for telegraph, telephone, and radio services to further their development and extend their utilization by the public, at the lowest possible rates; to promote international co-operation for the improvement and rational use of telecommunications of all kinds; the development of technical facilities and their most efficient operation. ITU allocates the radio frequency spectrum and registers radio frequency assignments. It studies, recommends, and collects and publishes information on telecommunication matters. The budget for 1960 was $1,759,827.

Secretary-General, Gerald C. Gross (*U.S.A.*).

World Meteorological Organization (WMO), Geneva.—Established on March 23, 1950. WMO exists to facilitate world-wide co-operation in establishing networks of stations making observations related to meteorology, and to promote the establishment and maintenance of centres providing meteorological services; to promote the establishment of systems for the rapid exchange of weather information; to promote standarization of meteorological observations and to ensure their uniform publication; to further the application of meteorology to aviation, shipping, agriculture, and other human activities; to encourage research and training in meteorology and to coordinate their international aspects. The budget for 1960–63 is $2,649,484.

A *World Meteorological Congress* meets at least once every four years. An *Executive Committee* (18 members), meeting at least annually, carries out the resolutions of the Congress, initiates studies and makes recommendations on matters requiring international action. Other organs are six *Regional Meteorological Associations* (Africa, Asia, S. America, N. and Central America, Europe and South-West Pacific), technical commissions and a Secretariat.

Secretary-General, D. A. Davies (*U.K.*).

Inter-Governmental Maritime Consultative Organization (IMCO), Chancery House, Chancery Lane, W.C.2.—Established on March 17, 1958, to provide machinery for cooperation among governments in the field of governmental regulation and practices relating to technical matters, including those concerning safety at sea; to encourage the removal of discriminatory action and of unnecessary restrictions by governments; to consider matters concerning unfair restrictive practices by shipping concerns; to consider any matters concerning shipping that might be referred to it by any organ or specialized agency of the United Nations; and to provide for the exchange of information among governments. In June, 1960, membership consisted of 39 nations. Budget, 1959–61, $726,000.

An *Assembly* of all members meets every two years. A *Council* (16 members) acts for the Assembly between sessions.

Secretary-General, Ove Nielsen (*Denmark*).

International Trade.—A draft charter for an international trade organization was completed in 1948, but it became clear that the leading trading powers would not ratify it without considerable delay. The organization has not yet been established.

An international treaty to which 37 countries are parties, the *General Agreement on Tariffs and Trade* (GATT) was signed in 1947, with the object of lowering and stabilizing tariffs, expanding international trade and promoting economic development. Four tariff conferences have since been held at which members have reduced or frozen their tariffs on various items. In 1955 the basic objectives of the Agreement were adapted to meet changed conditions, particularly the expectation of convertibility of major currencies; validity of tariff schedules was extended. At present GATT is administered at Geneva by a small secretariat.

Executive Secretary, E. W. White (*U.K.*).

Foreign Countries

THE following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

Salaries and Allowances.

The Salaries of Officers of Branch "A" of H.M. Foreign Service are shown below. In addition foreign allowances and furnished accommodation (or rent allowances in lieu thereof) are assigned to Officers serving abroad:—

Grade I—£7,000.
Grade II—£5,000.
Grade III—£4,100.
Grade IV—£3,800.
Grade V—£3,000.
Grade VI—£2,400 to £3,000.
Grade VII—£1,700 to £2,375.
Grade VIII—£1,233 to £1,460 (under revision, July, 1960)
Grade IX—£730 to £1,205.

NOTE.—Salaries of Ambassadors and of Ministers Plenipotentiary at British Embassies and Legations abroad shown in the following articles are in each case the maximum salary for the post and exclude *Frais de Représentation*.

ABYSSINIA. *See* Ethiopia.

AFGHANISTAN

(Afghānistān)

King of Afghanistan, H.M. Zahir Shah, *born* Oct. 15, 1914, *acceded* Nov. 8, 1933 (on the assassination of his father, Nadir Shah); *married* Nov. 7, 1931, Humaira, daughter of Sardar Ahmad Shah Khan, and has surviving issue four sons and two daughters: H.R.H. Prince Ahmed Shah Khan, *b.* Sept. 23, 1934; H.R.H. Prince Mohammad Nadir, *b.* 1941; H.R.H. Prince Daud, *b.* 1949; H.R.H. Prince Mir Wais, *b.* 1957; and H.R.H. Princess Bilqis, *b.* 1931; H.R.H. Princess Maryam, *b.* 1936.

EMBASSY IN LONDON
31 Princes Gate, S.W.7.
[Kensington: 8891.]

Ambassador in London, Mohammed Kabir Ludin.
1st Secretary, Mohammed Ebrahim Nouri.
2nd Secretary, Mohammed Aziz Rahim.

Afghanistan lies to the N. and W. of Western Pakistan. Its ancient name was Aryana, by which title it is referred to by Strabo, the Greek geographer who lived in the 1st century B.C. The estimated area is 250,000 sq. miles, and the population is estimated (1946) at about 10 to 12 millions. The population is very mixed. The most numerous race is the Pathan which predominates in the South and West, the main divisions being the Durranis, from whom the Royal family springs, and the Ghilzais. Then come the Tajiks, an Iranian people mainly cultivators and small traders. There are also Uzbeks and Turkomen in the North, Hazaras in the centre, Baluchis in the South-West and the Kafirs who live near the Chitral border. All are Sunni Moslems, except the Hazaras and Kizilbashes, who belong to the Shia sect.

Afghanistan is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (now W. Pakistan) (boundary fixed 1896–7), on the N. by Asiatic Russia (boundary fixed 1886–7 and 1893–5), and on the E. by the N.W. Frontier Province (now W. Pakistan) (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus, to the Oxus (or Amu Darya, "Mother of Rivers") which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier on the branch line from Merv, and thence N.E. was fixed by the Pamir agreement of 1895. The Russo-Afghan frontier was demarcated by the Tashkent Boundary Commission in 1948. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who have a strong tradition of independence and are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into seven major provinces, Kabul, Mazar-i-Sharif, Kandahar, Herat, Nengrahar (formerly Eastern), Paktya (formerly Southern) and Qataghan, and eight minor provinces, Parwan, Ghazni, Farah-Chakhansur, Girishk, Maimana, Badakhshan, Shibarghan and Ghore. Each province is under a Governor (called in major provinces *Naib-ul-Hakumah*, and in minor provinces *Hakim-i-Ala*).

Government.—Amir Abdurrahman (1880–1901) established a strong central government, with a regular civil and military organization, including offices for public works, posts, police, finance, trade, &c. The Army has been reorganized and is recruited by annual calls; service is for two years with the colours and eight with the reserve. The peace strength is about 64,000. A military academy and military colleges are located in Kabul; and provision is made for training of regular officers abroad. A small Air Force is maintained. All military and air force equipment is now of Russian pattern. Factories for munitions and for various commercial products have been erected in Kabul and elsewhere.

As the result of a British mission to Kabul in 1904–5, the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence. Afghan troops crossed the Indian frontier on May 2, 1919, on which the Indian Government took immediate steps to expel them; fighting followed and Dakka was occupied by British troops, but overtures were made by King Amanulla of Afghanistan and a treaty of peace was signed in August. By this treaty Afghanistan is left formally free and independent. By treaty of Nov. 22, 1921 (renewed in 1930), Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognize boundaries then existent, subject to a slight re-adjustment near the Khyber; and to establish Legations and consular offices. As successor state to the British Government, Pakistan has agreed that her relations with Afghanistan shall be based on the 1921 treaty.

Under the Constitution of Oct. 31, 1931, there is a Senate of 43 nominated members and a National Council of 171 elected members, with a Grand Assembly (*Loe Jirgeh*) which is summoned on important occasions. The administration is entrusted to a Council of Ministers.

The laws of Afghanistan are based on the "Shariat," or Islamic law, and tribal custom.

Production.—Agriculture and sheep raising are the principal industries. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Sugar beet and cotton are grown. Afghanistan is rich in fruits. Sheep, including the Karakuli, and transport animals are bred. Silk, woollen and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, gold, chrome and talc are found.

The following main roads are open to motor traffic. (*a*) Internal: Kabul–Kandahar (310 miles); Kandahar–Farrah–Herat (400 miles); Herat–Maimana to Mazar–i–Sharif (500 miles); Mazar-i-Sharif–Kabul (380 miles). Also Kabul–Khanabad–Faizabad (450 miles); Kabul–Gardez (80 miles); Kabul–Bamian (140 miles). The road from Kabul to the North is being shortened by cutting through the Salang pass. (*b*) Roads to the frontiers: Kabul–Khyber (175 miles); Kandahar–Chaman (70 miles) and roads from Herat to the Russian and Persian borders. Work on the metalling of the Kabul–Khyber road by American engineers has begun and a new metalled road from Kabul to Kandahar and Spin Baldock is shortly to be constructed under an I.C.A. contract. The Pakistan North-Western Rly. is to extend a spur from Chaman to Spin Baldak. An agreement has recently been signed with the Soviet Government for the construction of a road from the Russian border at Kushk to Herat and Kandahar. Otherwise roads are unmetalled. A network of minor roads fit for motor traffic in fine weather links up all important towns and districts.

Goods are still conveyed by pack animals, but motor transport is rapidly taking the place of pack transport as the chief means of conveyance. The chief trade routes to Pakistan and India are the Khyber Pass route, from Kabul to Peshawar (190 miles), and the road from Kandahar to Chaman (70 miles).

Language and Literature.—The languages of the country are Persian and Pushtu and Turki (spoken by Uzbeks and Turkoman tribes in the North). The Turki language is unwritten in Afghanistan. All schoolchildren learn both Persian and Pushtu. The Government is encouraging the spread of Pushtu, the language of the Pathans. Education is free and nominally compulsory, elementary schools having been established in most centres; there are secondary schools in large urban areas and a university (established in 1932) at the capital.

FINANCE.	*Afghanis.*
National Income	2,000,000,000

The annual revenue consists largely of payments in kind. There are taxes on land, sales of animals, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories and mining royalties; in addition certain businesses and individuals have now become eligible for income-tax.

There are various official rates of exchange for the Afghani which apply mainly to government departments trading in certain commodities. The free rates fluctuate as much as 20 per cent. or more but in June, 1960, were approximately as follows:

700 *Afghanis* = 100 Indian *Rupees*.
550 *Afghanis* = 100 Pakistani *Rupees*.
106 *Afghanis* = £1.
38 *Afghanis* = $.

TRADE WITH U.K.

	1958	1959
Imports from U.K.	£430,483	£481,316
Exports to U.K.	3,502,295	2,498,035

Exports are mainly Persian lambskins (Karakuli), fruits, cotton, raw wool, carpets and piece goods, while the imports are chiefly cotton yarn and piece goods, metals, leather goods, tea, sugar, jute manufactures, paper and cement.

CAPITAL, Kabul (about 300,000). The chief commercial centres are Kabul and Kandahar (77,000). Other provincial capitals are Herat (75,000), Mazar-i-Sharif (42,000), Jalalabad (22,000) and Khanabad (18,000).

FLAG; Green, red and black, with white device in centre.

BRITISH EMBASSY
(Kabul)

Ambassador Extraordinary and Plenipotentiary, His Excellency Michael Cavenagh Gillett, C.M.G. (1957)..... £3,800
1st Secretary, H. J. Downing.
Military Attaché, Col. W. H. R. Clifford, M.B.E.
2nd Secretaries, W. M. Sadler, M.C., M.M.; T. Grady
3rd Secretary, N. J. Barrington.

Kabul is distant 7,500 miles from London, transit 21 days; by air 2–4 days.

ALBANIA

Head of the State, Hadji Lechi, *assumed office*, July 24, 1953.
Prime Minister, General Enver Hodja, *recognized* by Gt. Britain, U.S.A. and U.S.S.R., Nov. 10, 1945.

Situated on the Adriatic Sea, Albania is bounded on the north and east by Yugoslavia and on the south by Greece. The area of the Republic is estimated at 10,700 sq. miles, with a population (1955) of 1,394,000.

On Nov. 10, 1945, the British, U.S.A. and U.S.S.R. governments decided to recognize the Albanian administration under Colonel-General Enver Hodja as the provisional government of Albania on the understanding that free elections would be held at an early date, in order that a truly representative government could be formed. Elections were held in December, 1945, on Jan. 11, 1946, the Constituent Assembly declared Albania an independent Republic, and on Aug. 7, 1946, Albania applied for admission to the United Nations, but its entry was vetoed by Great Britain and the U.S.A. It was admitted in 1955. United Kingdom diplomatic relations with Albania ceased in 1946.

Albania is almost entirely an agricultural country and the staple crops are wheat and maize.

CAPITAL: Tirana (pop. 50,000).

ANDORRA

A small, neutral principality situated on the southern slopes of the Pyrenees, between Spain and France, with an approximate area of 180 square miles and population of approximately 6,000. It is surrounded by mountains which attain an altitude of from 6,500 to 10,000 feet. Historians place the origin between the eighth and ninth centuries. Andorra is divided into six Parishes each of which has four Councillors elected by vote to the Valleys of Andorra Council of Twenty-four (Heads of families only may vote). The nominal heads of the state are the Bishop of Urgel, Spain, and the President of the French Republic. These two

"co-princes" can veto certain decisions of the Council of the Valleys but cannot impose their own decisions without the consent of the Council. Each co-prince nominates his own representative and has a Permanent Delegation and a Supreme Tribune for the hearing of civil causes. These two Tribunes together form the Supreme Courts. The official language of the country is Catalan. Spanish *pesetas* and French *francs* are the accepted currency. A good road crossing the Valleys from Spain to France is open between May and November. Andorra has deposits of iron and quantities of alum and lead, stone quarries, granite, jasper and marble. Slate is abundant. Timber includes pine, fir, oak, birch and box-tree. Potatoes and cereals are produced in the highlands and tobacco in the plains. The climate is naturally cold for six months, but mild in spring and summer. The mountain slopes are suitable for skiing, and it is estimated that 400,000 tourists visit the Valleys during the year. The imports from U.K. during 1959 were £14,089.

CAPITAL: Andorra la Vella (population 2,200).

FLAG: Three vertical bands, blue, yellow, red; Andorran coat of arms frequently imposed on central (yellow) band but not essential.

ARABIA

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30′—60° E. long. and 12° 45′—34° 50′ N. lat. The north-western limit is generally taken from Akaba at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Muscat and Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, Dahana, and Rub Al Khali deserts), and the total population is believed to be about 10,000,000.

Language and Literature.—Arabic is spoken not only in Arabia, but in many other countries, either as the principal or auxiliary tongue, notably in Egypt and the Sudan, Libya, Morocco, Algeria, Iraq, Jordan, Syria, Lebanon; and to some extent also in Nigeria, Madagascar and Zanzibar. Owing to Moorish incursions it was formerly spoken in Spain, the Balearic Islands and Sicily. There are anthologies of pre- and post-Islamic poetry and a considerable prose literature, including popular romances and story cycles (such as "The Thousand Nights and One Night"), historical and biographical studies, and resulting from the westernizing movement, there is a general revival of learning among Arabic speaking peoples. Many daily newspapers are published in Arabic and there is a native Arabic drama.

See also.—BAHRAIN; KUWAIT; MUSCAT AND OMAN; QATAR; SAUDI ARABIA; TRUCIAL STATES; YEMEN.

ARGENTINE REPUBLIC

(República Argentina.)

President, Dr. Arturo Frondizi, G.C.M.G.; *born* October 28, 1908; *elected* February 23, 1958; *assumed office*, May 1, 1958.

CABINET

(July 1, 1958)

Minister of the Interior, Dr. Alberto R. Vitolo.
Foreign Affairs and Worship, Dr. Diógenes Taboada.
Economy, Ing. Alvaro Alsogaray.
Education and Justice, Dr. Luis R. MacKay.
National Defence, Dr. Justo P. Villar.
Social Assistance and Public Health, Dr. Hector V. Noblía.
Labour and Social Security, Ing. Alvaro Alsogaray (*acting*).
Public Works and Service, Ing. Alberto R. Constantini.

Secretaries of State (*Subordinate to the Minister of Economy*):
Agriculture and Livestock, Dr. Malaccorto.
Treasury and (*interim*) *Finance*, Dr. Guillermo W. Klein.
Commerce and (*interim*) *Industry and Mining and Fuel and Power*, Dr. Cartos Alberto Juni.
(*Subordinate to the Minister of National Defence*):
War, Gen. Rodolfo A. Larcher.
Marine, Rear-Adm. Gastón Clement.
Air, Brig. (R.) Ramon A. Abrahin.
(*Subordinate to the Minister of Public Works and Services*):
Public Works, Ing. Pascual Palazzo.
Communications, Dr. Miguel F. Mujica.
Transport, Ing. Manuel F. Castello.

EMBASSY IN LONDON,
9 Wilton Crescent, S.W.1.
[Belgravia: 3717.]

Ambassador, Rear-Admiral Teodoro Hartung (1958).
Counsellors, Dr. Juan Angel Peña Gaona; Luis Francisco Bengolea.
Military and Air Attaché, Comodore Alberto Ricardo Sola Claret.
Naval Attaché, Capt. Carlos A. Sánchez Sañudo.
Economic Counsellor, Raúl E. Dejean del Castillo.
Financial Counsellor, Dr. Manuel Aris.
First Secretary, Andreas E. Ceustermans.
Second Secretary, Santos Néstor Martínez.
Third Secretary, Vicente Guillermo Arnaudu.
Attachés, Roberto Dellepiane Rawson; Guillermo Jorge McGough.
Commercial Attaché, Dr. Alfredo Louro.
Consul-General, Raúl Eduardo Sidders.
Consulate-General, 53 Hans Place, S.W. 1 (Knightsbridge: 1701).

There are also Consulates in *Liverpool* and *Cardiff*.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaux, extend from the northern to the southern boundaries: on the east are the great plains. Those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless

pampas extending from the Bolivian boundary in the north to the Río Negro; and south of the Río Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the south-ern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahia Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course in Argentina; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their con-fluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Río Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic. The climate ranges from sub-tropical to cold temperate.

The Republic consists of 23 provinces and one federal district (Buenos Aires), comprising in all an area of 1,079,965 square miles, with an estimated population of 20,775,200 (December, 1959).

In 1959 births numbered 467,300 and deaths 165,100.

Immigration is encouraged. In 1959 the number of passengers travelling by sea was: arriving 849,300, departing 841,300.

Government.—The estuary of La Plata was dis-covered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. This city was abandoned and later founded once more by Don Juan de Garay in 1580. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9), after a long campaign of liberation conducted by General José de San Martín, the independence of Argentina was declared by the Congress of Tucumán. A revolt in September, 1955, overthrew the Government under the presi-dency of General Juan D. Perón and an interim Provisional Government was formed by the late General Eduardo Lonardi. This Provisional presi-dency passed to General Pedro Aramburu in Nov-ember, 1955.

A Constituent Assembly, elected on July 28, 1957, decided that the country should revert to the 1853 Constitution, in accordance with which, on February 23, 1958, general elections were held and Dr. Arturo Frondizi was elected President and Dr. Alejandro F. Gomez, Vice-President, for the normal period of six years. They assumed office on May 1, 1958, but several months later, owing to dissensions, Dr. Alejandro Gomez, the Vice-President, was forced to resign. The vice-presi-dency has not since been filled. In June, 1959, a series of sharp political crises forced the President to make wide changes in his Cabinet, which is now constituted according to the list given above. Partial elections held in March, 1960, in accordance with the constitution, did not affect the President, though the results weakened the Government party in the Chamber of Deputies and in several provincial legislatures.

Agriculture.—Of a total land area of approxi-mately 700,000,000 acres, farms occupy about 425,000,000. About 60 per cent. of the farmland is in pasture, 10 per cent. in annual crops, 5 per cent. in permanent crops and the remaining 25 per cent. in forest and wasteland. A large proportion of the land is still held in large estates devoted to cattle raising but the number of small farms is increasing. The principal crops are wheat, maize, oats, barley, rye, linseed, sunflowerseed, alfalfa, sugar and cotton. Argentina is pre-eminent in the production of beef, mutton and wool, being self-sufficient in basic foodstuffs and conducting a large export trade in many others. Pastoral and agricultural products provide more than 90 per cent. of Argen-tina's exports and they originate mainly from the pampas or rich central plain which embraces the provinces of Buenos Aires, Santa Fé, Entre Ríos, Córdoba and La Pampa.

The following table shows the yield of the more important crops:

Crop	1958–59 Metric Tons	1959–60 Metric Tons
Wheat	6,720,000	5,380,000
Maize	4,932,000	—
Linseed	620,000	708,000
Oats	850,000	825,000
Barley	1,050,000	982,000
Rye	817,000	840,000
Sunflowerseed	758,000	387,000
Cotton	309,000	—
Groundnuts	248,000	283,000
Sugar cane	12,860,000	11,522,000
Tea	43,606	46,100
Tobacco	27,000	—

Livestock.—Livestock population (in millions) in 1959 was: cattle, 41; sheep, 46; pigs, 4; horses, 5.5; and goats, 5. Meat production from 12,200,000 cattle slaughtered in 1958 totalled 972,000 tons; from 9,200,000 sheep, 105,700 tons; and from 2,230,000 pigs, 106,000 tons. Cattle stocks declined from 46,000,000 in 1956 to 40,000,000 in 1958, but are again increasing and the former level is expected to be reached in 1961. Meat exports to U.K. in 1959 were 258,000 tons, compared with 310,000 in 1958; total meat exports fell from 428,000 tons in 1958 to 383,000 tons in 1959.

Mineral Production.—Oil is found in various parts of the Republic and is obtained to a considerable extent at Comodoro Rivadavia (Chubut), Mendoza, Plaza Huincul (Neuquen), Tartagal (Salta) and in other districts. A natural gas pipeline between Comodoro Rivadavia and Buenos Aires has been in operation since 1949. An oil pipeline from Campo Duran (Salta) to a refinery in San Lorenzo (Santa Fé) was put in service in March, 1960, as was also a natural gas pipeline from the same source to the outskirts of Buenos Aires.

The production of oil is of first importance to Argentina's rapidly expanding industries and, to some extent, to her economic and financial develop-ment. The crude oil output in 1959 increased by 1,400,000 cubic metres (or 25 per cent.) as com-pared with 1958.

	1958	1959
	Cubic Metres	
State	4,500,000	6,120,000
Private companies	1,168,100	973,000
Total	5,668,100	7,093,000

Coal, lead, zinc, tungsten, iron ore, sulphur, mica and salt are the other chief minerals being exploited. There are small worked deposits of beryllium, manganese, bismuth, uranium, antimony, copper, kaolin, arsenate, gold and silver. Coal production is approximately 300,000 tons per year; this is produced at the Río Turbio mine in the province of Santa Cruz. The output of other minerals is not large but greater attention is now being paid to the development of these natural resources.

Industries.—Meat-packing is one of the principal industries; flour-milling, sugar-refining, and the

wine industry are also important. In recent years great strides have been made by the textile industry. Manufacture of agricultural machinery and vehicles is increasing.

Communications.—There are 27,874 miles of railways of which 15,604 miles are broad gauge (5′ 6″), 1,940 miles standard (4′ 8½″), 9,664 miles of 1 metre, 537 miles of 0.75 metre and 129 miles of 0.60 metre. They are all State property. The combined national and provincial road network totals approximately 91,500 miles of which 7,500 miles are surfaced. There are air services between Argentina and all the neighbouring Republics, Europe, Canada and the U.S.A.

The tonnage of vessels entering Argentine ports was 12,243,300 in 1958 and 11,978,400 in 1959. Of the latter figure, 1,689,400 tons were Argentine, 2,147,800 British, 1,126,100 Norwegian, 688,500 U.S.A., 928,500 Liberian, 826,800 Netherlands, 675,600 Italian, 485,800 French, 624,500 German, 213,300 Brazilian, 220,500 Danish and 515,000 Swedish (1959 provisional figures).

There are 75 radio broadcasting stations of which 12 are short-wave and 63 medium-wave (55 commercial and 8 official). Two television stations were operating from Buenos Aires in 1960 and it was expected that a further 2 stations would open by 1961. Television receivers numbered 460,000 at the end of 1959.

Defence.—The Army is organized in 5 infantry, 1 motorised, 1 armoured and 3 cavalry divisions and 3 mountain groups, and numbers about 5,000 officers, 15,000 N.C.O.s and 65–70,000 men on a peace footing.

The Navy consists of 2 cruisers, 1 aircraft carrier, 1 training cruiser, 9 destroyers, 7 frigates, 1 ice-breaker, 8 minesweepers, 9 motor torpedo boats, 2 submarines, 23 landing craft, 7 oilers, 8 transports, 2 survey ships and auxiliary vessels; 4 squadrons Naval Air Arm. Strength about 2,000 officers and 25,000 men.

The Air Force consists of 5 brigades and a training force, with a strength of about 1,500 officers and 35,000 other ranks. The aircraft include Meteor IV., Lincoln, Lancaster, Viking, Bristol 170 and Dove.

Education.—*Primary* Education is free and compulsory for four years between the ages of 6 and 14. The scattered population of the country districts constitutes a problem in attendance which is being gradually solved. Illiteracy of adults has fallen in the last 20 years; it is now almost non-existent except in the north and far south, where it is still about 42 per cent. *Secondary* Education is controlled by the National Government in National Colleges, in Normal Schools, and in Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are *National Universities* at Córdoba, Buenos Aires, San Miguel de Tucumán, Santa Fé, Mendoza, La Plata and Bahia Blanca.

Language and Literature.—Spanish is the language of the Republic and the literature of Spain is accepted as an inheritance by the people. There is little indigenous literature before the break from Spain, but all branches have flourished since the latter half of the nineteenth century, particularly journalism. Under the Perón régime many newspapers and reviews were closed down and others turned into Government mouthpieces. Since the 1955 revolution the traditional freedoms have been restored. Over 400 daily newspapers are published in Argentina, including 64 in the city of Buenos Aires. The English language newspapers are the *Buenos Aires Herald* (daily) and *Standard* (weekly). There are numerous other foreign language newspapers.

Finance.—The budget for 1959–60 showed a deficit of paper *pesos* 27,216,000,000, on a total expenditure estimated at 209,304,000,000.

TRADE

	1958 Paper *pesos*	1959 Paper *pesos*
Total Imports....	34,951,700,000	72,521,700,000

Capital, ΨBuenos Aires, Pop. (Dec. 1958), 4,500,000. Other large towns are: ΨRosario de Santa Fé (720,000), Cordoba (635,000), ΨLa Plata (410,000), Avellaneda (380,000), San Miguel de Tucuman (251,000), Santa Fé (275,000), ΨMar del Plata (270,000) and Mendoza (165,000).

NATIONAL COLOURS: Blue and White (War Flag: 3 horizontal bands, blue, white, blue, with rising sun on white band).

NATIONAL DAYS.—May 25, July 9 and July 20.

BRITISH EMBASSY

Edificio Británico, Calle Reconquista 314, Buenos Aires.

British Ambassador, His Excellency Sir John Guthrie Ward, K.C.M.G. (1957)..... £5,000
Minister, J. E. Chadwick, C.M.G.
Counsellor, R. M. Saner, O.B.E.
Minister and Consul General, F. C. Ogden, C.B.E.
1st Secretaries, D. I. Dunnett (*Commercial*); A. J. Williams; G. S. MacWilliam (*Information*); E. H. Van Maurik (*Visa Section*); J. M. Carlin (*Labour*); N. M. Hallett (*Consular*); H. J. Griffiths (*Commercial*).
2nd Secretaries, M. A. Cafferty (*Commercial*); C. W. M. Wilson (*Admin.*); Miss I. Illman (*Commercial*).
3rd Secretaries, J. W. G. Ridd; H. C. L. Fassnidge.
Junior Attaché, R. P. Breakspear.
Naval and Military Attaché, Capt. F. D. Holford, D.S.C., R.N.
Air Attaché, Gp. Capt. D. J. Devitt.
Agricultural and Food Attaché, A. G. Mill.
Veterinary Attaché, P. D. Baylis.
Vice-Consuls, V. E. Crowe; B. Kelly, M.B.E.
Pro-Consul, A. G. A. Spiller.
Press Officer, G. H. Gibbs, M.B.E.

BRITISH CONSULAR OFFICES

There are British Consular Offices at *Buenos Aires*, *Bahia Blanca*, *Comodoro Rivadavia*, *Córdoba*, *La Plata*, *Puerto Deseado*, *Rio Gallegos*, *Rio Grande*, *Rosario de Santa Fé* (*Salta*) and *Trelew*.

BRITISH COUNCIL

Representative in Argentina, Dr. N. A. R. Mackay, Lavalle 190, Buenos Aires.

BRITISH CHAMBER OF COMMERCE

Calle Bartolomé Mitre 441. (6 Piso), Buenos Aires; and (affiliated) British Chamber of Commerce in Rosario.

Buenos Aires is 7,160 miles from Southampton; transit, 19 days by steamship; 1 day by air.

AUSTRIA

President of the Austrian Republic, Dr. Adolf Schaerf, *born* 1890; *elected* May 5, 1957.

CABINET.

(June 29, 1956.)

Chancellor, Ing. Julius Raab (*Austrian People's Party*).

Vice-Chancellor, Dr. Bruno Pittermann (*Socialist*).
Foreign Affairs, Dr. Bruno Kreisky (*Socialist*).
Interior, Josef Afritsch (*Socialist*).
Justice, Dr. Christian Broda (*Socialist*).
Defence, Ferdinand Graf (*Austrian People's Party*).
Finance, Eduard Heilingsetzer (*Austrian People's Party*).
Education, Dr. Heinrich Drimmel (*Austrian People's Party*).
Commerce and Reconstruction, Dr. Bock (*Austrian People's Party*).
Agriculture and Forestry, Ing. Eduard Hartmann (*Austrian People's Party*).
Transport and Electricity Industry, Ing. Karl Waldbrunner (*Socialist*).
Social Welfare, Karl Prokosch (*Socialist*).

AUSTRIAN EMBASSY IN LONDON.
18 Belgrave Square, S.W.1.
[Belgravia: 3731]

Ambassador in London, Dr. Johannes Schwarzenberg (1955).
Counsellor, Dr. Friedrich Kudernatsch.
2nd Secretary, Dr. Egon Libsch.
Military and Air Attaché, Lt.-Col. Franz Attems-Petzenstein.
Attachés, Dr. Christoph Cornaro; Dr. Wolfgang Seifert.
Press Attaché, Otto Seiffert.

Austria is a country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary, on the north-west by Germany and on the west by Switzerland. Its area is 34,064 square miles and its population 6,968,500 (1954).

Government.—The Austrian Federal Republic comprises nine States (Vienna, Lower Austria, Upper Austria, Salzburg, Tyrol, Vorarlberg, Carinthia, Styria and Burgenland) and was established in 1918 on the break-up of the Austro-Hungarian Empire. On March 13, 1938, as a result of the *Anschluss*, Austria (*Oesterreich*) was incorporated into the German *Reich* under the name *Ostmark*. After the liberation of Vienna in 1945, the Austrian Republic was reconstituted within the frontiers of 1937 and, after a period of provisional government, a freely elected Government took office on December 20, 1945. The country was divided at this time into four zones occupied respectively by the U.K., U.S.A., U.S.S.R. and France, while Vienna was jointly occupied by the four Powers. On May 15, 1955, the Austrian State Treaty was signed in Vienna by the Foreign Ministers of the four Powers and of Austria. This Treaty recognized the re-establishment of Austria as a sovereign, independent and democratic state, having the same frontiers as on January 1, 1938. It entered into force on July 27, 1955.

There is a National Assembly of 165 Deputies. At the last general elections in May, 1959, the Government Coalition of Austrian People's and Socialist Parties increased its large majority by one seat. The present state of the parties is as follows:

Austrian People's Party	79
Socialist Party	78
Freedom Party (right wing)	8

Religion and Education.—The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of 6 and 14, and there are good facilities for secondary, technical and professional education. There are Universities at Vienna, Graz and Innsbruck.

Language and Literature.—The language of Austria is German, but the rights of the Slovene- and Croat-speaking minorities in Carinthia, Styria and Burgenland are protected. The press is free. There are now 11 daily papers in Vienna and 23 in the provinces, as well as numerous weeklies and monthlies.

Production and Industry.—Agriculture is the most important industry, the arable land producing wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and pigs. Timber forms a valuable source of Austria's indigenous wealth with about 35 per cent. of the total land area consisting of forest areas. Coniferous species predominate and account for more than 80 per cent. of the timber under cultivation. Hard-wood trees are mainly confined to Lower Austria. Spruce is the most common among the conifers (about 60 per cent. of the total) and beech is the most prevalent of the broad leaf trees.

Austria has important heavy industries. Production figures for 1959 include (in thousands of metric tons): pig iron 1,837, crude steel 2,512, rolled products 1,721, pressed and forged products 52. Raw magnesite, nitrogenous fertilizers, paper and chemical pulp are produced in quantity. In addition motor cycles and motor-scooters, tractors and motor lorries are produced.

Hydro-electric power offers great possibilities in Austria. Much has already been done to develop it, and a long-term plan has been evolved for further development including greater export of electric current to surrounding countries. Production in 1959 was 14,750 million kWh.

Minerals.—There are large iron ore deposits and, in Eastern Austria, large oil deposits. In addition there are useful deposits of brown coal, magnesite, salt and lead. There are also limited deposits of copper.

FINANCE.

	Budget 1959 (*Schillings*)
Ordinary Budget:	
Expenditure	37,458,104,000
Revenue	36,467,050,000
Extraordinary Budget:	
Expenditure	2,968,670,000
Revenue	4,000

TRADE WITH U.K.

	1958	1959
Imports from U.K.	£15,546,147	£16,133,262
Exports to U.K.	8,145,264	9,112,394

Currency.—The unit of currency is the *Schilling* of 100 *Groschen*, reintroduced in December, 1945. The official rate of exchange was fixed in May, 1953, at 72·80 Austrian schillings = £1, for all purposes.

CAPITAL, Vienna, on the Danube, population 1,614,287. Other towns are Graz (226,453), Linz (185,218), Salzburg (105,439), Innsbruck (102,759) and Klagenfurt (66,336).

FLAG. Red, white, red.

British Ambassador Extraordinary and Envoy Plenipotentiary, Sir (Reginald) James Bowker, K.C.M.G. (1958) £7,000
Minister Counsellor, J. Y. Mackenzie.
Counsellor (Commercial) and Consul-General, C. G. Harris.

There are British Consular Offices at *Vienna* and *Innsbruck*.

British Council Representative, C. R. Hewer, O.B.E., Freyung 1, Vienna 1.

BAHRAIN

Ruler, H. H. Shaikh Sulman bin Hamad Al Khalifah, K.C.M.G., K.C.I.E., *born* 1895; *acceded* February 3, 1942.

Bahrain consists of a group of low-lying islands situated halfway down the Persian Gulf some 20 miles off the east coast of Arabia. The largest of these, Bahrain Island itself, is about 30 miles long and 10 miles wide at its broadest. The two most important towns are Manama (61,726) and Muharraq (32,302). The latter is situated on a separate island of the same name which is connected with Bahrain Island by a causeway two miles long. The population of the islands at the Census held in 1959 was 143,135, of whom about half are the original inhabitants belonging to the Shia Sect, the remainder, including the ruling family, being Sunnis. There are 2,815 Europeans and Americans (about 75 per cent. of whom live at the Bahrain Petroleum Company's town of Awali) and 21,586 non-Bahrainis of whom a considerable number are Iranians, Indians and Pakistanis. The standard of living is high among the large and influential merchant class and steadily rising among the lower social groups.

The ruling family (Al Khalifah) came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782. The state is administered under the Ruler by a number of departmental heads whose activities are co-ordinated by the Secretariat. A small Administration Council consisting of members of the ruling family and heads of departments has been created by the Ruler to consider and advise on general matters; Health, Education, Agriculture and Water Committees exist to advise the relative departments. Local government is the responsibility of six municipalities and the Rural Affairs Department which cares for the villages. Half of the members of four of the municipal councils (Manama, Muharraq, Rifaa and Hidd) are elected by the public and half nominated by the Government; all the members of the other two, which have been recently created (Sitra and Jidhafs) are nominated by the Government. In addition to the Department of Rural Affairs, there is a Department of Social Affairs and a Labour Department. There is free primary and secondary education and free medical treatment.

In earlier days the only industry was the pearl trade, of which Bahrain was an important centre, but this has now declined and petroleum dominates the scene. Oil was discovered in 1932 and The Bahrain Petroleum Company, Limited (BAPCO), has its headquarters in Awali, some eleven miles from Manama. The company also operates a refinery and about 80 per cent. of the oil refined is piped from nearby Saudi Arabia.

The second source of revenue is that of Bahrain's traditional *entrepôt* trade. The island is conveniently situated to handle goods in transit to the mainland and it is estimated that not less than 70 per cent. of the imports unloaded at Bahrain were, up to a few years ago, destined for onward movement. A decline in this *entrepôt* trade has, however, occurred as there is a growing tendency, as new developments occur, for eastern Saudi Arabia, Qatar and other places in the Gulf to import direct. (In 1957 Bahrain re-exported 35·8 per cent. of its imports and in 1958, 36·79 per cent.) To counteract this trend and to encourage the *entrepôt* trade, free transit facilities were introduced in the port of Bahrain on January 1, 1958.

The principal imports and re-exports are household goods, foodstuffs, piece-goods, timber and building materials, vehicles and machinery.

Manama, the capital and commercial centre, extends for two miles along the northern shore of Bahrain Island and is a regular port of call for thirty steamship lines. Bahrain is also a port of call for B.O.A.C. and other international airlines. Banking services are provided by the Bank of Bahrain and by branches of the Eastern Bank and of the British Bank of the Middle East. There is a radio-telephone service to the United Kingdom and many other parts of the world. The electricity supply system is being extended over the island and piped water supplies are being introduced into the principal towns and villages.

The principal coin in use is a rupee introduced especially by the Reserve Bank of India for circulation in the Persian Gulf States. The value of this special rupee is the same as that of the Indian rupee (Rs. 13·285 = £1).

FLAG: Red, with vertical white bar next to staff.

CAPITAL, Ψ Manama; population, 55,541.

Secretary to the Government, G. W. R. Smith, M.B.E.

H.M. Political Agent, E. P. Wiltshire (1959).

Bahrain is the headquarters of H.M. Political Resident in the Persian Gulf, Sir George Middleton, K.C.M.G.

BELGIUM

(Royaume de Belgique.)

King of the Belgians, H.M. King Baudouin, *born* Sept. 7, 1930; *succeeded* July 17, 1951, on the abdication of his father, King Leopold III, after having acted as Head of the State since August 11, 1950.

Heir Presumptive, H.R.H. Prince Albert, *born* June 6, 1934, *brother* of the King; *married* July 2, 1959, Donna Paola Ruffo di Calabria, and has *issue* Prince Philippe Léopold Louis Marie, *b.* April 15, 1960.

CABINET.

Agricultural Attaché, M. Maurice Cammaerts.
Attachés, M. Jean Coene; M. Maurice Carmen; Mlle. F. van Haelewyck.

A Kingdom of Western Europe, with a total area of 11,775 square miles and a population, Dec. 31, 1959 (including Eupen and Malmedy) of 9,128,824. The Kingdom of Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally level and fertile, while the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dykes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 49° F. (summer 65°, winter 37°).

Belgium is inhabited by two distinct races, the Flemish, of Germanic stock, and the Walloons, of Latin stock. Since 1938 there has been an increase in the Flemish population of almost 517,000 and in the Walloon population of about 100,000. Nearly all the inhabitants are Roman Catholics.

GOVERNMENT.—The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium, in violation of the terms of the treaty.

The Kingdom was again invaded by Germany on May 10, 1940. The whole Kingdom eventually fell into enemy hands and was occupied by Nazi troops until the victorious advance of the Allies in September, 1944. A monument at Hertain in the province of Hainault (where British forces crossed the frontier on Sept. 3, 1944), set up by the Anglo-Belgian Union, was unveiled on St. George's Day, 1949.

According to the Constitution of 1831 the form of government is a constitutional representative and hereditary monarchy with a bicameral legislature, consisting of the King, the Senate and the Chamber of Representatives. The Senate is partly directly and partly indirectly elected (or co-opted) for 4 years. 106 members out of 175 are directly elected. The Chamber of Representatives consists of not more than 1 per 40,000 inhabitants and is elected directly by all adult nationals.

The elections of June 1, 1958, returned to the Senate 90 Social Christians (Catholics), 65 Socialists, 18 Liberals, 1 Communist and 1 other, total, 175; and to the Chamber of Representatives 104 Social Christians (Catholics), 81 Socialists, 22 Liberals, 2 Communists and 3 others, total 212.

PRODUCTION.—Belgium is essentially a manufacturing country. With no natural resources except coal, annual production of which formerly averaged some 30,000,000 tons but which dropped to less than 23,000,000 tons in 1959 following the closing of uneconomic pits, industry is based largely on the processing for re-export of imported raw materials. A large proportion of the population is engaged in agriculture and forestry, the former supplying four-fifths of the population's needs. Principal industries are coal, steel and metal products (Mons, Charleroi, Liège, Namur, Hainault, Brabant and Limburg), textiles (Ghent, Bruges, Courtrai, Verviers, etc.), glass, nitrogen, heavy chemicals, sugar, breweries, etc. Steel output in 1959 was 6,502,566 metric tons.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 261 State grammar and high schools. In addition there are 83 elementary schools under the control of the State and 296 under the control of local government authorities. There are 1,037 private colleges and secondary schools. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are independent institutions. After considerable opposition, Ghent University was in 1930 turned into a purely Flemish institution.

LANGUAGE AND LITERATURE.—Flemish is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainault, Namur, Luxemburg, Liège and the southern half of Brabant. The town of Brussels is bilingual. The official languages are both Flemish and French, and also German in the districts acquired after the 1914–18 war. The literature of France and the Netherlands is supplemented by a current of indigenous Belgian literary activity, in both French and Flemish. Maurice Maeterlinck (1862–1949) was awarded the Nobel Prize for Literature in 1911. Louvain library, which ranked among the great libraries of the world, was destroyed by German invaders in the war of 1914–18; reconstructed, mainly by American funds, after peace was declared, it was again destroyed in May, 1940, by German invaders. There are about 58 daily newspapers (French, Flemish and some German) in Belgium.

FINANCE.

	Francs
Revenue (1960) Ordinary Budget estimate)	110,604,000,000
Expenditure (1960 Ordinary Budget estimate)	110,604,000,000
Extraordinary Expenditure (1960 Extraordinary Budget estimate)	24,990,000,000
Debt (March 31, 1960)	381,851,000,000

The unit of currency is the Belgian *franc*. On July 1, 1960, the Bank of England official rate of exchange was 140 *francs* = £1. (*See also* p. 84.)

TRADE.

	1958	1959
Total Imports	*Fr.* 156,447,237,000	*Fr.* 172,090,197,000
Total Exports	152,285,980,000	164,757,344,000

	1958	1959
Imports from U.K.	£59,314,607	£61,060,319
Exports to U.K.	60,154,156	57,538,973

COMMUNICATIONS.—On Dec. 31, 1959, there were 4,713 kilometres of normal gauge railways operated by the Belgian National Railways, of which 887 kilometres were electrified; the length of

light railways operated in 1959 was 1,234 kilometres (of which 874 were electrified). Belgian National Railways also operate 9,325 kilometres of regular bus routes. On Dec. 31, 1959, there were 741,042 telephone subscribers in Belgium.

Ship canals include *Ghent-Terneuzen* (18 miles, of which half is in Belgium and half in the Netherlands; constructed 1825–27) which, under the terms of an agreement recently signed by the Belgian and Netherlands Governments is to be improved to permit the passage to Ghent of ships up to 50,000 tons; *Roupel* (20 miles, by which ships drawing 18 ft. reach Brussels from the sea; opened in 1922); and *Bruges* (from Zeebrugge on the North Sea to Bruges, 6¼ miles; opened in 1922). The *Albert Canal* (79 miles), which figured prominently in the fighting (Sept. 1944), for the relief of Belgium and the Netherlands and for the invasion of Germany, links Liège with Antwerp; it was completed in 1939 at the cost of £13,500,000, and accommodates barges up to 1,350 tons. Plans for the expansion and modernization of the port of Antwerp were announced in June, 1956. The estimated cost of the project is £36,000,000, of which the State will contribute £31,000,000, and work is expected to be complete by 1963. Inland waterway approaches to Antwerp are also to be improved. The river Meuse from the Dutch to the French frontiers, the river Sambre between Namur and Monceau, the river Scheldt from Antwerp-Ghent and the Brussels–Charleroi Canal will be widened or deepened to take barges up to 1,350 tons. These improvements are expected to be completed in 1966 and to cost £78,500,000. There are 10,046 kilometres of State roads and 1,309 kilometres of provincial roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (1959) of 98 vessels (629,052 tons), in addition to which there are 451 fishing boats (28,207 tons).

The Belgian National Airline operates regular services between Brussels and London, Manchester and many continental centres, as well as overseas services to the United States, the Congo and the U.S.S.R. A passenger and mail-carrying helicopter service, the first of its kind in the world, was inaugurated in 1953. Many foreign air-lines call at Brussels.

Cities and Towns.

The Capital, BRUSSELS, had a population (Dec. 31, 1959) of 1,003,937 (with suburbs). Other towns are ΨAntwerp, the chief port (632,771); ΨGhent (230,240), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; Liège (451,232), the centre of the iron industry, and Charleroi (284,402), the important coal-mining and metallurgical centre; Mechlin or Malines (64,015); ΨOstend (55,446); ΨBruges (52,465). Brussels is 224 miles from London; transit, by rail and sea, 8 hrs.; by air, 1 hr.

NATIONAL FLAG: 3 vertical bands, black, yellow, red.

BELGIAN TRUSTEE TERRITORY

Ruanda and Urandi (Mandated July, 1919, now a Belgian Trust Territory), formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of Uganda and have an area of about 20,540 square miles, with a total native population (1957) of 4,630,089, 7,257 Europeans and 2,856 Asiastics. The territories lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The chief crop is coffee, which forms one of the territories' most important exports. Other exports are livestock and hides derived from the large herds maintained by the African population. The administrative capitals are Nianza (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urandi). There are 4,870 miles of roads and no railways.

The Resident-General announced on Aug. 5, 1960, that the Territory would become autonomous in 1961 and would achieve independence shortly afterwards.

BHUTAN

Bhutan (area, about 18,000 sq. miles; pop. about 700,000, mainly Buddhists) is an independent State bounded on the North and East by Tibet, on the South by India, and on the West by Sikkim, which is now a Protectorate of the Republic of India. In 1949, a treaty was concluded with the Government of India under which the Kingdom of Bhutan agreed to be guided by the Government of India in regard to its external relations, but it still retains complete independence, issues its own passports and has diplomatic representatives in Tibet as well as in India. It also receives from the Government of India an annual payment of about £35,000 as compensation for portions of its territory annexed by the British Government in India in 1864. The principal cottage industries are weaving, metal works and crafts, and the main exports are timber, rice and wheat. The present Ruler is Maharaja Jigme Dorji Wangchuk who was born in 1929 and succeeded his father in March, 1952. The Government of India has a diplomatic representative whose headquarters are situated at Gangtok, capital of the neighbouring State of Sikkim.

106 Eaton Square, S.W.1
[Sloane: 3231.]

Ambassador, Sr. Don Manuel Barrau Pelaez (1959).
Chargé d'Affaires, Sr. Jorge H. Sanchez Peña.
Consulate, 106 Eccleston Mews, S.W.1.
Consul-General, Señor Jorge H. Sanchez Peña.

There are Bolivian Consular Offices in *Liverpool, Birmingham, Hull, Cardiff* and *Glasgow*.

The Republic of Bolivia extends between lat. 10° and 23° S. and long. 57° 30′ and 69° 45′ W., and its area is estimated at 415,000 square miles with an estimated population (1960) of 3,462,002. The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830).

The executive power is vested in a President elected for 4 years by direct popular vote. A President is incligible for re-election for a further term until 4 years have elapsed after a former term has ended. A Vice-President is elected for four years and is ineligible for re-election either as President or Vice-President. In May, 1951, a military *coup d'état* took place and a *junta* of senior officers was formed under the leadership of General Ballivian. In April, 1952, after three days of heavy fighting, the National Revolutionary Movement took over the government of the country.

The National Congress consists of a Senate of 18 members elected for 6 years, with one-third renewable every two years and a Chamber of Deputies of 68 members elected for four years, one-half renewable every two years.

The chief topographical feature is the great central plateau (65,000 square miles) over 500 miles in length, at an average altitude of 12,500 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu, Illimani, and Sajama, three of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamore, and Madre de Dios.

Mining, petroleum and agriculture are the principal industries. The ancient silver mines of Potosi are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after those of Malaya and Indonesia, the largest in the world, 24,193 metric tons being exported in 1959: copper, antimony, lead, zinc, asbestos, wolfram, bismuth, salt and sulphur are also found, and petroleum is being produced in growing quantities. The Republic has been self-supporting in most petroleum products since January, 1954, and crude petroleum exports in 1959 to neighbouring countries, mainly Argentina, were valued at $U.S. 3,000,000. Its agricultural produce consists chiefly of rice, barley, oats, sugar-cane, maize, cotton, indigo, rubber, cacao, potatoes, cinchona bark, medicinal herbs, brazil nuts, &c. Manufactures are in a very undeveloped state, but the Government plans to encourage their development under a policy of "diversification of the economy". There are 1,454 miles of railways in operation. New lines are under construction from Corumbá to Santa Cruz (405 miles) and from Yacuiba to Santa Cruz (312), both of which are virtually completed. Work on a third new line, from Cochabamba to Santa Cruz, was suspended some years ago. Another railway project from La Paz to Coroico is partially completed. There are about 10,950 miles of telegraphs, and wireless services between Riberalta, La Paz, Cobija, Capitandi (Chaco). There is direct railway communication to the sea at Antofagasta (32 hours), Arica (10 hours), and Mollendo (2 days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosi, and from Potosi to Sucre, the legal capital. The principal railway line is the Antofagasta and Bolivia railroad (749 miles), which is British owned. Communication with Peru is effected by rail to Guaqui and thence by steamer across Lake Titicaca to the railroad at Puno.

Commercial Aviation in Bolivia is conducted by Pan American-Grace Airways and Braniff International Airways (American) and Lloyd Aereo Boliviano (Bolivian), the two former providing international connections with U.S.A., West coast South American countries, Canal Zone, Brazil and Argentina; Lloyd Aereo Boliviano, attending to local flights, links La Paz with Oruro, Cochabamba, Santa Cruz and Trinidad, &c., and connects with LAN of Chile, Argentine Airlines and Cruzeiro do Sul of Brazil. There is a new line from La Paz to Asuncion and Buenos Aires, also operated by Lloyd Aereo Boliviano.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879–1882. The Peace Army amounts to about 5,000 all ranks, the War Effective being about 105,000.

Language and Literature.—The official language of the country is Spanish, but the Indian inhabitants (about two-thirds of the population) speak either Quechua or Aymará, the two races being more or less equal in numbers.

The Roman Catholic religion is established and subsidized. Elementary education is compulsory and free and there are secondary schools in urban centres. The high percentage of illiterates is yielding to modern methods; all illiterates under 21 are nominally compelled to attend school. Provision is also made for higher education; in addition to St. Francisco Xavier's University at Sucre, founded in 1624, there are seven other universities, the largest being the University of San Andres at La Paz. Bolivian literature has not yet produced authors of world-wide renown. There are seven principal daily newspapers in Bolivia, with an estimated daily circulation of 80,000–100,000.

FINANCE.

The 1960 figures for estimated revenue and expenditure are *Bs.* 414,620,677,800 and *Bs.* 425,458,105,732 respectively.

On December 15, 1956, a number of decrees were issued to introduce a programme to stabilise the currency, in support of which the International Monetary Fund and the U.S. Government provided a fund of U.S. $25,000,000. Artificial rates of exchange, import licensing and price subsidies and controls were abolished. The *Boliviano* was made freely convertible for all purposes without restriction. After this policy was introduced, the rate was *Bs.* 7·500=U.S. $1, and by October, 1958, it had fallen to *Bs.* 11,865=U.S. $1, at which rate it remained in July, 1960. (*See also* p. 84).

TRADE WITH U.K.

	1958	1959
Imports from U.K.	£1,171,903	£878,334
Exports to U.K...	13,259,265	13,631,749

The principal exports are tin (almost all of which is exported to the U.K.), lead and antimony ores, silver, copper, wolfram, zinc, gold, nuts, hides and skins, vicuña wool and coffee; Bolivia also ranks as the second rubber-exporting country in South America after Brazil. The chief imports are wheat and flour, sugar, iron and steel products, machinery, vehicles and textiles.

SEAT OF GOVERNMENT, La Paz. Population (estimated 1960) 347,394. Other large centres are Cochabamba (90,037), Oruro (81,553), Santa Cruz (66,548), Sucre, the legal capital and seat of the judiciary (60,092), Potosí (53,528), and Tarija (20,127).

FLAG: Three horizontal bands; Red, yellow, green.

BRITISH EMBASSY.

(2732, 2740 and 2754 Avenida Arce, La Paz.)

British Ambassador, His Excellency Leonard Gibson Holliday, C.M.G. (1960) £3,800
1st Secretary and Consul, M. A. Wenner.
Air Attaché, Group Capt. J. M. Morgan, D.F.C. (*resident in Lima, Peru*).
2nd Secretary (*Commercial*), D. G. Allen.
Archivist and Vice-Consul, Miss E. G. Le Fresne.

BRITISH CONSULAR OFFICES.

There are British Consular Offices at *La Paz*, *Cochabamba* and *Santa Cruz*.

BRAZIL

(República dos Estados Unidos do Brasil.)

President, Dr. Juscelino Kubitschek, G.C.M.G., G.B.E. (*assumed office* Jan. 31, 1956).
Vice-President, Sr. João Belchior Marques Goulart.

MINISTRY

Foreign Affairs, Sr. Horacio Lafer.
Justice and Interior, Dr. Armando Falcão.
Labour, Industry and Commerce, Sr. Batista Ramos.
Transport and Public Works, Admiral Amaral Peixoto.
Finance, Dr. Paes de Almeida.
Agriculture, Sr. Carvalho Barros Carvalho.
Education, Sr. Pedro Penido.
War, Marshal Odylio Denys.
Marine, Admiral do Paço Mattoso Maia.
Air, Air Marshal Francisco Assis Correa de Mello.
Health (vacant).

BRAZILIAN EMBASSY IN LONDON.

54 Mount Street, W.1.
[Mayfair: 0155]

Ambassador, His Excellency Sr. Francisco de Assis Chateaubriand Bandeira de Mello (1957).
Minister-Counsellor, Senhor A. B. L. Castello Branco.
Minister for Economic Affairs, Sr. Paula de T. F. Nonato da Silva.
Naval and Military Attaché, Capt. Luiz Gonzaga Doring.
Air Attaché, Col. Alcides Moitinho Neiva.
Assistant Air Attaché, Lt.-Col. José Paulo Pereira Pinto.
First Secretaries, Sr. Lauro Müller Neto; Sr. Jatyr de Almeida Rodrigues.
Second Secretary, Sr. Braulino Botelho Barbosa.
Third Secretary, Sr. Rodrigo Amaro de Azeredo Coutinho.
Commercial Attaché, Sr. Antonio Marinho.

CONSULATE-GENERAL IN LONDON.

Consul-General, Sr. Hygas Chagas Pereira.
Consuls, Senhora Maria de Lourdes Castro Silva de Vincenzi; Sra. Maria José Monteiro de Carvalho.

There are also Brazilian Consular offices at *Liverpool*, *Newcastle-on-Tyne*, *Southampton*, *Cardiff* and *Glasgow*.

POSITION AND EXTENT.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. Brazil extends between lat. 5° 16′ N. and 33° 45′ S. and long. 34° 45′ and 73° 59′ 22″ W., being 2,685 miles from north to south, and 2,690 from west to east, with a coast-line on the Atlantic of 4,604 miles. The Republic comprises an area of 3,289,440 square miles with a population (estimated July, 1958) of 63,101,627.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. The principal ranges are *Serra do Mar* in São Paulo; the *Serra Geral* (Caparao 9,393 feet) between Minas Gerais and Espirito Santo, the *Serra do Mantiqueira* (Itatiaia, 9,163 feet), and the *Serra do Espinhaco* (Itacolumi, 5,748 feet), in the south-east of Minas Gerais; the *Serra do Paranán*, between Goiaz and Minas Gerais, the *Serra dos Aymores*, which divide Espirito Santo from Minas Gerais; and the *Serra do Gurgueia*, *Branca* and *Araripe*, which envelop Piauí.

Brazil is unequalled for its rivers. The River *Amazon* has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the *Rio Branco*, *Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajos*, while the *Xingu* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaya* flow northwards from the Plateau of Matto Grosso and the mountains of Goias to the Gulf of Pará. The *Parnaiba* flows from the encircling mountains of Piauí into the Atlantic. The *São Francisco* rises in the South of Minas Gerais and traverses Bahia on its way to the eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Matto Grosso, flows through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the *Iguassu*, which unites with the Upper Parana at the Brazil-Argentine-Paraguay boundary, are the majestic *Falls of the Iguassu* (200 ft.), and on the *São Francisco* are the no less famous falls of *Paulo Affonso* (260 ft.).

GOVERNMENT.—Brazil was colonized by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal. On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. Constitutional Government, under the Constitution of 1891, was suspended after the revolution of 1930. Dr. Getulio Vargas, who had been Chief of the Provisional Government since 1930, was elected President and assumed office on July 20, 1934. By a *coup d'état* of Nov. 10, 1937, he closed Congress, abolished the old political parties and issued a new Constitution. On Sept. 18, 1946, the *Estado Novo* established by Vargas was superseded by a new constitution, limiting the Presidential term to 5 years (in place of 7) and restoring a Congress of two chambers. In October, 1955, elections took place in which Dr. Juscelino Kubitschek was elected the new President.

PRODUCTION.—There are large and valuable mineral deposits including among others, iron ore (hematite), manganese, bauxite, beryllium, chrome,

nickel, tungsten, cassiterite, lead, gold, monazite (containing rare earths and thorium) and zirconium. Diamonds and precious and semi-precious stones are also found. The mineral wealth is still exploited to only a very limited extent. Production is increasing, but is capable of great further development. The iron ore deposits are particularly rich. The estimated production of iron ore in 1959 was 6,000,000 metric tons. Oil production in 1959 was estimated at 23,590,000 barrels. Coal production in 1959 was estimated at 2,200,000 metric tons. 1,359,527 metric tons of steel ingots were produced in 1958 and 54,369,000 barrels of refined petroleum products in 1959.

Foreign investments without exchange cover totalled U.S.$465,827,000 in 1959. These investments were in a variety of industries, although the vast majority went into the automobile industry, especially for the manufacture of components. The chemical and pharmaceutical industry was next in importance. Other products now being manufactured in Brazil include trolley buses, diesel engines, powered milk, electrolytic tin, calculating machines and travelling cranes.

Brazil's agricultural and vegetable produce is abundant, coffee, cotton, maize, sugar, cocoa, rice, citrus fruits and bananas being the main agricultural products, and rubber, carnauba wax, maté, jute and other fibres being the main vegetable extracts. Timber is also important.

The main exports of agricultural produce in 1959 were:—

	Metric Tons	Value $U.S.
Coffee	1,046,173	733,040,000
Cotton	77,594	35,541,000
Cocoa	79,577	59,447,000

Coffee is grown mainly in the States of São Paulo and Paraná and to a lesser extent in Minas Gerais and Espirito Santo.

DEFENCE.—The peace-time strength of the Army is 100,000, with an immediate reserve of 250,000. The Navy consists of 1 aircraft carrier, 2 cruisers, 19 destroyers and escorts, 11 corvettes, 3 submarines, 15 submarine chasers, 1 sail training ship, 3 ocean-going tugs, 3 survey vessels, 2 river monitors and various auxiliaries. The strength of the Navy is about 25,000 all ranks. The Air Force is the largest in South America, with 650 aircraft and a strength of 35,000 all ranks.

EDUCATION.—*Primary* education is carried out by State governments and municipalities and private initiative, in some cases with a Federal subsidy. In 1958 there were 82,953 primary schools (not including kindergartens) with an enrolment at the beginning of the school year (March) of 5,775,000 pupils. There were 182,602 teachers in the primary schools.

Secondary education is carried out by the Federal Government, State and Municipal Governments and by private schools. In 1959, there were 3,435 schools and 794,690 pupils. Other establishments classified at an intermediate level are: 1,256 commercial schools with an enrolment of 171,994 pupils; 1,149 normal schools with 81,526 scholars; 420 industrial training schools with 22,312 pupils; 88 agricultural schools with 5,679 students.

A total of 89,586 students attended 20 Federal and State Universities and other establishments offering courses at a university level in 1959. There were 544 faculties in all the universities of Brazil, and also 502 isolated faculties. Of this total (1,046), there were 331 federal, 138 State, 23 municipal and 554 private faculties.

LANGUAGE AND LITERATURE.—Portuguese is the language of the country, but Italian, Spanish, German, Japanese and Arabic are spoken by immigrant minorities, and newspapers of considerable circulation are produced in those languages. English and French are currently spoken by educated Brazilians.

Until the second quarter of the nineteenth century Brazilian literature was dominated by Portugal. French influence is traceable for the next half century, since when a national school has come into existence and there are many modern authors of high standing. Public libraries have been established in urban centres and there is a flourishing national press with widely circulated daily and weekly newspapers; 25 daily newspapers are published at Rio de Janeiro.

COMMUNICATIONS.—In 1958 there were about 38,000 kilometres of railways in service, largely of 1 metre gauge, but including some 4,000 kilometres of other gauges. Traffic carried in 1958 was—Passengers 381,703,000, Freight 43,818,000 tons, Livestock 5,020,000 head. During 1959 the ports of Rio de Janeiro and Santos together were used by 8,419 vessels representing 25,352,000 registered tons.

Nine foreign airlines, Air France, B.O.A.C., SAS, KLM, Aerolinas Argentinas, Swissair, Iberia, Alitalia and Lufthansa (in addition to Panir do Brasil) operate services between Brazil and Europe. Pan American World Airways, Braniff, Varig and Real Aerovias Brazil operate services between Brazil and U.S.A., and there are connections with all Latin American countries. Eight major domestic airlines, as well as the Brazilian Air Force, maintain services throughout the country. During 1959 the airports of Rio de Janeiro and São Paulo alone recorded 165,719 aircraft arrivals and departures resulting in a movement of 3,006,736 passengers and 65,606 tons of cargo.

Postal facilities in Brazil include approximately 5,750 post offices and 50,000 miles of telegraph. In 1958, 874,000 telephones were in use, of which a large proportion are dial operated.

FINANCE.

	1959 (millions of Cruzeiros)	1960* (millions of Cruzeiros)
Revenue.....	*Cr.*157,827,000	*Cr.*179,694,000
Expenditure...	*Cr.*183,913,000	*Cr.*194,528,000

*Estimated

The total external debt of Brazil on December 31, 1959, was $U.S.2,250,052,000. Internal debt, December 31, 1957, amounted to: Union *Cr.* 10,700,000,000; States, *Cr.*37,000,000,000.

The unit of currency is the *Cruzeiro* of 100 *Centavos*. The average for the year 1959 of the official selling rates of the Bank of Brazil was *Crs.* 52·792 = £1. *Crs.* 18·92 = $U.S. 1. The free exchange market for the year 1959 gave an average of *Cr.*434·56 = £1 and *Cr.*159·83 = $U.S.1.

TRADE (1959)

Total Imports..... $U.S.1,374,473,271*
Total Exports..... $U.S.1,281,968,543*

*Converted at official exchange rate.

	1958	1959
Imports from U.K...	£19,149,420	£13,090,253
Exports to U.K.....	26,705,550	37,254,087

The principal imports are fuel oils, machinery, wheat, chemicals, industrial raw materials and newsprint. The principal exports are coffee (over 70 per cent. of the total value of exports), cocoa, timber, iron ore, sugar, fruit, tobacco, wax, hides and skins and fibre.

CAPITAL.—Brasília (inaugurated on April 21, 1960). No accurate figure exists for the population of the new capital, the construction of which remains to be completed. Other important centres are the former capital ΨRio de Janeiro, with a population (est. 1957 of 2,940,045); São Paulo 3,149,504; ΨSalvador (Bahia), 532,619; ΨRecife (Pernambuco), 703,726; ΨBelém (Pará), 260,608; ΨBelo Horizonte (Minas Gerais), 501,428; ΨFortaleza (Ceará), 280,084; ΨNiterol (Rio de Janeiro), 221,628; Curitiba (Paraná), 231,628; ΨPorto Alegre (Rio Grande do Sul), 512,915; Santos (São Paulo), 253,629.

FLAG: Green, with yellow lozenge in centre; blue sphere with white band and stars in centre of lozenge.

LEGATION IN LONDON.

12 Queen's Gate Gardens, S.W.7.
[Knightsbridge: 9400]

Minister, His Excellency Georgi Petrov Zenguilekov (1958).

The Republic of Bulgaria is bounded on the north by Roumania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is approximately 43,000 square miles, with a population (Dec., 1956) of 7,629,254. The prevailing religion of the Bulgarians is the Eastern Orthodox Church (83 per cent.); Moslems (Turks and Pomaks) (14 per cent.) and various others (3 per cent.). For secular purposes the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912–13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobrudja to Roumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

Nazi troops entered the country on March 3, 1941, and occupied Black Sea ports, but Bulgaria was not officially at war with the Soviet Union. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and delegates to Cairo sought terms of peace from Great Britain and the United States. The Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. 10. The armistice with the Allies was signed in Moscow, Oct. 28. On Sept. 9 a *coup d'état* gave power to the Fatherland Front, a coalition of Communists, Agrarians, Social Democrats and Republican officers and intellectuals. In August, 1945, the main body of Agrarians and Social Democrats left the Government. The Peace Treaty with Bulgaria was signed on Feb. 22, 1947, and came into force on Sept. 15, 1947. It recognized the return of Southern Dobrudja to Bulgaria.

GOVERNMENT.—On Sept. 8, 1946, a referendum was held, at which, according to the published

results, an overwhelming majority declared for the abolition of the Monarchy and the setting up of a Republic. On Oct. 27, a general election to a Grand National Assembly (with power to make a constitution) was held; the Opposition won 101 seats out of 465. According to the new Constitution the legislature is a single chamber National Assembly or *Subranie* elected by adult suffrage on the basis of one deputy to every 30,000 inhabitants for a maximum term of four years. The opposition Agrarian Party was suppressed on Aug. 24, 1947, following the pronouncement of the death sentence on its leader, Nikola Petkov. The opposition newspapers ceased to appear after April, 1947. Nine opposition Social Democrats continued to sit in the National Assembly until they were placed under restraint in July, 1948. The Government Social Democratic Party fused with the Workers' (Communist) Party on Aug. 11, 1948.

Bulgaria linked herself to the other countries of Eastern Europe by a series of treaties of friendship, collaboration and mutual aid, the first of which was signed with Yugoslavia on November 27, 1947. This was followed by similar treaties with Roumania (January 16, 1948), the Soviet Union (March 18), Czechoslovakia (April 26), Poland (May 30) and Hungary (July 6). The treaty with Yugoslavia was abrogated in 1949.

PRODUCTION.—Bulgaria is essentially an agricultural country, but is engaged upon an elaborate programme of industrialization. Some 90 per cent. of the country's agriculture has been collectivized, and a much smaller proportion mechanized. The principal crops are wheat, maize, beet, tomatoes, tobacco, oleaginous seeds, fruit, vegetables and cotton. Several of the basic crops were adversely affected by bad weather in 1956, and Bulgaria has continued to import considerable quantities of wheat from the U.S.S.R. The live-stock includes sheep, goats, cattle, pigs, horses, asses, mules and water buffaloes.

In 1959 electricity generating capacity totalled 3,869 million kWh., compared with 3,024 million kWh. in 1957. Much of this increase is from hydro-electric stations. The considerable progress which has been made in the exploitation of Bulgaria's mineral resources, is shown by the following production figures:—

	Production 1959	Percentage increase over 1958
Coal	15,341,000	28
Lead	126,000	26
Zinc	110,000	10
Copper concentrate	137,000	37
Pig Iron	117,000	46
Steel	230,000	9

There are other mineral deposits of varying importance, but no production figures are available. There are also a number of thermal and mineral springs, several of which have been modernized. Bulgaria's newly acquired heavy industry includes an iron and steel works which inaugurated its first blast furnace in 1957, a nitrogenous fertilizer plant and other chemical works.

DEFENCE.—Under the Peace Treaty signed between Bulgaria and the Allies, the Bulgarian Army is limited to 55,000 men, but it is believed at present to be at least 200,000 strong.

EDUCATION.—Free basic education is compulsory for children from 7 to 15 years inclusive. The Bulgarian educational system was reorganized on Soviet lines in September, 1950, and in 1956 there were 6,803 general education and evening schools, 359 gymnasia (general) for day and evening classes, and 506 gymnasia for technical schools; with 1,129,000 students and schoolchildren and 47,013 teachers.

There are 20 universities (known as Higher Educational Establishments and including universities proper and Academies of Music, Science, etc.), including those of Sofia, Plovdiv and Varna. In 1959 there were stated to be 42,900 students at Bulgarian universities.

LANGUAGE AND LITERATURE.—Bulgarian is a Southern Slavonic tongue, closely allied to Russian (*see* U.S.S.R.) with local admixtures of modern Greek, Albanian and Turkish words. There is a modern literature, chiefly educational and popular. The alphabet is Cyrillic, as in Russia. In 1958 there were 6 daily newspapers in Sofia.

FINANCE.	1960 *leva*
Budget revenue (estimated)	31,247,278,000
Budget expenditure (estimated)	30,926,913,000

TRADE.

The principal imports are wool, industrial and agricultural machinery, metals, tools, chemicals, dyestuffs, drugs, rubber, paper. The principal exports are cereals, tobacco, fruit, vegetables, oil seeds, oils, fats, textiles, eggs, chemicals, essential oils including attar of roses, hardwoods, non-ferrous metals, and livestock. Approximately 50 per cent. of Bulgaria's foreign trade is with the U.S.S.R., and this was planned to increase substantially in 1957. In 1955 trade with the Soviet bloc represented some 88 per cent of all Bulgarian trade.

Trade with U.K., 1959.—Imports, £1,903,942; Exports to U.K., £1,580,975.

CAPITAL, Sofia. Pop. (1956), 725,756, at the foot of the Vitosha Range, the capital and commercial centre, is on the main railway line to Istanbul, 338 miles from the Black Sea port of ΨVarna (119,769) and 125 miles from Lom (23,015), on the Danube; ΨBurgas (72,795) is also a Black Sea Port, those on the Danube being ΨRusé (83,472), ΨSvishtov (18,537), ΨVidin (23,984). Other important trading and industrial centres are Plovdiv (162,518) and Pleven (57,758).

FLAG: 3 horizontal bands, white, green, red.

BURMA

(Republic of the Union of Burma.)

President (from March 13, 1957), U Win Maung.
Prime Minister and Minister of Defence, Home Affairs, Information, Local Administrations and Relief and Resettlement, U Nu (April 4, 1960).

BURMESE EMBASSY IN LONDON
19A Charles St., Berkeley Square, W.1.

Ambassador, His Excellency U Aung Soe (1957).

Area and Population.—Burma forms the western portion of the Indo-Chinese district of the continent of Asia, lying between 9° 58′ and 28° N. latitude and 92° 11′ and 101° 9′ E. longitude, with an extreme length of approximately 1,200 miles and an extreme width of 575 miles. In the north the frontier with Tibet and China has not yet been demarcated, but in March, 1960, an agreement with China laid down certain general principles and set up a joint commission to decide on demarcation; the north-west frontier touches Pakistan and the

Republic of India; the Bay of Bengal forms the western frontier and on the north-east and east Burma marches with the Chinese province of Yunnan, Laos and Thailand. The area of the Union includes Burma proper with the Chin and Kachin Hills (192,158 sq. miles), the Shan State (57,816 sq. miles) and the Kayah State (4,519 sq. miles) making a total of 254,493 sq. miles. The population of the Union is probably about 19,000,000 showing an estimated density of 75 persons to the square mile.

Physical Features.—Burma falls into four natural divisions, Arakan (with the Chin Hills region), the Irrawaddy basin, the old Province of Tenasserim, including the Salween basin and extending southwards to the Burma-Siam peninsula, and the elevated plateau on the east made up of the Shan States. Mountains enclose Burma on three sides, the highest point being Hka-kabo Razi (19,296 ft.) in the northern Kachin hills. Mt. Popa, 4,981 ft., in the Myingyan district is an extinct volcano and a well-known landmark in Central Burma. The principal river systems are the Kaladan-Lemro in Arakan, the Irrawaddy-Chindwin and the Sittang in Central Burma, and the Salween which flows through the Shan Plateau.

Races, Language and Religions.—The indigenous inhabitants who entered Burma from the north and east are of similar racial types and speak languages of the Tibeto-Burman, Mon-Khmer and Tai groups. The three important non-indigenous elements are Indians and Pakistanis (about 800,000), Chinese (about 300,000), with Europeans and Anglo-Burmans numbering in all about 10,000. Burmese, Shan, Karen, Kachin and Chin are the chief languages. Buddhism is the religion of 85 per cent. of the people, with 5 per cent. Animists, 4 per cent. Moslems, 4 per cent. Hindus and rather less than 3 per cent. Christians.

Government.—Burma formed part of British India until April 1, 1937, when it became a separate territory with a considerable measure of self-government. The country was invaded by the Japanese in December, 1941, and until October, 1945, the Civil Government functioned in India.

The Treaty which made Burma an independent State outside the British Commonwealth was signed in London on Oct. 17, 1947, and came into force on Jan. 4, 1948. For the first three years of its existence the Republic was torn by insurrection, mutiny and disorder. By 1951 the Union Government had recovered control of most of the country, though Papun, the capital of the Karen rebels, was not recovered till 1955.

The first general election under the new Constitution, during 1951, resulted in the return to power of the "Anti-Fascist People's Freedom League." At the second general election in April, 1956, the A.F.P.F.L. was returned with a reduced majority (171 out of 250 seats). In April, 1958, U Nu quarrelled with his principal supporters and in September invited General Ne Win and a caretaker Government to take office. In February, 1959, this arrangement was prolonged for another year. Elections were held in February, 1960, resulting in overwhelming victory for the "Clean" faction of the A.F.P.F.L. led by U Nu, now renamed the Union Party. U Nu's Government took office on April 4, 1960.

Defence.—Burma has an army of fair strength and quality, but the navy and air force are small. The British Services Mission was withdrawn in 1954.

Education.—The literacy rate is high compared with other Asiatic countries, there is no caste system and women engage freely in social intercourse and play an important part in agriculture. The University of Rangoon was founded in 1920 with a Medical College, an Engineering College and a Teachers' Training College attached. The Intermediate College at Mandalay was granted full university status in 1958; there are also intermediate colleges at Moulmein, Bassein, Magwe, and Kyaukpyu (in Arakan). Good progress is being made in re-organization and extension of the educational system. An important feature of this programme is a "Mass Education" scheme aimed at the adult population of the rural areas.

Finance.—The chief sources of revenue are profits on state trading, income-tax, customs duties, commercial taxes and excise duties; the chief heads of expenditure are general administration, defence, education, police and development. The budget estimates for 1959–60 were (in terms of sterling): receipts £98,455,000; expenditure £98,598,000.

Production, Industry and Commerce.—Two-thirds of the population depend on agriculture; the chief products are rice, oilseeds (sesamum and groundnut), maize, millet, cotton, beans, wheat and grain. Rice is the mainstay of Burma's economy; before the war Burma was the world's largest exporter of rice, her total production of over 7,000,000 tons a year being derived from 12,000,000 acres or 70 per cent. of the country's total cropped area. The pre-war yearly average of rice exports was over 3,000,000 tons. In 1958 exports were 1,481,000 tons. The net area sown to all crops in 1956–57 was 15,100,000 acres. Reserved forests covered 22,200,000 acres in 1956; 1,360,000 acres were irrigated in 1955–56. The principal export after rice is teak of which some 200,000 tons were exported annually before the war. The 1958 figure was 61,000 tons. Burma is rich in minerals including petroleum, lead, silver, tungsten, zinc, tin and gemstones. Of these, petroleum is the most important. Production in 1958 was 121,000,000 gallons. A refinery has been built at the main oilfield, Chauk, and the Syriam refinery near Rangoon partly rehabilitated. Their combined output of petroleum products is sufficient for most of Burma's needs. The main production of petroleum is handled by a joint venture between the Burma Oil Company and the Union Government.

Under the Government's development plan, a steel rolling mill, a jute bag and twine mill, a pharmaceutical plant, a large hydro-electric scheme and a sugar factory are in production.

TRADE WITH U.K.

	1958	1959
Imports from U.K.	£11,488,856	£14,518,919
Exports to U.K.	6,926,400	7,968,530

Burma joined the Colombo Plan in 1952 and is now receiving important assistance from member countries.

Communications.—The Irrawaddy and its chief tributary, the Chindwin, form important waterways, the main stream being navigable beyond Bhamo (900 miles from its mouth) and carrying much traffic.

Ψ The chief seaports are Rangoon, Moulmein, Akyab and Bassein.

The Burma Railways had a total length in 1940 of 2,300 miles, extending to Mytikyina, on the Upper Irrawaddy. The first diesel locomotives were introduced in 1958. There are about 5,472 miles of main roads. Since the war a considerable network of internal air services has come into being. The airport at Mingaladon, about 9 miles north of Rangoon, has been reconstructed and handles much international traffic.

Chief Towns.—The chief city of Lower Burma, and the seat of the government of the Union is Rangoon, on the left bank of the Rangoon river,

about 21 miles from the sea. The city contains the Shwe Dagon pagoda, much venerated by Burmese Buddhists. Population (1953), about 740,000. Mandalay, the chief city of Upper Burma had a population of (1953) 186,000, Moulmein one of 103,000 and Bassein 78,000. Pagan, on the Irrawaddy, S.W. of Mandalay, contains many sacred buildings of interest to antiquaries.

NATIONAL FLAG.

The Union flag is red, with a canton of blue bearing a large white five-pointed star surrounded by 5 smaller stars.

ROYAL CAMBODIAN EMBASSY IN LONDON

24, Phillimore Gardens, W.8.

[Western: 4354.]

Ambassador in London, His Excellency Au Chheun.
1st Secretary, Chea San.
3rd Secretary, Limhoeur Limtouch.
Attaché, Meas Sonn.

AREA AND POPULATION.—A kingdom with an area of some 70,000 square miles and a population of 5,000,000 (estimated), Cambodia is situated between Thailand to the west and South Vietnam to the east. It is bordered on the north and south respectively by Laos and the Gulf of Siam.

HISTORY.—Once a powerful kingdom, which, as the Khmer Empire, flourished between the tenth and fourteenth centuries, Cambodia became a French protectorate in 1863 and was granted independence within the French Union as an Associate State in 1949. Two years earlier Prince (then King) Norodom Sihanouk had promulgated a constitution providing for parliamentary government. The Geneva Conference of 1954 took Cambodia further along the road to independence by ensuring the withdrawal of French and Vietminh forces from the country, and the process was completed when, in January, 1955, Cambodia became financially and economically independent not only from France but also from Laos and Vietnam. The present Government is drawn from the Popular Socialist Community, a movement formed by Prince Norodom Sihanouk who abdicated from the throne in March, 1955, in favour of his parents, King Norodom Suramarit and Queen Kossamak. The community holds all 61 seats in the National Assembly as a result of the last general elections which were held in March, 1958. Following the death of King Norodom Suramarit in April, 1960, a Council of Regency was in being until June, when Prince Norodom Sihanouk assumed office as Head of State.

GEOGRAPHY, ECONOMY AND COMMUNICATIONS.—Cambodia is largely underdeveloped and underpopulated with an economy based on agriculture, fishing and forestry, the bulk of its people being rice-growing farmers living in the basins of the Mekong and Tonlé Sap rivers. In addition to rice, which is the staple crop, the major products are rubber, livestock, maize, timber, pepper, palm sugar, fresh and dried fish, kapok, beans, soya and tobacco. Rice and rubber are the main exports. Seventy-five per cent. of the total land area is virgin forest abounding in wild life of all kinds, including big game. The climate is tropical monsoon with a rainy season from May to October.

The country has some 4,000 kilometres of roads, of which about a third are hard-surfaced and passable in the rainy season. There is one railway which runs from Phnom-Penh to the Thai border, where it connects with the Thai railway system. Phnom-Penh is a river port capable of receiving ships of up to 2,500 tons all the year round. The main installations of a deep water port at Sihanoukville (Kompong Som) on the Gulf of Thailand have been completed and can receive ships up to 10,000 tons. The port is linked to Phnom-Penh by a modern highway. There is as yet no large-scale industry but various small industrial plants, including a textile mill, and cement, paper and plywood factories and a jute mill are scheduled for construction under the Five Year Plan (1960–64). Cambodia receives substantial foreign aid, notably from the U.S.A., China, France, the Soviet Union, the Colombo Plan countries and Japan. Since 1956, Cambodia has sought to increase her foreign trade by the conclusion of trade exchange and payments agreements with several countries, including China, Poland, Czechoslovakia, North Vietnam, Yugoslavia, the United Arab Republic, Laos and Japan.

The Cambodian airline, Royal Air Cambodge, operates services with Air Vietnam and Thai International between Phnom-Penh and Saigon and Bangkok, and with Cathay Pacific Airways between Phnom-Penh and Hong Kong. There are flights also to Siemreap where the famous ruins of Ankgor Wat are situated. Cargo boats from Singapore and Hong Kong visit Phnom-Penh regularly.

CULTURE AND EDUCATION. Cambodian culture is predominantly Indo-Siamese and is distinct from Annamite culture which is largely derived from China. The state religion is Buddhism of the "Little Vehicle". There are fairly large Chinese (300,000) and Vietnamese (400,000) minorities. The national language is Cambodian, although French is widely spoken and is still largely the official language of government and commerce. Considerable efforts are now being devoted to the development of education and new schools, colleges and technical institutes have been established. A Buddhist University has been inaugurated in Phnom-Penh, where there are also Faculties of Medicine and Law. A residential teachers' training college is now in operation.

The official rate of exchange in 1958–59 varied between 98 and 98½ *riels* = £1.

Trade with U.K.—Imports from U.K. in 1959 were valued at £267,814; exports to U.K., £9,684.

CAPITAL, Phnom-Penh. Population (estimated, 1958), 550,000.

BRITISH EMBASSY

(96 Boulevard Préah Bat Norodom, Phnom-Penh).

Ambassador Extraordinary and Plenipotentiary and Consul General, His Excellency Frederick Francis Garner, C.M.G. (1958) £3,000

2nd Secretaries, T. Empson (*Commercial*); D. F. Elliott (*Information*).

Vice-Consul, W. E. Watterson.

CAMEROON REPUBLIC

President, Ahmadou Ahidjo, *elected for 5 years*, May 5, 1960.

The Cameroon Republic lies on the Gulf of Guinea between Nigeria and the Central African Republic. It has an area of 143,415 sq. miles and a population estimated at 3,187,000. Principal products are cassava, bananas, millet, sorghum, ground-nuts and cocoa. Bananas and cocoa are the principal exports.

Formerly part of the German colony of Kamerun, the territory was administered by France from 1916 until 1959 as a trusteeship, latterly under the auspices of the United Nations Organization. Agreement regarding independence for the territory was reached between the Prime Minister of the Cameroons and the French Government in October, 1958, and from December of that year the Cameroonian Government assumed responsibility for all matters except defence, external relations and currency which were reserved to France. Cancellation of the French trusteeship on Jan. 1, 1960, was approved by the General Assembly of the United Nations and on that date the territory became independent under the name of the Cameroon Republic. A constitution for the new Republic, modelled on that of France, was approved at a referendum held on February 21, 1960.

CAPITAL.—Yaoundé (32,000). ΨDouala (119,000), is an important commercial centre.

Consul, Señor Don Santiago Rogers.

Consulate, 3 Hamilton Place, W.1.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from just north of Arica to Cape Horn south, between lat. 17° 15′ and 55° 59′ S., and long. 66° 30′ and 75° 48′ W. Extreme length of the country is about 2,800 miles, with an average breadth, north of 42°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a greater height. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of the pass where the international road from Chile to Argentina crosses the frontier, has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them is of much service as a navigable highway. In the north the country is arid.

Among the island possessions of Chile are the *Juan Fernandez group* (3 islands) about 360 miles distant from Valparaiso, where a wireless station has been erected. One of these islands is the reputed scene of Alexander Selkirk's (Robinson Crusoe) shipwreck. *Easter Island* (27° 8′ S. and 109° 28′ W.), about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been determined. The area of the island is about 45 sq. miles.

Chile is divided into 25 provinces and the total area of the Republic is estimated at 290,000 square miles, with an estimated population of 7,440,000 (April 1959). In 1929 Chile signed a treaty ceding the province of Tacna to Peru but retained the province of Arica in return for a payment to Peru of £1,200,000. Included in the total are four racial divisions: (*a*) Spanish settlers and their descendants; (*b*) indigenous Araucanian Indians, Fuegians, and Changos; (*c*) mixed Spanish Indians; and (*d*) European immigrants.

In 1958 the registered births per thousand inhabitants numbered 29·5; marriages 6·0; and deaths 10·1.

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1820, when a revolutionary war, culminating in the *Battle of Maipú* (April 5, 1818), achieved the independence of the nation. Under the present Constitution (Aug. 30, 1925), the President is elected by direct choice of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of 147 Deputies. There is universal suffrage for persons who have attained the age of 21, can read and write, and are on the electoral roll. Chilean women obtained equal voting rights with men on Dec. 21, 1948, before which they only participated in municipal elections.

PRODUCTION, &c.—Agriculture and mining are the principal occupations, though industrial development is being actively encouraged by the Government. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, hemp, chili-pepper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish in the central zone and fruit is an important export item. Excellent wines are produced and exported and are becoming more widely known in world

markets. There are large timber tracts in the central and southern zones of Chile, some types of which were exported to Europe and the Argentine, but high production costs have caused serious difficulties to this export trade. The mineral wealth is considerable, the country being particularly rich in copper-ore, iron-ore and nitrate. Uranium is also said to have been discovered in small quantities. The production of refined copper in 1959 was 512,506 metric tons. The rainless north is the scene of the only commercial production of nitrate of soda (Chile saltpetre) from natural sources in the world. Production in 1959 (including potassium nitrate) was 1,263,862 metric tons. Chile also produces iodine, manganese ore, coal, and a small quantity of gold. 1,999,397 metric tons of coal and 3,633,355 metric tons of iron ores were produced in 1958. The country has also large deposits of high grade sulphur, but mostly around high extinct volcanoes in the Andes Cordillera, difficult of access. Production of refined sulphur has hitherto been in relatively small quantities Annual production is between 45,000 and 50,000 metric tons. Oil was struck in Magallanes (Tierra del Fuego) in December, 1945, and the industry is now self-supporting. Production in 1959 was 1,021,989 cubic metres. An oleoduct 70 kilometres long now joins the principal field in Cerro Manantiales with Clarence Bay. The total production is now being refined at Concon, a few miles north of Valparaiso. A large steel plant was completed and started operation during 1950 at Huachipato, near Concepcion. In 1958–59 the output of steel billets from Huachipato totalled 385,951 metric tons; rolling mill products totalled 254,310 metric tons.

In recent years a considerable cotton and woollen textile industry has developed. Minor industries include tanning, flour milling, lumbering, distilling, fish canning and whaling, brewing, and the manufacture of starch, soap, biscuits, rope, glassware, plastic goods, pottery, paint, boots and shoes, hosiery, millinery, cheese, furniture, matches, brushes, cordage, paper and newsprint, radio receivers and valves, rubber products, synthetic detergents, motor vehicle tyres and cigarettes. Domestic industries include weaving and embroidery.

COMMUNICATIONS.—Most of the country's commerce is distributed along its lengthy sea-board in Chilean ships, which have a virtual monopoly of cabotage. Foreign trade continues to be carried on mostly by foreign steamship lines operating either directly to the West Coasts of North and South America, or *viâ* the Panama Canal to Europe or *viâ* the Straits of Magellan. Chilean vessels have also been participating for many years in foreign trade with North America and Europe. The Chilean mercantile marine in 1955 numbered 122 vessels of a total gross tonnage of 213,317. Under a new law promulgated in June, 1956, 50 per cent. of Chile's foreign trade must be carried by Chilean vessels.

The first railway was opened in 1851 and there are now 6,100 miles of track, of which 3,859 miles are State owned. A metre-gauge line runs from Pisagua to La Calera, just north of Santiago. From La Calera to Puerto Montt runs the wide-gauge (1·676 metre) main line of the State railways.

With the completion of a section of 435 miles from Corumba, Brazil, to Santa Cruz, Bolivia, the Trans-Continental Line will link the Chilean Pacific port of Arica with Rio de janeiro on the Atlantic. Another line from Antofagasta to Salta (Argentine) was opened in 1948. Further south, the Trans-Andine Railway connects Valparaiso on the Pacific with Buenos Aires, crossing the Andes at 11,500 ft.

Chile's road system is about 55,000 kilometres in length, but only an estimated 3,000 kilometres are first-class paved highways. At the end of 1959 there were registered 61,391 cars and taxis, 65,478 goods vehicles, 8,429 buses and 16,918 motor cycles and scooters.

The country had 183,363 telephone subscribers at the end of 1959. Telegrams are handled by 607 telegraph offices, mostly owned by the State.

DEFENCE.—Military service is compulsory, but not all those who are liable are required. Recruitment for the Navy is voluntary. In 1959 the Army had 6 infantry and 1 cavalry divisions with a total strength of 11,250 officers, 9,000 regular other ranks plus about 25,000 conscripts annually. In addition there is a police force of "Carabineros" of 1,400 officers and 16,000 men. The Air Force had 620 officers and 5,000 other ranks plus 500 conscripts with a strength of 180 aircraft. The Navy consisted of 2 cruisers, 4 destroyers, 3 frigates, 3 corvettes, 1 submarine depot ship, all operational. There is a logistic support force of 3 tankers and ancillary small craft. The strength of the Navy is 1,050 officers and 14,000 men, plus a Marine Force for coastal defence of 150 officers and 2,000 men.

EDUCATION is free, elementary education being compulsory since 1920; there were (in 1958) 26,042 pupils at infant schools, 752,275 at primary, and 164,019 at secondary schools. There are 8 Universities (3 in Santiago, 2 in Valparaiso, 1 in Antofagasta, 1 in Concepcion and 1 in Valdivia). The religion is Roman Catholic.

LANGUAGE AND LITERATURE.—Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Señorita Gabriela Mistral, for Chilean verse and prose. There are over 100 newspapers and a large number of periodicals, including some devoted to professional, scientific and social subjects.

	$U.S.23,071,781
Indirect	1,250,637,756
External Debt (Dec. 31, 1958):—	
Long Term:—	
Sterling	£14,831,628
U.S.	$91,586,000
Swiss Francs	*Fr.*74,280,100
Short Term:—	
Sterling	£400,021
U.S.	$835,809

Chile's official exchange rate registered with the International Monetary Fund is Ch. $1,049 = U.S. $1. The official rate of exchange in May, 1960, was about Ch. $2,950 = £1.

A new monetary unit, the *Escudo* (E°), equivalent to 1,000 *pesos*, was introduced on January 1, 1960. It is subdivided into *centésimos* and *milésimos*.

EXTERNAL TRADE.

	1958 *Gold Pesos*
Total imports	$2,012,295,000
Total exports	$1,885,826,000
Imports from U.K., 1959	£6,443,680
Exports to U.K., 1959	£26,252,900

Since 1949 the gold *peso* has been worth about 1*s.* 6*d.*

The principal exports are metallic and non-metallic minerals (refined copper, ingots and bars, nitrates, etc.), cereals, vegetables, fruit and wool. The principal imports are industrial oils, raw cotton, chemicals, machinery, tools, electrical and transport equipment and sugar.

CAPITAL, Santiago (December, 1956) 1,627,962 (Greater Santiago). Other large towns are:—ΨValparaíso (267,684), ΨConcepción (158,941), Temuco (109,141), Viña del Mar (107,563), Chillán (79,461), Talca (75,354), ΨAntofagasta (74,050), ΨValdivia (72,988), ΨTalcahuano (75,643), ΨIquique (47,906), ΨPunta Arenas (44,597). Punta Arenas, on the Straits of Magellan, is the southernmost city in the world.

FLAG: 2 horizontal bands, white, red; in top sixth a white star on blue square, next staff.

Deputy Prime Minister and Foreign Secretary, Gen. Chen Yi.

Deputy Prime Minister and Minister of Defence, Lin Piao.

LONDON OFFICE.

49 Portland Place, W.1.

Chargé d'Affaires, Huan Hsiang.

AREA AND POPULATION.—Estimates of population vary considerably. A census was carried out in June, 1953, and on Nov. 1, 1954, the National Bureau of Statistics, Peking, announced a final figure of 582,603,417 for the population of mainland China. 11,743,320 Chinese were estimated to be resident or studying abroad. The Bureau stated that 51·82 per cent. of the mainland population were males and 48·18 per cent. females; the birth rate averaged 37 per 1,000 and the death rate 17 per thousand. Distribution of the population by nationalities was:—

Chinese.....	547,283,057	Mongolians ..	1,462,956
Tibetans....	2,775,622	*Tribal peoples	20,824,421
Manchus....	2,418,931	Other	6,778,025

* Incl. many aboriginal or primitive tribes in remote western districts of Western China. The total area has been stated as approximately 4,300,000 sq. miles.

The population of China was estimated by the United Nations in 1959 at 640,000,000.

THE PROVINCES OF CHINA.

The National Bureau of Statistics, Peking, published in 1954 the results of the 1953 Census of Population. Populations of the Chinese provinces, including Tibet and Inner Mongolia, are shown below. The Provinces of Jehol and Sikang were abolished on July 19, 1955, their territories being divided up; those of Jehol among Hopei, Liaoning and the Inner Mongolian Region; those of Sikang being absorbed by Szechwan Province.

Population Census of 1953.

† These 4 Eastern Provinces constitute the "East China People's Government" set up by the Communist Central Government in January, 1950. This regional régime includes the large centres of Shanghai, Nanking, Tsingtao and Foochow.

‡ The population of Formosa was estimated at approximately 11,000,000 at the end of 1959.

§ These 3 Provinces constitute the "North-Western China People's Government."

§ Sinkiang (Chinese Turkestan) was converted into Sinkiang-Uigur Autonomous Region in July, 1955. Autonomous local governments were set up by the various nationalities in the area—Uigurs, Kazakhs, Tadjikhs, etc. Sinkiang is the largest province of China, about one-sixth of the whole area of the country. Some 80 per cent. of its population are Uigurs, of the Moslem religion.

GOVERNMENT.—On October 10, 1911, the party of reform forced the Imperial dynasty to a "voluntary" abdication, and a Republic was proclaimed at Wuchang.

Many years of internal dissension followed the establishment of the Republic, but in 1928 the *Kuomintang* (Nationalist Party) achieved supremacy and established a one-party government in Nanking which was accorded recognition by the Foreign Powers. After more than seven years of war with Japan (July 7, 1937, to Aug. 5, 1945), disputes arose between the Central Government and the Chinese Communists. There were hopes of a peaceful settlement in January, 1946, when, as a result of mediation by General George C. Marshall (then President Truman's special Envoy in China), an armistice was signed at Chungking and an all-party Consultative Conference was convened to resolve the disputed issues. These hopes of agreement were disappointed and hostilities broke out again.

On April 18, 1947, President Chiang Kai-shek attempted to unite the country by declaring one-party rule in China at an end and by announcing the formation of a new State Council to include representatives of the main political parties. The Communists declined to co-operate in the formation of this body and the Central Government's offer to reserve a number of seats for Communist representatives was later withdrawn.

A National Assembly was elected on Nov. 21, 1947, for six years. It had the power to elect and recall the President and Vice-President of the Republic, to amend the Constitution and to ratify amendments thereto proposed by the Legislative Yuan.

The year 1949 was marked by a rising tide of Communist successes. In January, 1949, Marshal Chiang Kai-shek resigned office as President and the authority of the Nationalist Government rapidly declined as province after province was occupied by Communist forces. The Nationalist Government abandoned Nanking on April 23, 1949, and headquarters were removed to Chungking. In August, the Communist forces advanced into South China, and by January, 1950, the Nationalists retained control only in the islands of Formosa (Taiwan) and Hainan, and in some remote parts of Western China. Taipeh, in Formosa, is now the Nationalist capital.

On Sept. 30, 1949, the "People's Political Consultative Conference" of 636 Delegates meeting at Peking elected a council of 56 members and a National Committee of 180 members to make proposals and recommendations to the Council. On October 1, Mao Tse-Tung, Chairman of the Central People's Government, proclaimed at Peking the inauguration of the People's Republic of China.

The U.S.S.R. broke off negotiations with the Nationalist Government on October 2, 1949, and established diplomatic relations with the Central People's Government. The régime was recognized by all the Communist-dominated countries, by Great Britain on Jan. 6, 1950, and by a number of other countries.

DEFENCE.—An order introducing compulsory military service for all men between the ages of 18 and 40 was passed by the Chinese Parliament in 1955. Regulations were also approved for the creation of an officer corps with ranks similar to those of the Russian Army. Nearly 80,000,000 men were made liable for service in the Army (3 years), the Navy (5 years) or the Air Force (4 years). It was announced that the new Army would be organized in 14 combat and supporting corps, including a "political" division to serve with front-line troops.

RELIGION.—The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than a religion) and, since its introduction in the first century of the Christian era, Buddhism. All three are professed and practised by Chinese other than Moslems, Christians and Jews.

EDUCATION.—Under the Nationalist Government education was compulsory from the age of 6 to 12. This policy is stated to have been continued by the Communists. In 1952 there were about 550,000 primary schools in operation with about 45,000,000 pupils. There were also 5,100 secondary schools, with about 2,000,000 pupils. The majority of the 35 provinces have provincial universities in addition to national and private institutions. In August, 1950, the Communist Government took over all schools supported by foreign missions, and in October, 1950, closed the Roman Catholic University in Peking.

LANGUAGE AND LITERATURE.—The Chinese language has many dialects, Cantonese, Hakka, Swatow, Foochow, Wenchow, Ning-po and Wu, and, most important, Mandarin (of which the standard form is Pekinese). There are many sub-dialects of Mandarin, some of which are closely allied while others diverge so much as to be almost separate dialects. Chinese literature is among the richest in the world and paper has been employed for writing and printing for nearly 2,000 years, movable wooden blocks having superseded carved wooden slabs many centuries ago. Confucian books of religion, histories, works dealing with philosophy and the arts, poetry, and literary criticism, novels and romances are abundant and many have been translated into other tongues. In 1937 there were 337 daily newspapers and 1,881 periodicals published at Nanking, Shanghai, Peking, Tientsin, Hankow, Canton and other large centres. All English-language newspapers in China had been closed down by March, 1951. As from Jan. 1, 1956, all Chinese newspapers appeared with characters printed horizontally, instead of in vertical form, and reading from left to right. Official approval was given in February, 1956, to a 30-letter Latin alphabet to replace some 30,000 ideographic characters at present used in written Chinese. The new alphabet has been introduced for trial in a Government campaign to modernize Chinese writing and eradicate illiteracy.

CURRENCY AND EXCHANGE.—The *yuan* was revalued with effect from March 1, 1955, on the basis of 10,000 old *yuan* for one new *yuan*. From the same date the official exchange rates for sterling and dollars were altered to:

6·893 *yuan* = £1; 2·46 *yuan* = $1.

PRODUCTION AND INDUSTRY.—China is essentially an agricultural and pastoral country. Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax, are the most important crops. In June, 1950, an Agrarian Reform Law, redistributing the land, was passed.

Livestock is raised in large numbers. Silkworm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities, and flour and rice milling have grown important in late years. The mineral wealth of the country is very great, coal of excellent quality being produced; iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundantly found. Oil is produced in the province of Kansu and in South Manchuria.

TRADE.

The value of the Special Trade of China (Imports retained for home consumption and Exports of merchandise of home produce or manufacture) is shown below for a series of years in Standard Dollars.

Year	Imports	Exports
1939.....	$1,333,654,000	$1,027,247,000
1940.....	2,027,143,000	1,970,121,000
1942.....	1,444,340,000	191,700,000
1943.....	3,114,320,000	164,460,000
1946.....	1,501,160,000	412,110,000
1947.....	10,681,326,570	6,376,504,300

The principal articles of export were animals and animal products; oils; textiles fibres; ores and metals and tea. The principal imports were raw cotton, cotton yarn and thread; oils, fats and soap; motor cars and ships; books, paper and paper-making materials; chemicals; metals and ores; and dyes, paints and varnishes.

	1958	1959
Imports from U.K..	£26,639,611	£24,373,972
Exports to U.K.....	18,540,490	19,715,401

COMMUNICATIONS.—Of the total area of China about half consists of table lands and mountainous districts where communications and travel are generally difficult and dangerous, the highest point being *Minyaa Konka* (24,900 ft.) about 150 miles west of Chungking. To open up sea communications from the south-west the *Burma Road*, over 770 miles in length from Lashio, Burma, to Kunming in Yunnan, was constructed in 1937–39. The road was the chief highway for war supplies to China, until cut by the japanese in 1942; the success of the Allies in Burma in 1945 restored the use of the road and of communication between Yunnan and Burmese ports. Motor lorries perform the journey in seven days, in contrast with the difficult and lengthy pack-mule transit before the road was constructed. There is motor road and railway connexion between Chungking and French Indo-China. In districts not served by roads the principal means of communication from E. to W. is afforded by the rivers, of which the principal are the Yangtse (3,400 miles), Hoangho or Yellow (2,600) and the West River (1,650), and from N. to S. by the Grand Canal.

Railways.—The length of the railways is less than 8,000 miles, inclusive of the Manchurian lines, or less than one-fifth (per 100 sq. miles) of those available in Turkey It was announced on June 23, 1955, that a 200-mile railway linking Litang with the port of Tsamkong, on the Liuchow Peninsula off Hainan Island, had been completed. Major railway projects now under construction are two new lines across Mongolia and Sinkiang and a line linking Lanchow with Kunming.

Telegraphs connect Peking with Europe and Tibet. There are about 97,000 miles of land lines and several high-power wireless installations. Telephones, municipal and long-distance, are in general use in the settled and trade areas, and wireless telephony has been installed in the large centres.

SPECIAL TERRITORY

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly demarcated), from Kashmir to Burma, but is separated therefrom by the Himalayas. The area is estimated at 463,000 square miles with a population of 1,273,969 (1953 Census.) About one-fifth of the male population are monks and polyandry is common. There is an army with an establishment of 10,000 all ranks, consisting of infantry serving on a militia basis and armed with modern weapons. India imports from Tibet wool, borax, salt, and musk; musk, horn and herbs are sent to China. The imports are chiefly cotton and woollen goods, grain, hardware, glass, sugar, biscuits, dried fruits and tobacco, with silver bullion and coined rupees to balance the excess of exports. The present currency is reckoned in *sangs* (mostly paper). The 1939 value was about 8 *sangs*= 1 rupee, which has risen in favour of Tibet to about 33 *sangs*= 1 rupee (1946). Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces.

Between the 7th and 9th centuries A.D. Tibet was a successful military power whose boundaries extended far into Shensi (China) and for a time to the kingdom of Magadha (India). Later, the influence of Buddhism softened earlier military aggressiveness and Tibet remained in contact with, and was influenced (but not dominated) by, its Mongolian and Chinese neighbours until early in the 18th century when the Manchu Emperor of China, K'Anghsi, taking advantage of internal dissensions in Tibet, invaded the country and established officers at Lhasa. Manchu authority in Tibet appears to have been always loose and by the end of the 19th century was merely nominal.

In 1918 Chinese aggression on the border led to successful retaliation by Tibet in which the Chinese were driven beyond the upper waters of the Yangtse, but from 1931 to 1933 there was confused fighting on the China-Tibet border, as a result of which the Tibetans lost their hold on most of the territory to the East of the Upper Yangtse which they reoccupied in 1918. Since then the Upper Yantgse has remained roughly the *de facto* frontier between Tibet and China.

In October, 1950, Chinese Communist forces invaded Eastern Tibet. The Dalai Lama later left Lhasa and set up his Government at Yatung, near the Sikkim frontier. On May 23, 1951, an agreement was reached whereby Tibet accepted Chinese suzerainty. The Communist army was allowed entry into Tibet and a Communist military and administrative headquarters set up.

A series of revolts against Chinese rule over several years culminated on March 17, 1959, in a rising in Lhasa. Heavy fighting continued for several days before the rebellion was suppressed by Chinese troops and military rule imposed. The Dalai Lama fled to India where he and his followers were granted political asylum. On May 4, the Indian Government announced that an estimated 9,000 Tibetans had entered India or the Himalayan hill states. The 7,000 refugees who had entered Assam would be settled in a suitable region of India. On March 28, 1959, the Chinese Prime Minister issued an order dissolving the Tibetan Government and setting up a 16-member Preparatory Committee for the Tibetan Autonomous Region, with the Panchen Lama as Chairman and including 4 Chinese officials.

PRINCIPAL CHINESE CITIES.—The Communist Government has reinstated Peiping as the National capital, under its old name of Peking. From 1928 to 1949 the capital was Nanking. Peking had a population of 2,768,149 at the 1953 Census. The population of the principal Ψports and trade marts is estimated as follows: Nanking, 1,020,000; Ψ Amoy, 240,000; Ψ Antung, 200,000; Ψ Canton, 1,496,000; Changsha, 700,000; Ψ Chefoo, 250,000; Chinkiang, 220,000; Chungking, 1,110,000; Ψ Foochow, 400,000; Ψ Hangchow, 600,000; Hankow (including Wuchang and Hanyang), 800,000; Harbin, 638,000; Hsinking, 420,000; Ichang, 110,000; Kirin, 150,000; Mengtsz, 200,000; Mukden, 1,551,000; Newchwang, 170,000; Ψ Ningpo, 300,000; Ψ Shanghai, (1953) 6,204,417; Shasi,

150,000; Soochow, 300,000; ΨSwatow, 200,000; Tientsin, (1953) 2,693,831; ΨTsingtao, 756,000.

FLAG OF "PEOPLE'S REPUBLIC."—The "Gate of Heavenly Peace" at Peking, superimposed on the national flag, with a large star and four small stars at the top, and a wheel at the base. The whole is encircled by ears of wheat and rice.

Ambassador Extraordinary and Plenipotentiary (vacant).
Chargé d'Affaires, Señor Dr. Pablo Samper.
1st Secretary, Dr. Jaime Canal Rivas.
Consulate-General, 3 Hans Crescent, S.W.1.
Consul-General, Señor Pablo Uribe Grajales.

There are Colombian Consular Offices at *Liverpool* and *Glasgow*.

The Republic of Colombia lies in the extreme north-west of South America, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40′ S. to 12° 25′ N. lat. and 68° to 79° W. long., with an estimated area of 461,606 square miles, and a population (1955 estimate) of 13,000,000.

The Colombian coast was visited in 1502 by *Christopher Columbus*, and in 1536 a Spanish expedition under Jiménez de Quesada penetrated to the interior and established on the site of the present capital a government which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811–1824. In 1819 *Simon Bolivar* (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829–1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

Following a period of dictatorship and government by decree from 1953, a military junta was established on May 10, 1957. Congressional elections were held on March 16, 1958, which yielded a Liberal majority of votes. A plebiscite voted on December 1, 1957, had made constitutional changes by which the office of president would during the next sixteen years alternate between candidates of the Liberal and Conservative parties who would hold office for terms of four years, while the two parties would have equal representation in Congress and in the national and departmental governments. On May 4, 1958, presidential elections returned the Liberal Señor Alberto Lleras Comargo, supported by Liberal and Conservative votes.

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast tablelands, cool and healthy. This temperate region is the most densely peopled portion of the Republic.

The principal rivers are the Magdalena, Cauca, Atrato, Caquetá, Meta, Putumayo and Patia. The Patia flows through the famous *Minima Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guiatara) is spanned by the Rumichaca Arch, or *Inca's Bridge*, of natural stone. On the Rio Bogotá is the Great *Fall of Tequendama*, 482 feet in height.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; in 1956 some 44 million barrels of petroleum were produced and prospecting for new sources of production is in progress in many parts of the Republic. The principal agricultural products are coffee (which accounts for 80 per cent. of total exports by value), cotton, bananas, rice, cocoa, sugar, tobacco, maize, wheat and other cereals. Manufactures, mainly for home consumption, consist of woollen, cotton and artificial silk textiles, leather goods, chemicals, asbestos-cement goods, many pharmaceutical products, rubber goods, including motor tyres, furniture, boots and shoes, confectionery, cigarettes, beer, cement, glass containers and, since the latter part of 1954, steel. Successive foreign exchange crises have led to the encouragement by the Government of the rapid development of new industries, including the local assembly and partial manufacture of motor vehicles, radio sets and office machinery.

The Navy consists of 4 destroyers, 3 frigates, some gunboats and some other small craft, with personnel about 4,500, including one battalion of marines; a battalion of the Colombian army served with the United Nations forces in Korea. The first railway was opened in 1855, about 1,914 miles being open in 1949. A new railway is at present being constructed in the Magdalena Valley, which will link the departmental lines running down to the river, and is planned to reach the Atlantic coast. The Dorada Railway, 70 miles of 3 ft. gauge connecting La Dorada and Ambalena, was bought from its British owners by the Colombian Government in July, 1956, together with a 44 mile aerial ropeway connected to the railway, for $1,000,000. There are about 2,200 miles of rail in use at present. There were also (1955) some 13,125 miles of metalled roads, of which 8,440 miles are national highways and the remainder departmental and municipal highways; this excludes "dirt" roads (passable by motors in dry weather only). Colombia was granted loans totalling $47,300,000 (118,500,000 *pesos*) by the International Bank, towards the total of 515,000,000 *pesos* expected to be required to complete the rehabilitation of highways which is now in progress. The national telephone and telegraph system consists primarily of wireless links between the more important centres. Large appropriations have been made for modernization of the country's telecommunication system. A large volume of traffic is carried on the River Magdalena, which is navigable for 900 miles. Until 1958 the main port for Bogotá was ΨLa Dorada, 592 miles from Barranquilla, but in 1958 the railhead was extended to Puerto Berrio, 250 miles further down the river. There are daily passenger and cargo air services between Bogotá and Barranquilla, Bogotá and Medellin and Bogotá

and Cali. There are also subsidiary services to Cartagena. Santa Marta, Manizales, Pereira, Armenia, Pasto, Buenaventura, Barrancabermeja, Popayan, Ipiales, Bucaramanga, Cúcuta and Villavicencio. There are daily services to the U.S.A., frequent services to other countries in South America, a direct B.O.A.C. *Britannia* service once a week to London, and other services to London daily *viâ* New York, three times a week *viâ* Jamaica and twice a week *viâ* Paris, and air mail is delivered to the United Kingdom 3 to 5 days after leaving Bogotá. There are wireless stations in the main cities, and a television station in Bogotá with relays to Manizales, Medellin, Cali and Tunja.

Roman Catholicism is the established religion.

Language and Literature.—Spanish is the language of the country and education has been free since 1870. Great efforts have been made in reducing illiteracy and it is estimated that about 60 per cent. of those over 10 years of age can read and write. In addition to the National University at Bogotá (founded in 1572) there are universities in the towns of Medellin, Cartagena, Popoyan and Manizales and the department of Nariño. There is a flourishing press in urban areas and a national literature supplements the rich inheritance from the time of Spanish rule.

FINANCE.	*pesos*
Actual budget revenue, 1959	2,086,103,000
Actual budget expenditure, 1959	1,874,643,000

THE CONGOLESE REPUBLIC

The State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908, and was administered by Belgium until June 30, 1960, when it was proclaimed independent. Situated between long. 12°–31° E. and lat. 5° N. 13° S., the Congolese Republic comprises an area of 905,582 sq. miles, with a native population (Dec. 31, 1958) of 13,540,182 and a non-native population of 112,759. About three-quarters of the latter were Belgians, many of whom have since left the country.

Government.—A provisional constitution was agreed upon for the Congolese Republic at a round-table conference held in Brussels early in 1960, and a Congolese cabinet took office on June 24, 1960, headed by Patrice Lumumba. Later the same day the two chambers of Parliament elected Joseph Kasavubu as President of the Republic. Even before the date fixed for independence, however, difficulties were arising in the formation of cabinets for the provincial governments. In four provinces, —Leopoldville, Katanga, Kasai and Equator— there were proposals for the establishment of autonomous states of various kinds and threats of rival governments being set up. Following the assumption of independence on July 1, 1960, serious rioting occured in many parts of the Congo and there was an immediate mutiny in the Force Publique which, under its Belgian officers, had been expected to keep order. Belgian troops were brought in by air in an attempt to protect Belgian lives and property and large numbers of Belgian citizens were evacuated by air. Order was partially restored upon the arrival of United Nations forces from Sweden, Ghana, Canada, Tunisia and the Federation of Mali. For details of recent events in the Congo, *see* Events of the Year.

Climate.—Apart from the coastal district in the West which is fairly dry, the rainfall averages between 60 and 80 inches. The average temperature is about 80° F., but in the South the winter temperature can fall nearly to freezing point. Sleeping sickness, once very prevalent and destructive, is now decreasing, and malaria is under control in Leopoldville and Matadi.

Extensive forest cover the central districts.

Production.—Oil palms are plentiful, and supply an increasing trade in palm-oil and palm-kernels. Cotton, cocoa, rubber and coffee are successfully planted. The Colony is rich in minerals. The metallic mineral output in 1958 was: copper, 237,562 tons; raw zinc concentrates, 200,017 tons; coal, 29,323 tons; manganese ore, 338,145 tons; cobalt (alloys), 4,342 tons; (granulated), 4,263 tons; cassiterite, 11,783 tons and smelted tin, 2,684 tons. Refined gold amounted in 1958 to 10,957 kg.; diamonds (Lubilash) 16,004,145 carats and (Kasai) 669,329 carats. Extensive radium deposits exist in the Elisabethville Province, where there are enormous deposits of copper. Bukama is the centre of an extensive tin-belt, and alluvial and reef gold are found in the North-eastern Congo. Diamond-bearing gravels are worked in the South. There are important secondary industries, the main products being: cotton fabrics, blankets, sacks, footwear, clothing, beer, cigarettes, paint, cement and sugar. There are very large reserves of hydro-electric power.

Language, Religion and Education.—The people are mainly of Bantu-Negro stock, divided into semi-autonomous tribes, each speaking a Bantu tongue. Swahili, a Bantu dialect with an admixture of Arabic, is the nearest approach to a common

language in the East and South, and Lingala along the river. It is estimated there are 5,000,000 African Christians in the Colony (Roman Catholic 4,200,000, Protestant 800,000).

CAPITAL, Leopoldville (pop. 389,547; 21,568 whites). Principal towns, ΨMatadi (59,184); Elisabethville (182,638); Jadotville (74,478); Stanleyville (79,941); Luluabourg (59,935); Coquilhatville (37,587); Kolwezi (47,712) and ΨBoma (31,598).

The chief exports are copper, palm-kernels and palm oil, coffee, diamonds, cotton and ores (manganese, wolfram, etc.).

COSTA RICA

(República de Costa Rica.)

President (1958–62), Señor Mario Echandi Jimenez, *elected* February 1958.

EMBASSY IN LONDON.

3 Zetland House, Marloes Road, W.8.

Ambassador, His Excellency Dr. Alfredo Alfaro-Sotela.

1st Secretary, Señor Franz Heck-Prestinary Gotay, *Consul-General*.

Cultural Attaché, Señor Don Alex de Soto-Montenegro.

Consulate-General, 3 Zetland House, Marloes Road, W.8.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus between 8° 17′ and 11° 10′ N. lat. and from 82° 30′ to 85° 45′ W. long., contains an area of about 23,000 English square miles, and an estimated population (Jan., 1960) of 1,148,440. The rate of increase is about 4 per cent., one of the highest in the world. The population is basically of European stock in which Costa Rica differs from most Latin American countries. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries (1530–1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824–1839 it was one of the United States of Central America.

On Dec. 1, 1948, the Army was abolished, the President declaring it unnecessary, as the country loved peace.

The coastal lowlands by the Caribbean Sea and Pacific have a tropical climate but the interior plateau, with a mean elevation of 4,000 feet, enjoys a temperate climate. The capital is 103 miles from the Atlantic and 72 miles from the Pacific.

The principal agricultural products are coffee (of a high quality), bananas, rice, maize, sugar-cane, potatoes, cocoa beans and hemp, the soil being extremely fertile. Increasing attention is being paid to cattle raising.

The chief ports are Limón, on the Atlantic coast, through which passes most of the coffee exported, and Puntarenas on the Pacific coast. Bananas are principally exported from Golfito, a port which has been developed on the Pacific Coast by the United Fruit Co. In 1959, 1,055 ships of a gross tonnage of 3,445,686 entered at Costa Rican ports. About 400 miles of railroad are open. The country is well provided with airways, and Pan-American Airways, K.L.M., LACSA and TACA call at San José, while feeder services link the main centres of population with the capital.

Spanish is the language of the country. Education is compulsory and free. The literacy rate is the highest in Latin America. In post-war years there has been a big advance in the provision of social services.

FINANCE.	1959

CUBAN EMBASSY IN LONDON

22 Mount Street, W.1.
[Mayfair: 6636]

Ambassador in London (vacant).
Consul, Señor Julio del Castillo, 329 High Holborn, W.C.1.

Cuba (the largest of the "West India" Islands) lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population (estimated, 1955) of 6,125,000.

The island of Cuba was visited by Christopher Columbus during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, 1762–1763, when it was returned to Spain in exchange for Florida.] Separatist agitation culminated in the closing years of the 19th century in a fierce and blood-thirsty war. In 1898 the government of the United States intervened and despatched the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which remains an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated. In 1933 a revolution was followed by provisional government until May, 1936, when a constitutional government was elected. A new Constitution was promulgated in 1940, but its operation was suspended for various periods until February 24, 1955, when the Government elected on November 1, 1954, took office. A revolution led by Dr. Fidel Castro overthrew the Government of General Batista on January 1, 1959. A provisional government was set up and elections were promised within four years.

Of the total area of 28,000,000 acres, there were (1953), about 5,750,000 acres under cultivation, of which 61 per cent. was under sugar. Tobacco, sweet potatoes, bananas, rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pineapples, &c.) flourish. The chief agricultural products of the island are sugar and tobacco; sugar crop (1959) 5,790,600 Spanish long tons; tobacco crop (1959) 40,500 metric tons; the chief product of the forests is mahogany. White cedar is also used for boxing the tobacco crop. The estimated livestock figures include (1955) 4,500,000 cattle and 400,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

11,256 route miles of railroad are open (public service 3,677; private lines on plantations and in mining areas 7,579) and about 12,000 miles of telegraph line; there are about 8,291 miles of roads. The island forms an important stopping place for many international airlines.

Language and Literature.—Spanish is the language of the island, but English is widely understood. Education is compulsory and free. The University of Havana was founded in 1728 but until its enlargement under American auspices in the first quarter of the twentieth century no great progress was made in secondary or higher education. Public libraries have been established and there is a flourishing daily press with wide circulations.

FINANCE.

Public revenue in 1958 was estimated at $365,247,946 and in 1959 at $460,287,219. The public debt stood at $760,300,000 at the end of 1958.

Nominally $=U.S. $1. U.S. currency ceased to be legal tender in Cuba on June 30, 1951 (*see also* p. 84).

TRADE.

Imports, 1959	$600,000,000

Area and Population.—Czechoslovakia, formerly part of the Austro-Hungarian Monarchy, declared its independence on Oct. 28, 1918 (Czechoslovak Independence Day), the territory thus affected having an area of 53,700 square miles.

Since the War of 1939–45 the territory and population of the Republic have undergone change. By a treaty with the Soviet Union (June 29, 1945) Ruthenia was ceded to U.S.S.R., thus reducing the area by over 4,000 square miles and the population by over 750,000. In addition, the Sudeten German minority was expelled as sanctioned at the Potsdam Conference and the latest estimate of the population (Dec. 8, 1958) is 13,518,021.

Government.—In September, 1938, Adolf Hitler demanded the cession of the Sudeten districts. On Sept. 29, 1938, a Four Power Conference at Munich acquiesced in the annexation of the territory on the understanding that no further demands would be made, but on March 14, 1939, Nazi troops invaded Czechoslovakia, in flagrant violation of the terms of the Munich Conference, and two days later Adolf Hitler proclaimed that Czechoslovakia had "ceased to exist"; a "Slovak State" was established and Bohemia and Moravia were declared a Protectorate of the Reich.

On July 22, 1940, Great Britain recognized the Czechoslovak National Committee set up in London as a provisional Czechoslovak Government, and on July 18, 1941, Great Britain fully recognized the Czechoslovak Government headed by President Benés.

Following the liberation of Eastern Slovakia by Soviet forces in 1945, President Benés and most of the members of his Government left London for Moscow for discussions with the Czechoslovak *émigré* movement in the Soviet Union on the formation of a new Government which would have its seat on Czechoslovak territory. The composition and programme of this Government, which was headed by M. Z. Fierlinger, were announced at Kosice in Slovakia on April 4, 1945. The Kosice Government included equal representation of four Czech parties (Czech Socialists, Social Democrats, Communists and Popular Party) and two Slovak parties (Democrats and Communists).

The first elections in the liberated Republic were held on May 26, 1946, the Communists emerging as the leading party with 38 per cent. of the votes cast. On July 3, 1946, K. Gottwald, the Communist leader, formed a Government of parties participating in a National Front. The uneasy alliance between the parties was terminated by a crisis precipitated by the mass resignation on February 20, 1948, of Ministers representing parties opposed to the Communists in protest against the widespread introduction of Communists into the police force by the Communist Minister of the Interior. The Communist Party, with the aid of Action Committees, seized power, and on February 25 a new Government, predominantly Communist, was formed. On May 30, 1948, new elections were held, the choice lying between a single joint election list of parties in the National Front, and a blank vote. The Communist control of the country is now unqualified. On July 11, 1960, a new constitution was proclaimed, replacing that of 1948. Its purpose was to express the fact that Czechoslovakia is now deemed to have completed the construction of Socialism and to be on the road to true Communism. The official title of the State was accordingly changed to "The Czechoslovak Socialist Republic".

The first Five-Year plan which came to an end in December, 1953, was largely concerned with extending heavy industry and industrializing Slovakia. It was officially claimed that production had doubled during the plan, but it was also admitted that the economy had been thrown out of balance by poor progress in the development of ore reserves, fuel, power and agricultural production. The second Five-Year plan began on Jan. 1, 1956, after two interim years (1954 and 1955) devoted to correcting these faults. Gross industrial production is said to be expanding at a rate of 10–11 per cent. per annum, the emphasis remaining on heavy industry. Progress in hard coal production and in increasing power generating capacity, however, has been less good, and agricultural production has remained virtually stagnant in spite of the continued formation of agricultural co-operatives.

Language and Literature.—Czech and Slovak are the official languages but the literature is mainly Czech in Bohemia, Moravia and Silesia. The Reformation gave a widespread impulse to Czech literature, the writings of Jan Hus (who was martyred in 1415) familiarizing the people with Wyclif's teaching. This impulse endured to the close of the seventeenth century when Amos Komensky, or Comenius (1592–1670) was expelled from the country. Under Austrian repression, and with the outlawing of the national language, there was a period of stagnation until the national revival in the early nineteenth century. Modern prose drama and fiction are represented by several authors of international reputation, notably K. M. Capek-Chod (1860–1927), F. X. Svoboda (1860–1943), Jaroslav Hilbert (1871–1936), Viktor Dyk (1877–1931), Arnost Dvorák (1880–1933), Ivan Olbracht (*b.* 1882), K. Capek (1890–1938), and Vladimír Vancura (1891–1942). Liberty of the press ceased with the violation of independence in 1939. It was temporarily restored on the liberation of the country. After the Communist coup of February 25, 1948, however, freedom of the press was "curtailed." All papers and periodicals were forced to follow the party line and a number of publications were banned.

Education.—In 1958–59 the number of pupils in general (primary and secondary) schools was given

as 2,011,232. In addition there were, in 1958–59, 192,116 pupils at technical schools, and a further 51,539 adults studying extra-murally. Education is compulsory and free for all children from the ages of 6 to 14. There are four universities in Czechoslovakia of which the most famous is Charles University in Prague (founded 1348), the others being situated at Bratislava, Brno and Olomouc. In 1958–59 the number of university students was said to be 74,896, with another 20,903 extra-mural students.

Finance.—The Czechoslovak currency is the Czechoslovak *Koruna* (*Kčs.*=Czechoslovak crown) of 100 *heller*. From the devaluation of the pound in 1949 up to May 30, 1953, the exchange rate was *Kčs.* 139·58=£1. On June 1, 1953, the official rate was changed to *Kčs.* 20·16=£1, but a bonus of 100 per cent. was added to certain non-commercial transfers including the encashment of travellers' cheques. This change took place as the result of an internal currency reform when a new currency was issued at a basic exchange rate of *Kčs.* 1·00 of the new currency for *Kčs.* 5·00 of the old. The present rate is *Kčs.* 20·10=£1. The 100 per cent. bonus still applies. The Budget estimates for 1960 total *Kčs.* 103,406,000,000 for expenditure and *Kčs.* 103,593,000,000 for revenue.

Trade with U.K., 1959: Imports, £6,156,235; Exports to U.K., £9,068,848.

Consulate-General, 67 Pont St., S.W.1. [Kensington: 6656.]
Consul-General, Henning Hjorth-Nielsen (*Commercial Counsellor*).
Consul, Hans Adolf Biering (*Commercial Secretary*).
Vice-Consuls, Bent Christensen (*Commercial Secretary*); Erik Andersen (*Commercial Secretary*).
Consul, C. Jacobsen.
Vice-Consul, T. F. Germer.

AREA AND POPULATION.—A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zeeland, Funen, Lolland, etc., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34′–57° 45′ N. lat., and 8° 5′–15° 12′ E. long., with an area of 16,603 square miles, and a population estimated (January 1, 1960) at 4,531,860. In 1959 there were 73,928 births, 42,159 deaths and 34,414 marriages.

GOVERNMENT.—Under the Constitution of the Kingdom of Denmark Act of June 5, 1953, the legislature consists of one chamber, the *Folketing*, of not more than 179 members, including 2 for the Faröe and 2 for Greenland. The voting age is 23 years. In the 1957 elections the Social Democrats obtained 70 seats; Venstre 45; Conservatives 30; Radicals 14; Single Tax Party 9; Communists 6; Faröe 2; Greenlanders 2; Slesvig Party (German Minority) 1.

EDUCATION is free and compulsory, the schools being maintained by taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen (founded in 1478) and Aarhus (1933).

LANGUAGE AND LITERATURE.—The Danish language is akin to Swedish and Norwegian. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian Andersen (1805–1875), Söeren Kierkegaard (1813–1855) and Georg Brandes (1842–1927), with Henrik Pontoppidan (1857–1943) and Karl Gjellerup (1857–1919), who shared the Nobel Prize for Literature in 1917, and Johannes V. Jensen (1873–1950), who received the same award in 1945. Over 200 newspapers are published in Denmark; 11 daily papers are published in Copenhagen.

PRODUCTION AND INDUSTRY.—Twenty-one per cent. of the population live exclusively by agriculture, and about 48 per cent. by manufactures and trade. The chief products are wheat, rye, oats, barley, potatoes, seeds, cattle, horses, pigs and dairy

produce; manufactures based on imported raw material cover most of the home consumption.

COMMUNICATIONS.—Mercantile marine (ships above 100 gross tonnage) (December, 1958) 853 ships, with a gross tonnage of 2,112,311. in 1959 there were 4,343 kilometres of railway and 499.733 kilometres of telegraph and telephone lines.

FINANCE	1960–61
Revenue (*Budget estimate*)	*Kr.* 6,797,000,000
Expenditure (*Budget estimate*)	6,005,000,000

Government Debt (March 31, 1959):—

Internal	7,838,000,000
External	1,089,000,000

Rate of Exchange—Kr. 19.36 = £1 (*see also* p. 84).

TRADE	1959
Total Imports	*Kr.*11,013,000,000
Total Exports	9,494,000,000

	1958	1959
Imports from U.K.	£76,728,389	£87,699,943
Exports to U.K.	115,479,200	134,308,594

The principal imports are solid and liquid fuels, pulp, paper and cardboard; wood and cork, fertilizers, textiles, iron and steel, machinery, vehicles, food and feeding-stuffs. The chief exports are agricultural produce, butter, bacon, eggs, meat and livestock, ships, machinery, pharmaceuticals and ready made clothing.

CAPITAL, ΨCopenhagen. Population (1955), 560,319. Other centres are ΨAarhus, 118,943; ΨAalborg 83,210; ΨOdense, 105,915; ΨHorsens, 36,567; ΨRanders, 41,720; ΨEsbjerg, 50,921; ΨFredericia 27,910; ΨKolding, 33,169; ΨVejle, 30,758 and Roskilde 28,878.

Copenhagen, distant from London 728 miles; transit 36 hours by sea.

BRITISH EMBASSY.

Offices, Kastelsvej 38–40, Copenhagen.

Residence, Bredgade 26, Copenhagen.

British Ambassador, His Excellency Sir William Montagu-Pollock, K.C.M.G. (1960) £4,100

Counsellor, R. W. Selby.

Commercial Counsellor (*and H.M. Consul-General*), A. H. Ballantyne, C.V.O.

1st Secretaries, R. A. Noakes (*H.M. Consul*); M. A. C. Cope; J. Mellon (*Agricultural and Food Attaché*); G. H. Greenhalgh (*Scientific Attaché*) (*Resident in Stockholm*); Miss M. I. Mackie (*Information*).

2nd Secretaries, R. T. Higgins; D. R. Collard.

3rd Secretary, Major C. L. Bayliss.

Naval and Military Attaché, Cdr. Hon. D. W. E. Chubb, R.N.

Assistant Military Attaché, Maj. H. G. Jenks. (*Resident in Stockholm*).

Air Attaché, Wing Cdr. R. B. Lord, A.F.C.

Assistant Air Attaché, Sqn.-Ldr. D. P. Roberts (*Resident in Stockholm*).

Chaplain, Rev. I. A. Cardell-Oliver.

There are also Vice-Consulates at *Aabenraa, Aalborg, Aarhus, Esbjerg* and *Odense*; and at *Thorshavn* (Faroë). There is a Consular Agent at *Klaksvig* (Faroë).

BRITISH COUNCIL.

Representative, M. W. Blake (*Cultural Attaché*), c/o The British Embassy.

Outlying Parts of the Kingdom

The outlying parts of Denmark have about 55,000 inhabitants. The FAROË, or Sheep Islands (540 sq. m. pop. (1955) 32,456), capital, Thorshavn, are governed by a *Lagting* of 25 members, and send 2 representatives to the *Folketing* at Copenhagen. On September 14, 1946, the Lagting, with the consent of the Danish Government, for its own guidance held a plebiscite on the Faroe. About one-third of the electors did not, however, take part in the voting: of the rest a little more than half the votes cast were in favour of separation from Denmark and the establishment of a republic. At a subsequent general election for the Lagting a great majority voted in favour of remaining a part of the Kingdom of Denmark with a certain extent of home rule. In 1948 the Faroe received a certain measure of home rule. Special Faroese affairs are administered by a council of 3 members. Trade with U.K. in 1959 totalled: Imports, £530,552; Exports, £906,980. GREENLAND (ice-free portion about 132,000 sq. m., total area about 840,000 sq. m., population, Dec. 31, 1955, 27,101), is divided into 3 provinces (West, North and East). West Greenland (capital, Godthaab) has a *Landsraad* of 14 members and sends 2 representatives to the *Folketing* at Copenhagen. The trade of Greenland is mainly under the management of the Royal Greenland Trade Department; discoveries of lead were made in 1948. Imports from U.K. (1959), £195,642. The United States of America has acquired certain rights to maintain air bases in Greenland.

DOMINICAN REPUBLIC

(República Dominicana.)

President, Dr. Joaquin Balaguere, *assumed office* Aug. 3, 1960.

EMBASSY IN LONDON.

Consul-General, Señorita Maria Perdomo.

There are also Consular Offices at *Liverpool, Birmingham, Manchester, Nottingham, Grimsby, Sheffield, Southampton, Plymouth, Cardiff, Edinburgh, Glasgow* and *Belfast*.

The Dominican Republic, formerly the Spanish portion of the island of Hispaniola, is the oldest settlement of European origin in America.

The island was discovered by Christopher Columbus in December, 1492, who named it "La Española" or "Little Spain." In 1496 he ordered his brother, Bartholomew Columbus, to found the capital at the mouth of the Ozama River, on the south of the island, which city he called Santo Domingo. The island immediately became the objective for adventurous Spanish colonists, who exploited the native Indians for the sake of the gold found in the streams. African negroes were imported for the sugar and other plantations both in Santo Domingo and Haiti.

In 1821 Santo Domingo broke away from Spain and declared itself independent, but in 1822 it was invaded and subjugated by its negro neighbours from the west, the Haitians. The latter were driven out on Feb. 27, 1844, when the Dominican Republic was definitely proclaimed by the natives.

The country was occupied by American marines from 1916 until the adoption of a new Constitution in 1924. In July, 1924, a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the Customs and the redemption of foreign obligations,

which continued to be administered by an American official. On Sept. 24, 1940, a new convention was signed at Washington; this provided for the withdrawal of the U.S. Receiver-General, the Customs to be collected by the Dominican Government, and the whole public revenue to be deposited in an agreed bank, the service of the debt being recognized as a first charge on the deposit. Congress consists of a Senate of 26 members, elected for 6 years, and of a Chamber of Deputies of 64 members, also elected for 5 years.

The Dominican Republic lies between Cuba on the west and Puerto Rico on the east and covers an area of about 19,322 square miles, with a population of 2,703,656 (July 1957). The climate is tropical in the low lands and semi-tropical to temperate in the higher altitudes. According to local classification there are 1,289 miles of first class and 1,412 miles of second class and inter-communal roads in the Republic. There is a direct road from Ciudad Trujillo to Port-au-Prince, the capital of Haiti, enabling the journey to be made in one day. There are about 80 miles (Sánchez–La Vega) of public railway, and a telephone system connects practically all the principal towns of the republic. The Dirección General de Comunicaciones, All American Cables and Radio Corporation of America maintain an efficient telegraph service with all parts of the world. There are 28 commercial broadcasting stations and there is a television station operated by La Voz Dominicana, which with the help of relay stations provides reception of its programmes throughout the Republic. A second television station in Ciudad Trujillo-Rahintel transmits to the Ciudad Trujillo area.

Spanish is the language of the Republic and education has made considerable progress.

Sugar, coffee, cocoa, and tobacco are the most important crops. Other products are peanuts, maize, rice, bananas, molasses, salt, cement, timber, cattle, iron ore, sisal products, honey and chocolate. There are several light industries producing sisal bags and rope, glass products, cotton textiles, shoes, paper, rum, matches, peanut oil and other products.

The Republic is served by five airlines, Pan-American, Caribair, Delta Air Lines, Compania Brasileina de Aviacion (VARIG) and the Compania Dominicana de Aviacion. The new international airport 18 miles to the east of Ciudad Trujillo is now in full operation.

FINANCE

	1959	1960†
Revenue	$152,469,000	$138,427,740
Expenditure	151,365,969	134,170,730

† Estimated.

One *Dominican Peso* = $1·00 U.S. (*see also* p. 84).

TRADE

	1958	1959
Imports	$124,797,453	$117,538,338
Exports	133,656,761	130,135,772
Imports from U.K.	£1,871,885	£1,579,329
Exports to U.K.	11,807,029	7,451,157

The chief imports are machinery, foodstuffs, iron and steel, cotton textiles and yarns, mineral oils (including petrol), cars and other motor vehicles, chemical and pharmaceutical products, electrical equipment and accessories, construction material, paper and paper products, and rubber and rubber products; the chief exports are sugar, coffee, cocoa, chocolate and molasses.

The principal export to U.K. over a number of years has been sugar.

CAPITAL, Ciudad Trujillo (formerly called Santo Domingo), population (estimated 1959) 327,958. Other centres are Santiago de los Caballeros (69,060); San Pedro de Macoris (22,071); San Francisco de Macoris (22,979) ΨPuerto Plata (17,412); Barahona (18,043); La Vega (17,911) and La Romana (20,416). A census was conducted in August, 1960.

FLAG: Red and blue, with white cross.

Air Attaché, Gen. Bolivar Pico.

Military Attaché, Col. Arrata.

3rd Secretary, Miss L. Guerrero.

Consuls at *Liverpool*, *Birmingham* and *Glasgow*.

Area and Population.—Ecuador is an equatorial State of South America, the mainland extending from lat. 1° 38′ N. to 4° 50′ S., and between 75° 20′ and 81° W. long., comprising an area reduced by boundary settlements with Peru (Jan. 29, 1942) to about 226,000 sq. miles.

The Republic of Ecuador is divided into 20 provinces and one territory. It has a population estimated (June, 1959) at 4,169,204, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peak of which is Aconcagua, in the Chilean sector (22,976 ft.), the highest peaks in Ecuador being Chimborazo (20,498 ft.), Iliniza (17,405 ft.), Carihuairazo (16,515 ft.); Cotocachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sincholagua (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

The *Galápagos* (Tortoise) *Islands* forming the province of Colon, were annexed by Ecuador in 1832. The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 12 large and several hundred smaller islands with a total area of about 3,000 sq. miles and an estimated population (1959) of 1,790. The capital is San Cristobal, on Chatham Island. Although the archipelago lies on the equator, the temperature of the surrounding water is well below equatorial average owing to the *Antarctic Humboldt Current*. The islands export guano and orchilla moss. There is an increasing amount of fishing, mainly for the North American market.

Government.—The former *Kingdom of Quito* was conquered by the Incas of Peru in the latter part

of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822). A new constitution was issued on Dec. 31, 1946.

Production and Industry.—The chief products are bananas, cocoa, coffee, rice, petroleum, straw hats, vegetable ivory and balsa wood. The petroleum, like the products of Ecuador's farm lands and cotton industry, which are extensive, is almost wholly consumed internally. Small amounts of gold, silver and lead are mined, and emeralds and rubies are occasionally found.

Communications.—There are about 2,000 miles of permanent roads and 2,500 miles of roads which are only open during the dry season. There are about 750 miles of railway, including the railway from Quito to Guayaquil. The laying of a new track from Ibarra to San Lorenzo has now been completed. Seven commercial airlines (Panagra, Area, Braniff, K.L.M., Avianca, Equatoriana de Aviación and Air France), operate international flights, linking Ecuador with New York, Miami, Lima, Santiago, Rio de Janeiro, etc. Area and other Ecuadorian companies operate internal services between all important towns.

Defence.—The standing Army has a strength of about 8,000. There is an Air Force of some 40 front line aircraft and a small Navy. All are being advised by U.S. missions.

Language and Literature.—Spanish is the language of the country. The electorate of Congress is confined to adult male and female citizens who can read and write, and in recent years considerable headway has been made in reducing the high figure of illiteracy. 3 daily newspapers are published at Quito and 6 at Guayaquil. Elementary education is free and compulsory. In 1957–58 there were 501,622 pupils at the 4,661 primary schools and 53,840 pupils at the 249 High Schools. The 6 Universities (at Quito, Guayaquil, Cuenca, Loja and Portoviejo) and the Polytechnic School at Quito had 6,646 students in the same year.

FINANCE	1960
Revenue (*Budget Estimates*) ... *Sucres*	1,550,403,590
Expenditure (*Budget Estimates*) .	1,550,403,590
Internal Debt (Sept. 30, 1959) .	715,914,000
External Debt (do.)	$U.S.25,836,000

Official rate of Exchange: *Sucres* 42·42 = £1. (*See also* p. 84.)

As from Jan. 1, 1954, imports were classified under two headings. List I contains essential and semi-essential items which are payable at the official rate of exchange. List II contains luxuries and semi-luxuries which are payable at the free rate of exchange (*Sucres* 47–50 = £1). Import licences are required for all merchandise and these are issued by the Central Bank of Ecuador.

TRADE	1958	1959
Imports.....	$U.S. 96,382,896	$U.S. 97,245,975
Exports.....	87,243,879	92,164,473
Imports from U.K., 1959		£2,105,420
Exports to U.K., 1959.....		325,394

In 1959 the United States sent about 51·2 per cent. of Ecuadorean imports and received about 63 per cent. of her exports.

The chief exports are cocoa, coffee, bananas, rice, caoutchouc, vegetable, ivory and gold, cinchona bark, Panama hats and coffee; the chief imports are textiles, machinery, foodstuffs, and manufactured goods.

CAPITAL, Quito. Population (1959), 267,798. ΨGuavaquil (338,812) is the chief port; other centres are Cuenca (57,338); and Riobamba (34,268).

FLAG: Three horizontal bands, yellow, blue and red (the yellow band twice the width of the others).

Position and Extent.—Ethiopia (or Abyssinia) is an inland country in North-Eastern Africa, bounded on the north by the former Italian Colony of Eritrea, which was federated with Ethiopia under the Ethiopian Crown in September, 1952, in accordance with the United Nations Resolution of Dec. 2, 1950; on the south by Kenya; on the west by the Sudan; and on the east by French Somaliland and the Republic of Somalia. The area is estimated at 350,000 square miles, with a population officially estimated at 18,000,000, of whom about one-third are of the ruling race of Amharas and the remainder mainly Gallas, Guraghi, Sidama, Agao, negro tribes on the west and south frontiers, and Danakil and Somalis on the east.

Ethiopia is mainly a mountainous country, volcanic in origin, with several peaks of about 14,000 ft., notably in the centre and in the Simien range in the north; many other mountains exceed 10,000 ft. The lower country and valley gorges are very hot; the higher plateaux are well watered, with a genial climate. On the high plateau there are two main seasons in the year, a dry winter, October to May, and a rainy summer from June to September, with a season of "small rains" occurring generally in March. The chief river is

the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also rise in the Ethiopian highlands.

The Amharas, who inhabit the provinces of Tigre, Begemdir, Gojjam, parts of Shoa, and many of the Gallas, are Christian (a branch of the Coptic Church). The head of the Coptic Church is the Coptic Patriarch at Alexandria. Since 1950 Bishops have, however, been appointed by the local Metropolitan Bishop, without direct recourse to Alexandria. Moslems predominate in some areas, notably Harar and Jimma and Arussi, the Moslem centre being at Harar. The province of Gamu Gofa and parts of Sidamo and Arussi have considerable pagan elements.

Government.—On the basis of the 1955 Constitution, elections were held in 1957 and the Chamber of Deputies met for the first time at the end of that year. The Chamber enjoys greater fiscal control than the past Assembly and there is a limited degree of ministerial responsibility to Parliament. The Senate continues to be nominated by the Emperor.

Production and Industry.—The principal pursuits are agriculture and cattle breeding. In the hotter regions, sugar-cane, cotton, &c., flourish: in the middle zone maize, wheat, barley, coffee, wild oranges and other fruit trees, tobacco, potatoes and oil seeds are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. Coffee provided approximately 55 per cent. of the country's total exports by value in 1959. The forests are a potential source of wealth. Horses, mules, donkeys, cattle, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people.

Communications.—A railway links Addis Ababa, the capital, *via* Dire-Dawa, with Jibuti, 486 miles away. Several roads were constructed before and during the Italian occupation; the principal road runs from Addis Ababa to Dessie and on to Asmara in Eritrea, with a branch from Dessie to Assab on the Red Sea Coast. Ethiopia has access to the Red Sea at Massawa and Assab, ports being a federal responsibility. Gondar is linked to Asmara by a road through Axum and Adua. Others run from Addis Ababa west to Lekemti, south-west to Jimma, Gore and Gambela, south to the Kenya frontier, and in the East from Dire Dawa to Harar and British Somaliland. Partly financed by large loans from the International Bank for Reconstruction and Development, much further improvement and extension of roads is being undertaken. The Ethiopian Air Lines maintain regular services from Addis Ababa to most of the provincial towns. External services are operated to Jibuti, Taiz, Hodeida, Port Sudan, Cairo, Khartoum, Nairobi, Athens and Frankfurt. Further links with other cities in Africa are being planned.

Defence.—A Ministry of Defence has been instituted. The armed forces comprise the Imperial Army, the Imperial Bodyguard, the Imperial Air Force and the Imperial Navy. The Army consists of infantry, artillery, engineers, signals, ordnance, and supply services, and has an armoured squadron of light tanks and armoured cars. The Imperial Bodyguard consists of infantry, with some artillery and armoured cars. An American Military Mission trains the Army, and Swedish officers are employed in the Ministry of Defence. There is now a military academy at Harar. The Imperial Air Force comprises three attack squadrons and a flying training school. The aircraft are of British and Swedish manufacture and the training staff is Swedish.

The Imperial Navy, which has been started with the formation of a Naval School at Massawa with Norwegian instructors, has two coastal cutters.

Education.—Elementary education is provided without religious discrimination by Government schools in the main centres of population; there are also Mission schools. In or near the capital are several secondary schools, a university college, a technical school, an agricultural school, a theological college, commercial school, and a teacher-training college; also cadet-schools for the Army, Imperial Guard, Air Force, and Police. Schools of higher grade than elementary are also to be found in some of the provincial capitals. Amharic is the official language of instruction, with English as the first foreign language. Arabic is taught in Koran Schools; and Ge'ez (the ancient Ethiopic) in Christian Church Schools, which abound. Adult education is met to some extent by institutes which provide evening classes in Addis Ababa.

Finance

	1958–59 Ordinary	Extraordinary
Revenue	£28,800,000	£7,100,000
Expenditure	26,200,000	9,700,000

Currency.—The Ethiopian dollar has a value of 5·52 grains of fine gold and is divided into 100 cents. It was first issued by the State Bank of Ethiopia in July, 1945, at an exchange rate of Ethiopian $10 = £1, backed almost entirely by sterling securities. Ethiopia did not devalue her currency in line with sterling in September, 1949, and a rate of E$7 = £1 has been maintained since that date.

Trade

Total Imports (Yr. to Dec. 10, 1958)	£27,657,143
Total Exports (Yr. to Dec. 10, 1958)	22,400,000
Imports from U.K., 1959	2,663,904
Exports to U.K., 1959	1,545,340

The chief imports by value are cottons, petroleum products, machinery, motor vehicles and parts; the principal exports by value being coffee, oilseeds, hides and skins, cereals and pulses.

CAPITAL, Addis Ababa (estimated population 400,000), also capital of the province of Shoa; other provincial capitals are Makale (Tigré), Gondar (Begemdir), Dessie (Wallo), Debra Markos (Gojjam), Lekemti (Wallega), Goré (Ilubbabor), Jimma (Kaffa), Chencha (Gamu-Gofa), Yirgalem (Sidamo), Aselle (Arusi), and Harar (Harar). Besides these, Dire-Dawa, Gambela, and Aduwa are towns of some importance. There are ancient architectural remains at Aksum, Gondar, Lalibela and elsewhere.

ETHIOPIAN FLAG: Three horizontal bands; green, yellow, red.

ERITREA

A former colony of Italy, Eritrea extends from Ras Kasar, 18° 2′ N., to Ras Demoira, 12° 42′ N., and is bounded on N.W. by the Sudan, on S. by Ethiopia, and on S.E. by French Somaliland. It consists of a high, mountainous hogsback interposed between the Red Sea and the Sudan, flanked on east and west by flatter territory. The mountains range up to 10,000 ft. and Asmara, the capital (pop. 120,000, 7,000 Italians), stands at 7,800 ft. above mean sea level. Total area, 48,350 square miles, with a population of about 1,000,000, of whom about 12,000 are Europeans. Of the population about half are Coptic Christians and the remaining half are Moslems.

Eritrea was administered by Great Britain from the end of the Second World War until September 15, 1952, when in accordance with a resolution of the United Nations Assembly of December 2, 1950, it was federated with Ethiopia under the Ethiopian Crown. A new Constitution for Eritrea, drawn up by the U.N. Commissioner, and approved by

the Eritrean Constituent Assembly, was ratified by the Emperor Haile Selassié on August 11, 1952. The Government of Eritrea has legislative, executive and judicial powers in domestic affairs, and its jurisdiction extends to all matters not vested in the Federal Government, including health, education, welfare, law and order, the levying of taxes and adoption of a budget. Defence, currency, foreign affairs, finance, foreign trade and communications (including ports) are within the jurisdiction of the Federal Government. The Federation of Eritrea with Ethiopia was ratified by the Emperor Haile Selassié on September 11, 1952, and came into effect with the final handing over of authority by the British Administration at midnight on September 15, 1952.

Full executive power is, subject to certain safeguards, in the hands of a Chief Executive elected by the Assembly to hold office during its own term, but not responsible to the Assembly. The single chamber Assembly is elected by all adult males of federal nationality. There is also in Eritrea a representative of the Emperor who has certain formal rights and prerogatives not affecting Eritrea's autonomy. English was adopted as the official language of the Eritrean Assembly.

Chief Executive of Eritrea, Dejasmach Asfeha Welde Mikael, *appointed* 1955.

ΨMassawa (pop. 27,000) is the chief port, where there is a good harbour, other centres being Keren (10,000), Decamere (9,000), Adi Ugri, Agordat and Tessenei. A railway from Massowa runs to Asmara and thence inland to Keren and Agordat, with projected extensions towards the S.E. boundary.

Agriculture, Einari Jaakkola.
Associate Minister of Agriculture, Toivo Antilo.
Defence, Leo Häppölä.

FINNISH EMBASSY IN LONDON
66 Chester Square, S.W.1
[Sloane: 0771]

Ambassador in London, His Excellency Leo Tuominen (1957).

Area and Population.—A country situated on the Gulfs of Finland and Bothnia, with a total area of 130,127 square miles, of which 70 per cent. is forest, 9 per cent. cultivated, 9 per cent. lakes and 12 per cent. waste and other land, population (Jan. 1, 1959) 4,412,631. In 1957 the birth rate was 19·9 per 1,000, death rate 9·4 per 1,000. The infant mortality rate is 28·1 per 1,000 live births. 96 per cent. of the people are Lutherans, 1·7 per cent. Greek Orthodox and 2·3 per cent. belong to other religious bodies. The loss of Karelia meant resettling about 480,000 refugees mainly on some 46,000 new farms provided by the Government, partly from holdings exceeding 62 acres and partly by purchase.

The Aland Archipelago (Ahvenanmaa), a group of small islands at the entrance to the Gulf of Bothnia, covers about 572 square miles, with a population (1954) of 21,486 (97 per cent. Swedish-speaking). The islands have a semi-autonomous status.

Government.—Under the Constitution there is a single Chamber (*Eduskunta*) for which women are eligible, now composed of 200 members, elected by universal suffrage of both sexes. The legislative power is vested in the Chamber and the President. The highest executive power is held by the President who is elected for a period of 6 years.

After the last general election in July, 1958, 10 Social Democrat Deputies who had been elected on official party lists joined the Social Democrat opposition group in the Diet. The present state of the parties, therefore, is as follows:—Finnish People's Democratic League (Communist), 50; Agrarian Union, 47; Social Democrat Party, 38; Conservatives, 29; Swedish People's Party, 14; Social Democrat Opposition, 13; Finnish People's Party (Liberal), 8; Small Farmers' Party, 1.

Defence.—By the terms of the Peace Treaty (Feb. 10, 1947) with U.K. and U.S.S.R., the army is limited to a force not exceeding 34,000. The Navy is limited to a total of 10,000 tons displacement with personnel not exceeding 4,500. The Air Force, including naval air arm, is limited to 60 machines with a personnel not exceeding 3,000. Bombers or aircraft with bomb-carrying facilities are expressly forbidden. The Defence Forces contain a cadre of regular officers and N.C.O.'s, but their bulk is provided by conscripts who serve for 8–11 months. None of the defence forces has the full complement permitted.

Education.—Primary education is compulsory and free for all children from 7 to 15 years, and in 1951–52 there were 492,000 in attendance at primary schools, with 101,000 in secondary schools and 31,000 in colleges for vocational training. There are 11 Higher Schools with 4,400 students, and 4 universities: the State University of Helsinki (about 9,000 students); 2 at Turku (one Swedish-speaking); and a new university (300 students) at Oulu.

Language and Literature.—Most Finns are bilingual. 91·2 per cent. speak Finnish as their first language, 8·6 Swedish and the remaining 0·2 per cent. other languages (mainly Lapps living a

nomadic life in the North). Since 1883 Finnish has been on an equal footing with Swedish as the official language of Finland, but since independence in 1919 Finnish has slowly been displacing Swedish. In literature also, until the close of the eighteenth century, Swedish was dominant, but awakening Finnish nationalism in the early years of the nineteenth century and the establishment of an association for the promotion of Finnish literature in 1831 gave Finnish the status of a literary language. There is a vigorous modern literature. Eemil Sillanpää was awarded the Nobel Prize for Literature in 1939. There are 65 daily newspapers in Finland.

Production and Industry.—Finland has a greater area covered in forest than any other European country except the Soviet Union. Consequently the national economy is based on the timber, pulp and paper industries. These industries employ a large proportion of the working population and accounted in 1959 for 74 per cent. of Finland's foreign exchange earnings. The metal and metal working industries, producing 17 per cent. of Finland's export income in 1959, form the second important group. In the agricultural field, production is relatively low and the tendency is towards dairy farming. Exports of agricultural and dairy products amounted to 6 per cent. of total exports in 1959. The remaining export revenue came from the glass, ceramics and furniture industries. To a large extent domestic requirements in the textile, rubber, plastics, chemical and pharmaceutical, footwear and foodstuff trades, are met by local factories.

Communications.—There are 3,700 miles of railroad and a well-developed telegraph and telephone system. There is railway connection with Sweden and U.S.S.R., passenger boat connection with most of the countries of Western Europe, and telephone communication with most countries of the world. External civil air services are maintained by BEAC (as far as Stockholm), Aero Oy (Finnish Airlines), Scandinavian Airlines System and Pan American Airways. Aero Oy and Aero Flot each maintain a service with Moscow twice a week. Aero Oy maintains an extensive internal air service. Aero Flot maintains a service twice a week with Leningrad and Czech State Airlines twice a week with Prague. The merchant fleet (April, 1959) consists of 246 steamships (355,000 tons gross), 188 motor vessels (403,000 tons gross), and 108 sailing ships with auxiliary engine (11,000 tons gross).

FINANCE	1959
Revenue (*Budget*)..... *Marks*	308,718,641,800
Expenditure (*do.*).....	321,604,356,700
Debt (March 1959).....	155,000,000,000
Finnish Mark 892 (approx.) = £1 *(see also* p. 84).	

TRADE	1958	1959
Total Imports..... *Marks*	233,132,294,000	
Total Exports.....	247,865,676,000	
Imports from U.K.	£31,796,840	£37,687,123
Exports to U.K...	67,949,073	77,630,281

The principal imports are raw materials, foodstuffs, machinery and manufactured goods. The exports are principally the output of the timber mills (timber, cellulose and paper).

CAPITAL, ΨHelsinki (Helsingfors). Population (1959), 441,678; other towns are Tampere (Tammerfors), 122,836; ΨTurku (Abo), 120,987; Lahti, 48,000; Pori (Björneborg), 46,500; Oulu (Uleaborg), 44,500; ΨVaasa (Vasa), 38,500; and Kuopio 36,500.

FLAG: White with blue cross.

NATIONAL DAY: December 6.

(*a*), (*b*), (*c*). These Departments correspond with the districts of Alsace and Lorraine.

AREA AND POPULATION.—The most westerly State of Central Europe, extending from 42° 20′ to 51° 5′ N. lat., and from 7° 45′ E. to 4° 45′ W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1939) at 212,805 square miles (excluding Algeria) divided into 90 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The population of Metropolitan France on Jan. 1, 1960, was estimated at 45,355,000 by the French National Institute of Statistics. During 1956 there were 804,000 live births, 542,000 deaths and 294,000 marriages.

GOVERNMENT.—The monarchical system of government was overthrown by the *French Revolution* (1789–1793), and the *First Republic* endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20–June 29, 1815), until the *Second Republic* of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the *Third Republic* was set up. The constitution of the Third Republic vested the legislative power in a Chamber of Deputies and a Senate. The executive was vested in the President, who was elected for 7 years by the Senate and Chamber assembled in Congress.

On Sept. 1, 1939, Germany invaded Poland, thus precipitating war with France and Great Britain, which had (March 31, 1939) given an open pledge to support Poland against aggression.

On June 17, 1940, the late Maréchal Pétain sought terms of surrender from the Germans. A number of French troops had reached British ports after the evacuation of the British Expeditionary Force from Dunkirk and St. Valéry, and on June 23, 1940, after stating that the French Government had capitulated before all means of resistance had been exhausted, General de Gaulle announced the formation of a Provisional National Committee "to defend that part of the French Empire which has not yet been conquered by Germany and to free that part of France still under the yoke of the invader."

On June 3, 1943, after prolonged negotiation, there was set up a *French Committee of National Liberation*, which was recognized by the allied nations on August 26, 1943.

Paris was liberated on August 25, 1944, and on October 13, 1944, the de Gaulle administration was recognized by the allied nations as the government of France.

Under the de Gaulle administration there was

a single chamber legislature (The National Consultative Assembly) which met at Algiers until France was liberated. The enlarged Consultative Assembly met in the Luxemburg Palace (Paris), formerly the Senate House, on Nov. 7, 1944.

Following a national referendum on Oct. 21, 1945, a Constituent Assembly was elected with the task of drafting a new constitution. This was duly drawn up and adopted at a further referendum on Oct. 13, 1946. A National Assembly and Council of the Republic, elected on a territorial basis, were set up. With amendments made in 1954, the Constitution of the Fourth Republic was in force from 1946 until Oct. 5, 1958. From the liberation of Paris in 1944 until the Fourth Republic came to an end in 1958, 26 Cabinets were formed with an average life of 5½ months. The Government of M. Mollet for 16 months in 1956–57 was the longest in office, that of M. Queuille in 1950 the shortest, being in office for only three days.

Insurrections took place in Algeria and in the Metropolitan Department of Corsica in May, 1958, and, faced by a threat of imminent insurrection among the armed forces at home, President Coty warned the nation that it was on the brink of civil war and invited General de Gaulle to form a Government. M. Pflimlin formally resigned the office of Prime Minister on May 31. On June 1, by 329 votes to 224, Gen. de Gaulle was invested in the National Assembly as Prime Minister, with power to govern by decree for a period of six months during which time proposals for constitutional reform would be submitted to a national referendum.

The Fifth Republic.—The Constitution of the Fifth Republic, embodying important changes, was adopted by an overwhelming majority at a referendum held on Sept. 28 in Metropolitan France and all overseas departments and territories. (*See also* French Community *below*).

The *President* is elected for a term of 7 years by an electoral college consisting of both Houses of Parliament, the departmental general councils, overseas assemblies and elected representatives of the municipal councils. He is also eligible for re-election. The President appoints the Prime Minister. He may dissolve the National Assembly after consultation with the Prime Minister and Presidents of both Houses, but may not do so more than once in twelve months. He may submit disputed legislation to a national referendum at the request of the Government or of both Houses of Parliament. The President may assume special powers in an emergency. At the presidential elections held on Dec. 21, 1958, General de Gaulle was elected President by an overwhelming majority and took office on Jan. 8, 1959, as first President of the Fifth French Republic.

Parliament consists of the National Assembly and the Senate. Bills may be presented in either House, except money bills, which must originate in the National Assembly. The normal session of Parliament is confined to 5½ months each year and it may also meet in extraordinary session for 12 days at the request of the Prime Minister or a majority of the Assembly. Voting rights are personal and can only be delegated in special circumstances.

The *Prime Minister* and the Cabinet are responsible only to Parliament. The Prime Minister is assumed to have the Assembly's confidence unless the Opposition moves a censure motion signed by not less than one-tenth of the deputies; such motion must be approved by an absolute majority; if defeated, its sponsors must not introduce another no-confidence motion in the same session. Ministers relinquish Parliamentary seats on joining the Cabinet.

A *Constitutional Council* is responsible for supervising all elections and referenda and must be consulted on all constitutional matters and before the President of the Republic assumes emergency powers. At the request of the Government, the *Economic and Social Council* gives advice on bills, ordinances or decrees referred to it. Any economic or social plan or bill must be submitted to it.

PRODUCTION.—The chief agriculture products are wheat, barley, rye, maize, oats, potatoes, beetroot (for the manufacture of sugar), hops, &c. Rice is being grown in parts of the Camargue (Rhône delta). Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c.

The harvest in 1958 was:—

	(Quintals)
Wheat	96,000,000
Oats	26,100,000
Barley	39,000,000
Rye	4,700,000
Maize	16,200,000

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the corktree in the south. The vine is cultivated to a very great extent, as the names Bordeaux, Burgundy, Champagne, &c., universally testify. Production of wine in 1958 (excluding Algeria) was 47,000,000 hectolitres. Cider-making is also an important industry. The live stock (1957) included 17,928,700 cattle, 8,575,000 sheep and lambs, 8,063,000 pigs, 1,986,000 horses and 1,202,000 goats. The mineral resources include coal, pig iron, bauxite, copper, lead, silver, antimony and salt. In 1958 coal production amounted to 60,340,000 tons. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, cottons, woollens, carpets, linen, silk and lace.

LANGUAGE AND LITERATURE.—French is the universal language of France and of a large proportion of the people of Belgium, Luxemburg, Switzerland, Italy, Egypt, Tunisia, Algeria, Mauritius, Haiti, the Province of Quebec, Canada, and of the State of Louisiana, U.S.A., to whom the almost inexhaustible literature of France is a treasured heritage. The work of the *French Academy*, founded by Richelieu in 1635, has established *le bon usage*, equivalent to "The King's English" in Great Britain. French authors have been awarded the Nobel Prize for Literature on 9 occasions—R.F.A. Sully-Prudhomme (1901), F. Mistral (1904), Romain Rolland (1915), Anatole France (1921), Henri Bergson (1937), Roger M. du. Gard (1937), André Gide (1947), François Mauriac (1952) and Albert Camus (1957).

DEFENCE.—The *personnel* of the Defence Forces in mid-1959, was—*Army* 780,000 (including *Gendarmerie* of 60,000); *Navy* 76,000; *Air Force* 130,000. The French Navy included 2 battleships, 3 aircraft carriers, 5 cruisers, 50 destroyers and 21 submarines.

EDUCATION.—The educational system is highly developed. *Central Administration* comprises (*a*) Ministry of National Education with Secretariats of State for Technical Education, Youth and Sports, and for Fine Arts; (*b*) Superior Educational Council, charged with the actual administration; (*c*) Consultative Committee (advisory); (*d*) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (*a*) Territorial Academies, with inspecting staffs for all grades; and (*b*) Departmental Councils, presided over by the *préfet*, charged especially with *primary* education. (*c*) *Primary* education is secular, compulsory and free, the

school age being 6 to 14. Schools are for boys, for girls, or mixed. (ii.) *Secondary*: State lycées, communal colleges, and many private establishments, 7-yrs. course, either (*a*) purely classical; (*b*) purely modern: (*c*) Latin and sciences; or (*d*) Latin and modern languages. Sèvres school and the Sorbonne (University of Paris) are among the well known establishments. (iii.) *Special Schools* are numerous. (iv.) There are 17 *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix (A.D. 1409), Alger, Besançon (1485), Bordeaux (1441), Caen (1432) Clermont (1808), Dijon (1722), Grenoble (1339), Lille (1530), Lyons (1808), Montpellier (1125), Nancy (1572), Paris (1150), Poitiers (1431). Rennes (1735) Strasbourg (1567), and Toulouse (1230).

ARCHÆOLOGY, ETC.—There are dolmens and menhirs in Brittany, prehistoric remains in Dordogne, cave drawings in Ariège, and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Cæsar found Gaul "divided into three parts" and described three political groups—Aquitanians south of the Garonne, Celts between the Garonne and the Seine and Marne, and Belgae from the Seine to the Rhine. Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, &c., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and XVIIth century châteaux survived the French Revolution.

COMMUNICATIONS.—The length of the *Routes Nationales* is about 50,000 miles, and of other roads 382,000 miles. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways in general use having a length of 8,000 km. The Rhône is navigable for 1,200-ton vessels from the sea to Switzerland.

The system of railroads in France is very extensive. The length of lines of general interest, exclusive of local lines, open for traffic on Jan. 1, 1958, was 39,600 km., of which 5,790 km. were electrified. The lines left open in Sept., 1944 totalled only 11,125 miles, but the work of reconstruction then begun has restored the pre-war figure. Traffic in 1957 totalled 32,600,000,000 passenger-kilometres and 53,600,000,000 ton-kilometres.

Civil Aviation.—In 1958 passenger/kilometres flown by aircraft of French airlines totalled 4,317,607,000, of which 3,254,307,000 were by *Air France*.

Shipping.—The French mercantile marine on Jan. 1, 1959, consisted of 1,078 ships of 4,361,454 tons gross, of which 59 were passenger vessels (563,194 tons), 156 tankers (1,635,165 tons), 475 cargo vessels (1,847,264 tons) and 327 tugs (38,563 tons).

FINANCE	1959
Total revenue (*Budget*).....	*Frs.* 5,602 milliard
Ordinary expenditure (*do.*).	6,189 milliard

The *Public Debt*, on December 31, 1958, amounted to *Frs.* 7,972 milliard, of which the external debt accounted for *Frs.* 1,383 milliard.

Currency.—The unit of currency is the *franc* of 100 *centimes*. On August 11, 1957, a system of exchange rates was introduced which amounted to a devaluation of the franc by 20 per cent. in certain sectors. This devaluation was made general on October 26, 1957. On Dec. 29, 1958, the franc was further devalued by 17½ per cent. to *Frs.* 1,400 = £1 (*Frs.* 492·70 = $1 U.S.). The *New Franc*, worth 100 old francs, came into use on Jan. 1, 1960, in metropolitan France and Algeria, as the basic monetary unit. Bank notes in 10, 50 and 100 *new franc* denominations and coins for 1 and 5 *new francs* were introduced. Further coinage in *new francs* will be introduced to replace the old coinage progressively.

COMMERCE

The principal imports are wool, cotton, chemicals, coke, crude oil, oleaginous fruits and seeds, machinery, raw skins, timber, rubber, copper and coffee. The principal exports are chemical products, iron and steel, textiles (silk and cotton), automobiles, wine and other agricultural products, soaps and perfumes, and glass.

FRENCH FOREIGN TRADE	1958	1959
	Francs	
Imports.....	1,705,332 milliard	
Export.....	1,346,026 milliard	
Imports from U.K...	£71,264 060	£76,914,036
Exports to U.K.....	100,296,462	103,822,415

ALGERIA

Algeria lies between 8°45′ W. to 12° E. longitude, 37° 6′ N. to an undetermined S. limit about 19° N. Area, 855,900 sq. miles (estimated). Population (1957), about 10,010,000.

Government.—Algiers surrendered to a French force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. From 1881 the three northern departments of Algiers, Oran and Constantine formed an integral part of France. A new department of Bône was formed in 1955 and a further eight new departments (Tlemcen, Mostaganem, Tiaret, Orleansville, Médéa, Tizi-Ouzou, Setif and Batna) in 1956. In 1958 the three departments of Aumale, Bougie and Saïda were created, but by 1960 only one (Saïda) had been formally inaugurated (Jan. 2, 1960); establishment of the other two departments was postponed. By a new constitutional law passed on April 15, 1958, all departments of Algeria were grouped into five autonomous territories, each with an elected Territoral Assembly:— Oran (Oran, Tlemcen and Saïda).

Chéliff (Mostaganem, Orleansville and Tiaret).

Algiers (Algiers, Médéa and *Aumale*).

Kabylies (Tizi-Ouzov and *Bougie*).

Constantine (Batna, Bône and Setif.)

A single municipal administration for Greater Algiers had been established in March, 1958.

On May 13–14, 1958, the military authorities in Algiers occupied the Ministry of Algeria and other public buildings and formed a Committee of Public Safety. The Commander-in-Chief, General Salan, announced that he had provisionally taken over responsibility for the destinies of Algeria. At the first meeting of the Pfiimlin Cabinet of May 14, General Salan was entrusted with the maintenance of order in Algeria. A Single Committee of Public Safety for the whole of Algeria, formed on May 23, demanded the setting up of a Government of Public Safety for France under Gen. de Gaulle. Following the investiture of Gen. de Gaulle as Prime Minister on June 1 (*see above*), General Salan was appointed Delegate-General of the Government in Algeria, with powers similar to those of the former Resident Minister. Civil government was restored in Algeria on Dec. 12, 1958, when M. Paul Delouvrier was appointed Delegate-General and General Salan returned to Paris.

The total value of imports in 1957 was *frs.* 395·8 milliard and of the exports *frs.* 271·8 milliard. The bulk of trade is with France. Trade with the United Kingdom in 1959 was valued at: Imports, £2,369,965; Exports to U.K., £10,909,339. The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, corkwood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1954 there were 2,774 miles of railroad open for traffic; and in 1956 the number of ships engaged in foreign trade entering Algerian ports was 5,257. 22,965 commercial aircraft arrived at or departed from Algerian airports in 1956. The principal town is ΨAlgiers, the capital (municipal population, Census, 1954, 361,300), a most important coaling station and much frequented as a health resort; other large towns are ΨOran (299,000), Constantine (148,700), ΨBône (114,100), Sidi bel Abbès (80,600), Tizi Ouzou (27,897), ΨPhilippeville (70,400), Mascara (57,500), Tlemcen (73,400), ΨBougie (52,283), and ΨMostaganem (60,200).

Southern Territories.—The Territories of Aïn Sefra, Ghardaia, Touggourt and the Saharan Oases, were formed into a separate colony on Dec. 24, 1902. In 1957 a new Joint Organization for the Sahara (O.C.R.S.) was set up to control the economic development of the Sahara Region and raise the standard of living of the native populations. Included in the development area were parts of the French Sudan (now *Republic of Mali*), Niger (W. Africa) and Chad (Equatorial Africa), which were represented on a mixed commission. A Delegate-General was appointed by the French Government to be responsible for the execution of the programmes and for defence and public order. Oil, iron ore, tin, uranium and natural gas were found to exist in quantities in the Sahara region. Southern Algeria was re-divided into the two Territories of Saoura and the Oases, with administrative headquarters at Colomb-Bechar and Laghouat respectively. Saoura consists of the parts of Aïn-Sefra now controlled by O.C.R.S. and the Oases of the former Territory of that name, together with parts of Ghardaia and Touggourt also controlled by O.C.R.S. Those parts of Aïn-Sefra, Ghardaia and Touggourt lying north of the Saharan Atlas mountains were merged with the Algerian Departments of Saïda, Médéa and Aumale respectively.

OVERSEAS DEPARTMENTS

With effect from Jan. 1, 1947, the colonies of French Guiana, Martinique, Guadeloupe and La Réunion with its dependencies were raised to the same status as Metropolitan Departments and rank with the rest of France for education, health and social services.

La Réunion.—Formerly Ile de Bourbon, about 420 miles E. of Madagascar, Réunion has been a French possession since 1643. Area, about 1,000 sq. miles. Population (1957), 301,000. Capital, St. Denis (41,863). Assigned to the administration of Réunion are the distant islands of St. Paul (3 sq. miles), New Amsterdam (27 sq. miles) and Kerguelen containing whaling and fishing stations (1,100 sq. miles). The Crozet Islands (200 sq. miles) and Adélie Land (*see p. 721*) in the Antarctic Continent are also dependencies of Réunion.

Martinique.—An island situated in the Windward Islands group of the West Indies, between the British colonies of Dominica in the north and St. Lucia in the south. Population (1957), 255,600. Capital, ΨFort de France (60,600). Other towns are ΨTrinite (39,173) and ΨMarin (31,369).

Guadeloupe.—In the Leeward Islands of the West Indies, the island of Guadeloupe, together with Marie Galante, the Ile des Saintes, Petite Terre, St. Barthélemy and St. Martin, form the other West Indian Department of France. Capital, ΨPointe à Pitre (26,200). Other towns are ΨBasse Terre (13,636) in Guadeloupe and ΨGrand Bourg (12,827) in Marie Galante.

French Guiana.—Area, 35,000 sq. miles. Population (1957), 29,000. Capital, ΨCayenne (13,300). Situated on the north-eastern coast of South America, French Guiana is flanked by Netherlands Guiana on the west and by Brazil on the south and east. Under the administration of French Guiana is a group of islands (St. Joseph, Ile Royale and Ile du Diable), known as Iles du Salut. On Devil's Isle, Captain Dreyfus was imprisoned from 1894–1899.

CAPITAL OF FRANCE. Paris, on the Seine.

Population (1954), (*Paris ville*) 2,850,189. The population of Greater Paris (within 15-mile radius) is approximately 6,600,000. Twenty-three other cities exceeded 100,000 at the Census of 1954—ΨMarseilles (661,492), ΨLyons (553,039), Toulouse (268,863), ΨBordeaux (257,946), ΨNice (244,360), ΨNantes (222,790), Strasbourg (200,921), Lille (194,616), St. Etienne (181,730), ΨToulon (141,117), ΨLe Havre (139,810), Nancy (124,797), Rennes (124,122), Reims (121,145), ΨRouen (116,540), Grenoble (116,440), Clermont Ferrand (113,391), Dijon (112 844), Le Mans (111,891), ΨBrest (110,713), Roubaix (110,067), Limôges (105,990) and Angers (102,142).

The chief towns of Corsica are ΨAjaccio 32,997 and ΨBastia 42,729.

Paris is distant from London 267 miles; transit by air, 1 *hr.* 10 *mins.*

FLAG: The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

BRITISH EMBASSY

(35 Faubourg St. Honoré, Paris 8e)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Pierson Dixon, G.C.M.G., C.B. (April, 1960) £7,000

Envoy Extraordinary and Minister Plenipotentiary, Sir Anthony Rumbold, Bt., C.B., C.M.G.

Minister (Economic), W. Harpham, C.M.G., O.B.E.

Counsellor and Consul-General, H. Graham, C.B.E.

Counsellors, R. M. Hadow; F. B. Richards, D.S.C.; C. L. G. Phillpotts, C.M.G.

Counsellor (Press), E. E. Tomkins, C.V.O.

Counsellor (Labour), J. R. Lloyd Davies, C.M.G.

Counsellor (Scientific) (vacant).

1st Secretaries, R. W. Munro; J. Murray; E. Bolland; R. A. Farquharson; S. H. Anstey; D. Blellock.

2nd Secretaries, J. H. G. Leahy; J. W. R. Shakespeare; R. H. Newall; T. Macaulay; A. M. Brooks, D.S.O., M.C.; Miss C. J. Tasch; R. B. Hammond; G. W. Harding; J. D. Lewis; J. E. D. Slater; P. M. Laver; B. W. Gordon; J. Greaves; E. Trewhitt; Miss M. C. McConachie; C. F. Miller.

3rd Secretaries, J. Birch; G. A. P. Cockell.

Naval Attaché, Capt. P. M. Compston, R.N.

Asst. Naval Attaché, Condr. I. F. Pearson, M.B.E., R.N.

Military Attaché, Brigadier J. A. H. Mitchell, D.S.O.

Asst. do., Lt.-Col. R. A. Readman; Lt.-Col. J. I. G. Capadose.

Air Attaché, Air Commodore G. F. W. Hycock, D.F.C., R.A.F.

Asst. Air Attaché, Wing-Cdr. B. E. de Iongh.
Civil Air Attaché, P. A. Robinson.
Chaplain of the British Embassy Church, Rev. R. J. W. Morris.

BRITISH CONSULAR OFFICES

There are British Consular Offices in Metropolitan France at *Paris*, *Ajaccio*, *Bordeaux*, *Boulogne*, *Calais*, *Cherbourg*, *Dieppe*, *Dunkirk*, *Le Havre*, *Lille*, *Lyons*, *Marseilles*, *St. Malo* and *Strasbourg*.

BRITISH CHAMBER OF COMMERCE
6 Rue Halévy, Paris

President, J. Mordan.
Vice-Presidents, A. Scott; C. Kirk.

BRITISH COUNCIL

Representative in Paris, R. P. Hinks, 36 rue des Ecoles, Paris V.

THE FRENCH COMMUNITY

The Constitution of the Fifth French Republic promulgated on Oct. 6, 1958, set up the French Community (successor to the French Union), in which member States enjoy autonomy and manage their own affairs freely. There is a single citizenship within the Community; all citizens have the same rights and duties, irrespective of their origin, race or religion. Matters of common policy are specified in the Constitution and include foreign affairs, defence, financial and economic policy, justice, higher education, transport and telecommunication. The President of the French Republic is President of the French Community and in the latter capacity is represented in each state of the Community by a High Commissioner. The official language, national anthem and flag of France were adopted for the Community. The following organs of the Community were set up in 1959.

Executive Council.—Composed of the President (*Chairman*), the Prime Ministers of the French Republic and the heads of government of each member State, and the Ministers responsible for the common affairs of the Community. The first meeting of the Council was held in Paris on Feb. 3–4, 1959. Four committees were appointed to study matters of common interest and report to the Council.

Senate.—Constituted on a basis of one member for every 300,000 inhabitants, with a minimum of three members for any State, a total of 284 members. Numbers of members from each State are shown in the list of States below. The Senate holds two sessions each year of not more than one month's duration.

Court of Arbitration.—Constituted by persons from each State designated by the President by reason of their competence, to adjudicate in disputes between members of the Community.

Secretariat.—The functions of the General Secretariat were defined at the first meeting of the Executive Council.

Secretary-General, M. Raymond Janot.

The African member States and Madagascar each nominate two members to sit on the Economic and Social Council (*see under* Fifth Republic *above*).

On June 3, 1960, an amendment to the Constitution, permitting continued membership of the French Community to member countries after the achievement of full independence, and to allow independent states to join the Community, was approved by the Senate.

The French Community consists of the following: The French Republic (Metropolitan France, Algeria and the Overseas Departments) (186).

Madagascar (République malgache).—*See* separate article.

MAURITANIA
(Islamic Republic of Mauritania)

Head of State and Prime Minister, Moktar Ould Daddah.

Mauritania lies on the north-west coast of Africa between Spanish Sahara and the State of Sénégal. It is bounded on the east and south by the Republic of Mali. Area 322,340 sq. miles. The population of Mauritania was estimated at 624,000 in 1957. The Republic of Mauritania elected on November 28, 1958, to remain within the French Community as an autonomous republic and, by agreement with France, was to be proclaimed fully independent on Nov. 28, 1960. The Republic proposed to remain within the French Community.

CAPITAL.—Ψ Nouakchott.

French High Commissioner, M. Pierre Anthonioz.

STATE OF SENEGAL

President, Léopold Senghor, *elected* Sept. 5, 1960.
Prime Minister, Mamadou Dia (Aug. 22, 1960).

Sénégal lies on the north-east coast of Africa between Mauritania in the north and the British colony of Gambia in the south. It has an area of 77,814 sq. miles and the population was estimated at 2,269,000 in 1957.

Formerly a French colony, Sénégal elected on Nov. 25, 1958, to remain within the French Community as an autonomous republic. Foundation of a Federation of Mali, to consist of the State of Sénégal, (French) Soudan, Dahomey and Upper Volta, was announced in January, 1959, and the Federation came into existence on April 4, consisting of Sénégal and the Sudanese Republic only, the others having meanwhile withdrawn. Mali was proclaimed fully independent by the President of the Federal Assembly, M. Léopold Senghor, on June 20, 1960. However, these arrangements proved short-lived as on August 22, 1960, the Sénégal Legislative Assembly formally approved measures to secede from the Federation and continue as an independent state.

CAPITAL.—Ψ Dakar (234,500).

French High Commissioner, M. Pierre Lami.
British Ambassador, His Excellency John Hugh Adam Watson, C.M.G. (1959) (*Resident at Lomé, Togo*).

REPUBLIC OF MALI

President of the Council, Modibo Keita.

The Republic of Mali, an inland state in north-west Africa, is bounded by Mauritania in the west, by Algeria in the north, by the Republic of Niger in the east and by the Voltaic Republic, Ivory Coast and Guinea in the south. It has an area of 582,437 sq. miles and the population was estimated at 3,708,000 in 1957.

Formerly the French colony of Soudan, the territory elected on Nov. 24, 1958, to remain as an autonomous republic within the French Community. It associated with Sénégal in the Federation of Mali which was granted full independence on June 20, 1960. The Federation was effectively dissolved on August 22 by the secession of Sénégal. Dissolution of the Federation was recognized by the Sudanese Republic and the title Republic of Mali was adopted on Sept. 22, 1960.

CAPITAL.—Bamako (68,600).

French High Commissioner, M. Jean Sicurani.
British Ambassador, *see* Sénégal.

IVORY COAST
(Republic of the Ivory Coast)

Head of State and Prime Minister, Félix Houphouet-Boigny, *assumed office*, August 7, 1960.

Situated on the Gulf of Guinea, Ivory Coast is

flanked on the west by the Republics of Guinea and Liberia, on the north by the Mali and Voltaic Republics and on the east by Ghana. It has an area of 189,029 sq. miles and a population estimated in 1957 at 2,483,000. Principal products are coffee, cocoa beans and timber. Ivory Coast elected on Dec. 4, 1958, to remain as an autonomous republic within the French Community and was proclaimed fully independent on August 7, 1960.

CAPITAL.—Abidjan (125,700).

French High Commissioner, M. de Nattes.

British Embassy
Abidjan.

Ambassador Extraordinary and Plenipotentiary, His Excellency Thomas Corney Ravensdale, C.M.G. (1950). (Also Ambassador to *Dahomey, Niger* and *Voltaic Republic*).

VOLTAIC REPUBLIC

President, Maurice Yaméogo.

The Voltaic Republic, formerly the French colony of Upper Volta, is an inland state in West Africa, with an area of 100,000 sq. miles and a population estimated at 3,266,000 in 1957. It has common boundaries with the Republic of Mali on the west and north, with Niger and Dahomey on the east and with Togo, Ghana and Ivory Coast on the south. Principal industry is the rearing of cattle and sheep. Dried and smoked fish are exported.

Upper Volta elected on Dec. 11, 1958, to remain as an autonomous republic within the French Community and was proclaimed fully independent on August 5, 1960.

CAPITAL.—Ouagadougou (32,100).

French High Commissioner, M. Paul Masson.

British Ambassador, *see* Ivory Coast.

DAHOMEY
(Republic of Dahomey)

President (vacant).

Prime Minister, Hubert Maga, *elected* July 11, 1960.

A republic situated in West Africa, Dahomey has a short coast-line on the Gulf of Guinea and is flanked on the west by Togo and the Voltaic Republic in the north by the Republic of Niger and on the east by the Federation of Nigeria. Dahomey has an area of 47,144 sq. miles and a population estimated in 1957 at 1,713,000. Principal products are agricultural—palm oil, maize, millet and sorghum. Dahomey became a member state of the French Community on Dec. 4, 1958, and was proclaimed fully independent at a meeting of the National Assembly on August 1, 1960.

CAPITAL. Ψ Porto Novo (30,000). Other towns are Ψ Cotonou (60,000), the largest town and commercial centre, Ouidah and Abomey.

French High Commissioner, M. René Tirant.

British Ambassador, *see* Ivory Coast.

REPUBLIC OF NIGER

Head of State and Prime Minister, Hamani Diori, *assumed office* August 3, 1960.

Situated in West Central Africa, the Republic has common boundaries with Algeria and Libya in the north, the Republic of Chad in the east, the Federation of Nigeria in the south and the Republic of Mali in the west. It has an area of 484,000 sq. miles, with a population estimated in 1957 at 2,415,000. The principal industries include cattle raising and the cultivation of ground-nuts. The Republic of Niger elected on Dec. 18, 1958, to remain an autonomous republic within the French Community and was proclaimed fully independent on August 3, 1960.

CAPITAL.—Niamey, in south-west Niger (18,100).

French High Commissioner, M. Don Jean Colombani.

British Ambassador, *see* Ivory Coast.

CHAD REPUBLIC

President, François Tombalbaye, *elected* August 11, 1960.

Situated in north-central Africa, the Chad Republic extends from 23° N. latitude to 7° N. latitude and is flanked by the Republics of Niger and Cameroon on the west, by the Kingdom of Libya in the north, by the Sudan on the east and by the Central African Republic on the south. It has an area of 487,920 sq. miles and a population estimated in 1957 at 2,581,000. Chad became a member state of the French Community on Nov. 28, 1958, and was proclaimed fully independent on August 11, 1960.

CAPITAL.—Fort Lamy, south of Lake Chad (45,600).

French High Commissioner, M. Daniel Doustin.

British Chargé d'Affaires, R. F. McKeever (*Resident at Brazzaville, Congo*).

CENTRAL AFRICAN REPUBLIC

President, David Dacko, *assumed office* August 17, 1960.

Formerly the French colony of Ubanghi Shari, the Republic lies just north of the Equator between the Cameroon Republic and the southern part of Sudan. It has a common boundary with the Republic of Chad in the north and with the Congolese Republic in the south. On Dec. 1, 1958, Ubanghi Shari elected to remain within the French Community and adopted the title of the Central African Republic. It became fully independent on August 17, 1960.

CAPITAL.—Bangui, near the border with the Congolese Republic (82,300).

French High Commissioner, M. Pierre Bordier.

REPUBLIC OF CONGO

President, Fubert Youlou, *assumed office* August 17, 1960.

The Republic lies on the Equator between Gaboon on the west and the Congolese Republic on the east, the River Congo and its tributory the Ubanghi forming most of the eastern boundary of the state. The Congo has a short Atlantic coast-line. Area of the Republic of Congo is 129,963 sq. miles, with a population estimated in 1957 at 759,000. Formerly the French colony of Middle Congo, it became a member state of the French Community on November 28, 1958, and was proclaimed fully independent on August 17, 1960.

CAPITAL.—Brazzaville (105,200); Ψ Pointe Noire (57,000).

French High Commissioner, M. Guy Georgy.

British Chargé d'Affaires, R. F. McKeever.

REPUBLIC OF GABOON

President, Leon M'ba, *assumed office* August 17, 1960.

Gaboon lies on the Atlantic coast of Africa at the Equator and is flanked on the north by the Spanish territory of Rio Muni and the Cameroon Republic and on the east and south by the Republic of Congo. It has an area of 101,400 sq. miles and a population estimated in 1957 at 404,000. Gaboon elected on Nov. 28, 1958, to remain an autonomous republic within the French Community and was proclaimed fully independent on August 17, 1960.

CAPITAL.—Libreville (16,700).

French High Commissioner, M. Louis Sannarco.

British Chargé d'Affaires, R. F. McKeever (*Resident at Brazzaville, Congo.*)

SOMALILAND AND ISLAND TERRITORIES

French Somaliland.—Area, 9,000 sq. miles. Population (1957), 67,000. Capital, ΨJibuti (17,000). Situated on the N.E. African coast round the Gulf of Tajura and extending about 80 miles inland.

New Caledonia.—Area, 7,200 sq. miles. Population (1956), 68,000. Capital, ΨNoumea (12,000). A large island in the Western Pacific, 700 miles E. of Queensland. Dependencies are the Isle of Pines, the Loyalty Islands (Mahé, Lifou, Urea, etc., the Huon Islands and Alofis). New Caledonia was discovered in 1774 and annexed by France in 1854; from 1871 to 1896 it was a convict settlement.

Wallis and Futuna Islands.—Following a request from local kings and chiefs, it was decided by referendum (Dec. 27, 1959) that the islands would become the sixth Overseas Territory of France. Population of the islands, formerly dependencies of New Caledonia, is about 9,500, mostly Polynesians.

French Polynesia.—Area, 2,500 sq. miles. Population (1956), 77,000. Capital, ΨPapeete (15,220), in Tahiti. Includes the Society Islands (Tahiti, Moorea, Makatea, etc.), the Marquesas (Nukahiva, Hiva-oa, etc., 500 sq. miles, population, 3,000); the Leeward Isles (Huahine, Raiatea, Tahaa, Bora Bora, Maupiti, etc.); the Gambier Islands (Mangareva, etc.); the Tubuai Islands (Tubuai, Rurutu, Raivivae, Rimatara and Rapa Island; and Maiao Island).

Comoro Archipelago.—Area, 800 sq. miles. Population (1957), 177,000. Capital, Dzaoudzi. Includes the islands of Great Comoro, Anjouan, Mayotte and Mohilla and certain islets in the Indian Ocean.

St. Pierre and Miquelon.—Area, 93 sq. miles. Population (1957), 4,900. Two small groups of Islands off the coast of Newfoundland.

GERMANY

* Deutsches Reich (German Realm)

THE HISTORY OF GERMANY from 1863–1945 is marked by wars of aggression. In 1864, Prussia, in company with Austria, attacked Denmark, and after a short campaign annexed the peninsula of Schleswig-Holstein. In 1866, as a result of war with Austria (the Seven Weeks' War), Prussia acquired the hegemony of the North Germanic Confederation from Austria. After the Franco-Prussian War of 1870, when Prussia wrested Alsace-Lorraine from France, the North Germanic Confederation and three South German States became the Germanic Confederation, the King of Prussia being proclaimed German Emperor at Versailles on Jan. 18, 1871.

At the outbreak of the War of 1914–1918, Germany was a Confederate League bearing the name German Empire (Deutsches Reich) under the hereditary presidency of the King of Prussia holding the title of German Emperor. At the close of the war, Germany lost most of the gains she had acquired since 1863, including all her colonies.

GERMANY BETWEEN THE TWO WARS.—On Nov. 9, 1918, two days before Germany sued for an Armistice from the victorious Allies, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. In January, 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female). The Assembly met at Weimar (Feb. 6, 1919), and elected Friedrich Ebert President of the Republic, a position he occupied until his death (Feb. 28, 1925) when Field Marshal Paul von Hindenburg was elected in his stead. Von Hindenburg was re-elected April 10, 1932, the rival candidate being Adolf Hitler, who was born at Braunau, Austria (April 20, 1889) and had migrated as a young man to Bavaria. A General Election of 1933 provided Hitler's party, the *Nationalsozialistische Deutsche Arbeiter Partei* (National Socialist German Workers' Party, or *Nazis*) with an absolute majority in the legislature (*Reichstag*) and Hitler became Prime Minister (Chancellor), a position which became fused with that of President at the death of von Hindenburg (Aug. 2, 1934), and Adolf Hitler exercised supreme and uncontrolled authority in the Reich.

THE WAR OF 1939–1945.—After concluding a Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany invaded Poland (Sept. 1, 1939), thus precipitating war with France and Great Britain, who had (March 31) given a pledge to support Poland against aggression.

Germany invaded and occupied Denmark (April, 1940), Norway, Belgium, the Netherlands and Luxemburg (May, 1940); France was then attacked and sued for peace in mid-June. The lightning war against Britain began on August 11, 1940, but the *Luftwaffe* attack, which was to prepare the way for invasion, was defeated. In April, 1941, Yugoslavia was invaded and Germany joined Italy in attacking Greece and Crete. On June 22, 1941, the U.S.S.R. was invaded. In 1942 the Nazi empire reached its height. The boundaries of Greater Germany included Alsace-Lorraine, Luxemburg, Eupen-Malmédy, large areas of Poland, Memelland and Slovenia; Germany and her satellites controlled all European countries except the British Isles, Spain, Portugal, Switzerland, Sweden and parts of European Russia, as well as large tracts of North Africa. The turning point came in November, 1942, with the Soviet victory at Stalingrad and the British at El Alamein. In 1943 a Soviet offensive threw the invader back almost to the Polish frontier, and the Western Allies, after defeating the Axis in North Africa, landed in Italy. In June, 1944, the Second Front opened on the Normandy beaches and by September, 1944, Germany itself was the battlefield. On May 8, 1945, the unconditional surrender of all German forces was accepted by representatives of the Western Allied and Soviet Supreme Commanders.

Hitler committed suicide on April 30, 1945.

THE POST WAR PERIOD.—After the surrender the Allied Powers assumed supreme authority in Germany. Power was to be exercised by the Commanders-in-Chief, each in his own zone of occupation and jointly in matters affecting Germany as a whole through a Control Council. Berlin was to be governed jointly by the four occupying powers. The guiding lines of policy were laid down in the agreement reached between the U.K., U.S. and U.S.S.R. Governments at Potsdam in August, 1945, which was to remain in force until a Peace Treaty should confirm or revise its directives. It was decided that "for the time being no Central German Government shall be established," but that central German administrative departments acting under the direction of the Control Council should be established in the fields of finance, transport, communications, foreign trade and industry. The

* Nazi historians referred to the National Socialist régime as *Dritte Reich*. The *First* was the Holy Roman Empire, established in A.D. 962 by Otto I of Saxony, enduring until 1806. The *Second* was established by Prince Otto von Bismarck, after the Franco-Prussian war in 1871, and endured until 1918. The *Third* was established by Adolf Hitler in 1933.

Eastern frontier of Germany was provisionally redrawn (pending final settlement in the Peace Treaty) to transfer the northern area of East Prussia, including Königsberg (now Kaliningrad), to the U.S.S.R. and the rest of East Prussia and all the area lying east of the Oder and Western Neisse rivers to Polish control. On Oct. 15, 1947, the Saar, enlarged at the expense of German territory, voted for economic union with France, but following a plebiscite was incorporated in the Federal Republic of Germany on Jan. 1, 1957. The Potsdam agreement also laid down that Germany should be disarmed and prohibited from producing armaments, that production of certain other goods should be limited to the amount needed to support a peacetime economy and that existing capital equipment surplus to these requirements should be removed as reparations and distributed by the Inter Allied Reparations Agency among the nations who had suffered war damage, in proportion to their losses. (The proportions were fixed by the Paris Conference of November, 1945.) The agreement further dealt with denazification, democratization, refugees, restitution, decartelization, etc.

Though certain details of the Potsdam agreement (not yet superseded by a Peace Treaty) have been carried out, differences in interpretation among the Allies have made it impossible to apply the provisions in full. Quadripartite control became a dead letter when the Russians withdrew from the Control Council in 1948.

Federal Republic of Germany

President, Dr. Heinrich Lübke, *born* Oct. 14, 1894, *elected* July 1, 1959, *for five years from* Sept. 15, 1959.

Cabinet

Federal Chancellor, Dr. Konrad Adenauer (C.D.U.).
Vice-Chancellor and Minister for Economic Affairs, Prof. Ludwig Erhard (C.D.U.).
Foreign Minister, Dr. Heinrich von Brentano (C.D.U.).
Interior, Dr. Gerhard Schroeder (C.D.U.).
Justice, Fritz Schäffer.
Finance, Franz Etzel (C.D.U.).
Defence, Dr. Franz-Josef Strauss (C.S.U.).
Labour, Theodor Blank (C.D.U.).
Affairs of the Federal Council and Länder, Dr. Hans-Joachim von Merkatz.
Housing, Paul Lücke (C.D.U.).
Agriculture, Werner Schwarz (C.D.U.).
All-German Affairs, Ernst Lemmer (C.D.U.).
Refugees (vacant).
Transport, Dr. Hans-Christoph Seebohm (D.P.).
Posts and Telegraphs, Richard Stücklen (C.S.U.).
Family and Youth Questions, Dr. Josef Würmeling (C.D.U.).
Economic Property of the Federal Republic, Dr. Hans Wilhelmi (C.D.U.).
Atomic Matters, Prof. Siegfried Balke (C.S.U.).

C.D.U. = Christian Democratic Union; C.S.U. = Christian Social Union; D.P. = German Party.

Embassy in London

Chesham Place, S.W.1.
[Belgravia: 5033]

Ambassador Extraordinary and Plenipotentiary, His Excellency Hans von Herwarth (1955).
Minister, Dr. Joachim Friedrich Ritter.
Counsellors, Dr. Gerhard Mottmann; Prof. Fritz Caspari.

Area and Population.—The area of the Federal Republic is approximately 95,735 sq. miles. The population at the end of 1959 was estimated at 53,048,500, compared with 40,247,100 in May 1939.

Distribution of the population among the *Länder* in June, 1956 was:—

Schleswig-Holstein	2,289,900
Hamburg	1,823,600
Lower Saxony	6,538,400
Bremen	691,600
North Rhine Westphalia	15,653,600
Hessen	4,702,800
Rhineland Palatinate	3,376,800
Baden-Württemberg	7,560,700
Bavaria	9,371,000
Saarland	1,040,100

Western Berlin had an estimated population of 2,208,000 at the end of 1959.

The estimated population of the principal cities and towns in the Federal Republic in June 1959 was:—

Hamburg	1,815,399	Mülheim/Ruhr	180,378
Munich	1,047,668	Bielefeld	174,926
Cologne	770,715	Munster/Westf.	172,692
Essen	728,231	Solingen	167,186
Düsseldorf	689,092	Aachen	164,967
Frankfurt/Main	651,690	Ludwigshafen	158,155
Dortmund	635,199	München/Gladbach	150,894
Stuttgart	626,075	Bonn	144,283
Hanover	567,984	Freiburg	137,588
Bremen	546,107	Bremerhaven	137,479
Duisburg	500,393	Osnabrück	133,554
Nuremberg	443,974	Darmstadt	133,077
Wuppertal	418,453	Saarbrücken	130,552
Gelsenkirchen	391,129	Recklinghausen	130,041
Bochum	361,687	Mainz	128,193
Mannheim	302,706	Heidelberg	127,293
Kiel	268,285	Remscheid	123,025
Oberhausen	256,270	Regensburg	122,985
Wiesbaden	253,086	Oldenburg	120,760
Braunschweig	245,983	Herne	115,858
Karlsruhe	232,813	Würzburg	111,655
Lübeck	231,462	Bottrop	110,717
Krefeld	206,113	Offenbach/Main	110,507
Augsburg	204,315	Wanne-Eickel	107,140
Kassel	200,369	Salzgitter	105,892
Hagen	190,035		

Vital Statistics.—There were 17.6 live births per 1,000 inhabitants in the Federal Republic in 1959, compared with 19.8 per 1,000 for the same area in 1938. There was excess of live births over deaths in 1959 of 6.9 per 1,000 and in 1938 of 8.4.

Government.—The Federal Republic grew out of the fusion of the three western zones. The economic union of the U.K. and U.S. zones followed the Fusion Agreement of December, 1946. The Bizone was later joined by the French zone and in 1948–49 a Parliamentary Council, elected by the Diets of the three zones, drafted a provisional democratic federal constitution for Germany. This Basic Law came into force in the three western zones on May 24, 1949. It provides for a President, elected for a five-year term, and for two houses, with a four-year-term of office, the lower elected by direct universal suffrage and the upper composed of delegates of the *Länder*. The results of the election for the lower house (*Bundestag*) held on Sept. 6, 1953, were as follows:—

Party	*Numbers*
Christian Democratic and Christian Social Unions	243
Social Democrats	151
Free Democrats	48
Refugee Party	27
German Party	15
Independents	3
Total	487

In July 1955, 7 Refugee Party members seceded and subsequently joined the Christian Democrats. In April, 1956, 14 Free Democrats seceded to form a new party, the Free Peoples' Party. In January, 1957, 10 new Saar members joined the Bundestag. The D.P. and F.V.P. have now formed a joint party with the name D.P. In July, 1960, 9 members of the D.P. seceded from the party. The figures after the election of Sept. 15, 1957, were:—

Party	*Numbers*
Christian Democratic and Christian Social Unions	270
Social Democrats	169
Free Democrats	41
German Party (German Party Free People's Party)	17
Total	497

When the Federal Government took office the Allied Military Governors were replaced by High Commissioners. In 1952 a contractual agreement was signed between the Federal Republic and the western Allies, whereby the Republic, in return for certain promises regarding a defence contribution, a foreign debt settlement, and the continuation of allied policies concerning decartelization, democratization, restitution, etc., regained virtual sovereignty in May, 1955, after ratification by all the parties concerned. The High Commissioners then became Ambassadors.

The Prime Ministers of *Länder* governments in July, 1960, were:—

Ministers-President

Baden-Württemberg.—Kurt-Georg Kiesinger.
Bavaria.—Dr. Hans Ehard.
Berlin.—Willy Brandt (*Governing Mayor*).
Bremen.—Wilhelm Kaisen.
Hamburg.—Max Brauer.
Hessen.—Dr. Georg-August Zinn.
North Rhine-Westphalia.—Dr. Franz Meyers.
Rhineland-Palatinate.—Dr. Peter Altmeier.
Saarland.—(vacant).
Lower Saxony.—Hinrich Wilhelm Kopf.
Schleswig-Holstein.—Kai Uwe von Hassel.

Economic Position.—Despite the difficulties arising from the division of Germany, which cut off from the Federal Republic the main food producing areas of Eastern Germany and some of the principal centres of light industry, German economic recovery has made rapid strides since the currency reform of 1948. As a result of United States and British economic aid and of successful economic policies pursued by the Federal Government, Germany has regained her position as the main industrial power on the Continent, and is the most economically powerful member of the European Common Market. The Gross National Product at current prices in 1959 is estimated at *DM.* 244·4 milliard, an increase of *DM.* 7·5 milliard or 17·1 per cent. over 1958 and *DM* 147·2 milliard or 151 per cent. over 1950. In accordance with the Franco-German Agreement of 1957, the economic integration of Saarland with the Federal Republic look place on July 6, 1959.

Agriculture.—The total agricultural area (in 1959) amounted to 14,331,200 hectares, of which 8,074,000 hectares were under plough. The forest area is 7,102,700 hectares. The 1959 harvest yielded 8,610,100 metric tons of bread grains, 5,783,100 metric tons of feeding and industrial grains and 22,708,300 metric tons of potatoes. The livestock population at the end of 1959 included 12,480,400 cattle, 814,200 horses, 1,084,200 sheep, 14,875,730 pigs and 60,011,200 fowls.

Industry.—The average index of industrial production per working day (excluding Saarland and Berlin) has developed as follows (1936 = 100):

	1958	1959
Mining	152	148
Manufacturing industry	237	255
(i) Basic materials	210	236
(ii) Capital goods	306	330
(iii) Consumer goods	209	222
(iv) Foodstuffs	219	224
Power (electricity and gas)	374	402
Building Industry	203	235
Total industry (including building)	232	249

Hard coal production fell from 148·8 million tons in 1958 to 141·7 million tons in 1959; brown coal from 93·5 million tons to 93·4 million tons; pig iron rose from 19·7 million tons to 21·6 million tons; crude steel from 25·7 million tons to 28·9 million tons; rolled steel products from 17·6 million tons to 19·4 million tons. An average of 113,027 passenger vehicles a month were produced in 1959 (1958 = 98,395), 17,308 commercial vehicles (1958 = 15,066), 200,000 tons of sulphuric acid (1958 = 198,000) 49,347 tons of chlorine (1958 = 44,871), 33,200 tons of cotton yarn (1958 = 32,727) and 9,389 tons of woollen yarn (1958 = 8,858), 556,658 new dwellings were completed in 1959 (1958 = 480,726).

Labour.—Of 20,135,400 employed in September, 1959, 13,304,600 were men. The average number of unemployed was 480,000, of whom 302,400 were men. In 1959, an average of 7,477,000 were employed in industry; coal mining absorbed 570,000; iron and steel production, 334,400; mechanical engineering and vehicle production, 1,239,000; chemicals, 428,000; and textiles and clothing, 911,400. Productivity of labour in industry (excluding electricity, gas and building industry) per working hour in 1959 reached 171 per cent. (1958 = 158) of the 1950 level.

Finance.—Under the Federal constitution the yields of indirect taxes, other than the beer tax, accrue to the Federal Government, while direct taxes accrue to the *Länder*, who are obliged to transfer part of them to the central authorities. As from 1961, the financial year will coincide with the calendar year instead of, as previously, ending on March 31 each year. The 1960 financial year is from April 1 to December 31, 1960, and budget estimates are therefore valid only as to 75 per cent.

The pattern of budgetary expenditure in 1960 was expected to be as follows: Total expenditure *DM.* 41·9 milliard (1959 = 39·8 milliard); Social expenditure (including housing and welfare), *DM.* 17·6 milliard (about 42 per cent.); Defence (including the amount spent on foreign troops in the Federal Republic), *DM.* 10·7 milliard (about 26 per cent.); Agriculture and food, *DM.* 2·8 milliard (about 7 per cent.); Transport, *DM.* 3·4 milliard (about 8 per cent.).

In 1952 an agreement was reached for the settlement of German pre-war and post-war foreign debts. An agreement was also signed whereby the Federal Republic will pay to Israel and Jewish organizations over a period of years reparations amounting to *DM.* 3·5 milliard.

Foreign Trade.—In 1959, imports (including West Berlin and from July 6, 1959, Saarland) were valued at *DM.* 35,823,000,000 (1958 = 31,133,000,000); and exports at *DM.* 41,184,000,000 (1958 = 36,998,000,000); 30 per cent. of imports consisted of foodstuffs and 21·6 per cent. of raw materials; 28·8 per cent. came from the Common

Market† countries 20·7 per cent. from the E.F.T.A.* and 14·7 per cent. from the United States and Canada. The Common Market† countries took 27·8 per cent. of all exports, the E.F.T.A.* 27 per cent. and the United States and Canada, 10·5 per cent.

TRADE WITH U.K.

	1958	1959
Imports from U.K...	£122,529,409	£137,796,939
Exports to U.K....	135,892,341	144,404,930

Communications.—The state-owned railways of the Federal Republic measure 18,957 miles and the privately owned railways 3,400 miles, a total of 22,357 miles. In 1959 the railways handled 327,900,000 tons of goods and the inland waterways 141,600,000 tons. Railway rolling stock (*Deutsche Bundesbahn*) included, in 1959, 7,800 steam locomotives, 938 electric locomotives, 723 diesel locomotives, 25,315 passenger coaches (including rail buses) and 254,296 goods waggons. The classified roads measure 84,000 miles. On Jan. 1, 1960, there were 3,895,760 cars and 624,939 lorries. Ocean-going shipping under the German flag in Dec., 1959, amounted to 4,743,000 tons gross.

Social Welfare.—There is compulsory insurance against sickness, accident, old age and unemployment. Children's allowances are payable in respect of the third and subsequent children. Pension schemes for widows and orphans of public servants are in operation. Public assistance is given to persons unable to earn their living, or with insufficient income to maintain a minimum standard of living.

Law and Justice.—Judicial authority is exercised by the Federal Constitutional Court, the Supreme Federal Court, and the courts of the *Länder*. Judges are independent and subject only to the law. The death sentence has been abolished.

Language and Literature.—Modern (or New High) German has developed from the time of the Reformation to the present day, with differences of dialect in Austria and Alsace and in the German-speaking cantons of Switzerland. The literary language is usually regarded as having become fixed by Luther and Zwingli at the Reformation, since which time many great names occur in all branches, notably philosophy, from Leibnitz (1646–1716) to Kant (1724–1804), Fichte (1762–1814), Schelling (1775–1854) and Hegel (1770–1831); the drama from Goethe (1749–1832) and Schiller (1759–1805) to Gerhart Hauptmann (1862–1946); and in poetry, Heine (1800–1856). German authors have received the Nobel Prize for Literature on five occasions—Theodore Mommsen (1902), R. Eucken (1908), P. Heyse (1909), Gerhart Hauptmann (1912), and Thomas Mann (1929). There are now over 1,200 daily papers.

Education.—School attendance is compulsory for all children between the ages of 6 and 14. For the school year 1959–60 there were 30,000 elementary schools, with 198,000 teachers and 5,000,000 pupils in the Federal Republic. State expenditure per primary school pupil per annum amounted to *DM.* 380. In addition there were 760 intermediate schools with 310,000 pupils and 10,100 teachers, 1,550 grammar schools with 763,000 pupils and 14,000 teachers. State expenditure per pupil for intermediate and grammar schools was *DM.* 620 per annum. The grammar school leaving examination (*Abitur*) entitles the holder to a place of study at a university. The number of examinations passed in 1957 was 38,700. Children below the age of 18 who are not attending an intermediate or grammar school are obliged to take a three-year course (part-time) at a vocational school. There were 9,700 such schools with 2,300,000 pupils and 22,000 teachers. State expenditure per pupil per annum was *DM.* 1,100. In the winter term of 1959 the 18 universities, 8 technical universities, and 8 other institutions of university status, together with teacher training and other colleges in the Federal Republic registered a total of 198,000 students. The largest universities are in Munich, Berlin, Cologne, Aachen (T.U.), Hamburg, Frankfurt, Heidelberg, Freiburg and Göttingen. There were 1,200 adult education centres with 3,500 rural branches. The attendance figure for 1959 was 4,400,000 and state expenditure amounted to 40 million *DM.*

Religion.—It is estimated that there are 24,430,815 Protestants in the Republic, 21,576,179 Roman Catholics, 17,116 Jews, 142,849 agnostics and 1,528,713 others.

BERLIN

G.O.C. British Sector, Maj.-Gen. R. Delacombe, C.B., C.B.E., D.S.O.
Deputy Commandant, F. S. Tomlinson, C.M.G.
Administrative Officer, L. H. Barnes, M.B.E.

Eastern Germany

Administration.—When the Federal Republic was formed, the People's Council of the Soviet zone, appointed in 1948, was converted into a Provisional People's Chamber. On Oct. 7, 1949, this Chamber enacted a constitution of the "German Democratic Republic," and a provisional *Land* Chamber was established consisting of fifty deputies appointed by the Diets of the *Länder*. The German Democratic Republic is not recognized by the governments of western countries. A number of governmental reforms have been introduced since the original constitution was drafted, including the abolition, in July, 1952, of the five *Land* governments and diets. From July, 1954, the main Government posts have been held as follows:—

Chairman, Council of State, W. Ulbricht, *appid.* Sept. 12, 1960.
Minister-President, Otto Grotewohl.
Deputy Minister-Presidents, H. Rau; H. Loch; L. Bolz; P. Scholz.
Chairman, State Planning Commission, B. Leuschner.
Chairman, State Control Commission, F. Lange.

It was not until the summer of 1953 that the Soviet Commander-in-Chief was replaced in the civilian sphere by a High Commissioner. In September, 1953, the post of High Commissioner was combined with that of Ambassador.

Area and Population.—The area of Eastern Germany is 41,380 sq. miles and its population in October, 1946, was 17,300,000:—

Saxony-Anhalt	4,200,000	Saxony	5,600,000
Brandenburg	2,500,000	Thuringia	2,900,000
Mecklenburg	2,100,000		

Principal cities and towns: Dresden (467,966); Leipzig (607,655); Magdeburg (236,326); Halle (222,505); Erfurt (174,633); Rostock (114,869); Zwickau (122,862), and Karlmarxstadt (Chemnitz) (250,188). Eastern Berlin, an integral part of the zone and its capital city, has a population of approximately 1,200,000.

In July, 1952, in the interests of "democratization" and the further centralization of power, the old *Länder* were abolished and replaced by 14 *Bezirke* (regions) as follows:

Land	*Bezirke*
Mecklenburg	Rostock; Schwerin; Neubrandenburg.
Brandenburg	Potsdam; Cottbus; Frankfurt.
Saxony	Karlmarxstadt; Dresden; Leipzig.
Saxony-Anhalt	Halle; Magdeburg.
Thuringia	Erfurt; Gera; Guhl.

Each region has its own *Bezirkstag* (assembly) and *Bezirksrat* (council) to deal with purely regional affairs.

Economic Position.—From the economic point of view the Eastern zone is a more unbalanced area than the Federal Republic. It is more nearly self-sufficient in food, but has few industrial raw materials apart from brown coal and copper ore. Before the war its highly developed secondary industries were dependent on Ruhr coal and steel.

The Soviets claimed reparations from Germany to a value of $(1938)10 milliard. Between 1945 and March, 1948, they removed considerable quantities of capital equipment to the U.S.S.R. and took over a number of important plants as Soviet State Concerns (S.A.G.). S.A.G.'s now account for perhaps one-eighth of all industrial production in Eastern Germany. Their products are sold partly in Germany and partly to the U.S.S.R. and other foreign countries. In addition the zone pays reparations from current production to the U.S.S.R. and, although the amounts have been reduced, the obligation continues until 1965. Economic control has been centralized, industry subjected to rigid central planning, state ownership and trading greatly expanded at the expense of private interests and the basic industries given priority over secondary industries. Large new steel plants have been erected at Fürstenberg/Oder and at Calbe, and crude steel production is now greater than before the war. Ties with the other satellites have been strengthened; over 80 per cent. of the zone's foreign trade is now with the East, and in 1950 the zone became a member of the Council for Mutual Economic Assistance (C.M.E.A.).

TRADE WITH U.K.

	1958	1959
Imports from U.K.	£2,277,689	£3,516,614
Exports to U.K.	3,406,855	4,595,331

Religions.—At the census of 1946, Eastern Germany had 14,132,174 Protestants, 2,110,507 Roman Catholics and 75,578 others.

GREECE
(Hellas)

King of the Hellenes, Paul I, *born* Dec. 14, 1901; *acceded* (on the death of his brother King George II), April 1, 1947; *married* Jan. 9, 1938, Princess Frederika, daughter of the Duke of Brunswick (*born* April 18, 1917), and has issue:—

(i) Crown Prince (*Diadoch*) H.R.H. Prince Constantine, Duke of Sparta, *born* June 2, 1940.
(ii) H.R.H. Princess Sophia, *born* Nov. 2, 1938.
(iii) H.R.H. Princess Irene, *born* May 11, 1942.

CABINET
(June, 1956)

Prime Minister, Constantine Karamanlis.
Deputy Prime Minister, P. Kanellopoulos.
Minister of Co-ordination, A. Protopapadakis.
Foreign Minister, E. Averoff-Tositsas.
Minister to the Prime Minister, C. Tsatos.
Justice, C. Kallias.
Interior, D. Makris.
Education and Cults, G. Voyadjis.
Finance, C. Papaconstantinou.
Commerce, L. Dertilis.
Industry, N. Martis.
Communications and Public Works, General Solon Ghikas.
Agriculture, C. Adamopoulos.
Minister of Social Welfare, A. Stratos.
Merchant Shipping, G. Andrianopoulos.
Labour, A. Dimitratos.
Minister for Northern Greece, A. Theologitis.

ROYAL GREEK EMBASSY IN LONDON
5I Upper Brook Street, W.1
[Mayfair: 0694]

Ambassador Extraordinary and Plenipotentiary, His Excellency Monsieur George Séfériades (1957).
Counsellor, M. J. Delivanis.
1st Secretaries, D. C. Petrou; A. J. Stephanou; A. Chorafas.
3rd Secretary (Consular Affairs), S. Konstantopoulos.
Naval and Military Attaché, Captain E. G. Panas.
Minister Plenipotentiary (Press Affairs), M. Cosmetatas.
Air Attaché, Col. M. J. Fragiskos.
Commercial Counsellor, N. Pierracos.
Commercial Secretary, S. Dritsas.
Hon. Educational Counsellor, P. Argenti.
Attaché, J. Temenides.

Consulate General and Department of Information, 34 Hyde Park Square, W.2.

There are Honorary Consulates at *Birmingham, Bradford, Bristol, Falmouth, Hull, Immingham, Liverpool, Middlesbrough, Newcastle, Plymouth, Portsmouth, Southampton* and *Yarmouth, Swansea* and *Glasgow*, and at *Belfast*.

A maritime Kingdom in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Libyan and Ionian seas, and on the E. by Turkey, with an estimated area of 51,182 sq. miles. A census held throughout the country on April 7, 1951, recorded a population of 7,632,801.

The area of the mainland is 41,328 sq. miles, and of the islands 9,854 sq. miles. The main divisions are: *Macedonia* (which includes Mt. Athos), *Thrace, Epirus, Thessaly, Continental Greece* (which includes the island of *Euboea* and the *Sporades*, or "scattered islands," of which the largest is *Skyros*), the *Peloponnese* (or *Morea*), the *Dodecanese* or *Southern Sporades* (12 islands occupied by Italy in 1911 during the Italo-Turkish War and ceded to Greece by Italy in 1947) consisting of Rhodes, Astypalaia, Karpathos, Kassos, Nisyros, Kalymnos, Leros, Patmos, Kos, Symi, Khalki and Tilos, the *Cyclades* (a circular group numbering about 200, with a total area of 923 sq. miles; the chief islands are Syros, Andros, Tinos, Naxos, Paros, Santorini, Milos and Serifos), the *Ionian Islands* (Corfu, Paxos, Levkas, Ithaca, Cephalonia, Zante and Cerigo), the *Aegean Islands* (Chios, Lesbos and Samos). In *Crete* there was for over 1,500 years (3000 to 1400 B.C.) a flourishing civilization which spread its influence far and wide throughout the Aegean, and the ruins of the palace of Minos at Cnossos afford evidence of astonishing comfort and luxury. Greek civilization emerges about 1300 B.C. and the poems of Homer, the blind poet of Chios, which were probably current about 800 B.C., record the 10-year struggle between the Achaeans of Greece and the Phrygians of Troy (1194–1184 B.C.).

Government.—The Independence of Greece dates from March 25 (O.S.), 1821, and was ratified by the *Treaty of Adrianople* (Sept. 14, 1829) and the *Convention of London* (Feb. 3, 1830), after a successful insurrection against the Ottoman Empire, to which the country had been subjected since the 15th century. The first Head of State was a Greek, John Capodistrias, who was assassinated in Nauplia in 1831. The Allied Powers then chose a prince of the Wittelsbach (Bavarian) dynasty; he ruled as King Otho until his abdication in 1862. He was succeeded by King George I of the Glucksburg (Danish) dynasty. Since then Greece has had one period as a republic (1924–35) and one period of uncertainty (from the Second World War until September, 1946), but in both cases returned to the monarchical system under the Glucksburg dynasty after a plebiscite.

At the time of its independence, the Kingdom of Greece included little more than the Peloponnese, Sterea Hellas and the Cyclades, but the Ionian Islands were added in 1864, Thessaly in 1881, Macedonia, Crete and the Aegean Islands in 1913, Western Thrace in 1919 and the Dodecanese in 1945. The Treaty of Sèvres (1922), under which Greece would have received large territories round Istanbul and in Asia Minor, was nullified by the Greek defeat in the Asia Minor campaign of 1922. This was followed by a major exchange of populations which largely settled the minority problems between Greece and Turkey. The long campaign for *enosis* (union) of Cyprus with Greece was terminated in 1959 by the Zürich and London Agreements which led to the proclamation of Cyprus as an independent republic in 1960.

On October 28, 1940, Italy declared war on Greece and invaded the country from Albania, but within a month Greek troops, assisted at sea and in the air by Great Britain, expelled the invader and advanced in triumph into Albania. On April 6, 1941, Germany invaded Yugoslavia and Greece and came to the aid of the defeated Italian forces. British and Commonwealth ground forces were sent to the assistance of Greece, but the fresh onslaught led to her occupation by German, Italian and Bulgarian troops. By her own exertions and by Allied help Greece was freed in October, 1944.

There followed in December–January, 1944–5 a short period of civil war in which the Communists attempted to seize power by force. In 1947, Communist guerilla disturbances assumed the proportions of civil war, which continued with increasing damage and destruction to the country until the summer of 1949 when the Greek Army's victories overwhelmed the guerillas. Normal conditions were sufficiently restored throughout the country to enable a general election to be held on March 5, 1950. Since then, with considerable economic help from the United States, Greece has made great progress in the formidable task of rehabilitation and reconstruction. Greece acceded to the North Atlantic Treaty in Feb. 1952. In the economic field the country has made steady, if slow, progress, despite political instability. From 1954–59 relations between Greece and the United Kingdom were severely strained by the Cyprus issue, but since its settlement by the Zürich and London agreements (February 11 and 19, 1959) they have improved rapidly. The interim Government of M. Karamanlis was confirmed in office by the General Election of February, 1956. At a general election held on May 11, 1958, under a new electoral system, the National Radical Union Party of M. Karamanlis slightly increased its majority in the Chamber, obtaining 169 seats, though this party secured a smaller proportion of the votes, and a new Government was formed by M. Karamanlis on May 17. At this election the extreme Left Wing party, E.D.A., emerged as the leading Opposition party with 77 seats in the Chamber.

Defence.—The Navy has 80 ships, about one-quarter of which are on loan from Britain. The strength of the Army is 115,000. The Air Force consists of 24,000 men, nine offensive squadrons and one transport squadron, together with a few helicopters and the necessary support, training and maintenance organizations.

Production.—Though there has in recent years been a substantial measure of industrialization, Greece is still predominantly an agricultural country. Agriculture employs about half the working population, the most important product and export being tobacco, which still, despite recent difficulties in disposing of the crop abroad, accounts for one-third of the value of total visible exports from Greece. Since the war the production of wheat, cotton and rice has been greatly increased, partly in an attempt to make the country's economy less dependent upon tobacco. The most important of the fruit trees are the olive, vine, orange, lemon, fig, almond, pomegranate and currant-vine, and considerable efforts have lately been made to develop exports of Greek fresh fruit and vegetables as well as currants and other dried fruits. Currants, grown mainly around Patras, remain one of Greece's main exports, the United Kingdom being the principal purchaser.

The principal minerals mined in Greece are iron

ore, iron pyrites, manganese, magnesite, chrome, bauxite, lead, zinc and emery, and prospecting for petroleum is being carried on. The chief industries are textiles (cotton, woollen, silk and rayon), chemicals, cement, glass, metallurgy, shipbuilding, domestic electrical equipment and footwear. An oil refinery, the first in Greece, was opened near Athens early in 1958 and industrial projects, either in the course of being carried out or planned in the near future, include the construction of a nitrogen fertilizer plant, and a factory for making tyres; the development of the country's electric power resources; irrigation and land reclamation schemes, and the exploitation of Greece's lignite resources for fuel and industrial purposes. Some of the industrial projects are being carried out with the aid of the American I.C.A. Mission and Greece enjoys substantial financial assistance from the United States and the Federal Republic of Germany.

Communications.—The 2,650 kilometres of Greek railways had all been repaired by the end of 1950, in spite of delays due to the activities of guerilla bands. All are now State owned with the exception of the Athens–Piraeus Electric Railway. The railway from Athens to the Peloponnese, serving Patras and southern Greece, is metre gauge, but the other lines, except one or two minor ones, are standard gauge. Athens is linked with Istanbul, Paris (*viâ* Belgrade, Trieste and Lausanne), Ostend (*viâ* Belgrade, Salzburg, Cologne and Brussels) and Vienna by direct sleeping-car services. Greek roads total somewhat over 50,000 kilometres, of which about 30 per cent. are classified as national highways and 30,000 km. are classified as provincial roads. More than 7,000 km. of both classes are asphalt and a further 14,000 km. are macadamized. At the end of Feb., 1960, ships under the Greek flag of more than 100 tons totalled 854 (3,595,787 tons) and Greek-owned ships under foreign flags totalled 255 (6,780,000 tons). The Greek national airline, Olympic Airways, flies numerous internal and external services, including Athens–London, and it and other airlines connect Athens directly with most countries in Europe and the Middle East.

Religion.—Over 97 per cent. of the people are adherents of the Greek Orthodox Church, which is the State religion, all others being tolerated and free from interference. The Church of Greece recognizes the spiritual primacy of the Œcumenical Patriarch at Constantinople, but is otherwise a self-governing body administered by the Holy Synod under the Presidency of the Archbishop of Athens and All Greece. The Churches of Crete and the Dodecanese are separate bodies coming directly under the Œcumenical Patriarch.

Education is free and compulsory from the age of 6 to 12 and is maintained by State grants. There are two Universities, Athens and Salonica, that of Athens being of wide repute.

Language and Literature.—The *spoken* language of modern Greece is descended by a process of natural development from the "Common Greek" of Alexander's empire. Official and technical matter is mostly composed in *Katharevusa*, a conservative literary dialect evolved by Adamantios Corais (Diamant Coray), who lived and died in Paris (1748–1833), but novels and poetry are mostly composed in *dimotiki*, a progressive literary dialect which owes much to John Psycharis (1854–1929). The poets Solomos, Palamas, Cavafis and Sikelianos have won a European reputation.

Currency

The Greek *drachma* has an official exchange rate of 84=£1 sterling and 30=U.S. $1.

(*See also* p. 84.)

GUATEMALA

(República de Guatemala)

President

Gen. Miguel Ydígoras Fuentes, *assumed office* March 1, 1958.

Legation in London

30 Collingham Gardens, S.W.5

[Fremantle: 7463]

Envoy Extraordinary and Minister Plenipotentiary in London, Col. Doroteo Monterosseu (1960).

There is a Consulate-General at *Liverpool* and Consuls at *Glasgow* and *Belfast.*

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45′ to 17° 49′, and in W. long from 88° 12′ 49″ to 92° 13′ 43″, and comprises an area of

42,042 square miles, and a population (at the census of 1950) of 2,788,122. There is a single chamber legislative assembly of 68 members and a cabinet of 11 of whom 10 are Ministers of State. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Dec., 1917. The country is well watered by numerous rivers; the climate is hot and malarial near the coast, temperate in the higher regions. The rainfall in the capital is 57 in. per annum. The chief Ψ seaports are San José de Guatemala and Champerico on the Pacific and Livingston, Matías de Gálvez (*formerly* Santo Tomás) and Puerto Barrios on the Atlantic side.

Language and Literature.—Spanish is the language of the country, and since the establishment of the University in the capital education has received a marked impulse and the high figure of illiteracy is being reduced. The National library contains about 80,000 volumes in the Spanish tongue.

FINANCE 1960–61

Estimated Revenue.....	*Quetzales*	102,433,788

Health, Dr. Najib Roger Accar.
Public Administration, Camara Bengaly.
Labour and Social Security, Cissé Fodé.
Justice, Barry Ibrahima.
Information and Tourism, Diop Alassane.
Governor of la Banque de Guinée (*with Cabinet rank*), Diakhite Moussa.

Formerly part of French West Africa, Guinea has a coastline on the Atlantic Ocean between Portuguese Guinea and the British colony of Sierra Leone and in the interior is adjacent to Sénégal, the Sudanese Republic and the Republic of Ivory Coast. Area, 96,865 sq. miles. The population was estimated by the French administration in 1957 at 2,492,000, mostly of the Fullah, Malinké and Soussou tribes. It is estimated that there are about 4,000 Europeans in the country.

Government.—Guinea was separated from Sénégal in 1891 and administered by France as a separate colony until 1958. In the referendum held in Metropolitan France and the overseas territories on Sept. 2, 1958, Guinea rejected the new French Constitution. Accordingly, on Sept. 28, it was declared that Guinea had separated itself from the other territories of French West Africa which had adopted the Constitution. French administrative and financial assistance was terminated; and Guinea left the French Community. On October 2, 1958, Guinea became an independent republic governed by a Constituent Assembly. M. Sekou Touré, Prime Minister in the Territorial Assembly, assumed office as head of the new Government.

A provisional constitution, adopted on Nov. 12, 1958, declared Guinea "a democratic, secular and social republic", powers of government being exercised by a president assisted by the Cabinet. The President, eligible for a term of 7 years and for re-election, is head of state and of the armed forces.

General recognition of Guinea as an independent state was followed by her admission to membership of the United Nations in December, 1958. Recognition by France was accorded following the conclusion of agreements between France and Guinea on financial, economic and cultural matters, signed in Paris on Jan. 7, 1959, and diplomatic relations were established on Jan. 23, 1959.

Guinea withdrew from the Franc Zone on March 1, 1960, and established her own currency, the *Guinea franc* (at par with the *franc C.F.A.*).

Production, etc.—The principal products of Guinea are bauxite, iron-ore, rubber, palm kernels, millet, rice, coffee, bananas and pineapples, wax and ivory. Principal imports are cotton goods, metal goods, wines, tobacco, petrol and salt; exports, bauxite, iron-ore, gold, hides, bananas, palm kernels and animal wax. In the mountains in the hinterland of Guinea (Fouta Djalon, 4,970 feet), where the rivers Sénégal, Gambia and Niger have their sources, large deposits of bauxite (the raw material of aluminium) were recently discovered and large-scale extraction of this ore is planned. Bauxite is at present exported from the Conakry area where there are also rich deposits of iron-ore and large-scale mining is carried on.

CAPITAL.—Ψ Conakry (100,000). Other towns are Kankan (24,000), which is connected with Conakry by a railway, Kindia (13,000), N'Zerekore, Mamou, Siguiri and Labe.

FLAG.—3 vertical stripes of red, gold and green; *Ghana-Guinea Union.*—Red, yellow and green with as many black stars as there are members.

BRITISH EMBASSY
Conakry

Ambassador Extraordinary and Plenipotentiary, His Excellency Donald Arthur Logan (1960).

HAITI

(République d'Haiti)

President, Dr. François Duvalier, *installed* Oct. 22, 1957.

EMBASSY IN LONDON
22 Hans Road, S.W.3.

Ambassador, His Excellency Dr. Colbert Bonhomme.

The Republic of Haiti occupies the western third of the island of Santo Domingo, formerly known as Hispaniola, which, next to Cuba, is the largest island in the West Indies.

The area of the Republic is estimated at 10,500 sq. miles with a population (1950 census) of 3,111,973, negroes being in the great majority. There are, however, many mulattoes and others with varying admixture of white blood, especially in the towns. About 1,000 British subjects, chiefly of British West Indian origin, reside in Haiti.

A French colony under the name of Saint-Domingue from 1697, the slave population, estimated at 500,000, revolted in 1791 under the leadership of Toussaint L'Ouverture, who was born a slave and made himself Governor-General of the colony. He capitulated to the French in 1802 and died in captivity in 1804. Resistance was continued by Jean Jacques Dessalines, also a former black slave, who, on January 1, 1803, declared the former French colony to be an independent state. It was at this time that the name of Haiti was adopted. It is an aboriginal Indian word meaning mountainous. Dessalines became Emperor of Haiti, but was assassinated in 1806. In 1915, following a period of political upheaval, the country was occupied by a force of U.S. marines. The occupation came to an end in 1934, and U.S. control of the revenue of Haiti officially ended on October 1, 1947.

The 1950 constitution provided for a Senate of 21 members and a Chamber of Deputies of 37 members. The President is elected by popular franchise for a term of six years, and is not immediately re-eligible. Women were granted full political rights in Jan. 1957. A new constitution approved in 1957 provides for the abolition of the Senate and the establishment of a one-chamber legislative assembly with 67 deputies. This will not take place, however, until 1963.

The six-year term of General Magloire having ended in December 1956, he attempted to stay in power for a further period but was forced to resign and go into exile. A period of acute upheaval followed and for many months there was no effective government. A military junta took over in June, 1957, and elections were held in September, following which Dr. Duvalier was installed as the new President of the Republic.

Production, Industry, etc.—In French colonial times, Haiti was one of the most productive countries in the world and the richest French possession. Improvident methods of peasant agriculture succeeded the plantation system and resulted in the gradual impoverishment of natural resources through exhaustion of the soil, deforestation and erosion. In recent years measures for agricultural rehabilitation have been taken with the aim of a gradual restoration of the productiveness of the country. The main project now approaching completion is a scheme for the irrigation of more than 70,000 acres of the Artibonite valley for which the Import-Export Bank approved a loan of $27,000,000 and the Development Loan Fund, on May 28, 1959, a further loan of $4,300,000. Work on the final stages of the main barrage at Peligre is not yet completed and no forecast of its completion date can be given owing to the economic situation and political instability. The principal products are coffee, bananas, log-wood, cocoa, cotton, sisal, sugar and molasses and essential oils. Coffee accounts for about two-thirds of total exports and is the mainstay of the country's economy. Exports of bauxite began in 1957 and copper mines in the Terre Neuve area will be brought into production in the near future. Lignite is known to exist in commercial quantities and a contract has been signed with a Haitian/Canadian company for its exploitation. Exploration is going on in the country for the above-mentioned minerals and also for manganese, oil and iron. Gold, silver and tin exist, but not in significant quantities. Manufactures have increased during the last five years. The tourist trade expanded rapidly until 1956, since when it has fallen off owing to political upheavals.

Communications.—There are very few asphalted roads and internal communications are very bad. A loan of $2,600,000 has been obtained from the International Bank for Reconstruction and Development to finance an improved road maintenance and repair organization, but political confusion and lack of funds have continued to delay effective progress. Railway communications are negligible, the only passenger route being from Port-au-Prince to Verrettes *viâ* St. Marc. Air services between the capital and the principal provincial towns are maintained by the Aviation Corps of the Haitian Army, which operates a civil incorporated company. The principal towns and villages are connected by telephone and/or telegraph. The complete telephone, telegraph and internal radio communications system is practically out of order. The reinstallation which was being carried out by a British firm was stopped owing to the economic crisis.

Air services by Pan-American World Airways are regular and frequent, and there are fortnightly sailings for passengers and freight for New York and Panama by the Panama Line. Freight sailings are frequent for the U.S.A., Canada and Europe. Sailings between Haiti and Jamaica are infrequent. External telegraph, telephone and postal services are normal. (Air mail transit U.K./Port-au-Prince 3–4 days.)

Climate.—The climate is tropical with comparatively little difference in the temperatures between the summer (March–Oct.) and the winter (Nov.–Feb.). The temperature at Port-au-Prince rarely exceeds 95° F., but the humidity is high, especially in the autumn.

Language and Literature.—French is the official language of the country, but most of the people speak a debased dialect known as Creole French. Education is free but estimates of illiteracy are as high as 95 per cent. There are 5 principal French daily newspapers and 2 English weekly papers published in Port-au-Prince and a French weekly paper in Cap-Haitien.

	1957–58 *Gourdes*	1958–59 *Gourdes*

104 Great Portland Street, W.1.
[Langham: 6103]

Ambassador, His Excellency Dr. Francisco José Durón (1960).
Consul-General, Dr. Gonzalo Rodriguez-Soto.
There is a Consular Office at *Birmingham*.

Honduras, one of the five Republican States of Central America, lies between lat. 13° and 16° 30′ N. and long. 83° and 89° 41′ west, with a seaboard of about 400 miles on the Caribbean Sea and an outlet, consisting of a small strip of coast 77 miles in length on the Pacific. Its frontiers are contiguous with those of Guatemala, Nicaragua and El Salvador. The Republic contains a total area of approximately 43,278 square miles and a population of 1,828,183 (estimate of June 30, 1958) of mixed Spanish and Indian blood. There is a strong foreign negro (British West Indian) element in Northern Honduras. The country is very mountainous, being traversed by the Cordilleras, but possesses well watered fertile valleys and wooded tablelands. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and mainly healthy in the uplands.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century, Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed.

Under the Constitution of Dec. 21, 1957, the Legislature consists of a single Congress of 58 members elected by popular vote in the ratio of approximately one per 30,000 inhabitants. The executive authority is vested in the President who is assisted by a Cabinet of nine Ministers. The Republic is divided into 18 departments, the largest and newest of which, Gracias a Dios, formed in Feb. 1957, covers all the territory previously known as La Mosquitia, together with portions of the Departments of Olancho and Colón. It is inhabited by Indian tribes and largely unexplored.

The chief industry is the production of bananas. Other products are coffee, coconuts, tobacco, beans, maize, rice and tropical fruits. Cattle raising is becoming an increasingly important industry, a large number of cattle being exported to the neighbouring countries every year. Honduras is also a timber producing country, the most important woods being pine, mahogany and cedar. There are large tracts of uncultivated land.

The mineral resources of the country are reputed to be considerable, but only a small portion is at present exploited owing to transport difficulties.

1,008 miles of railway were in operation in the year 1957, chiefly to serve the banana plantations and the Caribbean ports. The total road mileage is approximately 1,800, the greater part of which is in poor condition, but improvements are now being made and new roads built. There are 15 airports in use in Honduras, exclusive of numerous small landing and emergency fields. There are three international air services (TACA Internacional, PAA and TAN) and a domestic air service (SAHSA). There are 2,979 miles of telephone lines, 4,981 miles of telegraph lines and 369 post-offices.

ΨThe chief ports are Puerto Cortes, Tela and La Ceiba on the North Coast, through which passes the bulk of the trade with the United States and Europe, and Amapala, situated on Tiger Island in the Gulf of Fonseca, on the Pacific side.

Language and Literature.—The language of the country is Spanish. Primary and secondary education is free and compulsory and, although there is still a great deal of illiteracy, it is gradually diminishing. There is no recognized native literature.

[Sloane: 4048]

Minister in London, Béla Szilágyi (1959).
Consulate, 46 Eaton Place, S.W.1 (Sloane: 4462).

Area and Population.—The area of Hungary may be stated at approximately 36,000 sq. miles with a population (Jan. 1, 1960) of 9,997,870.

Government.—Hungary was reconstituted a kingdom in 1920 after having been declared a republic on Nov. 17, 1918. She joined the Anti-Comintern Pact on Feb. 24, 1939, and entered the 1939–45 War on the side of Germany. On Jan. 20, 1945, a Hungarian provisional government of liberation, which had been set up during the preceding December, signed an armistice with the United Nations under the terms of which the frontiers of Hungary were withdrawn to the limits existing in 1937.

For the first four years after the liberation, Hungary was governed by a coalition of the Smallholder, National Peasant, Social Democrat and Communist parties. During this time land reform was carried out, the great landowners being dispossessed and their estates partitioned among peasants; mines, heavy industry, banks and schools were nationalized. By 1949 the Communists, under the leadership of Mr. Rákosi, having compelled the Social Democrat Party to merge with them, and having disrupted the peasant parties, had succeeded in gaining a monopoly of power. Elections in that year, in which candidates for the National Assembly were drawn from a single list, resulted in 95.6 per cent. of the votes cast being obtained by the Communist-dominated People's Front. A campaign was opened to collectivize agriculture and by 1952 practically the entire economy had been "socialized."

In mid-1953 Mr. Imre Nagy replaced Mr. Rákosi as Prime Minister, though the latter continued to hold his post as First Secretary of the Party. Mr. Nagy introduced a more moderate policy based largely on the development of agriculture rather than heavy industry; but in April, 1955, Mr. Rákosi succeeded in turning the tables on his rival who was removed from his position as Prime Minister and subsequently expelled from the Party. But after the 20th Congress of the Soviet Communist Party, opposition to Mr. Rákosi within the Hungarian Communist Party mounted and on July 18, 1956, he was removed from his post as First Secretary and succeeded by Mr. Gerö, who had been one of his closest associates. The period from July to the outbreak of the national revolution on Oct. 23, 1956, was marked by growing ferment in intellectual circles and increased discord within the Party. The immediate signal for the revolt was a series of students' demonstrations, first in Szeged on Oct. 22 and in Budapest a day later. The chief demands put forward by students and other demonstrators were for the return of Mr. Nagy as Prime Minister, for the withdrawal of Soviet troops from the country and for free elections. Fighting broke out on the night of Oct. 23 between demonstrators, who had been joined by large numbers of factory workers, and the State Security Police (A.V.H.). Soviet forces intervened in strength early the next morning. By Oct. 30 Soviet troops had withdrawn from Budapest and on Nov. 3 Mr. Nagy formed an all-party coalition government. This government was overthrown and the revolution suppressed as the result of a renewed attack by Soviet forces on Budapest in the early hours of Nov. 4. Simultaneously the formation of a new Hungarian Revolutionary Worker Peasant Government under the leadership of Mr. Kádár, Mr. Gerö's successor as First Secretary of the Party, was announced. This Government has been in power ever since, backed by the presence of Soviet troops. It has branded the revolution as a "counter-revolution" and has suppressed all attempts at resistance. The trial and execution of Imre Nagy and three of his associates was announced on June 17, 1958.

Production, Industry, etc.—Though industrialization has made considerable progress in the last decade, agriculture still occupies an important place in the Hungarian economy and 58 per cent. of the total area of the country is arable land. In March, 1960, 14 per cent. of this arable land was owned by state farms and 58 per cent. by co-operative farms. Production of the most important crops in 1959 (a good year) was as follows (1,000 tons):—Wheat 1,999; rye 443; barley 1,093; oats 256; rice 59; maize 3,558; potatoes 2,366; sugar-beet 2,679; cattle-turnip 2,030; sunflower 115; lucerne 909; red clover 611.

Industry is mainly based on imported raw materials, but Hungary has her own coal (mostly brown), bauxite, some iron ore and oil. Output figures in 1959 (1,000 tons) were as follows:—coal 25,347; bauxite 957; iron ore 439; pig-iron 1,104; steel 1,759; crude oil 1,035; cement 1,433.

The output of raw materials and general industrial production were sharply reduced by the revolution of Oct., 1956, but all the ground then lost has since been made up and industrial production rose by 12 per cent. in 1959.

Religion and Education.—About two-thirds of the Magyars are Roman Catholics, and the remainder mostly Calvinist. There are five types of schools under the Ministry of Education—infant schools 3–6, general schools 6–14 (compulsory), vocational schools (15–18), secondary schools (15–18), universities and adult training schools (over 18). In the academic year 1959–60 there were 31,000 students at universities, 177,000 at secondary schools of all types and 1,314,000 at general schools.

Language and Literature.—Magyar, or Hungarian, is one of the Finno-Ugrian languages. Hungarian literature began to flourish in the second half of the sixteenth century. Among the greatest writers of the nineteeth and twentieth centuries are Mihály Vörösmarty (1800–1855), Sándor Petöfi (1823–1849), János Arany (1817–1882), Endre Ady (1877–1918), Attila József (1905–1937), Mihály Babits (1883–1941) and Dezsö Kosztolányi (1885–1936).

Finance.—The budget estimates for the year 1960 were: Revenue, *Forints* 67,713,086,000; Expenditure, *Forints* 67,399,667,000. The *Forint* (of 100 *Filler*) has an official exchange value of 32·87 *Forints* = £1, but travellers to Hungary are accorded a bonus of 100 per cent. when exchanging sterling and certain other foreign currencies.

TRADE	1959
Imports	*Forints* 9,269,400,000
Exports	8,994,400,000

EMBASSY IN LONDON
17 Buckingham Gate, S.W.1
[Victoria: 5337]

Ambassador Extraordinary and Plenipotentiary, His Excellency Henrik Björnsson (1960).

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23′ to 66° 33′ N. lat., and from 13° 22′ to 24° 35′ W. long., with an estimated area of 40,500 square miles, or greater than that of Ireland. The population was 173,646 on Dec. 1, 1959.

Iceland was uninhabited before the ninth century, when settlers came from Norway. For several centuries a form of republican government prevailed, with an annual assembly of leading men called the *Althing*, but in 1241 Iceland became subject to Norway, and later to Denmark. During the colonial period, Iceland maintained its cultural integrity but a deterioration in the climate, together with frequent volcanic eruptions and outbreaks of disease led to a serious fall in the standard of living and to a decline in the population to little more than 40,000. In the nineteenth century a struggle for independence began which led first to home-rule for Iceland under the Danish Crown (1918), and later to complete independence under a republican form of rule in 1944.

The Icelandic Cabinet normally consists of six Ministers, responsible to the *Althing*, a Parliamentary assembly of 60 members. The present government is a coalition of Conservatives and Social Democrats, with the Progressive and Communist parties forming the Opposition.

Iceland lives very largely by her catching and export of fish, and this is held to justify an extension of exclusive fishery limits round her coast to a greater extent than that hitherto sanctioned by international law. In 1952, the Icelandic limits were extended from three to four miles, and at the same time a new method of establishing base-lines across bays and estuaries was introduced. This led to a dispute with the U.K., and the British trawler industry succeeded in imposing a ban on the landing of fish by Icelandic trawlers in England. This dispute was settled in October, 1956, by which time a considerable proportion of the Icelandic fish trade had been diverted to Russia. Conferences on the law of the sea held at Geneva in 1958 and 1960 ended without reaching a decision and it was announced on April 28, 1960, that the British Government refused to recognize Iceland's unilateral claim for a 12-mile fishery limit.

The principal products of the island are fish, fish oils, whales, mutton, wool and ponies. The principal exports are fish, fish meals and oils, whale oil and meat, and sheepskins; the imports consist of almost all the necessaries of life, the chief items being grain and meal, sugar, coffee, salt, coal, oil and petrol, cotton goods, tobacco, spirits, hardware and timber.

At Jan. 1, 1959, the mercantile marine consisted of 28 cargo and passenger ships (41,363 tons); 48 trawlers (28,367 tons); 61 fishing vessels of 100 tons or over (10,316 tons); 619 fishing vessels under 100 tons (21,776 tons); 6 life-saving and inspection ships (1,712 tons); 4 oil carriers (13,839 tons); 2 tug-boats (295 tons) and 1 dredger (286 tons), a total of 117,987 tons. There is a regular shipping service between Reykjavik, Leith and Copenhagen, fortnightly in summer and every three weeks in winter. Frequent but irregular services run between Reykjavik and Hull, and the Continent.

A regular twice-weekly air service (daily in summer) is maintained between Renfrew and London and Reykjavik. There are also air services from the island to Scandinavia, U.S.A. and Germany. Road communications are adequate in summer but greatly restricted by snow in winter. Only roads in town centres are well surfaced. The State highways and side roads are non-metalled (gravel and lava dust). The climate and terrain make first-class surfaces for highways out of the question.

Language and Literature.—The ancient Norraena (or Northern tongue) presents close affinities to Anglo-Saxon and as spoken and written in Iceland to-day differs little from that introduced into the island in the ninth century. There is a rich literature with two distinct periods of development, from the middle of the eleventh to the end of the thirteenth century and from the beginning of the nineteenth century to the present time.

FINANCE	1958
Revenue	*Krónur* 913,663,770
Expenditure	,, 739,642,042
External Debt	,, 11,031,201

Military Attaché, Col. S. Parman.

Situated between latitudes 6° North and 11° South and between longitudes 95° and 141° East, Indonesia comprises the islands of *Java* and *Madura*, the island of *Sumatra*, the *Riouw-Lingga Archipelago* (which with Karimon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the "Residency of Riouw"), the islands of *Bangka* and *Billiton*, part of the island of *Borneo*, *Celebes island*, the *Molucca Islands* (Ternate, Halmahera, Buru, Ceram, Banda, Timor-Laut, Larat, Bachiam, Obi, Kei, Aru, Babar, Leti and Wetar), part of *Timor Island*, and the islands of *Bali* and *Lombok*, with a total area of 735,000 miles, and a population estimated at 80,000,000.

From the early part of the 17th century much of the Indonesian Archipelago was under Netherlands rule. Following the World War, 1939–45, a strong nationalistic movement manifested itself and after sporadic fighting the formal transfer of sovereignty by the Netherlands took place on December 27, 1949. The provisional federal constitution then adopted was on August 15, 1950, changed to a unitary Republic of Indonesia in which the separate provinces were guaranteed broad regional autonomy and on February 13, 1956, the agreement of 1949 with the Netherlands was unilaterally abrogated. As a result of the failure of the parliamentary parties to provide political and economic stability, President Sukarno as Commander-in-Chief of the Armed Forces proclaimed martial law on March 14, 1957, and appointed a temporary cabinet under a non-party Prime Minister. At the end of the year the Government, in response to popular feeling, took over control of most of the Dutch commercial concerns. The great majority of Dutch citizens left the country during the next few months. On February 15, 1958, regional discontent came to a head with the proclamation of a rival Indonesian Government in West Sumatra and North Celebes under Dr. Sjaffruddin. The Central Government resorted to military action and organized resistance had ceased in Sumatra by May, 1958.

On July 5, 1959, the President issued a decree dissolving the Constituent Assembly and declared the re-application of the 1945 constitution. The elected House of Representatives was dissolved by the President on March 5, 1960, and a nominated House has been set up in its place. There are also a Supreme Advisory Council and a National Planning Council with advisory powers; but effective authority is vested in the President himself.

Finance.—The budgetary system in Indonesia has been in deficit for some years now. The note circulation increased from *rupiahs* 19·5 billion to *Rp.* 25·6 billion during 1959, and to *Rp.* 32·2 by April, 1960. Gold and foreign currency cover for the currency declined during the early part of 1959 from around 8 to 5 per cent., but a revaluation of the *rupiah* in August, by means of a currency reform which also devalued the higher notes to one-tenth of their full value, readjusted the percentage of cover to over 30 per cent. An improvement in the foreign currency reserves raised this to 34·7 per cent. by the end of the year and to 39·4 per cent. by April, 1960.

Another effect of the monetary measures in August, 1959, was to reduce the *rupiah* from *Rp.* 85 = £1 to *Rp.* 126 = £1, although, as a result of exchange taxation, the effective trading rate is approximately *Rp.* 100 = £1.

Production.—Nearly 70 per cent. of the population of Indonesia is engaged in agriculture and related production. Copra, kapok, nutmeg and cinnamon are produced mainly by smallholders; palm oil, sugar, fibres and cinchona are produced by large estate companies. Rubber, tea, coffee and

tobacco are also produced in quantity. Rice is a traditional staple food for the people of Indonesia and the islands of Java and Madura are important producers.

Indonesia is rich in minerals; petroleum, tin, coal and bauxite are the principal products; gold, silver, manganese phosphates, nickel and sulphur were produced in quantity before the Second World War and there are considerable deposits.

Trade.—Commodities valued at £5,600,515 were sold to the United Kingdom in 1959, the principal items being rubber, tea, petroleum and sugar. The value of imports from the United Kingdom in 1959, mainly of machinery, electrical equipment, aircraft, cars, cycles, and other vehicles, chemical and pharmaceutical goods, woven and piece goods and sewing thread, was £11,099,892.

Transport.—In Java a main line connects Djakarta with Surabaya in the East of Java and there are several branches, including an inland line from Semarang on the North coast to Djogjakarta in the South. In Sumatra the important towns of Medan, Padang and Palembang are the centres of short railway systems.

Sea communications in the archipelago were maintained for many years by a Dutch shipping line but in December, 1957, this ceased to operate and the resulting dislocation of shipping services among the islands is only gradually being mitigated by the endeavours of the Government Shipping Board to acquire ships for various national shipping companies. Transport by small craft on the rivers of the larger islands plays an important part in the export trade. Air services in Indonesia are operated by Garuda Indonesian Airways and the country is served by various international services, including those of B.O.A.C. There are approximately 46,500 miles of roads in Indonesia.

CAPITAL: Batavia (Java) was renamed Djakarta (estimated population, 3,000,000) and is the capital of the Republic of Indonesia. Other important centres are: (Java) Surabaya, Semarang, Bandung, Tjeribon, Surakarta and Djogjakarta; (Madura) Pamekesan (180,000); (Sumatra) Palembang (500,000), Medan (500,000) and Padang; (Celebes) Macassar (450,000) and Menado; (Borneo) Banjermasin, Balikpapan and Pontianak; (Moluccas) Ternate (9,000); (Bali) Denpasar and Singaradja (120,000); (W. Timor) Kupang (10,000).

FLAG: Red and white. LANGUAGE: The official language of Indonesia is the Indonesian Language (*Bahasa Indonesia*). NATIONAL ANTHEM: *Indonesia Raya*. August 17 is celebrated as INDEPENDENCE DAY in Indonesia.

21–22 Queen's Gate, S.W.7

[Knightsbridge: 7141]

Ambassador in London (vacant).
Chargé d'Affaires, Nathir Umari.
1st Secretary, Taha Marouf.
3rd Secretaries, Abdul Moniem el-Khatib; Wigsam Zahawie.
Military Attaché, Col. Abdul Kadir Faik.
Asst. Military Attaché, Maj. Abdul Munim Lafta.
Air Attaché, Brig. Emmanuel Ashoo.
Commercial Attaché, Dr. Khalid Al-Shawi.
Cultural Attaché, Abbood Al-Baldawi (*acting*).
Press Attaché, Khalis Azmi.

Area, etc.—Lying between the Rivers Euphrates and Tigris, Iraq extends from Turkey on N. and N.E. to the Persian Gulf on the S. and S.E., and from Iran on E. to Syria and the Arabian Desert on W., the approximate position being between 37½° to 48½° E. long., and from 37½° to 30° N. lat.

The total area of Iraq is about 172,000 sq. miles, the distance from Basrah in the south to Mosul in the north being approximately 500 miles.

Population (1957 census):—

	Males	*Females*	*Totals*
Baghdad	670,161	636,443	1,306,604
Hillah	177,543	176,071	353,614
Diyalah	166,506	163,307	329,813
Diwaniyah	246,467	261,081	507,548
Ramadi	119,306	114,956	234,262
Karbalah	105,347	111,668	217,015
Kut	137,432	152,638	290,070
Basra	252,382	250,502	502,884
Amarah	162,188	167,459	329,647
Nazariyah	210,654	244,990	455,644
Mosul	363,331	354,169	717,500
Arbil	137,602	134,924	272,526
Kirkuk	196,548	192,364	388,912
Sulaimaniyah	156,165	143,813	299,978
Deserts	37,059	31,503	68,562
Iraqi communities abroad	30,750	11,714	42,464
Delayed registrations	124,632	96,434	221,066
	3,294,073	3,244,036	6,538,109

The *Liwa* is the present Iraqi unit of administration, the *Vilayet* being the former Ottoman unit.

Of the total population there were in 1947: Moslems 4,226,974 (five-thirteenths being Sunni and eight-thirteenths Shiite), Christians 141,664,

Jews 126,836, and other religions, 38,862 (Mandaeans Yazidis, Bahais, &c.). Almost the entire Jewish population has now emigrated to Israel.

The *Euphrates* (which has a total length of 1,700 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles); the other arm rises in the north-west of Erzerum in the Dumlu Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Qurna, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the districts of Diarbekir, Van and Bitlis conjoin.

Government.—Under the Treaty of Lausanne (1923), Turkey renounced the sovereignty over Mesopotamia. A provisional Arab Government was set up in Nov., 1920, and in Aug., 1921, the Emir Faisal (3rd son of ex-King Hussein of the Hejaz) was elected King of Iraq.

In 1939 King Faisal II, grandson of Feisal I, acceded to the throne at the age of 3 on the death of his father, King Ghazi, and until 1953, when Feisal II ascended the throne, Iraq was ruled by Prince Abdulillah as Regent. Faisal II, together with Prince Abdulillah, other members of the Royal family and the then Prime Minister, Gen. Nuri es-Said, was assassinated in Baghdad in July, 1958, during a *coup d'état* resulting in the formation of a republican form of government. The monarchy was succeeded by a three-man Council of Sovereignty exercising presidential powers and a republican cabinet formed by Brigadier (now Major-General) Kassem.

Production and Industry.—Iraq is capable of supporting a considerably greater population if irrigation is developed and extended. Apart from the valuable revenues to be derived from oil the wealth of the country depends upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley, beans, rice, dates and Indian corn; wheat averages 464 lb. per acre, barley 612 lb., and rice over 370 lb. Cotton growing is successful in some years. Tobacco from the northern *liwas* is sufficient for the needs of the country. The Iraq Petroleum Company's crude oil production for 1954–59 was:—

	Long Tons		Long Tons
1954.....	29,605,747	1957.....	20,195,477
1955.....	32,715,663	1958.....	33,516,772
1956.....	30,603,073	1959.....	38,904,795

Total exports of oil from Iraq in 1958 were 33,255,000 long tons.

Few industries are yet established on any scale but an increasing industrialization is taking place under both private enterprise and Government action. Existing industries include cement, building materials, flour milling, cigarettes, soap, beer, steel furniture, tanning and textiles.

Communications and Trade.—The country is being rapidly opened up and communications improved and secured, particularly in the hitherto inaccessible northern districts. Not less than 50 per cent. of all oil royalties received (a minimum of £25,000,000 oil royalties per annum is guaranteed, but the Iraq Government is at present receiving about £80,000,000 per annum) is allocated for development projects. The first five-year development programme of public works has been completed and the second one is under way, including flood control, dams and irrigation, roads and bridges, housing, schools and hospitals and the establishment of local industries. The port of Basrah is well equipped and able to handle expeditiously all seaborne traffic. Continuous dredging of the Shatt-al-Arab has provided a navigable channel of 22½ feet at low water (as compared with 9 feet before dredging was begun) giving easy access to the Port at all times. A new channel across the Fao Bar has recently been dredged. The desert route between Baghdad and the Mediterranean carries an increasing amount of traffic, though most goods reaching Iraq are still sent *vid* Basrah. Exceptional floods in the spring of 1954 caused serious damage in Central Iraq and interruptions to communications, but effective flood control works have since been completed and prevented severe flooding in 1957.

Airports for the use of international air traffic have been provided at Baghdad and Basrah (Maqil). The latter serves as a terminus for air traffic originating in the oil fields of the Persian Gulf, and as a staging post for airlines operating between Europe and the Far East. BOAC provides a weekly service between London and Baghdad, which is also served by Iraqi Airways and airlines of Egypt, Iran, the Lebanon, the Netherlands, Scandinavia, Italy, West Germany, Switzerland and Pakistan. Iraqi Airways operates a daily service to Basra and services from Baghdad to Mosul, Kirkuk, the Persian Gulf, Amman, Beirut, Cairo, Damascus, Tehran, Athens, Istanbul, Rome, Prague, Vienna, Frankfurt, London, Karachi and Bombay.

Iraqi Republican Railways provide a regular passenger and goods service between Baghdad and Basrah by the metre gauge line completed in 1920, which also extends northwards to Khanaqin, Kirkuk and Erbil. The railway line from Baghdad to Mosul, linking up through Syria and Turkey with the Mediterranean and the Bosphorus, is standard gauge.

Language, Literature and Archæology.—The language is mainly Arabic (*see* Arabia) and English is widely used in commerce, science and the arts.

There is evidence that an advanced civilization had been reached in the alluvial valley of the Euphrates while Europe was in a state of barbarism. Astronomy, geometry, engineering and land surveying were cultivated by the Sumerians of Mesopotamia, and various arts reached a point of perfection by 3000 B.C., as investigations at Ur of the Chaldees have shown. Sumerian culture spread from Mesopotamia to Crete and Egypt and to Greece. In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C.

Excavations in 1948 at Tel Abu Shahrain, 14 miles south of "Ur of the Chaldees," confirm Eridu's claim to be the most ancient city of the Sumerian world.

Hillah, the ancient city on the left bank of the Shatt el Hillah, a branch of the Euphrates, about 70 miles south of Baghdad, is near the site of Babylon and of the "house of the lofty-head" or "gate of the god" (Tower of Babel).

Mosul *Liwa* covers a great part of the ancient kingdom of *Assyria*, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul. A British archaeological expedition has been excavating at Nimrud in the same area since 1950.

Qurna, at the junction of the Tigris and Euphrates, is the traditional site of the *Garden of Eden*. The "*Tree of Knowledge*," which had stood there "from time immemorial," withered and died in December, 1946.

FINANCE

	1958–59*	1959–60*
Total revenue....	ID73,613,600	ID95,343,500
Total expenditure.	77,358,453	104,010,880

*Estimated.

The Iraqi *Dinar* of 1,000 *Fils* = £1 sterling.

TRADE
(Excluding oil)

	1957	1958
Total imports....	ID121,784,897	ID10,109,795,843
Total exports.....	12,879,622	14,247,690
Re-exports.....	2,358,502	8,057,337
	1958	1959
Imports from U.K.....	£31,109,155	£31,758,784
Exports to U.K.	50,529,283	52,801,764

The principal imports are iron and steel, mechanical and electrical machinery, motor cars, cotton and rayon piecegoods, sugar and tea; and the chief exports are crude petroleum, cereals, dates, raw wool, hides, live animals and raw cotton.

CAPITAL.—The chief city is Baghdad, the former capital of the Abbassid dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has a population of 552,047; of the other towns Mosul has a population of 340,541 and ΨBasrah, 206,302.

EMBASSY IN LONDON
2 Palace Green, Kensington, W.8

Ambassador in London, His Excellency Arthur Lourie (1960).
Consulate, 2A Palace Green, W. 8.

Area and Population.—Israel lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. 29° 30′–33° 15′ N. and long. 34° 15′–35° 40′ E. Its political neighbours are Lebanon on the North, Syria on the North and East, Jordan on the East and the Egyptian province of Sinai on the South.

The area is estimated at 7,923 square miles out of the 10,429 square miles comprised in the whole of Palestine (the remainder being occupied by Jordan and Egypt). The population was estimated (April, 1960) at 2,113,500 of whom 1,880,500 were Jews, the remainder mostly Arabs. These figures result from the gradual process of Jewish immigration during the 30 years preceding Israel's independence (in 1912 there were only 83,790 Jews in Palestine out of a total population of 752,048). During the upheavals of 1948–49 some 600,000 Arabs left the country as refugees and settled in neighbouring countries.

Hebrew is the official language of Israel. Arabic is also used extensively in Government publications and on coins and stamps. Arabs are entitled to transact all official business with Government Departments in Arabic, and provision is made in the *Knesset* for the simultaneous translation of all speeches into Arabic.

Physical Features.—Israel comprises four main regions: (*a*) the hill country of Galilee and Judæa and Samaria, rising in places to heights of 2,460 to 3,940 ft.; (*b*) the coastal plain from the Gaza strip to North of Acre, including the plain of Esdraelon running from Haifa Bay to the south-east, and cutting in two the hill region; (*c*) the Negev, a semi-desert triangular-shaped region, extending from a base south of Beersheeba, to an apex at the head of the Gulf of 'Aqaba; and (*d*) parts of the Jordan valley, including Lakes Hula, Tiberias and the south-western extremity of the Dead Sea. The principal river is the Jordan, which rises from three main sources in Israel, the Lebanon and Syria, and flows through the Hula valley and the canals which have replaced Lake Hula, drained in 1958. Between Hulata and Tiberias (Sea of Galilee) the river falls 926 ft. in 11 miles and becomes a turbulent stream. Lake Tiberias is 696 ft. below sea-level and liable to sudden storms. Between it and the Dead Sea the Jordan falls 591 ft. The other principal rivers are the Yarkon and Qishon. The largest lake is the *Dead Sea* (shared between Israel and Jordan); area 405 sq. miles, 1,286 feet below sea-level, 51·5 miles long, with a maximum width of 11 miles and a maximum depth of 1,309 ft.; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. The water, therefore, contains an extraordinarily high concentration of mineral substances. The highest mountain peak is Mount Atzmon, 3,962 feet above sea-level, near Safad, Upper Galilee.

Climate.—The climate is variable, similar to that of Lower Egypt, but modified by altitude and distance from the sea. The summer is hot but is made comfortable in most parts by daily refreshing westerly winds from the Mediterranean. The winter is the rainy season lasting from November to April, the period of maximum rainfall being January and February.

Antiquities.—The following are the principal historic sites in Israel: Jerusalem: the Church of the Dormition and the Cænaculum on Mount Zion (the principal Christian and Moslem Holy Places of the Jerusalem area are in Jordan territory): Ein Kerem: Church of the Visitation, Church of St. John the Baptist. Galilee: The Sea; Church and Mount of the Beatitudes, ruins of Capernaum and other sites connected with the life of Christ. Mount Tabor: Church of the Transfiguration. Nazareth: Church of the Annunciation and other Christian shrines associated with the childhood of Christ. There are also numerous sites dating from biblical and mediæval days, such as Ascalon, Cæsarea, Atnlit Megiddo and Hazor.

History.—The early history of Palestine, from the time when Moses led the children of Israel from Egyptian bondage towards the *Promised Land* to the time of the *Diaspora* (Dispersion) in the second century of the Christian Era, can be found in the Books of the Old Testament and in the Works of Josephus. Before the dispersion it had become the cradle of Christianity and the *Holy Land* of the Christian World, but after the break up of the Roman Empire, into which it had been brought by Pompey in 65 B.C., it was conquered by Moslem Arabs (A.D. 634), remaining under the Crescent as part of the Ottoman Empire (except for a break from 1098 to 1187 under the Crusaders) until Allenby's victory over the Germano-Turkish forces in the plain of Armageddon (Megiddo) on September 19, 1918.

On November 2, 1917, a statement, afterwards known as The *Balfour Declaration*, was made by the British government that Britain viewed with favour the establishment in Palestine of a home for the Jewish people. This principle was incorporated in the mandate to Britain, which came officially into force on Sept. 29, 1923. From 1917 until 1948 Great Britain administered Palestine and laid the foundations of modern self-government.

The British mandate ended at midnight on May 14, 1948, when the Jewish National Council proclaimed a Jewish State of Israel, with David Ben Gurion as Prime Minister. On the following day Palestine was invaded by Syrian and Lebanese troops in the north, by the Transjordan Arab Legion and the Iraqis in the east and by the Egyptians in the south. On June 30 the last British troops left Haifa, which was taken over by Israel.

Hostilities ceased in January, 1949. The four armistice agreements signed under United Nations auspices in 1949 left Israel in occupation of various areas originally allotted to the Arab State. The situation as at present governed by the terms of the armistices has not yet been stabilized by peace treaties between Israel and any of its neighbours. The Arab parts of Palestine occupied by Jordan were formally incorporated with the latter in April, 1950. Egyptian forces occupy the "Gaza strip," a small coastal area with an Arab population.

Government.—There is a Cabinet and a single-chamber Parliament (*Knesset Israel*) of 120 members. The present Cabinet is based on a coalition between the three non-Communist socialist parties (*Mapai, Achdut Ha'avoda* and *Mapam*), the National Religious Party and the liberal Progressive party. These parties, of which *Mapai* is the largest, have a working majority in the Knesset. The Cabinet was formed following the general election of November, 1959. In the Knesset, *Mapai* has 47 seats: *Herut* (outgrowth of *Irgun Zvai Leumi*) 17; National Religious Party 12; *Mapam* 9; General Zionists 8; *Achdut Ha'avoda* 7; Progressives 6; *Agudat Israel/Poalei Agudat Israel* 6; pro-*Mapai* Arab parties 5 and Communists, 3.

Immigration.—The Declaration of Independence of May 14, 1948, laid down that "the State of Israel will be open to the immigration of Jews from all countries of their dispersion." The Law of Return, passed by the *Knesset* on July 5, 1950, provides that an immigrant visa shall be granted to every Jew who expresses his desire to settle in Israel. Since the establishment of the State 958,874 immigrants had entered Israel from over 100 different countries by June 30, 1960.

Education.—Elementary education for all children from 5 to 14 years is compulsory. In the 1958–59 school year the number of pupils in elementary and secondary schools was approximately 501,000, of whom about 43,000 were Arab pupils attending Arab schools. There are some 300 schools of other types with about 27,000 pupils. The Hebrew University at Jerusalem has 4,900 graduate and undergraduate students. The Israel Institute of Technology (*Technion*) at Haifa provides courses in engineering, architecture, aeronautics and other technical subjects for over 3,000 students. Tel Aviv University provides courses in sciences and the humanities for 345 students. The Weizmann Institute of Sciences at Rehovot is engaged in pure and applied research.

Finance.—Government expenditure for the fiscal year 1958–59 totalled I£1,295,669,000, while revenue during the same period was I£1,290,988,000.

The unit of account is the Israel pound of 1,000 *prutot*. The effective rate of exchange is I£5.067 = £1 sterling.

Communications

Railways and Roads.—Israel State Railways started operating in August, 1949. Towns now served are Haifa, Tel Aviv, Jerusalem, Lydda, Naharia, Beersheba, and intermediate stations. In March, 1959, the total railway network amounted to 640 kms. There were approximately 2,995 km. of paved roads. In December, 1959, there were approximately 70,000 licensed vehicles.

Shipping.—Israel's merchant marine on January 1, 1960, included 41 vessels with a total displacement of approximately 320,000 tons. In 1959, 1,636 ships with a net tonnage of 3,030,500 entered Israel ports. Cargo unloaded during the year amounted to 1,881,034 tons and cargo loaded to 1,091,022 tons.

The chief ports are ΨHaifa, a modern harbour, with a depth of 30 ft. alongside the main quay; the new port on the Red Sea at ΨEilat, with an annual cargo-handling capacity of 250,000 tons, ΨJaffa and ΨTel Aviv, where there are harbours for small craft, and large vessels anchor at open roadstead. ΨAcre has an anchorage for small vessels.

Civil Aviation.—The B.E.A./Olympic Airways/Cyprus Airways consortium operates seven *Comet* services per week between Lydda and London, two of them *viâ* Nicosia. B.O.A.C. operates two *Britannia* services per week on the same route. Israel National Airlines (El Al) operate five *Britannia* services per week between Lydda and London and other services to Athens, Zürich, Istanbul, Paris, Rome, Vienna, Munich, Brussels, Nicosia, Tehran, Johannesburg, New York, and Amsterdam. During 1959, 2,458 aircraft arrived at Lydda carrying 82,257 passengers and 1,219,938 kilograms of freight; 85,446 passengers and 1,215,216 kilograms of freight left through the same airport.

PRODUCTION AND INDUSTRY

Agriculture.—The country is generally fertile and climatic conditions vary so widely that a large variety of crops can be grown, ranging from temperate crops, such as wheat and cherries, to subtropical crops such as sorghum, millet and mangoes. The famous "Jaffa" orange is produced in large quantities in the coastal plain for export; other kinds of citrus fruits are also grown and exported. The citrus yield during the 1959–60 season was approximately 575,000 tons. Of this total, 400,000 tons were exported, of which about 172,000 tons went to the U.K. Olives are cultivated, mainly for the production of oil used for edible purposes and for the manufacture of soap. The main winter crops are wheat and barley and various kinds of pulses, while in summer sorghum, millet, maize, sesame and summer pulses are grown. Large areas of seasonal vegetables are planted; potatoes can be grown in the autumn and in the winter. Since the establishment of the State of Israel, beef, cattle and poultry farming have been developed and the production of mixed vegetables and dairy produce has greatly increased. Tobacco and medium staple cotton are now grown. Fishing has also been extended, and production (mostly from fish ponds) reached 12,752 tons in 1959. All kinds of summer fruits such as figs, grapes, plums and apples are produced in increasing quantities for local consumption. Water supply for irrigation is the principal limiting factor to greater production, but the number of new deep wells is being extended and a plan to bring water to the Negev from the Yarkon river is nearly completed. A large part of the dairy industry is dependent on the production of fodder crops under irrigation; areas under fodder crops have doubled. The Israel land measure is the *dunam*, equivalent to 1,000 square metres (approximately a quarter of an acre).

Industry.—Among the more important industries are citrus and by-products, manufactured food products, pharmaceuticals, textiles and wearing apparel, artificial teeth, polished diamonds, plywood, cement, plastics, light engineering and the assembly of motor cars and trucks.

TRADE

	1959
Imports	I£771,407,000
Exports	326,179,000
Imports from U.K.	£15,182,049
Exports to U.K.	15,314,957

The principal imports are foodstuffs, crude oil, machinery and vehicles, iron, steel and manufactures thereof, and chemicals. The principal exports are citrus fruits and by-products, polished diamonds, plywood, cement, artificial teeth, finished and semi-finished textiles and pharmaceutical drugs.

CAPITAL, Jerusalem, population (Dec. 31, 1958), 156,000. Other principal towns are ΨTel Aviv-Jaffa (380,000); ΨHaifa and district (170,000); Ramat Gan (77,000).

FLAG: White, with two horizontal blue stripes, the Shield of David in the centre.

JERUSALEM

Jerusalem and District is at present divided between Israel and Jordan under the terms of the armistice arranged at the end of hostilities. The Old City, which contains 34 of the 36 recognized Holy Places, is under the control of Jordan; the New City, with 2 Holy Places, is under Jewish administration. A resolution proclaiming Jerusalem as the capital of Israel was adopted by the Israel parliament on Jan. 23, 1950.

BRITISH EMBASSY

Chancery: 192 Hayarkon Street, Tel Aviv; Consular and Visa Sections: Farmers' Building (Beit Haikarim).

Ambassador Extraordinary and Plenipotentiary, His Excellency Patrick Francis Hancock, C.M.G. (1959) £3,800

BRITISH COUNCIL

Representative, Dr. P. A. I. Tahourdin, O.B.E., 13 Idelson Street, Tel Aviv.

ITALY

(Repubblica Italiana)

PRESIDENT OF THE ITALIAN REPUBLIC, Giovanni Gronchi, G.C.B., *born* at Pontedera in 1887. *Elected* April 29, 1955.

CABINET

(July 27, 1960)

Prime Minister, Signor Amintore Fanfani.
Deputy Prime Minister, Senator Giovanni Piccioni.
Foreign Affairs, Prof. Antonio Segni.
Interior, Signor Mario Scelba.
Justice, Signor Guido Gonella.
Budget, Signor Giuseppe Pella.
Treasury, Prof. Emilio Paolo Taviani.
Finance, Signor Giuseppe Trabucchi.
Defence, Signor Giulio Andreotti.
Education, Senator Giacinto Bosco.
Public Works, Dr. Benigno Zaccagnini.
Agriculture and Forests, Prof. Mariano Rumor.
Transport, Signor Giuseppe Spataro.
Posts and Communications, Senator Lorenzo Spallino.
Industry and Commerce, Signor Emilio Colombo.
Labour and Social Insurance, Signor Fiorentino Sullo.
Foreign Trade, Signor Mario Mortinelli.
Merchant Marine, Senator Angelo Raffaele Jervolino.
State Participation, Signor Giorgio Bo.
Health, Signor Camillo Giardina.
Sports and Tourism, Signor Alberto Folchi.
Without Portfolio, Signor Giulio Pastore (*Fund for the South*); Signor Tiziano Tessitore (*Administrative Reform*); Prof. Codacci-Pisanelli (*Relations with Parliament*).

ITALIAN EMBASSY IN LONDON

14 Three Kings Yard, Davies Street, W.1
[Mayfair: 8200]

Italian Ambassador in London, His Excellency Count Vittorio Zoppi, G.C.V.O. (1954).
Minister-Counsellor, Signor Pasquale Prunas, K.C.V.O.
Counsellor, Signor Roberto Riccardi.
1st Secretaries, Signor Emilio Savorgnan; Signor Umberto La Rocca.
2nd Secretaries, Signor Sergio Romano; Signor Vieri Traxler.
3rd Secretary, Signor Guglielmo Guerrini-Maraldi.
Labour Counsellor, Signor Angelo Macchia.
Commercial Counsellor, Signor Clemente Boniver.
Commercial Attaché, Signor Saverio Santaniello.
Assistant Commercial Attaché, Signor Giovanni Battistini.
Naval Attaché, Capt. Emanuele Filiberto Perucca-Orfei.
Assistant Naval Attaché, Col. Rinaldo Giannini.
Military Attaché, Lt.-Col. Giangiorgio Barbasetti di Prun.
Air Attaché, Col. Flavio Danieli.
Assistant Air Attaché, Maj. Francesco Carosio.
Financial Counsellor, Signor Antonino Zecchi.
Cultural Attaché, Prof. Gabriele Baldini.
Press Attaché, Signor Mario de Mandato.
Italian Consulate General, 38 Eaton Place, S.W.1. (Sloane: 9284).
Consul General, Signor Giangiacomo Di Thiene

AREA AND POPULATION.—Italy is a Republic in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba and about 70 islands (with certain dependencies noted below). Italy is bounded on the N. by Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, etc., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area may be estimated at 324,000 sq. kilometres, about 131,000 sq. miles, with a population (estimated December, 1959) of 50,671,000.

Births in 1959 numbered 902,468, deaths 455,176, and marriages 381,105.

Physiography.—The peninsula is for the most part mountainous, but between the Apennines, which form its spine, and the East coastline are two large fertile plains; of Emilia/Romagna in the north and of Apulia in the south. The Alps form the northern limit of Italy, dividing it from France, Switzerland Austria and Yugoslavia. *Mont Blanc* (15,782 feet), the highest peak, is in the French Pennine Alps, but partly within the Italian borders are Monte Rosa (15,217 feet), Matterhorn (14,780 feet) and several peaks from 12,000 to 14,000 feet.

The chief rivers are the Po (220 miles), which flows through Piedmont, Lombardy and the Veneto and the Adige (Trentino and Veneto) in the north, the Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The *Rubicon*, a small stream flowing into the Adriatic near Rimini (and now usually identified with the Fiumicino) formed the boundary between Italy and Cisalpine Gaul: "crossing the Rubicon" (as Cæsar did in 49 B.C., thus "invading" Italy in arms) is a step definitely indicating an aggressive course of action.

GOVERNMENT.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848 to 1870, in which the great patriots Mazzini (*born* 1805; *died* 1872), Garibaldi (*born* 1807; *died* 1882) and Cavour (*born* 1810; *died* 1861) were the principal figures. It was completed when Lombardy was ceded by Austria in 1859 and Venice in 1866, and through the evacuation of Rome by the French in 1870. In 1871 the King of Italy entered Rome, and that city was declared to be the capital.

Benito Mussolini, known as *Il Duce* (The Leader), was born July 29, 1883, and was continuously in office as Prime Minister from June 30, 1925, until July 25, 1943, when the Fascist *régime* was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death on April 28, 1945.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome a decree was signed on June 5, 1944, by the late King Victor Emmanuel III under which Prince Umberto, the King's son, became "Lieutenant-General of the Realm." The King remained head of the House of Savoy and retained the title of King of Italy until his abdication on May 9, 1946, when he was succeeded by the Crown Prince.

A general election was held on June 2, 1946, together with a referendum on the question of Republic or Monarchy. The Referendum resulted in 12,717,923 votes for a Republic and 10,719,284 for a Monarchy. The Royal Family left the country on June 13, and on June 28, 1946, a Provisional President was elected.

Since the General Election of 1948, governments have been formed by Signor de Gasperi (1948–53, coalition); Signor Pella (1953–54, *Christian Democrat*); Signor Scelba (1954–55, coalition); Signor Segni (July, 1955–May, 1957, coalition); Signor Zoli (June, 1957–May, 1958, *Christian Democrat*); Signor Fanfani (May, 1958–Feb., 1959, coalition); S. Segni (Feb., 1959–Feb., 1960, *Christian Democrat*, with *Liberal* support). Signor Segni resigned on Feb. 24, 1960, when the Liberal Party withdrew its support and, after a long crisis in which two unsuccessful attempts were made to form Centre–Left governments, Signor Tambroni formed another single-party *Christian Democrat* government on March 25, 1960, enjoying the Parliamentary support of the Neo-Fascist Party. This was, however, short-lived, being succeeded in July, 1960, by a new ministry headed by Signor Fanfani which was assured of a majority in both Houses by agreement reached with the Social Democrats, Republicans and Liberals. All members of Signor Fanfani's cabinet are of the *Christian Democrat* Party.

THE NEW CONSTITUTION.—On Dec. 22, 1947, the Constituent Assembly approved the new Constitution laying the foundation of the Italian Republic, Article I of which states "Italy is a Democratic Republic founded on work. Sovereignty belongs to the people who exercise it in the forms and within the limits of the Constitution."

Production.—Agriculture, of which the principal products are cereals, vegetables, fruit, olives and wine, is Italy's basic industry. Wheat production has greatly increased since the war; the yield in 1959 showed an increase of approximately 1,000,000 tons over the average annual yield in the period 1936–39. Other important industrial crops are sugar beet, tobacco and hemp, whereas livestock breeding supplies important dairy and meat industries. Fishing is carried on extensively, mainly for domestic consumption, though some tunny is exported. Italy is generally poor in mineral resources, but the discovery and rapid exploitation since the war of large quantities of natural methane gas has reduced considerably the requirements of imported coal and lowered industrial production costs.

The production of sulphur, principally in Calabria and Sicily, is important, and among other minerals produced are iron pyrites, mercury, lead, zinc, aluminium, potassic salts and iron ores. The production of oil from natural deposits is rising rapidly and there are 35 oil refineries in the country. Marble is a traditional product particularly of the Massa Carrara district. Salt and tobacco are Government monopolies.

The chief manufactures are woollens, cotton, silk, rayons, hemp, iron and steel and their products, shipbuilding, rolling-stock, motor vehicles, rubber products, leathers, chemicals, agricultural and industrial machinery of all types, paper, furniture, footwear, food preserves and plastics. Numerous artisan industries produce gloves, straw products and typical Italian artistic products such as pottery, glassware, mosaics, coral and imitation jewellery.

TOURIST TRAFFIC.—The record total of 16,800,000 tourists visited Italy during 1959, compared with 15,300,000 in 1958, 14,600,000 in 1957 and 12,700,000 in 1956. Of the 1959 total, the largest number were from Germany (27 per cent.). There were 1,500,000 visitors from the United Kingdom (about 9 per cent.).

DEFENCE.—The *Army* consists of about 230,000 men and includes two armoured divisions, five recently reorganized infantry divisions, five Alpine brigades and six independent brigade groups. The *Navy* consists of 3 cruisers, 6 destroyers, 46 escorts, 7 submarines, 93 minesweepers and also coastal craft and fleet auxiliaries. The *Air Force* consists of about 1,000 aircraft, of which about half are operational; approximate strength: officers, 4,400; men, 46,000.

LANGUAGE AND LITERATURE.—Italian is a Romance language derived from Latin. It is spoken in its purest form at Siena (Tuscany), but there are numerous dialects, showing variously French, German, Spanish and Arabic influences. Sard, the dialect of Sardinia, is accorded by some authorities the status of a distinct Romance language. Italian literature (in addition to Latin literature, which is the common inheritance of the civilized world) is one of the richest in Europe, particularly in its golden age (Dante, 1265–1321; Petrarch, 1304–1374; and Boccaccio, 1313–1375) and in the renaissance during the fifteenth and sixteenth centuries (Ariosto, 1474–1533; Machiavelli, 1469–1527; Tasso, 1544–1595). Modern Italian literature has many noted names in prose and verse, notably Manzoni (1785–1873), Carducci (1835–1907) and Gabriele d'Annunzio (1864–1938). The Nobel Prize for Literature has been awarded to Italian authors on four occasions—G. Carducci (1906), Signora G. Deledda (1926), Luigi Pirandello (1934) and Salvatore Quasimodo (1959). In 1959, there were 94 daily newspapers published in Italy, of which 18 were published in Rome and 11 in Milan.

EDUCATION.—Primary education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the 26 Universities are of very ancient foundation, Bologna, Genoa, Macerata, Naples, Padua and Perugia in thirteenth century; Siena, Rome, Pisa, Pavia and Ferrara in fourteenth century; Catania and Turin in fifteenth century; Parma, Messina and Urbino in sixteenth century.

COMMUNICATIONS.—Serious damage was done to the Italian railway system by the war, but by the end of 1948 the work of restoring the tracks was almost completed. A large programme for rebuilding stations, replacing and increasing rolling stock, electrification and for repairing and building new roads has been carried out, special attention being given to a large-scale development programme for Southern Italy. The Italian Mercantile Marine has been increased to 5,064,681 tons (Jan. 1, 1960) compared with 3,500,000 tons before the war.

CURRENCY

At the beginning of 1960, the Italian *Lira* was quoted at approx. 1,745 = £1. (*See also* p. 84.)

TRADE

	1959
Imports	*Lire* 2,088,000,000,000
Exports	„ 1,809,000,000,000

	1958	1959
Imports from U.K. ...	£65,977,599	£72,500,548
Exports to U.K.	76,812,457	93,132,535

Imports consist chiefly of iron and steel, coal, cotton, wool, machinery, coffee, timber, wheat, chemicals and crude oil.

The principal exports are citrus and other fresh fruit, fresh vegetables, tinned fruit and vegetables, motor vehicles, machinery, artificial fibres and yarns, chemical fertilizers, pneumatic tyres, rice and oil.

The principal imports from the U.K. in 1958 were machinery, wool, toilet preparations and soaps, metal goods, chemical and scientific instruments; the principal exports to the U.K. in 1958 were fresh and dried fruit and vegetables, woven fabrics, synthetic fibre yarns, chemicals, clothing, machinery and road vehicles.

CAPITAL, Rome, founded according to legend by Romulus in the year now known as 753 B.C., is situated on the Tiber, 15 miles from its mouth. It was the focal point of Latin civilization and dominion under the Republic and afterwards under the Roman Empire, and became the capital of Italy when the kingdom was established in 1871. Population (1960), 2,012,100.

Estimated population of the principal cities and towns on March 31, 1960 was: Milan 1,481,608, ΨNaples 1,155,426, Turin 953,519, ΨGenoa 761,679, Florence 430,729, Bologna 431,949, ΨVenice 345,815, ΨTrieste 282,625, ΨBari 314,942, Verona 211,661, ΨLeghorn 159,915, ΨTaranto 193,827, Brescia 165,371, Ferrara 149,274, ΨReggio Calabria 152,810, ΨLa Spezia 121,263, ΨAncona 98,493, ΨRavenna 120,431, ΨSalerno 111,919, ΨSavona 71,537, ΨBrindisi 68,897; in *Sicily*, ΨPalermo 593,654, ΨCatania 365,912, ΨMessina 249,911, ΨTrapani 78,154, ΨSyracuse 83,579; and in *Sardinia*, ΨCagliari 173,487.

TRIESTE.—From June 12, 1945, the area of Trieste was administered by Allied Military Government; Zone A, including Duino and the city and harbour of Trieste, by Anglo-U.S. forces and Zone B, including the towns of Capodistria, Pirano and Cittanuova by Yugoslavia. Provision for setting up a Free Territory of Trieste, included in the Italian Peace Treaty signed in Paris on Feb. 10, 1947, proved to be unworkable and military occupation of the two Zones continued until 1954, when an agreement was concluded in London on Oct. 5 between Italy, Yugoslavia, the United Kingdom and the United States, partitioning this territory between Italy and Yugoslavia along the line of demarcation of the two Zones, with a minor frontier rectification in favour of Yugoslavia. Zone A, an area of about 90 square miles with a population of 296,229, was formally handed over to Italian administration on October 26, 1954.

ISLANDS.—*Pantelleria Island* (part of Trapani Province) in the Sicilian Narrows, has an area of 31 sq. miles and a population of 10,306. The *Pelagian Islands* (Lampedusa, Linosa and Lampione) are part of the Province of Agrigento and have an area of 8 sq. miles, pop. 4,458.

FLAG.—Vertical stripes of green, white and red.

BRITISH EMBASSY

Villa Wolkonsky, Via Conte Rosso, Rome.

British Ambassador, His Excellency Sir (Henry) Ashley Clarke, K.C.M.G. (1953)..... £7,000

Minister, D. S. Laskey, C.M.G., C.V.O.

Counsellors, G. G. Hannaford, C.M.G., O.B.E.; J. H. Wardle-Smith, C.M.G.

1st Secretaries, A. A. Stark; C. F. G. Ransome, C.M.G., O.B.E.; C. L. Booth; C. T. Isolani, O.B.E. (*Information Officer*); F. C. S. Bayliss, M.B.E., T.D.; J. K. F. Bamford; I. M. Holder (*Head of Consular Section*); D. G. Barr (*Visa Officer*).

2nd Secretaries, J. M. Edes; J. C. Thomas; C. C. Smellie; L. J. P. J. Craig.

Naval Attaché, Capt. S. R. le H. Lombard Hobson, O.B.E., R.N.

Asst. Naval Attaché, Cdr. W. G. M. Burn, R.N.

Military Attaché, Col. P. G. L. Cousens.

Asst. Military Attaché, Lt.-Col. M. W. S. Fleming.

Air Attaché, Group-Capt. E. G. Palmer.

Labour Attaché, K. J. Hird, O.B.E.

Chaplain, Rev. D. Wanstall, C.B.E.

BRITISH CONSULAR OFFICES

There are British Consular Offices at *Rome*, *Naples*, *Milan*, *Genoa*, *Florence*, *Palermo*, *Turin*, *Venice*, *Trieste* and *Messina*.

THE BRITISH COUNCIL

Representative, H. Harvey Wood, O.B.E., Palazzo del Drago, Via Quattro Fontane 20, Rome.

There are *British Council Institutes* at Milan and Naples, and a *Centre* at Bologna. There is also a British Institute at Florence.

JAPAN

(Nippon Koku—Land of the Rising Sun)

Emperor of Japan (*Nippon Koku Tenno*), His Majesty Hirohito, *born* April 29, 1901; *succeeded* Dec. 25, 1926; *married* (1924) Princess Nagako (*born* March 6, 1903), daughter of the late Prince Kuniyoshi Kuni (*died* Jan. 27, 1929), and has issue two sons and four daughters.

Heir-Apparent, His Imperial Highness Prince Akihito Tsugu-No-Miya, *born* Dec. 23, 1933, *married* April 10, 1959, Miss Michiko Shoda and has issue Prince Naruhito Hironomiya, *born* Feb. 23, 1960.

CABINET

(July 18, 1960)

Prime Minister, Hayato Ikeda.
Minister for Foreign Affairs, Zentaro Kosaka.
Justice, Tetsuzo Kojima.
Agriculture, Tukuo Nanjo.
Construction, Tomisaburo Hashimoto.
Labour, Hirohide Ishida.
Welfare, Mrs. Masa Nakayama.
International Trade and Industry, Mitsujiro Ishii.
Education, Masuo Araki.
Transport, Yoshio Minami.
Postal Affairs, Zenko Suzuki.
Finance, Mikio Mizuta.

JAPANESE EMBASSY IN LONDON

46 Grosvenor Street, W.1
[Hyde Park: 6030]

Ambassador, Katsumi Ohno.
Minister Plenipotentiary, Toru Nakagawa.
Counsellors, Keiichi Matsumura (*Commercial*); Shizuo Saito (*General Affairs*).
1st Secretaries, Kei Miyakawa (*Press*); Sankichi Suzuki (*Transport*); Capt. Yoshio Takahashi (*Defence Attaché*); Kyo Ando (*Agricultural*); Mizuo Kuroda (*General Affairs*); Kiyohisa Mikanagi (*General Affairs*); Jitsuo Okabe (*Labour*).
2nd Secretaries, Masataka Okura (*Financial*); Mitsutaro Kataoka (*Visas*); Shigefumi Tamiya (*Scientific*); Moriyuki Motono (*Commercial*).
3rd Secretaries, Kimimasa Tarumizu (*Financial*); Sosuke Hanaoka (*Commercial*).
Attachés, Masaki Seo (*Protocol*); Sadakazu Taniguchi (*Press*); Tsuguo Umehara (*Accounts*).

Area and Population.—Japan consists of 4 large and many small islands situated in the North Pacific Ocean between longitude 128° 6′ East and 145° 49′ East and between latitude 26° 59′ and 45° 31′ N., with a total area of 182,700 square miles and a population (Jan., 1960) of 93,160,000.

Japan Proper consists of *Honshū* (or Mainland), 230,532 sq. k. (89,011 sq. m.), *Shikoku*, 18,773 sq. k. (7,248 sq. m.), *Kyūshū*, 42,079 sq. k. (16,247 sq. m.), *Hokkaido*, 77,096 sq. k. (29,764 sq. m.). Formosa and the Kwantung Province, which had been throughout the years of Japanese expansion and aggression leased or annexed, reverted to Chinese sovereignty after the War of 1939–45.

After the unconditional surrender to the Allied Nations (Aug. 15, 1945), Japan was occupied by Allied forces under General MacArthur (Sept. 15, 1945), and the status of parts of the former Japanese Empire has yet to be determined. A Japanese peace treaty conference opened at San Francisco on Sept. 4, 1951, and on Sept. 8, 48 nations signed the treaty, which became effective on April 28, 1952. Since that date Japan has restored relations with a number of nations, including the U.S.S.R., Poland and Czechoslovakia.

British participation in the occupation of Japan was virtually over by May, 1950, at which date the British Commonwealth Occupation Force was reduced to 3,000 Australians. However, the outbreak of hostilities in Korea in June, 1950, resulted in the despatch to Korea of British Forces from the United Kingdom, Australia, New Zealand and Canada to participate in the United Nations action. The main base of this force was established in Japan at Kure, and the Japan element of the British Commonwealth Forces in Korea at its peak amounted to approximately 6,000 troops. On July 1, 1956, the base was moved to Inchon, Korea, and all Commonwealth troops had left Japan by the middle of 1957.

Under the terms of the United States–Japan Security Treaty of Sept. 8, 1951, United States forces remained to defend Japan after the coming into effect of the Peace Treaty. As Japan's own forces are built up, it is expected that the United States forces will be gradually withdrawn.

Vital Statistics.—In January, 1960, Japan proper contained 93,160,000 inhabitants. The average annual increase between 1950 and 1956 was 1,155,219. The birth rate in 1958 was 17·9 per 1,000 and the death rate 7·4 per 1,000. The *Ainu*, remnant of the indigenous inhabitants, are dying out but are still found in small numbers.

Physiography.—The coastline exceeds 17,000 miles and is deeply indented, so that few places are far from the sea. The interior is very mountainous, and crossing the mainland from the Sea of Japan to the Pacific is a group of volcanoes, mainly extinct or dormant. Mount Fuji, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is 12,370 ft. high and has been dormant since 1707, but there are other volcanoes which are active, including Mount Aso in Kyūshū. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan proper extends from sub-tropical to sub-arctic zones. Heavy snowfalls are frequent on the western slopes of Hokkaidō and Honshū, but the Pacific coasts are warmed by the Japan current. There is a plentiful rainfall and the rivers are short and swift-flowing, offering abundant opportunities for the supply of hydro-electric power.

Government.—According to Japanese tradition, Jimmu, the first Emperor of Japan, ascended the throne on Feb. 11, B.C. 660. Under the Constitution of Feb. 11, 1889, the monarchy was hereditary in the male heirs of the Imperial house. A new constitution approved by the Supreme Allied Commander was published on March 6, 1946, superseding the "*Meiji Constitution*" of 1889 and containing many radical changes based on the constitutional practices of the United Kingdom, U.S.A. and France. Among the most important innovations are the abandonment of the doctrine of Imperial Divinity, the renunciation of war, and the establishment of a Supreme Court.

The new constitution came into force on May 3, 1947. Legislative authority rests with *The Diet*, which is bicameral, consisting of a *House of Representatives* and a *House of Councillors*, both Houses being composed of elected members. Executive authority is vested in the Cabinet which is responsible to the Legislature.

The Japanese peace treaty came into force on April 28, 1952, after ratification by Argentina, Australia, Canada, Ceylon, Mexico, New Zealand, Pakistan, the U.K., the U.S.A. and Japan herself. Japan thereupon resumed her status as a sovereign and independent power.

A general election was held on May 22, 1958, in which the Liberal Democratic Party was once more returned to power. The strength of the parties in

the Lower House on May 12, 1960, was: Liberal Democratic Party, 288; Socialist Party, 126; Democratic Socialist Party, 40; Communist Party, 1; (twelve vacancies). Following an election for half the seats in the Upper House the strength of the parties there was: Liberal Democratic Party, 135; Socialist Party, 67; Democratic Socialist Party, 17; Independents, 14; Comrades Group (*formerly Green Breeze*), Communist Party, 3; vacancies, 4.

Agriculture and Livestock.—Owing to the mountainous nature of the country not more than one-sixth of its area is available for cultivation. There were in 1957 over 25,000,000 hectares of forest, which include the Cryptomeria japonica, Pinus massoniana, Zelkowa keaki, and Pawlownia imperialis in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. In 1957 there were 4,829,000 hectares under cereals (rice 3,265,000 hectares—60 per cent.). The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 12,000,000 metric tons being produced annually. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches, are produced, and the American navel orange is extensively grown. Mulberry trees are now cultivated on only 193,138 hectares (just over a quarter of the pre-war area) and silk is playing a reduced part in Japanese exports.

Minerals.—The country has mineral resources, including gold and silver, and copper, lead, zinc, iron chromite, white arsenic, coal, sulphur, petroleum, salt and uranium, but iron ore and coal are among the principal post-war imports to supply deficiencies at home.

Industry.—Japan is the most highly industrialized nation in the Far East, with the whole range of modern light and heavy industries, including mining, metals, machinery, chemicals, textiles (cotton, silk, wool and synthetics), cement, pottery, glass, rubber, lumber, paper, oil refining and shipbuilding. The labour force of Japan in January, 1960, was 41,560,000, about 19,730,000 being paid workers; of the remainder, some 10,680,000 were classed as proprietors, and another 12,690,000 were family workers. Of the total labour force, some 15,470,000 were engaged in agriculture, only 460,000 being paid employees. About 35·1 per cent. of paid industrial workers were organized into trade unions.

Communications.—There were 27,825 kilometres of Government and private railroad (steam and electric) in March, 1958. The Japanese mercantile marine reached 6,000,000 gross tons in 1941, but more than three-quarters of it was sunk during the war. By the end of October, 1959, it had been rebuilt to 6,479,000 gross tons of steel vessels (100 tons or over), and it is intended under a new long-range plan covering the period from April 1, 1958, to March 31, 1963, to continue the expansion of the fleet. The target for dry cargo vessels is 5,880,000 deadweight tons and for tankers 2,303,000 deadweight tons compared with 3,324,000 and 911,000 deadweight tons respectively in 1956, the base year for the plan.

Armed Forces.—After the unconditional surrender of August, 1945, the land forces were disarmed and disbanded and all aircraft were confiscated by the occupying forces. Although the Constitution of Japan prohibits the maintenance of armed forces, an internal security force, known as the National Police Reserve, came into being at the end of 1950. In October 1951, this Force was renamed the National Safety Force and together with a Coastal Safety Force was placed under a National Safety Agency. By January, 1953, the National Safety Force had reached its authorized strength of 110,000. In March, 1954, a Mutual Defence Agreement for the supply of equipment and materials was concluded with the United States. In June, the mission of the forces was extended to include the defence of Japan against direct and indirect aggression, the Agency was renamed the Defence Agency, the forces under it the Ground Self Defence Force and the Maritime Self Defence Force respectively, and a new arm, the Air Self Defence Force, was created. During 1956, the strength of these forces was increased to 160,000, 22,7000 and 10,350 respectively. At the end of 1959 the tonnage of the M.S.D.F. amounted to 100,000. By the end of 1960 it was planned to have 218 ships (excluding harbour craft), of a total tonnage of 14,315. The Maritime Air Arm consisted of 194 planes, of which 78 were for A/S and patrol duties. The Japanese Air Self Defence Force (J.A.S.D.F.) had, at the end of 1959, 290 piston and 260 jet training aircraft, 300 jet operational-training aircraft, 110 jet day fighter/ground attack aircraft, 47 transport aircraft and a few helicopters, the greater part being of U.S. design. Its strength was 4,805 officers, 21,820 airmen and 3,402 civilians —a total of 30,027. The authorized strength of the Ground Self Defence Force in April, 1958, was 170,000. Broadly the Force is organized in six light divisions and four combined brigades. It is equipped with weapons of U.S. manufacture.

Religion.—All religions are tolerated. The principal religions of Japan are Mahayana Buddhism and Shinto. The Roman Catholic Church has 1 Cardinal, 2 archbishops and 12 bishops. The Nippon Seikokai (Holy Catholic Church of Japan) has 10 Japanese bishops and is an autonomous branch of the Anglican communion. There is also an United Protestant Church.

Education.—According to the laws passed in 1947, education on elementary level (6-year course) and lower secondary level (3-year course) is free, compulsory and co-educational. Upper secondary schools (3-year course) are mainly established and maintained by prefectures, and are co-educational. They have several courses in general, agricultural, commercial, technical, mercantile marine, radio-communication and home-economics education, etc. There are 2- or 3-year junior colleges and 4-year universities. Some of the 4-year universities have graduate schools. In May, 1959, the total number of these junior colleges and universities was 511, 96 of which were established and maintained by the State, while 70 were established and maintained by prefectures and cities, and 345 were private institutions. The most prominent universities are the seven State Universities of Tokyo, Kyoto, Tohoku (Sendai), Hokkaidō (Sapporo), Kyushu (Fukuoka), Osaka and Nagoya, and the two private universities, Keio and Waseda.

Language and Literature.—Japanese is said to be one of the Altaic group of languages and remained a spoken tongue until the fifth-seventh centuries A.D., when the Chinese characters came into use. Most Japanese who have received school education can read and write the Chinese characters in current use (about 1,800 characters) and also the syllabary characters called Kana. English is the best known foreign language. It is compulsory in almost all middle and high schools. In January, 1958, there were 759 libraries open to the public (34 National Diet libraries, 674 state and 51 private) with 20,448,533 volumes. In addition, there are 528

University libraries with 23,545,819 volumes in October, 1959. There were 250 daily newspapers in Japan of which 14 were published at Tokyo, 12 at Osaka and 5 in the Nagoya region. Japan's present total newspaper circulation is estimated at 36,373,000 copies and 2·45 per household.

Finance

The Budget for the financial year 1959–60, ending on March 31, is estimated to balance at *Yen* 1,569,674,000,000 for revenue and expenditure on the general account.

The official rate of exchange of *yen* 360=1 U.S.$ was established on April 25, 1949, and (after Japan's accession to the International Monetary Fund) was confirmed by the Fund on May 11, 1953. The list of currencies in which banks are allowed to deal has recently been expanded considerably. Exchange rates of all currencies, other than the $U.S., are allowed to fluctuate within IMF limits.

Foreign Trade

	1956
Total Imports	U.S. $3,033,124,711
Total Visible Exports	„ 2,876,560,239

Trade with U.K.

	1958	1959
Imports from U.K.	£19,340,009	£32,216,698
Exports to U.K.	35,275,088	43,165,623

There was an adverse balance of U.S. $124,123,436 for the fiscal year ending March 31, 1959.

Being deficient in natural resources, Japan has had to develop a complex foreign trade. Principal imports consist of raw materials (cotton, wool, mineral oils, rubber, iron ore, coking coal, salt, wood pulp, hides), foodstuffs (rice, wheat, barley, soya beans, sugar), petroleum, chemicals and specialized machinery. Principal exports consist of cotton and rayon textiles, machinery, ships, metals and products, canned fish, chemicals and a wide variety of manufactured goods, including chinaware, toys, bicycles, sewing machines and cameras.

Capital of Japan, Tokyo. Its population in January, 1960, was estimated to be 9,166,956. The other chief cities had the following populations in late 1959.

ΨOsaka	2,899,000
Kyoto, the ancient capital	1,263,300
ΨNagoya	1,501,190
ΨYokohama	1,312,794
ΨKobé	1,091,523

Flag: White, charged with sun (red).

JORDAN

(The Hashemite Kingdom of The Jordan)

King of the Jordan, Hussein, G.C.V.O., *born* November 14, 1935, *succeeded* on the deposition of his father, King Talal, Aug. 11, 1952, *assumed constitutional powers*, May 2, 1953, on coming of age.
Prime Minister, Bahjat Talhouni (Aug. 29, 1960).
Minister of Foreign Affairs, Musa Naser.

Jordanian Embassy in London

7 Palace Green, W.8

[Western: 3685]

Ambassador, Anastas Hanania.
1st Secretary, Dr. Ahmed Attiyate.
Military Attaché, Lt.-Col. Abdullah Bitar.
2nd Secretary and Consul, Amar Shammout.

Area and Population.—The Hashemite Kingdom of the Jordan is made up of two areas: Western Jordan, which includes the districts of Hebron, Jerusalem and Nablus, and Eastern Jordan, which includes the districts of Ma'an, Kerak, Belqa and Ajlun. The union of East and West Jordan was effected by a decision taken unanimously by both houses of the Legislature on April 24, 1950. The union was recognized a few days later by the British Government subject to certain reservations on the subject of Jerusalem. The Kingdom is bounded on the north by Syria, on the west by Israel, on the south by Saudi Arabia and on the east by Iraq. The majority of the population are Sunni Moslems and Islam is the religion of the state. The estimated population is 1,400,000 persons, of whom about 500,000 are displaced Palestinians.

Government.—The Executive consists of a Council of Ministers and the legislature of a Senate (25 persons nominated by the King) and a House of Representatives, consisting of 50 elected members.

Production and Industry.—West Jordan is fertile, but severely eroded. East Jordan (the old Amirate of Transjordan), consists of a fertile mountainous area and the eastern half of the Jordan valley which are productive; the rest of the country is arid steppe. Jordan's only industrial product of note is raw phosphate, of which about 337,000 tons were exported in 1959, valued at nearly £1,500,000.

Communications.—The Hejaz Railway runs (with the exception of the first few miles) through Jordan territory from Deraa to Ma'an. During the Second World War, 24 miles of line were laid from Ma'an to Ras Naqb; there are good roads to all the chief towns in the country. A new road now connects Aqaba, the country's only port, with Amman.

Finance

	1960–61 (Estimates)
Expenditure	JD35,224,000
Revenue	34,000,000

KOREA

(Hankuk.)

Korea is situated between 124° 11′ and 130° 57′ E. long., and between 33° 7′ and 43° 1′ N. lat. It has an area of 85,256 sq. miles with an estimated population of about 28,000,000, of whom about 21,500,000 live south of the present dividing line. The southern and western coasts are fringed with innumerable islands, of which the largest, forming a province of its own, is Chejudo (Quelpart). The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice, barley, and other cereals, beans, cotton, tobacco and hemp. Fruit-growing and seri-culture are also practised. Ginseng, a medicinal root much affected by the Chinese, is largely grown at Kaesong (now in North Korean hands) but also in parts of South Korea. It forms a rich source of revenue. Gold, copper, coal, iron, graphite, tungsten and other minerals are distributed throughout the country, but are more abundant in the north. In pre-war days the south was mainly agricultural and most of the limited industries were in the north. Political necessity in recent years has led to some industrialization south of the demarcation line, but the southern portion of the peninsula remains predominantly agricultural.

History.—The last native dynasty (Yi) ruled from 1392 until 1910, in which year Japan formally annexed Korea. The country remained an integral part of the Japanese Empire until the defeat of Japan in 1945, when it was occupied by troops of the U.S.A. and the U.S.S.R.; the 38th parallel being fixed as the boundary between the two zones of occupation. The U.S. Government endeavoured to reach agreement with the Soviet Government for the creation of a Korean Government for the whole country and the withdrawal of all Russian and American troops. These efforts met with no success, and in September, 1947, the U.S. Government laid the whole question of the future of Korea before the General Assembly of the United Nations. The Assembly in November, 1947, resolved that elections should be held in Korea for a National Assembly under the supervision of a temporary Commission formed for that purpose by the United Nations and that the National Assembly when elected should set up a Government. The Soviet Government refused to allow the Commission to visit the Russian Occupied Zone and in consequence it was only able to discharge its function in that part of Korea which lies to the south of the 38th parallel.

The Korean War.—The country remained effectively divided into two along the line of the 38th parallel, until the aggression of June 25, 1950, when the North Korean forces invaded South Korea. On the same day, at an emergency meeting of the United Nations Security Council, a resolution was adopted calling for immediate cessation of hostilities, and the withdrawal of the North Korean armed forces to the 38th parallel. The Communist forces ignored this demand and continued their advance. In response to a Security Council recommendation that United Nations members should furnish assistance to repel the attack, 16 nations, including the United States of America and the United Kingdom, came to the aid of the Republic of Korea. A unified command under the leadership of the United States was established on July 8. Shortly afterwards U.S. troops were landed in Korea but were at first unable to stem the Communists' onslaught. Finally the United Nations and South Korea forces were able to stabilize a front around the Pusan perimeter. On September 15, U.S. Marines made a successful surprise landing at Inchon which was quickly followed by a breakout from the Pusan perimeter and a general advance to the north. The Communist forces had been pushed back almost to the Manchurian frontier, when, at the beginning of November, hordes of Chinese "Volunteers" began to pour over the Yalu River and by sheer weight of numbers forced the U.N. troops to withdraw once again south of Seoul. However, the latter quickly regrouped and threw the Communist forces back to approximately the old dividing line.

The fighting was ended by an armistice agreement signed by the U.N. Commander-in-Chief and the commanders of the North Korean army and the Chinese People's "Volunteers" on July 27, 1953. By this agreement (which was not accepted by the government of the Republic of Korea) the line of division between North and South Korea remained in the neighbourhood of the 38th parallel. The Geneva Conference discussed Korea from April 26 to June 15, 1954, but failed to agree on measures for reunifying the country.

Republic of Korea

President, Yoon Bo Sun, *elected for 4 years*, Aug. 12, 1960.
Prime Minister, John M. Chang.

KOREAN EMBASSY IN LONDON
36 Cadogan Square, S.W.1.
[Kensington: 8025]

Ambassador Extraordinary and Plenipotentiary (vacant).
Chargé d'Affaires, Tong Jin Park.
1st Secretary and Consul, Ilwoo Lee.
2nd Secretary, Ha Jong Yoon.
3rd Secretaries, Kong Chun Choi; Tai Seung Yang.
Attaché, Johngson Limb.
Naval, Military and Air Attaché, Col. Im Hwan Chung.

The Republic of Korea has been officially recognized by the Governments of the United States, France, Great Britain, and most other countries except the U.S.S.R. and its satellites. It has an area of 96,930 sq. km. (37,426 sq. miles) and a population (Census, 1958) of 21,909,742.

A general election was held on May 10, 1948, and the first National Assembly met in Seoul on May 31. The Assembly passed a Constitution on July 12, and on July 20 elected Dr. Syngman Rhee as the first President of the Republic of Korea for four years. On August 15, 1948, the Republic was formally inaugurated and American Military Government came to an end. All U.S. troops were withdrawn by the end of June, 1949.

In the elections on March 15, 1960, Syngman Rhee and his nominee the late Lee Ki Poong were returned by overwhelming majorities as President

and Vice-President respectively. Widespread resentment against the conduct of the elections culminated in demonstrations by University students in Seoul on April 18 and 19, renewed on April 25 and 26 after demonstrations by the professors, which finally led to the resignation of President Rhee on April 27 and the replacement of his Liberal Party Government. The National Assembly amended the Constitution on June 15 to restore the Cabinet system.

The Republic of Korea has an army of about 550,000 men, a small navy mainly for coast protection duties, a small air force and a Marine Corps which includes one division trained in amphibious operations.

Finance.—The Budget for the year ending December 31, 1960, balances revenue and expenditure at *Hwan* 429,860,000,000. Expenditure on National Defence is estimated at *Hwan* 148,500,000,000.

The official rate of exchange is fixed by bilateral agreement with the U.S.A. at *Hwan* 650=$1 (1,820=£1), subject to review. Most foreign trade is conducted on the basis of higher free market rates of exchange.

Trade.—The Republic of Korea's main exports are tungsten and iron ores, graphite, anthracite, fish and fish products, agar-agar, seaweed, raw silk and cotton sheeting. Her main customer is Japan. Imports greatly exceed exports. In 1959 visible exports totalled $20,451,000; imports amounted to $282,743,000 of which $204,219,000 were financed by foreign aid. Trade with the United Kingdom in 1959 was valued at: imports, £3,266,395; exports to U.K. £321,613.

CAPITAL.—Seoul, population (1959), 2,094,000. Other main centres are Ψ Pusan (pop. 1,090,000), Taegu (pop. 360,000) and Ψ Inchon (pop. 650,000). Pusan on the south-east coast, and Inchon on the west coast, only 28 miles from Seoul, are the main ports but the development of Inchon is hampered by a tide variation of 28–30 feet.

BRITISH EMBASSY
Seoul

Ambassador, His Excellency Hubert John Evans, C.M.G. (1957) £3,000
1st Secretary, C. C. Clemens, M.C.
Military Attaché, Col. M. E. Peppiatt.

2nd Secretaries, P. Bevington (*Commercial*); A. B. Smart (*Information*).
Vice-Consul, A. C. Walder.

Democratic Peoples' Republic of Korea.—Meanwhile in the Russian-occupied zone north of the 38th parallel the Democratic People's Republic had been set up with its capital at Pyongyang; a Supreme Peoples' Soviet was elected in September 1948, and a Soviet-style Constitution adopted. Recognition had been given by the U.S.S.R. and its satellites. In January, 1949, the Soviet Government announced that all Russian troops had been withdrawn from Korea by the end of December, 1948.

KUWAIT
(The Shaikdom of Kuwait)

Ruler, Shaikh Sir Abdullah as-Salim As-Sabah, G.C.M.G., C.I.E., *born* 1895, *acceded* Feb. 25, 1950.

Kuwait is an independent Arab Shaikhdom in special treaty relations with Her Majesty's Government. It extends along the shore of the Persian Gulf from Iraq to Saudi Arabia, with an area of about 5,800 square miles and a population, according to a census taken in 1957, of just over 206,000. The total European and American population was about 3,900 in 1959. The port of Ψ Kuwait, the capital (pop. about 180,000), is traditionally an *entrepôt* for goods for the interior, and for the export of pearls (in diminishing quantities), skins and wool. However, with the development of the oil industry, the importance of the *entrepôt* trade has diminished. Imports for the year 1958 amounted to approximately £78,000,000, while exports, including re-exports, amounted to about £5,500,000, excluding oil. Kuwait was traditionally the dhow-building centre for the Persian Gulf, but the craft is declining. The centre of the Kuwait Oil Company's production is at Burgan, south of Kuwait town. An oil port has been constructed by the company at Mina-al-Ahmadi, about five miles from Ahmadi, the company's administrative and residential centre. Production of crude oil in 1959 totalled 68,437,498 tons. The Company is jointly owned by the British Petroleum Company and the American Gulf Oil Corporation. It employs over 9,000 men, including British, Americans, Indians, Pakistanis, Kuwaitis and Arabs from neighbouring territories. Oil was also struck in the Kuwait-Saudi Arabian Neutral Zone to the South of the State early in 1953. Concessions for this area are held by the American Independent Oil Co. from Kuwait and the Getty Oil Company from Saudi Arabia. Total production of crude oil in the neutral zone in 1959 was approximately 4,500,000 tons. The Arabian Oil Company, of Japan, having been awarded in 1958 the oil concession for the Neutral Zone offshore sea-bed by Kuwait and Saudi Arabia for their respective half shares, commenced exploratory drilling in the summer of 1959 and struck oil in commercial quantity early in 1960.

As a result of the very considerable oil revenues, the Kuwait Government has embarked on a large scale development scheme and plans for social services. Education and medical treatment are free. New hospitals and schools continue to be built. In 1959–60 there were 24,978 boys and 15,324 girls in 104 schools. Kuwait has a domestic water supply from a State-owned sea water plant which operates on waste natural gas from the oil fields. The plant can produce over 4,000,000 gallons of fresh water daily. For storage there are two 15,000,000 gallon reservoirs and one of 3,000,000 gallons. The power station has a capacity of 70,000 kw. and additional capacity of 90,000 kw. is being installed. The town is now served by a network of dual carriage way roads and more are under construction.

Ships of British, Dutch and other lines make regular calls at Kuwait. B.O.A.C., Kuwait Airways and several Middle Eastern airlines operate regular air services, and other companies make non-scheduled flights to Kuwait under charter. Wireless communications, telephone and postal services are conducted by the Kuwait Government. Banking is carried out by the British Bank of the Middle East and the National Bank of Kuwait. The currency is the Indian external *rupee*. The introduction of a new Kuwaiti *rupee* is under consideration.

FLAG: Red, with white lettering ("Kuwait" in Arabic).

Assistant Political Agent, S. M. Black.
British Council Representative, in the Persian Gulf, O. J. J. Tuckley, M.B.E.

LAOS

King, Setha Khatya, *born* 1908, *succeeded* Nov. 4, 1959.
Prime Minister, Prince Souvana Phouma (Aug. 16, 1960).

EMBASSY IN LONDON
5 Palace Green, W.8

Ambassador Extraordinary and Plenipotentiary, H.R.H. Prince Tiao Khammao (1958).

Laos includes the former Kingdoms of Luang Prabang and Vientiane and the Principality of the Champassac, united under King Sisavang Vong of the House of Luang Prabang, father of the present ruler. The country has an estimated area of 90,000 square miles. In 1948, the population was given as 1,500,000: it is now probably slightly over 2,000,000. The administrative capital is Vientiane (estimated population 30,000–40,000). The independence of the kingdom was recognized by France in July, 1949. Laos was invaded by the Communist Viet Minh in the spring of 1953. Under the terms of the Geneva Armistice Agreements of July, 1954, the Viet Minh troops were to evacuate Laos by November of that year. The two Northern Provinces of Sam Neua and Phong Saly remained, however, under the effective control of the rebel *Pathet Lao* forces until November, 1957, when an agreement reached between the Royal Laotian Government and the *Pathet Lao* leaders provided for the assumption of control of these provinces by the Government and the integration of the Pathet Lao forces into the Royal Army.

On Aug. 10, 1960, the Government was reported to have been overthrown on August 8 by a group of military revolutionaries headed by Capt. Kong Lae. Prince Souvana Phouma was appointed Prime Minister a few days later and formed a government which included five members of the former Cabinet and eight new members approved by Capt. Kong Lae. The situation remained unsettled in autumn, 1960.

(21 Kensington Palace Gardens, W.8)
[Bayswater: 7265]

Ambassador, Hussein el-Jisr (1960).
Counsellor, Elie J. Boustany.
Attaché, Ibrahim Kharma.

The republic of the Lebanon is in the Levant, covering a portion of the former Ottoman Empire taken from the Turks by British forces (with a small French detachment and some Arab forces under the Emir Faisal and Colonel Lawrence) in 1918, but following the Anglo-French Convention of September, 1919, Great Britain withdrew in favour of France, to whom a Mandate was granted by the Supreme Council of Allied Powers in 1920. The French authorities granted a Constitution and the first President of the Republic (under the Mandate) was elected in 1926.

In 1941 hostilities broke out between the French troops in Syria and Lebanon and the Allied Forces in the Middle East, the latter having been directed to prevent further Nazi penetration into French Mandated Territory. Hostilities ceased on July 11, 1941, and the French High Command agreed to remove the garrison.

In accordance with the undertaking given by the British and Free French Forces, Syria and Lebanon were declared to be independent and separate States. In 1943 the amended Constitution came into force and the first President of the independent Lebanon Republic was elected.

Under an agreement signed by General Catroux (on behalf of the French Committee of National Liberation) and by representatives of Syria and Lebanon "all powers and capacities exercised hitherto by the French under mandate" were transferred to the Syrian and Lebanese governments as from Jan. 1, 1944.

Lebanon forms a strip, about 120 miles in length and varying in width from 30 to 35 miles, along the Mediterranean littoral, and extending from the Palestine frontier on the south to the Nahr al Kebir (15 miles north of Tripoli) on the north; its eastern boundary runs down the Anti-Lebanon range and then down the Great Central depression, the *Beqaa*, in which flow the rivers Orontes and Litani. It is divided into 5 districts, North Lebanon, Mount Lebanon, Beirut, South Lebanon and Beqaa. The seaward slopes of the mountains have a Mediterranean climate and vegetation. The inland range of Anti-Lebanon has the characteristics of steppe country. There is a mixed Arabic-speaking population of Christians, Moslems and Druses.

Area and Population.—The total area of Lebanon is about 4,300 sq. miles, the population being estimated at 1,430,000 in 1956.

Production.—Fruits are the most important products and include olives, citrus fruit and apples. Tobacco, silk, cotton, cement, textiles, confectionery, steel and wooden furniture, wines and other alcoholic drinks are also produced. There is little remaining of the famous cedars of Lebanon.

Railways.—A narrow-gauge railway runs from Beirut to Damascus, connecting at Rayak with the standard-gauge line which runs from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. A standard gauge railway also runs up the coast from Nakoura on the Palestine border, through Beirut to Tripoli, but the Beirut-Nakoura sector is not in use at present.

Roads.—All the principal towns in the country are connected by roads, for the most part good.

Civil Aviation.—Beirut International Airport is one of the most important traffic centres in the Middle East. Numerous international air services to all parts of the world pass through it, and local services connect with all Middle Eastern capitals except Tel Aviv. There are 4 national airline companies in the Lebanon serving international as well as local routes. One of these companies (Middle East Airlines) enjoys the financial support of B.O.A.C. and operates *Viscount* services.

Rivers.—The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch; the Litani flows southwards from Lebanon, turns westwards round the southern extremity of the range and flows into the Mediterranean.

Archæology, etc.—Lebanon has some important historical remains, notably Baalbek (Heliopolis) which contains the ruins of I-III century Roman temples and Jubail (Biblos), one of the oldest continuously inhabited towns in the world.

Language and Literature.—Arabic is the principal language (*see* Arabia), and French is also widely used. The use of English is increasing. About 150 newspapers and periodicals are licensed to appear in Beirut, but only about 40 of these appear regularly, of which 30 are printed in Arabic, 4 newspapers and 3 weeklies in French, 4 in Armenian and 1 in English.

Education.—There are three universities in Beirut, the American and the French (R.C.) Universities established in the last century, and the Lebanese National University which is a recent foundation and in the early stages of development. There are several institutions for vocational training and there is a good provision throughout the country of primary and secondary schools, among which are a great number of private schools.

CHIEF TOWNS.—ΨBeirut (population about 450,000) is the capital of the Lebanon. ΨTripoli (100,000), Zahlé (40,000), ΨSidon (25,000), ΨTyre (12,000) are other towns of importance.

FINANCE

Receipts and Expenditure, 1960 (Estimated) £L222,235,000.

Currency. The monetary unit is the Lebanese £(*L*); official rate £1=£L6·13. There is also an officially recognized free market in foreign currencies, which is used for nearly all commercial transactions. The free market rate for sterling is variable, but averages about £L8·88=£1.

TRADE

Principal imports: Gold and precious metals, cereals, cotton and woollen textiles, artificial and cotton yarns, iron and steel goods, wood pharmaceuticals, raw hides, sugar, motor-vehicles, livestock, wheat, flour, machinery, crude oil, chemicals and domestic electric appliances, and paper.

Principal exports: Gold and precious metals, citrus fruits, onions, textiles, apples and pears, scrap metal, vegetables, hides and skins, soap, butter, cereals, oil-seed, cement products, wooden and steel furniture, tobacco and wines.

Trade with U.K., 1959.—Imports, £9,499,559; Exports to U.K., £2,387,368.

There is also a considerable transit trade through Beirut, mainly in gold and crude oil. Lebanon is the terminal for two oil pipe lines, one, belonging to the Iraq Petroleum Company, debouching at Tripoli, the other belonging to the Trans-Arabian Pipeline Company, at Sidon. There are refineries at each end of the pipeline which can, to all intents and purposes, fulfil Lebanon's needs.

LEBANESE FLAG.—Red, white and red with a green cedar of Lebanon in the centre of the white band.

AIR TRANSIT FROM U.K.—London–Beirut (2,169 miles), 6 *hrs.* 40 *mins.*

LIBERIAN EMBASSY IN LONDON
21 Prince's Gate, S.W.7
[Kensington: 9405]

Ambassador Extraordinary and Plenipotentiary, His Excellency George T. Brewer, Jr. (1959).
Consul-General, Mrs M. Reeves-Gorgla, 23 New Burlington Street, W. 1.

An independent Negro Republic of Western Africa, occupying that part of the coast between Sierra Leone and the Ivory Coast, which is between the rivers Mano in the N.W. and Cavalla in the S.E., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50′, a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1822, and has been recognized since 1847 as an independent State. Estimates of the population vary between 750,000–2,500,000.

The executive power is vested in a President elected for 4 years (8 years in the first instance) assisted by a Cabinet; there are two houses of Legislature, the Senate, with 10 members elected for six years, and the House of Representatives with 39 members elected for four years. There is no regular army, but there is an enlisted frontier force of about 2,000 men. The artificial harbour and free port of Monrovia was opened on July 26, 1948. There are 9 ports of entry, including 3 river ports.

Liberia is receiving assistance from the U.S. International Co-operation Administration and technicians have been sent from U.S.A. to carry out various projects. A loan of $15,000,000 has been negotiated with the Import-Export Bank to finance road construction. UNESCO, WHO and FAO have missions in the country providing technical assistance.

FINANCE

	1958–59
Revenue	$22,664,199
Expenditure	*22,778,157

$=U.S. Dollar. * 9 months only.

TRADE

	1958	1959
Imports	$27,796,339	$42,908,547
Exports	53,768,257	66,892,469
Imports from U.K.*	£8,688,360	£3,067,466
Exports to U.K.	1,782,804	2,380,806

* Including shipping transferred to Liberian registration.

The principal exports are crude rubber, iron ore, uncut diamonds, palm kernels, cocoa and coffee. Iron ore deposits have recently been discovered and its export is being rapidly developed. The chief imports are manufactured goods of all kinds, transport equipment and foodstuffs.

The language of the Republic is English. British weights and measures (but American dollars) are used.

CAPITAL, Ψ Monrovia. Est. Pop. 41,000 Other ports are Ψ Marshall and Ψ Harper (Cape Palmas).

FLAG: alternate horizontal stripes (5 White, 6 Red), with 5-pointed white star on blue field in upper corner next to flagstaff.

BRITISH EMBASSY.

Ambassador, His Excellency Dr. Abdussalam Buseiri.
Counsellor, Fathi Abidia.
2nd Secretaries, Bashir Sunni Muntasser; Giuma Turkey; Zubeir Lenghi; Taher Burshan.
Cultural Attaché, Abderrazak Misellati.
Commercial Attaché, Suleiman Fteita.

Libya, on the Mediterranean coast of Africa, is bounded on the East by Egypt and the Sudan, on the South by the Republics of Chad and Niger, and on the West by Algeria and Tunisia. It consists of the three provinces of Tripolitania, Cyrenaica and the Fezzan, with a combined area of approximately 810,000 square miles and a population estimated (1954) at 1,091,000. The people of Libya are principally Arab with some Berbers in the West and African negroes in the Fezzan, and there is a considerable Italian minority in Tripolitania. Islam is the official religion of Libya, but all religions are tolerated. The official language is Arabic.

Vast sand and rock deserts, almost completely barren, occupy the greater part of Libya. The Southern part of the country lies within the Sahara Desert. There are no rivers and, as rainfall is precarious, a good harvest is infrequent. Agriculture is confined mainly to the coastal areas of Tripolitania and Cyrenaica, where barley, wheat, olives, almonds, citrus fruits and dates are produced, and to the areas of the oases, many of which are well supplied with springs supporting small fertile areas. Among the important oases are Gadames, Jofra, Sebha, Gat, Jalo, Bir Hakim and the Kufra group in the South-East. Exports from Libya include wool, cattle, sheep and horses, esparto grass, olive oil, sponges and hides and skins. Principal imports are foodstuffs, including sugar, tea and coffee and most constructional materials and consumer goods. Fifteen oil companies are prospecting in the country and two American companies, Esso and Oasis, have already found exploitable fields.

The ancient ruins in Cyrenaica, at Cyrene, Ptolemais (Tolmeta) and Apollonia, are outstanding, as are those at Leptis Magna near Homs, 70 miles from Tripoli and at Sabratha, 40 miles west of Tripoli. Recently an Italian expedition has found in the S.W. of the Fezzan a series of rock-paintings more than 3,000 years old which are technically in advance of any yet seen. The Museum in the Castello at Tripoli has been completely re-organized and is of great interest to visitors.

Communications in Libya are good in the coastal area, where a motor road runs from the Tunisian frontier through Tripoli to Benghazi, Tobruk and the Egyptian border, serving the needs of the main population centres. A road from the coast to Sebha, capital of the Fezzan, is under construction. Elsewhere roads are poor and the transport inland is confined to caravan and occasional motor bus routes. Small railway systems exist in the Tripoli and Benghazi areas. There are airports near Tripoli (Idris el Awal) and Benghazi (Benina) regularly used by commercial airlines, and military airfields at El Adem (near Tobruk, R.A.F.), and Wheelus Field, Mellaha (near Tripoli, U.S.A.A.F.).

Government.—Libya was occupied by Italy in 1911–12 in the course of the Italo-Turkish War, and under the Treaty of Ouchy (Oct., 1912) the sovereignty of the province was transferred by Turkey to Italy. In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna) were incorporated in the national territory of Italy as *Libia Italiana*. After the Second World War Tripolitania and Cyrenaica were placed provisionally under British and the Fezzan under French administration, and in conformity with a resolution of the General Assembly on Nov. 21, 1949, Libya became on Dec. 24, 1951, the first independent state to be created by the United Nations.

Libya has a federal form of government and an hereditary monarchy. Government is by a two-chamber parliament. The Senate of 24 members, equally divided between the three Provinces, is nominated half by the King and half by the three Provincial Legislative Councils. The first Senate was wholly nominated by the King, but in future half the members are to be nominated every four years. The House of Representatives is an elected body at present consisting of 55 members, 34 from Tripolitania, 15 from Cyrenaica and 6 from the Fezzan. Members are elected on a basis of one for every 20,000 inhabitants provided that the number of members in any one of the three provinces shall not be less than 5, and elections of all members are to be held every four years. Legislation may be initiated by the King, the Senate or the House of Representatives, except laws concerning the Budget or taxation, which may not be introduced by the Senate.

The three Provinces of Tripolitania, Cyrenaica and the Fezzan are each administered by a Governor assisted by an Executive and a Legislative Council.

Currency.—Libya entered the Sterling Area on January 3, 1952, and a new currency was introduced on March 24, 1952. The £ Libyan is equal to the £ Sterling and is divided into 100 piastres and

1,000 millièmes. There are seven denominations of notes (£10, 5, 1, ½, and ¼, 10 piastres and 5 piastres) and five denominations of coins (1 and 2 piastres, 5, 2 and 1 millièmes).

Grants have been made by the United Kingdom, France, Italy and the United States to foster Libya's economic development and technical assistance is being provided by the United Nations and the United States.

A treaty of alliance and friendship between the United Kingdom and Libya, together with military and financial agreements, was signed at Benghazi on July 29, 1953. The United Kingdom will provide financial aid to Libya for 20 years. During the first five years £1,000,000 was paid annually for economic development, while from 1953–55 £2,750,000, in 1956 £3,000,000 and 1957 £3,250,000 was paid to the Libyan Budget. The figure for the second five-year period has been fixed at £3,250,000 for the Budget: the development aid from this source has ceased. Libya will make military facilities available to British troops (including the R.A.F.) which will be stationed in Libya under certain conditions. The United States Government is permitted under the terms of the United States–Libyan Base Rights Agreement of Oct. 30, 1954, to maintain armed forces and installations in Libya. A separate exchange of notes governs the financial assistance which the United States Government will provide for Libya's economic development during the period of this Agreement which runs until Dec. 24, 1970.

Trade with U.K., 1959.—Imports, from U.K., £8,306,545; Exports £734,648.

CAPITAL. Tripoli and Benghazi are the joint capitals of Libya. A new Federal capital is under construction at Beida in Cyrenaica.

The principal towns with the latest available estimates of populations are Tripoli (170,000); Misurata (56,902); Benghazi (69,718); Homs-Cussabat (62,272); Derna (15,891); Barce (9,992); Tobruk (4,995); Sebha (7,298).

FLAG. The Libyan National flag is a tricolour of red, black and green horizontal stripes, bearing a white crescent and star in the centre.

BRITISH EMBASSY IN LIBYA

Ambassador Extraordinary and Plenipotentiary, His Excellency Derek Martin Hurry Riches, C.M.G. (1959) £3,800

Counsellor, G. N. Jackson, M.B.E.

Consul (*Tripoli*), W. Hickson.

Vice-Consul (*Benghazi*), K. E. Green.

2nd Secretary (*Commercial*) (*Tripoli*), D. A. Hamley.

There are British Consular Offices at *Benghazi* and *Tripoli*.

British Council Representative, Dr. A. Craig-Bennett, 16 Zaviet el Dahmani, Tripoli.

LIECHTENSTEIN

(Fürstentum Liechtenstein)

Prince, Franz Josef II., *b.* Aug. 16, 1906; *suc.* Aug. 25, 1938; *married* March 7, 1943, Countess Gina von Wilczek.

A Principality on the Upper Rhine, between Vorarlberg (Austria) and Switzerland, with an area of 59·61 square miles and a population (estimated, Dec. 31, 1959) of 16,280. The main industries are metal goods, cotton spinning and weaving, calculating machines, cameras, measuring instruments, coating of lenses, manufacture of vacuum apparatus, ceramics, artificial teeth and sausage casings, textiles, various apparatus, foodstuffs, leatherware and woodwork. The chief products are cotton yarn, cotton material, screws, needles, knitting machinery, ceramics, artificial teeth, precision measuring instruments, vacuum pumps, coated lenses, shoes, leather gloves, calculating machines, cameras, bed springs, conveyor belts, cooking ovens, boilers, preserves, damask cloth, socks and stockings, and furniture. Revenue (1959), *Swiss francs* 11,885,708 Expenditure (1959), *Swiss francs* 11,857,370.

Trade with U.K., 1959.—Imports, £49,527; Exports to U.K., £1,871,290.

The language of the Principality is German.

FLAG: Blue and Red (blue at the top, red at the bottom, with a gold crown in the blue part).

CAPITAL, Vaduz. Pop. (1959) 3,277.

British Consul-General, S. Lockhart, C.M.G., O.B.E. (1960) (resides at Zürich, Switzerland).

LUXEMBURG

(Grand-Duché de Luxembourg)

Grand Duchess, H.R.H. Charlotte, G.C.V.O., *born* Jan. 23, 1896, *succeeded* (on the abdication of her sister) Jan. 9, 1919; *married*, Nov. 6, 1919, Prince Felix of Bourbon-Parma (H.R.H. the Prince of Luxemburg, K.B.E.). *Heir Apparent*, The Hereditary Grand Duke (Prince Jean), *born* Jan. 5, 1921, *married*, April 9, 1953, Princess Joséphine-Charlotte of Belgium, and has issue, Princess Marie Astrid, *born* Feb. 17, 1954; Prince Henri, *born* April 15, 1955; Prince Jean and Princess Margaretha (twin son and daughter), *born* May 15, 1957.

Prime Minister and Minister of Finance, M. Pierre Werner.

Deputy Prime Minister, Foreign Affairs, Defence, M. Eugène Schaus.

Labour, Social Security, Public Health, M. Emile Colling.

Public Works, Physical Education, M. Robert Schaffner.

Agriculture, Education, M. Emile Schaus.

Justice, Economic Affairs, Middle Classes, M. Paul Elvinger.

Interior, Transport, M. Pierre Grégoire.

EMBASSY IN LONDON

27 Wilton Crescent, S.W.1.

[Belgravia: 6961]

Ambassador Extraordinary and Plenipotentiary and Consul-General, Monsieur André J. Clasen (1955).

A Grand Duchy in Western Europe, bounded by Germany, Belgium, and France. Established as an independent State under the sovereignty of the King of the Netherlands as Grand Duke by the Congress of Vienna in 1815, it formed part of the Germanic Confederation, 1815–66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory. On the death of the King of the Netherlands in 1890 it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the beginning of the war in 1914, but was liberated in 1918. By the *Treaty of Versailles*, 1919, Germany renounced her former agreements with Luxemburg in respect of the customs union, etc., and in 1921 an economic union was made with Belgium (Belgolux). The Grand Duchy was again invaded and occupied by Germany on May 10, 1940. The constitution of the Grand Duchy was modified on April 28, 1948, and the stipulation of permanent neutrality was then abandoned. Luxemburg is now a fully effective member of the Western association of powers and a signatory of the Brussels and North Atlantic Treaties. She is also a member of the European Coal and Steel Community, the High Authority and Court of which

have their seat in Luxemburg; of the European Economic Community and of "Euratom". Besides Belgolux, Luxemburg is also a member of the Belgium-Netherlands-Luxemburg Customs Union (Benelux).

The area is 1,000 square miles; the population (estimated, 1959) 318,000, nearly all Roman Catholics. There is a Chamber of 52 Deputies, elected by universal adult suffrage for 5 years. Legislation is submitted to the Council of State. The Grand Duchy is rich in iron-ore and possesses an important iron and steel industry with an annual productive capacity of over 3,000,000 tons. The revenue for 1960 was estimated at *Francs* 5,130,563,000, expenditure *Francs* 5,297,758,000. The Luxemburg *franc* has at present the same value as the Belgian *franc* and the latter is legal tender in the Grand Duchy. Exchange Rate, 140 *Francs* = £1. There are approximately 260 miles of railway. Imports from the United Kingdom in 1959 totalled £448,312; exports to U.K., £566,613. The capital, Luxemburg, pop. (1957), 67,500, is a dismantled fortress. The country is well wooded, with many deer and wild boar. The language is Letzeburgesch but French is the official language: all speak German and many English.

BRITISH EMBASSY
Luxemburg

Ambassador Extraordinary and Plenipotentiary, His Excellency Harold Wilfrid Armine Freese-Pennefather, C.M.G. (1957) £3,000
1st Secretary and Consul, C. A. Thompson.
Vice-Consul, B. Smith.

MADAGASCAR

(La République Malgache)

President and Head of Government, M. Philibert Tsiranana (1959).
Vice-President of the Government and Minister of Agriculture, M. Albert Sylla (1959).
Minister of Foreign Affairs, M. Louis Rakotomalala.

Area 228,000 sq. miles. Population (1960), 5,312,000. Madagascar is 240 miles distant from the S.E. coast of Africa and is the fifth largest island in the world. It became a French protectorate in 1890. In 1896 the Hova dynasty was suppressed and the administration entrusted to a Governor General. Constitutional reforms were introduced in 1957, giving the island internal autonomy and Madagascar adopted republican status on Oct., 14, 1958, while remaining within the French Community. Complete independence was proclaimed on June 26, 1960, and immediately thereafter, the President of the Republic, M. Philibert Tsiranana, signed formal agreements with the French Government confirming Madagascar's continued membership of the French Community and establishing co-operation with the French Republic on defence, monetary, judicial and educational matters, etc.

Agriculture and cattle raising are the principal industries; minerals include gold, graphite and mica. The island's basic exports suffered drastic reductions in 1959 through disastrous cyclones and accompanying floods (total exports, *Frs. CFA* 18,645,000,000 against 20,248,000,000 in 1958). Principal exports in order of value during 1959 were coffee (31 per cent. of total exports), vanilla, rice, sugar, tobacco, raffia, cloves, groundnuts, fresh meat, sisal, butter beans, hides, essential oils, mica, canned meat, clove oil and graphite. The main imports in 1959 (which totalled *Frs. CFA* 29,506,000,000) were textiles, transport equipment, metal goods, chemical products, clothing, food products and beverages, mineral products (cement, petroleum oils, etc.), machinery, etc. Trade with U.K. (1959), Imports £631,618; Exports to U.K., £806,944.

CAPITAL, Tananarive (240,000). Other towns are ΨTamatave (39,627), the chief port; Fianarantsoa (36,189); ΨMajunga (34,119), the second port; Tuléar (33,843), and Diego Suarez (22,772).

The former dependencies of Madagascar in the Mozambique Channel, Juan de Nova, Europa Island and Bassas da India (uninhabited), are integral parts of the French Republic and, as such, are administered by the Ministry of Overseas Territories and Departments of the French Government. The Island of Saint-Marie, off the east coast of Madagascar is recognized as a dependency of the Malgasy Republic but its inhabitants are to enjoy dual (French/Malgasy) nationality.

BRITISH EMBASSY
19 Rue Amiral Pierre, Tananarive
(P.O. Box 167)

Ambassador Extraordinary and Plenipotentiary, His Excellency Andrew John Ronalds, O.B.E. (1960).

There is an Honary British Vice-Consul at *Tamatave*.

MEXICAN EMBASSY IN LONDON
48 Belgrave Square, S.W.1
[Sloane: 4037]

Ambassador (vacant).
Charge d'Affaires and Acting Consul-General, Señor Don Gustavo Luders de Negri.
1st Secretaries, Señor Don Salvador Alva Cejudo; Señor Lic. Don Rubén González Sosa.
Commercial Counsellor, Señor Don Alberto C. Fernandez (*resident in* Paris).

Area and Population.—Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 14° 33′ to 32° 43′ N. lat. and 86° 46′ to 117° 08′ W. long., and comprising one of the most varied zones in the world. It contains 29 states, 2 territories, and the federal district of Mexico, making in all 32 political divisions, covering an area of 758,000 square miles. Preliminary results of the Mexican General Census taken on June 8, 1960, showed a total population of 34,625,903.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their

course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of Lower California, with a mountainous surface, separated from the mainland by the Gulf of Lower California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepetl ("El Pico de Orizaba") on the east. In February, 1943, a new volcano (*El Paricutin*) was in eruption about 250 miles from Mexico City and 20 miles from the town of Uruapan, but is no longer active. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 6,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 6,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, the *Rio Balsas* and *Rio Papaloapan*. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Pátzcuaro*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October.

History and Archaeology.—The present Mexico and Guatemala were once the centre of a remarkable indigenous civilization, which had unknown beginnings in the centuries before Christ, flowered in the periods from 500 to 1100 A.D. and 1300 to 1500 A.D. and collapsed before the little army of Spanish adventurers under Hernán Cortés in the years following 1519. Pre-Columbian Mexico was divided between different but connected Indian cultures, each of which has left distinctive archaeological remains; the best-known of these are Chichén Itzá, Uxmal, Bonampak and Palenque, in the States of Yucatán and Chiapas (Maya); Teotihuacán, renowned for the Pyramid of the Sun (216 feet high) in the Valley of Mexico (Teotihuacano); Monte Albán and Mitla, near Oaxaca (Zapotec); El Tajín in the State of Vera Cruz (Totonac); and Tula in the State of Hidalgo (Toltec). The last and most famous Indian culture of all, the Aztec, based on Tenochtitlán, suffered more than the others from the Spaniards and only very few Aztec monuments remain.

A few years after the Conquest, the Spaniards built Mexico City on the ruins of Tenochtitlán, and appointed a Viceroy to rule their new dominions, which they called New Spain. The country was largely converted to Christianity, and a distinctive colonial civilization, representing a marriage of Indian and Spanish traditions, developed and flourished, notably in architecture and sculpture. In 1810 a revolt began against Spanish rule. This was finally successful in 1821, when a precarious independence was proclaimed. Friction with the United States in Texas led to war from 1845–48, at the end of which Mexico was forced to cede the northern provinces of Texas, California and New Mexico. In 1862 Mexican insolvency resulted in invasion by French forces which installed Maximilian as Emperor. The empire collapsed with the execution of the Emperor in 1867 and the austere reformer, Juárez, restored the republic. Juárez's death was followed by the dictatorship of Porfirio Díaz, which saw an enormous increase of foreign, particularly British and United States, investment in the country. In 1910 began the Mexican Revolution which reformed the social structure and the land system, curbed the power of foreign companies and ushered in the independent industrial Mexico of today.

Government.—Under the Constitution of Feb. 5, 1917 (as subsequently amended), Congress consists of a Senate of 60 members, elected for six years, and of a Chamber of Deputies, at present numbering 162, elected for three years. Presidents, who wield full executive powers, are elected for six years: they cannot be re-elected.

There are five political parties registered in Mexico, of which by far the largest and most influential is the *Partido Revolucionario Institucional* (P.R.I.) which has for many years constituted the government party.

Communications.—Veracruz, Tampico and Coatzacoalcos are the chief ports on the Atlantic, and Guaymas, Mazatlán, Acapulco and Salina Cruz on the Pacific. Work is proceeding on two new ports, Matamoros on the Atlantic and Topolobampo on the Pacific. Registered merchant marine amounted at the end of 1958 to 256,132 gross tons, with 812 ships. There were 23,730 kilometres of railway track open in Mexico in 1958. Work is proceeding on the reorganization, rehabilitation and re-equipment of the whole system: help in this has been forthcoming from the World Bank, the Export-Import Bank and private sources in the United States. Railway wagons are already manufactured in Mexico and it is possible that railway carriages will be manufactured before very long. Work is going ahead fast on a track between Chihuahua and Topolobampo to link north central Mexico with the Pacific.

The total length of road at the end of 1959 was 47,200 kilometres, of which 41,250 kilometres were usable in all weathers. Mexico City may be reached by at least three excellent roads from the United States, and work is continuing on roads southward from Mexico City to Yucatán and the Guatamalan border. These are already usable for all but the rainy season. The road between Durango and Mazatlán should be in use in 1961.

At the end of 1958 the national telegraph system's lines were 180,046 kilometres in length. International telegraph services to the United States frontier are provided by the Government-owned Mexican Telegraph Company and then through the United States to Canada and Europe. Telephone communications are similar.

There is a good internal network of air services: commercial flights rose from 88,000 in 1958 to 102,900 in 1959. Distances covered were 48,000 kilometres within the country and 42,000 kilometres abroad in 1959. Registered civil aircraft in 1958 numbered 661, of which 85 were commercial and 576 private. The principal international air services are from Mexico to New York, Vancouver, Toronto, Los Angeles, Chicago, Miami, Lima, Guatemala, direct; Mexico to Houston–Montreal–Amsterdam; Mexico to Panama–Caracas; and Mexico to Miami–Paris.

Production.—The total acreage of arable land is estimated at 60,000,000 acres, though only some 25,000,000 acres are considered arable without artificial irrigation. Approximately 13,000,000 acres are under cultivation and great efforts are being made to increase this area. Grazing land is estimated at 80,000,000 acres and about 50,000,000 acres are under forest. The principal agricultural crops are maize, beans, wheat, sugar cane, coffee, cotton, tomatoes, chili, tobacco, rice, chickpeas, groundnuts, sesame, alfalfa, vanilla, cocoa and many kinds of fruit, both tropical and temperate.

The maguey, or Mexican cactus yields several fermented drinks, mezcal and tequila (distilled) and pulque (undistilled). Another species of the same plant supplies sizal-hemp (henequen). The forests abound in mahogany, rosewood, ebony and chicle trees.

In 1959 there were 21,561,000 head of cattle, 5,228,000 horses, 2,698,000 mules, 3,297,000 donkeys, 5,738,000 sheep, 10,620,000 goats, 5,422,000 pigs and 127,067,000 poultry.

The principal industries (apart from agriculture) are mining and petroleum, but during recent years there has been very considerable expansion of both light and heavy industries, 80 per cent. of all consumer goods now being made in Mexico. Most of the remaining 20 per cent. is in fact made up of bulk imports of foodstuffs and motor vehicles for assembly, so that the true figure for local manufacture of consumer goods is nearer to 92 per cent. The steel industry has expanded rapidly and produced 1,250,000 tons of steel in 1959. The mineral wealth is great, but in recent years the low world market prices have caused a slump in the mining industry. The principal minerals are gold, silver, copper, lead, zinc, quick-silver, iron and sulphur. Substantial reserves of uranium have been found.

MINERAL PRODUCTION, 1959

	Kg.		*Tons*
Gold	9,756	Zinc	263,935
Silver	1,371	Sulphur	1,338,404
	Tons	Manganese	76,935
Copper	57,274	Coal	1,576,616
Lead	130,680		

The total petroleum reserves are said to be over 4,000 m. U.S. barrels. Total production of crude oil and natural gasoline reached 105,700,000 barrels in 1959, against 96,902,000 in 1958. During 1959 Petróleos Mexicanos, the nationalized oil industry, received large credits from various countries for the re-equipment of the industry and the development of the petro-chemical industry.

Woollen and cotton spinning and weaving, the making of footwear and clothing and of domestic appliances of all kinds have made such progress in recent years that all these industries are protected by high import duties and import licence restrictions.

An indication of the rapid industrial expansion of Mexico is that output of electricity increased from 4,423 million kWh in 1950 to 9,774 million kWh in 1959.

Defence.—The regular army has a strength of fifty infantry battalions, one infantry brigade and a Presidential Guard of three battalions, 21 cavalry regiments, a parachute battalion and a small number of artillery and engineer units. There is also a conscript army of about 250,000 men organized into National Service divisions, each 6,000–7,000 strong. The Navy has some 36 ships of all kinds and the Air Force some 160 aircraft.

Language and Literature.—Spanish is the official language of Mexico and is spoken by about 90 per cent. of the population. About 2,500,000 inhabitants speak Indian languages, but half of these speak Spanish as well. Of those speaking indigenous languages only about 30 per cent. speak Nahuatl, 9 per cent. Maya, 8 per cent. Zapotec, 7 per cent. Otomi and 10 per cent. Mixtec, the remainder speaking other varieties of the minor linguistic families. The National Library at the capital contains about 500,000 volumes. The Press of Mexico is in a flourishing condition with many daily newspapers in the capital and in other urban centres. The first printing press and the first regularly issued newspaper in the New World were established by the Spaniards in Mexico City.

Education.—Education is divided into primary, secondary and university. Primary education is free, secular and nominally compulsory. In 1957 there were 28,417 primary schools with 3,814,940 pupils, 889 secondary schools with 276,838 pupils, and 864 technical and commercial secondary schools with 174,126 pupils. The National University of Mexico was founded in 1533 and re-organized in 1910. There are 9 other Universities, including one exclusively for women. The prevailing religion is Roman Catholic. In 1957, only 28 per cent. of the population above 6 years old were illiterate; while progress in reducing illiteracy has been steady over the last few years, it has barely kept pace with the rapidly increasing population.

FINANCE	1960
Estimated revenue (*Budget*)	*Pesos* 10,252,000,000
„ expenditure (*do.*)	„ 10,256,300,000
	1959
Bonded Internal Debt	„ 7,026,600,000
Debts of Mexican States	„ 74,717,500,000
External Debt	„ 771,500,000

As from April 19, 1954, by agreement with the International Monetary Fund, the Rate of Exchange has been fixed at 12·50 *pesos*=1 $U.S. (*See also* p. 84.) Mexican gold and dollar reserves stood at $U.S. 407,900,000 on Dec. 31, 1959.

TRADE	1959
Total Imports	*Pesos* 18,603,112,500
Total Exports	„ 18,190,825,000

TRADE WITH U.K.

	1958	1959
Imports from U.K.	£12,236,335	£13,557,400
Exports to U.K.	5,826,225	7,074,505

The imports (mainly from U.S.A.) consist largely of machinery and implements for industry, mining and agriculture, and raw materials for industry. Principal exports are cotton, coffee, sisal (henequen), tomatoes and shrimps, lead, silver, gold, copper, zinc and other metals, sulphur and heavy fuel oil.

CAPITAL, Mexico City, Population (Census, June 8, 1960) 4,829,402. Other towns are Guadalajara (734,346), Monterrey (600 600), Puebla (285,284), ΨMérida (177,405), Aguascalientes (122,809), San Luis Potosi (173,886), Mexicali (171,648), Chihuahua (144,653), Morelia (101,395).

FLAG: Three vertical bands, green, white, red, with shield of Mexico in centre.

(Calle del Río Lerma 71, Colonia Cuauhtémoc, Mexico 5, D.F.)

Ambassador Extraordinary and Plenipotentiary, His Excellency Isham Peter Garran, C.M.G. (1960) £4,100

Commercial Counsellor, D. H. T. Hildyard, D.F.C.
1st Secretary and Consul, J. M. Heath.
1st Secretary, K. L. F. Worke.
1st Secretary (Information), H. F. Bartlett.
1st Secretary (Commercial), L. Sherbourne.
1st Secretary (Labour), J. S. Rew.
2nd Secretary (Commercial), C. C. C. Tickell, M.V.O.
Information Officer, M. L. Creek.
Vice-Consuls, J. J. Caselton; G. E. Rickards.
Archivist, H. D. Le May.

There are British Consular Offices at *Mexico City, Chihuahua, Coatzacoalcos, Guadalajara, Guaymas, Mazatlán, Mérida and Progreso, Monterrey,*

Pachuca, Puebla, Tampico, Tapachula, Torreón, Veracruz.

British Council Representative.—M. H. Cardiff, O.B.E.

BRITISH CHAMBER OF COMMERCE AND BRITISH INDUSTRIAL CENTRE (Permanent display of British industrial goods), Paseo de la Reforma, 13, Mexico, D.F.—*Manager*, N. P. Wright.

Transit from London to Mexico City:—By sea, U.K.–New York, 5 to 10 days; New York–Mexico City, by rail, 3 days. By air, 6 hours. There is a direct freight service from Liverpool to Vera Cruz and the Pacific Coast.

MONACO

(Principauté de Monaco)

Sovereign Prince, H.S.H. Rainier III-Louis-Henri-Maxence Bertrand, *born* May 31, 1923, *succeeded his grandfather* (H.S.H. Prince Louis II), May 9, 1949; *married* April 19, 1956, Miss Grace Patricia Kelly and has issue Prince Albert Alexandre Louis Pierre, *born* March 14, 1958, and Princess Caroline Louise Marguerite, *born* January 23, 1957.

Minister of State, M. Emile Pelletier.

Secretary of State and Director of Prince's Household, M. Paul Noghès.

CONSULATE-GENERAL IN LONDON
4 Gray's Inn Square, W.C.1
[Chancery: 5323]

Consul-General, R. Le Mesurier.

Vice-Consul, A. J. Hucker.

A small Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino. The Principality comprises a narrow strip of country about 2 miles long and half-a-mile broad (area approx. 360 acres), with (1956) 20,422 inhabitants (Monégasque nationals, 2,696), and a yearly average of over 650,000 visitors. The whole available ground is built over, so that there is no cultivation, though there are many public and private gardens. Monaco has a small harbour (20 ft. alongside quay), and the import duties are the same as in France. There is a Council of State of 13 members and a Council of Government composed of the Minister of State and three State Counsellors. There is a local police force of 160 men.

CAPITAL, Monaco-ville.

FLAG: Red and white.

BRITISH CONSULAR OFFICE

Monaco—Consul-General, L. Pott. C.B.E.

MONGOLIA

(Mongolian People's Republic)

Prime Minister, Tse Den-bal (May, 1952).

Area and Population.—Mongolia is an almost entirely unsurveyed tract in Asia, bounded by the Siberian provinces of U.S.S.R. in the north, the Chinese province of Sinkiang and the Great Wall of China in the south, by Manchuria on the east and by the Tarbagatai Mountains and the Turkestan provinces of U.S.S.R. on the west.

The total area is estimated at 1,750,000 to 2,000,000 square miles with a total population (not yet enumerated) of 3,000,000 to 5,000,000, of whom the greater number are traditionally adherents of Lamaism, a form of Buddhism.

North-West Mongolia consists of an elevated plateau bounded by the Russian Altai range (N.W.), the Sayans (N.E.), the Kentei (S.E.), and the Ektagh Altai (S.W.). The plateau contains many lakes and is watered by numerous rivers, among which are the headwaters of the Yenisei, the Irtish and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen). The exports are wool, hides, skins, and gold.

The principal town of North-Western Mongolia is Ulan Bator (Ulan-Bator-Khoto, "Town of the Red Knight") which has an estimated population of 80,000 to 100,000; other centres are Uliassutai, and Kobdo, of importance as trading posts on the main caravan routes. Part of North-Western Mongolia has been incorporated in the Soviet Union as the *Tannu Tuva* autonomous Province which lies between the Sayan and Tannu Ola ranges, the capital being Kyzyl.

South-East and South Mongolia include the *Gobi* ("Desert"), or *Sha-mo* ("Sand Desert"), which covers nearly one-third of the total area, and in the extreme south-east the *Ordos* Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwangho river. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The principal industry (as in North-West Mongolia) is sheep and cattle raising and the breeding of camels, oxen and horses for transport, in order to supply the caravan routes from China to Siberia. The centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobi. Of recent years this trade has been organized and financed by Soviet Russia. The principal centres are: Kalgan, Kukukhoto, Kuku-erghi, Dolon-Nor and Birukhoto. In the north-east, Keru-lun (on the river of that name), is a junction of the southern routes from the Chinese province of Perchili and the western routes from Urga, in N.W. Mongolia.

Government.—In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognized as an Autonomous Republic. Negotiations with Russia, after the 1917 revolution, led to an alliance, and by Treaty (May 31, 1924) the U.S.S.R. acknowledged the suzerainty of China over Outer Mongolia, but by the Russo-Chinese Treaty of Aug. 25, 1945, China recognized the complete independence of Outer Mongolia.

MOROCCO

(Kingdom of Morocco)

King, H.M. King Mohammed V, *born* August 10, 1909.

Crown Prince, H.R.H. Prince Moulay Hassan.

CHIEF MINISTERS
(May 26, 1960)

Prime Minister, H.M. King Mohammed V.

Deputy Prime Minister and Minister of Defence, H.R.H. Prince Moulay Hassan.

Foreign Affairs, Driss M'Hammedi.

Interior, Si M'Barek Bekkai.

National Economy and Finance, M. M'Hammed Douiri.

Education, Abdelkrim Benjelloun.

MOROCCAN EMBASSY IN LONDON

[Knightsbridge: 8827]

Ambassador, Prince Moulay Hassan Ben El Mehdi.

Secretaries, Mohammed Saadani; Mohammed Mesfiwi; Abdelhaq Saadani; Driss Lahlou.

Chancellor, Mohammed Bekkali.

Area and Population.—Morocco is situated in the north-western corner of the African continent

between latitude 27° 40′–36° N. and longitude 2°–11° W. with an area estimated at approximately 180,000 sq. miles, and a population (estimated, 1958) of approximately 10,000,000. It is traversed in the north by the Riff mountains and in a general S.W. to N.E. direction by the Middle Atlas, the High Atlas, the Anti-Atlas and the Sarrho ranges. The northern flanks of the Middle and High Atlas Mountains are well wooded but their southern slopes, exposed to the dry desert winds, are generally arid and desolate, as are the whole of the Anti-Atlas and Sarrho ranges. The north-westerly point of Morocco is the peninsula of Ceuta which is separated from the continent of Europe by the narrow strait of Gibraltar. The Jebel Mousa dominates the promontory and, with the rocky eminence of Gibraltar, was known to the ancients as the Pillars of Hercules, the western gateway of the Mediterranean.

Climate.—The climate of Morocco is generally good and healthy, especially on the Atlantic coast, the country being partially sheltered by the Atlas mountains from the hot winds of the Sahara. The rainy season may last from November to April. The plains of the interior are intensely hot in summer. Average summer and winter temperatures for Rabat are 81° F. and 45° F.; for Marrakesh 101° F. and 40° F. respectively.

Administration.—The Treaty of Fez of 1912 provided for the establishment of a French Protectorate over Morocco, and France became responsible for the foreign relations of the Sultan and for the defence and administration of the country. The subsequent Franco-Spanish Treaty of 1912 provided for the establishment of a Spanish "sphere of influence" extending over northern Morocco with the exception of the Zone of Tangier. Ceuta and Melilla (*see* under Spain) are Spanish "State Territories." Ceuta, situated opposite Gibraltar, has been a Spanish possession since the close of the sixteenth century, and Melilla, further east on a rocky promontory of the Riff coast, has been a Spanish possession since 1492. The Penon (Rock) of Alhumas, Penon de Velez and the Zaffarin Islands are Spanish possessions. The pacification of the French Zone of Morocco was completed in 1934.

Tangier, until 1960, enjoyed a special régime. Before the war of 1914–1918, negotiations between the British, French and Spanish Governments took place but the outbreak of the war prevented the proposed international régime for Tangier from being put into operation. A new Convention providing by the Tangier Statute for the international administration of the Tangier Zone was, however, signed by the three Governments at Paris on December 18, 1923. It was brought into force on June 1, 1925, and modified by a Protocol of July 25, 1928, by which Italy adhered to it. Under the Convention only native affairs were reserved to the Sherecfian authority. In March, 1941, Spain suppressed the international administration, deposed the Sultan's representative in Tangier and substituted for him the Sultan's Khalifa in the Spanish Zone. In 1956 negotiations between the Moroccan Government and the Statutory Powers culminated in the Tangier Conference which sat in Tangier in October. This was followed by the grant of a Royal Charter on August 26, 1957, ensuring the continuation of a free monetary system and free trade in Tangier. These arrangements ended on April 19, 1960, when the Zone was fully incorporated into Moroccan territory.

On August 20, 1953, Sidi Mohammed ben Youssef, Sultan of Morocco for 25 years, was dethroned, and exiled together with his family. Sidi ben Moulay Arafa was proclaimed Sultan in his stead but although a series of reforms was instituted as a progressive handing over of government to the Moroccans, the Nationalist movement increased rapidly and civil disturbances became serious. The insistent Moroccan desire for the return of their former Sultan led to the withdrawal in September, 1955, of Sultan Moulay Arafa. Mohammed ben Youssef was reinstated as Sultan and he returned to Morocco on November 16, 1955. The formation of a Moroccan Government quickly followed; negotiations with France which opened in February, 1956, culminated in a joint Franco-Moroccan declaration of March 2, 1956, which recognized Morocco's independence and sovereignty. Negotiations with the same end in view were then engaged with Spain, resulting in a similar joint declaration of April 7, 1956.

Defence.—In the protectorate era, the protecting powers were responsible for defence. Arrangements were completed during 1951 with France for the use of air bases in the Southern (former French) Zone by the U.S. Air Force. Bases were constructed at Nouaceur, Sidi Slimane and Benguerir, but in 1959 it was agreed that the U.S.A. would evacuate her forces by the end of 1963 and there has since been increasing pressure on France and Spain to evacuate their forces also. The Moroccan army, formed in 1956, is about 40,000 strong. A Moroccan air force was also formed in 1956 and a navy in 1960.

Production and Trade.—Morocco's main sources of wealth are agricultural and mineral. The construction of dams for irrigation and for electric power is an important factor in the country's development. Its industries are in the main extractive and such as rely on local raw materials. Importance is also attached to the tourist trade.

Among agricultural, forest and animal products in sufficient quantity for export are barley, wheat, citrus fruits, early and canned vegetables, leguminous plants, esparto, vegetable fibre, cork, skins and hides, casings, raw wool, fish (preserved and canned). There were an estimated 28,800,000 head of livestock in 1959, sheep predominating.

Morocco's leading mineral exports are phosphates, manganese, iron ore, lead and zinc. Other minerals produced include anthracite, petroleum, cobalt, graphite, copper, molybdenum, tin, antimony, ochre and gypsum. Production of phosphates reached 7,420,000 tons in 1959 and almost as much was exported. There is an oil refinery at Sidi Kacem; 67,000 tons were extracted in 1958, sufficient to cover one-eighth of the country's needs.

Morocco's main import requirements are petroleum products, motor vehicles and tyres, building materials, fabrics, agricultural and other machinery, chemical products, clothing, householdware, sugar, green tea and other foodstuffs.

The trade of Morocco, which is chiefly with France and the *franc* area, the U.S.A., Germany, Cuba, China, the United Kingdom, Spain, Italy, Netherlands and Belgium, was valued in 1959 at: Imports, *M.francs* 145 milliard; Exports, *M.francs* 144 milliard. Trade with U.K., 1959: Imports from U.K., £4,505,488; Exports, £10,692,228. These figures exclude trade of Tangier Province.

There are British Chambers of Commerce at Casablanca (101 Boulevard Mohammed el Hansali) and at Tangier (Boîte Postale 2142, Socco).

TANGIER PROVINCE

	1958	1959
Imports .	*M.frs.* 9,147,617,000	*M.frs.* 9,785,838,000
Exports .	876,059,000	1,592,688,000
Imports from U.K.	£887,559	£652,618
Exports to U.K.	89,307	101,925

Finance and Currency.—A new unit of currency, the *dirham* (1 *DH* = *M. francs* 100) was introduced in October 1959, concurrently with the devaluation of the *M. franc* from *M. francs* 1,176 = £1 to *M. francs* 1,416·8 = £1. Future public accounting will be expressed in *dirhams*, the rate for which is thus: *DH* 14·168 = £1.

The 1960 Ordinary Budget amounted to *DH* 1,570 million and the Development Budget to *DH* 350 million.

Communications: Railways.—The railway runs south from Tangier to Sidi Kacem. From this junction, one line runs eastwards through Fez and Oujda to Algeria, and another continues southwards, through Rabat and Casablanca, to Marrakesh. A line running due South from Oujda skirts the Morocco-Algeria frontier and reaches Colomb-Bechar in Algeria, the beginning of the Mediterranean-Niger project. Moroccan railroads cover 1,092 miles and traction is electric or by diesel locomotives.

Roads.—In the former Southern Zone the road network is extensive (9,000 miles of road suitable for year-round traffic and some 20,000 miles of dry-season tracks). In the former Northern Zone an asphalt road links Tangier with Tetuan, branches north to Ceuta, and continues eastward through Villa San Jurjo to Mellila, and on to Oujda through Berkane.

Tangier is distant from London about 1,200 miles or a matter of hours by air, 4 days by sea. There are air services between Tangier and Gibraltar connecting with B.E.A. services to London. Air-France and Royal-Air-Maroc operate internal services and many between Morocco and towns in France and Spain. There are also regular services to other European countries and to Algeria, West Africa, Equatorial Africa and the Congolese Republic.

Language.—Arabic is the official language. Berber is the vernacular mainly in the mountain regions. French and Spanish are also spoken, mainly in the towns. The European population, about 500,000 in 1954, has since been much reduced by the departure of a large part of the French community. Three Arabic, five French and one Spanish newspapers are published daily.

Education.—There are government primary, secondary and technical schools. At Fez there is a theological university of great repute in the Moslem world. Schools for special denominations, Jewish and Catholic, are permitted and may receive government grants.

CAPITAL. Rabat (population 155,000). The other chief towns are: Casablanca (685,000); Marrakesh (216,262); Tangier (123,244); Fez (280,000); Meknes (140,380); Tetuan (82,500); Oujda (80,590); Safi (56,750); Kenitra (*formerly* Port-Lyautey) (55,900). The towns of Fez, Marrakesh and Meknes were capitals at various times in Morocco's past history.

FLAG. Red, with green pentagram (the Sea of Solomon).

MUSCAT & OMAN

(The Sultanate of Muscat and Oman)

Sultan, Said bin Taimur, *born*, Aug. 13, 1910, *succeeded his father* (as 13th of his dynasty to be Sultan of Muscat and Oman), Feb. 10, 1932.

The independent State of Muscat and Oman is situated at the easterly corner of Arabia. Its seaboard is nearly 1,000 miles long and extends from near Tibat on the west coast of the Musandam Peninsula round to Ras Darbat Ali, with the exception of the stretch between Dibba and Kalba on the east coast of the peninsula which belongs to the Trucial Shaikhdom of Sharjah. Ras Darbat Ali marks the boundary between the Sultanate and the territory of the Sultan of Qishn and Socotra, a Sultanate within the Aden Protectorate. A small strip of the coast on the east side of the Musandam Peninsula from Dibbah to Khor Kalba belongs to chiefs of Trucial Oman. The Sultanate extends inland to the borders of the Rub'al Khali or "Empty Quarter" as the South-Eastern Arabian Desert is called. Physically, the Sultanate consists of 3 divisions, a coastal plain, a range of hills and a plateau. The coastal plain varies in width from 10 miles in the neighbourhood of Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns, where the hills descend abruptly into the sea. The mountain range runs generally from north-west to south-east, reaching its greatest height in the Jebel Akhdar region where heights of over 9,000 feet occur. The hills are for the most part barren, but in the high area round Jebel Akhdar they are green and there is considerable cultivation. The plateau has an average height of 1,000 feet. With the exception of oases there is little or no cultivation. North-west of Muscat the coastal plain is known as the Batinah. It is fertile and prosperous, the date gardens extending for over 150 miles, Batinah dates (which ripen in the first half of July, well before the Basra dates) being famous for their flavour. The coast-line between Muscat and the province of Dhofar is barren and forbidding. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Sugar cane is grown and cattle can be raised in this province, which is the only part of the Arabian peninsula to receive the benefit of the monsoon. Frankincense is also exported. Its principal town is Salalah on the coast, while Ψ Murbat is the port. Ψ *Gwadur*, situated on the Baluchistan coast, formerly belonged to the Sultanate, but was transferred to Pakistan on September 8, 1958.

The town of Muscat is the capital and seat of Government of the Sultanate of Muscat and Oman. Possessing a natural harbour, though exposed to the north-west wind (*Shumal*), and at one time a town of some commercial importance, it has lost most of its trade, which has been transferred to the adjacent town of Matrah. Matrah is the starting point for the trade routes into the interior. Other ports on the Gulf of Oman are Sohar, Khaburah and Sur. None, however, provides sheltered anchorage.

The area of the Sultanate has been estimated as about 82,000 square miles and the population

es 550,000. The inhabitants are for the most part Arab, but there is a strong infusion of negro blood, especially along the coast. The towns of Muscat (pop. 3,500) and Matrah (pop. 8,500) are composed of one third Indian, one third Baluch and one third Negro. The Baluchis have originally mostly migrated from Mekran and the Negroes from Zanzibar. There are few Arab residents in these two towns. In the valleys of the interior, as well as on the Batinah, date cultivation has reached a high level, and there are possibilities of agricultural development if the water supply were more certain. A Development Secretary has now been appointed. The inland tribes breed large numbers of camel, which are prized in Arabia for their quality. There are no industries of importance.

The only port of call for steamers is ΨMuscat (one of the ports on the mail route between Bombay and Basra). 277 vessels of all nationalities with a total tonnage of 905,433 entered the port in the foreign trade of Muscat in 1959. The mail service between Muscat and Basra is normally weekly in each direction. The G.P.O., London, operates the post office in Muscat. The postage stamps are ordinary British stamps surcharged with their value in Indian currency. Cable and Wireless, Ltd., operates the telegraph office, and an automatic telephone service in Muscat and Matrah.

Inland transport is by pack animals. A motor road connects Muscat with Matrah and a motorable track extends to Khor Fakhan at the far end of the Batinah, a distance of 210 miles. There is also a motor road running up the Wadi Samail to the interior for about 180 miles. Hajar and Bosher are also connected by motorable tracks with Matrah. Cars run frequently between Muscat and the towns in the Batinah. Other routes are being developed, but none should be used without previous arrangement.

In December, 1951, a new treaty of friendship, to remain in force for 15 years, was signed between the United Kingdom and the Sultanate of Muscat and Oman.

FINANCE.

Annual Revenue (estimated).....Rs. 40,00,000

The common medium of exchange is the Maria Theresa dollar. On the coast the Indian rupee circulates, and is the official currency of the Sultanate, although not generally in use in the interior. There are also three denominations of copper coins, twenty, ten, and five, called "baizas." The normal rate of exchange is 170 baizas = 1 M.T. dollar = Rs.3¼ (approx.). The weights in use are one kiyas = the weight of six dollars or 5·9375 oz.; 24 kiyas = one Muscat maund; 10 maunds = one Farasala; 200 maunds = 1 Bahar. Rice is sold by the bag, other cereals by the following measurement: 40 Palis = one Farrah; 20 Farrahs = one Khandi.

TRADE.

	1956–57	1957–58
Total imports.....	Rs.2,78,93,700	Rs.2,37,98,500
Total exports.....	1,25,32,000	92,16,800

	1958	1959
Imports from U.K...	£708,153	£1,468,646
Exports to U.K.....	13,136	10,107

Trade is mainly in the hands of Hindu Banias and Muslim Khojas, many of whom derive British nationality by descent, and is mainly to and from India and Pakistan. The chief imports are cereals, tea, cigarettes, matches, sugar and cotton piece goods. The chief exports are dates, limes, pomegranates and dried fish.

CAPITAL, ΨMuscat, population (estimated) 3,500.

Muscat—British Consul-General, J. F. S. Phillips.

NEPAL

Sovereign, King Mahendra Bir Bikram Shah; *succeeded*, March 13, 1955.

CABINET
(May 27, 1959)

Prime Minister, B. P. Koirala.
Deputy Prime Minister, Gen. S. Shamsher.
Members, S. P. Upadhya; G. Singh; R. Misra; C. Pant; K. Kautam; P. N. Chaudhury.

NEPALESE EMBASSY IN LONDON
12A, Kensington Palace Gardens, W.8
[Bayswater: 1594]

Ambassador, His Excellency Rama Prasad Manandhar, C.B.E. (1955).
1st Secretary, J. N. Singha.
Military Attaché, Col. Rabi Shamsher Jang Bahadur Rana.

Nepal (area about 54,000 sq. miles; pop. (1955), 8,337,537) lies between India and Tibet on the slopes of the Himalayas, and includes Mt. Everest (29,002 ft.). Amid the mountains lie many fertile valleys. The lower hills and Terai Plains are covered with jungle, in which wild animals abound. Rice, wheat, maize, etc., are grown. The chief trade route is that between Katmandu and the Bihar frontier, to link which an 80-mile road has been constructed by India. Nepal exports rice and other grains, hides, oilseeds, *ghi*, cattle, jute, large quantities of timber, &c., and imports cotton goods and yarn, sugar, salt, spices, petrol, metals, &c. The revenue realized chiefly from land rent, forests, customs, &c., is approximately £2,750,000. A State Bank was inaugurated on April 26, 1956, to issue bank notes, regulate the Nepalese currency, fix foreign exchange rates and help in the preparation of a national budget. The inhabitants are of mixed stock with Mongolian characteristics prevailing in the north and Indian in the south, and their religions are Buddhism and Hinduism. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha or Gurkha, became predominant in about 1769. During the 1914–18 and the 1939–45 wars, the Nepalese Government rendered unstinted and unconditional assistance to the British Government in men, money and material.

From the middle of the nineteenth century, Nepal was ruled by the Rana family which provided the hereditary prime ministers of the country. After the Second World War, a revolutionary movement in 1950 and 1951 achieved the aim of restoring to the monarchy the powers which it had lost 104 years before and of breaking the hereditary power of the Ranas. After eight years, during which various parties and individuals tried their hand at government, the first general elections to be held in Nepal took place in February, 1959, resulting in an overwhelming victory for the Nepali Congress. Under the Constitution granted by King Mahendra on February 12, 1959, a Government was formed by Mr. Koirala in May.

CAPITAL, Katmandu (pop. 105,579).

Consular Section, 38 Hyde Park Gate, S.W.7.
Consul-General, N. Brat.
Consul, A. G. Jonker.

Area and Population.—The Kingdom of the Netherlands is a maritime country of Western Europe, situated on the North Sea, in lat. 50° 46′–53° 34′ N. and long. 3° 22′–7° 14′ E., consisting of 11 provinces plus the North-East Polder (reclaimed part of the Zuider Zee) and containing a total area of 34,830 sq. kms. The population on Jan. 1, 1960, was 11,417,000. The live birth-rate in 1958 was 21·2 per 1,000 of the population, and the death-rate 7·5.

The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Scheldt. The chief agricultural products are potatoes, sugar beet, cattle, horses, swine, butter, wheat, rye, barley, oats, beans, peas, flax-seed, cheese, poultry, eggs, vegetables, fruit and flower bulbs and there is an important fishing industry. Among the principal industries are engineering, motors, shipbuilding, iron and steel, incandescent lamps, radio, electrical and telecommunications equipment, cotton, woollen, linen and rayon spinning and weaving, earthenware, glass, leather goods, boots and shoes, chemical and pharmaceutical products, oils, paper and board, cigars, sugar, "genever" liqueurs, beer, clothing, bicycles, tyres and rubber products. Coal production (1959) was 12,012,000 metric tons. Diamond-cutting, though still an important industry, has declined considerably in importance, now employing about 1,100 hands, compared with about 3,500 before the war.

Government.—In 1815 the Netherlands became a constitutional Kingdom under King William I., a Prince of Orange-Nassau, a descendant of the house which has taken a leading part in the destiny of the nation since the 16th century. The States-General comprise the *Eerste Kamer* (First Chamber) of 75 members, elected for 6 years by the Provincial Diets: and the *Tweede Kamer* (Second Chamber) of 150 members, elected for 4 years by men and women voters of 23 years and upwards. Members of the Tweede Kamer are paid.

General elections were held on March 12, 1959, for the Second Chamber of the States-General. Party representation (after the increase in the Chamber's membership of Nov. 6, 1956) now stands at Catholic People's Party 49; Labour Party, 48; Liberal, 19; Anti-Revolutionary, 14; Christian Historical Union, 12; Communists, 3; Pacifist Socialists, 2; Political Reformed, 3. The present Cabinet was formed on May 19, 1959, after an interregnum of four months.

The Upper House of the States General was elected by the Provincial Councils after the General Elections. Representation (after the increase in the Chamber's membership of Nov. 6, 1956) is: Catholic People's Party, 25; Labour Party, 22; Anti-Revolutionary Party, 8; Christian Historical Union, 8; Party of Freedom and Democracy, 7; Communist, 4; Political Reformed Party, 1.

Defence.—The post-war army is being formed as a component of the North Atlantic Treaty Organization. The Royal Netherlands Navy is being built up to a modern force of one aircraft carrier, 2 heavy cruisers, 12 modern destroyers and 6 submarines, supported by an escort force of 24 frigates and a considerable number of ancillary vessels. The Air Force, which since 1953 has been independent of the Army with the title "Royal Netherlands Air Force," has been reconstituted since the war, and now forms an integral part of the air defences of the N.A.T.O. countries. After a period of reorganization and expansion it has now attained a considerable strength consisting mainly of jet-fighters which are divided between an air defence and a tactical air command. Part of the latter is integrated into a N.A.T.O. tactical air force.

Language and Literature.—Dutch is a West-Germanic language of Saxon origin, closely akin to Old English and Low German. It is spoken in the Netherlands and the northern part of Belgium. It is also used by many people in the Netherlands West Indies. Afrikaans, one of the two South African languages, has Dutch as its origin, but differs from it in grammar and pronunciation. There are eleven national papers, four of which are morning papers, and there are several regional daily papers.

Education.—Illiteracy is practically non-existent. Primary and secondary education is given in both denominational and State schools, the denominational schools being eligible for State assistance on equal terms with the State schools. Attendance at primary school is compulsory. Secondary schools for working classes are numerous, well equipped and well attended. The principal Universities are at Amsterdam, Groningen, Leiden, Nijmegen (*R.C.*), and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (economics), Wageningen (agriculture), Tilburg (*R.C.*) (commercial) and Eindhoven (polytechnic) (opened in Sept. 1957).

Communications.—The total extent of navigable rivers is 4,232 miles (large rivers comprising 696 miles) and of main roads approximately 2,830 miles. On Jan. 1, 1960, the total length of the railway system amounted to 2,018 miles, of which 1,015 miles were electrified. The mercantile marine on Jan. 1, 1960, consisted of 1,533 ships of total 4,534,000 gross registered tons, including vessels registered in the Netherlands Antilles and Surinam, but excluding tugs and contractors' equipment. The total length of air routes covered by K.L.M. (Royal Dutch Airlines) in the summer of 1959 was 166,313 miles.

Finance

Budget, 1960

See also p. 84.

Trade

During 1959 further progress was made towards the establishment of the European Economic Community, as established by the Treaty of Rome in 1957, between France, Germany, Italy and the Benelux countries (Belgium, Luxemburg and the Netherlands, which already form a customs union).

The Netherlands has removed quantitive restrictions on the great majority of imports in accordance with the agreement between O.E.E.C. countries. On July 1, 1960, the extent of liberalization was 97 per cent. (agricultural produce 89·8 per cent.; raw materials 99·5 per cent. and manufactured products 96·6 per cent.). 94 per cent. of imports from dollar countries were liberalized.

In 1959 Dutch imports amounted to *Fl.* 14,967,407,000 and exports to *Fl.* 13,704,529,000 so that imports were covered by exports to the extent of 91·5 per cent. Imports from the United Kingdom during 1959 amounted to *Fl.* 1,132,346,000 and exports to *Fl.* 1, 470,433,000.

The rate of overall production in the Netherlands rose from 126 to 138 in 1959 and that of production per worker from 118 to 138 (1953 = 100).

	1958	1959
Imports from U.K.	£97,729,785	£113,393,735
Exports to U.K.	159,171,279	160,279,947

British Council

Representative, E. R. H. Paget, O.B.E., 268 Heerengracht, Amsterdam.

OVERSEAS TERRITORIES

I. *Netherlands New Guinea:*—

The territory of Netherlands New Guinea (estimated population 1956, 730,000), comprises the western half of the island of New Guinea. Mount Wilhelmina is the highest point in Oceania.

It was decided at the Round Table Conference between Holland and Indonesia that the future status of New Guinea would be decided by negotiation between the two parties within a year of the transfer of sovereignty to Indonesia on December 27, 1949. A joint Dutch-Indonesian Commission was formed to investigate the facts of the case, and reported back to the two Governments in 1950. As a result of the failure of the two sides of the Commission to agree, the position of New Guinea remains unchanged under Dutch sovereignty. *Governor of Netherlands New Guinea*, Dr. J. Platteel.

II. *Netherlands West Indies:*—

"Nederlandsch West-Indie" comprise *Surinam* (Dutch Guiana) in South America, and certain islands in the West Indies known as the Netherlands Antilles (Curaçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of Surinam is about 54,000 sq. miles, with a population in 1952 of about 237,930; area of Netherlands Antilles, 394·1 sq. miles, with a population of 190,340 at January 1, 1958. Under the Realm Statute which took effect on December 29, 1954, Surinam and the Netherlands Antilles received autonomy in domestic affairs, as parts of the Netherlands Realm under the Crown. Agreement on their new status was reached after prolonged negotiations between the Netherlands Government and representatives of the territories concerned. Bauxite is an important export of Surinam. The United Kingdom has a considerable trade with the Netherlands Antilles, imports from U.K. in 1959 being £9,464,070; exports to U.K. £25,448,504. Surinam: Imports from U.K., 1959, £1,313,845; exports, £6,142. The administrative capital of Surinam is Paramaribo (population, 1952, 86,400); the capital of Curacao is Ψ Willemstad (pop. 45,000); of Aruba, Ψ Oranjestad; of Bonaire, Ψ Kralendijk; of St. Martin, Philipsburg; of Statius (St. Eustatius), Oranjestad; and of Saab, Bottom. *Governor of Netherlands Antilles*, Dr. A. B. Speckenbrink. *Governor of Surinam*, J. van Tilburg.

NICARAGUA

(República de Nicaragua)

President, Col. Luis Somoza, *re-elected* Feb. 2, 1957.
Foreign Affairs, Dr. Alejandro Montiel Argüello.

Area and Population.—Nicaragua is the largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45′–15° N. lat. and 83° 40′–87° 38′ W. long., containing an area of 57,145 English square miles and a population (1954 estimate) of 1,224,459, of whom about three-quarters are mixed blood. Another 15 per cent. are white, mostly of pure Spanish descent, and the remaining 10 per cent. are Indians, negroes or mulattoes. The latter group includes the Mosquitos, who live on the Atlantic Coast and were formerly under British protection.

Government.—The eastern coast of Nicaragua was touched by Columbus in 1502, and in 1519 was overrun by Spanish forces under Davila, and formed part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution took effect on May 1, 1951. The President is elected by direct suffrage for six years. Congress comprises a Senate of 15 members (together with ex-Presidents of the Republic) and a Chamber of Deputies of 55 members.

Agriculture and Industry.—The country is mainly agricultural. The major crops are coffee, cotton, sesame, sugar, rice and maize. Bananas, beans, cocoa and ipecacuanha are also important. Live-stock and timber production, already considerable, are capable of unlimited expansion. Nicaragua possesses deposits of gold and silver, both of which are mined and exported by United States and Canadian concessionaires.

Communications.—There are 270 miles of railway all on the Pacific side, 3,159 miles of telegraph and 3,216 miles of telephone, and there are several powerful wireless stations at Managua. An automatic telephone system has been installed in the capital. Transportation, except on the Pacific slope, is still attended with difficulty but many new roads have either been opened or are under construction. The Inter-American Highway runs from the Honduras frontier in the north to the Costa Rican border in the south; the interoceanic highway, running laterally to Rama, whence there is a natural waterway to Bluefields on the Atlantic, is progressing and admits of a through passage in dry weather.

Until the advent of aircraft, the Atlantic littoral was practically isolated from the rest of the Republic and the chief centres of population, but LANICA Airways now have a daily service between Managua and the Atlantic littoral.

Language and Literature.—The official language of the country is Spanish. In 1950 there were 6 daily newspapers published at Managua, and 4 in the provinces. Education is backward, at least 60 per cent. of the population being illiterate. There is a university at León.

Finance

	1956–57	1957–58
	Cordobas	*Cordobas*
Revenue	249,581,000	266,140,000

Imports from U.K.	£1,732,845	£824,217
Exports to U.K.	1,107,630	1,148,037

Considerable quantities of foodstuffs are imported as well as cotton goods, jute, iron and steel, machinery and petroleum products. Some 55 per cent. of imports are from U.S.A.; the chief exports are coffee, gold, cotton, sesame and lumber.

CAPITAL, Managua, population (1954) 141,465; León, 38,183; Granada, 25,142; Masaya, 22,825; Chinandega, 16,171; Matagalpa, 11,755; Ψ Bluefields, 9,205; Ψ Corinto, 5,635. Corinto, on the Pacific, is the chief port, handling about 70 per cent. of the total trade; Bluefields and Puerto Cabezas on the E. coast are mainly concerned in the banana and timber trade to New Orleans, U.S.A.

FLAG: Three horizontal bands, blue, white, blue (the arms of the Republic on the white band, displaying five volcanoes surmounted by a cap of liberty under a rainbow).

BRITISH EMBASSY AND CONSULATE, MANAGUA.
Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency William Edmund Devereux Massey, M.B.E. (1959).

All Ministers are from the Labour Party.

ROYAL NORWEGIAN EMBASSY IN LONDON
Residence: 10 Palace Green, W.8
[Western: 8686]
Offices: 25 Belgrave Square, S.W.1
[Belgravia: 7151]
Ambassador to London, His Excellency M. Erik Braadland (1959).
Counsellor, M. Knut B. Aars.
Counsellor (Commercial, Economic and Financial), M. Erik Andreas Ribu.
2nd Secretary, M. Thor Hjorth-Johansen.
Naval Attaché, Captain Sjur N. Östervold, D.S.C.
Air and Army Attaché, Lt.-Col. Olai Grönmark, D.F.C.
Asst. Army Attaché, Maj. Finn O. Paus.

Counsellor, specially attached, M. Herman Kristoffer Lehmkuhl, C.B.E.
Fisheries Counsellor, M. Olaf Grönaas.
Cultural Attaché, M. Halvard E. Sæther.
Counsellor (Press and Information), M. Rolf Jerving.
Assistant Press Attaché, M. Svenn Refshal.
Commercial Attaché, M. Jacob Chr. Prebensen, 20 Pall Mall, S.W.1.
Asst. Commercial Attachés, M. Ole F. Knudsen; M. Rolf Störe; M. Per Ihlen.
Consulate-General, 42 Lancaster Gate, W.2.
Consul-General, M. Jörgen Galbe.
Consul, M. A. A. Bouston.
Vice-Consul, M. Kjell Rasmussen.

Area and Population.—Norway ("The Northern Way"), a kingdom in the northern and western portion of the Scandinavian peninsula, was founded in 872. It is 1,752 km. in length, its greatest width about 430 km. The length of the coastline is 2,650 km., and the frontier between Norway and the neighbouring countries is 2,555 km. (Sweden 1,643 km., Finland 716 km. and U.S.S.R. 196 km.). It is divided into 20 counties (*fylker*) and comprises an area of 323,917 sq. km. with a population (1959) of 3,572,000. In 1958 there were 62,985 births (17·9 per 1,000 inhabitants), 31,645 deaths (9·0 per 1,000) and 23,931 marriages (6·8 per 1,000); the infant mortality rate in 1958 was 20·0 per 1,000 live births.

The Norwegian coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. At the North Cape the sun does not appear to set from the second week in May to the last week in July, causing the phenomenon known as the *Midnight Sun*; conversely, there is no apparent sunrise from about Nov. 18 to Jan. 23. During the long winter nights are seen the multiple coloured *Northern Lights* or *Aurora Borealis*, which have a maximum intensity in a line crossing North America from Alaska to Labrador and Northern Europe to the Arctic coast and Siberia. A similar phenomenon occurs in the Antarctic and is known as *Aurora Australis*.

Production.—The cultivated area is about one-fortieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

The *Gulf Stream* pours from 140 to 170 million cubic feet of warm water per second into the sea around Norway and causes the temperature to be higher than the average for the latitude. It brings shoals of herring and cod into the fishing grounds and causes a warm current of air over the west coast, making it possible to cultivate potatoes and barley in latitudes which in other countries are perpetually frozen.

The chief industries are agriculture and forestry, mining, manufactures, fisheries, whaling and shipping. The most recent figures showed that 34 per cent. of the population lived on industry, 22 per cent. on agriculture and forestry, 9 per cent. on trading, 9 per cent. on transport and communications and 6 per cent. on fishery and whaling. Manufactures are aided by great resources of water power, estimated at 12,500,000 kw. at 75 per cent. efficiency, of which over 3,200,000 kw. are utilized. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of any other European country except U.S.S.R. In 1958 the total catch amounted to 1,370,000 metric tons. Whale oil production, chiefly from pelagic whaling in the Antarctic, was 863,000 barrels in 1959.

Government.—From 1397 to 1814 Norway was united with Denmark, and from Nov. 4, 1814, with Sweden, under a personal union which was dissolved on June 7, 1905, when Norway regained complete independence. Under the constitution of May 17, 1814, the *Storting* (Parliament) itself elects one-quarter of its members to constitute the *Lagting* (Upper Chamber), the other three-quarters forming the *Odelsting* (Lower Chamber). Legislative questions alone are dealt with by both parts in separate sittings.

On April 8–9, 1940, Germany invaded Norway, and it was not until June 7, 1945, that the late King Haakon was able to return from Great Britain to Oslo.

Defence.—Norway is a member of the North Atlantic Treaty Organization, and the Headquarters of Allied Forces, Northern Europe, is situated near Oslo. Extensive reorganization of the Norwegian armed forces is in progress. Compulsory national service lasts 18 months in the navy and air force and 16 months in the Army.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo (opened in 1811) was attended by 5,161 students and the University of Bergen (opened in 1948) by 929 students in 1959. The State Institute of Technology in Trondheim possesses University status and awards degrees in engineering and architecture. In 1959 it was attended by 1,433 students.

Language and Literature.—Norwegian is a branch of the Scandinavian languages and is the language of the mainland and of Svalbard. Old Norse literature is among the most ancient (and the richest) in Europe. Modern Norwegian became formed in the time of the Reformation and Ludwig Holberg (1684–1754) is regarded as the founder of Norwegian literature, although modern Norwegian literature dates from the establishment of a national university at Christiania (Oslo) in 1811 and with the writings of Wergeland (1805–1845). Some of the famous names are Henrik Ibsen (1828–1906) the dramatist, Björnstjerne Björnson (1832–1910) journalist, dramatist and novelist and Nobel Prize-winner in 1903, Jonas Lie (1833–1908) novelist, Knut Hamsun (1859–1952) novelist and Nobel Prizewinner in 1920, and Sigrid Undset (1882–1949), champion of Norwegian womanhood and herself a Nobel Prizewinner in 1928. In 1958 there were 87 daily newspapers in the country with a total circulation of 1,298,000, and 90 newspapers publishing on two or three days a week with a total circulation of 335,000.

Communications.—The total length of railways open in 1959 was 4,492 km., of which 77 were private lines. The length of telegraph and telephone lines in 1959 was 86,110 km. (State, 79,956) with 3,584,000 km. of wire (State, 3,369,000). At the end of 1959 a total of 462,863 road motor vehicles were registered, of which 192,377 were passenger cars (including taxis) and 151,516 were motor cycles.

Civil Aviation.—On scheduled airlines operated by Scandinavian Airlines System (SAS) on behalf of Det Norske Luftfartselskap (DNL), by Braathens South American and Far East Airtransport (SAFE), and by Widerões Flyveselskap A.S. in 1959:—kilometres flown, 19,436,000; passengers carried, 577,790.

Mercantile Marine.—The Mercantile Marine, Jan. 1, 1960, consisted of 2,209 vessels of 10,486,000

gross tons (vessels above 100 gross tons, excluding fishing boats, floating whaling factories, tugs, salvage vessels, icebreakers and similar types of vessel). The fleet ranks fourth among the merchant navies of the world.

FINANCE

	1958–59
Revenue (*Budget*)	*Kr.*5,711,400,000
Expenditure (*do.*)	5,773,400,000

SVALBARD

(*Spitsbergen and Bear Island*)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitsbergen ("Pointed Mountain") Archipelago was recognized by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway. In September, 1941, Allied forces (British, Canadian and Norwegian) landed on the main island. After destruction of the accumulated stocks of coal and dismantlement of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to a British port and the Russians (about 1,500) to the U.S.S.R. After the war the Norwegian mining plants were rebuilt. In 1956 the production of coal, the chief mineral of the archipelago, was 390,000 tons.

The Svalbard Archipelago lies between 74°–81° N. lat. and between 10°–35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stor Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. In addition to those engaged in coal-mining, the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 360 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsö, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsö to Green Harbour 2½ to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° 49′—71° 9′ N. lat. and 7° 53′ 9° 5′ W. long.) was joined to Norway by law of Feb. 27, 1930.

Norwegian Antarctic

BOUVET ISLAND (54° 26′ S. lat. and 3° 24 E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER THE FIRST ISLAND (68° 50′ S. lat. and 90° 35′ W. long.), was declared a dependency of Norway by resolution of Government, May 1, 1931.

PRINCESS RAGNHILD LAND (from 70° 30′ to 68° 40′ S. lat. and 24° 15′ to 33° 30′ E. long.) has been claimed as Norwegian since Feb. 27, 1931.

QUEEN MAUD LAND.—On Jan. 14, 1939, the Norwegian Government declared the area between 20° W. and 45° E., adjacent to Australian Antarctica, to be Norwegian territory.

Panama on the isthmus of that name which connects N. and S. America, was formerly one of the nine Departments of Colombia. After a revolt (Nov. 3, 1903) it declared its independence and established a separate Government, with a single chamber legislature elected every four years and now consisting of 53 elected members. The

* Boundaries extended, January 1, 1958.

area of the Republic is 31,890 sq. m., the population (1950) was 805,285, including 48,654 tribal Indians. In 1958 it was estimated at 1,000,000. The birth rate in 1957 was 40·4 and the death rate 9·4 per thousand. The soil is extremely fertile, but nearly one-half of the land is uncultivated. The chief crops are bananas, coconuts, cacao, coffee and cereals. The shrimping industry plays an important rôle in the Panamanian economy. A railway 47 miles in length joins the Atlantic and Pacific oceans.

Education is compulsory and free from 7 to 15 years. In 1959-60 there were 1,156 official primary schools and 83 private primary schools; 25 official secondary and 80 private secondary schools. Primary students numbered 155,543 in 1959-60; secondary students, 36,055. 3,155 students were enrolled at Panama University in 1959-60.

Language and Literature.—The official language is Spanish. There are 9 daily newspapers published in the capital, 2 of which print editions in English. There is also one English weekly newspaper.

FINANCE	1959
Budget Revenue.....	*Balboas* 58,618,000
Budget Expenditure.....	,, 60,100,000

THE PAPAL STATE
(Stato della Città del Vaticano)

Sovereign Pontiff (262nd), His Holiness Pope John XXIII (Angelo Giuseppe Roncalli), *born* at Sotto il Monte (Bergamo), Nov. 25, 1881, *elected* Pope (in succession to Pius XII) Oct. 28, 1958.

The office of the ecclesiastical head of the Roman Catholic Church (*Santa Sede* or Holy See) is vested in the Pope of Rome, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles, with a population of 3,124,688. During the reign of Pius IX. (1846–1878), the Papal States of Romagna, Umbria and the Marches were incorporated in the Kingdom of Sardinia and with the remaining States (Rome, Comacchio, Viterbo, Civita Vecchia, Velletri and Frosinone) became part of Unified Italy in 1870. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognized the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and of the Catholic Church in Italy and agreeing to pay 750,000,000 *lire* in cash and the income at 5 per cent. on 1,000,000,000 *lire* State bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power. The population of the Vatican City at the census in March, 1947, was 940.

President of Central Bank, Ing. Gustavo Storm.

PARAGUAYAN EMBASSY IN LONDON
51B Cornwall Gardens, S.W.7
[Western: 1253]

Ambassador in London, Dr. Ramiro Recalde de Vargas (1960).
Consul-General, Sr. Oscar Barrios Arce.

Area and Population.—Paraguay is an inland subtropical State of South America, situate between Argentina, Bolivia and Brazil. The area is computed at 157,000 square miles, with a population (1950 Census) of 1,408,000.

Paraguay proper consists of a series of plains, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draught. Many of the tributary streams are also navigable for much of the year. The

Pilcomayo river is navigable for small craft for 180 miles from Asunción: but is liable to shrink unduly with drought. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or "endless," is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The *Chaco*, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war between Paraguay and Bolivia from 1932 to 1935. The Chaco is practically a dead level, though a slight and uniform rise westward is now known to exist; it suffers much from floods and still more from drought.

Government.—Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain.

The Senate was abolished under the constitution adopted in 1940 and replaced by a Council of State nominated by the government. The Chamber of Representatives comprises 40 members. In 1954 women were accorded civil rights.

Production.—About three-quarters of the population are engaged in agricultural and pastoral pursuits, cattle breeding being the principal industry. In addition to canned meat, timber, quebracho extract, cotton, hides, *yerba maté*, tobacco, and *petit grain* essence (which are the principal exports), mandioca, sugar, maize, rice, citrus fruits and edible oils are also produced for home consumption. Grape fruit is now exported. The production of rice, wheat and ground nuts is being encouraged by the government. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad.

Communications.—A railway, 985 miles in length, connects Asunción with Buenos Aires. The journey takes 55 hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days). Direct shipping services operate frequently between Hamburg, Antwerp, Amsterdam and Asunción, and monthly between Liverpool, London and Asunción. A shipping service from New York was started early in 1955. Five airlines operate services from Asunción. *Aerolineas Argentinas* operates a service with Sunderland flying-boats six times weekly between Asunción and Buenos Aires, stopping at Corrientes. Twice a week this service also calls at the river ports of Rosario and Formosa, and once a week at Posadas. There are also landplane services twice a week. *Braniff* (American) has a bi-weekly service through Asunción between Buenos Aires and the United States (calling also at Lima and La Paz). *Panair do Brasil*, a Brazilian company affiliated to Pan American Airways, operates a twice weekly service between Asunción and Rio de Janeiro, and weekly services between Asunción and Buenos Aires and Santiago. *Pluna* (Uruguayan) carries on a twice-weekly service between Montevideo and Asunción, while *Real*, another Brazilian airline, operates a service five times a week between Rio de Janeiro and Asunción, calling at São Paulo and Foz do Iguazú. There are about 100 miles of asphalted roads in Paraguay, and about 200 miles of earth roads in fairly good condition. Bus services connect the principal towns.

Defence.—There is a permanent military force of about 8,000 all ranks. Two gunboats and a number of torpedo boats patrol inland waters.

Language and Literature.—The language of the country is Guaraní (the idiom of the most advanced tribe of Indian inhabitants with whom the Spanish explorers formed an alliance) but Spanish is spoken in the larger towns. Three daily newspapers are published in Asunción.

Education.—Primary education is free and compulsory. There are a few secondary and special schools and a national university with close on 1,000 students.

FINANCE		1959
Estimated Revenue.....	*Guaranies*	2,627,600,000
Estimated Expenditure....	„	2,627,600,000
External Debt (Dec. 1958).	„	1,004,408,000
Internal Debt (Dec. 1958)..	„	482,859,000

Paraguay continues to pay interest on the External Sterling Debt (3% Loans of 1886–96, and 1915).

Currency.—A free exchange system was introduced in August, 1957. The rate of exchange has been fairly stable at Gs. 340 = £1 since April, 1959.

Trade.—The imports are chiefly articles of food and drink, textiles, vehicles, and machinery. The chief articles of export are timber, tannin, cotton, hides and meat products. Trade with the United Kingdom in 1959 was valued at: Imports, £865,109; Exports to U.K., £1,760,759.

CAPITAL, Ψ Asunción, about 1,000 miles up the River Paraguay from Buenos Aires, Pop. (1950) 206,634; other centres being Ψ Encarnación 33,664, Concepción 28,357 and Villarica 26,000.

FLAG: Three horizontal bands, red, white, blue (with the Arms of the Republic on white band).

BRITISH EMBASSY

(25 de Mayo 39, Asunción)

British Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency Horace Frederick Alfred Gates, C.M.G., M.B.E. (1959).
2nd Secretary and Vice-Consul, H. Fletcher.
Naval, Military and Air Attaché, Capt. D. Vincent-Jones, D.S.C., R.N.
Labour Attaché, J. M. Carlin, D.F.C.
2nd Secretary (Commercial), J. W. Pethybridge.

Asunción is approximately 4,000 miles distant from London by air. Transit by sea 25 days. By air 3 days.

*PERSIA

(Keshvar-e-Shahanshahi-ye-Iran)

Shahanshah of Persia, H.I.M. Mohammed Reza Pahlevi, *born* Oct. 26, 1919; *acceded* Sept. 16, 1941 (on abdication of his father Reza Shah Pahlevi); *married* (March 15, 1939). Princess Fawzieh, sister of ex-King Farouk of Egypt (marriage dissolved Nov. 17, 1948), and has issue a daughter *born* 1940. The Shah *married* (Feb. 12, 1951) Suraya Esfandiari Bakhtiari (marriage dissolved, April 6, 1958); *married* Dec. 21, 1959, Farah Dibah (Queen Farah Pahlevi).

CABINET

(Sept. 1, 1960)

Prime Minister and Minister of Foreign Affairs, Jafar Sharif Emami.
Minister for War, Gen. Ahmad Vosogh.
Roads, Major-Gen. Vali Ansari.
Finance, Gen. Ali Akbar Zargam.

* On Oct. 26, 1949, it was announced that foreigners might henceforth use the name Persia.

Justice, Dr. Mohamed Ali Hedayati.
Education, Dr. Mahmoud Mehran.
Development, Khosrow Hedayat.
Mining and Industry, Taher Siai Umies.
Labour, Ahmad Ali Bahrami.
Minister of State (Asst. Prime Minister), Ashraf Ahmadi.
Interior, Gen. Mehdigholi Alavi Moghadam.
Commerce, Dr. Mohammad Sajadi.
Health, Dr. Jahanshah Saleh.
Posts and Telegraphs, Dr. Abdolhossein Ettebar.
Customs, Razi Vishkai.
Agriculture, Ebrahim Mahdavi.

Asst. Military Attaché, Lt.-Col. Zia Nikubonyad.
Cultural Counsellor, Mas'uud Farzaad.
Assistant Cultural Counsellors, Parviz Marzeban; Ali Asghar Emami-Ahari.
Commercial Attaché, Nubar Gulbenkian.

Area and Population.—Persia comprises an area of 628,000 sq. miles, with a population estimated at 18,900,000 in the 1956 census. It is mostly an arid table-land, encircled, except on the east, by mountains, the highest in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert.

The Persians are mostly Shi'ah Moslems but amongst them are a few hundred thousand Zoroastrians, Bahais, Sunni Moslems and Armenian Christians. There is also a substantial Jewish community. Civil and Penal codes based on those of France and Switzerland are in force.

Government.—Persia was ruled from the end of the 18th century by Shahs of the Qajar Dynasty, with despotic power, subject only to the influence of interpreters of the sacred law. A nationalist movement became active in Dec., 1905, and in Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. After the war of 1914–18, the subsequent troubles and the signature of the Soviet-Persian Treaty of 1921, a vigorous Prime Minister, Reza Khan, formerly an officer of the Persian Cossack Regiment, re-established general order. On Oct. 31, 1925, the last representative of the Qajar Dynasty, Sultan Ahmed Shah, who had been absent from the country for some time, was deposed by the National Assembly, which handed over the government to the Prime Minister, Reza Khan, who was elected Shah on Dec. 13, 1925, by the Constituent Assembly, and took the title Reza Shah Pahlevi.

Owing to Nazi German penetration before and during the early part of the war of 1939–45, the Shah and his Government tended so far to favour the Axis powers that, after the German invasion of the U.S.S.R. in 1941, counter-measures became necessary; British and Soviet Forces entered the country from south and north on August 25, 1941, and expelled the agents of the Axis. On September 16, 1941, Shah Reza abdicated and left the country, nominating the Crown Prince as his successor. The Prince ascended the throne under the title of Mohammad Reza Shah Pahlevi.

Under the Anglo-Soviet-Persian Treaty of Alliance of January 29, 1942, the independence and territorial integrity of the country were guaranteed by the United Kingdom and the U.S.S.R. Evacuation by the forces of both powers was to take effect within six months of the signature of the armistice with Germany and her associates. On September 9, 1942, Persia declared war on the Axis powers and on February 28, 1945, on Japan. During the remainder of the war with Germany, Persia became one of the principal routes of aid to the Soviet Union. United States Forces, which had joined British and Soviet troops in Persia to participate in the delivery of aid to Russia, were withdrawn from the country at the end of 1945. British troops evacuated Persia, in accordance with the Anglo-Soviet-Persian agreement, by March 2, 1946, six months after the conclusion of hostilities with Japan. Soviet troops, nevertheless, remained; and when Communist disturbances took place in the north-west part of Persia known as Azerbaijan, they refused to allow Persian forces to enter the area, with the result that an autonomous government was established at Tabriz. Soviet forces, however, eventually left the country in the month of May. This belated evacuation took place in accordance with an agreement which included provision for the formation of a Perso-Soviet Oil Company to operate in the north of Persia, subsequently rejected by the Majlis, and an understanding that the question of Azerbaijan should be peaceably settled. In December, 1946, Persian Government forces entered the province, virtually unopposed by the partisans of the autonomous Government, which itself collapsed upon the flight of the revolutionary leaders into the Soviet Union.

In March, 1949, the Shah issued an Imperial Firman convoking a Constituent Assembly to make certain revisions to the Constitution and the Assembly was duly elected and convened on April 21. After this Assembly the Senate was formed for the first time.

On March 17, 1951, the Majlis adopted a Bill for the nationalization of the Persian oil industry, and on March 20, the Bill was approved by the Senate. On April 28, the Majlis agreed to a resolution, which was passed on April 30 by the Senate, recommending the immediate taking over of all installations, including those of "the late Anglo-Iranian Oil Company." On April 29 the Shah appointed Dr. Mussadiq Prime Minister. The oil company sought arbitration, but this was rejected by the Persian government, and on May 26 the British government applied to the International Court of Justice at The Hague for a declaration that this refusal to submit to arbitration was illegal. The application was not approved.

In August, 1953, after the Shah had appointed Gen. Zahedi as Prime Minister, fighting broke out between his followers and those of Dr. Mussadiq. The Shah temporarily left the country, but Gen. Zahedi's forces were successful, and Dr. Mussadiq was arrested together with a number of the members of his former Cabinet. In December, 1953, diplomatic relations with Great Britain, which Persia had broken off in October, 1952, were re-established, and in August, 1954, the oil dispute was settled by an agreement, ratified on October 29, which provided for compensation to the A.I.O.C. and for the production, refining and sale of Persian oil by a Consortium in which the

A.I.O.C. have a 40 per cent. share (*Production and Industry*, below).

For the purposes of local government the country is divided into 11 Provinces (*Ustans*) comprising 76 Sub-Provinces (*Shahristans*), under Governors-General and Governors, respectively.

Defence.—The present strength of the Persian Army, mainly conscript, is approximately 170,000, including 10,000 officers and 40,000 N.C.O.'s. The N.C.O. cadre is up to establishment but officers are still under strength. The army, to which is attached a U.S. Advisory Mission, is well-equipped by 1939 standards. The present strength of the Air Force is approximately 5,000. It is equipped with about 200 American aircraft, of which 60 are jet ground attack types.

The gendarmerie, to which is also attached a United States Mission, has been reorganized. The Persian Navy consists of a small fleet of gunboats, landing craft and motorboats in the Persian Gulf and a few motor-boats in the Caspian Sea.

Education.—Since 1943 primary education has been compulsory and free. There are over 9,000 schools, 1,700,000 pupils, and also a few foreign schools in Tehran; there are Universities in Tehran and Tabriz, and University Colleges at Isfahan, Meshed and Shiraz.

Language and Literature.—Persian, or Farsi, the language of Iran, and of some other areas formerly under Persian rule, is an Indo-European tongue with many Arabic elements added; the alphabet is mainly Arabic, with writing from right to left. Among the great names in Persian literature are those of Abu'l Kásim Mansúr, or Firdausi (A.D. 939–1020), Omar Khayyám, the astronomer-poet (died A.D. 1122), Muslihu'd-Din, known as Sa-di (born A.D. 1184) and Shems-ed-Din Muhammad, or Hafiz (died A.D. 1389). The Persian Press consists of a large number of Tehran and provincial newspapers and periodicals. Two Tehran dailies and three weeklies have circulations exceeding 20,000 copies. Circulations in the provinces are very small. English and French dailies are published in Tehran.

FINANCE

	1959–60*	1960–61*
	Rials	*Rials*
Revenue.....	64,158,755,080	81,024,105,803
Expenditure....	65,267,541 306	81,926,682,104

*Estimated

The commercial rate of exchange was stabilised in 1955 as follows: Bank Melli buying rate: *Rials* 210=£1. Selling rate *Rials* 214.2=£1. The official rate of Exchange is *Rials* 75=£1.

Production and Industry.—While petroleum is the principal product and by far the greatest export, Persia, except for its desert areas, is essentially an agricultural country and 80 per cent. of the inhabitants depend for their living on the land. Sheep and goats are numerous and good wool is produced. There are extensive forests in the north and west, the conservation of which is an urgent problem. The cultivation of opium is prohibited. A certain amount of progress has been made in the development of industry. Apart from petroleum, the principal industries are carpet weaving, cotton ginning, spinning and weaving (Isfahan, Tehran and Shahi areas), wool spinning and weaving, jute sacks, silk goods (Chalus), sugar, tea, fruit, caviar (Caspian Fisheries Company), meat canning, distilling and brewing, tobacco and cigarettes. The oilfields had produced over 200,000,000 metric tons of oil from their first output to Dec. 31, 1946, and subsequent figures (in metric tons) were 1946, 19,858,471; 1947, 21,737,949; 1948, 24,871,000; 1949, 26,807,000; 1950, 35,000,000; 1951 (to Oct.) 17,000,000. Oil shipments were resumed on Oct. 30, 1954, and recent production figures have been (long tons): 1955, 15,772,000; 1956, 25,934,000; 1957, 37,800,000; 1958, 39,800,000; 1959, 44,700,000.

The former functions of A.I.O.C. (now renamed "British Petroleum Company") in Persia were taken over for an initial period of 25 years by a consortium of 8 oil companies (including A.I.O.C., one French, one Dutch and five U.S.), A.I.O.C. receiving from Persia £25,000,000 cash in the 10 years from Jan. 1, 1957, in compensation for its oil assets in Northern Persia and in settlement of losses since 1951; and from the other members of the consortium for their shares, about £214,000,000 payable over 20–25 years. The consortium is responsible for the production, refining and sale of Persian oil through two operating companies, while "non-basic" operations are undertaken by the National Iranian Oil Company.

Communications.—The principal roads are from the frontier of Iraq at Khusruvi to Tehran; from Tehran *viâ* Arak to Ahwaz and Khorramshahr; from Tehran *viâ* Qum, Isfahan and Shiraz to Bushire; from Tehran into Azerbaijan, through Tabriz to Julfa (on the Soviet frontier) with branch roads into Turkey and Northern Iraq; from Tehran to Meshed; three roads through the Elburz mountains to the Caspian coast and the Soviet borders east and west of the Caspian Sea; and from Isfahan, *viâ* Yezd and Kerman to Zahidan and thence to Meshed. Zahidan is connected by road with Quetta (Pakistan). Some of these roads traverse extremely difficult mountainous country; others are desert tracks. Generally speaking, Persian roads are not asphalted but gravel-surfaced. Railways have been constructed since 1927. The *Trans-Iranian Railway*, from Bandar Shah, on the Caspian Sea, to Bandar Shahpur, on the Persian Gulf, was inaugurated in 1938; this line has a total length of 872 miles, the total cost, after eleven years' work, being approximately £30,000,000. The branch lines from Tehran to Meshed and to Tabriz have now been completed. There are also railroads from Tabriz to Julfa and from Zahidan to Mirjawa and branch lines from Ahwaz to Khorramshahr and from Khorramshahr to Tanuma in Iraq (on the Shatt el Arab, opposite Basra) were opened during the war. An extension from Qum to Kashan is now in operation.

Civil Aviation.—In May, 1946, a Department of Civil Aviation was created, subordinate to the Ministry of Roads. Progress has been made towards establishing first-class International Airports at Tehran and Abadan, with secondary airfields in accordance with ICAO standards. *Iranian Airways* (non-government owned) formed in May, 1946, runs services to some Middle Eastern countries as well as internal services. *Persian Air Services* (independently owned) formed in late 1954, runs non-scheduled passenger and freight services to adjoining countries and also to Europe. Air France, K.L.M., S.A.S., Iraqi, M.E.A., P.A.A., Lufthansa, B.O.A.C., Alitalia and Aryana Airways operate services to Tehran.

TRADE

	1957–58	1958–59
Imports .	*Rials* 31,349,000,000	*Rials* 33,458,260,394
Exports .	„ 8,353,000,000	„ 7,940,615,161

These figures are calculated at the commercial rate of exchange and exclude oil exports.

	1958	1959
Imports from U.K.....	£38,556,594	£38,203,688
Exports to U.K.....	56,224,768	57,219,790

The leading imports into Persia are cotton and woollen fabrics, tea, sugar, motor vehicles, railway material, industrial machinery, chemicals and pharmaceuticals, electrical goods, hardware, chinaware and cement; the principal exports are heavy oils, petrol, carpets, gum, fruits, hides and skins, animal casings, cotton, wood staves and rice.

The principal countries trading with Persia are the U.K., U.S.A., Germany, Japan, India and the U.S.S.R.

CAPITAL: Tehran, population (1956) 1,500,000. Other large towns are Tabriz (290,000), Isfahan (254,000), Meshed (242,000), Shiraz (169,000), Resht (109,000), Kerman (62,000), Hamadan (100,000), Yezd (66,000), Kermanshah (125,000), Abadan (226,000), Ahwaz (120,000).

FLAG: White, bordered with green (top) and red (bottom), with arms (lion and sun) in centre.

Vice-Consuls, Señor Daniel Caballero; Señor Augusto Valdivia.

There are Consulates at *Hull* and *Birmingham*.

Area and Population.—Peru is a maritime Republic of South America, situated between 0° 00′ 48″ and 18° 21′ 00″ S. latitude and between 68° 39′ 27″ and 81° 20′ 13″ W. longitude. The area of the Republic, including 4,440 square kilometres of the Peruvian section of Lake Titicaca and 32 square kilometres of the coastal islands, is about 531,000 square miles. The total population on June 30, 1959, was estimated at 10,524,000. In 1958 there were 341,164 births, 93,203 deaths and 31,560 marriages.

Physical Features.—The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points in the Peruvian sector being *Huascaran* (22,211 feet), *Huandoy* (20,855 feet), *Ausangate* 20,235 feet), *Arequipa* (or Misti) volcano (18,364 feet), *Hualcan* (20,000 feet), *Chachani* (19,037 feet), *Antajasha* (18,020 feet), *Pichupichu* (17,724 feet), and *Mount Meiggs* (17,583 feet).

There are three main regions, the *Costa*, west of the Andes, the *Sierra* or mountain ranges of the Andes, which include the *Punas* or mountainous wastes below the region of perpetual snow and the *Montana*, or *Selva*, which is the vast area of jungle stretching from the eastern foothills of the Andes to the eastern frontiers of Peru. The coastal area, lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current; its chief products are cotton, sugar, and petroleum. It contains the capital, Lima, and most of the white population. In the mountains, where most of the Indians live, are to be found minerals in great richness and variety, and cattle, sheep, llamas and alpacas are bred there. In the mountain valleys maize, potatoes and wheat are grown. Upon the eastern slopes of the Andes are to be found very large tracts suitable for cultivation and stock raising. The main products of the jungle are timber, barbasco and leche caspi.

Government.—Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541). He subjugated the Incas (the ruling caste of the Quichua Indians), who had started their rise to power some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended in 1860, 1919, 1933, 1936 and in 1939), and is that of a democratic Republic. The President is elected for six years by direct vote of the people. Congress is composed of a Senate and of a Chamber of Deputies, both Houses being elected for six years. Voting is compulsory for all Peruvian men and women between the ages of 21 and 60, for married men and women between 18 and 60 and for single men and women between the ages of 18 and 21 who are legally released from parental tutelage.

Production.—Agriculture and mining are the principal industries, employing over 70 per cent. of the inhabitants. The chief crops in order of value are cotton, potatoes and other vegetables, sugar, fruit, maize, rice, wheat barley, grapes and coffee. At June 30, 1959, the gainfully employed population numbered 3,893,551, of whom 2,255,923 were engaged in agricultural and pastoral activities. About 4,188,000 acres were under cultivation at the end of 1957 and steps are being taken to increase

this area, which was probably larger in Inca times, by more intensive irrigation. Minerals produced in 1957 were valued at *soles* 4,408,970,000 and included lead, zinc, copper, iron ore, petroleum, silver, gold, tungsten, bismuth, antimony and vanadium. The islands off the Pacific coast provided guano amounting to 285,407 metric tons in 1957.

Communications.—In recent years the coastal and sierra zones have been opened up by means of roads and air routes and there is air communication, as well as communication by protracted land routes, with the tropical eastern zones, which lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. The completion in 1944 of the trunk road of the *Andean Highway* from the Pacific port of Callao, *viâ* Lima, Oroya, Cerro de Pasco (14,700 ft.), Huanuco, Tingo Maria, to Pucallpa, the river port on the Ucayali, one of the largest tributaries of the Amazon and accessible all the year round to vessels of 3,000 tons, forms a link between the Pacific, the Amazon and the Atlantic. The trunk road runs through the *Boqueron del Padre Abad*, a pass rediscovered on July 22, 1937, in the backbone of the Blue Cordillera. The Peruvian section of the Pan American highway is complete and is asphalted throughout the major part of its length.

The first railway was opened in 1850 and of the 2,494 miles of railways now operating, Government lines account for 578 miles, the Peruvian Corporation 1,180 miles and private enterprises about 736 miles. There is also steam navigation on the eastern rivers such as the Ucayali (*see* Andean Highway, above) and Huallaga, and in the south on Lake Titicaca. Air services are maintained throughout Peru, and a number of international services call at Lima.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 30,000 of all ranks; the Navy consists of 2 cruisers, 3 destroyer escorts and 3 frigates; 4 new submarines completed in U.S.A. in 1954–57; 4 L.S.T.'s; 8 river gunboats; 2 transports; 2 river transports; 3 (8,000 ton) oil tankers and five smaller tankers; 6 motor launches; a fleet supply ship; a submarine salvage vessel and 2 tugs. There is a naval cadet school at La Punta and a submarine base at Callao. There are military aerodromes at Talara, Chiclayo and Las Palmas (near Lima), an air transport squadron at Lima and a seaplane base at Iquitos. The air force is equipped with P.47's, Catalinas, D.C. 3's, Beavers, A.T.6's, F.86's, T.33's, Hunters and Canberras.

Education.—Elementary education is compulsory and free for both sexes between the ages of 6 and 14. In 1958 there were 1,308,236 pupils undergoing primary education and 122,221 attending secondary schools. There were 11,802 state primary schools with 29,155 teachers and 154 state secondary schools with 3,762 teachers, providing 5 year courses from 12 to 17. In addition there were 2,087 private schools providing primary and secondary education with 10,097 teachers and 317 schools conducted by religious orders. The State provides rural agricultural schools for Indians, mining schools and polytechnics in the more populated centres. The University of San Marcos at Lima, founded in 1551, had 10,442 students in 1957, and there are smaller universities at Cuzco, Arequipa and Trujillo, a Catholic university at Lima, and a national engineering university.

Language and Literature.—Spanish is the official language of the country and notably of the original Spanish stock from which the governing and professional classes are mainly recruited, but more than half the nation is composed of Indians, whose principal languages (Quichua and Aymara) are widely spoken. Before the arrival of Pizarro, the Incas had attained a high state of culture, some traces of which survived three centuries of Spanish rule. Modern Peruvian literature includes a national drama in the Spanish tongue and many Peruvian writers have attained international fame. The national library founded at Lima in 1821 was pillaged by Chileans in the Pacific War of 1879–1882, but many of the scattered manuscripts and books have since been recovered. The greater part of the historical section of the library was destroyed by fire in 1943. The first printed news-sheet in South America was issued at Lima in 1594 and in 1953 there were 5 main national daily papers, and 45 provincial ones with a small and purely local circulation. A chair of English was established in 1938 at the Universidad Mayor de San Marcos in Lima.

FINANCE

Administrator of Social Welfare, Mrs. Amparo P. Villamor.

PHILIPPINE EMBASSY IN LONDON
9a Palace Green, W.8
[Western: 3646]

Ambassador in London, His Excellency Leon Ma. Guerrero (1954).

Area and Population.—The Philippines are situated between 21° 20′–4° 30′ N. lat. and 116° 55′–126° 36′ E. long., and are distant about 500 miles from the south-east coast of the continent of Asia.

The total land area of the country is 114,831 square miles, of which total 106,914 square miles are contained in the eleven largest islands, the 7,079 other islands having a combined area of 7,920 square miles.

The principal islands are:—

Name	sq. miles	Name	sq. miles
Luzon	40,422	Mindoro	3,759
Mindanao	36,538	Leyte	2,786
Samar	5,050	Cebu	1,703
Negros	4,906	Bohol	1,492
Palawan	4,550	Masbate	1,262
Panay	4,446		

Other groups in the Republic are the Sulu Islands (Capital, Jolo), Babuyanes and Batanes; the Catanduanes; and Culion Islands.

The population of the Philippines at the 1953 census was 21,039,200. Results of a further census which has been taken are not yet available, but the population was estimated as approximately 24,000,000 in 1960.

The inhabitants, known as Filipinos, are basically all of Malay stock, with a considerable admixture of Spanish and Chinese blood in many localities, and over 90 per cent. of them are Christians, predominantly Roman Catholics. Most of the remainder are Mohammedan Moros in the south, and Pagans, mainly in the north. There is a Chinese minority estimated at 350,000, and other much smaller foreign communities, notably Spanish and American.

Government.—The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan who was slain by the natives of Mactan, a small island near Cebu. In 1565 Spain undertook the conquest of the country which was named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 Manila was occupied by a British force, but in 1764 it was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. After the Spanish fleet had been destroyed in Manila Bay (May 1, 1898), Manila was captured by American troops with the help of Filipinos, on Aug. 13, 1898, and the Islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898. However, the Filipinos, under Aguinaldo, rose up in arms on Feb. 4, 1899, against the U.S. Government, maintaining a desultory rebellion until it was quelled in 1902. Following this, the Philippine Commission was established, consisting of a Governor-General and Commissioner appointed by the President of the United States, who exercised a large measure of executive and legislative authority.

A measure of local independence was granted under the Jones Act of August 29, 1916. On March 24, 1934, the Tydings-McDuffie Law, gave the Philippines a "Commonwealth" Status. The Republic of the Philippines came into existence on July 4, 1946. The Constitution provides for a President elected for a term of four years, and a bi-cameral Congress, consisting of a Senate composed of 24 senators and a House of Representatives of not more than 120 members. No person may serve as President for more than eight consecutive years. The term of office of Senators is six years and of Representatives four years.

Language and Literature.—The official languages are English, Spanish and the National language (of Malay origin) Tagalog. About one-third of the people read or understand English, which is the language of instruction. The literacy rate is estimated at 70 per cent. There is a National library in the capital with branches in other urban centres, and a flourishing English press. Education accounts for about a quarter of local expenditure in the national budget. Secondary and higher education is extensive. There are 22 private universities recognized by the Government, including the Dominican University of Santo Tomas (founded in 1611), the first in the Far East and 25 years older than Harvard; there is also the State-supported University of the Philippines at Manila (1908).

Roads and Railways.—Communications suffered serious damage during the War of 1941–45 owing to the lack of proper maintenance during the Japanese occupation and destruction by bombardment. The highway system of approximately 22,747 miles of roads and streets is undergoing rehabilitation and extension. Before the war the railways, which were largely Government owned, operated approximately 845 miles of track of which some 832 miles were in operation in 1960. Rolling stock losses were also heavy, but have been largely made up, and the Manila railway, on Luzon island, has been converted to diesel traction.

Shipping.—The ports of entry are Manila, Cebu, Iloilo, Zamboanga, Davao, Jolo, Legaspi, Aparri, José Panganiban, San Fernando La Union and Tacloban. There are nearly 2,000 vessels of various types, totalling over 130,000 tons, engaged in coastwise and river traffic.

Civil Aviation.—Air transport plays an important rôle in inter-island travel and in communications overseas. Philippine Air Lines (54 per cent.

Government-owned) operate eight weekly services to Hong-Kong; foreign airlines serve the Hong-Kong and other international routes.

The Philippines is a predominantly agricultural country, the chief products being rice, coconuts, maize, sugar-cane, abaca (manila hemp), fruits, tobacco and lumber.

The principal Philippine exports in both natural and manufactured states are coconuts, sugar, abaca, base metals, lumber, pineapples, embroideries and tobacco.

Towns.—Capital, ΨManila, in the island of Luzon; population (1948), including the adjoining areas of Quezon City and Pasay City (formerly Rizal), 1,500,000. Quezon City has been designated as the future capital of the Philippines, but, pending completion of government building projects, the Executive, Legislative and Judicial departments of the government are still located in Manila. The next largest cities are ΨCebu (209,111), Davao (138,899), ΨIloilo (137,476), ΨZamboanga (128,981) and Bacolod (126,628).

Consulate-General in London, 19 Weymouth Street, W.1.

Area and Population.—In 1939 the area of the Polish Republic was 150,572 square miles with a population of about 35,000,000, of whom 30 per cent. were national minorities (including over 3,000,000 Jews). Frontier changes took place at the end of the war as foreshadowed at the Tehran Conference in 1943. About 69,000 square miles of territory in the east were ceded to the Soviet Union. In exchange Poland received in the west 39,000 square miles of Eastern Germany. The southern boundary was not affected except for minor adjustments to that part formerly dividing Poland from Ruthenia (Czechoslovakia). The western boundary is formed by the Rivers Oder and Neisse. Poland now has a maritime frontier stretching from west of Kaliningrad (formerly Königsberg) to west of Szczecin (formerly Stettin). As a result of the change of frontier and of very great war-time losses, at the census of December 3, 1950, the population had fallen to 24,977,000 in an area of 121,000 square miles. By the end of 1959 the population was estimated to have grown to 29,500,000. Official reports show a rate of 26·3 per thousand live births and 8·4 per thousand deaths in 1958. The infant mortality rate is 77 per thousand. Roman Catholicism is the religion of the vast majority of the inhabitants.

Government.—The Republic of Poland (reconstituted within the limits of the old Polish Commonwealth) was proclaimed at Warsaw in November, 1918, and its independence guaranteed by the signatories of the Treaty of Versailles. The Polish Commonwealth had ceased to exist in 1795 after three successive partitions in 1772, 1793 and 1795, in which Prussia, Russia and Austria shared. During the Napoleonic wars, the small Grand Duchy of Warsaw was created but was dissolved by the final act of the Congress of Vienna. The so-called "Congress Kingdom" was then established on the Polish territory which had fallen to Russia's share and the Tsar assumed the title of King of Poland. Prussia acquired Poznania and Polish Pomerania, Austria acquired Galicia and the small Republic of Cracow came into existence under the joint control of Prussia, Russia and Austria. In 1831, after an insurrection, the Congress Kingdom was dissolved and annexed by Russia and in 1848 the Austrians absorbed the

Cracow Republic, Poland as an independent state ceasing to exist until the end of the War of 1914–18, when she became independent once again, after 150 years of foreign rule.

In March, 1939, Great Britain entered into a treaty with Poland (France had done so in 1921) guaranteeing Polish territory against aggression, and on Hitler's invasion France and Britain implemented their guarantee. On September 17, 1939, Russian forces invaded eastern Poland and on September 21, 1939, Poland was declared by Germany and Russia to have ceased to exist. A line of demarcation was established between the areas occupied by German and Russian forces. At the end of the war a Coalition Government was formed in which the Polish Workers' Party played a large part. In December, 1948, the Polish Workers' Party and the Polish Socialist Party fused in the new Polish United Workers' Party. This is a Communist Party which closely controls every branch of State activity. A new Constitution modelled on the Soviet Constitution of 1936 was adopted on July 22, 1952. It changed the title of the country to the Polish People's Republic (*Polska Rzeczpospolita Ludowa*). It made no provision for a President of the Republic, whose functions were to be jointly exercised by a Council of State. Private ownership of land and freedom of religion was recognized. Church and State were to be separate.

Despite the guarantee of religious freedom in the Constitution, a campaign of encroachment in 1953 culminated in the arrest of the Primate of the Roman Catholic Church, Cardinal Wyszyński. Dissatisfaction with the régime and conditions of life led to riots in Poznań in June, 1956, and subsequently M. Władysław Gomułka, who had been expelled from the Party in 1949, was reinstated and elected First Secretary of the Party. At the same time Cardinal Wyszyński was allowed to resume his functions. In Jan., 1957, elections to the *Sejm* were held and in Feb., 1957, a reconstructed Government, still led by M. Cyrankiewicz, took office.

Education.—Elementary education is compulsory and free. In 1949 there were over 3,000,000 pupils in elementary schools, and about 200,000 students in secondary, professional and trade colleges and schools. There are universities at Krakow, Warsaw, Poznań, Lodz, Wrocław, Lublin and Toruń and a considerable number of other seats of higher study.

Language and Literature.—Polish is a western Slavonic tongue (*see* U.S.S.R.), the Latin alphabet being in use, as in Czechoslovakia. Polish literature developed rapidly after the foundation of the University of Cracow (a printing press was established there in 1474 and there Copernicus died in 1543). A national school of poetry and drama survived the dismemberment and the former era of romanticism was followed by realistic and historical fiction, including the works of Henryk Sienkiewicz (1846–1916), Nobel Prize-winner for Literature in 1905, Boleslaw Prus (1847–1912), and Stanislaw Reymont (1868–1925), Nobel Prize-winner in 1924. There are now 46 daily papers published in Poland, 11 of them in Warsaw.

Production and Industry.—On January 3, 1946, a decree was issued to provide for the nationalization of mines, petrolcum resources, water, gas and electricity services, banks, textile factories and large retail stores. At present over 99 per cent. of Polish industry is stated to be "socialized", but 86 per cent. of agricultural land is privately farmed.

Area and Population.—Continental Portugal occupies the western part of the Iberian Peninsula, bounded on north and east by Spain, and on south and west by the Atlantic ocean; it contains an area of 34,500 square miles, with an estimated population (including the Azores and Madeira) of 8,980,682 (1958). It lies between 36° 58′–42° 9′ 12″ N. lat. and 6° 11′ 48″–9° 29′ 45″ W. long., being 302 miles in length from N. to S., and averaging about 117 in breadth from E. to W. The Azores and Madeira islands in North Atlantic are politically an integral part of the Republic.

In 1958 there were 212,467 live births, 91,891 deaths and 73,096 marriages in Continental Portugal.

Government.—From the eleventh century until 1910 the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove King Manoel II. and the Royal family into exile, and the National Assembly of Aug. 21, 1911, sanctioned a Republican form of government. The President is elected for seven years by indirect vote of the electors, who vote for members of an electoral college to select the President. He is not eligible for a second term. The Prime Minister is appointed by the President, who also appoints the other Ministers on the recommendation of the Prime Minister. The Government is responsible only to the President. There is a single Chamber Legislature (*Assembleia Nacional*) of 120 members elected by direct vote of the electors. There is also a "Corporative Chamber" consisting of representatives of local authorities and industrial, commercial, cultural and religious interests, to which all bills introduced into the Chamber must be submitted for its opinion. The Legislature is in session for three months in the year. In the recess the Government legislates by decrees or decree-laws, of which the latter only must be confirmed by the legislature. Both men and women enjoy the franchise; but there are certain educational or tax-payment qualifications.

Production.—The chief agricultural products of Portugal are cork, wheat, maize, rye, rice, oats, barley, potatoes, beans, chickpeas, onions, olives, oranges, lemons, figs, almonds, resinous products, timber and wine (including the rich red "port" shipped from Oporto). Sardine fisheries are important.

There are extensive forests of pine, oak, cork, eucalyptus and chestnut, covering about 20 per cent. of the total area of the country, and lumbering is the second largest industry.

The principal mineral products are wolfram, lead, tin, antimony, pyrites, iron ore, coal, manganese, kaolin and slate. The principal manufactures are textiles, pottery and chemical products (fertilizers, etc.), paper and glassware.

The Second Six-Year Development Plan (1959–64) provides *inter alia* for irrigation, agricultural resettlement and afforestation, for the development of electricity generation, mainly by hydroelectric means, of the steel and chemical industries, for extensive port works including a new shipyard at Lisbon, railway electrification, a bridge over the River Tagus at Lisbon and the expansion of the fishing and merchant fleets.

Defence.—Military service is compulsory for all men who are physically fit, less than 25 per cent. being exempted each year. The peace strength of the army is: officers 2,821 (active list), and about 2,000 (reserve); other ranks—permanent cadre of 34,000 with a yearly class of 31,000. A considerable amount of modern equipment has been received from the U.S.A. The navy consists of 860 officers and 6,375 ratings, manning a total of over 50 destroyers, frigates, sloops, submarines, mine-sweepers, patrol vessels and other small craft. With one exception the larger ships are of pre-war or wartime construction, though some are being modernized. Four new ocean and 8 new coastal minesweepers were received from the U.S.A. during 1954–55, and a further 4 coastal mine-sweepers and 12 patrol vessels have recently been completed. The establishment of the Air Force is 500 officers and 1,984 men with 332 aircraft of all types.

Language and Literature.—Portuguese is a Romance language with admixtures of Arabic and other idioms. It is the language of Portugal and Brazil. Portuguese language and literature reached the culminating point of their development in the *Lusiadas* (dealing with the voyage of Vasco da Gama) and other works of Camoens (Camões), born in 1524, died in 1580. Until the second quarter of the nineteenth century Portuguese literature dominated that of Brazil. Modern literature, both prose and verse, is in a flourishing condition and there are more than twenty daily newspapers, of which 9 are published in Lisbon.

Education is free and compulsory for three years from the age of 7. In 1952 a series of new measures was decreed to ensure school attendance and to reduce illiteracy, which was 30 per cent. at the time of the 1950 Census. Secondary education is mainly conducted in State lyceums, but there are also private schools. There are also military, naval, technical and other special schools. There are Universities at Coimbra (founded in 1290), Lisbon (1911) and Oporto (1911).

Communications.—On Jan. 1, 1957 there were 2,230 miles of railway open for traffic, of which 475 miles were narrow gauge. Electric traction on the Lisbon–Sintra (25 km.) and Lisbon–Carregado (40 km.) lines began in April 1957 and work on the electrification of the Carregado–Entroncamento line (70 km.) is proceeding. The mercantile marine consisted (Dec. 31, 1956) of 266 vessels over 100 tons, with a total tonnage of 515,162. In 1956, 32,042,493 gross tons of shipping entered ports in Continental Portugal and adjacent islands, including 6,485,609 gross tons under the British flag.

Civil Aviation is controlled by the Ministry of Communications. There is an international airport at Portela, about 5 miles from Lisbon, and the airport of Pedras Rubras near Oporto is also used for some international services. There is a civil airline, an inter-island service, services in Portuguese Africa and a separate airline running services within Portuguese India and to Karachi. British European Airways and Transportes Aereos Portugueses operate a daily service between London and Lisbon by agreement between them. There are altogether 19 airlines operating a total of about 400 services a month through Lisbon airport.

FINANCE	1960

Ambassador Extraordinary and Plenipotentiary, His Excellency Archibald David Manisty Ross C.M.G. (1960).....£4,100

Counsellor, J. D. Murray, C.M.G.

Commercial Counsellor and Consul-General, D. MacFarlane.

Naval, Military and Air Attaché, Comdr. T. A. Beet, R.N.

1st Secretary and Head of Chancery, J. McAdam Clark, M.C.

1st Secretary and Visa Officer, Mrs. M. I. Dunlop, M.B.E.

1st Secretary and Consul, F. C. Bishop.

1st Secretary (Commercial), H. F. Fisher.

1st Secretary and Information Officer, G. Stow.

2nd Secretary, Miss T. Solesby.

Attachés, W. Watson, M.B.E.; T. H. Froebelius, M.B.E.

BRITISH CONSULAR OFFICES

There are British Consular Offices at *Lisbon*, *Oporto*, *Setubal* and *Vila Real de Santo Antonio* (*Portugal*), *Ponta Delgada* (*Azores*), *St. Vincent* (*Cape Verde Islands*), *Funchal* (*Madeira*), *Lourenço Marques* and *Beira* (*Portuguese East Africa*), *Luanda* (*Portuguese West Africa*) and *Macão*.

BRITISH COUNCIL

Representative, J. G. G. Muir, D.S.C. The British Institute, Rua de Luis Fernandes 3, Lisbon.

There is a British Institute at *Coimbra* (Rua Alexandre Herculano 34) and an Anglo-Portuguese Association at *Oporto* (Rua de Breyner, 79).

ROYAL BRITISH CLUB, rua S. Pedro d'Alcantara, 3, Lisbon.

BRITISH CHAMBER OF COMMERCE IN PORTUGAL, 4 Rua Victor Cordon, Lisbon (Branches at Madorninha Senhora de Hora, *Oporto*, and 13*a* Rua 5 de Junho, *Funchal*, *Madeira*).

MADEIRA AND THE AZORES

Madeira and The Azores are administratively parts of metropolitan Portugal.

The Madeiras are a group of islands in the Atlantic Ocean about 520 miles west of Lisbon, and consist of Madeira, Porto Santo and 3 uninhabited islands (Desertas). The total area is 314 square miles, with a population of 269,769. ♆Funchal in Madeira, the largest island (270 square miles), is the capital, with a population of 37,035; Machico (4,734). Trade with U.K., 1959: Imports from U.K., £843,727; Exports, £274,703.

The Azores are a group of 9 islands (Flores, Corvo, Terceira, Sao Jorge, Pico, Fayal, Graciosa, Sao Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 square miles and a population of 318,558. ♆ Ponta Delgada the capital of the group, has a population of 22,448. Other ports are ♆Angra, in Terceira, (10,296) and ♆Horta (8,564). Trade with U.K., 1959: Imports from U.K., £456,820; Exports, £145,014.

PORTUGUESE OVERSEAS PROVINCES

CAPE VERDE ISLANDS, off the west coast of Africa, consist of two groups of islands, Windward (Santo Antão, São Vicente, Santa Luzia, São Nicolao, Boa Vista and Sal, the last-named having a South Atlantic air base, opened in 1949) and Leeward (Maio, São Tiago, Fogo and Brava) with a total area of 1,516 square miles and a population (Census of 1950) of 148,331. Revenue (1957) *Escudos* 119,969,00; imports (1957) *Escudos* 378,361,000; exports *Escudos* 346,820,000, shipping entries (1957) 8,749,927 gross tons. Capital, ♆Praia (6,000). Vessels take coal and oil at ♆Mindelo, Sao Vicente (pop. 20,000).

SÃO TOMÉ and PRÍNCIPÉ ISLANDS, in the Gulf of Guinea (area 372 square miles, population (1950), 60,159). Revenue (1957) *Escudos* 71,899,000; imports (1956) *Escudos* 137,345,000; exports, *Escudos* 173,670,000. Capital, ♆São Tomé (3,187). The fort of St. John Baptist on the Slave Coast is a dependency of the Province of São Tomé.

ANGOLA has an area of 488,000 sq. miles, pop. 4,145,266, with present capital ♆St. Paul de Luanda (pop. 40,000), and capital designate Nova Lisboa, and includes also Kabinda and Portuguese Zaire (N. of Congo). Angola was restored to Portugal by the Netherlands in 1648. Revenue (1957): *Contos* 2,172,394; imports (1957), *Contos* 3,565,578; exports, *Contos* 3,327,927. Imports from U.K., 1959, £3,631,828. Shipping entries (1957) 8,991,000 gross tons.

PORTUGUESE GUINEA, area 14,000 sq. miles, pop. (1950) 510,777 (capital ♆Bissau, population 6,000). Revenue (1957) *Escudos* 150,446,000; imports (1956) *Escudos* 208,082,000; exports, *Escudos* 207,359,000; shipping entries (1953), 186,783 gross tons.

A transcontinental railway from *Benguela* (Lobito Bay) in Angola, traversing the Katanga mineral district of the Congo and thence running southwards through Rhodesia to Bulawayo and eastwards to Beira, is being developed under British, Belgian and Portuguese control. This line makes through communication from Lobito Bay on the Atlantic to Beira on the Indian Ocean.

PORTUGUESE EAST AFRICA, OR MOZAMBIQUE, Lourenço Marques, Inhambane, Quelimane, Tete, Mozambique, Cape Delgado and Nyasa, together with the territory of Manica and Sofala, has a total area of 297,657 square miles, with a population (1950) of 5,732,317. Capital ΨLourenço Marques (48,000). Revenue (1957) *Escudos* 3,131,067,000; imports (1957), *Escudos* 3,111,562,000; exports, *Escudos* 2,029,294,000; trade with U.K., 1959: Imports from U.K., £5,187,146; Exports, £2,451,511. Shipping entries (1956), 18,463,714 gross tons.

ΨMACAU, in China, on the Canton River, has an area of 5 square miles and a population (1950) of 187,772. Revenue (1957), *Escudos* 109,755,000.

PORTUGUESE INDIA. Portuguese Possessions in India cover about 1,500 sq. miles and consist of the colony of *Goa* with the islands of Angediva, São Jorge and Morcegos on the Arabian (Malabar) sea coast; *Daman* (Damao) with the territories of Dadra and Nagar-avely on the Gujerat coast at the entrance to the Gulf of Cambay, together with the tiny island of *Diu* with coastal tracts of Gogola and Simbor. (Dadra and Nagar-avely came under the *de facto* control of the Indian Government in July, 1954). The total area of these territories is 1,540 sq. miles, with a population in 1950 of 637,591. Revenue (1957) *Escudos* 344,913,000; imports (1955) *Escudos* 710,990,000; exports *Escudos* 328,107,000; shipping entries (1957), 2,475,971 gross tons.

PORTUGUESE TIMOR (the eastern portion of the island), in the Malay Archipelago, has an area of 7,329 square miles, with a population (1950) of 442,378. Revenue (1957) *Escudos* 71,546,000; imports (1957), *Escudos* 61,330,000; exports *Escudos* 38,880,000; shipping entries (1957), 88,587 gross tons. Capital, ΨDili, pop. 7,000.

QATAR

Shaikh of Qatar, Ali bin Abdullah bin Jasim al Thani, *succeeded* August 20, 1949.

Qatar is an independent Arab Shaikhdom in special treaty relations with Her Majesty's Government. It covers the peninsula of Qatar from approximately the Northern shore of Khor al Odaid to the Eastern shore of Khor al Salwa. The area is about 8,000 sq. miles, with a population estimated at 40,000.

Oil deposits are being exploited by a British Company, under a concession granted by the Shaikh, and the first oil shipment was made on December 31, 1949. Oil is now being extracted at the rate of about 8,000,000 tons a year. Considerable development has resulted from this source of income. Outside Doha and the oil company's installations, conditions are primitive. The inhabitants are semi-settled tribesmen and Bedouin; apart from employment with the oil company and on development projects, pearling, which has greatly declined in recent years, and fishing, are the only alternatives to poor grazing as a means of livelihood. Such towns as exist are merely enlarged villages, with the exception of Doha, which boasts a bazaar, a good harbour for native craft, an airport, an increasing number of modern buildings, and an expanding population. The oil company has constructed a deep water port at Umm Said on the East coast of the peninsula. Regular air services connect Qatar with the other Persian Gulf Shaikhdoms (Bahrain, the Trucial States and Kuwait), Muscat, the Lebanon, Europe and the United Kingdom. The Shaikh has a British Adviser with a staff of British technical assistants. Wireless communications are managed by Cable and Wireless, Ltd. The Post Office is run by the British G.P.O. The currency is the Indian external *rupee*.

Foreign affairs are in the charge of the British Political Agent who lives in Doha.

CAPITAL, Doha. Population. Approximately 25,000.

FLAG: White and coffee-coloured, white portion nearer the mast; vertical indented line comprising 17 angles divides the colours.

British Political Agent, J. C. Moberly.
Adviser to the Government of Qatar, G. M. Hancock, O.B.E.

ROUMANIA

(Republica Populara Romina)

President of the Præsidium of the Roumanian Peoples' Republic, Ion Gheorghe Maurer, *elected President of the Præsidium by the Grand National Assembly*, January 11, 1958.
Vice Presidents, Mihail Sadoveanu; Anton Moisescu; Mihail Ralea.

COUNCIL OF MINISTERS
(March 19, 1957)

President of the Council, Chivu Stoica.
Vice Presidents of the Council, Emil Bodnaras; Petre Borilă; Alexandru Moghioros; Stefan Voitec; Alexandru Birladeanu; Gherasim Popa; Atanase Joja.
Minister for Foreign Affairs, Avram Bunaciu.
President of State Control Commission, Dumitru Coliu.
Justice, Gheorghe Diaconescu.
Finance, Aurel Vijoli.
Internal Affairs, Col.-Gen. Alexandru Draghici.
Petroleum Industry and Chemicals, Mihail Florescu.

Heavy Industry, Constantin Tuzu.
Consumer Goods Industry, Alexandru Sencovici.
Commerce, Gheorghe Radulescu.
Armed Forces, Col.-Gen. Leontin Salajan.
Transport and Communications, Dumitru Simulescu.
Problems of Local Agencies and of the State Administration (vacant).
President of State Planning Committee, Gaston Marin.

ROUMANIAN LEGATION IN LONDON
4 Palace Green, W.8
[Western: 9666]

Envoy Extraordinary and Minister Plenipotentiary, His Excellency Petre Balaceanu (1957).

Area and Population.—Roumania is a republic of South-Eastern Europe, formerly the classical *Dacia* and *Scythia Pontica*, having its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* (and the addition thereto of a strip of Southern *Bessarabia*) under the *Treaty of Paris* (April, 1856). The area in October, 1945, was estimated at 91,600 sq. miles, with a population (Census, 1956) of 17,489,794.

Government.—The principalities remained separate entities under Turkish suzerainty until 1859,

when Prince Alexandru Ion Cuza was elected Prince of both, still under the suzerainty of Turkey. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown was vested. By the *Treaty of Berlin* (July 13, 1878) the Principality was recognized as an independent State, and part of the *Dobrudja* (which had been occupied by the Roumanians) was incorporated. On March 27, 1881, it was recognized as a Kingdom.

The outcome of the War of 1914–18 added Bessarabia, the Bukovina, Transylvania, The Banat and Crişana–Maramureş, these additions of territory being confirmed in the Treaty of St. Germain, 1919, and the Treaty of Petit Trianon, 1920.

On June 27, 1940, in compliance with an ultimatum from U.S.S.R., Bessarabia and Northern Bukovina were ceded to the Soviet Government, the area affected being about 20,000 sq. miles, with a population of about 4,000,000.

In August, 1940, Roumania ceded to Bulgaria the portion of Southern Dobrudja (about 3,900 sq. miles) taken from Bulgaria in 1919.

During 1947 the historical parties, the National Peasant Party and the National Liberal Party, were liquidated and the trials and condemnations of their leaders took place. On Dec. 30, 1947, King Michael was forced to abdicate and the establishment of the Roumanian Peoples' Republic was proclaimed. On February 23, 1948, the Social Democrats were swallowed up by the Communist Party when the two fused to form the Roumanian Workers' Party, since when the Social Democrat element has been steadily liquidated. On March 28, elections were held for the Grand National Assembly. The People's Democratic Front, composed and dominated by the Roumanian Workers' Party, with its puppets the Ploughmen's Front, the National Popular Party and the Popular Hungarian Union, allocated itself 405 out of 414 seats; the new Constitution was passed and the Præsidium and Council of Ministers appointed. Thereafter the progress of the new People's Democracy towards socialism was hastened by the nationalization law of June 11, which brought under State control all industrial enterprises, mining, banking, transport and insurance. In October the Uniate Church was forcibly suppressed. At the turn of the year the dictatorship of the proletariat was officially established. The landowners were dispossessed, disfranchised and exiled on March 2, 1949. In 1950 the creation of collective farms was intensified. The liquidation of the middle classes continued and on April 20 most buildings owned by former members of the "bourgeoisie" were nationalized without compensation.

The currency reform of January, 1952, effectively wiped out the savings of the peasants. In May, 1952, several ministers were attacked for opposing the currency reform, following a deviationist policy of economic opportunism, and sabotaging the economic development of Roumania. They were replaced by other ministers, and the changes were made the occasion for a tightening of the Workers' Party organization and the elimination of the remaining Social Democrats from the Government and Workers' Party.

A new Constitution, modelled on the Soviet Constitution of 1936, was adopted unanimously on September 24, 1952, by the Grand National Assembly. The Assembly was later dissolved and elections were held for a new Grand National Assembly on November 30, 1952; in each constituency there was only one candidate for election, representing the People's Democratic Front. Further elections on similar lines were held in March, 1956.

Agriculture.—The soil of Wallachia and Moldavia is among the richest in Europe, producing wheat, maize, millet, oats, barley, rye, beans, peas and other vegetables. Grape vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp. Agriculture and sheep and cattle raising are the principal industries of Roumania, but the climate of this part of South-Eastern Europe is of the Continental character, and the intense winter cold and summer heat, and fierce summer drought sometimes defeat these principal industries. The forests of the mountainous regions are extensive (17,851,401 acres), and the timber industry is important. The total arable land under cultivation in 1959 was about 10,000,000 hectares.

Natural Resources and Industry.—Petroleum is the backbone of Roumanian industry and of the country's general economy. Production in 1936 (the peak pre-war year) amounted to 8,700,000 tons. In the immediate post-war period, production declined to less than half this figure, but it is now claimed that, with the discovery of new oilfields, production has recovered and reached a new peak of 11,438,000 tons in 1959. The country is also rich in other minerals, and produces in limited quantities coal, lignite, iron, gold, silver, mica and uranium. At the end of the first Five-Year Plan, 1951–55, the Government claimed to have exceeded their intention of increasing industrial production by 244 per cent. compared with 1950. A new Five-Year Plan was begun at the beginning of 1956 and it is planned to increase annual production by 60 per cent. compared with 1955 by the end of 1960. The Six-Year Plan provides for an average annual increase of industrial production of 13 per cent.

Other 1959 production figures, with 1965 targets in brackets are:

Crude oil.....	11,440,000 tons (12,200,000)
Coal.....	7,980,000 tons (11,500,000–12,500,000)
Electric power	6,824,000,000 kWh (18,500,000,000)
Natural gas..	5,782,000,000 cu. metres (13,300,000,000)
Steel.....	1,420,000 tons (3,300,000)
Pig Iron.....	846,000 tons (2,000,000)

Language and Literature.—Roumanian is a Romance language with many archaic forms and with admixtures of Slavonic, Turkish, Magyar and French words. The folk-songs and folklore, composed by the people themselves, and transmitted orally through many centuries (and collected in the 19th century), form one of the most interesting of such collections. The publication of all books and reviews is controlled and authorized by the *Editura de Stat*, which comes under the jurisdiction of the Council of Ministers. In 1958, 32 daily newspapers were published. The dominating religion is that of the Roumanian Orthodox Church.

Education is free and nominally compulsory with 2,400,000 in attendance, including over 400,000 at secondary schools and 80,000 in higher education. There are four Universities, at Bucharest, Iaşi, Cluj and Timisoara. A "Marxist-Leninist" University was opened in Bucharest in 1951. There are four polytechnics at Bucharest, Timisioara, Craiova and Iaşi, two commercial academies at Bucharest and Brasov, and one agricultural college at Bucharest.

Communications.—In 1939 there were about 7,000 miles of railway open for traffic, of which about 1,000 miles were in Bessarabia and Northern Bukovina, now ceded to the Soviet Union. The mercantile marine, as a result of war losses, seizure

and reparations, has been reduced to a few moderate-sized sea-going steamers and a number of coastal and river craft. The principal ports are Constantza (on the Black Sea), Giurgiu, Braila, and Turnu-Severin (on the Danube), and Sulina (on the Danube Estuary). Work on a canal linking the Danube and the Black Sea just north of Constantza was abandoned in 1953 and no more was heard of the project to build a canal linking Bucharest with Danube Estuary.

FINANCE

Preliminary figures of actual state revenue expenditure in 1958 were: Revenue, *Lei* 46,300,000,000; Expenditure, *Lei* 44,700,000,000.

	1959*	1960*
	Lei	*Lei*
Revenue	50,675,000,000	56,800,000,000
Expenditure	47,996,000,000	55,930,000,000

*Budget Estimates.

Up-to-date figures of the Public Debt are not available. No foreign loans (other than short-term commercial loans) are known to have been contracted since March, 1947. The internal debt was virtually wiped out by stabilization in August, 1947; there has been no internal loan issue since that date.

The Roumanian *Leu* (of 100 *Bani*) was revalued for the third time since the war on Feb. 1, 1954, foreign exchange rates being fixed at £1=16·80 *lei* and 1 U.S. $=6·00 *lei*. On July 1, 1957, the Roumanian State Bank announced the payment of 100 per cent. premium on all "capitalist" currencies for non-commercial transactions. This premium brings the tourist exchange rate to £1=33·60 *lei* and 1 U.S. $=12 *lei*.

TRADE	1947
Imports	U.S. $61,300,000
Exports	34,300,000

No complete figures for foreign trade have been published since the start of the Communist régime. Imports are chiefly semi-manufactured goods, raw materials, machinery and metals; exports consist principally of maize, wheat, barley, oats, petroleum, timber and cattle. Trade with U.K., and particularly exports to Roumania, increased considerably after the War, but has been relatively small recently. In 1959 the value of imports from the United Kingdom was £1,519,634; Roumanian exports to U.K., £2,149,002. By far the greater part of Roumania's foreign trade is now with the Soviet Union and the other countries of Eastern Europe. Roumania is a member of the Soviet-sponsored "Council for Mutual Economic Assistance."

CAPITAL, Bucharest, on the Dimbovitza, population (1956) 1,236,905. Other towns with a population of over 100,000 in 1956 are: Cluj (154,752); Timişoara (142,251); Stalin (123,882); Ploeşti (114,560); Iaşi (112,989); Arad (106,457); and Braila (102,491).

FLAG: Three vertical bands, blue, yellow, red, with the emblem of the Republic (mountains, fir trees, and an oil derrick, with a rising sun in the background, the whole surrounded by ears of wheat, at the top a five-cornered star, and at the bottom a ribbon with the letters "R.P.R.") in the centre band.

BRITISH LEGATION

24 Strada Jules Michelet, Bucharest 3

British Minister, His Excellency Robert David John Scott Fox, C.M.G. (1959) £3,800

1st Secretary, A. J. Wilton.

Military Attaché, Lt.-Col. A. C. F. Godwin.

Air Attaché, Group Captain E. C. S. Fewtrell D.F.C.

2nd Secretaries and Vice-Consuls, P. McKearney; H. M. Paterson.

SALVADOR

(República de El Salvador)

President, Lt.-Colonel José Lemus, *took office* Sept. 1956.

SALVADOREAN EMBASSY IN LONDON

6 Roland Gardens, S.W.7

[Fremantle: 2455]

Ambassador, Dr. Antonio Melendez (1958).

Secretary and Consul-General, Señor Don Guillermo Paz.

Area and Population.—The Republic of El Salvador extends along the Pacific coast of Central America for 160 miles with a general breadth of about 50 miles, and contains an estimated area of 8,058 square miles, with a population estimated (1958) at about 2,400,000. El Salvador is therefore one of the most densely populated countries of the new world. It is divided into 14 Departments.

The surface of the country is very mountainous, many of the peaks being extinct volcanoes. The highest peaks are the Santa Ana volcano (7,700 ft.) and the San Vincente volcano (7,200 ft.). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot, but towards the interior the altitude tempers the severity of the heat. Much has been done in recent years to improve sanitary conditions and services. There is a wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of El Salvador, the most recent being that of May 6, 1952, when the towns of Jucuapa and Chinameca were destroyed.

The principal river is the Rio Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while farther away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the Santa Ana volcano.

Government.—Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821. In 1839 the Republic broke away from the federation of Central American States. A new Constitution was adopted in 1950. The President is elected for six years and the Legislature for two.

Production and Industry.—The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as cotton, maize, sesame, indigo, rice, balsam, etc. In the lower altitudes towards the east, sisal is produced and used in the manufacture of coffee and sugar bags.

Education.—A high degree of illiteracy still prevails. Primary education is nominally compulsory, but the number of schools and teachers available is too small to enable education to be given to all children of school age. In recent Budgets, however, a high percentage of the national revenue has been devoted to education and great efforts are being made to eliminate the existing shortage of schools and teachers.

Language and Literature.—The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. There are 4 daily newspapers published at the capital, and 4 in the provinces.

Communications.—A British railway (the Salvador Railway Co.), nearly 100 miles in length, connects

Acajutla with the capital and with the important coffee centre of Santa Ana. The International Railways of Central America have a line from the port of La Union (on the Gulf of Fonseca) to the capital and another one in the opposite direction which taps the richest coffee growing region in the country and proceeds to Zacapa (in Guatemala) thereby affording continuous railway communication between San Salvador and Guatemala City and Puerto Barrios on the Caribbean coast. The re-draining and re-paving of most of the capital has been completed, as has also the macadamizing or paving of several hundred miles of rural roads, many of which are now passable all the year round. There is a good motor road between the port of La Libertad and the capital (23 miles), while motor transportation is possible throughout the year between the capital and Guatemala City. The Pan-American Highway from the Guatemalan frontier follows this route and continues to the Honduran frontier. The highway is now completed through the country. Pan-American Airways and TACA connect El Salvador with the U.S., Mexico and Central American countries and KLM with Europe.

There are post and telegraph offices throughout the country. There are many broadcasting stations and a television station.

FINANCE

	1958 *Colones*	1959 *Colones*
Revenue (*Budget*).....	181,000,000	150,000,000
Expenditure (*do.*).....	181,000,000	181,000,000

CONSULATE GENERAL IN LONDON

37–39 High Holborn, W.C.1

[Holborn: 9861]

Consul General, G. T. MacEwan.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious stonecutter of Dalmatia in the 4th century. The Republic always resisted the Papal claims and its integrity was respected by Italy, with which country it concluded (June 28, 1897), a treaty *di amicizia e buon vicinato*; a new treaty on similar lines was signed on April 29, 1953. The Republic is governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October) being thereafter ineligible for office for three years. A Council of twelve forms a Supreme Court of Justice. The area is approximately 23 square miles, the population 15,000. There is an army of 180. The city of San Marino, on the slope of Monte Titano, has three castles, a fine church and Government palace, a theatre and a museum. The principal industries are wine, cereals, cheese, olive oil, cattle and ceramics, in addition to the utilization and export of worked stone from Monte Titano and production of white and hydrated lime at Gualdicciolo. A Treaty of Extradition between the Governments of Great Britain and the Republic of San Marino has been in force since 1899.

In 1959, revenue totalled *lire* 1,027,087,000; expenditure *lire* 1,287,660,950; there is no debt. The capital San Marino, has a population of 2,000.

FLAG: Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

THE KINGDOM OF SAUDI ARABIA

(al Mamlaka al Arabiya as-Sa'udiya.)

King of Saudi Arabia, H.M. King Saud bin Abdul Aziz, G.B.E., *born* 1902, *succeeded* Nov. 9, 1953. The Saud family previously ruled in *Nejd* but was deposed by Ibn al Rashid and took refuge in Kuwait. Ibn Saud, the father of the present king, occupied *Riyadh* in 1900 and conquered the larger part of *Nejd* in 1913. In 1921 he became *Sultan of Nejd*, conquered the *Hejaz* and became King in 1926. He changed the name of his Kingdom to *Saudi Arabia* in 1932.

Crown Prince, H.R.H. Amir Faisal bin Abdul Aziz, G.B.E., *born* 1904.

Foreign Affairs, H.R.H. Amir Faisal, G.B.E.

Finance, Sheikh Mohammed Suroor.

Interior, H.R.H. Amir Abdullah Faisal.

Defence and Aviation, H.R.H. Fahd bin Saud.

Agriculture, H.H. Khalid bin Ahmed as Sidayri.

Education, H.R.H. Amir Fahd bin Abdul Aziz.

Commerce, Sheikh Mohammed Ali Reza.

Communications, H.R.H. Amir Sultan.

EMBASSY IN LONDON.

(Diplomatic relations suspended.)

The Kingdom of Saudi Arabia, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd being also King of the Hejaz.

By the *Treaty of Jedda* (May 20, 1927) Great Britain recognized Ibn Saud as an independent ruler, King of the Hejaz and of Nejd and its Dependencies.

The total area of the Kingdom is about 927,000 sq. miles, with an estimated population of not more than 6 millions.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabi sect. It subsequently fell under the Turkish yoke, but in 1913 Ibn Saud threw off Turkish rule and captured from the Turks the Province of

Hasa. In 1921 he added to his dominions the territories of the Rashid family of Jebel Shammar, which he captured by force of arms; in 1925 he completed the conquest of the Hejaz, and in 1926 accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

Nejd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahana Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at close on 3,000,000, the majority being Moslems of the Wahhabi movement. There is little agriculture, but wheat and barley are grown, and there is an experimental farm, irrigated from natural deep pools and covering 3,000 acres, at al-Kharj, about 50 miles south of Riyadh. The principal occupation of the bulk of the population is camel and sheep raising, but oil makes by far the largest contribution to the economy of the country. Oil was found in commercial quantities at Dammam, near Dhahran in the Hasa in 1938, and by 1955 production of crude oil from field storage amounted to over 350,000,000 barrels per annum. Exports other than oil are negligible. The capital is Riyadh (200,000), and the principal trading centres are Hofuf (the chief town of the Hasa province) (100,000), Ψ Al Khobar and Ψ Dammam on the Persian Gulf littoral, Anaiza, Buraida, Hail (20,000), and Jauf. The old ports (Persian Gulf) were Ψ Qatif, Ψ Uqair and Ψ Al Khobar, which were suitable only for sailing craft, but the Arabian-American Oil Company, which is exploiting the Hasa oil under a 60 years' lease, has built a deep-water port for its own purposes at Ψ Ras Tannura, and a civil deep-water port, with a pier seven miles long, was brought into use at Ψ Dammam in 1950. A railway is now in operation from Dammam through Hofuf to Riyadh.

The *Hejaz* ("The Boundary"—between Nejd and Tihama) extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 1,000,000 to 1,500,000, including many nomad tribes. On the coast are the small ports of El Wejh, Yanbu', Rabegh, Gizan and Ψ Jedda, the main port of Saudi Arabia. Jedda contains the ruins of the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the course of the disused Saudi-Arabian section of the Hejaz Railway which is scheduled for reconstruction. The *Oasis of Khaibar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. *Medina (al Madinah al Munawwarah*, "The City of Light"), once the terminus of the Hejaz Railway, 820 miles from Damascus, has a permanent population of about 20,000 and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabia, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. *Mecca*, the birthplace of the Prophet, is 45 miles east of the seaport of Jedda, by road, and about 200 miles south of Medina, and has a fixed population estimated at 200,000. The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. Ψ *Jedda* (200,000) is the principal port and commercial centre.

Asir ("The Inaccessible") extends, geographically, from a line drawn inland from Birk on the southern limit of Hejaz to the northern boundary of the Yemen, some 12 miles N. of the port of Meidi. Its breadth extends about 180 miles eastwards to Bisha in the north and to the boundary of the Beni Yam in the south. According to ancient Arab geographers, Asir used to be considered as a part of the Yemen. The territory includes the Farsan Islands, where prospectors have searched for oil, but without success. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. Capital, Abha.

Trade and Finance.—Formerly the annual pilgrimage to the Holy Places of the Hejaz provided Saudi Arabia with virtually the whole of her means of payment for imports. It is therefore not surprising that the foreign trade of the country was largely conducted by the merchant communities of Jedda and Mecca. Industry was, and is, almost non-existent. Imports are estimated to have averaged about £2,500,000 annually before 1939, of which the United Kingdom contributed less than £100,000. India was traditionally Saudi Arabia's principal commercial connection; and indeed the legal tender of Saudi Arabia, the silver rial, is of the same weight and fineness as the old Indian rupee. Religious objections to usury have affected the development of banking in Saudi Arabia. Though paper money is widely used, it is not officially recognised as currency. It has virtually supplanted gold as a means of payment for transactions nevertheless. Exchange rates, which were formerly subject to violent fluctuations, have now been given a considerable degree of stability by the operations of the Saudi Arabian Monetary Agency. The country shared the inflationary experiences of other Middle East countries during the war years. The effect of oil developments and of investment, mainly American, in Saudi Arabia has been to revolutionize the country's foreign exchange position and greatly to increase the size of the market.

	1958	1959
Imports from U.K. ...	£7,979,706	£6,843,765
Exports to U.K.	7,457,619	5 370,245

Communications.—The railway from the port of Dammam to the oilfields at Abqaiq and through Hofuf to Riyadh was opened late in 1951. The only completed metalled road, apart from those in the oilfields area, connects Mecca with its Port of Jedda, but a new road from Jedda to Medina (about 420 miles) was partially completed by a British firm and the remainder has been completed by a local contractor. The Saudi Arabian Government employs Transworld Airlines to pilot and maintain the Government-owned Saudi Arabian Airlines with Dakota, Skymaster, Convair and Bristol aircraft. Scheduled services are flown between Jedda, Taif, Riyadh, Hofuf and Dhahran. There are first-class airports at Dhahran, originally built by the United States Army as a military base, and at Jedda. The other airfields named are being developed. Saudi Arabian airlines also maintain regular services to Cairo and Beirut. Twice-weekly services operated by Aden Airways, Arab Airways (both subsidiaries of B.O.A.C.), Air Liban and Misrair call at Jedda, the route of Aden Airways including Cairo-Luxor-Jedda-Port Sudan-Asmara-Kamaran-Aden and return.

Education.—There are over 300 Government schools, mostly primary, but including seven secondary schools and one preparatory school, which prepares students who have completed their secondary course for University training, in Egypt or elsewhere. There is no University in Saudi Arabia. With three exceptions, all schools are maintained by the Government. Instruction is given to boys only. There are no girls' schools.

SAUDI ARABIAN FLAG: Green oblong, white Arabic device in centre: "There is no God but God. Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

CAPITAL, Riyadh, population about 100,000.

BRITISH EMBASSY

Saudi Arabia severed diplomatic relations with the United Kingdom on November 6, 1956. The Government of Pakistan has assumed responsibility for the protection of British interests in Saudi Arabia.

SOMALIA
(Somali Republic)

President, Adan Abdullah, *appointed for a term of one year*, July 1, 1960.
Prime Minister, Dr. Abdi Rashid Ali Shimarke.
Deputy Prime Minister, Abdi Hassan Boni.
Minister of Foreign Affairs, Abdullahi Issa.

The Somali Republic occupies part of the north-east horn of Africa, with a coast-line on the Indian Ocean extending from the boundary with Kenya (2° South latitude) to Capo Guardafui (12° N.); and on the Gulf of Aden to the boundary with French Somaliland. Somalia is bounded on the west by French Somaliland, Ethiopia and Kenya and covers an area of approximately 288,000 sq. miles. The population, of which a large proportion is nomadic, is estimated at about 1,864,000. Cattle raising is the main occupation in Somalia and there is a modest export trade in cattle on the hoof, skins and hides.

Government.—The Somali Republic, consisting of the former British Somaliland Protectorate and the former Italian trust territory of Somalia, was set up on July 1, 1960. British rule in Somaliland lasted from 1887 until June 26, 1960, with the exception of a short period in 1940–41 when the Protectorate was occupied by Italian forces. Somalia, formerly an Italian colony, was occupied by the United Kingdom from 1941 until the end of 1950, when it was placed under Italian administration by resolution of the United Nations. This trusteeship came to an end when Somalia was unified on July 1, 1960. The President of the Legislative Assembly of Somalia was elected provisional first President of the Republic and head of a caretaker administration.

CAPITAL.—Ψ Mogadishu, population (estimated 1956), 74,056. Other towns are Hargeisa (50,000), Ψ Berbera (19,000) and Burao (10,000).

Area and Population.—A National State in the south-west of Europe, between 36°–43° 45′ N. lat. and 4° 25′ E.–9° 20′ W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees. Continental Spain occupies about eleven-thirteenths of the Iberian peninsula, the remaining portion forming the Republic of Portugal. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 190,700 square miles, with an estimated population (Dec., 1959) of 29,662,000. provisional returns for 1959 gave 647,005 births, 264,615 deaths and 242,686 marriages. Infantile mortality was estimated at 41.11 per 100 births.

Physical Features.—The interior of the Iberian Peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, Sierra Morena, Sierra Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho.

Government.—Phoenician traders visited the peninsula more than a thousand years before the Christian era, but they were traders rather than settlers, although Cadiz has preserved its identity and claims to be "the oldest city in the world." The Roman occupation of Spain was completed after the close of the Second Punic War (201 B.C.) and *Hispania* was divided into two provinces. After the decline of the Roman Empire the Italian elements, which had partly displaced the Celts and Iberians, were in turn disturbed by settlers of Germanic origin. After the union of Aragon and Castile in the 15th century Spain was ruled by sovereigns of the Aragon, Hapsburg and Bourbon lines (with the intervention of a Republic 1873–74). Alfonso XIII. succeeding at birth in 1886. On April 14, 1931, following the results of the Municipal Elections, which showed anti-monarchical feeling to be extremely high in all the chief towns of Spain, King Alfonso XIII. left the country, and the Queen and other members of the Royal Family on the following day. A Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. The Republican Assembly (*Cortes*) was a single Chamber Congress of Deputies. Each Province had an Assembly (*Diputacion Provincial*), and, with the approval of the *Cortes*, Provinces might combine to form an Autonomous Region within the Republic.

On July 18, 1936, a counter-revolution broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain. The principal leader was General Francisco Franco Bahamonde, formerly Governor of the Canary Islands, from which office he was dismissed by the Azaña Government. The struggle, in its later phases, threatened to embroil some of the European Powers, those of Nazi-Fascist tendency lending aid to General Franco (leader of the Military-Fascist fusion, or *Falange*) while those of Communist views supported the Azaña (*Popular Front*) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 1939, the Civil War was declared to have ended, the Popular Front Governments in Madrid and Barcelona surrendering to the *Nationalists* (as General Franco's followers were then named). On June 5, 1939, the Grand Council of the *Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas*, which replaced the former *Cortes*, met at Burgos to legislate for the reorganization of the country under the Presidency of General Franco, who had assumed the title of *Caudillo* (*Leader*) *of the Empire and Chief of the State*. In the Civil War of 1936–39 over 1,000,000 lives were lost.

On July 1, 1942, General Franco announced the reinstitution of the *Cortes de España*, which was composed (May, 1955) of 515 members: *ex officio members*—16 ministers, 101 National Councillors of Falange, the President of the Council of State, the President of the Supreme Court of Justice, the President of the Supreme Court of Military Justice, 12 rectors of universities, 3 presidents of Royal Academies, and 52 mayors of the provincial capitals including Ceuta and Melilla. *Elected Members*—159 representatives of national syndicates, 101 representatives of municipalities, 4 representatives of Royal Academies, and 15 representatives of professions. *Nominated Members*—50 persons of high ecclesiastical, military, administrative or social rank.

On April 1, 1947, a Law of Succession was promulgated creating two new bodies: the Council of the Realm and the Council of Regency. The main duty of the Council of the Realm is to nominate a successor to Generalissimo Franco should the latter not already have done so before the time of his decease or incapacitation. On July 6, 1947, a referendum asking approval of this law was announced (July 27) to have received 14,145,163 affirmative votes out of a recorded total of 15,219,563. Under this law a Regency Council of three was to be set up in the event of the death or incapacitation of the Head of the State.

Defence.—Army—Spain is divided into 9 Military Regions. Seven of these regions have a Corps headquarters with 2 infantry Divisions (with the exception of the 8th region, which has one Division). The 9th region has no Corps headquarters, and only one Division. There are independent commands in the Balearics and Canaries. There are also one armoured and one motorized cavalry Division. The Spanish Army in Morocco is being reorganized as a consequence of Moroccan independence.

The active *Navy* consists of 3 cruisers, 6 destroyers, 27 A/S escorts (destroyers, frigates and corvettes), 3 minelayers, 19 minesweepers, 3 landing ships, 2 squadrons of helicopters and a large number of small craft. An extensive modernization programme is being carried out, and is due to be completed in 1961.

The *Air Force* is divided into 5 Air Regions with 2 overseas Air Zones, and a separate, functional Air Defence Command. It consists of 5 Fighter Wings, 2 Fighter-Bomber Wings, 3 Light Bomber Wings and 2 Transport Wings, with many training and rescue aircraft.

Education.—Primary education is free, but compulsory attendance cannot be enforced because of the inadequate number of schools. Official figures of illiteracy in 1950 give a total number of illiterates, excluding children under 10, of 3,983,890, or 14·24 per cent. of the population (men, 9·86 per cent., women, 18·30 per cent.). There are 11 Universities in continental Spain and 1 at La Laguna in the Canary Islands. The University of Salamanca was founded in 1230, Valencia (1245), Oviedo (1317), Valladolid (1346), Barcelona (1450), Saragossa (1474), Santiago (1501), Seville (1502), Granada (1526), Madrid, Murcia (1915).

Language and Literature.—Castilian is the language of more than two-thirds of the population of Spain and is the form of Spanish spoken in Mexico, Central and (except in Brazil) Southern America. Basque, reported to have been the original language of Iberia, is spoken in the rural districts of Vizcaya, Guipuzcoa and Alava. Catalan is spoken in Provençal Spain, and Galician, spoken in the north-western provinces, is allied to Portuguese. The literature of Spain is one of the oldest and richest in the world, the *Poem of the Cid*, the earliest and best of the heroic songs of Spain, having been written about A.D. 1140. The outstanding writings of its golden age are those of Miguel de Cervantes Saavedra (1547–1616), Lope Felix de Vega Carpio (1562–1635) and Pedro Calderón de la Barca (1600–1681). The Nobel Prize for Literature has three times been awarded to Spanish authors—J. Echegaray (1904), J. Benavente (1922) and Juan Ramón Jimenez (1956).

FINANCE	1959
Revenue..... *Pesetas*	63,200,000,000
Expenditure.....	59,800,000,000

Public Debt (December 31, 1959) excluding parastatal entities and State-guaranteed issues: *Pesetas* 93,179,600,000.

The rate of exchange for the *peseta* in July, 1960, was 168·0 *pesetas* = £1 sterling (*see also* p. 84).

Production and Industry.—The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, apricots and grapes. The agricultural products include wheat, barley, oats, rice, hemp and flax. In 1959 the orange crop, of which Germany, France and the Netherlands were the chief importing countries, amounted to 1,600,000 tons. The vine is cultivated widely; in the south-west, Jerez, the well-known sherry and tent wines are produced. Exports of agricultural products in 1958 represented about 67 per cent. of Spain's export earnings

Spain's mineral resources of coal, iron, wolfram, copper, lead and other ores are variously exploited. Many of the richer and more easily worked deposits have been exhausted, but the authorities are actively engaged in stimulating the exploitation of hitherto unworked or lower grade deposits. In 1959 the coal output amounted to 15,668,000 tons and iron ore 5,100,000 tons. The iron and steel industries produced 1,643,000 tons of pig iron and 1,813,000 tons of steel. Other production figures (in tons) included: cement, 5,218,000; lead, 65,000; zinc, 151,000; wolfram, 835; sulphuric acid, 1,144,000; paper, 306,000; cotton yarn, 72,000; and wool yarn 11,800. Production of electric power was 16,380 million kWh. The fishing industry is of importance.

The principal manufactures are textile goods of all kinds, footwear and other leather goods, ceramics, sewing machines, bicycles, chemical products and light engineering manufactures.

The tourist industry is becoming increasingly important and it is estimated that 2,800,000 tourists visited Spain in 1959.

Communications.—In 1959 there were 11,241 miles of railways in service. The sea-going mercantile marine in 1959 consisted of 1,693 vessels of 1,594,115 gross tons. Civil aviation is under the control of the Air Ministry; there are several inland and international services in operation.

TRADE

	1958 *Gold Pesetas	1959 *Gold Pesetas
Imports	2,598,870,000	2,432,440,000
Exports	1,484,262,000	1,523,326,000
	1958	1959

The BALEARIC ISLES are an archipelago off the east coast of Spain. There are four large islands (Majorca, Minorca, Iviza and Formentera), and seven smaller (Aire, Aucanada, Botafoch, Cabrera, Dragonera, Pinto and El Rey). The islands were occupied by the Romans after the destruction of Carthage and provided contingents of the celebrated Balearic slingers. The total area is 1,935 square miles, with a population of 441,842. The archipelago forms a province of Spain, the capital being ΨPalma in Majorca, pop. 149,921; ΨMahon (Minorca), pop. 16,547.

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 908,718. The Canary Islands form two Provinces of Spain.—*Las Palmas* (Gran Canaria, Lanzarote, Fuerteventura and the islets of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos), with seat of administration at ΨLas Palmas (pop. 177,746) in Gran Canaria, where U.S. oil companies have installed tanks for re-fuelling shipping; and *Santa Cruz de Tenerife* (Tenerife, La Palma, Gomera and Hierro), with seat of administration at ΨSanta Cruz in Tenerife, pop. 124,462. Trade with U.K., 1959: Imports from U.K., £3,370,972; Exports, £14,889,164.

ISLA DE LOS FAISANES OR ILE DE LA CONFERENCE is a Franco-Spanish condominium, under the Treaty of Bayonne Dec. 2, 1856, and March 27, 1901. It lies at the mouth of the Bidassoa in La Higuera bay. It is uninhabited.

ΨCEUTA is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 square miles, with a population of 64,000.

ΨMELILLA is a town on a rocky promontory of the Rif coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492. The population is 87,000. Ceuta and Melilla are parts of Metropolitan Spain.

Spanish Colonies

The Spanish Colonies consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population estimated in 1935 at 951,000.

SPANISH GUINEA, consisting of the islands of Fernando Póo and Annobon, the Corisco Islands and Rio Muni (mainland) was divided into two provinces on April 1, 1960, each becoming a province of Metropolitan Spain under a civil governor, the inhabitants having the same rights as Spanish citizens. *Fernando Póo* lies in the Bight of Biafra in 3° 12′ N. lat. and 8° 48′ E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. With its dependencies it has an area of about 800 square miles, and a population estimated at 34,200. The capital of Spanish Guinea is ΨSanta Isabel (pop. 9,000) on the island of Fernando Póo. The total area, mainland and islands, is about 10,000 sq. miles, with an estimated population of 204,495, of whom about 4,124 are whites.

Annobon Island (*Anno Bom*), in the Gulf of Guinea, in 1° 24′ S. lat. and 5° 3E. long.; population 1,420.

Corisco Islands, consisting of Corisco, Elobey Grande, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce.

Rio Muni (the second province) is a coastal settlement between Cameroon and Congo (1° N.—2° 10′ N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni Benito and Campa rivers, and at ΨBata (the principal town) on the coast.

WESTERN SAHARA.—Spanish possessions in the Western Sahara consist of two provinces—Ifni and Spanish Sahara. Ifni (capital, Sidi Ifni) extends on the coast from the mouth of Bou Sedra (Asif Saloguad) (approximately 29° 38′ N. lat.) to the River Assaka (Nun) which forms the S.W. boundary. The eastern boundary runs between 9° 50′ and 9° 55′ W. long. The coast line is 36 miles in length and the territory measures approximately 950 square miles. The province of Spanish Sahara extends from 27° 40′ N. lat. in the north to La Agüera (Cape Blanco) in the south, though the main southern boundary runs along latitude 21° 20′. The land area is approximately 125,000 square miles. Spanish Sahara is divided into two regions separated by latitude 26° which passes south of Cape Bojador. The northern region is the Seguia el Hamra (Rio Rojo) of which the capital is Aaiun. It extends eastward to approximately 8° 40′ W. long. The southern region is the Rio de Oro, of which the capital is Villa Cisneros. Its eastern boundary is approximately 12° W. long. Total population about 36,000.

SPANISH MOROCCO.—In addition to Ceuta and Melilla, Spain exercised until 1956 a protectorate over a part of Northern Morocco. Moroccan independence was proclaimed after negotiations with France and Spain in 1956 (*see* "Morocco"). Remaining Spanish settlements on the Moroccan seaboard are:—

Alhucemas, the bay of that name, includes six islands: population 366.

Penon de la Gomera (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 450.

The Chaffarinas (or Zaffarines) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 610.

SUDAN

(Republic of the Sudan)

Supreme Council for the Armed Forces

President, Ferik Ibrahim Abboud (*Prime Minister, Minister of Defence and Commander-in-Chief of the Army*).

Members

Minister of the Interior and Local Government, Miralai Ahmed Magdoub el Bahari.
Information and Labour, Lewa Mohamed Talaat Farid.
Communications, Agriculture, Irrigation and Hydro Electric Power, Miralai El Magboul El Amin El Hag.
Works and Mineral Resources, Lewa Ahmed Rida Farid.
Cabinet Affairs and Deputy Commander-in-Chief, Lewa Hassan Beshir Nasr.
Commerce, Industry and Supply, Miralai Mohamed Ahmed Irwa.

Council of Ministers

The Council of Ministers consists of the Members of the Supreme Council above, together with the following civilian ministers.

Foreign Affairs, Sayed Ahmed Kheir.
Finance and Economics. Sayed Abdel Magid Ahmed.
Education and Justice, Sayed Ziada Osman Arbab.
Animal Resources, Sayed Santino Deng Teng.
Health, Sayed Dr. Mohamed Ahmed Ali.

SUDANESE EMBASSY IN LONDON
3 Cleveland Row, S.W.1.
[Trafalgar: 8080]

Ambassador Extraordinary and Plenipotentiary, His Excellency Mohammed Hamad El-Niel.
Counsellors, Sayed Fakhradin Mohamed; Sayed Hassan Mohamed Hassan.
2nd Secretary, Sayed Mohamed Osman Shendi.
Cultural Attaché, Sayed Bushra Abdel Rahman.
Press Attaché, Sayed Hassan Mohamed El Amin.

Area and Population.—The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36′ N. lat., and reaches from French Equatorial Africa about 21° 49′ E. (at 12° 45′ N.) to the north-west boundary of Eritrea in 38° 35′ E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 950 miles.

The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Ethiopia; on the south lie Kenya Colony, the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa and Libya.

The *White Nile* enters from Uganda at the Sudan frontier post of Nimule in Equatoria Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. The *Blue Nile* flows from Lake Tana on the Ethiopian Plateau. Its course in the Sudan is nearly

500 miles long, before it joins the White Nile at Khartoum. The next confluence of importance is at Atbara where the main Nile is joined by the River Atbara. The total length of the Nile, now accepted as the longest river in the world, is estimated to be 4,160 miles from its source to the Mediterranean Sea. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*.

The estimated area is about 976,750 sq. miles, with a population of 10,262,536 (census, 1956), partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 8,000 Europeans. The Arabs and Nubians are all Moslems. The Negroes are generally pagans, but some have been converted to Christianity and others are beginning to go over to Islam. Population of provinces at the census of 1956 was: Bahr-el-Ghazal 991,022; Blue Nile 2,069,646; Darfur 1,328,765; Equatoria 903,503; Kassala 941,039; Khartoum 504,923; Kordofan 1,761,968; Northern 873,059; Upper Nile 888,611.

Government.—By virtue of the Condominium Agreement of 1899 between H.M. Government and the Egyptian Government, and Article 11 of the Anglo-Egyptian Treaty of 1936, the Sudan was administered by a Governor-General on the joint behalf of Great Britain and of Egypt.

On February 12, 1953, an Anglo-Egyptian Agreement guaranteed to the Sudanese the right to determine their own future and reserved the sovereignty of the Sudan until the day of self-determination for the Sudanese. The first Sudanese General Election was held at the end of 1953.

The Sudan House of Representatives on Dec. 19, 1955, voted unanimously a declaration that the Sudan was a fully independent sovereign state, and on Jan. 1, 1956, the Republic was proclaimed and was recognized by Great Britain and Egypt, a Supreme Commission being sworn in to take over sovereignty. On November 17, 1958, by means of a *coup d'état*, the Army took over control of the country. The constitution was suspended, Parliament and political parties dissolved. A Supreme Council of the Armed Forces and a Council of Ministers were set up.

Education.—Arabic has been adopted as the national language, and the Government has taken over formal education in the southern provinces, which had hitherto been largely in the hands of various Christian Missions. The University of Khartoum (formerly Gordon Memorial College) was raised to university status on July 24, 1956. It has about 1,200 students. There are 13 boys' and 2 girls' secondary schools with 5,143 boys and 490 girls; 100 boys' and 25 girls' intermediate schools with 18,794 boys and 3,427 girls; 632 boys' and 272 girls' elementary schools with 116,958 boys and 42,935 girls; 1,296 junior elementary schools with 118,907 pupils; 12 technical intermediate boys' schools with 1,413 pupils and 5 technical secondary schools with 628 pupils. Khartoum Technical Institute has 445 pupils. There are 4 training centres for men with 527 students; 3 training centres for women with 207 students and 1 training centre for intermediate school teachers with 156 students. In addition, there are 169 non-government schools of various grades.

Production.—The principal grain crop is *dura* (great millet), the staple food of the people in the Sudan. Sesame and ground-nuts are other important food crops, which also yield an exportable surplus and a promising start has been made with castor seed. The principal export crop is cotton. Main production is of long-staple (Egyptian type) cotton, but smaller quantities of short-staple (American type) cotton are also grown. Much of the high quality, long-staple cotton is provided by the Sudan Gezira Scheme, a Government-controlled project irrigated from the Sennar Dam on the Blue Nile. An extension to this known as the South West Extension (Managil Scheme) has also been producing long staple cotton since 1959. The Sudan also produces the bulk of the world's supply of gum arabic. Livestock is the mainstay of the nomadic Arab tribes of the desert and the negro tribes of the swamp and wooded grassland country in the South.

Communications.—The railway system (3 ft. 6 in. gauge) has a route length of about 3,200 miles, linking Khartoum with Wadi Halfa, Port Sudan, Wad Medani, Sennar, Kosti, El Obeid and Nyala. A line branching out southwards to Wau from the Sennar/Nyala western line has reached Aweil. Regular rail and Nile steamer services (operated by Sudan Railways) connect with the Egyptian State Railways to the North, and with the East African Railways and Steamers system to the South. ΨPort Sudan is a well-equipped modern seaport. Sudan Airways run regular services from Khartoum to many parts of the Sudan and to Egypt, Greece, Italy, the Lebanon and the United Kingdom.

FINANCE

	1960–61*
Revenue	£S56,169,359
Expenditure	47,841,402

* Estimated.

£S = Sudanese *Pound* of 100 *Piastres*.
Exchange Rate 97·15 *Piastres* = £1 sterling.

TRADE

	1959
Total imports	£S57,046,000
Exports	66,787,000
Imports from U.K., 1959	£12,969,744
Exports to U.K., 1959	18,630,752

The principal export is cotton, the value of which, together with cotton-seed, amounted in 1959 to £S44,172,000. Exports of gum arabic amounted to £S5,092,000. The chief imports are cotton piece goods, base metals, vehicles and transport equipment, machinery, petroleum products, sugar, tea, coffee and wheat flour.

CAPITAL, KHARTOUM. The town contains many mosques, an Anglican Cathedral, and the University, with extensive Government buildings. Estimated population, 93,103. Omdurman has an estimated population of 113,551.

FLAG: Tricolour, blue, yellow and green stripes.

Consul-General, C. Bergenstråhle.
Consul, H. Sköld.

Area and Population.—Sweden occupies the eastern half of the Scandinavian peninsula in N.W. Europe and comprises 25 local government districts, "Län," with an area of 173,436 sq. miles, and a population, Jan. 1, 1959, of 7,436,066. Of the 52,765 foreigners (non-Scandinavians) with permission to reside in Sweden, about 7,100 are Baltic refugees and 20,335 Germans. In 1958 there were 105,567 births (14·2 per 1,000 inhabitants), 71,109 deaths (9·6 per 1,000) and 50,572 marriages (6·8 per 1,000). In 1958 the infantile mortality rate was 15·8 per 1,000.

Government.—Under the Constitution of June 6, 1809 (with amendments) the throne is hereditary in the House of Bernadotte, Prince of Ponte Corvo, a Marshal of France, who was invited to accept the title of Crown Prince, with succession to the throne. The Marshal landed at Helsingborg on Oct. 20, 1810, and succeeded Charles XIII. in 1818. There is a Diet (*Riksdag*) of two Chambers, *Första Kammaren* of 150 members, elected for 8 years; and *Andra Kammaren* of 230 members, elected for 4 years. The Council of Ministers (*Statsråd*) is responsible to the Riksdag.

Production and Industry.—About 23 per cent. of the working population is devoted to agriculture, forestry and fisheries, about 290,000 being owners and 53,000 tenants of the land they cultivate. The country may be divided into three separate districts, the northern, forest; central, mining, industrial agricultural and forest; the southern, agricultural and industrial. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, wheat, rye, barley, potatoes, roots, olliferous plants and grasses. Dairy produce, however, accounts for about half the value of Swedish agricultural production. Sweden contains the great lakes of Vänern, Vättern, Mälaren and Hjälmaren. The forests are very extensive, covering over one-half of the surface of the country, and consisting chiefly of pine, spruce and birch; these are of great importance, supplying timber, pitch, fuel and tar, in addition to sulphite, sulphate and mechanical wood pulp for the paper-making and rayon industries. The mineral resources are extremely rich; iron ore of excellent quality; lead, zinc, sulphur, manganese, arsenic, gold, granite and marble. There are also considerable deposits of low grade uranium ore. There is a railroad opening up the rich iron-ore districts of Lapland and mineral trains run from Gällivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic; coal is being worked in Scania (Skåne).

In 1957 there were 16,915 industrial establishments (including mines and quarries) employing 693,456 operatives, and 184,237 in administrative and executive posts. The fishing industry landed catches valued at *Kr.*158,219,000 in 1958.

Communications.—Railroads totalling 9,900 miles in length (of which 9,250 are the property of the State) were open on January 1, 1959. At the beginning of 1959 there were 340 telephones for every 1,000 of the population, 353 per 1,000 had obtained wireless licences and at the beginning of 1960 the number of television licences issued totalled about 620,000. The number of private cars in use on the same date was estimated at about 1,000,000 or 1 to every 7 of the population. The Mercantile Marine (Jan. 1960), consisted of a total of 1,525 ships of 3,627,141 gross tons. Civil aviation is under the control of the Ministry of Communications, under whose supervision all matters concerning civil aviation are handled by the Department of Civil Aviation. Regular domestic air traffic is maintained by the Scandinavian Airlines system (on behalf of the Swedish Airlines) and by A. B. Linjeflyg. Regular European and intercontinental air traffic is maintained within the framework of the Scandinavian Airlines System in Copenhagen by the Swedish Airlines in collaboration with the Danish and Norwegian Airlines.

Defence.—Service in the Defence Forces is universal and compulsory, between 35,000 and 40,000 being trained annually; strength of the *Army* during the war of 1939–45 was about 500,000, equipped on modern lines and principally mechanized. The *Navy* consists of 3 cruisers, 14 destroyers, 13 frigates, 28 motor torpedo boats, 24 submarines and a large number of minor craft and auxiliaries. The naval stations are Stockholm, Karlskrona and Göteborg. The *Air Force* consists of 20 wings, chiefly fighters.

Religion.—The State religion is Lutheran Protestant, to which over 95 per cent. of the people adhere.

Language and Literature.—Swedish is one of the Teutonic languages spoken by the people of Scandinavia and is closely allied to Icelandic, Danish and Norse. Swedish national literature

may be dated from the foundation of the University of Uppsala in 1477 and reached its golden age under Gustavus III. (1771–1792), who founded the Swedish Academy in 1786. Among modern Swedish authors who have achieved world-wide reputations are August Strindberg (1849–1912), dramatist and novelist; Selma Lagerlöf (1858–1940), who was awarded the Nobel Prize for Literature in 1909 on account of her pre-eminence as a novelist; Verner von Heidenstam (1859–1940), poet and Nobel Prize-winner (1916); Erik A. Karlfeldt (1864–1931), Nobel Prize-winner in 1931 after his death, and Par Lagerkvist, Nobel Prize-winner, 1951. In 1958 there were 200 daily newspapers in the country, 9 major papers being published at Stockholm, 5 at Göteborg and 4 at Malmö.

Education.—(i.) *Primary:* Compulsory and free. Illiteracy rare. Maintained by the State and by local taxation. Attendance good. (ii.) *Secondary:* Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics, commerce and navigation. (iv.) *Universities:* State Universities at Uppsala (founded 1477) and Lund (founded 1668) and private but grant-aided Universities in Stockholm and Göteborg.

FINANCE	1960–61 (Estimated) *Kronor*

Area and Population—The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50′–47° 48′ N. lat. and 5° 58′–10° 3′ E. long. It is composed of 22 Cantons, 3 subdivided, making 25 in all, of very dissimilar size, united under a Constitution dated May 29, 1874, and comprises a total area of 15,950 square miles, with an estimated population (Dec. 1958) of 5,204,000. In 1958 there were 91,421 live births, 49,281 deaths and 39,975 marriages. The infant mortality rate was 22 per 1,000 live births. In 1950, out of a total of 4,714,992, 56 per cent. of the population was Protestant, 41 per cent. Roman Catholic and 0·4 per cent. Jewish.

* The President is elected in December and remains in office from Jan. 1 to Dec. 31; he is *generally* succeeded by the Vice-President.

Physical Features.—Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to 15,217 feet in height, occupy its southern and eastern frontiers, and the chief part of its interior; and the Jura mountains rise in the north-west. The Alps occupy 61 per cent., and the Jura mountains 12 per cent., of the country. The *Alps* are a crescent-shaped mountain system situated in France, Italy, Switzerland, Bavaria and Austria, covering an area of 80,000 square miles from the Mediterranean to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,732 feet) is partly in France and Italy; Monte Rosa (15,217 feet) and Matterhorn (14,780 feet) are partly in Switzerland and partly in Italy. The highest wholly Swiss peaks are Finsteraarhorn (14,026), Aletschhorn (13,721), Jungfrau (13,671), Mönch (13,456), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,803) and Breithorn (13,685).

The Swiss lakes are famous for their beauty and include Lakes Maggiore, Zürich Lucerne, Neuchâtel, Geneva, Constance, Thun, Zug, Lugano, Walensee and Brienz.

Production and Industry.—Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. Dairying and stock-raising are the principal industries, about 3,000,000 acres being under grass for hay and 2,600,000 acres pasturage. The forests cover about one-quarter of the whole surface. The chief manufacturing industries comprise engineering and other metallurgical industries, clothing, watchmaking, woodworking, foodstuffs, chemicals cotton, silk and rayon, embroidery and footwear.

Government.— The legislative power is vested in a Parliament consisting of two Chambers, a National Council (*Nationalrat*) of 196 members, and a Council of States (*Ständerat*) of 44 members ; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (*Bundesrat*) of 7 members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year. Not more than one of the same canton may be elected member of the Federal Council; on the other hand, there is a tradition that Italian and French-speaking areas should between them be represented on the Federal Council by at least two members.

Defence.—Army. Elite (ages 20 to 36), 16 yrs. ; initial training, 118 days. Subsequently 8 training periods of 21 days; then Landwehr (36 to 48) and Landsturm (48 to 60). Under the proposed reorganization of the Swiss forces, the ages for military service will be reduced as follows: Elite, 20–32 years, Landwehr, 33–42, Landsturm, 43–50. *Air Force.* Ground personnel: as Army. Flying personnel: age 20 to 36. Initial training 1 year. 6 weeks with squadron each year and completion of 70 hours' flying. After 36 revert to ground duties with Air Force or Army.

Communications.—By the end of May, 1960, the electrification of the entire Federal Railways' system of some 3,215 miles of track was completed. At the end of 1958, there were 37,459 miles of telegraph and telephone lines. By Dec. 31, 1959, the number of telephone subscribers amounted to over 1,500,000 and the network was fully automatic throughout the country. There were also 1,387,877 licensed radio receivers and 78,700 television receivers. At the end of 1959, the total length of first-class roads was 10,815 miles. The number of motor vehicles licensed on Sept. 30, 1959, was 792,194 (429,569 private cars, 281,780 motor cycles and motor scooters, 3,033 motor buses, 76,610 motor lorries and 1,102 tractors). A merchant marine, established in 1940, consisted in 1959 of 27 vessels with a total displacement of 138,683 tons (gross). In addition 409 vessels with a total tonnage of 335,000 were engaged in Rhine shipping. In 1959, goods handled at the Basle Rhine Port amounted to 4,898,351 tons. 122 lake vessels transported 8,949,581 passengers and 399,772 tons of freight in 1958. During 1959, Swissair flew 29,933,567 kilometres and carried 1,106,251 passengers.

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy practically unknown. (i.). *Primary :* Free and compulsory. School age varies, generally 7 to 14. (ii.) *Secondary:* Age 12–15 for boys and girls. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities:* Basle (founded 1460), Berne (1834), Fribourg (1889), Geneva (1873), Lausanne (1890), Zürich (1832), and Neuchâtel (1909), and the technical University of Zürich and commercial University of St. Gall.

Language and Literature.—There are three official languages: French, German and Italian. In addition Romansch is recognized as a national, but not an official language. German is the dominating language in 19 of the 25 cantons; French in Fribourg. Geneva, Neuchâtel, Valais and Vaud; Italian in Ticino, and Romansch in parts of the Grisons. Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler (1845–1924) and Hermann Hesse (1877–) were awarded the Nobel Prize for Literature, the former in 1919, the latter in 1947.

FINANCE		1959

Prime Minister, Marshal Sarit Thanarat.
Foreign Minister, Nai Thanat Khoman.

ROYAL THAI EMBASSY IN LONDON
23 Ashburn Place, S.W.7
[Frobisher: 2983]

Ambassador in London, His Excellency Mom Luang Peekdhip Malakul (1958).

Area and Population.—The Kingdom of Thailand, or Muang Thai, formerly known as Siam, has an area of 198,247 sq. miles with a population (estimated 1956) of 22,811,702. Thailand is in South-Eastern Asia. It has a common boundary with the Federation of Malaya in the south, and is bounded on the west and north-west by the Union of Burma and in the north-east and east by the Kingdoms of Laos and Cambodia, which were formerly part of the French Colony of Indo-China. Although there is no common boundary between Thailand and China, the Chinese province of Yunnan is only separated from the Thai northern border by a narrow stretch of Burmese and Lao territory. The country slopes southwards from the north-west and from the great mountains of Tibet. The principal rivers are the Salween (which forms a boundary with Burma for 200 miles), the Menam Chao Phya with its tributary the Meping (which are Thai throughout) and the Mekong and its tributaries, which water the eastern plateau.

Government.—Thailand is a sovereign independent state. Under the interim constitution promulgated in February, 1959, following on the bloodless revolution of October, 1958, the King exercises legislative power by and with the advice and consent of a Constituent Assembly, executive power through the Council of Ministers and judicial power through the courts established by law. He is advised by a Privy Council appointed by himself. The 240 members of the Constituent Assembly, who were appointed in February, 1959, under the terms of the interim constitution, as well as acting for the time being as the national legislature, have the additional task of drafting a permanent constitution for Thailand, but no definite date has yet been set for the completion of this.

Language, Religion and Education.—Thai is basically a monosyllabic, tonal language, a branch of the Indo-Chinese linguistic family. The principal religion is Buddhism, its followers numbering over 16 millions in 1953, with 627,435 Moslems and some 70,000 Christians. The 2,500th anniversary of the Buddhist Era was celebrated in Bangkok from May 12–15, 1957, with religious and public ceremonies. Primary education is compulsory and free and secondary education in Government Schools is free. In 1956 there were nearly 23,500 schools of all kinds, with about 3,500,000 pupils and 105,000 teachers. There are 5 Universities attended by about 27,000 students, 35 Training Colleges and 354 Vocational Schools (all types).

Production and Industry.—The country's most important products are agricultural or forest: rice (about 4,500,000 tons a year), rubber (about 130,000 tons a year and increasing) and timber (about 1,300,000 cubic metres a year). Other crops of some importance are sugarcane, tapioca, groundnuts, tobacco, maize, soya beans and coconuts.

As regards mineral wealth, tin (production about 10,000 tons a year) is important, and small amounts of wolfram, iron and lead ores are mined, and over 100,000 tons of lignite. Upwards of 200,000 tons a year of salt is produced by sea-water evaporation, but production is declining owing to marketing difficulties.

Much emphasis has been laid since 1959 on the encouragement of foreign investment in new local industries. By mid-1960 forty contracts had been signed for investment of this sort, including 4 car assembly plants, two pharmaceutical factories (the latter already in production), as well as textile, electrical bulb and appliances, and a wide range of other factories of moderate size.

Up to 1959, industry had been comparatively undeveloped in Thailand; but industries established previously include: cement, sugar, a little iron and steel, soap products, cigarettes, leather, glassware, ceramics, gunny bags, paper, textiles, marble, plywood and shaving board and tapioca. Cottage industries produce silk and cotton textiles in substantial quantity, and these and the local black-engraved (niello) silverware and bronzeware are popular with visitors.

Communications.—About 2,250 miles of State-owned railways were open to traffic in 1960. The track is metre gauge. Main lines run from Bangkok to Aranya Pradet, linking up with the Cambodian state railway at this border town (160 miles E.); *vid* Korat to Ubol (about 352 miles E.) and to

Nongkhai (415 miles N.E.) the ferry terminal on the River Mekhong opposite Vientiane, capital of Laos; to Chiengmai (411 miles N.); and to Haadyai (600 miles S.), whence lines go down the eastern and western sides of the Malayan Peninsula, *viâ* Sungei Golok and Penang respectively, to Singapore.

In 1959 the country had about 6,000 miles of main, all-weather roads, of which about 1,000 miles might be termed first-class. A large road-building programme is under way. Bangkok is an international airport of importance, and services connect it with Europe, America, India, Pakistan, Japan and Australasia, as well as other parts of S.E. Asia. The Thai Airways Company has internal services between Bangkok and all the principal towns, and a new company, Thai Airways International (THAI), was formed in 1960 in association with SAS to operate international routes. There are about 14,500 miles of telegraph lines. The harbour at Bangkok can take vessels up to 14,000 tons dead weight.

FINANCE

	1960	1961
Budget Estimates	Millions of *Baht*	
Total revenue	7,700	8,000
Total expenditure	7,700	8,000

Since 1953 Thailand has received a total of U.S.$106,000,000 in loans from the International Bank for rehabilitation and development of railways, the port of Bangkok, and irrigation, including the latest loan (in 1957) of $66,000,000 for the Yan-Hee hydro-electric project.

The value of United States economic and technical aid to Thailand amounted by July, 1960 (the beginning of the U.S. fiscal year) to U.S. $275,200,000 (including $46,200,000 in loans); the expected programme for 1961 is about $24,300,000. In addition, the military aid programme up to the end of the fiscal year 1959 cost $304,718,000 ($17,000,000 in 1959) and the estimate for 1960 is $24,782,000.

The exchange rate for the *Baht* is not officially fixed, but has for some time remained in the neighbourhood of *Baht* 59 = £1 sterling, with little fluctuation. Foreign exchange reserves are at present sufficient and steady, and the currency backing is 60 per cent.

TRADE

	1959 Millions of *Baht*	£ sterling
Total imports (c.i.f.)	8,842	149,864,000
Total exports	7,576	128,407,000

TRADE WITH U.K.

	1958	1959
Imports from U.K.	£11,795,789	£12,477,952
Exports to U.K.	3,665,623	£1,995,681

Of the 1959 exports, rice, rubber, tin ore, and teak accounted for 76 per cent. of the value of all Thailand's exports. Other exports consisted mainly of salt, salted fish, live cattle and pigs, maizé, tapioca, lac, hides, wolfram, soya beans, castor seed, groundnuts, and timber, other than teak. Main imports are textiles, metal manufactures, machinery, vehicles and transport equipment, chemicals and petroleum products.

CAPITAL, ΨBangkok (with Dhonburi), pop. 1956—1,773,318; in the delta of the Menam Chao Phya. Other centres are Chiengmai, Nakorn Sawan and Korat, but no other town approaches Bangkok in size or importance.

FLAG: Five horizontal bands, red, white, dark blue, white, red (the blue band twice the width of the others).

BRITISH EMBASSY
(Bangkok)

CONSULAR OFFICES

There are Consular Offices at *Bangkok*, *Chiengmai* and *Phuket*.

BRITISH COUNCIL

Representative, R. Bruce, 122 Chakrapetr Road, Bangkok.

TOGO
(Republic of Togo)

President, Sylvanus Olimpio, *assumed office* April 27, 1960.

The Republic occupies a narrow strip of territory running north from a short coast-line on the Gulf of Guinea and lies between the Republics of Ghana on the west and Dahomey on the east. Formerly part of the German colony of Togoland surrendered in 1914, the Republic was administered by France as a mandated territory and from 1946 as a trusteeship under the auspices of the United Nations Organization. On November 14, 1958, the United Nations General Assembly voted for the cancellation of the trusteeship and for the establishment of an independent state at a date in 1960 to be agreed between Togoland and France. Accordingly, the Republic of Togo was set up as an independent state on April 27, 1960.

CAPITAL.—Lomé (39,200).

FLAG.—Green and yellow horizontal stripes; a quarter in red in one corner, surmounted by a white star.

BRITISH EMBASSY
Lomé

Ambassador Extraordinary and Plenipotentiary, His Excellency John Hugh Adam Watson, C.M.G. (1959).

TRUCIAL STATES

Seven independent Shaikhdoms, known collectively as the Trucial States, have treaty relations with the British Government originating in treaties to prevent slavery and the piracy, which formerly gave the name of "The Pirate Coast" to this area, and to maintain a perpetual maritime truce. The earliest treaty dates from 1820.

The British Government, by virtue of a treaty made in 1892, is responsible for the external affairs of the states through the British Political Resident in the Persian Gulf and the British Political Agent in the Trucial States. Six of the states lie on the coast of the Gulf between the Musandam peninsula in the East and the Qatar peninsula in the West and one, Fujairah, lies on the Gulf of Oman. The approximate combined area of the states is 32,000 square miles and the estimated population is about 86,000. Security in the area is maintained by the Trucial Oman Scouts, the force having its headquarters at Sharjah.

Revenue is chiefly derived from customs dues on imports and oil concession payments. The export of dried fish is also a significant source of revenue and some pearling is carried on. Petroleum Development (Trucial Coast) Ltd. holds concessions in all the states except Fujairah, Ras al Khaimah and the land area of Sharjah. The British Government has financed a Trucial States Development Fund to contribute to the material welfare of the people, particularly in the field of health, agriculture and education and Kuwait and Qatar have also contributed educational assistance to the states. There is a hospital in Dubai and dispensaries in all the states. Her Majesty's Courts

have jurisdiction over certain categories of foreigners. The Rulers of all the states meet together in the Trucial Council to discuss matters of mutual interest twice or three times a year. The currency is the Persian Gulf Indian rupee.

Abu Dhabi is the largest of the Trucial States in area, stretching from the Khor el Odaid in the West to the borders with Dubai in the region of Jebel Ali. It includes seven villages of the Buraimi oasis and a number of settlements in the series of oases known as the Liwa. Two oil companies are operating in Abu Dhabi territory, Petroleum Development (Trucial Coast) Ltd. on land and Abu Dhabi Marine Areas Ltd. in the Abu Dhabi off-shore concession area. Oil has been discovered off Das Island, where the latter company has its headquarters and production is expected to start in 1962. There are airfields at Abu Dhabi and at Das Island. Ψ *Dubai* is by far the largest town in the Trucial States and has a population estimated at about 40,000. It is the main port for the import of goods into the Trucial States and the interior of Oman, and there is also a lively *entrepôt* trade. The value of imports in the year 1959 was nearly £5,000,000. It has a good natural harbour, improvements to which began in 1959. An airport was completed in 1960 and the Dubai Telephone Company commenced operations in the same year. The main source of revenue is from customs. Wireless communications are managed by International Aeradio Limited and the Post Office is run by the British G.P.O. The British Bank of the Middle East and the Eastern Bank have branches in Dubai. *Sharjah* is the second port of the Trucial States and a small *entrepôt* trade is carried on. Sharjah possesses the airport for the Eastern end of the Trucial States and it is served by Gulf Aviation which connects it with Bahrain, Doha, Kuwait and Muscat, and Aden Airways which connects it with Aden. Sharjah has dependencies on the Batinah coast at Khor Fakkhan, which forms a good natural harbour, Kalba and Dibba. The Eastern Bank has a branch in Sharjah. There is a trade School there run by the British Government. *Ajman* is the smallest state, having a population of only about 3,000. It has inland enclaves at Manama and Masfut. *Umm el Quwain* does a small trade in dried fish. It has an oasis at Falaj Umm Mowalla where palms and some fruit are grown. *Ras al Khaimah* has a population of about 7,000, of whom about half live in the town. It is an ancient seaport near which some remains of archaeological interest have been found. Dates, vegetables and tobacco are grown. An agricultural experimental station and agricultural school have been opened in Ras al Khaimah territory under the Trucial States Development Scheme. *Fujairah* was recognized as one of the Trucial States in 1952. The inhabitants are in the main cultivators in the mountains of the Musandam peninsula and on the Batinah coast. The most important export is tobacco.

British Political Agent, Trucial States, D. F. Hawley, M.B.E. (*resident at Dubai*).
British Political Officer, Abu Dhabi, E. F. Henderson.

TUNISIA

(Tunisian Republic)

President, Habib Bourguiba, *elected* July 25, 1957; *re-elected* Nov. 8, 1959.

Cabinet

Tunisian Embassy in London

29 Princes Gate, S.W.7
[Knightsbridge: 5167]

Ambassador, His Excellency Taieb Slim.
Secretaries, Hachemi Wanès; Miss Faika Farouk; Mohammed Amamou.

Area and Population.—Tunisia lies between Algeria and Libya and extends southwards to the Sahara Desert, with a total area of 45,000 sq. miles. A census held in connection with the preparation of electoral registers showed (Feb., 1956) a total population of 3,800,000 of whom 3,430.000 were Tunisians.

Government.—A French Protectorate from 1881 to 1956, Tunisia became an independent sovereign State with the signing on March 20, 1956, of an agreement whereby France recognized Tunisia's independence and right to conduct her own foreign policy and to form a Tunisian Army. The United Kingdom formally recognized Tunisia as an independent and sovereign state on May 10, 1956. Following a first general election held on March 25, 1956, a Constituent Assembly met for the first time on April 8. On July 25, 1957, the Constituent Assembly deposed the Bey, abolished the monarchy and elected M. Bourguiba first President of the Republic. A few days later the Government was reconstructed on the "presidential" model, the Ministers becoming Secretaries of State. On June 1, 1959, the Constitution was promulgated and on December 7, 1959, the National Assembly held its first session.

Important changes in the system of local government were decreed on June 16, 1956. The country was divided into 14 regions each ruled by a Governor assisted by a Secretary-General.

Production, Trade, etc.—The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The chief exports are cereals, olive oil, phosphates, iron-ore, lead and derivatives, wines, etc., dates, etc.; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. In 1959 imports totalled 64,262,000 *dinars* and exports 59,584,000 *dinars*. The greater part of the trade is with France which, in 1959, took 50 per cent. of the exports and supplied 66 per cent. of the imports. Imports from U.K. in 1959, £2,374,825; Exports to U.K., £4,252,138. A new currency, the Tunisian *dinar*, was adopted on Nov. 3, 1958. At the same time a new Central Bank of Tunisia became responsible for the issue of notes. The *dinar* stood at 1,168 *frs.* (French) on Dec. 31, 1959; it was not devalued in line with the French *franc* in Dec., 1958, but Tunisia remains in the *franc* zone and in customs union with France. A revision of the union in Sept., 1959, reduced or eliminated the tariff advantages enjoyed by certain French goods.

Capital, Ψ Tunis, connected by canal with La Goulette on the coast, had a population (Municipal Council area) of 680,000 at the Census of 1956. The ruins of ancient Carthage lie a few miles

from the city. Other towns of importance are ΨSfax (65,635), ΨSousse (48,172), Kairouan (33,968).

Consul-General, Kemal Cenani.
Vice-Consul, Miss Jale Yigit.

Area and Population.—The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turki of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only a small part of the area inhabited by the Turkish Race, the remainder being in Soviet Russia, China, Afghanistan and Persia. Under the Seljuks (Turkish rulers in Anatolia) the conquest of Asia Minor was completed in the 11th century. The Seljuks were succeeded, early in the 14th century, by the Osmanli dynasty, which remained in power until the War of 1914–18.

During the 15th, 16th and 17th centuries the Ottoman Empire was one of the strongest Powers in the world, extending from the Caspian Sea to the Adriatic and Hungary, and from the Indian Ocean to Morocco and the Sudan. It comprised Asia Minor, part of Russia, the Ukraine, the Crimea, the Balkan States and the whole of Arabia. The Black Sea, the Mediterranean, the Red Sea and the Ægean were dominated by Turkish ships, and the Ottoman dominions included not only the Byzantine Empire, but the greater part of the whole Roman Empire.

Turkey now extends from Adrianople to Transcaucasia and Persia, and from the Black Sea to the Mediterranean, Syria and Iraq. The sixth general census of population was held in October 1955. The results of the last four counts are:—

Year	Population
Oct., 1940	17,820,950
Oct., 1945	18,790,174
Oct., 1950	20,936,524
Oct., 1955	24,111 773

Turkey in Europe (9,256 sq. miles, population 2,262,023 in 1955) consists of Eastern Thrace, including the cities of Istanbul (Constantinople) and Edirne (Adrianople), and is separated from Asia by the Bosphorus at Istanbul and by the *Dardanelles* (Hellespont)—about 40 miles in length with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (285,246 sq. miles, population 21,849,755 in 1955), comprises the whole of Asia Minor or *Anatolia* ("Land of the Rising Sun" or Orient), and extends from the Ægean Sea to the western boundaries of Georgia, Soviet Armenia and Persia, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq. The former Turkish Sanjak of Alexandretta (latterly known as the Republic of Hatay), was ceded by France on July 23, 1939, having formed part of Mandated Syria since 1922.

Government.—For two centuries before the War of 1914–18, disintegration had reduced the power and extent of the Turkish Empire, and after that War its boundaries were still further restricted, Iraq, Syria and Arabia passing into other hands. Sultan Mehmed VI., the last of the Osmanli rulers, fled from Constantinople to Malta on Nov. 20, 1922, and the Sultanate was abolished by the National Assembly. On Oct. 29, 1923,* the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (later known as Kemal Atatürk) President. Following the introduction of a multi-party régime in 1945, the Democratic Party was returned to power in 1950 and re-elected in 1954 and 1957. On May 27, 1960, the D.P. Government was overthrown by the Turkish Armed Forces which now rule through the Committee of National Union, a body of 38 military officers which has replaced the old Grand National Assembly. The Committee has stated that it will hand over power as soon as possible to a civil government elected under a new electoral law which is now under preparation, together with a revised constitution. Turkey is divided for administrative purposes into 67 *vilayet* with sub-divisions into *kaza* and *nahiye*. Each *vilayet* has a governor (*vali*) and elective council.

* TURKISH NATIONAL HOLIDAY.—Oct. 29 is observed throughout the Republic as a National Holiday.

Religion and Education.—The majority of the inhabitants are Moslems. There are numerous Christians (of the Latin and Eastern rites) in Istanbul (Constantinople) and a considerable number of Jews. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. Education is compulsory, free, and secular. There are elementary, secondary and vocational schools.

In 1955 there were over 17,800 primary schools, with about 1,877,000 pupils. There are two universities at Istanbul (one being a Technical University), two at Ankara (including the recently-founded Middle East Technical University), one at Izmir and one at Erzerum (the Atatürk University). The expenditure allocated to education in the 1958 budget was £T476,554,258.

Language and Literature.—Osmanli or Ottoman Turkish is one of the Turanian languages spoken from Macedonia to Siberia. Until 1926 this language was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals as used throughout Europe. Mainly as a consequence of this change the percentage of Turks who can read and write is rising steadily. Ancient Turkish literature aped the Arabic manner, but the revolution of 1908 was followed by a popular reaction against the writings of the past (which appealed only to a small class) and led to the introduction of a native literature free from foreign influences and adapted to the understanding of the people. The vehicle first employed was the newspaper, printed in the neo-Latin alphabet, with supplements for prose and dramatic fiction, poetry and literary criticism. The leading Turkish newspapers are centred in Ankara and Istanbul, although most provincial towns have their own daily papers. There are foreign language papers in French, Greek and English and numerous magazines and weeklies on various subjects.

Production and Industry.—Although it is estimated that 16 per cent. of the country is entirely unproductive and only 16 per cent. fully arable, agriculture provides a livelihood for 75 per cent. of the population and the economy is based extensively on the export of agriculture products. Agriculture is still largely primitive, but is being modernized at an accelerated pace. The principal crops are cereals, cotton, tobacco, sultanas and figs, pulses, oilseeds, valonea, hazel-nuts, opium, sugar beet, and many varieties of fruit. Since 1949, when there were only 4 sugar factories in Turkey, the country has become self-supporting in sugar, and has a margin for export. There are now 18 sugar factories, with others under construction. With the important exception of wheat, which is grown mostly on the arid Central Anatolian Plateau, most of the crops are grown on the fertile littoral. Tobacco, sultana and fig cultivation is centred at Izmir (Smyrna), where substantial quantities of cotton are also grown. The main cotton area is the Cukurova Plain around Adana. In 1958 it was estimated that there were more than 65,300,000 head of livestock, including camels, horses, donkeys and mules. Animal by-products include wool, hides and skins, and mohair. The forests which lie between the littoral plain and the Anatolian Plateau, contain beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple. During recent years the Government has attempted, so far not altogether successfully, to combat the depredations of peasant and goat which threaten to destroy the existing forests within the next 25 years.

Turkey's second most important industry is based on her considerable mineral wealth, which is, however, as yet comparatively unexploited. The most important developments are in coal, lignite, iron ore and chrome mining and fair quantities of copper, manganese, lead and sulphur are also produced together with other minerals in only small quantities. Working mainly through the State-owned Eti (mining) and Sumer (industry) Banks, great strides have been made during recent years in industrializing the country. The share of private industry is increasing. Developments include the expansion of the iron and steel works at Karabuk and other factories and plants for the production of textiles, paper, pulp, cement, artificial silk, sugar, leather goods, glassware, heavy chemicals, artificial fertilizers, canned goods, wines and spirits, vegetable oils, soap and refined sulphur. Legislation was passed in 1954 to encourage the investment of foreign capital in Turkey and to permit the exploitation of Turkey's petroleum resources by foreign companies. At the end of 1959, 20 American, British, German and Turkish companies were prospecting for oil in Turkey. Production of oil by the Turkish Petroleum Administration, from the Raman-Garzan field in Eastern Turkey, amounted to 372,476 tons in 1959.

COMMUNICATIONS

Railways.—The complete network became the property of the State Railways Administration in 1948. The total length in operation is about 7,805 km. Construction, started in 1937 and at present in progress, includes the line to the Persian border (Elazig-Kotur) the Iraq frontier line (Diyarbakir-Cizre), the conversion of the Erzerum-Sarikamis line from narrow gauge to normal, and various branch lines in the Gaziantep and Zonguldak areas. The total length of these additions is to be 1,176 km., of which about 350 km. have been completed at a cost of over £T125,000,000. A 15-year plan for the addition of a further 2,310 km. of railway at a cost of £T800,000,000, which was produced in 1947, has now been shelved—possibly because of the prior claims of the 9-year programme for the construction and improvement of roads and highways. Efforts are however being made to increase rolling stock and locomotives. During 1958 the railways carried 85,422,000 passengers, 15,000,000 tons of freight and 2,600,000 head of livestock.

Roads.—In September, 1948, a 9-year road construction programme was started, involving the construction, reconstruction, improvement and maintenance of a national highway system totalling 24,300 kilometres of all-weather standard roads. Much progress has been made with the help of mechanized road building equipment from American aid sources. At the end of 1957 there were 20,760 kilometres of road open to traffic throughout the year (13,328 km. in 1950), and 22,690 kilometres under regular maintenance. The total number of motor vehicles in 1958 was 86,104 (1950, 29,118).

Posts.—In 1952 there were 46,109 km. of telegraph lines, 2,097 post and telegraph offices. 121,603 telephones were in use in Turkey in 1956.

Shipping.—The strength of the Turkish Merchant Navy at the beginning of 1956 was 1,510 vessels totalling about 752,000 tons, of which just under half is owned by the State Shipping Administration.

Civil Aviation.—The State Airlines operate all internal services and have services to Athens, Beirut, Nicosia, Rome and Frankfurt, while most of the leading foreign airlines, including British European Airways, operate services to Istanbul and some also to Ankara. The State Airlines fleet is composed of Vickers *Viscounts*, *Dakotas* and D.H.

Herons. The airports at Istanbul, Ankara and Adana have been improved to P.I.A.C.O. (Class B) standard and a sum of £T45,000,000 is being spent on ten other new airfields in Turkey. In addition nine military airfields, costing £T160,000,000, are being constructed by N.A.T.O.

FINANCE	1960–61
Revenue (Budget)	£T7,281,695,000
Expenditure (Budget) (Ordinary)	4,638,486,305
(Investment)	2,643,208,695
Debt (November, 1959):—	
Internal funded	£T1,067,218
Internal floating	2,412,563
External funded	3,596,404
External floating	924,356

The Turkish *Lira*, or £T. (of 100 *Kurus*, each of 40 *Paras*) has a nominal value of 7·84 to the £ and 2·80 to the U.S. Dollar, but on August 4, 1958, a system of premiums for exports and imports was introduced, and the effective rate for most transactions is now 25·20=£1 or 9=$1 U.S.

TRADE	1958	1959
Total imports	£T882,300,000	£T1,239,400,000
Total exports	692,400,000	994,300,000
Imports from U.K.	£10,225,019	£15,739,329
Exports to U.K.	6,952,280	14,251,101

The imports include iron and steel, machinery and spares, petroleum products, cotton textiles, wool and woollen yarns, agricultural machinery, locomotives, motor vehicles and pharmaceuticals: the exports include tobacco, cotton, dried fruit, cement, sugar, livestock, chrome oilseeds, opium and valonea.

The principal imports from United Kingdom are iron and steel goods, machinery, tractors, motor lorries and chemicals; the principal exports to United Kingdom are tobacco, mohair, nuts, figs and raisins.

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asia Minor, about 200 miles E.S.E. of Istanbul, with a population (1955 census), of 353,170 and now estimated to exceed 500,000. Ankara (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple (now in ruins), dedicated to Augustus, contains the *Monumentum* (*Marmor*) *Ancyranum*, inscribed with a record of the reign of Augustus Caesar. A new city has been laid out on modern lines, with parks, statues and avenues. ΨISTANBUL (Constantinople), the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire in A.D. 364; estimated population, 1,214,616. Istanbul contains the celebrated Mosque of St. Sophia, since 1934 a museum of Byzantine and Turkish art. Other cities are ΨIzmir (Smyrna) 286,310; Adana 172,465; Bursa (Brusa) 131,366; Eskisehir 122,755; Gaziantep 97,144; Konya 93,125; Kayseri (Caesarea) 81,127 and Erzerum 69,499.

FLAG: Red, with white crescent and star.

EMBASSY IN LONDON
75 South Audley Street, W.1.
Chargé d' Affaires, Kamal Khalil.

Constitution.—The United Arab Republic came into being on Feb. 1, 1958, and the union of Egypt and Syria was confirmed by a plebiscite held simultaneously in Egypt and Syria. A provisional constitution, based on 17 principles was announced on Feb. 5, under which legislative authority in the Republic was to be vested in a National Assembly chosen by the President, with the condition that half its members would be selected from the existing Egyptian and Syrian Chambers. Executive power is vested in the President, assisted by Ministers appointed by himself. The President will select heads of Regional Councils. The provisional constitution included statements that the Republic would be a "Presidential democracy" with a common flag, common people and a common army; it provided that all laws in Egypt and Syria would remain valid within the districts prescribed for them at the time of issue, though subject to later modification or annulment; private property would be safeguarded and not subject to confiscation without due compensation; existing public services and administration would remain as they are until re-organized by Presidential decree; the independence of the judiciary would be guaranteed and all international treaties concluded by Egypt and Syria would remain valid. The 17 provisions were expanded on March 5, when a list of 75 articles was proclaimed, including a new provision that the President could dismiss one or more vice-presidents and that the National Assembly would have the right to pass a vote of no confidence in a Minister. Four Vice-Presidents were nominated on March 6, together with the new Cabinet. The first parliament, consisting of 400 Egyptian and 200 Syrian deputies, appointed by the President, was opened on July 21, 1960. A number of the deputies had been members of the former separate national assemblies of Egypt and Syria.

CAPITAL.—Cairo (pop. 2,100,486).

FLAG.—Three horizontal stripes of black, white and red with two green stars in the white stripe.

BRITISH COUNCIL
Representative, I. H. Williams (*acting*).

EGYPT
(Misr)

AREA AND POPULATION.—The total area of Egypt is estimated at 1,000,000 square kilometres (386,112 square miles), the inhabited area being only 35,168 square kilometres (13,578 square miles), with a population enumerated in June, 1954, as 22,651,000 (including nomads).

There are three distinct elements in the native population. The largest, or "Egyptian" element, is a Hamito-Semite race, known in the rural districts as *Fellahin* (*fellāh*—ploughman, or tiller of the soil). The *Fellahin* have been mainly of the Moslem faith since the conquest of the country in the 7th century, but there are about 1,000,000 Coptic and Greek Orthodox Christians in Egypt. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts, of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated end of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley between Aswân and Wadi-Halfa, of mixed Arab and negro blood. The Bedouin and Nubians are Moslems.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (*a*) the valley and delta of the Nile, (*b*) the Libyan or Western Desert, and (*c*) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberged (or St. John's Island). This territory lies between 22° and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is coterminous with the Sudan. The western boundary runs from a point on the coast 10 kilometres N.W. of Sollûm to the latitude of Siwa and thence due S. along the 25th meridian to the parallel of 22° N. (the N. boundary of the Sudan) at 'Uweinat Mountain. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15′ E. long.) to the head of the Gulf of Aqaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aqaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *feddâns* (12,431 square miles) and the area of lakes at 641,000 *feddâns* (1,039 square miles), a total of 8,308,000 *feddâns* (13,470 square miles).

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The *Nile* has a total length of 4,160 miles. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*, an arid region, containing some depressions, whose springs irrigate small areas known as *Oases*, of which the principal, from S.E. to N.W., are known as Kharga, Dakhla, Farafra, Baharia, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great backbone of high and rugged mountains extends north-westwards from Ethiopia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by *wadis* (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs.

Religions.—At the Census of 1947 there were 19,037,984 Moslems, 1,273,371 Coptic and Greek Orthodox Christians, 50,200 Roman Catholics, 103,256 other Christians (Protestant and Reformed Churches), and 65,639 Jews. The chief Moslem religious authorities in Egypt are the *Sheik el Gami el Azhar* and the *Mufti al Diyar al Misriyyah*.

Government.—From 30 B.C. to A.D. 639 Egypt was a province of the Roman Empire, but in A.D.

640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811 and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841.

In 1882, a military revolt, headed by an officer of the Egyptian Army (Ahmed Arábi *Pasha*), assumed alarming proportions and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation until 1936 (*see* below).

During the War of 1914–18 a British Protectorate over Egypt was declared (Dec. 18, 1914) and Khedive Abbas Hilmi was deposed. He was succeeded by Hussein Kamel, with the title of Sultan, who died Oct. 9, 1917, being succeeded by his brother, Ahmed Fuad. The British Protectorate terminated on Feb. 28, 1922, and Sultan Ahmed Fuad was proclaimed King of Egypt. Following closely on the accession of King Farouk, the *Anglo-Egyptian Treaty* was signed in London (Aug. 26, 1936); the military occupation by British troops was terminated and Ambassadors were duly accredited at the Courts of St. James's and Cairo.

The security of Egypt was threatened after the outbreak of war in 1939 and reinforcements were sent from Britain and the Dominions. Axis troops invaded Egypt in 1940 and fierce fighting ensued, with Allied victories and reverses, until the decisive victory in "The Battle of Egypt" (Oct.–Nov. 1942) drove the enemy out of the country. In July, 1952, following a military *coup d'etat*, King Farouk abdicated in favour of his infant son, who became King Ahmed Fuad II. In June, 1953, however, Gen. Neguib's military council deposed the young king, and declared Egypt a Republic, Gen. Neguib himself assuming the Presidency. In November, 1954, General Neguib was deposed by Lt.-Col. Gamal Abdel Nasser and the military council. On June 23, 1956, Col. Nasser assumed office as President, after an election at which voting was compulsory, and he was the only candidate. Following the establishment of the United Arab Republic (*see* above), Col. Nasser was elected its first President on Feb. 21, 1958.

Agriculture.—The principal crops grown during *Seifi* (summer) are cotton, rice, sugar cane, and sorgho (maize). *Nili* (flood) part of *Seifi*, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally begins in July; the principal crops are maize and rice. *Chitwi* (winter) begins in November and ends in June; the principal crops are cereals, bersim (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Sheilal, the First Cataract. At this point a steamer connection runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line to the frontier at Sollûm, thus joining Tripoli to Egypt. The gauge is standard (4 ft. 8½ in.). There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 883 miles of light railways exploited by public companies.

Roads and Caravan Routes.—A sea coast motor road exists from Alexandria to Mersa Matruh, with an extension along the coast to Sollûm and thence to connect with the coast road in Libya. The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

Shipping.—Ψ Apart from the three great seaports of Alexandria, Port Said and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollûm and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safaga and Qoseir on the Red Sea.

Currency.—£E (Egyptian *pound* of 100 *piastres*) = £1 0s. 6½*d.* sterling. Rate of Exchange—(*Buying*) *Piastres* 97·40 = £1; (*Selling*) *Piastres* 97·60 = £1. (*See also* p. 84.)

TRADE WITH U.K.

	1958	1959
Imports from U.K...	£12,819,179	£13,785,771
Exports to U.K.	2,027,568	4,348,158

The principal imports are textiles, metals, and manufactures thereof, coal and coke, chemicals, machinery, vehicles, foodstuffs, timber and wood and paper. The exports are principally raw cotton, rice, mineral products and onions.

CAIRO, the capital (population 1947, 2,100,485) stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century.

Ψ ALEXANDRIA (pop. 1947, 928,237), founded 332 B.C. by Alexander the Great, was for over 1,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great *pharos* (lighthouse), 480 feet high, with a lantern burning resinous wood, was one of the "Seven Wonders of the World." Other towns are: Tanta (139,965), Ψ Port Said (178,432), Mansura (102,709), Asyût (90,378), Faiyûm (74,314), Zagazig (82,912), Mahalla el Kubra (115,509), Damanhur (84,983), Minya (69,667), Ψ Suez (108,250), Beni Suef (57,464), Ψ Damietta (68,520), Giza (53,620).

FLAG: Green, with white crescent (convex side to flagstaff), and three 5-pointed white stars (arranged in an equilateral triangle) between the horns.

CAIRO is 2,520 miles from London: transit *via* Trieste, 5 days; *viâ* Marseilles, 6 days.

SYRIA

Area and Population.—The Republic of Syria is in the Levant, covering a portion of the former Ottoman Empire, with an estimated area of 70,800 sq. miles and a population (1954) of

3,655,904, Arabic speaking and mainly Moslems. Syria includes the districts of Damascus, Aleppo, Homs, Hama, Lattakieh, Deir-ez-zor, Hassetché, Soueida (Jebel Druze) and Deraa. It is bounded on the north by Turkey, on the east by Iraq, on the south by Jordan and Israel, and on the west by the Lebanon and thence northwards by the Mediterranean to the Turkish frontier. The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch (Turkey). The Euphrates crosses the northern boundary near Jerablus and flows through north-eastern Syria to the boundary of Iraq.

Archaeology, etc.—Syria is rich in historical remains. Damascus (*Dimishq ash-Sham*) is the most ancient city in the world, having an existence as a city for over 4,000 years. It is situated on the river Abana (now known as Barada), in an oasis at the eastern foot of the Anti-Lebanon, and at the edge of the wide sandy desert which stretches to the Euphrates. The city contains the Omayyed Mosque, the Tomb of Saladin, and the "Street Called Straight" (Acts ix, 11), while to the North-East is the Roman outpost of Dmeir and further east is Palmyra.

On the Mediterranean coast at Amrit are ruins of the Phoenician town of Marath, where the *tell* has been found and is being excavated and also ruins of Crusaders' fortresses at Markab, Sahyoun, and Krak des Chevaliers. At Tartous (also on the coast) the cathedral of Our Lady of Syria, built by the Knight Templars in the XII–XIII century is being restored as a muscum.

Hittite cities, dating from 2,000 to 1,500 B.C., have recently been explored on the west bank of the Euphrates at Terablus and Kadesh and also on the Orontes at Atchara, near Antioch.

Government.—Syria, which had been under French mandate since the 1914–18 war, became an independent Republic during the 1939–45 war. The first independently elected Parliament met on August 17, 1943, but foreign troops were in part occupation until April, 1946. Syria remained an independent Republic until February, 1958, when it became part of the United Arab Republic (*see* above).

Production and Industry.—Agriculture is the principal source of production; wheat and barley are the main cereal crops, but the cotton crop is the highest in value. Tobacco is grown in the maritime plain in Sahel, the Sahyoun and the Djebleh district of Lattakia; skins and hides, leather goods, wool and silk, textiles, cement, vegetable oil and copper and brass utensils are locally produced. Mineral wealth is small and oil prospecting has not proved successful, but some revenue is derived from the Kirkuk–Banias oil pipeline and the pipeline from the oilfields of Saudi-Arabia to Sidon in Lebanon (Tapline).

Language and Literature.—Arabic is the principal language (*see* Arabia), but a few villages still speak Aramaic, the language spoken by Christ and the Apostles. There are 25 daily newspapers and 30 periodicals in Arabic published in Damascus and 17 daily newspapers and 25 periodicals in the provinces.

Education.—Education in Syria is under State control and, although many of the schools are privately owned, they all follow a common system and syllabus. Elementary education is free at State Schools, and is compulsory from the age of seven. Secondary education is not compulsory and is free only at the State Schools. Because of the shortage of places, entry to these State Schools is competitive. The Syrian University, founded in 1923, has faculties of law, medicine, engineering, science, arts and a Higher Teachers' Training College. Approximately 10 per cent. of all students receive scholarships, and at the present time Palestinian refugees are admitted free. The rest pay fees.

Communications.—A narrow-gauge railway runs from Beirut in the Lebanon to Damascus, connecting at Rayak (Lebanon) with the standard-gauge line which runs from Tripoli (in the Lebanon) through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. From Damascus the Hejaz railway runs southwards to Jordan. All the principal towns in the country are connected by roads of varying quality. The trans-desert route from Damascus to Baghdad is covered by the Nairn Bus Service in fourteen hours. A small internal air service operates between Damascus and Aleppo, and between Aleppo and Qamichliyé, and Aleppo, Lattakia and Damascus.

Currency.—The monetary unit is the Syrian paper pound (£*Syr.*). In February 1955, the Syrian gold pound was returned to circulation at an official rate of £*Syr.* 26·75. The official rates of exchange are £*Syr.* 6·13=£1 sterling, buying, and £*Syr.* 6·19=£1 sterling, selling. The free market rate is used for all ordinary commercial transactions. In May, 1956, it was approximately £*Syr.* 9·8=£1 sterling. (*See also* p. 84.)

TRADE

Principal Imports.—Gold, textiles, petroleum products, vehicles, agricultural equipment, machinery of all kinds and electrical material, base metals and wares thereof, chemicals and pharmaceuticals, wood and its manufactures, live animals and animal products, vegetable products, rubber products.

Principal Exports.—Textile materials and manufactures (including raw cotton and wool), cereals and vegetable products, live animals and animal products, raw hides and skins, prepared foods, gold.

The value of Syria's foreign trade at the free rate of exchange, was:—

	1955
Imports	£*Syr.*676,887,000
Exports	430,528,000
	1958 1959
Imports from U.K.	£7,912,750 £6,635,885
Exports to U.K.	1,421,491 1,762,066

CHIEF TOWNS.—Damascus (population 372,708) is the capital of Syria, other important towns being Aleppo (population 380,919), Homs (261,904) and Hama (155,671), and the principal port of the Syrian Republic is ΨLattakia (105,363). The principal town of Jebel Druze is Soueida (Black), built in mid-19th century by refugees from Lebanon from stones of the ruined Nabatean city of Soada and of blocks of local black basalt.

SYRIAN FLAG: Green over white, over black horizontal bands, with three red stars on central white band.

URUGUAY

(República Oriental del Uruguay)

NATIONAL COUNCIL OF STATE

Sr. Benito Nardone (*President*, 1960–March, 1961); Dr. Martin R. Echegoyen; Dr. Eduardo Victor Haedo; Dr. Justo M. Alonso; Dr. Alberto Artagaveytia; Sr. Faustino Harrison; Sr. Ledo Arroyo Torres; Ing. Manuel Rodriguez Correa; Sr. César Batlle Pacheco.

Minister of Interior, Sr. Carlos V. Puig (*acting*).
Foreign Affairs, Sr. Homero Martinez Montero.
National Defence, General Cipriano Olivera.
Finance, Sr. Juan E. Azzini.
Public Works, Sr. Luis Giannattasio.
Public Health, Dr. Carlos Stajano.

Public Instruction and Social Welfare, Dr. Eduardo Pons Echeverry.
Industries and Labour, Sr. Angel Maria Gianola.
Livestock and Agriculture, Sr. Carlos V. Puig.

EMBASSY IN LONDON

48 Lennox Gardens, S.W.1
[Kensington: 8835]

Ambassador in London (vacant).
Minister-Counsellor and Consul-General, Señor Don Marcos Brondi.
Counsellor, Señor Don Gustavo Magariños.
Secretary, Señor Don Guy P. Nery.
Secretary and Consul, Señor Don Carlos A. Ghiringhelli.

Area and Population.—The smallest Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°—35° S. and long. 53° 25′—57° 42′ W., with an area of 72,180 square miles, and an estimated population of 3,000,000, almost entirely white and predominantly of Spanish and Italian descent. Most Uruguayans are Roman Catholics. There is complete freedom of religion and no church is established by the State.

Physical Features.—The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which cross the Brazilian boundary and extend southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Rio Negro* (with its tributary the Yi), flowing from north-east to south-west into the *Rio Uruguay*. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Queguay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merin. The climate is reasonably healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but cold spells, characterized by icy winds from the South Polar regions, are experienced in June, July and August. Rainfall is regular throughout the year, but there are occasional droughts.

Government.—Uruguay—or the *Banda Oriental*, as this territory lying on the eastern bank of the Uruguay River was then called—resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726–1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. In 1825, the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom. Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

A new Constitution was approved and brought into force on March 1, 1952, whereby the executive power is discharged by a National Council of State composed of nine members, elected every four years and assisted by nine ministers. The members of the National Council of State are eligible for re-election after four years have elapsed since the date on which their mandate ceased. The Legislature consists of a Chamber of 99 deputies and of a Senate of 30 members, elected for four years by all adult male and female citizens who can read and write. Elections for the National Council of State and the legislature took place in November, 1958. They were won by the Partido Nacional after 93 years in opposition and the new government took office on March 1, 1959.

The Republic is divided into 19 Departments each with a chief of police and a Departmental Council. The most important cities of the interior are Salto and Paysandu, both situated on the River Uruguay, which forms the main line of division from Argentina.

Production and Industry.—Wheat, barley, maize, linseed, sunflower seed and rice are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of cattle and sheep, the wool of which is of excellent quality. The 1956 livestock census showed figures of 8,154,109 cattle, 22,954,230 sheep, 667,251 horses, 258,980 hogs, 5,568,451 poultry and 511,547 milch cows. In addition to the meat packing industry, textiles and wine and beer are of importance. The development of local industry continues and during and since the Second World War, in addition to the greatly augmented textile industry, marked expansion in local production is notable in respect of tyres, sheet-glass, three-ply wood, cement, leather-curing, beet-sugar, edible oils and the refining of petroleum and petroleum products. There are no mineral deposits of importance.

Communications.—There are about 5,000 miles of national highways, and about 7,508 miles of telegraph, with 48,375 miles of telephones.

In 1955 there were about 1,828 miles of standard gauge railway in use in Uruguay. A national Corporation was formed to administer the railway systems purchased by the Government from four British companies in 1948.

Civil aviation is developing rapidly. An internal airline, PLUNA, which is now owned by the State, runs a daily passenger and limited freight service to the principal capitals of the interior, and also runs services to Southern Brazil, Paraguay and Argentina. International passenger and freight services are maintained by American, South American and European airlines. The airport of Carrasco lies 12 miles outside Montevideo.

Education and Social Services.—Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, with about 250,000 pupils in 1,800 state schools and technical and trade schools, and evening courses for adult education. In 1957 there were 50,650 pupils in secondary schools including 9,700 in the 11 State *liceos* of the capital. The University at Montevideo (founded in 1849) had, in 1950, 8,540 students enrolled in its ten faculties.

Language and Literature.—Spanish is the language of the Republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in all public libraries. Over one-third of the nation lives in the capital and all the main daily newspapers are published there.

FINANCE

The budget for 1959 was *pesos* 899·2 million (revenue) and *pesos* 841·5 million (expenditure). A draft Bill for the budget for the period 1960–64 was presented to Parliament in March, 1960, providing for an estimated revenue of Ur.$1,412 million for 1960, rising to Ur.$1,962 million by 1963. Expenditure is estimated at Ur.$1,389 million increasing to Ur.$1,962 million during the same period.

	Ur.$
Internal Debt (February, 1960)	1,531,495,917
External Debt (February, 1960)	83,931,667

The monetary unit is the *peso*. By a law dated December 17, 1959, the nominal value of the *peso* was reduced from 0·585 grammes of fine gold to 0·136719 grammes of pure gold of a standard value of 900 milésimos of fine gold giving a parity of *pesos* 6·50 to the *U.S. dollar*. The circulating medium is, however, the paper *peso* which at the free rate of exchange has a value of about 8*d*. The rate for the £ in June, 1960, was about *pesos* 31·99 (buying) and for the U.S. *dollar pesos* 11.43 (buying).

TRADE

	1958	1959
Total imports	$U.S.134,649,377	$U.S.170,000,000
Total exports	138,621,793	97,797,939
Imports from U.K.	£2,816,134	£3,366,102
Exports to U.K.	8,390,693	6,023,986

The exports are principally animal and agricultural products, and include frozen and canned meat, wool, hides, wheat, hair, tallow, poultry, sunflower-seed oil and linseed oil; the imports are principally machinery, motor vehicles, fuels and lubricants, raw materials, construction materials, timber, foodstuffs and beverages. Textile imports are declining with the growth of local industry. The principal imports from the U.K. are machinery, motor vehicles, hardware, yarns and chemicals.

CAPITAL, Montevideo. Pop. (Dec. 1956), 922,885. Other centres are Canelones (182,000), ΨSalto (78,000), ΨPaysandu (70,000), Rivera (40,000), ΨMercedes (23,000), ΨColonia (12,000), and ΨFray Bentos (10,000).

FLAG: Four blue and five white horizontal stripes (surcharged with rising sun on a white ground in the top corner, next flagstaff).

Time of transit from London to Montevideo, by air, 24 hours (B.O.A.C. Comet).

BRITISH EMBASSY

(*Residence*, Calle Jorge Canning 2491, Parque Battle y Ordoñez, Montevideo)

Ambassador Extraordinary and Plenipotentiary, His Excellency Malcolm Siborne Henderson, C.M.G. (1957) £3,800
Chancery, Calle Rincon 454, 5° piso.
1st Secretary and Consul, C. M. Rose.
1st Secretary (Commercial), J. L. Taylor.
2nd Secretary, S. de Mowbray.
2nd Secretary and Information Officer, B. Coleman.
Vice-Consul, E. G. Toomer.
Naval and Military Attaché, Capt. F. D. Halford, D.S.C., R.N.
Labour Attaché, J. M. Carlin.
Archivist, J. P. Philips.
Administration Officer, D. Reed.

BRITISH CONSULAR OFFICES

There are British Consular Offices at *Montevideo* and *Fray Bentos*.

BRITISH COUNCIL

Representative, H. B. Forster, Avenida Agraciada 1464 1er Piso, Montevideo.

ANGLO-URUGUAYAN CULTURAL INSTITUTE, Avenida Agraciada 1464, 1er Piso, Montevideo—*Director*, H. B. Forster.

There are branch Institutes at Salto, Paysandu, Fray Bentos, Rivera, Las Piedras, Melo, Trinidad and Treinta y Tres.

BRITISH CHAMBER OF COMMERCE IN URUGUAY, Calle Cerrito 507, *Montevideo*.

State Security (K.G.B.), A. N. Shelepin.
State Bank, I. K. Korovushkin.
Central Statistical Board, V. N. Starovsky.
Science and Economics, A. F. Zasyadko.

The Prime-Ministers of the 15 constituent Republics belong *ex officio* to the Council of Ministers of the U.S.S.R. (*see* their names under the individual Republics, *below*).

EMBASSY OF THE U.S.S.R. IN LONDON
13 Kensington Palace Gardens, W.8.
[Bayswater: 3628]

Ambassador Extraordinary and Plenipotentiary, His Excellency Alexander Alexeevich Soldatov (1960).
Counsellors, V. A. Loginov; N. B. Korovin; L. S. Tolokonnikov; D. F. Safonov; V. I. Yarotsky; A. G. Pavlov; D. G. Stepanov.
1st Secretaries, A. G. Vislykh; A. V. Krasov; G. Z. Ioanisyan; N. P. Karpekov; V. S. Safronchuk; M. S. Almasov; A. A. Kudinov.
2nd Secretaries, N. B. Litvinov; L. A. Rogov; I. P. Glazkov; M. V. Chizhov; Y. B. Teplov; I. V. Milovidov; V. A. Dozhdalev; B. A. Averyanov; N. A. Klasashvili; G. I. Stepanov; V. I. Generalov; V. P. Gusarov.
Military Attaché, Maj.-Gen. I. P. Efimov.
Air Attaché, Col. F. S. Roumiantsev.
Naval Attaché, Capt. K. Sukhoruchkin.
Trade Representative, V. A. Kamenskij.
Deputy Trade Representatives, A. G. Tikhonov; S. F. Anfimov.

AREA AND POPULATION

The U.S.S.R. is now composed of 15 Union-Republics (*see* below). Before the outbreak of the war of 1939–45 the U.S.S.R. consisted of 11 Republics—the Russian Socialist Federal Soviet Republic (R.S.F.S.R.) and the Ukrainian, Belorussian, Armenian, Azerbaidjan, Georgian, Turkmenian, Uzbek, Tadjik, Kazakh and Kirghiz Soviet Socialist Republics. After the collapse of Poland in September, 1939, the Soviet Government by agreement with Germany seized five-eighths of Poland's territory, the so-called *Western Ukraine* and *Western Belorussia*, subsequently incorporated into the Ukrainian and Belorussian Republics respectively.

In March, 1940, some territories ceded by Finland under the 1940 Treaty were joined to the Karelian Autonomous Soviet Socialist Republic to form a Karelo-Finnish S.S.R. which became the 12th constituent Republic of the U.S.S.R., while others, including the town of Viipuri (Vyborg), were added to the R.S.F.S.R. Similarly, in August of the same year, the major part of *Bessarabia* ceded by Roumania in June was joined to the Moldavian A.S.S.R. to form a Moldavian S.S.R. as the 13th Soviet Republic, while a smaller part of Bessarabia, including the Danube estuary port of Izmail, and *Northern Bukovina*, also ceded by Roumania, became part of the Ukraine. The new Soviet-Roumanian frontier was confirmed by the 1947 Peace Treaty with Roumania.

In August, 1940, the three independent Baltic States, *Estonia*, *Latvia* and *Lithuania*, were forcibly incorporated into the Soviet-Union to form the 14th, 15th and 16th Republics respectively. In June, 1945, *Ruthenia* was ceded by Czechoslovakia and became part of the Ukrainian S.S.R under the name of *Transcarpathia*. After the defeat of Germany, a part of *East Prussia* with its capital Königsberg (renamed Kaliningrad in July, 1946) became part of the R.S.F.S.R., while the port and district of *Memel* (Klaipeda) was incorporated into the Lithuanian S.S.R. By the 1947 Peace Treaty with Finland, the district of *Petsamo* (Pechenga) was added to the territory of the R.S.F.S.R. In the Far East, the southern half of *Sakhalin* and the whole of the *Kurile Islands* were incorporated into the last-named Republic in 1945, after the defeat of Japan. In October, 1944, *Tannu-Tuva*, until the war of 1939–45 a nominally independent state lying to the N.W. of Outer Mongolia, became the autonomous province of *Tuva* within the R.S.F.S.R.

In July, 1956, the Karelo-Finnish Republic reverted to the status of an Autonomous (*Karelian*) Republic within the R.S.F.S.R.

Area and population (according to the 1959 census) of the constituent Republics of the U.S.S.R. (with their capitals):—

Republic	Sq. miles	Population
I. R.S.F.S.R. (Moscow)	6,593,391	117,494,000
II. Ukraine (Kiev)	232,046	41,893,000
III. Belorussia (Minsk)	80,154	8,060,000
IV. Uzbekistan (Tashkent)	158,069	8,113,000
V. Kazakhstan (Alma-Ata)	1,064,092	9,301,000
VI. Georgia (Tbilisi)	26,911	4,049,000
VII. Azerbaidjan (Baku)	33,436	3,700,000
VIII. Lithuania (Vilnius)	26,173	2,713,000
IX. Moldavia (Kishinev)	13,012	2,880,000
X. Latvia (Riga)	24,695	2,094,000
XI. Kirghizia (Frunze)	76,642	2,063,000
XII. Tadjikistan (Stalinabad)	54,019	1,982,000
XIII. Armenia (Erevan)	11,306	1,768,000
XIV. Turkmenistan (Ashkhabad)	188,417	1,520,000
XV. Estonia (Tallinn)	17,413	1,196,000
Total	8,599,776	208,826,000

The net increase of population since the 1939 census amounts to only 18,100,000. Assuming a theoretical average annual rise of 3,000,000 (at present the annual rise is 3,500,000), the net increase between 1939 and 1959 should have amounted to about 60,000,000. The deficit of 42,000,000 is the measure of direct and indirect losses suffered by the Soviet people as a result of the war and the deportation policies of the Government. The age-groups of young people born between 1942 and 1946 are abnormally thin.

Geographically the growth of the population has been very uneven. There has been a steady shift eastwards. Thus, while the total population has increased since 1939 by 9·5 per cent., that of the Urals has risen by 32 per cent.; of Western Siberia, by 24 per cent.; of Eastern Siberia, by 34 per cent.; of the Far East, by 70 per cent.; of Central Asia and Kazakhstan, by 38 per cent. Two Republics on the Western fringes of the Union, *Belorussia and *Lithuania, have actually suffered a net loss of population (844,000 and 167,000 resp.).

Another demographic feature is the growing urbanization. While in 1939 the proportion of urban population was 32 per cent. of the total,* in 1959 it has reached 48 per cent., owing to migration into towns, growth of new towns, incorporation of villages into conurbations and a higher birth-rate in urban areas. There are now 25 towns with over 500,000 (11 in 1939).

* Within present borders.

The proportion of women to men is 55 to 45 per cent. There is a high incidence of marriages (12 per mille), a high birth-rate (25 per mille) and a low mortality-rate (7·5 per mille).

Ethnical Composition of the Population

(millions)

Russians	114·827

Constitution

Under the 1936 ("Stalin") Constitution, the *Union of Soviet Socialist Republics* is "a socialist state of workers and peasants" (§ 1) in which "all power belongs to the working people as represented by the Soviets [Councils] of Working People's Deputies" (§ 3), while its economy is based on "the socialist ownership of the instruments and means of production" (§ 4). "The land, its mineral wealth, waters, forests, mills, factories, mines, rail, water and air transport, banks, communications, large state-organized agricultural enterprises, as well as municipal enterprises and the bulk of dwelling-houses in the cities and industrial localities, are state property" (§ 6), while "the joint enterprises of collective farms and co-operative organizations . . . constitute the common, socialist property of the collective farms and co-operative organizations" (§ 7). "The law [also] permits the small private economy of individual peasants and handicraftsmen based on their own labour and precluding the exploitation of the labour of others" (§ 9). "The personal property right of citizens in their incomes and savings from work, in their dwelling-houses and subsidiary home enterprises, in household articles . . . as well as the right of citizens to inherit personal property, is protected by law" (§ 10). The whole economic life, however, is subordinated to the state economic plan (§ 11).

The U.S.S.R. is a federal state, "formed on the basis of a voluntary union of equal Soviet Socialist Republics" (§ 13); every Republic has "the right to secede from the U.S.S.R." (§ 17).

"The highest organ of state power in the U.S.S.R. is the Supreme Soviet of the U.S.S.R." (§ 30) which exercises exclusively the legislative power (§ 32). It consists of two Chambers, the *Soviet of the Union* (elected on the basis of one deputy for every 300,000 of the population) and the *Soviet of Nationalities* (elected at the ratio of 25 deputies from each Union Republic, 11 from each Autonomous Republic, 5 from each Autonomous Province and 1 from each National Territory) (§§ 33–35). The *Supreme Soviet* which, as a rule, meets 4 to 5 times a year for about a week, delegates most of its power to its *Presidium* which acts as a kind of collective President of the U.S.S.R. between the sessions.

"The highest executive and administrative organ of state power is the Council of Ministers of the U.S.S.R." (§ 64). It is appointed by the Supreme Soviet (§ 70) and is accountable to it, or, in the intervals between the sessions, to its Presidium (§ 65).

The Supreme Court of the U.S.S.R. and the Special Courts of the U.S.S.R. are elected by the Supreme Soviet for a term of five years (§ 104). Similarly, the Procurator-General, who exercises "supreme supervisory power to ensure the strict observance of law" (§ 113), is appointed by the Supreme Soviet for a term of seven years.

Citizens of the U.S.S.R. have the right to work, to rest and leisure, to maintenance in old age and sickness and disability relief and to education (§§ 118–121). "Women are accorded equal rights with men" (§ 122). Citizens are accorded equal rights irrespective of their nationality or race (§ 123). The citizens are also guaranteed freedom of speech, of the press, of assembly and of street processions and demonstrations, "in conformity with the interests of the working people and in order to strengthen the socialist system" (§ 125).

Section 126 of the Constitution is remarkable for containing the only reference to the real master of the country, the Communist Party. It says that the citizens of the U.S.S.R. "are guaranteed the right to unite in public organizations, trade-unions, co-operative societies, youth organizations, sport and defence organizations, cultural, technical and scientific societies," and that "the most active and politically conscious citizens in the ranks of the working class and other sections of the working people unite in the Communist Party of the Soviet-Union, which is the vanguard of the working people in their struggle to strengthen and develop the socialist system and is the leading core of all organizations of the working people, both public and state."

Local Government.—The State power in regions, provinces, autonomous provinces, territories, districts, towns and rural localities is vested in the *Soviets of Working People's Deputies* (§94), elected by the working people of the respective administrative units for a term of two years (§95). The executive and administrative organ of a Soviet is its Executive Committee elected by it (§99). The Union Republics and the Autonomous Republics have Supreme Soviets and Councils of Ministers of their own (§§ 57–63 and 79–88), although their jurisdiction is severely circumscribed in favour of the central Government. Since February, 1944, the Union Republics have had the right to enter into direct relations with foreign states and to conclude agreements and exchange diplomatic and consular representatives with them (§ 18A). So far, however, the only important activity of this kind has been the individual membership of the Ukraine and of Belorussia in the United Nations Organization. Similarly, the 1944 law allowing each Union Republic to possess its own Republican military formations (§ 18B) seems to have remained a paper provision.

The Union Republics possess Ministries of their own for internal affairs, certain branches of heavy and light industry, agriculture, public health, trade, finance and the like. The work of these Ministries is co-ordinated by respective federal Ministries and/or the *Gosplan*. The Union Republics possess exclusive jurisdiction over such

matters as motor transport, housing, social security, municipal affairs, local industry, education and, since 1956, inland water transport and justice. The general trend lately has been toward progressive administrative decentralization or, rather, "deconcentration," particularly in industrial matters.

Religion.—Section 124 of the Constitution lays down that "in order to ensure to citizens freedom of conscience, the church in the U.S.S.R. is separated from the state, and the school from the church," and that "freedom of religious worship and freedom of anti-religious propaganda is recognized for all citizens." Churches have remained open in virtue of contracts concluded between the congregations and the local authorities. The clergy live on voluntary donations from their parishioners. A new *modus vivendi* between the Government and the religious communities was created during the War of 1939–1945. Two administrative bodies, the Council for the Affairs of the Russian Orthodox Church and the Council for the Affairs of Religious Cults, were set up in October, 1943, to provide liaison between the Council of Ministers and the religious bodies. In September, 1943, Stalin agreed to the election of the Patriarch of Moscow and All Russia, a post which had been vacant since the death of Patriarch Tikhon in 1925. Patriarch Sergius, elected by the Council of the Russian Church in 1943, died in May, 1944, and was succeeded in February, 1945, by the present holder of the See, Patriarch Alexius. A number of seminaries for training of priests, many churches, mosques and synagogues and several big monasteries have been reopened. Several religious periodicals are now published in the U.S.S.R., but religious propaganda is still banned.

The proselytizing successes of the religious communites, notably of various sectarian bodies, have become of great concern to the authorities; there has been a great increase of anti-religious articles in the press since 1958.

Education.—Under the Constitution, citizens of the U.S.S.R. have the right to education. Since 1956 the entire educational course, including higher education at universities, technical colleges, etc., has been free. In view of an acute shortage of young man-power caused by the abrupt fall of the birth-rate in the years 1942–1946, the government has been discouraging secondary school graduates from going on immediately to the University. Boys and girls of school-leaving age are ordered by law to put in two years of practical work in industry and agriculture, and 80 per cent. of all vacancies in the universities are reserved for young people who have accomplished this spell of practical work.

The state controls all educational institutions, theatres, cinemas, museums, libraries and picture galleries, as well as the press and the radio. The main centre of research and learning is the Academy of Sciences of the U.S.S.R., which is in effect a vast and efficient government-controlled pool of scientists.

Chronological System.—On February 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar, and by a decree of June 26, 1930, the Soviet Government advanced all the clocks in the Union by one hour, thus adopting permanent Summer Time. The country is divided into several time zones (Moscow time is 3 hours ahead of G.M.T.).

Language, Literature and Arts

Language and Literature.—Russian is a branch of the Slavonic family of languages which is divided into the following groups: *Eastern*, including Russian, Ukrainian and White Russian; *Western*, including Polish, Czech, Slovak and Sorbish (or Lusatian Wendish); and *Southern*, including Serbo-Croat, Slovene, Macedonian and Bulgarian. The Western group and part of the Southern group are written in the Latin alphabet, the others in the Cyrillic, said to have been instituted by SS. Cyril and Methodius in the ninth century, and largely based on the Greek alphabet. Before the Westernization of Russia under Peter the Great (1682–1725), Russian literature consisted mainly of folk ballads (*byliny*), epic songs, chronicles and works of moral theology. The eighteenth and particularly the nineteenth centuries saw a brilliant development of Russian poetry and fiction. Romantic poetry reached its zenith with Alexander Pushkin (1799–1837) and Mikhail Lermontov (1814–1841). The 20th century produced great poets like Alexander Blok (1880–1921), the Nobel Prize laureate of 1958 Boris Pasternak (1890–1960) and Vladimir Mayakovsky (1893–1930). Realistic fiction is associated with the names of Nikolai Gogol (1809–1852), Ivan Turgenev (1818–1883), Fedor Dostoyevsky (1821–1881) and Leo Tolstoy (1828–1910), and later with Anton Tchehov (1860–1904), Maxim Gorky (1868–1936) and Ivan Bunin (1870–1954).

Great names in music include Glinka (1804–1857), Mussorgsky (1839–1881), Rimsky-Korsakov (1844–1908), Rubinstein (1829–1894), Tchaikowsky (1840–1893), Rakhmaninov (1873–1949), Skriabin (1872–1915), Prokofiev (1891–1953), Stravinsky (*b.* 1882) and Shostakovich (*b.* 1906).

Finance

On March 1, 1950, the Soviet Government revalued the Rouble (of 100 Kopecks), with the result that nominally £1 now equals R.11·20. The Soviet Union's trade with countries outside her sphere of influence, however, continues to be calculated on the basis of dollars. A new, "heavy" Rouble, 10 times the nominal value of the old Rouble, is being introduced on January 1, 1961. Prices, wages and exchange rates will be changed accordingly at the rate of 10 old Roubles = 1 new Rouble. The official exchange rate is likely to be £1 = R.1·20, and the tourist rate, £1 = R.2·76. New notes of R. 1, 3, 5, 10, 25, 50 and 100 will be issued, and new coins of K. 1, 2, 3, 5, 10, 15, 20 and 50 and R. 1. minted. Old notes and coins must be exchanged for new ones during the first quarter of 1961.

Defence

No official returns concerning the services have been made for many years. According to Western estimates, the Soviet forces (including the MVD and KGB troops) amounted in 1959 to about 3,500,000 men. The successive reductions of their numerical strength since 1955 amount, according to the same estimates, to about 1,250,000. The *ground forces* consisted in 1958 of *ca.* 140 divisions (including 70 armoured), 40 artillery divisions (including some tactical missile units), an unknown number of cavalry divisions and independent brigades and 130 cadre divisions. The *Navy* is believed to possess 10 cruisers, 20 light cruisers (of the *Sverdlov* type), 250 destroyers, 550 submarines, 500 torpedo boats and 1,000 smaller vessels. The *Air Force* consists of 400 air regiments and possesses 19,000 aircraft, including 10,000 in the tactical air force, 3,500 in the air defence, 3,500 in the naval air force, 1,500 long range aircraft and 500 transport aircraft. There is an unknown number of strategic missile units (equipped with long- and intermediate-range missiles) and of A.A. units which were made a separate arm in 1955. A new Rocket Weapons Command has been set up in 1960.

Length of service is fixed at two years for the Army and the MVD troops, three years for the KGB border units and the Air Force and four years for the Navy and Coastal Defence Units. The general tendency is to turn the Soviet Armed forces into a professional body.

Minister of Defence, Marshal R. Ya. Malinovsky.
Senior Vice-Minister, Marshal A. A. Grechko.
Chief of General Staff, Marshal M. A. Zakharov.

On May 14, 1955, a Treaty of Friendship, Co-operation and Mutual Assistance was signed in Warsaw between the Soviet Union and its European satellites (Albania, Bulgaria, Eastern Germany, Hungary, Poland, Roumania and Czecho-Slovakia) to serve as a counter-poise to NATO. A unified military command was set up in Moscow (*C.-in-C.*, Marshal A. A. Grechko).

Industry and Agriculture

One of the most remarkable aspects of Soviet economy has been the transformation of what was primarily an agricultural country into the second-strongest industrial country in the world in the course of the five successive *Five Year Plans* and the current *Seven Year Plan*. The 1958 output amounted to 43,000,000* tons of pig iron, 59,900,000 tons of steel, 42,900,000* tons of rolled metal, 506,500,000* tons of coal, 129,500,000 tons of crude oil, 33,300,000 tons of cement, 264,000,000,000 kW/h of electric power.

The area under crops increased from 292,121,000 acres in 1913 to 484,400,000 in 1959. The yield of the major crops has been steadily rising owing to more rational and scientific methods of farming. Land under crops east of the Volga and the Caspian Sea has greatly increased, in Kazakhstan by nearly five times, since 1913. Stock breeding has been less of a success. The *live stock* in 1959 included 74,100,000 cattle (66,800,000 in 1928), including 33,900,000 cows (33,200,000 in 1928), 136,100,000 sheep and 53,300,000 pigs.

Two major reforms in the course of 1958 have given greater scope to the collective farms (*kolkhozy*)—the abolition of the State-owned Machine-and-Tractor Stations and the sale of their equipment to the *kolkhozy*; and the reorganization of the system of compulsory deliveries of produce by the farms to the State.

Forests cover nearly 40 per cent. of the whole area of the Union and form a considerable source of wealth.

Trade with U.K.

	1958	1959
Imports from U.K....	£23,656,317	£27,455,512
Exports to U.K.....	59,466,218	63,036,448

Communications

Railways.—Length of railways in use:

Year	Miles	Year	Miles
1913	44,551	1950	72,637
1928	47,772	1955	74,998
1940	65,926	1957	75,265

European Russia is relatively well served by railways, Leningrad and Moscow being the two main focal points of rail routes. The centre and south have a good system of north-south and east-west lines, but the eastern part (the Volga lands) traversed as it is by trunk lines between Europe and Asia which enter Siberia *vid* Sverdlovsk, Chelyabinsk, Magnitogorsk and Ufa, lacks north-south routes. In Asia, there are still large areas of the U.S.S.R., notably in the Far North and Siberia, with few or no railways. Railways built since 1928 include the Turkestan-Siberian line (*Turksib*) which has made possible a large-scale industrial exploitation of Kazakhstan, a number of lines within the system of the *Trans-Siberian Railway* (Magnitogorsk-Kartaly-Troitsk, Sverdlovsk-Kurgan, Novosibirsk-Proyektnaya, etc.), which are of great importance for the industrial development in the east, the Petropavlovsk-Karaganda-Balkhash line which has made possible the development of the Karaganda coal basin and of the Balkhash copper mines, and the Moscow-Donbass trunk line. Lines envisaged under the new Seven Year Plan include the Stalinsk-Magnitogorsk trunk line. In the northern part of European Russia, the North Pechora Railway has been completed, while in the Far East a second Trans-Siberian line is under construction; it will follow a more northerly alignment than the existing Trans-Siberian and will terminate in the Pacific port of Sovetskaya Gavan.

Sea Forts and Inland Waterways.—The most important ports (Odessa, Nikolayev, Batum, Taganrog, Rostov, Kerch, Sebastopol and Novorossiisk) lie around the Black Sea and the Sea of Azov. The northern ports (Leningrad, Murmansk and Archangel) are, with the exception of Murmansk, ice-bound during winter. Several new ports have been built along the Arctic Sea route (between Murmansk and Vladivostok) and are now in regular use every summer. The great Far Eastern port of Vladivostok, the Pacific naval base of the U.S.S.R., is kept open by icebreakers all the year round. Inland waterways, both natural and artificial, are of great importance in the country, although all of them are icebound in winter (from 2½ months in the south to 6 months in the north). The great rivers of European Russia flow outwards from the centre, linking all parts of the plain with the chief ports, an immense system of navigable waterways which carries about 139,000,000 tons of freight per year. They are supplemented by a system of canals which provide a through traffic between the White, Baltic, Black and Caspian Seas. The most notable of them, built largely by forced labour, are the *White Sea-Baltic Stalin Canal*, and the *Moscow-Volga Canal*. The 63-miles long *Volga-Don* Canal, linking the Baltic and the White Seas in the North to the Caspian, the Black Sea and the Sea of Azov in the South, was completed in May, 1952.

Flag of the U.S.S.R.—Red, with five-pointed star above hammer and sickle.

National Day of U.S.S.R.—November 7 (Commemorating the Bolshevik *coup d'état* of 1917).

British Embassy

(Sofiiskaya Naberezhnaya 14, Moscow)

British Ambassador, His Excellency Sir Frank Kenyon Roberts, K.C.M.G. (1960)..... £5,000
Minister, W. Barker, C.M.G., O.B.E.
Scientific Counsellor, Dr. D. A. Senior.
Commercial Counsellor, H. W. King, M.B.E.
1st Secretaries, K. R. Oakeshott (*Head of Chancery*); A. J. V. George (*H.M. Consul*); C. M James. (*Cultural Attaché*); Dr. T. R. Austin (*Medical Officer*).
2nd Secretaries, R. A. Longmire; M. J. E. Fretwell; R. W. Chisholm; T. N. Haining; S. W. Martin; M. J. B. Duncan; M. Millar.
3rd Secretaries, C. G. F. James, M.B.E.; D. C. Thomas; W. H. M. Matthews; G. S. Clucas; W. E. Downing; L. E. Sturmey; J. R. Neaves; Miss J. M. King; A. Riches.
Naval Attaché, Captain J. F. A. Dreyer, R.N.
Assistant Naval Attaché, Lt.-Cdr. H. M. Ellis; Ld.-Cdr. J. L. Varley, R.N.
Military Attaché, Brig. I. R. Burrows, O.B.E.
Assistant Military Attaché, Major J. L. Jealous, R.E.

* Metric.

Air Attaché, Air Commodore P. J. Sanders, D.F.C.
Assistant Air Attachés, S/Ldr. N. J. Gardiner; F./Lt. R. McQ. Davies.

There are no British Consulates in the U.S.S.R. apart from the Consular Section attached to the Embassy.

I.—R.S.F.S.R.

(The Russian Soviet Federal Socialist Republic)

Chairman of the Presidium of the Supreme Soviet, N. N. Organov.
Chairman of the Council of Ministers, D. S. Polyansky.
Minister of Foreign Affairs, Sergei G. Lapin.
Chairman of All-Russian Economic Council, V. M. Ryabikov.

The R.S.F.S.R. has no Communist Party Central Committee of its own; there is, however, a Bureau of the Central Committee of the CPSU for the R.S.F.S.R., with N. S. Khrushchev as its Chairman, and A. B. Aristov as Vice-Chairman.

The R.S.F.S.R., the largest and the most important of the Republics, occupies the major half of the European part of the U.S.S.R. and the major northern half of its Asiatic part and makes up 77 per cent. of the total territory of the U.S.S.R. with 56 per cent. of the total population. It consists of 15 Autonomous Republics (the Bashkir, Buryat, Checheno-Ingush, Chuvash, Daghestan, Kabardin-Balkar, Kalmyk,* Karelian, Komi, Mari, Mordovian, North-Ossetian, Tartar, Udmurt and Yakut A.S.S.R.'s); 6 regions (Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Maritime and Stavropol) containing in their turn 5 autonomous provinces and 4 national territories; 49 provinces (Amur, Archangel, Astrakhan, Belgorod, Bryansk, Chelyabinsk, Chita, Gorky, Irkutsk, Ivanovo, Kalinin, Kaliningrad, Kaluga, Kamchatka, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Orenburg, Penza, Perm, Pskov, Rostov, Ryazan, Sakhalin, Saratov, Smolensk, Stalingrad, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Vladimir, Vologda, Voronezh and Yaroslavl), which in their turn include 6 national territories; and 1 autonomous province (Tuva).

Physical Features.—The R.S.F.S.R. may be conveniently divided into three areas, a low-lying flat Western part stretching eastwards up to the Yenisei and divided in two by the Ural ridge; an eastern part, between the Yenisei and the Pacific, consisting of a number of tablelands and ridges, and a southern mountainous part. Climatically, the R.S.F.S.R. lies in all zones, except the tropics, and may be divided into the following belts (from north to south): Arctic, Tundra, Forest, Mixed Forest-Steppe, Steppe, Sub-Tropics.

The Republic has a very long coast-line, including the longest Arctic coast-line in the world (about 17,000 miles). The most important rivers in the European Part of the R.S.F.S.R. are the Volga with its tributaries Kama and Oka, the Northern Dvina and the Pechora, the short but wide Neva, the Don and the Kuban, and in the Asiatic part, the Ob with the Irtysh, the Yenisei, the Lena and the Amur, and, further north, Khatanga, Olenek, Yana, Indigirka, Kolyma and Anadyr. Lakes are abundant, particularly in the north-west. The huge Baikal Lake in Eastern Siberia is the deepest lake in the world. There are also two large artificial water reservoirs within the Greater Volga canal system, the Moscow and Rybinsk "Seas."

Minerals.—The Republic occupies one of the first places in the world for mineral wealth. Coal is mined in the Kuznetsk area, in the Urals, south of Moscow, in the Donets basin (its Eastern part lies in the R.S.F.S.R.) and in the Pechora area in the North. Oil is produced in the Northern Caucasus and in the area between the Volga and the Ural (the so-called "Second Baku"). The Ural mountains contain a unique assortment of minerals—high-quality iron ore, manganese, copper, aluminium, gold, platinum, precious stones, salt, asbestos, pyrites, coal, oil, etc. Iron ore is mined, in addition to the Urals, near Kursk, Tula, Lipetsk, Khopër, in several areas in Siberia and in the Kola Peninsula. Non-ferrous metals are found in the Altai, in Eastern Siberia, in the Northern Caucasus, in the Kuznetsk Basin, in the Far East and in the Far North. Nine-tenths of all U.S.S.R. forests are located in the R.S.F.S.R.

Production and Industry.—The vastness of the territory of the Republic and the great variety in climatic conditions cause great differences in the structure of agriculture from north to south and from west to east. In the Far North stag breeding, hunting and fishing are predominant. Further south, timber industry is combined with grain growing. In the southern half of the forest zone and in the adjacent forest-steppe zone, the acreage under grain crops is far larger and the structure of agriculture more complex. In the eastern part of this zone, between the Volga and the Urals, cericulture is predominant (particularly summer wheat), with cattle breeding next. Beyond the Urals, we find another important grain-growing and stock-breeding area in the southern part of the Western-Siberian plain. The southern steppe zone is the main wheat granary of the U.S.S.R., containing also large acreages under barley, maize and sunflower. In the extreme South (Krasnodar region, Stavropol region) cotton is now cultivated. Vine, tobacco and other Southern crops are grown on the Black Sea shore of the Caucasus.

Industrially, the R.S.F.S.R. occupies the first place among the Soviet Republics. Major changes in the location of industry have occurred since the revolution and again since the war with two new industrial areas being developed in the Urals and in the Kuznetsk basin, although Moscow and Leningrad are still the two largest industrial centres in the country. Most of the oil produced in the U.S.S.R. now comes from two areas in the R.S.F.S.R.—the Bashkir and Tartar Autonomous Republics. All industries are represented in the R.S.F.S.R., including iron and steel and engineering. Industrial centres include Magnitogorsk, Chelyabinsk, Stalinsk, Tula, Komsomolsk, Perm, Ufa, Irkutsk, Kuibyshev, Krasnoyarsk, Nizhny-Tagil, Novosibirsk, Omsk, Stalingrad, Gorky, Saratov, Grozny, Rostov and Taganrog.

CAPITAL, MOSCOW. Population 5,032,000 (an increase of 120 per cent. since 1939). Moscow, founded about A.D. 1147 by Yuri Dolgoruki, became first the centre of the rising Moscow principality and, later, in the 15th century, the capital of the whole of Russia (Muscovy). In 1325, it became the seat of the Metropolitan of Russia. In 1703 Peter the Great transferred the capital to the newly built St. Petersburg, but on March 14, 1918, Moscow was again designated as the capital. Ψ Leningrad (before the First World War "St. Petersburg" and from 1914–1924 "Petrograd") has a population of 3,300,000.

* During the Second World War, the Kalmyks, a Mongolian people, were scattered to remote areas in a deportation programme. Their territory was restored as an autonomous province in 1957, and on July 30, 1958, the Supreme Soviet of the U.S.S.R. restored a Kalmyk A.S.S.R.

Other cities with populations exceeding 500,000 (1959) are:—

Gorky (Nizhny-Novgorod)	942,000
Novosibirsk (Novonikolayevsk)	887,000
Kuibyshev (Samara)	806,000
Sverdlovsk (Yekaterinburg)	777,000
Chelyabinsk	688,000
Kazan	643,000
Perm	628,000
Ψ Rostov-on-Don	597,000
Stalingrad (Tsaritsyn)	591,000
Saratov	581,000
Omsk	579,000
Ufa	546,000

About 83 per cent. of the population are Russians.

Ψ Seaport.

II.—THE UKRAINE

First Secretary of the Party Central Committee, N. V. Podgorny.
Chairman of the Presidium of the Supreme Soviet, D. S. Korotchenko.
Chairman of the Council of Ministers, N. T. Kalchenko.
Minister of Foreign Affairs, L. F. Palamarchuk.

This Republic, second largest in population, lying in the south-western part of the European half of the U.S.S.R., was formed in December, 1917. It consists of 25 provinces—Cherkasy, Chernigov, Chernovtsy, Crimea, Dnepropetrovsk, Kharkov, Kherson, Khmelnitsky, Kiev, Kirovograd, Lugansk, Lvov, Nikolayev, Odessa, Poltava, Rovno, Stalino, Stanislav, Sumy, Ternopol, Transcarpathia, Vinnitsa, Volhynia, Zaporozhye and Zhitomir.

Physical Features.—The larger part of the Ukraine forms a plain with small elevations. The Carpathian mountains lie in the south-western part of the Republic. The climate is moderate, with relatively mild winters (particularly in the south-west) and hot summers. The main rivers are the Dnieper with its tributaries, the Southern Bug and the Northern Donets (a tributary of the Don).

Production and Industry.—The main centre of Soviet coal mining and iron and steel industry is situated in the southern part of the Ukraine. Engineering and chemical industry have been greatly developed under the Soviet régime. In 1955, the Ukraine provided 37 per cent. of the total Soviet steel, 39 per cent. of metal goods and 32 per cent. of coal. The central forest-steppe region (mainly on the right bank of the Dnieper) is the greatest sugar-producing area in the U.S.S.R. The Ukraine also leads in grain-growing and stock-raising.

There are large deposits of coal and salt in the Donets Basin, of iron ore in Krivoy Rog and near Kerch in the Crimea, of manganese in Nikopol, and of quicksilver in Nikitovka.

CAPITAL (since 1934), Kiev, the oldest city in Russia, founded in the 9th century A.D., was the capital of the Russian State from 865 to 1240. Population (1959) 1,102,000. Other cities with population over 500,000 are:—

Kharkov	930,000
Stalino (Yuzovka, *i.e.* Hughes-ovka)	701,000
Ψ Odessa	657 000
Dnepropetrovsk (Yekaterinoslav)	658,000

III.—BELORUSSIA

(White Russia)

First Secretary of the Party Central Committee, K. T. Mazurov.
Chairman of the Presidium of the Supreme Soviet, V. I. Kozlov.
Chairman of the Council of Ministers, T. Ya. Kiselev.
Minister of Foreign Affairs, K. V. Kiselev.

The Belorussian S.S.R., lying in the western part of the European half of the U.S.S.R., was formed early in 1919. It now consists of six provinces (Brest, Gomel, Grodno, Minsk, Mogilev and Vitebsk). It is largely a plain with many lakes, swamps and marshy land. Before the revolution of 1917 the area was one of the most backward parts of European Russia. Since then, agriculture has been greatly developed, thanks to draining of swamps. Most of the Republic's industry is also of recent growth. Woodworking is of great importance, but engineering has also been greatly extended with several major plants built in Gomel and Minsk.

The main rivers are the upper reaches of the Dnieper, of the Niemen and of the Western Dvina.

CAPITAL, Minsk. Population 509,000.

Belorussians make up four-fifths of the population, with Russians and Poles coming next.

IV.—UZBEKISTAN

First Secretary of the Party Central Committee, Sh. R. Rashidov.
Chairman of the Presidium of the Supreme Soviet, Mrs. Ya. S. Nasriddinova.
Chairman of the Council of Ministers, A. A. Alimov.

The Uzbek S.S.R. was formed in 1924 and consists of the Kara-Kalpak A.S.S.R. and of 7 provinces (Andizhan, Bokhara, Ferghana, Khorezm, Samarkand, Surkhan-Darya and Tashkent). It lies between the high Tienshan Mountains and the Pamir highlands in the east and south-east and sandy lowlands in the west and north-west. The major part of the territory is a plain with huge waterless deserts and several large oases, which form the main centres of population and economic life. The largest is the Ferghana valley, watered by the Syr-Darya. Other oases include Tashkent, Samarkand, Bokhara and Khorezm. The climate is continental and dry. Minerals include oil (in the Ferghana valley and in Khaudag), coal (Angren) and sulphur (Shorsu).

The Uzbeks, a Turkic people, make up 62 per cent. of the population, the Russians (14 per cent.) and Tartars (five per cent.) come next.

There is a major agricultural machinery plant at Tashkent and a chemical combine at Chirchik. Uzbekistan is the main cotton-growing area of the U.S.S.R. producing more than 60 per cent. of all Soviet cotton. Irrigation has always been of decisive importance in this area, and the Soviet Government has done much in this field, including the construction of the Great Ferghana Canal (230 miles).

CAPITAL, Tashkent. Population 911,000. Samarkand (195,000) contains the Gur-Emir (Tamerlane's Mausoleum), completed A.D. 1400 by Ulug-bek, Tamerlane's astronomer-grandson, and a 15th-century observatory, recently restored.

V.—KAZAKHSTAN.

First Secretary of the Party Central Committee, D. A. Kunayev.
Chairman of the Presidium of Supreme Soviet (vacant).
Chairman of the Council of Ministers, Zh. A. Tashenev.

The Kazakh S.S.R., the second-largest Union-Republic, stretching from the lower reaches of the Volga and the Caspian in the west to the Altai and Tien-shan in the east, and bordering on China, was formed in 1920 as an autonomous republic (under the name of the Kirghiz A.S.S.R.) within the R.S.F.S.R., and was constituted a Union Republic in 1936. It consists of 15 provinces (Akmolinsk, Aktyubinsk, Alma-Ata, Djambul, East-Kazakhstan, Guryev, Karaganda, Kokchetav, Kustanay, Kzyl-Orda, North-Kazakhstan, Pavlodar, Semipalatinsk, South-Kazakhstan and West-Kazakhstan).

Kazakhstan is a country of arid steppes and semi-deserts, flat in the west, hilly in the east and mountainous in the south-east (Southern Altai and Tien-shan). The climate is continental and very dry. The main rivers are the (Upper) Irtysh, the Ural, the Syr-Darya and the Ili. Kazakhstan contains rich deposits of non-ferrous metals: copper in Kounrad, Djezkazgan and Boshchekul, other metals in the Altai, in the Kara-Tau Mounts, and elsewhere. It also contains an important coal-producing area (Karaganda) ranking third in the U.S.S.R. and an oil-bearing area (near Emba). Major centres of metal industry exist now in the Altai Mountains, in Chimkent, North of the Balkhash Lake and in Central Kazakhstan. Stock-raising is highly developed, particularly in the central and south-western parts of the Republic. Grain is grown in the North and north-east and cotton in the south and south-east. In 1954 an ambitious programme of development of "virgin" lands in the steppes was launched by the Government to increase grain production.

The Kazakhs (a Turkic people) are now in a minority in the Republic named after them; they constitute only 30 per cent. of its population. Russian settlers make up 43 per cent. and Ukrainians 8 per cent.

CAPITAL, Alma-Ata (formerly Verny). Population 455,000.

VI.—GEORGIA

First Secretary of the Party Central Committee, V. P. Mzhavanadze.
Chairman of the Presidium of the Supreme Soviet, G. S. Dzotenidze.
Chairman of the Council of Ministers, G. D. Djavakhishvili.

The Georgian S.S.R., occupying the north-western part of Transcaucasia, lies on the shore of the Black Sea and borders in the south-east on Turkey. It was formed in 1921; in 1922 it joined the Transcaucasian Federation which, in its turn, adhered to the U.S.S.R. in the same year. After the liquidation of the Transcaucasian S.F.S.R. in 1936 Georgia became a Union Republic. It contains two Autonomous Republics (Abkhazia and Adjaria) and the South-Ossetian Autonomous Province. Georgia is a country of mountains, with the Greater Caucasus in the north and the Smaller Caucasus in the south. A relatively low-lying land between these two ridges is divided into two parts by the Sura Ridge: Western Georgia with a mild and damp climate and Eastern Georgia with a more continental and dry climate. The Black Sea shore and the Rion lowlands are sub-tropical in their climatic character. The most important mineral deposits are manganese (Chiatury), coal (Tkibuli and Tkvarcheli) and oil (Kakhetia). Georgia is leading as regards production of manganese in the U.S.S.R. There are also many oil refineries. Viniculture and tobacco-growing are the two main agricultural industries. The Black Sea coast harbours many famous holiday resorts. Georgians make up 63 per cent. of the population, the remainder being composed of Armenians, Russians, Azerbaidjani and Ossetians.

CAPITAL, Tbilisi (Tiflis). Population 694,000.

VII. AZERBAIDJAN

First Secretary of the Party Central Committee, V. Yu. Akhundov.
Chairman of the Presidium of the Supreme Soviet, S. M. Djafarov.
Chairman of the Council of Ministers, M. A. Iskenderov.

The Azerbaidjan S.S.R. occupies the eastern part of Transcaucasia, on the shores of the Caspian Sea, and borders on Persia. It was formed in 1920. Between 1922–1936 it formed part of the Transcaucasian Federation. In 1936 it became a Union Republic. It contains the Nakhichevan Autonomous Republic and the Nagorno-Karabakh Autonomous Province.

The north-eastern part of the Republic is taken up by the south-eastern end of the main Caucasus ridge, its south-western part by the smaller Caucasus hills, and its south-eastern corner by the spurs of the Talysh Ridge. Its central part is a depression irrigated by the Kura and by the middle reaches of its tributary Aragva. Sheltered by the mountains from the humid west winds blowing from the Black Sea, Azerbaidjan has a continental climate. The land requires artificial irrigation. The Republic is very rich in minerals, particularly in oil. The Baku oilfields form the second-largest oil-producing area in the U.S.S.R. A large power station on the Kura (Mingechaur) was completed in 1954. Azerbaidjan is also important as a cotton growing area. The Azerbaidjani (Turks) make up two-thirds of the population of the Republic, Armenians, about 12 per cent., and Russians, about 14 per cent.

CAPITAL, Ψ Baku. Population 968 000.

VIII.—LITHUANIA

First Secretary of the Party Central Committee, A. J. Sniečkus.
Chairman of the Presidium of the Supreme Soviet, J. I. Paleckis.
Chairman of the Council of Ministers, M. J. Šumauskas.

Lithuania, formerly a Province of the Russian Empire, was declared an independent Republic at Vilna in 1918 and was incorporated into the U.S.S.R. in August, 1940. It was occupied by German forces from June, 1941, until the autumn of 1944. The Republic forms a plain with a large number of lakes and swamps. The forests occupy 19 per cent. of the whole area. The main river is the Niemen with its tributaries.

The chief industries are agriculture and forestry, the chief products being rye, oats, wheat, barley, flax, sugar-beet and potatoes. Before its incorporation into the Soviet Union, Lithuania exported a large quantity of meat and dairy produce.

The Lithuanians make up four-fifths of the population, Russians and Poles, 8·5 per cent. each. The majority of the Jews were exterminated by the Germans.

CAPITAL, Vilnius (Vilna, restored to Lithuania by U.S.S.R. after invasion and collapse of Poland in 1939, and recaptured by Soviet forces in July, 1944). Population 235,000.

IX.—MOLDAVIA

First Secretary of the Party Central Committee, Z. T. Serdyuk.
Chairman of the Presidium of the Supreme Soviet, I. S. Koditsa.
Chairman of the Council of Ministers, A. F. Diorditsa.

Moldavia, occupying the south-western corner of the U.S.S.R., borders in the west on Roumania with the Pruth forming the frontier. In 1918, Roumania seized the Russian Province of Bessarabia. In 1924 a Moldavian Autonomous Republic was formed within the Ukraine, and in 1940 the U.S.S.R. forced Roumania to give back Bessarabia, the major part of which was merged with the Moldavian A.S.S.R. to form a Moldavian Union Republic. Moldavia was occupied by the Germans and Roumanians between 1941–1944.

The northern part of the Republic consists of flat steppe lands, now all under plough. Some

forests skirt the Dniester. Further south, around Kishinev, there are woody hills, and further south again, low-lying steppe lands. The climate is moderate. The main river is the Dniester, navigable along the whole course.

The main industry is agriculture (viniculture, fruit-growing and market-gardening). Industry is insignificant in both parts of Moldavia, but the Republic has the densest population in the U.S.S.R. A radical agrarian reform has been carried out under the Soviet régime. Moldavians make up 65 per cent. of the population, with Ukrainians, and Russians next. In the south there are colonies of Bulgarians.

CAPITAL, Kishinev (Chisinau). Population 214,000.

X.—LATVIA

First Secretary of the Party Central Committee, A. J. Pelše.
Chairman of the Presidium of the Supreme Soviet, J. E. Kalnberzin.
Chairman of the Council of Ministers, J. V. Pejve.

The Latvian S.S.R., lying on the shores of the Baltic and of the Gulf of Riga, was formerly a Baltic Province of the Russian Empire. It was proclaimed an independent state in 1918 and was forcibly incorporated into the U.S.S.R. in August 1940. Between 1941 and 1944 the Republic was occupied by the German forces.

The surface of the country is generally flat, interspersed by occasional chains of hills. The climate is moderately-continental. The main rivers are the lower reaches of the Western Dvina and its tributaries. Forests occupy 20 per cent. of the total territory.

The Latvians make up 62 per cent. of the Republic's population, the Russians, 27 per cent.

Latvian industry was always highly developed, with shipbuilding, engineering, chemical industry, textile industry, wood-working and dairying being the chief occupations. Both Riga and Liepaja (Libava, Liebau) are important sea-ports.

As in other newly-acquired Republics an agrarian reform was carried out in Latvia in 1940–41 and again after 1944.

CAPITAL, Riga. Population 605,000.

XI.—KIRGHIZIA

First Secretary of the Party Central Committee, I. R. Razzakov.
Chairman of the Presidium of the Supreme Soviet, T. Kulatov.
Chairman of the Council of Ministers, K. D. Dikambayev.

The Kirghiz S.S.R. occupies the north-eastern part of Soviet Central Asia and borders in the south-east on China. In 1924, a Kara-Kirghiz Autonomous Province was formed within the R.S.F.S.R. In 1926 it became a Kirghiz Autonomous Republic, and in 1936, a Union Republic. It contains two provinces (Osh and Tien-Shan). The Kirghiz Republic is a mountainous country, the major part being covered by the ridges of the Central Tien-Shan, while mountains of the Pamiro-Altai system occupy its southern part. There are a number of spacious mountain valleys, the Alai, Susamyr, the Issyk-kul lake and others. The majority of the population is concentrated in plains, lying at the foot of mountains—Chu, Talass, part of the Ferghana Valley where agriculture prospers. Industry is insignificant, but some mining is done. A number of railways have been built under the Five Year Plans. The Kirghiz now constitute only 40 per cent. of the population, the Russians, 30 per cent. The Uzbeks (in Eastern Ferghana) amount to 10 per cent.

CAPITAL, Frunze (formerly Pishpek). Population 217,000.

XII.—TADJIKISTAN

First Secretary of the Party Central Committee, T. Uldzhabayev.
Chairman of the Presidium of the Supreme Soviet, M. Rakhmatov.
Chairman of the Council of Ministers, N. Dodkhudoyev.

The Tadjik S.S.R. lies in the extreme south-east of Soviet Central Asia and borders in the south on Afghanistan and in the east on China. It was originally formed in 1924 as an Autonomous Republic within the Uzbek S.S.R. and became a Union Republic in 1929. It includes the Gorno-Badakhshan Autonomous Province and the Leninabad Province.

The country is mountainous: in the east lie the Pamir highlands with the highest point in the U.S.S.R., the Stalin Peak (24,590 feet), in the centre the high ridges of the Pamir-Altai system. Plains are formed by wide stretches of the Syr-Darya valley in the north and of the Amu-Darya in the south.

Like the other Central-Asiatic Republics, Tadjikistan is a cotton-growing country. Its climatic conditions favour the cultivation of Egyptian cotton. Irrigation is of great importance. Fifty-three per cent. of the population are Tadjiks (linguistically and culturally akin to the Persians), about 23 per cent. Uzbeks, the rest Russians and Tartars.

CAPITAL, Stalinabad (formerly Dyushambe). Population 224,000.

XIII.—ARMENIA

First Secretary of the Party Central Committee, S. A. Tovmasyan.
Chairman of the Presidium of the Supreme Council, Sh. M. Arushanyan.
Chairman of the Council of Ministers, A. Ye. Kochinyan.

The Armenian S.S.R. occupies the south-western part of Transcaucasia; it was formed in 1920. In 1922 it joined the Transcaucasian Federation, and on its liquidation in 1936 became a Union Republic. In the south it borders on Turkey. It is a mountainous country consisting of several vast table lands surrounded by ridges. The population and the economic life are concentrated in the low-lying part of Armenia, the Aras valley and the Erevan hollow; the climate is continental, dry and cold, but the Aras valley has a long, hot and dry summer. Irrigation is essential for agriculture. At the junction of the former Turkish, Persian and Russian boundaries is *Mount Ararat* (17,160 ft.), the traditional resting place of "Noah's Ark." Industrial and fruit crops are grown in the low-lying districts, grain in the hills. Armenia is traditionally noted for her wine. There are large copper ore and molybdenum deposits and other minerals. The Armenian Church centred in Etchmiadzin is the oldest established Christian Church, Christianity having been recognized as the State religion in A.D. 300.

Nearly 90 per cent. of the population is Armenian.

CAPITAL, Erevan. Population 509,000.

XIV.—TURKMENISTAN

First Secretary of the Party Central Committee, B. O. Ovezov.
Chairman of the Presidium of the Supreme Soviet, N. Bayramov.
Chairman of the Council of Ministers, A. A. Annaliev.

Turkmenia occupies the extreme south of Soviet Central Asia, between the Caspian and the Amu-Darya and borders in the south on Iran and Afghanistan. It was formed in 1924 and contains three Provinces (Chardjou, Mary and Tashauz). The country is a low-lying plain, fringed by hills in the south. Ninety per cent. of the plain is taken up by the arid Kara-Kum desert. Of all Central-Asiatic Republics, Turkmenia is the lowest and driest. The principal industries are agriculture and stock-raising, cotton, wool, astrakan furs, carpets and horses being the principal products. Minerals include oil and sulphur. Most of the land under plough is artificially irrigated. Silk industry is of an old standing. There are also some fisheries in the Caspian.

Turkmens, nomadic in the past, make up 61 per cent. of the population, with Russians coming second, and Uzbeks, third.

CAPITAL Ashkhabad (formerly Askhabad, Poltoratsk). Population 170,000.

XV.—ESTONIA

First Secretary of the Party Central Committee, I. G. Käbin.

Chairman of the Presidium of the Supreme Council, I. G. Eichfeld.

Chairman of the Council of Ministers, A. A. Mürisepp.

Estonia, formerly a Baltic province of the Russian Empire, was proclaimed an independent Republic in 1918. In 1940, it was forcibly incorporated into the U.S.S.R. It lies on the shores of the Baltic and of the Finnish Gulf in the north and of the Gulf of Riga in the south-west. Some 800 islands, among them Dagö and Ösel, form part of Estonian territory. Between 1941–44, Estonia was occupied by the German forces.

The country forms a low-lying plain with many lakes, among them the Chud (or Pskov) Lake, on the border with the R.S.F.S.R. Forests take up about one-fifth of the territory. Agriculture and dairy-farming are the chief industries, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon and eggs the chief products of dairy farming. There are important manufactures, including textiles, engineering, shipbuilding, woodworking, etc.

The population consists of Estonians (73 per cent.) and Russians (22 per cent.).

CAPITAL, ΨTallinn (formerly Reval). Population 280,000.

VENEZUELA

(La Republica de Venezuela)

President, Señor Romulo Betancourt, *assumed office* Feb. 13, 1959.

EMBASSY IN LONDON

3, Hans Crescent, S.W.1

[Knightsbridge: 4206]

Ambassador in London, Dr. Ignacio Iribarren (1959).
Minister-Counsellor, Dr. Hernán Gonzalez Vale.
Commercial Counsellor, Señor Julio Planchart.
1st Secretary, Señor Gabriel Paoli.
3rd Secretary, Dr. Carlos Briceño Vasquez.
Naval Attaché, Capt. Armando de Pedraza.
Assistant Naval Attaché, Lt.-Cdr. Luis Angel Ortega Jugo.
Air Attaché, Lt.-Col. Leonardo Gómez Muñoz.
Special Attachée, Señora Miriam Blanco-Fombona de Hood.

There are Consulates-General at *London* and *Liverpool* and a Consulate at *Glasgow*.

Area and Population.—The most northerly Republic of South America, situated approximately between 1° 40′ S. lat. and 12° 26′ N. lat. and 59° 52′–73° 15′ W. long. It consists of one Federal District, 20 states and 2 territories. The best authorities calculate the actual present area to be approximately 352,051 square miles. The population on Dec. 31, 1959 was 6,607,475.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia, east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the State of *Nueva Esparta*. Margarita has an area of about 400 square miles. In 1942 Great Britain ceded to Venezuela the small island of *Patos* (170 acres) about 3 miles from the mainland.

Physical Features.—The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima, and on the eastern border the Sierras de Rincote and de Usupamo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parma contains Yaparana (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (9,000 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the southern highlands of the republic to its outflow in the deltaic region of the north-east.

A Franco-Venezuelan Expedition, led by Major Frank Risquez, claims to have discovered the source of the Orinoco, on Nov. 27, 1951, at 63° 15′ W. long., 2° 28′ N. lat., and about 1,100 metres above sea-level.

The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles farther up-stream. Dredging operations completed at the beginning of 1954 opened the Orinoco to ocean-going ships, of up to 24 ft. draft, as far as Puerto Ordaz (about 150 miles up-stream). Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are Zulia (290 square miles), south-west of Maracaibo, and Valencia (216 square miles), about 1,400 feet above sea-level in the Maritime Andes. The *llanos* also

contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October the dry, cooler season from November to March.

Government.—Venezuela was visited by Columbus in 1498, and in 1499 by Alonzo de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Caracas, and the country remained under Spanish rule until the revolt under *Simon Bolivar*, a native of Caracas, who defeated the Spanish forces in the battles of Los Taguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47. Venezuela formed part of the Federal Republic of Colombia from 1822–30, since which time it has been independent.

On Nov. 30, 1952, polling took place to elect a new Constituent Assembly, which published a new Constitution on Nov. 30, 1952, and chose a Senate and Chamber of Deputies. The validity of these elections was subsequently queried, but Col. Marcos Pérez Jiménez declared himself elected as the Provisional President. On April 19, 1953, with the passing of the new Constitution, he was declared Constitutional President for a term of five years. Before the expiry of this term, however, on January 23, 1958, his military dictatorship was overthrown by a popular and military uprising, and a Government Junta, presided over by Rear-Admiral Wolfgang Larrazábal Ugueto, assumed the temporary government of the country. Larrazábal resigned on Nov. 14, 1958, in order to stand for President in the elections held on December 7, 1958, his place as President being filled by Dr. Edgar Sanabria who in turn handed over the Presidency to Sr. Rómulo Betancourt on the success of the latter and his party in the elections. Sr. Betancourt presides over a Coalition Government composed of three of the main political parties. On February 13, 1960, Venezuela, for the first time in its history, celebrated the first anniversary of a freely-elected democratic and constitutional Government.

Production and Industry.—The produce of Venezuelan forest and fields includes the following: (*a*) Tropical forest region: orchids, wild rubber, timber, mangrove bark, balata gum and tonka beans. (*b*) Agricultural areas: cocoa beans, coffee, cotton, rice, maize, sugar, sesame, groundnuts, potatoes, tomatoes, other vegetables, sisal and tobacco. Although there is an extensive beef and dairy farming industry, the country does not produce all the grain and other food products it requires. Food and drink imports were valued at the equivalent of £61,631,000 in 1958. An autonomous Government department, the Corporacion Venezolana de Fomento, and other Government agencies, are endeavouring, by loans, investment and other means, to foster agricultural and industrial development. A strong nationalist movement began in 1958 to speed up the rate of industrialization; to this end many tariffs were raised and legislation introduced to compel Governments to give preference to national manufacturers.

The principal industry is that of *Petroleum*. The production of the oilfields is shown below (in barrels of 42 gallons):—

Year	Barrels	Year	Barrels
1944	257,000,000	1952	658,427,000
1945	323,400,000	1953	644,221,000
1946	388,500,000	1954	691,181,000
1947	438,000,000	1955	785,237,000
1948	490,000,000	1956	899,183,000
1949	482,300,000	1957	1,014,929,190
1950	546,730,000	1958	950,057,040
1951	622,187,000	1959	1,010,873,705

Before the war of 1939–45 over 80 per cent. of the crude oil was exported to Netherlands' West Indies refineries. In 1942 small refineries were established in Venezuela, capable of handling about 200,000 barrels daily. The large Shell plant at Punta Cardon went into production in February, 1949, and the Creole refinery at Amuay a year later. Other refineries are being operated at Caripitó, San Lorenzo, Puerto La Cruz, Tucupitó and El Chaure, and 30 per cent. of the total output of crude oil was refined in Venezuela in 1959. Hitherto the Venezuelan Government has been receiving over 50 per cent. of the profits of local oil companies. As a result of income tax increases decreed in December, 1958, this percentage was raised to over 60 per cent. Rich iron ore deposits in South Venezuela are being developed and production reached 17,403,545 tons in 1959. A steel tube mill is in the process of being erected near Ciudad Bolivar, which is designed to use local iron ore, and power from the newly-opened Caroni River hydro-electric plant.

Other industries include gold, diamonds and asbestos; cotton, wool and rayon weaving; manufacture of paper, cement, beer, tyres, cigarettes, soap, animal feeding concentrates, non-alcoholic drinks, simple steel products, shoes, tins, jewellery, rope, metal and wooden furniture, sacks, paint and motor-vehicle assembly, preparation of pharmaceutical goods, lard, powdered milk, vegetable oil, flour, biscuits and other foods; fishing and fish-canning; pearl fishing. New industries planned include petrochemicals, plate glass, and the manufacture of paper from bagasse.

Language and Literature.—Spanish is the language of the country. Some Venezuelan literature is of international repute. There are 23 daily newspapers in Venezuela, of which 8 are published in Caracas, 75 weeklies and 23 fortnightlies. There are also 233 other periodicals, mostly monthlies, but including also some appearing once, twice or three times a week.

Education is free and primary education compulsory from the age of 7 years. There were (1958–59), 9,910 primary schools, with 1,104,981 pupils and 337 secondary schools, with 86,863 pupils. There are six universities in Venezuela, three in Caracas and the others in Maracaibo, Mérida and Valencia. The total number of university students is 16,126 (1959).

FINANCE

	1958–59 *Bolivares*	1959–60* *Bolivares*
Revenue	5,306,420,000	5,068,900,000
Expenditure	6,240,650,000	6,449,600,000
Internal Debt (March 31 1960)		170,910,000

* Estimated.

The market exchange rate of the *Bolivar*, of 100 *Centimos*, at present fluctuates between *Bs.*9·32=£1 (buying) and *Bs.*9·40=£1 (selling). There

are special buying rates for petroleum, coffee and cocoa. (*See also* p. 84.)

Communications.—There are about 15,800 miles of all-weather roads. The State has now acquired all but a very few of the railway lines, whose total length is only some 760 miles. A substantial railway reorganization plan has been drawn up which will involve the abandonment of four systems with differing gauges and the construction of new lines of standard gauge. One of these lines, 173 km. long (Puerto Cabello-Barquisimeto), was inaugurated in 1959. Several British, U.S. and European airlines provide Venezuela with a wide range of services. There are three Venezuelan airlines (two of them state-owned) which between them have a comprehensive network of internal lines and also connect Caracas with New York, Miami, Bermuda, Havana, Lima, Bogotá, the West Indies, Lisbon, Madrid and Rome. The Venezuelan state-owned merchant fleet controls a total tonnage of about 250,000. Foreign vessels are not permitted to engage in the coast trade. The telegraph, radio-telegraph and radio-telephone services are state-owned. There are one government-controlled and 72 commercial broadcasting stations. There are five television stations in Venezuela (three in Caracas, one in Maracaibo and one in Valencia) and Radio Caracas T.V., a commercial station, has five relay stations in the interior of the country.

TRADE

	1958	1959
Imports	*Bs.* 4,798,126,346	*Bs.* 4,720,000,000
Exports.....	7,776,874,936	7,897,000,000

The principal imports are machinery, textiles, foodstuffs, steel and iron and chemicals. The principal exports are petroleum and petroleum products (91 per cent. in 1958), iron ore, coffee and cocoa. The value of exports of iron ore in 1958 amounted to *Bs.* 390,635,000.

	1958	1959
Imports from U.K..	£36,322,488	£34 009,650
Exports to U.K.....	65,865,802	75,814,432

CAPITAL, Caracas (3,000 ft.). Population, December, 1956, 1,102,230; other principal towns are Maracaibo (289,723), Barquisimento (164,908), Valencia (124,376), Maracay (95,137), San Cristóbal (77,816), Cumaná (68,756) and Ciudad Bolivar (42,177).

FLAG: Three horizontal bands, yellow, blue, red (with seven white stars on blue band).

3rd Secretary, Nguyen Duc Quy (*Cultural*).

Attaché, Le Dinh Phuoc.

Since the Geneva Conference of July 1954, Vietnam has been divided into two zones.

SOUTHERN ZONE

The Southern Zone has an area of 66,000 sq. miles. Its population was estimated in 1960 at 13,680,000. The capital is Ψ Saigon (1959 population of Saigon-Cholon: 1,600,000). Other principal towns are Hué (1959 population: 103,000) and Ψ Tourane (1959 population: 109,000). Saigon and Tourane are the main ports. Rice and rubber are the chief products. Total trade in 1959 was: Imports £80,310,000: Exports £26,820,000. Trade with the United Kingdom in 1959 was valued at: Imports from U.K., £1,823,353; Exports to U.K., £564,608.

On October 23, 1955, a referendum showed a large majority in favour of the deposition of the former Chief of State, Bao Dai, and the election of Ngo dinh Diem to his place. The latter was accordingly proclaimed Chief of State on October 26, and his first act was to declare Vietnam a Republic of which he became the President. An elected constituent assembly, after two months' deliberation, set up a democratic constitution which was promulgated on October 26, 1956. This constituent assembly, on the date of the promulgation of the constitution, became the first Legislative Assembly of the Republic of Vietnam. The Government of the Republic of Vietnam in Saigon is recognized by the United Kingdom, the United States, France and other members of the United Nations as the legal government of Vietnam.

BRITISH EMBASSY
Saigon

Ambassador Extraordinary and Plenipotentiary, His Excellency Henry Arthur Frederick Hohler, C.M.G. (1959)..... £3,800

British Council Representative, H. C. Burrow.

NORTHERN ZONE

President, Ho Chi Minh, *assumed office*, 1945; *re-elected* July 15, 1960.

Vice-President, Tran Duy Hang.

Prime Minister and Minister of Foreign Affairs, Pham Van Dong (1955).

The Northern Zone (north of the 17th parallel) has an area of approximately 63,000 sq. miles and a population (Census of 1960) of 15,903,000. The

capital is Hanoi (638,600) and the chief port is ΨHaiphong (367,000). The chief crop is rice, of which the production in 1959 was claimed to be over 5,000,000 tons, while the chief industrial products are coal and cement. The production of apatite (phosphate) is increasing, and with Chinese and Soviet aid some new factories have been built to produce consumer goods.

The régime in the north styles itself the Government of the Democratic Republic of Vietnam, of which the President is Ho chi Minh. Power is wielded by the *Lao Dong* (or Workers') Party which is Communist in character, and which can exert its influence through another mass organization known as the Fatherland Front (which some years ago superseded the "Vietminh"). The policy of the northern régime is to work for unification of north and south, whilst in the meantime it strives to remould the political and economic life of the north on Communist lines. The completion of a three-year plan of reform and development in 1960 is expected to pave the way for a five-year plan starting in 1961. Elections to the "Second National Assembly" were held in the north in May 1960. The régime has diplomatic relations with the U.S.S.R., China and other states of the Sino-Soviet bloc, but very few other countries recognize it.

There is a British Consulate General at *Hanoi*.

THE YEMEN

(The Mutawakilite Kingdom of The Yemen)

King of The Yemen. Imam Ahmed bin Yehya Muhammad Hamid Ud Din, *b*. 1895, proclaimed March 14, 1948, after the assassination in February, 1948 of his father the late King, Imam Yehya Muhammad Hamid Ud Din. *Heir Apparent*, Saif al Islam Muhammad al Badr.

YEMEN LEGATION IN LONDON.
41 South Street, W.1.
[Grosvenor: 5246]

Chargé d'Affaires, Assayed Mohamed Ibrahim.

Yemen, "the land on the right hand" (of Syria) and the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 4,000,000. It extends inland to the borders of the Hadramaut. The highlands and central plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, with an abundant and regular rainfall. The main exports are coffee, food-grains, hides, and raisins. Trade agreements have been concluded with a number of countries. Imports from U.K. in 1959 totalled £32,084; exports to U.K., £33,361. The chief port of Yemen is ΨHodeida, which is at present being enlarged. From Hodeida the famous Yemeni coffee is shipped to Masawa and Aden, and thence to Europe. Aden is an important centre for imports to the Yemen.

The Imam is the head of one branch of the Zeidi sect of the Shiah Division of the Islamic religion. The ruins of Marib, the ancient Sabæan capital and its dam are in the Yemen.

On March 8, 1958, an agreement was signed in Cairo whereby the Yemen joined the United Arab Republic in a federation to be known as the United Arab States (*see* United Arab Republic).

FLAG: Red, with horizontal Arabian sword in centre with 3 stars above and 2 below.

CAPITAL, Taiz (pop. about 14,000); Sana'a has about 60,000 inhabitants. Other cities of the Yemen are ΨHodeida, Ibb, Mocha and Beidha.

British Chargé d'Affaires, R. W. Bailey.

YUGOSLAVIA

(Federativna Narodna Republika Jugoslavije.)

President of the Republic, President of the Federal Executive Council and Chairman of the National Defence Council, Josip Broz Tito, *assumed office*, Jan. 13, 1953, *re-elected for* 4 *years*, Jan. 29, 1954 *and* April 19, 1958.

Vice-Presidents of the Federal Executive Council, Edvard Kardelj; Aleksandar Rankovič; Mijalko Todorović; Rodoljub Čolaković.

Secretary of the Federal Executive Council, Veljko Zeković.

President of the Federal People's Assembly, Petar Stambolić.

Secretary of State for Foreign Affairs, Koča Popović.

National Defence, Ivan Gošnjak.

Internal Affairs, Svetislav Stefanović.

Finance, Nikola Minčev.

Internal Trade, Marijan Brecelj.

Chairman of Committee for Foreign Trade, Sergej Kraigher.

Presidents of the People's Republic, Jovan Veselinov (*Serbia*); Vladimir Bakarić (*Croatia*); Lazar Koliševski (*Macedonia*); Djuro Pucar (*Bosnia and Herzegovina*); Miha Marinko (*Slovenia*); Blažo Jovanović (*Montenegro*).

YUGOSLAV EMBASSY IN LONDON
25 Kensington Gore, S.W.7
[Kensington: 3400]

Ambassador in London, His Excellency Srdja Prica (1960).

Counsellors, Feliks Gorski; Milan Stojaković; Djuro Vukolić.

1st Secretary, Nikola Zic.

2nd Secretaries, Cvijeto Job; Milenko Vuković; Mate Rako.

3rd Secretary, Nenad Radovanović.

Military and Air Attaché, Col. Radovan Vojvodić.

Naval Attaché, Capt. Orfeo Ticać.

Economic Counsellor, Ing. Vladimir Saičić.

Commercial Attaché. Dusan Marinković.

Asst. Air Attaché, Lt.-Col. Stevo Leka.

Assistant Military Attaché, Capt. Bora Cerović.

Press Counsellor, Smiljan Pecjak.

Asst. Press Attaché, Ante Ilić.

Area and Population.—Yugoslavia is a Federation comprising the People's Republics of Serbia, Croatia, Slovenia, Montenegro, Bosnia and Herzegovina, and Macedonia. Serbia includes the autonomous province of the Vojvodina and the autonomous region of Kosovo and Metohija (Kosmet). In July, 1946, Pelagosa and adjacent islands with all territory east of the line known as the *French Line* in Istria (including Pola and Fiume) were ceded by Italy to Yugoslavia. By an agreement concluded in London on Oct. 5, 1954, between Yugoslavia, Italy, the United Kingdom and the United States, Zone B of the Trieste Territory was transferred to the civil administration of Yugoslavia, under whose military administration it had been since 1945. Zone B, an area of 200 square miles with a population of 73,500, included the towns of Kopar (Capodistria), Piran (Pirano) and Novi Grad (Cittanuova). The area has now been divided between the Republics of Slovenia and Croatia. The area of Yugoslavia in 1953 was estimated at 255,804 square kilometres (98,725 square miles) and the population in 1960 at 18,667,000. As a result of the war there was a decrease of nearly 2,000,000 in the population of Yugoslavia, and this loss has only recently been made up.

Montenegro (*Crna-Gora*) was united to Serbia by a decision of the Montenegrin Parliament in November, 1918, when King Nicholas was deposed.

Government.—Stretching from Central Europe to the Balkans, different parts have been subjected to different historical, religious, cultural and geographical influences. *Serbia* came early under the Orthodox Church and then passed 500 fallow years of subjection to the Turkish Empire. In *Bosnia*, an outpost of the Turkish Empire, large numbers of the population were forcibly converted to Islam. *Croatia* and *Slovenia*, on the other hand, came under the Roman Catholic Church, and in later years were subjected to the civilizing influence of the Austro-Hungarian Empire. Such factors have, despite community of race, hampered the process of fusion into a united nation. In Jan. 1929, King Alexander abrogated the Constitution and instituted an absolute monarchy for two years, when it was superseded by a modified constitution. On King Alexander's assassination in 1934, his brother, Prince Paul governed as Regent, with two others, on behalf of the young King Peter. Faced with the threat of German invasion, the Government came to an accommodation with Hitler on March 25, 1941, but was overthrown two days later by a popular rising, which placed King Peter at the head of the state. The country was invaded by the German and Bulgarian armies on April 6, 1941, and the King and Government went into exile. The invaders parcelled up the country, placing Serbia under a puppet government, Dalmatia under Italian administration and Croatia under the so-called independent régime of Pavelić (Ustashi). Two main resistance movements developed, the Chetniks under Mihajlović, and the Partisans under Marshal Josip Broz, commonly known as Marshal Tito. The latter emerged from the turmoil of the war years as the most potent force in the country and the modified constitution was superseded by an agreement signed on November 1, 1944, by the Yugoslav Prime Minister (Dr. Ivan Subasić) and Marshal Tito as leader of the National Liberation Committee, recognizing a provisional parliament. On March 7, 1945, the agreement was confirmed by the Royal Yugoslav government in London, and a provisional government was set up in Belgrade.

On Nov. 29, 1945, the Constituent Assembly of Yugoslavia, at a joint session of the Skupshtina and the House of Nationalities, proclaimed Yugoslavia a Republic. In January, 1953, a new Constitution became effective, under which two houses (the Federal Council and Council of Producers) were established. Elections to these houses were held in November, 1953 and March, 1958.

Defence.—The Army, Navy and Air Force on a peace footing consist of 370,000 officers and men, the war strength being about 1,250,000.

Religion and Education.—The Orthodox, Roman Catholic, Protestant, Islamic and Judaic faiths are recognized by the State. According to the 1948 Census, 49·53 per cent. of the population is Orthodox, 36·7 per cent. Catholic, 1·14 per cent. Protestant and other Christian denominations, 12·52 per cent. Moslem and 0·04 per cent. Jews. The Church is separated from the State. All religious instruction in schools has been forbidden since January 1952. Priests are allowed to teach in churches. Eight years elementary education is compulsory and all education is free. In 1959 there were 14,342 elementary schools with 79,686 teachers and 2,427,000 pupils and 1,398 secondary schools with 24,136 teachers and 308,000 pupils, of which 77 were training colleges for teachers with 24,000 students. There are five universities: Belgrade, Zagreb, Ljubljana, Sarajevo and Skoplje, with 55 faculties and 79,000 students and 11 art academies with 1,377 students.

Language and Literature.—The languages of the country are Serbo-Croat, Slovenian and Macedonian, all South Slav tongues. Serbo-Croat predominates and is the language of the Federal Government. In Serbia, Macedonia and Montenegro the Cyrillic script is used and in the rest of the country the Latin; Hungarian, Roumanian, Albanian and Italian are also used in certain districts. The desire for the political union of the South Slavs led to a cultural unity and a revival of Slav literature. There are 3 Serbian daily newspapers in Belgrade, 2 Slovene dailies in Ljubljana (Laibach), 3 Croat dailies in Zagreb, and daily papers at Skoplje, Sarajevo, Pristina, Novi Sad, Rijeka, Split and Maribor.

Production and Industry.—About 50 per cent. of the population is engaged in agriculture, although in recent years industry has expanded rapidly and industrial production has more than doubled since 1947. Since 1955 substantial new investment has been diverted from basic industry to consumer goods. In agriculture the main emphasis is on increased investment in mechanization and fertilizers. The main crops are wheat and maize, of which the average yield in the period 1950–59 was 2,326,000 and 3,799,000 tons respectively. The forest areas produced some 7,479,000 cubic metres of timber in 1959. According to Yugoslav official estimates, the livestock population at the beginning of 1960 was approximately as follows: horses, 1,274,000; cattle, 5,309,000; sheep, 11,475,000; pigs 6,198,000; poultry, 30,171,000. Minerals are a great source of wealth, particularly in the central regions. Estimated production in 1959 included the following ('000 tons): Hard coal, 1,298; brown coal, 9,122; lignite, 10,687; copper, 67; lead, 85; iron ore, 2,095; pig iron, 863; steel, 1,299; aluminium, 19·3; zinc, 32 and mercury, 0·5. Antimony, pyrites and manganese ores are also produced.

Finance

Federal Budget (estimated figures).	1959 *Dinars*
Revenue	359,500,000,000
Expenditure	298,100,000,000

The Yugoslav *Dinar* has a nominal value of 2/7 penny, the official exchange rate being 840*D*=£1 (*see also* p. 84).

Communications.—In 1959 there were approximately 7,375 miles of standard and narrow gauge railway. There are also 20,714 miles of telephone lines and 21,560 miles of telegraph lines. Yugoslavia has a long seaboard on the Adriatic coast. The principal Yugoslav ports are Rijeka, Šibenik, Split, Zadar, Dubrovnik and Kotor (Carraro) and new ports are under construction at Ploče and Bar. The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other shipping routes. There are many international air services operated by the Yugoslav airline and by foreign airlines.

Trade with U.K.

	1958	1959
Imports from U.K.	£10,741,934	£11,153,740
Exports to U.K.	13,065,909	13,697,880

The principal exports are timber and wood products, box metals (lead, iron and steel), livestock, meat and meat products, fruit, hops and tobacco. The imports are chiefly wheat, textile raw materials and textiles, machinery, coal, petroleum, chemical fertilisers and base metals.

The chief imports from U.K. are machinery, tractors and textile raw materials and yarns and chemicals.

CAPITAL, Belgrade (*Beograd*=White City), population (1959) 542,000. Other towns are Zagreb (or Agram) (470,000), Ljubljana or Laibach (155,000), Sarajevo (183,000), Skoplje (167,000), Rijeka (Fiume with Susak) (87,000), ♆Split (84,000), Maribor (84,000) and Novi Sad (97 000).

NATIONAL FLAG: Blue, white, red with a five-point red star superimposed.

NATIONAL DAY: Founding of Yugoslav Federal Republic (November 29).

BRITISH EMBASSY
Prvog Maja 46, Belgrade

British Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Michael Justin Creswell, K.C.M.G. (1960)..... £5,000

Counsellors, T. W. Garvey, C.M.G.; T. E. Rogers, C.M.G., M.B.E. (*Commercial*).
Naval Attaché, Capt. R. F. Whinney, D.S.C., R.N.
Military Attaché, Col. A. I. G. Ramsey.
Air Attaché, Group Capt. C. Ambrose.
1st Secretaries. D. D. Brown, M.M. (*Head of Chancery*); R. H. Ellingworth (*Information*); M. H. Morgan; A. F. Comfort (*Commercial*).
and Secretaries, G. J. Talmadge (*Consular*); A. E. Higgs (*Visa*).
3rd Secretaries, R. H. T. Bates (*Consular*); G. E. Cheesman (*Commercial*); Miss D. A. Garton (*Information*); B. Sparrow.

BRITISH CONSULAR OFFICES
There are British Consular Offices at *Belgrade, Zagreb*, and *Split*.

BRITISH COUNCIL
Representative, J. B. S. Jardine, C.B.E., Prvog Maja 34, Belgrade. There is also a centre in *Zagreb*.

PASSPORT REGULATIONS

Applications for Foreign Office passports must be made on the forms obtainable at any of the Passport Offices (addresses given below) or at any Local Office of the Ministry of Labour and National Service.

London.—Clive House, Petty France, S.W.1. (Hours: Mon.–Fri., 9.30–4.30.)
Liverpool.—India Buildings, Water Street, Liverpool 2. (Hours: Mon.–Fri., 9.30–4.30.)
Glasgow.—1 Princes Square, 48 Buchanan Street, Glasgow, C.1. (Hours, Mon.–Fri., 9.30–4.30.)
Ministry of Labour, Local Offices.—(Hours, 9–5.) (Open for urgent cases only, on Saturday mornings.)

The Passport Offices are also open for cases of special emergency only, between 4.30 p.m. and 6 p.m. (Saturdays 9.30–4) and in *London* on Sundays and Public Holidays between 10 a.m. and noon.

To facilitate the issue of passports applicants are recommended to make personal application to any one of the above mentioned offices. If it is not possible to make personal application at one of the Passport Offices or Ministry of Labour Local Offices, completed forms of applications should be sent to one of the three Passport Offices, with photographs, supporting documents and the fee of £1 10*s*. Remittances sent with postal applications should be in the form of a Cheque or Postal Order which should be crossed and made payable to the Passport Office. Notes or postage stamps should not be sent in payment.

Foreign Office Passports are granted:—
(i) To citizens of the United Kingdom and Colonies.
(ii) To British subjects without citizenship.
(iii) To British Protected Persons.

Passports are available for *five years* in the first instance, unless otherwise stated. They may be renewed for a further period of 5 years for a fee of £1. Where, however, a passport has already been renewed for a shorter period, it may be extended for the remainder of the 5 year period on payment of a fee of 4*s*. 0*d*. for each year of renewal. They are not available *beyond ten years from the original date of issue*. Thereafter, or if at any time the Passport contains no further space for visas, a new Passport must be obtained.

A Passport including particulars of the *holder's wife* is not available for the wife's use when she is travelling alone. A wife's particulars may *only* be added at the time of issue of a passport.

Children who have reached the age of sixteen years require separate Passports. When they apply for a Passport the written consent of father or other legal guardian is necessary.

The application must be recommended in Section 9 by a Member of Parliament, Justice of the Peace, Minister of Religion, Medical or Legal Practitioner, Bank Officer, established Civil Servant, Public Official, Police Officer or any person of similar standing personally acquainted with the applicant. The applicant's birth certificate and other evidence in support of the statements made in the application must be produced.

In the case of children under the age of 16 requiring a separate passport, an application should be made by the child's father or other legal guardian on form (B) obtainable from a Passport Office or any local office of the Ministry of Labour and National Service.

If the applicant for a Passport be a British subject by naturalization or registration, the Certificate of Naturalization or registration must be produced with the application.

British Passports are generally available for travel *to all countries*. The possession of a Passport does not, however, exempt the holder from compliance with any *Immigration Regulations* in force in British or foreign countries, or from the necessity of obtaining a *visa* where required.

A Passport cannot be issued or renewed by the Foreign Office on behalf of *a person already abroad*; such person should apply, in a foreign country to the nearest British Mission or Consulate, or, within the British Commonwealth outside the United Kingdom of Great Britain and N. Ireland, to the nearest local Passport issuing authority.

Persons resident in *Northern Ireland* should apply in person to the Foreign Office Passport Agency, 1 May Street, Belfast, or by post to the Branch Passport Office, Liverpool; citizens of the United Kingdom and Colonies resident in the Irish Republic should make application to the Visa Section, British Embassy, 39 Merrion Square, Dublin.

RENEWAL OF PASSPORTS
Applications for the renewal of Foreign Office passports must be made on Form D, obtainable at any of the Passport offices (see above) or at any local office of the Ministry of Labour and National Service.

PHOTOGRAPHS
Duplicate unmounted photographs of applicant (and his wife, if to be included in the Passport) must be sent. These photographs should be printed on *thin* paper and must not be glazed on the reverse side. They should measure not more than 2½ in. by 2 in. or less than 2 in. by 1½ in., and should be taken full face without a hat.

THE ARCTIC OCEAN

The Arctic Ocean consists of a deep sea over 2,000 fathoms, on the southern margin of which there is a broad continental shelf with numerous islands. Into this deeper sea there is only one broad channel, about 700 miles, between Greenland and Scandinavia. Behring Strait is only 49 miles wide and 27 fathoms deep. The southern boundary of the Arctic Ocean is the Wyville-Thomson and Faeroe-Icelandic submarine ridge, which separates the North Atlantic from the Norwegian and Greenland Seas. The Norwegian Deep lies between Norway and Jan Mayen and Iceland; it exceeds 1,500 fathoms. The Greenland Deep, of similar depth, lies between Spitsbergen and Greenland. These two depressions are separated by a somewhat deeply submerged ridge from the east of Jan Mayen to Bear Island, south of Spitsbergen. A shallow ridge from the north-west of Spitsbergen to Greenland separates the Greenland Sea from the deep North Polar Basin. This extends from the north of Spitsbergen and Franz Josef Land to the north of the New Siberia Islands and of the North American Arctic Archipelago.

Another more shallow depression is Baffin Bay, less than 1,000 fathoms. This is separated from the North Atlantic by a submarine ridge. Barent's Sea, between Spitsbergen, Norway and Novaya Zemlya, and the Kara Sea, between Novaya Zemlya and the Siberian coast, are respectively below 200 and 100 fathoms.

The total area of the Arctic Sea is about 5·5 million square miles, of which 2·3 million square miles are probably covered with floating ice.

DISTANCES FROM LONDON BY AIR

A list of the distances in statute miles from London to various places abroad. Distances given are those of the shortest routes in use by the British Airways Corporations—B.O.A.C. services(*O*); B.E.A.services(*E*).

THE NOBEL PRIZES

The Nobel Prizes are awarded each year from the income of a trust fund established by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died on December 10, 1896, leaving a fortune of £1,750,000. They are awarded to those who have contributed most to the common good in the domain of (*a*) Physics; (*b*) Chemistry; (*c*) Physiology or Medicine; (*d*) Literature; (*e*) Peace. The first awards were made in 1901 on the fifth anniversary of Nobel's death. The awarding authorities are the Swedish Academy of Science—(*a*) Physics; (*b*) Chemistry; the Royal Caroline Institute, Stockholm—(*c*) Physiology or Medicine; the Swedish Academy—(*d*) Literature; a committee of five persons elected by the Norwegian Storthing—(*e*) Peace. The Trust is administered by the Board of Directors of the Nobel Foundation ("Nobelstiftelsens Styrelse"), Stockholm. The Board consists of four members and two deputy members appointed by the awarding authorities; the Swedish Government appoints a chairman and a vice-chairman.

The nationality of prizewinners is indicated as follows: (a) Great Britain; (b) U.S.A.; (c) France; (d) Sweden; (e) Belgium; (f) U.S.S.R.; (g) Germany; (h) Netherlands; (i) Switzerland; (k) Denmark; (l) Norway; (m) Spain; (n) Poland; (o) Austria; (p) Italy; (q) India; (r) Hungary; (s) Finland; (t) Canada; (u) Chile; (v) Argentine; (w) Japan; (x) Portugal; (y) Irish Free State; (z) Republic of Ireland; (aa) South Africa; (bb) Iceland; (cc) China; (dd) Czechoslovakia. The distribution by nationalities is shown at foot of table.

For prize winners for the years 1901–1943, *see* earlier editions of WHITAKER'S ALMANACK.

Year	(*a*) PHYSICS	(*b*) CHEMISTRY	(*c*) PHYSIOLOGY OR MEDICINE	(*d*) LITERATURE	(*e*) PEACE
1944	I. I. Rabi (b)	Otto Hahn (g)	J. Erlanger (b) H. S. Gasser (b)	J. V. Jensen (k)	International Committee of the Red Cross.
1945	Wolfgang Pauli (o)	Artturi Virtanen (s)	Sir A. Fleming (a) Sir H.W. Florey (a) E. B. Chain (a)	Gabriela Mistral (u)	Cordell Hull (b)

SEASONABLE AND UNSEASONABLE FISH

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The letter *p* signifies that the fish are then in their prime or most plentiful; the letter *x* signifies that the fish may be obtained, but are not at their best; the letter *c* signifies that it is "close-time" as fixed by statute.

NAME OF FISH	Jan.	Feb.	Mar.	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

(*a*) This is for sea crayfish (or crawfish). River crayfish can be obtained in the summer and autumn. It is illegal to take fresh-water crayfish from March to June.

(*b*) Forcign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

(*d*) In the close season, salmon from the Netherlands, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(*e*) In normal times, for the first six months, the bulk of our London supply of shrimps comes from the Netherlands, but Dutch shrimps are far inferior to the English, which are plentiful from July to Dec.

BUCHAN'S WEATHER PERIODS OR RECURRENCES OF WEATHER

Dr. Alexander Buchan, F.R.S., Secretary of the Scottish Meteorological Society, published in 1867 a paper in the Journal of that Society entitled "Interruptions in the regular rise and fall of temperature in the course of the year." Buchan gave six cold periods and three warm periods, based on his examination of the mean daily temperature as recorded at stations in Scotland covering long periods. The cold periods were February 7–14, April 11–14, May 9–14, June 29–July 4, August 6–11, November 6–13, and the warm periods July 12–15, August 12–15, and December 3–14. This early work aroused considerable interest later. It should be noted, however, that Buchan claimed no more than the existence of tendencies for short spells of relatively cold or warm weather to occur at certain times of the year.

In recent years these smaller fluctuations of weather super-imposed on the normal seasonal changes have been examined from the aspect of tendencies to stormy or anticyclonic spells over the British Isles and have been referred to as "singularities." Stormy periods are relatively warm in winter and cool in summer. The following tendencies have been given:—Jan. 5–17 stormy; Jan. 18–24 anticyclonic; Jan. 24–Feb. 1 stormy; Feb. 8–16 anticyclonic; Feb. 21–25 cold; Feb. 26–Mar. 9 stormy; Mar. 12–19 anticyclonic; Mar. 24–31 stormy; April 10–15 stormy; April 23–26 unsettled; June 1–21 summer monsoon; July 10–24 warm; Aug. 20–30 stormy; September 1–17 anticyclonic; Sept. 17–24 stormy; Sept. 24–Oct. 4 anticyclonic; Oct. 5–12 stormy; Oct. 16–20 anticyclonic; Oct. 24–Nov. 13 stormy; Nov. 15–21 anticyclonic; Nov. 24–Dec. 14 stormy; Dec. 18–24 anticyclonic; Dec. 25–Jan. 1 stormy.

It is interesting to compare these generalized statements with the daily values given for Greenwich. The cold or warm spells rarely cover precisely the periods given for the Buchan Spells, but cold or warm spells can be found fairly near to some of these dates.

ZOOLOGICAL SOCIETY OF SCOTLAND, ROYAL, Corstorphine Road, Edinburgh, 12.—*Sec.*, G. D. Fisher.

BRITISH STANDARDS INSTITUTION

British Standards House, 2 Park Street, W.1

The British Standards Institution is recognized as the organization responsible for preparing and publishing voluntary national standards for industrial and consumer products.

The Institution dates from 1901 when the Institutions of Civil, Mechanical and Electrical Engineers together with the Iron and Steel Institute and the Institution of Naval Architects formed a Joint Engineering Standards Committee, which eventually became the British Engineering Standards Association. Between 1923 and 1929 the building, chemical and textile industries joined in the work. In 1929 the organization was incorporated by Royal Charter under the title of "British Standards Institution."

British Standards are arrived at by common consent among authorized representatives of the industries which make and use the materials and goods concerned (mainly the engineering, chemical, building and textile industries). The 300 new and revised British Standards published each year specify agreed manufacturing processes, dimensions, methods of test and analysis, standards of safety and performance, and glossaries of terms.

The Institution has more than 11,000 subscribing members, consisting of public authorities, trade and technical institutions, distributors, manufacturers, engineers and other users.

President, R. E. Huffam, M.C.
Director, H. A. R. Binney, C.B.

WIND FORCE MEASURES

The *Beaufort Scale* of wind force has been accepted internationally and is used in communicating weather conditions. Devised originally by Admiral Sir Francis Beaufort in 1805, it now consists of these numbers 0–17, each representing certain strength or velocity of wind.

Scale No.	*Wind Force*	*M.p.h.*	*Knots*	*Scale No.*	*Wind Force.*	*M.p.h.*	*Knots*
0	Calm	1	1	9	Strong gale	47–54	41–47
1	Light air	1–3	1–3	10	Whole gale	55–63	48–55
2	Slight breeze	4–7	4–6	11	Storm	64–72	56–63
3	Gentle breeze	8–12	7–10	12	Hurricane	73–82	64–71
4	Moderate breeze	13–18	11–16	13	—	83–92	72–80
5	Fresh breeze	19–24	17–21	14	—	93–103	81–89
6	Strong breeze	25–31	22–27	15	—	104–114	90–99
7	High wind	32–38	28–33	16	—	115–125	100–108
8	Gale	39–46	34–40	17	—	126–136	109–118

WOOL FEDERATION, BRITISH, Commerce House, Bradford.—*Sec.*, E. Barlow.

BRITISH EMPLOYERS' CONFEDERATION

36 Smith Square, S.W.1.

The British Employers' Confederation was established in 1919. Its membership consists of 60 national employers' organizations which deal with labour questions in most of the principal industries, other than the nationalized industries.

President, The Lord McCorquodale of Newton, P.C.
Director, Sir George Pollock, Q.C.
Secretaries, F. J. C. Honey, C.B.E.; K. J. Burton.

FEDERATION OF BRITISH INDUSTRIES

21, Tothill Street, S.W.1.

The Federation of British Industries was founded in 1916, and in 1923 was granted a Royal Charter. In the Charter, the F.B.I. is defined as an association of manufacturers founded for the "encouragement, promotion and protection of British industries of all kinds."

The membership consists of individual firms engaged in productive industry (excluding the nationalized industries) and trade associations. More than 7,900 firms and 300 trade associations (representing about 40,000 firms) are members. The Federation has 12 regional and district offices and has representatives in 140 centres overseas.

President, Sir William McFadzean.
Director-General, Sir Norman Kipping.
Secretary, J. Gough.

NATIONAL UNION OF MANUFACTURERS

6, Holborn Viaduct, E.C.1

The National Union of Manufacturers is a national organization representing manufacturing industry. Formed in 1915, its membership (restricted to manufacturers) now totals over 5,000 individual firms with 60 affiliated trade associations. It is regarded both by Government and by industry as the national representative of medium-sized and smaller firms in particular. It has no party-political affiliations. There are branches in London, Birmingham, Manchester, Liverpool, Nottingham, Leeds, Newcastle, Glasgow and Cardiff.

President, Morton Oliphant, M.B.E., T.D.
Director, H. J. Gray, C.M.G.

TRADES UNION CONGRESS (T.U.C.)

Congress House, 23–28 Great Russell Street, W.C.1
[Museum: 4030]

The Trades Union Congress, founded in 1868, is a voluntary association of Trade Unions, the primary purpose of which is to enable the representatives of unions to meet annually to consider matters of common concern to their members. The Congress has met annually since its foundation (with the exception of 1914) and in recent years has met normally on the first Monday in September, its sessions extending through the succeeding four days. Congress is constituted by delegates of the affiliated unions on the basis of one delegate for every 5,000 members, or fraction thereof, on whose behalf affiliation fees are paid. Affiliated unions (in 1959–60) totalled 184 with an aggregate membership of 8,128,446.

The main business of the annual Congress is to consider the report of its General Council dealing with the activities of the Congress year, along with resolutions from affiliated societies on questions of policy and organization. Although 184 trade union organizations are affiliated to Congress, some of these, especially in cotton, are themselves federal bodies including in total 150 more unions. Only three British unions with large membership are not affiliated to the T.U.C.

One of the important responsibilities of the annual Congress is to elect a General Council to keep watch on all industrial movements, legislation affecting labour and all matters touching the interest of the Trade Union Movement, with authority to promote common action on general questions, and to assist Trade Unions in the work of organization. The General Council is elected by Congress and is composed of 25 members (23 representing 18 trade groups and two representing women workers). Following is a list of these trade groups with the aggregate membership of unions in each group (the woman membership included in the total being shown separately), and with the number of representatives each group is entitled to have on the General Council:—

Trade Group (with representation)	Membership	
	Total	Women
Mining and Quarrying (3)	678,621	40
Railways (3)	476,820	27,016
Transport (other) (3)	1,357,478	144,572
Shipbuilding	130,559	—
Engineering, Founding and Vehicle Building (3)	1,540,615	94,226
Iron and Steel and Minor Metal Trades (2)	210,489	6,937
Building, Woodworking and Furnishing (2)	536,987	14,253
Printing and Paper (1)	327,391	74,471
Cotton (2)	123,521	82,758
Textiles (other) (1)	92,927	37,647
Clothing (1)	163,613	126,154
Leather and Boot and Shoe (1)	101,652	42,004
Glass, Pottery, Food, Chemicals, etc. (2)	467,025	201,313
Agriculture (1)	135,000	7,500
Public Employees (1)	278,526	94,776
Civil Service (2)	476,661	153,443
Non-Manual (1)	255,507	72,932
General Workers (3)	775,054	158,687
TOTAL	8,128,446	1,338,729

Among the powers vested in it by consent of the Unions in Congress is the responsibility of adjusting disputes and differences between affiliated organizations; such matters being dealt with by a Disputes Committee of the General Council which investigates matters referred to it and issues its findings thereon, which are invariably accepted by the parties to the dispute. The General Council has power also, if there appears to be justification, to institute an investigation into the conduct of any affiliated organization on the ground that its activities are detrimental to the interests of the Trade Union Movement or contrary to the declared principles and policy of the Congress; but membership of the Congress is voluntary and Unions retain full control of their own affairs, and a penalty of suspension from membership of the Congress or exclusion from membership is the only measure that can be taken to enforce Congress decisions. Through the General Council the Trade Union Movement maintains organic relations with the Government and Government Departments, and with a large number of outside bodies. The principal instrument for Government relations is the National Joint Advisory Council which functions on the Cabinet level; in this body the British Employers' Confederation and the Boards of nationalized industries are represented along with the T.U.C. for purposes of consultation and advice on matters of governmental policy and administration affecting industry. The same bodies, together with the chairmen of the eleven Regional Boards for Industry and representatives of the Federation of British Industries, serve on the National Production Advisory Council on Industry which meets under the chairmanship of the Chancellor of the Exchequer, who is accompanied by Ministers of Departments concerned with aspects of production, to advise the government on production questions. The General Council nominates members to serve on numerous other bodies, *e.g.* Economic Planning Board, the National Savings Committee, National Insurance Advisory Committee, British Productivity Council, Consumers' Councils for the nationalized industries and numerous educational and miscellaneous bodies. Trades Councils and Federations, which are the local agents of the T.U.C., are registered annually and close contact is maintained with them through a Joint Consultative Committee. There are also a number of national advisory bodies for various groups of industries, including the non-manual workers, local Government employees and the nursing profession.

Chairman (1960–61), E. J. Hill.
General Secretary, G. Woodcock, C.B.E.
Assistant Secretary, V. Feather.

SCOTTISH TRADES UNION CONGRESS

12, Woodlands Terrace, Glasgow, C.3.

Chairman (1960–61), E. W. Craig.
General Secretary, G. Middleton, C.B.E.

The Scottish Trades Union Congress was established in 1897 and it is pointed out that it is in no way a competitor of the British Congress, nor does it "justify its existence on strictly nationalist lines." Its objects are parallel to those of the T.U.C., with which it works in the closest co-operation.

In 1960 the Congress had 91 affiliated Unions and 44 Trades Councils with a membership of 776,537. The Annual Congress is held in April and a General Council of twelve members is elected.

TRADE UNIONS

A list of the 184 Trade Unions affiliated to the Trades Union Congress in 1959-60. The number of members of each Union is shown in parenthesis.

ACTORS' EQUITY ASSOCIATION, BRITISH (9,348).—*Sec.*, G. Croasdell, O.B.E., 8 Harley Street, W.1.

AGRICULTURAL WORKERS, NATIONAL UNION OF (135,000).—*Sec.*, H. Collison, 308 Gray's Inn Road, W.C.1.

ASPHALT WORKERS, THE AMALGAMATED UNION OF (2,500).—*Sec.*, F. V. Jenkin, 82 Newington Causeway, S.E.1.

ASSURANCE WORKERS, NATIONAL AMALGAMATED UNION OF LIFE (2,485).—*Sec.*, F. Crump, 11 Mauldeth Road, Withington, Manchester, 20.

BAKERS, CONFECTIONERS AND ALLIED WORKERS, AMALGAMATED UNION OF OPERATIVE (26,337).—*Gen. Sec.*, A. E. Halliday, 8 Guilford Street, W.C.1.

BAKERS AND ALLIED WORKERS, SCOTTISH UNION OF (14,147).—*Sec.*, W. Mowbray, Baxterlee, 127 Fergus Drive, Glasgow, N.W.

BAKERS' UNION, LONDON JEWISH (57), 13 Sylvester Path, E.8.—*Sec.*, Miss R. Brooks.

BANK EMPLOYEES, NATIONAL UNION OF (50,333).—*Gen. Sec.*, J. L. Hornby, 28 Old Queen Street, S.W.1.

BASKET, CANE, WICKER AND FIBRE FURNITURE MAKERS OF GREAT BRITAIN AND IRELAND, NATIONAL UNION OF (126).—*Sec.*, T. Burrows, 9 District Road, Wembley, Middlesex.

BEAMERS, TWISTERS AND DRAWERS (HAND AND MACHINE), AMALGAMATED ASSOCIATION OF (3,226).—*Sec.*, H. Earnshaw, O.B.E., 21 Clayton Street, Blackburn.

BLACKSMITHS, FARRIERS AND AGRICULTURAL ENGINEERS, AMALGAMATED SOCIETY OF (274).—*Sec.*, H. E. Cooper, 42 Court Road, Wolverhampton.

BLACKSMITHS' FORGE AND SMITHY WORKERS' SOCIETY, ASSOCIATED (10,288).—*Sec.*, W. J. Michael, 177 Hill Street, Glasgow, C.3.

BLASTFURNACEMEN, ORE MINERS, COKE WORKERS AND KINDRED TRADES, THE NATIONAL UNION OF (22,282).—*Sec.*, J. O'Hagan, O.B.E., 93 Borough Road West, Middlesbrough.

BLIND OF GREAT BRITAIN AND IRELAND, NATIONAL LEAGUE OF THE (5,056).—*Sec.*, T. H. Smith, M.B.E., 262 Langham Road, N.15.

BOILERMAKERS, SHIPBUILDERS AND STRUCTURAL WORKERS, UNITED SOCIETY OF (95,429).—*Gen. Sec.*, E. J. Hill, Lifton House, Eslington Road, Newcastle upon Tyne, 2.

BOOT AND SHOE OPERATIVES, NATIONAL UNION OF (77,743).—*Gen. Sec.*, R. Gregson, The Grange, Earls Barton, Northampton.

BOOT, SHOE AND SLIPPER OPERATIVES, ROSSENDALE UNION OF (7,173).—*Sec.*, R. Driver, 7 Tenterfield Street, Waterfoot, Rossendale, Lancs.

BRASSTURNERS, FITTERS, FINISHERS AND INSTRUMENT MAKERS' ASSOCIATION, SCOTTISH (1,276).—*Gen. Sec.*, R. Harkess, M.B.E., 221 West George Street, Glasgow, C.3.

BRASSWORKERS, AMALGAMATED SOCIETY OF (295).—*Sec.*, V. M. Robus, 347 Garratt Lane, S.W.18.

BRITISH AIR LINE PILOTS ASSOCIATION (2,200).—*Gen. Sec.*, D. Follows, M.B.E., 81 New Road, Harlington, Hayes, Middlesex.

BRUSHMAKERS, NATIONAL SOCIETY OF (2,100).—*Sec.*, T. B. Thomas, 77 Kingsland Road, E.2.

BUILDING TECHNICIANS, ASSOCIATION OF (2,000).—*Sec.*, F. E. Shrosbree, 156 Waterloo Road, S.E.1.

BUILDING TRADE WORKERS OF GREAT BRITAIN AND IRELAND, AMALGAMATED UNION OF (83,233).—*Sec.*, G. H. Lowthian, M.B.E., "The Builders." Crescent Lane, Clapham Common, S.W.4.

CARD, BLOWING AND RING ROOM OPERATIVES, THE NATIONAL ASSOCIATION OF (41,691).—*Sec.*, Sir Alfred Roberts, C.B.E., 81 Fountain Street, Manchester, 2.

CARD SETTING MACHINE TENTERS' SOCIETY (278).—*Sec.*, R. Ashton, 326 Gibbet Street, Halifax, Yorks.

CARPET TRADES UNION, NORTHERN (1,003).—*Sec.*, Miss H. D. Pickles, 9 St. James Street, Halifax, Yorks.

CHAIN MAKERS AND STRIKERS ASSOCIATION (579).—*Sec.*, A. E. Head, M.B.E., Unity Villa, Sidney Road, Cradley Heath, Staffs.

CHEMICAL WORKERS' UNION (17,050).—*Sec.*, R. J. Edwards, M.P., 155 Kennington Park Road, S.E.11.

CIGARETTE MACHINE OPERATORS' SOCIETY (451).—R. E. Williams, 3 Mascot Road, Bedminister, Bristol 3.

CINEMATOGRAPH, TELEVISION AND ALLIED TECHNICIANS, ASSOCIATION OF (8,149).—*Sec.*, G. H. Elvin, 2 Soho Square, W.1.

CIVIL SERVICE CLERICAL ASSOCIATION (141,239).—*Sec.*, G. F. Green, 2 Upper Belgrave Street, S.W.1.

CIVIL SERVICE UNION (24,355).—*Sec.*, G. V. Carvell, 17-21 Hatton Wall, E.C.1.

CLERICAL AND ADMINISTRATIVE WORKERS' UNION (52,290).—*Sec.*, Miss B. A. Godwin, O.B.E., 73 St. George's Square, S.W.1.

CLOTH PRESSERS' SOCIETY (130).—*Sec.*, D. Berry, 106 Church Lane, Moldgreen, Huddersfield.

COAL TRIMMERS' UNION, CARDIFF, PENARTH AND BARRY (187).—*Sec.*, A. W. Loxton, 13 Bute Crescent, Cardiff.

COLLIERY OVERMEN, DEPUTIES AND SHOTFIRERS, NATIONAL ASSOCIATION OF (37,293).—*Sec.*, J. Crawford, Argyle House, 29-31 Euston Road, N.W.1.

INDUSTRIAL RESEARCH ASSOCIATIONS

A notable development in modern industry is the growth in numbers and importance of Industrial Research Associations and their increasing influence on the scientific and economic life of the country. The total expenditure of these Associations in 1958 was about £6,300,000 per annum, of which £1,650,000 was provided by the Department of Scientific and Industrial Research and the remainder by subscriptions of individual members.

The Government Scheme for Co-operative Industrial Research was launched by the Department of Scientific and Industrial Research in 1913. Its aim was to stimulate the industries of the United Kingdom to undertake co-operative research as a means of increasing their efficiency.

Research Associations formed under this scheme are registered companies, limited by guarantee of a nominal sum and working without the division of profits in the form of dividends. To assist the formation of such Associations the Board of Trade and the Department of Scientific and Industrial Research have drawn up a model Memorandum and Articles of Association, to which Research Associations under the scheme conform in all essential points.

The income of the Research Associations is derived from subscriptions from their individual members, supplemented in most cases by substantial grants from the Government, through the Department of Scientific and Industrial Research.

The Research Associations are autonomous bodies free to determine their own policy for the development of their research programmes and the use to be made of the results of their research. Membership is open to any British firm in the particular industry, subject to the approval of the Councils of the Research Associations.

There are now 42 Research Associations and 9 other organizations in receipt of grants from the Department. They cover most of the principal industries of the country, as follows:—

Baking.

BRITISH BAKING INDUSTRIES RESEARCH ASSOCIATION, Baking Industries Research Station, Chorleywood, Herts.—*Dir.*, G. A. H. Elton, D.Sc., Ph.D.

Boots and Shoes.

BRITISH BOOT, SHOE AND ALLIED TRADES RESEARCH ASSOCIATION, Satra House, Rockingham Rd., Kettering.—*Dir.*, H. Bradley, C.B.E.

Brushes.

BRITISH BRUSH MANUFACTURERS' RESEARCH ASSOCIATION, 80 Coleman Street, E.C.2.—*Dir.*, F. Kidd.

Cast Iron.

BRITISH CAST IRON RESEARCH ASSOCIATION, Bordesley Hall, Alvechurch, Birmingham.—*Dir.*, H. Morrogh.

Ceramics.

BRITISH CERAMIC RESEARCH ASSOCIATION, Queen's Road, Penkhull, Stoke-on-Trent.—*Dir.*, N. F. Astbury, Sc.D.

Coal Utilization.

BRITISH COAL UTILISATION RESEARCH ASSOCIATION, Randalls Rd., Leatherhead, Surrey.—*Dir.-Gen.*, D. T. A. Townend, C.B.E., D.Sc., Ph.D.

Coke.

BRITISH COKE RESEARCH ASSOCIATION, Coke Research Centre, Chesterfield.—*Dir.*, G. W. Lee.

Cotton.

BRITISH COTTON INDUSTRY RESEARCH ASSOCIATION, Shirley Institute, Didsbury, Manchester, 20.—*Dir*, D. W. Hill, D.Sc., Ph.D.

Cutlery.

CUTLERY RESEARCH COUNCIL, Hoyle Street, Sheffield, 3.—*Superintendent of Research*, E. A. Oldfield.

Electrical.

BRITISH ELECTRICAL AND ALLIED INDUSTRIES RESEARCH ASSOCIATION, Cleeve Road, Leatherhead, Surrey.—*Dir.*, H. G. Taylor, D.Sc.

Felt.

BRITISH HAT AND ALLIED FELTMAKERS RESEARCH ASSOCIATION, Stanley House, Manchester Rd., Fairfield, Droylsden, Manchester.—*Dir.*, T. Barr, Ph.D.

Files.

FILE RESEARCH COUNCIL, Hoyle Street, Sheffield, 3.—*Consultant*, J. Pearson, Ph.D.

Flour Milling.

RESEARCH ASSOCIATION OF BRITISH FLOUR-MILLERS, Cereals Research Station, Old London Road, St. Albans, Herts.—*Dir.*, T. Moran, C.B.E., D.Sc., Ph.D.

Food Manufacturing.

BRITISH FOOD MANUFACTURING INDUSTRIES RESEARCH ASSOCIATION, Randalls Road, Leatherhead, Surrey.—*Dir.*, F. H. Banfield, Ph.D.

Fruit and Vegetable Canning.

FRUIT AND VEGETABLE CANNING AND QUICK FREEZING RESEARCH ASSOCIATION, Chipping Campden, Glos.—*Dir.*, W. B. Adam.

Furniture.

RESEARCH AND INFORMATION COMMITTEE OF THE FURNITURE DEVELOPMENT COUNCIL, 11 Adelphi Terrace, Robert Street, W.C.2.—*Dir.*, J. C. Pritchard, O.B.E.

Gelatine and Glue.

BRITISH GELATINE AND GLUE RESEARCH ASSOCIATION, 22 Dalmeny Avenue, Holloway, N.7.—*Dir.*, D. A. Sutton, Ph.D.

Glass.

BRITISH GLASS INDUSTRY RESEARCH ASSOCIATION, Elmfield, Northumberland Road, Sheffield, 10.—*Dir.*, R. G. Newton, Ph.D.

Heating and Ventilating.

HEATING AND VENTILATING RESEARCH ASSOCIATION, Old Bracknell Lane, Bracknell, Berks.—*Dir.*, N. S. Billington.

Hosiery.

HOSIERY AND ALLIED TRADES RESEARCH ASSOCIATION, Thorneywood, Gregory Boulevard, Nottingham.—*Dir.*, W. A. Dutton.

Hydromechanics.

BRITISH HYDROMECHANICS RESEARCH ASSOCIATION, South Road, Temple Fields, Harlow, Essex.—*Dir.*, L. E. Prosser.

I.C. Engines.

BRITISH INTERNAL COMBUSTION ENGINE RESEARCH ASSOCIATION, 111–112 Buckingham Avenue, Trading Estate, Slough.—*Dir.*, W. P. Mansfield, Ph.D.

Iron and Steel.

BRITISH IRON AND STEEL RESEARCH ASSOCIATION, 11 Park Lane, W.1.—*Dir.*, Sir Charles Goodeve, O.B.E., D.Sc., F.R.S.

Jute.

BRITISH JUTE TRADE RESEARCH ASSOCIATION, Kinnoull Road, Kingsway West, Dundee, Scotland.—*Dir.*, H. P. Stout, Ph.D.

Lace.

LACE RESEARCH ASSOCIATION, Glaisdale Drive West, Bilborough, Nottingham.—*Dir.*, John C. MacCallum, O.B.E.

Laundering.

BRITISH LAUNDERERS' RESEARCH ASSOCIATION, The Laboratories, Hill View Gardens, Hendon, N.W.4.—*Dir.*, J. Leicester.

Leather.

BRITISH LEATHER MANUFACTURERS' RESEARCH ASSOCIATION, Milton Park, Egham, Surrey.—*Dir.*, K. W. Pepper D.Sc.

Lime.

CHALK LIME AND ALLIED INDUSTRIES RESEARCH ASSOCIATION, Laboratories, Church Street, Welwyn, Herts.—*Dir.*, G. E. Bessey.

Linen.

LINEN INDUSTRY RESEARCH ASSOCIATION, Research Institute, Lambeg, Lisburn, Co. Antrim.—*Dir.*, D. A. Derrett-Smith.

Marine Engineering.

PARSONS AND MARINE ENGINEERING TURBINE RESEARCH AND DEVELOPMENT ASSOCIATION, Pametrada Research Station, Wallsend, Northumberland.—*Dir.*, T. W. F. Brown, C.B.E., D.Sc.

Motor Vehicles

MOTOR INDUSTRY RESEARCH ASSOCIATION, Lindley, nr. Nuneaton, Warwickshire.—*Dir.*, A. Fogg, D.Sc.

Non-Ferrous Metals.

BRITISH NON-FERROUS METALS RESEARCH ASSOCIATION, Euston Street, N.W.1.—*Dir.*, G. L. Bailey, C.B.E.

Paint.

RESEARCH ASSOCIATION OF BRITISH PAINT, COLOUR AND VARNISH MANUFACTURERS, Paint Research Station, Waldegrave Road, Teddington, Middlesex.—*Dir.*, L. A. Jordan, C.B.E., D.Sc.

Paper.

BRITISH PAPER AND BOARD INDUSTRY RESEARCH ASSOCIATION, St. Winfred's Laboratories, Welcomes Road, Kenley, Surrey.—*Dir.*, N. R. Hood, Ph.D.

Printing and Packaging.

PRINTING, PACKAGING AND ALLIED TRADES RESEARCH ASSOCIATION, Patra House, Randalls Road, Leatherhead, Surrey.—*Dir.*, V. G. W. Harrison, Ph.D.

Production Engineering.

PRODUCTION ENGINEERING RESEARCH ASSOCIATION OF GREAT BRITAIN, Melton Mowbray, Leics.—*Dir.*, D. F. Galloway, Ph.D.

Rayon.

BRITISH RAYON RESEARCH ASSOCIATION, Heald Green Laboratories, Wythenshawe, Manchester, 22.—*Dir.*, L. A. Wiseman.

Rubber.

RESEARCH ASSOCIATION OF BRITISH RUBBER MANUFACTURERS, Shawbury, Shrewsbury, Shropshire.—*Dir.*, W. F. Watson, D.Sc., Ph.D.

Scientific Instruments.

BRITISH SCIENTIFIC INSTRUMENT RESEARCH ASSOCIATION, South Hill, Chislehurst, Kent.—*Dir.*, J. Thomson, D.Sc., Ph.D.

Shipbuilding.

BRITISH SHIPBUILDING RESEARCH ASSOCIATION, 5 Chesterfield Gardens, Curzon Street, W.1.—*Dir.*, Sir Victor Shepheard, K.C.B.

Springs.

COIL SPRING FEDERATION RESEARCH ORGANISATION, Doncaster Street, Sheffield, 3.—*Dir.*, R. Haynes.

Steel Castings.

BRITISH STEEL CASTINGS RESEARCH ASSOCIATION, East Bank Road, Sheffield, 2.—*Dir.*, A. H. Sully, Ph.D.

Tar.

COAL TAR RESEARCH ASSOCIATION, Oxford Road, Gomersal, nr. Leeds.—*Dir.*, D. McNeil, Ph.D.

Timber.

RESEARCH AND DEVELOPMENT COMMITTEE OF THE TIMBER DEVELOPMENT ASSOCIATION, 21 College Hill, E.C.4.—*Dir.*, P. O. Reece.

Water.

WATER RESEARCH ASSOCIATION, 18 Linkfield Lane, Redhill, Surrey.—*Dir.*, R. G. Allen, Ph.D.

Welding.

BRITISH WELDING RESEARCH ASSOCIATION, 29 Fitzroy Square, W.1.—*Dir.*, R. Weck, Ph.D.

Whiting.

RESEARCH COUNCIL OF THE BRITISH WHITING FEDERATION, The Hall, 30 Church Street, Welwyn, Herts.—*Dir.*, D. C. Soul.

Wool.

WOOL INDUSTRIES RESEARCH ASSOCIATION, Torridon, Headingley Lane, Leeds, 6.—*Dir.*, A. B. D. Cassie, C.B.E., D.Sc., Ph.D.

AGRICULTURAL RESEARCH INSTITUTES AND UNITS

The following research institutes are under the direct control of the Agricultural Research Council (*see* p. 357):—

Field Station, Compton, near Newbury, Berks.—*Director*, W. S. Gordon, C.B.E., Ph.D., M.R.C.V.S., F.R.S.E.

Unit of Insect Physiology, Department of Zoology, Cambridge.—*Director*, Prof. V. B. Wigglesworth, C.B.E., M.D., F.R.S.

Institute of Animal Physiology, Babraham Hall, Babraham, Cambs.—*Director*, J. H. Gaddum, M.A., Sc.D., M.R.C.S., L.R.C.P., F.R.S.

Animal Breeding Research Organisation, Glenbourne, 6 South Oswald Road, Edinburgh, 9.—*Director*, H. P. Donald, D.Sc., Ph.D., F.R.S.E.

Poultry Research Centre, King's Buildings, West Mains Road, Edinburgh, 9.—*Director*, A. W. Greenwood, C.B.E. D.Sc., Ph.D., F.R.S.E.

Unit of Experimental Agronomy, Department of Agriculture, University of Oxford.—*Hon. Director*, Prof. G. E. Blackman, F.R.S.

Unit of Biometrical Genetics, Department of Genetics, University of Birmingham.—*Hon. Director*, Prof. K. Mather, C.B.E., D.Sc., Ph.D., F.R.S.

Unit of Microbiology, Department of Microbiology, The University, Sheffield, 10.—*Hon. Director*, Prof. S. R. Elsden, Ph.D.

Unit of Soil Physics, School of Agriculture Cambridge.—*Director*, E. C. Childs, Sc.D., Ph.D.

Unit of Embryology, Univ. College of N. Wales, Bangor.—*Hon. Director*, Prof. F. W. Rogers Brambell, D.Sc., Ph.D., F.R.S.

Unit of Statistics, University of Aberdeen.—*Director*, D. J. Finney, Sc.D., F.R.S., F.R.S.E.

Statistics Service, School of Agriculture, Cambridge.—*Officer-in-Charge*, R. C. Campbell, M.A., Ph.D.

Unit of Reproductive Physiology and Biochemistry, Molteno Institute, Cambridge.—*Director*, T. R. R. Mann, M.D., Sc.D., Ph.D., F.R.S.

Unit of Animal Genetics, University of Edinburgh, King's Buildings, West Mains Road, Edinburgh, 9.—*Hon. Director*, Prof. C. H. Waddington, C.B.E., Sc.D., F.R.S.

Radiobiological Laboratory, Letcombe Regis, Wantage, Berks.—*Director*, R. Scott Russell, M.Sc., Ph.D.

Unit on Plant Growth Substances and Systemic Fungicides, Wye College, Ashford, Kent.—*Hon. Director*, Prof. R. L. Wain, D.Sc., Ph.D.

Virus Research Unit, Huntingdon Road, Cambridge.—*Director*, R. Markham, M.A., Ph.D., F.R.S.

Ditton Laboratory, Larkfield, Maidstone.—*Director*, R. G. Tomkins, M.A., Ph.D.

Covent Garden Laboratory, Inveresk House, 346 Strand, W.C.1.—*Officer-in-Charge*, J. C. Fidler, Ph.D.

Low Temperature Research Station, Downing Street, Cambridge.—*Director*, E. Bate-Smith, M.Sc., Ph.D.

Pest Infestation Laboratory, London Road, Slough, Bucks.—*Director*, G. V. B. Herford, C.B.E., M.Sc.

Unit of Plant Physiology, Imperial College of Science and Technology, Prince Consort Road, S.W.7.—*Director*, Prof. Helen K. Porter, D.Sc., F.R.S.

Unit of Plant Morphogenesis and Nutrition, Rothamsted Experimental Station, Harpenden, Herts.—*Director*, F. J. Richards, D.Sc., F.R.S.

Weed Research Organization, Begbroke Hill, Kidlington, nr. Oxford.—*Director*, E. K. Woodford, O.B.E., M.Sc., Ph.D.

GRANT-AIDED RESEARCH INSTITUTES

In addition to the above there are other institutes which, while retaining their own individuality, are financed wholly or in the main by grants made by the Agricultural Departments. Most of these Institutes have governing bodies of their own to which they are directly responsible. The maintenance grants for Institutes in England and Wales are met from funds voted by Parliament and administered by the Agricultural Research Council; the Scottish Institutes are borne on the vote of the Department of Agriculture for Scotland. These Departments seek the advice of the Agricultural Research Council in the consideration of research programmes and estimates.

(a) Research affecting Plants and Soils

Soil Science and Plant Pathology

Rothamsted Experimental Station, Harpenden, Herts.—*Director*, F. C. Bawden, M.A., F.R.S.

Macaulay Institute for Soil Research, Craigiebuckler, Aberdeen.—*Director*, Prof. A. B. Stewart, M.A., B.Sc., Ph.D., F.R.I.C.

Plant Breeding

Hop Research Centre, Wye College, Ashford, Kent.—*Officer-in-Charge*, H. S. Darling, B.Sc.

Plant Breeding Institute, Maris Lane, Trumpington, Cambridge.—*Director*, G. D. H. Bell, Ph.D.

Welsh Plant Breeding Station, Plas Gogerddan, Nr. Aberystwyth.—*Director*, Prof. P. T. Thomas, B.Sc., Ph.D.

Scottish Plant Breeding Station, Pentlandfield, Roslin, Midlothian.—*Director*, J. W. Gregor, D.Sc., Ph.D., F.L.S.

Horticulture

John Innes Horticultural Institution, Bayfordbury, Hertford.—*Director*, K. S. Dodds, D.Sc., Ph.D.

East Malling Research Station, Nr. Maidstone, Kent.—*Director*, F. R. Tubbs, C.B.E., Ph.D.

Agricultural and Horticultural Research Station, Long Ashton, Bristol.—*Director*, Prof. H. G. H. Kearns, O.B.E., B.Sc., Ph.D.

Scottish Horticultural Research Institute, Mylnefield, Invergowrie, Dundee.—*Director*, T. Swarbrick, M.Sc., Ph.D.

Vegetables

National Vegetable Research Station, Wellesbourne, Warwickshire.—*Director*, J. Philp, Ph.D., F.L.S.

Grassland

Grassland Research Institute, Hurley, nr. Maidenhead, Berks.—*Director*, William Davies, D.Sc.

Glasshouse Crops

Glasshouse Crops Research Institute, Worthing Road, Rustington, Littlehampton, Sussex.—*Director*, F. W. Toovey, O.B.E.

Crop Variety Testing, Seed Testing and Seed Production

National Institute of Agricultural Botany, Huntingdon Road, Cambridge.—*Director*, F. R. Horne, C.B.E.

(b) Research affecting Animals

Animal Diseases

Animal Diseases Research Association, Moredun Institute, Gilmerton, Edinburgh, 9.—*Director*, J. T. Stamp, D.Sc., M.R.C.V.S., F.R.S.E.

Research Institute (Animal Virus Diseases), Pirbright, Surrey.—*Director*, I. A. Galloway, D.Sc., M.R.C.V.S.

Hill Farming

Hill Farming Research Organisation, 48 Palmerston Place, Edinburgh, 12.—*Director*, A. R. Wannop, O.B.E., F.R.S.E.

Dairying

National Institute for Research in Dairying, Shinfield, nr. Reading.—*Director*, Prof. R. G. Baskett, O.B.E., M.Sc.

Hannah Dairy Research Institute, Kirkhill, Ayr.—*Director*, J. A. B. Smith, C.B.E., D.Sc., Ph.D., F.R.S.E.

Nutrition

Rowett Research Institute, Bucksburn, Aberdeen.—*Director*, D. P. Cuthbertson, C.B.E., M.D., D.Sc., F.R.S.E.

Poultry

Houghton Poultry Research Station,* Houghton Grange, Huntingdon.—*Director*, R. F. Gordon, D.Sc., M.R.C.V.S.

(c) Research on Agricultural Engineering

National Institute of Agricultural Engineering, Wrest Park, Silsoe, Beds.—*Director*, W. H. Cashmore, C.B.E.

National Institute of Agricultural Engineering, Scottish Station, Howden, Mid-Calder, Midlothian.—*Director*, W. J. West.

* Financed jointly by the Agricultural Research Council and the Animal Health Trust.

PRINCIPAL LAND AREAS OF THE WORLD BELOW SEA LEVEL

(With approx. greatest depth in feet below Mean Sea Level.)

Europe: Netherlands coastal areas (15).
Asia: Jordan Valley, Dead Sea (1290).*
China: Sinkiang, Turfan Basin (980).
U.S.S.R.–Persia: Caspian Sea (85).*
Arabia: Trucial Oman-Qatar (70).
Africa: Libyan Desert Depressions:—
Qattara (440), Faiyum (150).
Wadi Rayan (140), Sittra (110).
Africa: Libyan Desert Depressions (*continued*) —
Areg (80), Wadi Natrun (75).
Melfa (60), Siwa (55), Bahrein (50).
Eritrea: Salt Plains depression (385).
Algeria–Tunisia: Shott Melghir and El Gharsa (90).*
America: Death Valley (275), Salton Sea (245).
Australia: Lake Eyre (40).

* Water surface.

PRINCIPAL BANKS OPERATING IN THE BRITISH COMMONWEALTH

* *Clearing Bankers.* ‡ *Army Agents.*

London Banking Hours are 10 a.m. to 3 p.m. (Saturdays 9.30 a.m. to 12 noon).

ALEXANDERS DISCOUNT CO., LTD. (1810), 24 Lombard St., E.C.3.—Capital, authorized. £2,600,000. Issued, £200,000 in £2 (fully-paid 6 p.c.) Cumulative Preference Shares, £2,400,000 £1 Ordinary Shares, fully paid; Reserves £2,247,000; Deposits, £123,264,587; Dividend, 1959, 6 p.c. on Cumulative Preference Shares; 10 p.c. on Ordinary Shares.

ALLAHABAD BANK, LTD. (1865), *Calcutta*, India, Affiliated to The Chartered Bank.—Capital, authorized, Rs. 1,00,00,000. Issued and subscribed—45,000 Ordinary Shares of Rs.100 each, 16,000 fully paid, 29,000 Rs. 50, paid; 15,000 6 p.c. Preference Shares of Rs. 100 each, fully paid; Reserve Fund, Rs. 1,08,00,000. Deposits, 31/12/59, Rs. 50,12,66,576. Dividend for 50 years to December 31, 1959, 12 p.c. and bonus 6 p.c. on Ordinary Shares (82 Branches).

THE AMERICAN EXPRESS CO. Inc. The Subsidiary of American Express Co., New York (1868), 65 Broadway, *New York*, U.S.A.; 6 Haymarket, S.W.1.—Capital, $6.000,000 (Shares fully paid).

SAVINGS BANKS

Post Office Savings Banks.—On Dec. 31, 1959, there were approximately 22,941,000 active deposit accounts in the *Post Office Savings Bank*, with the sum of £1,678,976,000 due to depositors. On December 31, 1959, Government Stock and Bonds to the amount of £933,089,000 stood to the credit of holders in the Post Office Savings Bank Section of the Post Office Register. Interest on Post Office Savings Bank deposits is allowed at 2½ per cent. per annum. A depositor may have more than one account but may not deposit more than a total of £5,000 in all accounts in his name.

In 1958 the *Average Amount due to each Depositor* in Active Accounts was £73 11*s.* 6*d.*

TRUSTEE SAVINGS BANKS

Trustee Savings Banks were started in the early years of the 19th century by public-spirited men who recognized the importance of individual thrift to the well-being of the community.

On Nov. 20, 1958 there were 8,919,148 active accounts in the Trustee Savings Banks. The total assets of the Banks amounted to £1,426,489,493 which comprised £1,239,114,219 due to depositors in the Ordinary and Special Investment Departments, £166,182,017 Stocks and Bonds held for depositors and £21,192,757 representing the accumulated surplus of the individual Trustee Savings Banks throughout the country. Information about these Banks and their offices, numbering 1,335 (principal and subordinate) in November, 1959, can be obtained from the *Trustee Savings Bank Association*, 22 Manchester Square, W.1. —*Chairman*, Sir Kenneth Stewart, Bt., G.B.E.; *Secretary*, R. T. H. Scott, M.B.E.

PREMIUM SAVINGS BONDS

A scheme to attract further savings in the United Kingdom was launched by the Chancellor of the Exchequer on November 1, 1956. £1 Premium Savings Bonds are sold by Post Offices, Banks and Trustee Savings Banks up to a maximum value of £500 to individuals. They may not be held by institutions. Group schemes for the purchase of bonds in industrial organizations are promoted by the National Savings Committee. Premium Bonds bear no interest but after six months are included monthly in a draw for money prizes of £1,000, £500, £250, £100, £50 and £25. Numbers are selected by an electronic random number indicator ("Ernie"), winning numbers being published in the press. In the first five months of currency, £66,633,850 was invested by the public. Total investment rose to £303,000,000 by the end of May, 1960. Repayments over the same period totalled £42,000,000.

Prizes.—By June 1, 1960, 541,243 prizes worth £22,720,200 had been paid out. Prizes of £1,000, 2,255; of £500, 4,510; of £250, 9,020; of £100, 22,550; £50, 45,100 and of £25, 457,808, £850,825 was available for distribution as prizes on June 1, 1960.

Series "B".—Brief details of Series "B" Premium Savings Bonds (available from August, 1960) are: Maximum holding, 800 units (£800); waiting period, 3 clear months; Increased number of prizes ranging from £5,000 to £25; Series "B" Bonds eligible for inclusion in one draw following date of death of holder. Terms of Series "B" Bonds apply to Series "A" Bonds as from Nov. 1, 1960.

LIFE ASSURANCE AND FIRE AND GENERAL INSURANCE

LIFE ASSURANCE

THE list on the following two pages contains the names of all the more important British Life offices, and of Commonwealth companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked (O) in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. Those having an Industrial branch are indicated by letter (I).

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended December 31, 1959.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risks.

EXPENSES.—The expenses of a Life office include in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 16½%, of which about 5½% is expended on commission and 11% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policy holder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is before deduction of Income Tax except where marked (N)—net.

VALUATIONS.—The last columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, the most used being known as the A. 1924-29. If a company assumes that it will earn a high rate of interest in the future the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater The lower the rate of interest assumed the more stringent is the valuation. The foregoing remarks, however, do not apply in the case of an office which has adopted a Bonus Reserve Valuation.

FIRE INSURANCE RATES

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity 1s. 6d.

Household goods therein, usually 2s.

A number of companies issue "comprehensive" policies embracing in one contract all risks incidental to private houses and contents.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from 2s.

Stock and Utensils in trade fixtures, and household furniture in such shops and warehouses, from 2s.

Most fire insurance companies transact accident (including Motor) and miscellaneous business, and if a strong company be selected it will probably be found to the advantage of an insurer that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. The "comprehensive" policies, previously referred to, combine in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, etc., and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of 5s. per £100 of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

NOTE.—As Insurance is highly technical, particularly where business risks are involved, the advice and assistance of a qualified Insurance Broker can be utilized with considerable advantage.

C—Commonwealth Office. † 1958 figures

* Avon-Life Dept., est. Jan. 1954.

* Eagle Star—Including funds of acquired businesses.

* Ecclesiastical—Year ending Feb. 28, 1960.

* Friends Prov. & Cent.—Discounting 2½% net prems.

* Midland Employers—Life Dept., est. Jan. 1947.

* Migdal—Established in U.K.—1949.

* Nat. Mut. of Austrl. Year ending Sept. 30, 1959.

* Pioneer—Year ending March 31, 1960.

* Royal—Including figures of associated Co.—The Liverpool, London & Globe.

* Sentinel—Year ending March 31, 1959.

* Standard—Year ending Nov. 15, 1959.

* Sun Life of Canada—Company now owned entirely by Policyholders.

* Western Australian—Year ending June 30, 1959.

LIFE ASSURANCES IN FORCE

British Life Assurance Statistics show that 9,130,000 ordinary life assurances, to the amount of £7,216,000,000 were in force at the end of 1958, with total yearly premiums of £238,000,000.

The Annuity is calculated as payable half-yearly.

* NOTE.—The Valuation period is for the 5 years ending in December of the year stated, unless otherwise marked.

A.—Annual Valuation.

Atlas.—Three years ending December 31, 1958.

Avon—First quinquennial Valuation.

Beacon—Three years ending December 31, 1959.

Caledonian.—Three years ending December 31, 1959.

Clerical, Medl. and Genl.—Rates of bonus apply only to Policies effected since 1st Jan. 1946.

Ecclesiastical.—Five years ending February 28, 1959.

Equity and Law.—Three years ending December 31, 1958. Further revisionary bonus on existing bonus additions.

Ideal Life.—Three years ending December 31, 1959.

Life Association of Scotland.—Three years ending December 31, 1957.

Liverpool Victoria.—Three years ending December 31, 1956.

National Mutual.—Two years ending December 31, 1958.

National Mutual of Australasia.—One year ending Sept. 30, 1959.

National Provident.—Three years ending December 31, 1957.

Pioneer.—One year ending March 31, 1960

Royal Exchange.—Three years ending December 31, 1957.

Scottish Widows.—Plus special additions.

Scottish Mutual.—Three years ending December 31, 1958.

Standard.—Three years ending Nov. 15, 1958. Plus special additions.

Sun Life.—Three years ending December 31, 1957.

United Kingdom.—Three years ending December 31, 1959.

Western Australian.—Five years ending June 30, 1958.

Yorkshire.—Three years ending December 31, 1957.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE

Life assurance may be effected either with or without participation in profits. If with participation then a higher premium is charged and the Policy is entitled to a Bonus, which is a share in the profits made by the Office, as and when declared. Valuations are made by Offices at periods varying from one to five years and the rate of Bonus then declared is usually in respect of each year since the previous valuation. These Bonuses are normally payable with the Sum Assured for their full amount, but, if desired, they can be applied to reduce the premium or surrendered for a cash payment. If a Policy is effected without participation the Sum Assured only is payable.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100

Age at Entry	With Profits	Without Profits	Age at Entry	With Profits	Without Profits	Age at Entry	With Profits	Without Profits
	£ s. d.	£ s. d.		£ s. d.	£ s. d.		£ s. d.	£ s. d.

30	2 8 7	1 13 1	40	3 3 10	2 6 6	60	6 13 11	5 10 5

The next table shows the annual premiums payable throughout life [with some Offices premiums cease at age 85] for a policy of £100 payable at death, with and without profits. It is not sufficient to judge a life office by premium rates only. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation bonuses, especially in cases of endowment assurance. A without profit Insurance provides the maximum amount of cover at the lowest cost and if an Office, as in some cases, is prepared to allow the option of converting the Insurance at any time to "with" profits either for whole of Life or on the Endowment plan, this gives an attractive contract. The change would, of course, entail a higher premium being paid but under this arrangement the highest cover can be obtained in the early years and the alteration made when the increased cost can be met.

ANNUAL PREMIUMS FOR ASSURANCE OF £100 PAYABLE AT DEATH.

Endowment Assurances.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realization of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-earning capacity—*see* first page of Life Assurance.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death together with any Bonuses attaching under a " with profit " Policy.

The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £100 at the end of 15, 20 and 25 years, or at death, if previous, with profits.

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100, WITH PROFITS

MALE LIVES

Co-operative Societies—Great Britain

Industrial and Provident Societies Acts, 1893–1954

During the 10 years ended 1959 Co-operative Retail Trading Societies (almost all General Supply Stores) expanded their membership by 23 per cent. and assets by 17 per cent. as shown by the following particulars covering the 982 societies on the register at the end of 1959 and 1,115 societies in 1949:

Year	Number of Members	Share Capital	Sales	Surplus on Year's Working	Interest on Shares	Dividends on Sales	Total Assets
		£000's	£000's	£000's	£000's	£000's	£000's
1959	12,585,000	252,932	998,936	63,909	7,414	49,108	470,053
1949	10,253,000	237,127	534,447	47,529	6,336	36,503	398,575

In addition, 161 Co-operative Wholesale and Productive Trading Societies (with a total membership of 54,000) were on the register at the end of 1959. The total figures for these societies are dominated by those of the two main Wholesale Trading Societies (with their "Joint" undertaking) whose combined sales for 1959 amounted to £559,000,000, their assets at the end of the year totalling £187,000,000.

Friendly Societies—Great Britain

Acts 1896–1958

In spite of the expansion of *Compulsory* "Health" insurance since the introduction of the *State* scheme in 1912 and its extension in 1948, the *Voluntary* business of Friendly Societies registered under the Friendly Societies Act, 1896, still continues on a large scale, as shown by the following comparative totals—those in ordinary type relate to registered Friendly Societies proper (embracing both "Centralized" societies and "Orders with Branches"); those in *italics* "Collecting" societies which, although registered under the Friendly Societies Acts, are subject also to the special provisions of the Industrial Assurance Acts:—

End of Year	No. of Societies on Register		Membership		Assurances or Policies		Total Funds	
			Thousands				£000's	
1958	11,473	*96*	6,190	*32,642*	237,557	*284,296*		
1938	19,600	*149*	8,491	*25,738*	151,613	*84,837*		
1913	25,475	*71*	6,783	*7,481*	51,489	*11,165*		

Although recent years have seen the growth of societies registered for such specific purposes as the provision of institutional treatment or assuring annuities and pensions, most friendly societies continue to provide the customary benefits in sickness and at death. During 1958 Friendly Societies proper paid out £5,390,000 in sickness benefit and £2,032,000 in death benefit while payments on death claims by collecting societies amounted to £9,167,000.

Many societies still operate mainly on the old system of accumulating funds on a mutual basis. Others, usually termed deposit societies, allocate all or the greater part of their funds annually to the individual credit of the members to be withdrawn by them as the rules provide. Apart from the National Deposit Society's method of a uniform contribution throughout membership there are several systems operated on individual account lines, one of which (known as the "Holloway" principle) is worked by a contribution increasing with each year of attained age after the member reaches age 30 up to age 65.

The membership and funds figures—as at the end of 1958—set out below indicate the strength of several leading old established societies, including the three largest Orders which operate through registered districts and branches subject to a central body:—

FRIENDLY Socs.—Name with (in brackets) Year Established	Membership	Funds (including Reserves)
		£
National Deposit Friendly Society (1868)	628,000	23,536,000
Hearts of Oak Benefit Society (1842)	555,000	17,994,000
Independent Order of Odd Fellows, Manchester Unity (1810)	438,000	27,769,000
Ancient Order of Foresters (1834)	334,000	19,363,000
Independent Order of Rechabites, Salford Unity (1835)	206,000	6,869,000

COLLECTING Socs.—Name and Year Established	No. of Assurances		Funds (including Reserves)
	Premium Paying	Free Paid-up	
			£
Liverpool Victoria Friendly Society (1843)	12,496,000	4,081,000	169,200,000
Royal Liver Friendly Society (1850)	7,672,000	1,978,000	85,639,000
Scottish Legal Life Assurance Society (1852)	2,699,000	896,000	23,863,000

The present National Insurance scheme with its provision of "cradle to the grave" benefits has had serious repercussions on the Voluntary Friendly Societies. From the end of 1937 to the end of 1947 total membership rose from 8,341,000 to 8,608,000, an increase of 3 per cent., but during the next ten years it fell by 27 per cent. to 6,277,000. There are, however, signs that the decline in membership is now being arrested.

When the modest scheme of 1912 was introduced some people doubted the Voluntary Friendly Societies' ability to survive for long, and yet they continued to grow in the face of keen competition, although their remarkable expansion naturally brought many societies up to a point where they found it increasingly difficult to maintain a sufficient inflow of new, young entrants to replace membership losses due to death and other causes. In recent years, too, many of the older (non-deposit type) societies have had to introduce more attractive tables to cater for the growing preference amongst members for a curtailed (instead of whole-life) sickness insurance to enable a margin of contributions to accumulate to their credit as an increasing cash endowment payable in full at age 65, or in the event of prior death, with the option of drawing on the credit from time to time if the member is in need, subject to certain conditions, including the retention of a specified minimum sum in the member's account.

In considering how far the general body of members comprising the Friendly Societies movement can afford to continue their voluntary insurances along with their higher State scheme contributions in future, it must not be overlooked that present-day wage levels are substantially higher for all classes of workers than before the war and the Government has declared that continued Voluntary insurance to supplement State benefits, wherever one's means permit, should be encouraged.

Moreover, in addition to the widespread *branch* units of the better known "Orders," there are numerous small independent societies whose membership is maintained more easily than in the large societies, by age-long custom of family and social

ties within their own locality, and there still exist a few such societies whose formation dates back far beyond any "Friendly Society" legislation. In fact, long before the term "Friendly Society" came into use, the seeds of Voluntary mutual insurance had been sown in the ancient religious and trade "Guilds." As is evident from the many extant parchment returns detailing their rules and possessions under a decree of Richard II, Guilds had become widespread in Britain by the 14th century. By then, the purely charitable character of the original Guilds had largely changed with the emergence of numerous small institutions adopting primitive mutual insurance methods of a regular flat rate contribution in order to obtain relief when sick or in old age and a payment to the widow in the event of death.

The present register of Friendly Societies includes several societies which have been in existence for upwards of 200 years, the four earliest all operating in Scotland, the oldest being the "Incorporation of Carters in Leith" established as long ago as 1555. The three oldest in England were all formed in London—the "Norman Society" (estd. 1703), the "Society of Lintot", (estd. 1708) and the "Society for the Mutual Help of Swiss in London" (estd. 1703), the first two of these having been formed by Huguenot refugees from the Protestant persecution under Louis XIV.

The first Act for the encouragement and protection of "Friendly Societies" in this country was not passed until 1793, but various amending Acts were put on the Statute Book during the next century as the result of the recommendations of successive Select Committees (including a Royal Commission in 1871). For example, it was not until the 1829 Act that all registered Friendly Societies were required to keep proper records of individual sickness and mortality amongst their members, which data enabled the construction of standard actuarial tables showing the expected (average) duration of sickness at successive ages, and also (with data from the Census) the corresponding mortality rates.

The rules and other documents of societies deposited with local justices passed into the custody of the Registrar following the Act of 1846 and are of considerable interest to social historians. Those relating to some societies no longer on the register have been transferred to the Public Record Office for permanent preservation.

The present consolidating Act of 1896 allows various specific classes other than "Friendly Societies" to be registered thereunder, but exemption from income tax (irrespective of the extent of interest income) is enjoyed only by registered "Friendly Societies."

The Friendly Societies Act, 1955, extended the purposes for which societies may be registered under the Acts, and authorized societies to invest their surplus funds in other registered societies.

Building Societies—Great Britain

Acts 1874–1960.

Building Societies are, with few exceptions, associations incorporated with limited liability under the Building Societies Acts. All Building Societies are required to register their rules and file their accounts with the Registrar of Friendly Societies and Building Societies. The following particulars showing the growth of Building Societies (as also that of Friendly and Co-operative Societies tabulated on pp. 1038 and 1039) are based on the Registrar's Annual Reports. The Editor is also indebted to the publishers of the "Building Societies Year Book" for details of individual societies from which the second table hereunder has been compiled.

The building societies movement has played a considerable part in the expansion of home ownership since the war. Between 1946 and 1958 building societies advanced nearly £4,000,000,000 on mortgage, the bulk of it to assist owner-occupiers to buy their homes.

The progress of the building society movement over the past twenty years and the tendency to concentration in a smaller number of larger societies is illustrated by the following figures:—

	1939	1949	1959
Number of Societies.....	960	835	732
Total Assets.....	£774m	£1,142m	£2,902m
Average per society of total assets.....	£·8m	£1·4m	£4m

Advances on mortgage during 1959 totalled £511,000,000 which was over £100,000,000 higher than the previous highest total for one year's advances.

Shareholders and depositors added £603,000,000 to their accounts during 1959 while £417,000,000 was withdrawn from these accounts. The total assets increased to £2,902,000,000. Of this total, mortgage balances represented 83 per cent., the remainder consisting chiefly of investments in Government securities and cash. Reserves and profit balances represented 4·3 per cent. of the total assets.

For the year 1959 interest received by societies from borrowers amounted to £137,000,000. Interest payments to shareholders and depositors totalled £88,000,000. Management costs, at £17,000,000 for 1959, averaged only about 1¾*d.* per £1 of the mean mortgage assets. Of this total advertising accounted for 8 per cent. and commission and agency fees 13 per cent.

In May, 1960, the Building Societies Association recommended an increase in interest rates to 6 per cent. on mortgages and 3½ per cent. on shares and these rates have been widely adopted. Interest on deposits is now generally 3½ per cent. (income tax on both share and deposit interest being paid by the societies).

Section 1 of the House Purchase and Housing Act, 1959, empowered the Chief Registrar to designate building societies for the purposes of the section. Societies that had been designated up to the time of going to press are marked "D" in the list which follows.

A society so designated is entitled to participate in the Government scheme for Exchequer advances to building societies; its deposits (but not its shares) rank as trusee securities.

For some years there has been public disquiet at the activities of certain societies on the fringe of the building societies movement. Some of the societies were recently incorporated; others which had been moribund for some years had come under the control of new directors who used their date of incorporation to reassure potential investors.

Many of these societies expanded rapidly due to widely advertised offers of a higher than normal rate of interest on share investments. To maintain such rates it was necessary for them to receive a higher rate of mortgage interest than is usual in building society business and a large proportion of their funds was advanced to property companies and other borrowers on the security of property of a doubtful value.

The provisions of the Building Societies Act 1960, fall broadly into two groups, those which regulate the internal administration of building societies and those which confer new powers of control on the Chief Registrar of Friendly Societies. In future building societies will not be permitted to make more than 10 per cent. of their total new advances in any year to bodies corporate or in the form of large advances (defined at present as advances exceeding £5,000) but the percentage may be increased in a particular case by the Chief Registrar to enable a society to make advances on new dwellings for letting. The formalities necessary on formation of a new building society are made more stringent and the Chief Registrar is given powers of control over small building societies (*i.e.* those with assets of less than £100,000) if in his opinion there has been a change in the scale or character of their business.

Section 11 of the Prevention of Fraud (Investments) Act, 1958 under which the Registrar has prohibited certain societies from inviting new investments is repealed (but without prejudice to any order currently in force) and the Chief Registrar is empowered to direct that a building society shall not advertise at all or to give directions to a particular society as to the matter included in its advertisements. In addition he may make an order prohibiting a building society from accepting further investments. These and other new powers of the Chief Registrar, such as the power to make regulations about the contents of building societies' advertisements generally and to prescribe the range of securities in which a society may invest its surplus funds are subject to the consent of the Treasury.

Matters of internal administration which are regulated by sections of the Act include the keeping of books of account and register of members, the preparation of annual accounts in a form prescribed by the Chief Registrar, the qualifications, appointment and removal of auditors, the form and content of directors' and auditors' reports, the right of members to receive copies of the accounts and reports, the calling and conduct of general meetings and the duties of directors. A revised procedure is prescribed for assessing the adequacy of the security for an advance and certain restrictions are placed on the persons who may make valuation reports. In addition to the annual accounts a society is required to send an annual return in a prescribed form to the Chief Registrar. The Registrar must also be notified of changes in a society's officers.

The Act of 1894 gave the Registrar power, on application by a certain number of members, to appoint an inspector to examine into and report on the affairs of a building society or to call a special meeting of the society. The Act of 1960 authorizes the Chief Registrar to exercise these powers without any application from the members if he is of the opinion that an investigation should be held into the affairs of the society or that its affairs call for consideration by a meeting of members.

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent.? ANSWER:—19·14 years' purchase, or £1,914.

EXAMPLE 2.—A man, aged 55, in receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? ANSWER:—Looking at the Table of Expectation of Life (p. 958), it will be seen that the expectation for age 50 is about 23 years; and from the above table an annuity certain for 23 years interest at 5 per cent., is worth 13·49 years purchase. The present payment required would therefore be £1,349 *approximately*.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this Example.

RETROSPECT OF SPORT 1959–60

OLYMPIC GAMES

The Modern Olympic Games were revived in 1896 and meetings have been held as follows:—

I	1896	Athens	VII	1920	Antwerp	XIII	1944	London**
II	1900	Paris	VIII	1924	Paris	XIV	1948	London
III	1904	St. Louis	IX	1928	Amsterdam	XV	1952	Helsinki
IV	1908	London	X	1932	Los Angeles	XVI	1956	Melbourne
V	1912	Stockholm	XI	1936	Berlin	XVII	1960	Rome
VI	1916	Berlin**	XII	1940	Tokio, Helsinki**			

** The Games of 1916 were allotted to Berlin, but were not held owing to the war. The Games of 1940 were allotted first to Tokyo, then in 1938 to Helsinki, but also were not held owing to the war. The Games of 1944 were awarded to London in 1939, but again were not held owing to the war. It is a rule of the Olympic Charter that the cancellation of any Meeting must not alter the numbered sequence.

The venue of each Olympic Meeting is fixed some time ahead by the International Olympic Committee who have awarded the 1964 Games to Tokyo.

The 1960 Games took place in Rome from Wednesday, August 31 to Sunday, September 11, and the programme comprised the following sports—Athletics, Basketball, Boxing, Canoeing, Cycling, Fencing, Football, Gymnastics, Hockey, Modern Pentathlon, Rowing, Shooting, Swimming, Water Polo, Weightlifting, Wrestling and Yachting.

WINNERS OF 1960 OLYMPIC GAMES

Athletics

MEN'S EVENTS	Time
	h. m. s.

80 metres Hurdles.—C. Quinton (G.B.), 11·0 sec.*
High Jump.—D. Shirley (G.B.), 5 ft. 3¾ in.
Long Jump.—M. Bignal (G.B.), 20 ft. 3½ in.*
Shot.—S. Allday (G.B.), 47 ft. 6 in.
Discus.—S. Allday (G.B.), 155 ft. 5 in.*
Javelin.—S. Platt (G.B.), 153 ft. 8 in.*
Great Britain beat France by 68 pts to 38 pts.

*Record for meeting.
†Equalled record for meeting.

GREAT BRITAIN *v.* ITALY

Women

100 metres.—G. Leone (Italy), 11·6 sec.
200 metres.—D. Hyman (G.B.), 24·5 sec.
800 metres.—J. Jordan (G.B.), 2 min. 09·5 sec.
4×100 metres Relay.—Italy, 47·0 sec.
80 metres Hurdles.—C. Quinton (G.B.), 10·9 sec.
High Jump.—D. Shirley (G.B.), 5 ft. 4½ in.
Long Jump.—P. Tizzoni (Italy), 18 ft. 6½ in.
Shot.—S. Allday (G.B.), 48 ft. 5½ in.
Discus.—E. Ricci (Italy), 152 ft. 6½ in.
Javelin.—S. Platt (G.B.), 157 ft. 9½ in.
Great Britain beat Italy by 58 pts to 45 pts.

ENGLAND *v.* ITALY

White City Stadium, June 15, 1960

100 *metres*.—P. F. Radford (E.), 10·4 sec.
200 *metres*.—L. Berruti (I.), 21·1 sec.
400 *metres*.—J. D. Wrighton (E.), 47·5 sec.
1,500 *metres*.—B. W. Kent-Smith (E.), 3 min. 43·7 sec.
10,000 *metres*.—S. E. Eldon (E.), 29 min. 30·0 sec.
4× 100 *metres Relay*.—E., 40·4 sec.
4× 400 *metres Relay*.—E., 3 min. 10·4 sec.
110 *metres Hurdles*.—P. B. Hildreth (E.), 14·5 sec.
400 *metres Hurdles*.—T. S. Farrell (E.), 51·0 sec.
High Jump.—G. A. Miller (E.), 6 ft. 6⅛ in.
Pole Vault.—A. Baronchelli (I.), 13 ft. 9½ in.
Long Jump.—A. Bradi (I.), 23 ft. 5⅜ in.
Hop, Step.—P. L. Gatti (I.), 50 ft. 5⅜ in.
Shot.—A. Rowe (E.), 59 ft. 1½ in.
Discus.—A. Consolini (I.), 179 ft. 3½ in.
Hammer.—M. J. Ellis (E.), 202 ft. 11 in.
Javelin.—C. Lievore (I.), 241 ft. 11 in.

England beat Italy by 95 pts to 80 pts.

GREAT BRITAIN "B" *v.* BELGIUM

Held at Billingham, July 2, 1960

100 *metres*.—J. N. Whitehead (G.B.), 10·9 sec.
200 *metres*.—R. Nicholson (G.B.), 21·4 sec.
400 *metres*.—B. Jackson (G.B.), 47·5 sec.
800 *metres*.—R. Moens (Bel.), 1 min. 47·2 sec.
1,500 *metres*.—D. Allewaert (Bel.), 3 min. 48·0 sec.
5,000 *metres*.—F. J. Salvat (G.B.), 14 min. 02·8 sec.
10,000 *metres*.—H. Leenaert (Bel.), 29 min. 22·6 sec.
Steeplechase.—G. Roelants (Bel.), 8 min. 55·4 sec.
4× 100 *metres Relay*.—G.B., 41·6 sec.
4× 400 *metres*.—G.B., 3 min. 12·8 sec.
110 *metres Hurdles*.—J. M. Parker (G.B.), 14·9 sec.
400 *metres Hurdles*.—J. Metcalf (G.B.), 52·1 sec.
High Jump.—D. Wilson (G.B.), 6 ft. 3 in.
Pole Vault.—R. van Dyck (Bel.), 13 ft. 3 in.
Long Jump.—J. D. Howell (G.B.), 23 ft. 4⅝ in.
Hop, Step.—E. Robinson (G.B.), 48 ft. 11⅜ in.
Shot.—D. R. Harrison (G.B.), 50 ft. 6⅛ in.
Discus.—E. A. Cleaver (G.B.), 159 ft. 6⅛ in.
Hammer.—H. Payne (G.B.), 196 ft. 6½ in.
Javelin.—J. Kitching (G.B.), 214 ft. 6 in.

Great Britain won by 128 pts to 84 pts.

MILES UNDER 4 MINUTES

On May 6, 1954, at Iffley Road Track, Oxford, Roger Bannister of Great Britain became the first man ever to run a mile in under 4 minutes, the previous world record having stood to the credit of the Swede, Gunder Hägg, who in 1945 had run the distance in 4 min. 01·4 sec. The feat of running a mile in under 4 minutes has now, some six years after the first, been accomplished on 65 occasions by 26 athletes. In 1960 there were 23, but the record number in one year was 19 in 1958. The following is a list of the athletes who have accomplished this time, showing the first occasion on which they did it. Six of the members of the "Four minute Club" come from Great Britain, 5 from Australia, 3 from U.S.A. and 2 from Hungary. There is one member from each of the following countries: Belgium, Czechoslovakia, Denmark, East Germany, Eire, Finland, New Zealand, Poland, Rhodesia and Sweden. Herb. Elliott heads the list with 17 runs inside, and 1 in exactly, 4 minutes; John Landy of Australia and Dan Waern of Sweden follow with 6 each; Derek Ibbotson has 4, with one in exactly 4 minutes.

Time min.	sec.	Name	Country	Date

THE DERBY, 1950–1960

For particulars of the Derby from 1780–1949 see 1921–50 editions.

The *Distance* of the Derby course at Epsom is 1½ mile. Lord Egremont won Derby in 1782, 1804, 5, 7, 26 (also, 5 Oaks); Duke of Grafton, 1802, 9, 10, 15 (also, 9 Oaks); Mr. Bowes, 1835, 43, 52, 3; Sir J. Hawley, Teddington (1851), Beadsman (1858), Musjid (1859), and Blue Gown (1868), the 1st Duke of Westminster, Bend Or (1880), Shotover (1882), Ormonde (1886), and Flying Fox (1899). Lady James Douglas was the first lady to win the Derby—War Substitute at Newmarket (1918); at Epsom, Mrs. G. B. Miller (1937). First winner was Sir Charles Bunbury's Diomed in 1780. From 1940 to 1945 a substitute Derby was run at Newmarket. By winning his 5th Derby, the late Aga Khan equalled Lord Egremont's record. He also won 2 Oaks.

Year	Owner and Name of Winner	Betting	Jockey	Trainer	No. of R'n'rs.
1950	M. M. Boussac's Galcador (Fr.)	100 to 9	W.R.Johnstone	C. Semblat	32
1951	Mr. J. McGrath's Arctic Prince	28 to 1	C. Spares	W.Stephenson	32

CRICKET

Cricket is played under the "Laws of Cricket" and is governed by the Committee of the Marylebone Cricket Club (1787), Lord's, N.W.1. *Pres.*—Sir Hubert Ashton, K.B.E., M.C., M.P. *Sec.*, R. Aird. *Asst. Secs.*, J. G. Dunbar; S. C. Griffith.

1960. Cricket Feats

Firsts.—1,000 runs—E. R. Dexter (Sussex). 100 wickets—F. S. Trueman (Yorkshire). 1,000 runs and 100 wickets—T. E. Bailey (Essex). 2,000 runs—P. B. Wight (Somerset). 200 wickets—None.

All Round.—Three players made 1,000 runs and took 100 wickets. They were T. E. Bailey (Essex) 1,639 runs and 117 wickets; F. J. Titmus (Middlesex) 1,205 runs and 117 wickets; R. Illingworth (Yorks.) 1,006 runs and 109 wickets.

High Scores.—South Africans, 507 *v.* Hants. Northamptonshire, 494 (for 8) *v.* Cambridge Univ.; England, 479 for 9 *v.* South Africa (fifth Test, Oval); Lancashire, 470 for 4 *v.* Cambridge Univ.

Low Scores.—Leicestershire, 37 *v.* Lancashire; 40 *v.* Sussex; South Africans, 49 *v.* Glos.

Fastest Century.—E. R. Dexter (Sussex). 100 runs in 85 minutes *v.* Somerset.

Bowling Feats.—D. Shackleton (Hants.) 9 for 30 *v.* Warwicks.; M. J. Cowan (Yorkshire) 9 for 43 *v.* Warwicks.; J. B. Statham (Lancashire) 14 for 58 in match *v.* Leics.

Highest Individual Scores.—K. Grieves (Lancashire) 226 *v.* Cambridge Univ.; R. A. McLean (South Africans) 207 *v.* Worcs.; P. J. Sharpe (Yorkshire) 203* *v.* Cambridge Univ.; N. F. Horner (Warwickshire) 203* *v.* Surrey; D. J. Kenyon (Worcestershire) 201 *v.* Glamorgan.

County Cup Awards.—Fastest Century, E. R. Dexter. Best Bowling performance, D. Shackleton. Most catches, P. Walker (Glamorgan), 69. Most wicket-keeping dismissals, J. T. Murray (Middlesex). Special awards, T. E. Bailey (Essex) and N. A. T. Adcock (South Africans).

Throwing

The following definition was given by M.C.C. in November, 1959:—A ball shall be deemed to have been thrown if, in the opinion of either umpire, there has been a sudden straightening of the bowling arm, whether partial or complete, immediately prior to delivery. *Immediately prior to delivery* will be taken to mean at any time after the arm has risen above the level of the shoulder in the delivery swing.

Leicester (16)	28	2	13	12	1	0	5	12	46	1·64

The Glamorgan record includes one point for tie on first innings in match lost.

County Championships

The first County Championship was in 1873 when Gloucestershire and Nottinghamshire finished equal on points. Yorkshire have won 24 times; Surrey 16; Notts 8; Lancs 8; Middlesex 5; Kent 4; Gloucester 2; Derby 2; Warwick 2; Glamorgan 1; Notts and Lancs tied in 1879 and 1882, and Notts, Lancs and Surrey were all equal in 1889. Middlesex and Yorkshire tied in 1949 and Lancashire and Surrey tied in 1950.

MISCELLANEOUS CRICKET RECORDS

Highest individual scores.—In first-class cricket in England: A. C. Maclaren, 424, for Lancashire *v.* Somerset at Taunton, July, 1895. In Australia: D. G. Bradman (Australia), 452 (not out) for N.S.W. *v.* Queensland, Sydney, 1929–30. In India: B. B. Nimbalkar (Maharashtra *v.* W. Indian States), Poona, 1948–49, 443 (not out). In Pakistan: Hanif Mohammed, 499, Karachi *v.* Bahawalpur, 1959. In a minor inter-county match: F. E. Lacey (Hampshire *v.* Norfolk), Southampton, 1887, 323 (not out). In other minor matches: A. E. J. Collins, aged 14, scored 628 (not out) in a Junior House match playing for Clarke's House *v.* North Town at Clifton College. This score extended over five afternoons, 1899.

Highest team innings.—Australia, Victoria 1,107 *v.* N.S.W., Melbourne, 1926; England, England 903 (for 7 dec.) *v.* Australia, 1938.

Win.—Victoria beat New South Wales by innings and 656 runs, Dec. 29, 1926.

Runs in a day.—Australia *v.* Essex, Southend, May 15, 1948, 721.

Smallest totals.—Oxford University (one man absent), 12 *v.* M.C.C. at Oxford, May, 1877; Northants, 12 *v.* Gloucester, June 11, 1907.

Highest Aggregate.—Fifth Test, Durban, March, 1939. S. Africa 530 and 481; England 316 and 654 for 5 wickets. 1,981 (35 wkts.). India, Bombay, 651 and 714 for 6 dec. *v.* Maharashtra, 407, 604. Total 2,376 (38 wkts.).

Highest Partnership.—Gul Mahomed (319) and V. S. Hazare (288 not out) made 577 for 4th wicket for Baroda *v.* Holkar (Mar. 7, 1947). Previous: C. L. Walcott and F. M. Worrell, 574 for Barbados *v.* Trinidad, 1946. P. Holmes and H. Sutcliffe 555 for Yorks. *v.* Essex, Leyton, 1932, 1st wicket highest.

Most centuries in one season.—D. C. S. Compton, 18 (1947); J. B. Hobbs, 16 (1925); W. R. Hammond, 25 (1938); H. Sutcliffe, 14 (1932); D. G. Bradman (1938), C. B. Fry (1901), W. R. Hammond (1933, 7), T. Hayward (1906), E. P. Hendren (1923, 7, 8), C. P. Mead (1928), and H. Sutcliffe (1928, 31), 13 centuries. Six consecutive—C. B. Fry, 1901; D. G. Bradman (Australia), 1938–9; five consecutive Test centuries, E. Weekes, 1949. Total centuries in career—J. B. Hobbs, 197 (175 in Eng.).

Most runs made in a year.—D. C. S. Compton (Middlesex), 3,816 (1947); W. J. Edrich (Middlesex), 3,539 (1947); T. Hayward (Surrey), 3,518 (1906). L. Hutton (Yorks), 3,429 (1949); F. E. Woolley (Kent), 3,352 (1928).

Most wickets in season.—A. P. Freeman (Kent), 304, 1928, and 298, 1933; T. Richardson (Surrey), 290, 1895.

Aggregates.—J. B. Hobbs, 61,221; W. G. Grace, 54,896, 2,876 wkts. W. R. Rhodes, 4,188 wkts. Also F. E. Woolley, 58,969; E. P. Hendren, 57,610; W. R. Hammond, 50,408; A. P. Freeman, 3,775 wkts.

Record Benefits.—C. Washbrook (Lancs.), £14,000 (1948); D. C. S. Compton (Middlesex), £12,200 (1949); A. V. Bedser (Surrey), £12,866 (1953). Sir D G. Bradman received £10,000 for his Testimonial match in Australia, 1948–49.

1,000 runs in May.—W. G. Grace, 1895, W. R. Hammond, 1927, C. Hallows, 1928, D. G. Bradman, 1930, 1938, W. J. Edrich, 1938; incl. April, T. Hayward, 1900. In June, L. Hutton, 1,294, 1949. In July.—A. E. Fagg, 1,018, 1938; August.—W. R. Hammond, 1,281, 1936; L. Hutton, 1,050, 1949.

Fastest scoring.—P. G. H. Fender for Surrey *v.* Northamptonshire in 1920, 100 runs in 35 mins.

Most Sixes in Innings.—17, W. J. Stewart, Warwickshire *v.* Lancashire, 1959.

Double.—J. H. Parks (Sussex), 3,003 runs and 101 wkts., 1937. In match: A. E. Fagg (Kent) *v.* Essex, 1938, Colchester, 244 and 202 (not out).

Highest batting average in England 115.66, D. G. Bradman (S. Aust.), 1938.

Most Catches in Match —W. R. Hammond 10, Gloucestershire *v.* Sussex at Cheltenham, 1928

UNIVERSITIES AND SCHOOLS, ETC.

Oxford and Cambridge

First played 1827. Played 115. Cambridge have won 50, Oxford 43, drawn 23.

1955 Drawn. (Cambridge 304 and 178 for 8 (dec.); Oxford 170 and 230 for 6).

1956 Drawn. (Cambridge 303 for 7 (dec.) and 134 for 5 (dec.); Oxford 247 for 9 (dec.) and 58 for 5).

1957 Cambridge (innings and 186 runs). Oxford 92 and 146; Cambridge 424 for 7 (dec.).

1958 Cambridge (99 runs). Cambridge 161 for 7 (dec.) and 269 for 8 (dec.); Oxford 180 and 151.

1959 Oxford (85 runs). Oxford 217 and 238; Cambridge 174 and 196.

1960 Drawn. Cambridge 153 and 243 for 9; Oxford 310.

Eton and Harrow

First played 1805. Played 124. Eton have won 46, Harrow 38. Drawn 40.

1953 Eton (10 wkts.). (Eton 238 and 3 for 0; Harrow 82 and 158).

1954 Harrow (9 wkts.). (Eton 168 and 119; Harrow 221 and 69 for 1).

1955 Eton (38 runs). (Eton 161 and 166; Harrow 105 and 184).

1956 Drawn. (Eton 157 for 8 (dec.); Harrow 94 for 1 (match abandoned)).

1957 Drawn. (Harrow 183 for 9 (dec.); Eton 204 for 6).

1958 Drawn. (Eton 170 and 110 for 7 (dec.); Harrow 96 and 81 for 7).

1959 Drawn. (Eton 270 for 5 (dec.) and 106; Harrow 175 and 157 for 8).

1960 Harrow (124 runs). (Harrow 216 and 143; Eton 153 and 82).

School Matches, 1960

Eton and Winchester drew. Winchester 155 and 250 for 8 (dec.); Eton 258 for 8 (dec.) and 113 for 6.

Oratory beat Beaumont by 26 runs. Oratory 147; Beaumont 121.

Clifton and Tonbridge drew. Clifton 235 and 181 for 8 (dec.); Tonbridge 208 for 8 (dec.) and 122 for 4.

Haileybury and I.S.C. beat Cheltenham by innings and 11 runs. Cheltenham 109 and 94; Haileybury 214.

Marlborough beat Rugby by 5 wickets. Rugby 148 and 281; Marlborough 233 for 9 (dec.) and 197 for 5.

Southern Schools and the Rest drew. Rest 191 and 99 for 2 (dec.); Southern Schools 122 and 130 for 7.

Combined Services and Public Schools drew. Public Schools 249 for 9 (dec.) and 184 for 4 (dec.); Combined Services 246 for 6 (dec.) and 165 for 8.

Gentlemen *v.* Players (Lord's)

Drawn. Gentlemen 108 and 227 for 4 (dec.): Players 168 for 2 (dec.) and 167 for 9.

University.—Oxford University beat Cambridge University 3–0.

BADMINTON, 1960

All-England Championships, 1960

Men's Singles.—E. Kops (Denmark) beat C. Watnasin (Thailand) 3–0.

Ladies' Singles.—Miss. J. M. Devlin (U.S.A.) beat Miss M. Varner (U.S.A.) 2–0.

Men's Doubles.—F. Kobbero and P. E. Neilsen (Denmark) beat Lim Say Hup and Teh Kew San (Malaya) 2–1.

Ladies' Doubles.—Miss S. F. Devlin and Miss J. M. Devlin (U.S.A.) beat Mrs. K. Thorndahl and Mrs. I. B. Hansen (Denmark) 2–0.

Mixed Doubles.—F. Kobbero and Mrs. Thorndahl beat P. E. Nielsen and Mrs. Hansen 2–0.

Inter-County Championship.—Kent beat West of Scotland 13–2.
Universities.—Cambridge University beat Oxford University 15–0.

SQUASH RACKETS, 1959–60

Open Championship.—Azam Khan (Pakistan) beat Roshan Khan (Pakistan) 3–0.
Amateur Championship.—I. Amin (Egypt) beat T. Shafik (Egypt) 3–1.
British Isles Professional Championship.—Azam Khan (Pakistan) beat Jamal Din (Pakistan) 3–0.
U.K. Professional Championships.—J. H. Giles beat D. W. Harman.
Women's Championships.—Mrs. H. G. Macintosh beat Mrs. G. E. Marshall 3–2.
Inter-County Championship.—Surrey beat Middlesex 4–1.
Service Championships.—*Royal Navy*: Lt.-Cdr. B. K. Shattock beat Lt. R. A. B. Gowland 3–0; *Army*: Gnr. S. Hicks beat Maj. M. J. W. Tingey 3–1; *R.A.F.* F/O H. E. Truman beat F/Lt. M. H. A. Eggleton 3–1.
Inter-Services Tournament.—1, R.A.F.; 2, Army; 3, Royal Navy.
University Match.—Oxford University beat Cambridge University 4–1.
Londonderry Cup.—Old Rugbeians beat Old Merchant Taylors 4–1.
Drysdale Cup.—D. R. Brazier beat J. L. Davison 3–0.

FENCING, 1960

Amateur Championships:
Ladies' Foil.—Miss G. M. Sheen (London F.C.).
Men's Foil.—D. Cawthorne (Salle Froeschlen).
Epée.—A. L. N. Jay (Lansdowne Club).
Sabre.—A. R. Cooperman (Salle Paul).
International Individual Competitions:
C.-L de Beaumont Cup (*Ladies' Foil*).—Miss G. M. Sheen.
Coronation Cup (*Men's Foil*).—R. Paul (Salle Paul).
Miller-Hallett Cup (*Epée*).—A. L. N. Jay (Lansdowne Club).
Corble Cup (*Sabre*).—M. Straus (London F.C.).
Universities.—Cambridge University beat Oxford University 17–10.
Public School Championships:
Foil.—I. F. Duthie (Merchant Taylors).
Epée.—M. L. R. Davies (Dulwich).
Sabre.—J. W. F. Harris (Merchant Taylors).
Inter-Service Champions:
Foil.—Sgt. R. A. C. Thompson (Royal Marines).
Epée.—C.S.M.I. G. W. Gelder (Army).
Sabre.—Lt. M. J. P. Howard (Army).

RACKETS, 1959–60

Open Singles Championship.—J. P. Dear beat J. R. Thompson.
Amateur Singles Championships.—G. W. T. Atkins beat J. R. Thompson 3–0.
Amateur Doubles Championships.—C. J. Swallow and J. M. G. Tildesley beat G. W. T. Atkins and C. T. M. Pugh 4–2.
Public Schools Championship.—*Singles* (*H. K. Foster Cup*): G. P. Milne (Eton) beat J. W. T. Wilcox (Malvern) 3–0. *Doubles*: Marlborough (A. J. Price and M. G. Griffith) beat Winchester (C. E. M. Snell and P. B. Hay) 4–2.
Noel Bruce Cup.—Tonbridge (J. R. Thompson and R. M. K. Gracey) beat Rugby (D. S. Milford and P. Kershaw) 4–0.
Universities.—Oxford University beat Cambridge University 3–0.
Army Championships.—Capt. A. D. Myrtle (K.O. S.B.)

ETON FIVES, 1960

Amateur Championship.—*Kinnaird Cup.*—D. J. S. Guilford and M. J. Shortland-Jones beat A. Hughes and A. J. G. Campbell 3–1.
Public Schools Competition.—Eton (N. F. Peterson and A. R. Wagg) beat Repton (C. R. Pilkington and R. M. Tinn) 3–2.
University.—Cambridge University beat Oxford University 2–1.

RUGBY FIVES, 1960

Amateur Singles Championship.—(*Jesters' Club Cup*).—E. Marsh beat J. F. Pretlove 15–6, 15–4.
Amateur Doubles Championship.—(*Cyriax Cup*).—D. E. Gardner and S. Holt beat R. F. Dovey and P. A. Badmin 15–6, 10–15, 15–8.
Schools Competition.—*Singles* (*Jesters' Cup*): P. Mellor (Bedford) beat J. A. Slater (Clifton). *Doubles* (*Mappin Cup*): Merchiston Castle (D. R. C. Morton and G. L. Maguire) beat Oundle (P. J. Coates and A. R. Burdon-Cooper).
University.—Cambridge University beat Oxford University 280–208.

POLO, 1960

Tyro Cup.—Polo Cottage beat Cowdray Park 7–6.
Cicero Cup.—Polo Cottage beat Jersey Lilies 5–3.
Queen's Cup.—Centaurs beat Cowdray Park 8–2½.
Smith Ryland Cup.—Centaurs beat Cowdray Park 8–3½.
Royal Windsor Cup.—Jersey Lilies beat Ambersham 5–3.
Cowdray Gold Cup.—Casarejo beat Centaurs 8–7.
Cowdray Cup.—Cowdray Park beat Friar Park 6–2.
County Cup.—Silver Leys beat Polo Cottage.
Smith's Lawn Cup.—Kirtlington Park beat Windsor Park 4–3.
Harrison Cup.—Polo Cottage beat Cheshire 6–3.
Friar Park Cup.—Jericho Priory beat Cheshire Forest 7–6.
Inter-Regimental Cup.—3rd Regt. Royal Horse Artillery.

CROQUET, 1960

Peel Memorials.—*Men:* Lt.-Col. D. M. C. Prichard. *Women:* Mrs. K. Ellis and Miss D. A. Lintern.
Men's Championship.—J. W. Solomon.
Women's Championship.—Miss E. J. Warwick.
Inter-County Championship.—Middlesex.
The Croquet Championship.—Mrs. E. Rotherham.
Mixed Doubles Championship.—Lt.-Col. G. E. Cave and Mrs. E. Reeve.
Open Doubles Championship.—H. O. Hickes and W. P. Ormerod.
Du Pré Cup.—Mrs. S. M. Adler.
Association Plate.—W. P. Ormerod.
All England Handicap.—E. Whitchapel.
Challenge Cups.
Rochampion.—Maj. R. Tingey.
Council.—Mrs. S. M. Adler.
Reckitt.—Mrs. F. H. N. Davidson.
Stevenson.—J. E. Andrews.
Gilbey Cup.—Mrs. S. M. Adler.
President's Cup.—E. P. C. Cotter.
Surrey Cup.—D. W. Curtis.

TABLE TENNIS, 1959–60

ENGLISH OPEN CHAMPIONSHIPS (Albert Hall)

Singles.—*Men:* I. Harrison beat J. Somogyi 3–0; *Women:* Mrs. A. Simon (Netherlands) beat Miss D. Rowe 3–0.
Doubles.—*Men:* J. A. Leach and M. H. Thornhill beat L. F. Landry and H. Rhodes 3–1. *Women:* C. K. Best and Miss D. Rowe beat Mrs. R. F. Hook and Miss M. Piper 3–0; *Mixed:* I. Harrison and Miss D. Rowe beat D. C. Burridge and Miss C. K. Best 3–1.

Medley Relay.—1, Heston, 5 m. 9·2 s.; 2, Hampstead, 5 m. 9·7 s.; 3, Dewsbury, 5 m. 17·3 s.

Diving Championships
(Blackpool, September)

Men.—Springboard: B. E. Phelps, 152·98 pts.; *Plain Diving:* B. E. Phelps, 60·34 pts.; *High Diving:* B. E. Phelps, 157·14 pts.
Ladies.—Springboard: Miss E. Ferris, 137·36 pts.; *Plain Diving:* Miss E. Ferris, 53·99 pts.; *High Diving:* Miss N. Thomas, 77·18 pts.
Boys' Diving: B. E. Phelps, 97·32 pts.
Girls' Diving: Miss M. J. Watson, 81·07 pts.

YACHTING

The America's Cup

The New York Yacht Club accepted the Royal Yacht Squadron's challenge for a series of match races for the America's Cup in 1958. The races took place off Newport, Rhode Island, from Sept. 20–26, 1958, between two yachts of the 12-metre class, the British *Sceptre* and the American *Columbia*. The *Columbia* won all four completed races.

History.—The America's Cup, originally a British trophy, was won outright by the U.S. schooner America at Cowes on August 22, 1851, and every contest since has been won by the U.S.A. There have been 17 unsuccessful attempts to take the cup out of the United States—15 by Britain and 2 by Canada. There have been 17 contests and 54 races, 48 of the races being won by the U.S.A.

Shamrock I lost to Columbia, 1899; Shamrock II lost to Columbia, 1901; Shamrock III lost to Reliance 1903; Shamrock IV lost to Resolute, 1920; Shamrock V lost to Enterprise, 1930; Endeavour lost to Rainbow, 1934; Endeavour II lost to Ranger, 1937; Sceptre lost to Columbia, 1958.

YACHTING, 1960

Round the Island (*Crankshaw Bowl*) (July 2).—Bacchante (R. St. A. Malleson).

International 5-0-5s (Torbay, July 25–29).—Confusion (K. Paul).

Universities (Bembridge, July 5–7).—Cambridge University beat Oxford University 118–106½ pts.

Flying Dutchmen World Championship (Whitstable, May 27–30).—Beaver (W. L. Dawes).

International Dragon Championship (*Duke of Edinburgh Cup*) (Lowestoft, July 12–16).—Venture (J. A. Caulcutt, J. M. F. Crean, Col. T.V. Somers).

International 14 ft. Dinghy (*Prince of Wales Cup*) (Falmouth, July 21).—Bolero (S. H. Smith).

Britannia Cup (Cowes, Aug. 2).—Fedalah (N. E. Wates).

National Firefly (Herne Bay, Sept. 3–9).—Daddy Longlegs (G. Jones).

National Eighteens (Cowes, Aug. 21–26).—Mystic (C. Dwyer).

CANOEING, 1960

Devizes–Westminster Race (124 miles).—1, T. P. Hardy and J. P. Cann (22nd S.A.S. Regt.) 23 hr. 1 m. (record time); 2, J. Payne and M. J. Allen (22nd S.A.S. Regt.); 3, C. J. Edmonds and G. R. Howe (Royal Marines).

THE UNIVERSITY BOAT RACE

(Putney-Mortlake, 4m. 1f. 180 yds)

Year	Winner	m.	s.	Won by
1950	Cambridge ...	20	15	3½ lengths
1951	Cambridge ... (After re-row)	20	50	12 lengths
1952	Oxford	20	23	Canvas (about 10 f.)*
1953	Cambridge ...	19	54	8 lengths
1954	Oxford	20	23	4½ lengths
1955	Cambridge ...	19	10	16 lengths
1956	Cambridge ...	18	36	11½ lengths
1957	Cambridge	19	1	2 lengths
1958	Cambridge ...	18	15	3½ lengths
1959	Oxford.....	18	52	6 lengths
1960	Oxford.....	18	59	11 lengths

*This was the closest verdict ever given in the Boat Race except for the dead-heat in 1877.

Cambridge have won 58 times, Oxford 47, and there has been 1 dead-heat.

Race Mishaps.

1859.—Cambridge sank, Oxford won.

1912.—Cambridge sank at 1 mile, and Oxford shortly after Hammersmith Bridge, Oxford won re-row.

1925.—Oxford sank soon after Hammersmith Bridge and Cambridge paddled home to win.

1951.—Oxford sank after half a mile. Race abandoned because of weather and rowing conditions. Cambridge won the re-row.

HENLEY REGATTA, 1960

Grand Challenge Cup.—Molesey beat Oxford University by ¾ length, 6 m. 35 s.

Ladies' Challenge Plate.—Eton beat Jesus College (Cambridge) by ½ length 6 m. 50 s.

Princess Elizabeth Cup.—Shrewsbury beat King's School, Canterbury, by 2½ lengths, 6 m. 53 s.

Thames Cup.—Harvard University (U.S.A.) beat Detroit (U.S.A.) by 1½ lengths, 6 m. 47 s.

Stewards' Cup.—Barn Cottage beat St. Edmund Hall and Lincoln College (Oxford) by 4 lengths, 7 m. 10 s.

Visitors' Cup.—First and Third Trinity (Cambridge) beat King's College (Cambridge) by ¾ length, 7 m. 31 s.

Wyfold Cup.—St. Thomas's Hospital beat Vesta, by 1½ lengths, 7 m. 24 s.

Silver Goblets.—I. L. Elliott and D. C. Rutherford beat R. J. Nicholson and C. L. Marshall by ⅔ length, 7 m. 58 s.

Double Sculls.—G. C. Justicz (Birmingham) and N. Birkmyre (Bristol) beat B. Monnereau and R. Duhamel (France) by 1¾ lengths, 7 m. 17 s.

Diamond Sculls.—S. A. Mackenzie (Australia) beat T. Kocerka (Poland) by ½ length, 8 m. 3 s.

OTHER AQUATIC EVENTS

Head of the River (*Thames, Mortlake–Putney*).—1, Barn Cottage, 18 m. 26 s.; 2, Goldie (Cambridge), 18 m. 42 s.; 3, National Provincial Bank and Thames R.C. III, each 18 m. 57 s.

Oxford Torpids.—St. Edmund Hall.

Oxford Summer Eights.—St. Edmund Hall.

Cambridge Mays.—Lady Margaret.

Cambridge Lents.—Jesus College.

Wingfield Sculls (*Putney–Mortlake*).—1, G. C. Justicz (Birmingham), 24 m. 41 s.; 2, R. Easterling (Poplar and Blackwell), 25 m. 8 s.; 3, M. A. Spracklen (Marlow), 25 m. 17 s.

Doggett's Coat and Badge (*Estab. 1715, 245th Race*) (*London Bridge–Chelsea, 4½ miles*).—1, R. W. Easterling (Lee) 28 m. 5 s.; 2, J. W. Sargent (Charlton), 29 m.; 3, M. J. Cox (Poplar), 29 m. 2s.

Sculling, Head of the River (*Mortlake–Putney*).—1, G. C. Justicz (Birmingham) 21 m. 14 s.; 2, N. Birkmyre (Ariel) 21 m. 20 s.; 3, J. M. Russell (London R.C.), 21 m. 26 s.

SKATING, 1959–60

WORLD FIGURE SKATING CHAMPIONSHIPS

(Vancouver)

Men.—1, A. Giletti (France) 1,286·2 pts.; 2, D. Jackson (Canada), 1,272·9 pts.

Ladies' Sporting Championship.—The Marchioness Townshend, 41/50.

Ladies' Skeet Championship.—Mrs. J. P. Breckon (York) 36/50.

Coronation Cup.—R. Townroe (Warsop).

English Single-Barrel Championship.—E. Fear (Sheffield) 98/100.

English Double-Rise Championship.—H. B. Smith (Blyth) 170/200.

ARCHERY, 1960

British Championships

Men.—1, G. Brown, 1,737 pts.; 2, J. R. Oldfield, 1,710 pts.; 3, P. R. Blair, 1,691 pts.

Ladies.—1, Miss J. F. Taunton, 1,750 pts.; 2, Mrs. B. S. Douthwaite, 1,704 pts.; 3, Mrs. D. Lavis, 1,698 pts.

County Championship.—(*Men*).—1, Warwickshire 6,037 pts.; 2, Lancashire 5,932 pts.; 3, London 5,686 pts. (*Ladies*).—1, Warwickshire 6,166 pts.; 2, Surrey 6,081 pts.; 3, Lancashire 5,731 pts.

World Championships

(1959—held biennially)

Men.—1, J. Caspers (U.S.A.); 2, R. Kadlec (U.S.A.); 3, J. Neely (U.S.A.). *Ladies.*—1, Miss A. Corby (U.S.A.); 2, Mrs. S. Johansson (Sweden); 3, Mrs. L. Shine (U.S.A.). *Teams.*—(*Men*).—U.S.A.; 2, Belgium; 3, Sweden. (*Ladies*).—1, U.S.A.; 2, Great Britain; 3, Czechoslovakia.

British National Records

Flight Shooting (*Distance*).—490 yards, J. Flinton, 1955.

York Round (*Men*).—6 doz. arrows at 100 yds., 4 doz. at 80 yds. and 2 doz. at 60 yds.; R. D. Matthews, 991 pts., 1958.

Double York Round.—R. D. Matthews, 1,933 pts., 1958.

Hereford Round (*Ladies*).—6 doz. arrows at 80 yds., 4 doz. at 60 yds., and 2 doz. at 50 yds.; Miss J. Warner, 942, 1956.

Double Hereford Round.—Miss J. Warner, 1,817 pts., 1956.

BOXING, 1960

A.B.A. Championships

(Winners)

Flyweight.—D. Lee (Woodhall, Scotland) (pts.); *Bantam*—F. Taylor (Lancaster) (pts.); *Feather*—P. Lundgren (pts.); *Light*—R. McTaggart (Dundee) (2nd round); *Light-Welter*—R. Day (Lancaster) (pts.); *Welter*—C. Humphreys (Porthcawl) (pts.); *Light-Middle*—W. Fisher (Craigneuk, Scotland) (pts.); *Middle*—A/C R. Addison (R.A.F.) (pts.); *Light-Heavy*—J. Ould (Fisher) (pts.); *Heavy*—L/Sgt. L. R. Hobbs (Army) (pts.).

Universities

Cambridge University beat Oxford University by six bouts to three.

Professional Boxing

World Champions

Title holders in Oct. 1960

Flyweight—P. Kingpetch (Thailand); *Bantamweight*—J. Becerra (Mexico); *Featherweight*—D. Moore (U.S.A.); *Lightweight*—J. Brown (U.S.A.); *Welterweight*—D. Jordan (U.S.A.); *Middleweight*—P. Pender (U.S.A.) or G. Fullmer (U.S.A.); *Light-Heavyweight*—(vacant); *Heavy-weight*—F. Patterson (U.S.A.).

British Champions

Title holders in Oct. 1960

Flyweight—J. Caldwell (N. Ireland); *Bantamweight*—F. Gilroy (N. Ireland); *Featherweight*—T. Spinks (England); *Lightweight*—D. Charnley (England); *Welterweight*—W. Swift (England); *Middleweight*—T. Downes (England); *Light-Heavyweight*—C. Calderwood (Scotland); *Heavyweight*—H. Cooper (England).

British Empire Champions

Title holders in Oct. 1960

Flyweight—D. Adams (South Africa); *Bantamweight*—F. Gilroy (N. Ireland); *Featherweight*—P. Lewis (Trinidad); *Lightweight*—D. Charnley (England); *Welterweight*—B. Curvis (Wales); *Middleweight*—W. Greaves (Canada); *Light-Heavyweight*—C. Calderwood (Scotland); *Heavyweight*—H. Cooper (England).

European Champions

Title holders in Oct. 1960

Flyweight—R. Luukonen (Finland); *Bantamweight*—F. Gilroy (N. Ireland); *Featherweight*—G. Lamperti (France); *Lightweight*—D. Charnley (England); *Welterweight*—D. Loi (Italy); *Middleweight*—G. Scholz (W. Germany); *Light-Heavyweight*—E. Schoeppner (W. Germany); *Heavyweight*—D. Richardson (Wales).

WRESTLING, 1960

British Open Championships

Flyweight—S. O'Connor (Slough); *Bantamweight*—W. Pilling (Bradford); *Featherweight*—A. Aspen (Bolton); *Lightweight*—K. Stephenson (Bury); *Welterweight*—J. Feeney (Eire); *Middleweight*—A. Butts (Birmingham); *Light-Heavyweight*—J. Maletzky (Austria); *Heavyweight*—K. Richmond (London).

BILLIARDS AND SNOOKER, 1959-60

World Amateur Billiards Championship (last held in 1958).—1, W. Jones (India); 2, A. L. Driffield (England); 3, T. Cleary (Australia).

English Amateur Billiards Championship.—J. H. Beetham beat R. C. Wright by 3,426–2,289 pts.

World Open Snooker Championship (Brisbane, June 1960).—1, F. Davis (G.B.); 2, F. van Rensburg (S. Africa) and N. Squire (Australia).

English Amateur Snooker Championship.—R. Gross beat J. Price by 11–4 frames.

"News of the World" £1,750 Snooker Tournament.—*Winner*—J. Davis; *Runner-up*—F. Davis.

Women (Amateur).—*Billiards:* Miss M. Hazeldine; *Snooker:* Mrs. D. Thompson.

Boys' Billiards Championship—T. Matthews.

Boys' Snooker Championship—N. Cripps.

B.A. and C. C. Youths.—*Billiards:* D. Bend; *Snooker:* D. Bend.

Record Breaks

Billiards (Professional).—W. Lindrum, 4,137 *v.* J. Davis, Jan. 19–20, 1932.

Championship (under Amended Baulk Line Rules).—J. Davis, 1,784 in 1936.

Non-Championship (under Amended Baulk Line Rules).—W. Lindrum, 3,752 (Australia 1944).

All Round Break (without Nursery Cannons).—W. Smith, 2,743 in 1928.

Spot Stroke.—W. J. Peall, 3,304 in 1890. (NOTE.—The whole score 3,304 was not made by the spot stroke. The break included spot-stroke runs of 92, 151, 123, 172, 120 and 400.)

YORKSHIRE M.C.—E. A. Shepherd, 6 Station Road, Clayton, Bradford, Yorks.
YORKSHIRE RAMBLERS' CLUB.—E. C. Downham, 1 Crestville Road, Clayton, Bradford, Yorks.

In addition, most universities, colleges and branches of the armed services have mountaineering clubs open to members of the respective University, college or service.

HOMES OF SPORT

RACING

The two most famous homes of British flat racing are Newmarket and Epsom. The former, the home of the Jockey Club and the headquarters of British racing since the days of Charles II, who paid frequent visits there, is the scene of two of the "Classics", the 2,000 and 1,000 Guineas, and of many other important races, including the Cesarewitch and the Cambridgeshire, the "Autumn Double". At Epsom, with the exception of the war years, the Derby has been run since 1780 and the Oaks since 1779. The Coronation Cup also takes place during the Derby meeting. There are many trainers' establishments at both Newmarket and Epsom. The fifth classic race, the St. Leger, is run at Doncaster in September.

Two events of long-standing social, as well as racing, significance are the Royal Ascot meeting in June and the Goodwood meeting at the end of July. The latter is the only occasion during the year at which racing takes place at Goodwood, but there are a number of meetings on Ascot Heath, including that at which the very valuable King George VI and Queen Elizabeth Stakes, an important feature in the present-day racing programme, is run.

Courses near London include Alexandra Park (Wood Green), Hurst Park (near Hampton Court), Kempton Park (Sunbury-on-Thames), Sandown Park (Esher) and Windsor. Among important courses in other parts of the country may be mentioned Lincoln and Manchester, the scenes of the first and last big flat races of the season, the Lincolnshire and Manchester November Handicap, respectively, and York and Chester, the homes of the Ebor Handicap and Chester Cup. Steeplechasing and hurdling under National Hunt rules also take place during the winter at many centres of flat racing.

The Grand National steeplechase is run over a distance of 4 m. 856 yds., with 30 fences, at Aintree near Liverpool. Other very important races under National Hunt rules, including the Cheltenham Gold Cup and the Champion Hurdle, take place at the National Hunt meeting at Cheltenham, while the King George VI Steeplechase at Kempton Park on Boxing Day has in recent years been very popular.

CRICKET

Test matches are now played on six English grounds—Lord's, The Oval, Trent Bridge (Nottingham), Old Trafford (Manchester), Headingley (Leeds) and Edgbaston (Birmingham). In the normal course, five Test Matches are played against visiting teams to England and take place at Lord's, the Oval and three out of the other four test-match grounds, one dropping out each season in turn.

Lord's, the headquarters of Cricket and of the M.C.C., is the third ground of the name. Thomas Lord founded his first ground in 1787, and after two moves, established it on the present site at St. John's Wood in 1814. Middlesex play almost all their home matches at Lord's, as do Surrey at the Oval at Kennington, which has been the home of Surrey cricket since 1846.

In addition to the grounds already mentioned, others of great historic interest and current importance include, in the South, the Sussex county ground at Hove and the St. Lawrence ground at Canterbury, and in the North, Bramall Lane (Sheffield) and the ground at Scarborough, where the annual end-of-season Festival has taken place since last century.

ASSOCIATION FOOTBALL

The F.A. Cup Final has been held at Wembley Stadium since 1923, on the famous occasion when the crowd invaded the ground. Since then admission to the Cup Final has been by ticket only, but the Stadium can accommodate about 100,000 spectators. Many international matches and the F.A. Amateur Cup Final also take place at Wembley.

Wembley is, however, surpassed in capacity by Hampden Park, Glasgow, where the record for paying spectators is 149,547. England *v.* Scotland matches take place at Wembley and Hampden Park in alternate years.

London teams, with their grounds, currently playing in First Division football are as follows: Arsenal (Highbury), Chelsea (Stamford Bridge), Fulham (Craven Cottage), Tottenham Hotspur (White Hart Lane) and West Ham United (Upton Park).

RUGBY FOOTBALL

The three most famous centres of Rugby Union Football in the United Kingdom, scenes of many international matches, are Twickenham, the headquarters of the Rugby Union, Cardiff Arms Park and Murrayfield (Edinburgh). The University match and the games for the Services Championship are also played at Twickenham, where, in addition, most of the Harlequins' home matches take place. Of other famous London clubs, Blackheath play at the Rectory Field, Blackheath, Richmond and London Scottish share the Richmond Athletic Ground and the London Welsh occupy

the nearby Old Deer Park. Rosslyn Park, who for many years played at the latter, now have a ground of their own at Roehampton. The Wasps' ground is at Sudbury.

GOLF

The links at St. Andrews, the home of the Royal and Ancient Golf Club and the traditional centre of golf, remain the most famous in the world. Other great Scottish courses are at Muirfield, Prestwick and Troon.

The last Ryder Cup match in this country was played at Lindrick and the Professional Match Championship has many times taken place at Walton Heath in Surrey. Except for Sandwich, however, most of the major championship courses are now either in Scotland or in Lancashire or Cheshire (e.g. Hoylake, Formby, Birkdale and Royal Lytham and St. Annes). Other famous golfing centres are Rye, Burnham and Westward Ho! and in Wales, Harlech and Porthcawl.

ATHLETICS

While the number of running tracks in this country is slowly increasing and well-attended meetings are held in many centres, most of the international matches and events such as the A.A.A. Championships and the University Sports take place at the White City Stadium at Shepherd's Bush. The 1958 Empire Games were held at Cardiff and the 1948 Olympic Games at Wembley.

LAWN TENNIS

The All-England Lawn Tennis Championships have been played at Wimbledon since their inception in 1877, first on the former ground at Worple Road and more recently on the present courts of the All-England Lawn Tennis Club in Church Road. Bournemouth is the venue of the British Hard Court Championships, and in recent years one of the leading Professional Tournaments in this country, the Slazenger Championship, has taken place at Devonshire Park, Eastbourne.

TENNIS, RACKETS, ETC.

The chief centre for tennis and rackets may be said to be Queen's Club in West Kensington. A number of other tennis courts are still in use, notably at Lord's, where the M.C.C. Gold and Silver Prizes are important events, Hampton Court (built by Henry VIII in 1530), Oxford, Cambridge, Canford School, Leamington and Manchester. Many of the leading squash rackets matches take place in the courts belonging to West End Clubs.

ROWING

Most of the leading rowing events of the year are contested on the River Thames. The Henley Regatta continues to attract the foremost oarsmen from all over the world. Apart from the Boat Race, several other important races take place either from Putney to Mortlake or in the reverse direction, including the Thames Head of the River Race and the Wingfield Sculls. The course for Doggett's Coat and Badge, instituted in 1715, possibly the oldest sporting event still regularly contested, is from London Bridge to Chelsea. The rowing events in the 1958 Empire Games took place on Lake Padarn in Wales.

YACHTING

Cowes, the headquarters of the Royal Yacht Squadron and of the Royal London Yacht Club and the scene of the great Cowes Week at the beginning of August, is still the most famous name in British yachting, but there are many other centres of the sport. Among others on or near Spithead and the Solent are Bembridge, Ryde, Yarmouth, Southampton and Hamble and, elsewhere, Burnham-on-Crouch, Poole Harbour, Weymouth, Plymouth, Falmouth and the Clyde.

POLO

In recent years, the polo grounds at Cowdray Park, Midhurst, and at Windsor have become the two most important centres of the sport in this country, though a number of other grounds exist, among which those at Woolmers Park, Hertfordshire and Cirencester may be mentioned.

OTHER SPORTS

The National Rifle Association's annual meeting at its headquarters at Bisley Camp, near Brookwood, Surrey, is the chief event in the rifle-shooting programme. Since the closing of Harringay Arena, many big boxing programmes have been staged at the Empire Pool, Wembley, and well-known provincial centres of the sport are the Liverpool Stadium and the Granby Halls, Leicester. The Greyhound Derby is run at the White City and the Waterloo Cup, the most important coursing prize, at Altcar, Lancashire.

BROADCAST RECEIVING LICENCES

Sound.—Broadcast Receiving Licences (excluding television) may be obtained at most Post Offices at a charge of £1.

Television.—Broadcast Receiving Licences (including television) are obtainable at most Post Offices for £4 (issue fee £3, plus £1 duty). If application is made at any post office which conducts wireless licence business, but does not stock television licences, arrangements will be made for a licence to be issued from the local Head Post Office and forwarded by post to the applicant. If the applicant holds an unexpired (£1) sound licence it should be surrendered when the television licence is applied for and the price of the television licence will be abated at the rate of 1s. 8d. for each month of the unexpired portion of the surrendered (£1) licence.

Blind Persons.—Blind persons who produce the required certificates of registration may obtain free sound licences or concessionary television licences for £3 (issue fee £2 plus £1 duty) or £2 in Jersey or Sark.

Licensing requirements.—One licence (which must be a television licence if a television set is used anywhere in the household) covers any number of sets in a single household; but lodgers, paying guests and occupiers of flats (even if not self-contained) count as separate householders and require separate licences. Licences are required both for self-contained sets and for loudspeakers worked by wire extensions from main receiving sets outside the household concerned. Licences are also required by those using apparatus which is rented or hired. A separate licence is necessary for a broadcast receiving set fitted in a motor-car.

Period of Validity.—An initial licence (either sound or television) is dated to expire twelve months from the last day of the month preceding that of issue. Thereafter all renewal licences are dated to expire one year after the licence they supersede.

LITERATURE OF THE YEAR

Book Production 1959–60

DURING 1959 British publishers issued a total of 20,690 titles, of which 15,168 were new books and 5,222 were reprints and new editions. These figures were fewer than those for the previous year (total, 22,143; new books, 16,172; reprints, 5,971) which had been the highest ever recorded. The reduction was due, not to any diminution in the number of MSS which publishers judged to be publishable (during the first six months of 1959 more titles were issued than in the corresponding period of 1958) but to a dispute in the printing industry which brought general printing to a standstill for seven weeks throughout the country in the summer of 1959. In 1960 publishers briskly made up for the inescapable restraints of 1959; during the first nine months of 1960 they issued a total of 17,601 titles (new books, 12,974; new editions, 4,627) figures greater in each respect than those for the corresponding period of the record year 1958 (total, 16,328; new books, 11,738; new editions, 4,590).

To those who hold that the health of a nation's literature can best be measured by the output of new works, the continuing increase in the number of the new books produced in Britain is a source of satisfaction and pride. To others, including many in the book trade itself, an increased production of new books that is unaccompanied by a corresponding increase in the public's purchase of them is disturbing. In 1959 British publishers' receipts amounted to £66,945,183, a record figure higher by something over £3,300,000 than the 1958 total. Of the 1959 total £25,393,960 came from overseas; from sales in the United Kingdom publishers received £41,551,223, an increase over the 1958 figure of £1,760,022. In preceding years successive increases in receipts from the U.K. were: 1958, £1,840,546; 1957, £2,161,765; 1956, £4,505,887. In March, 1960, the annual report of the Publishers Association said: " On closer inspection the figures show some disquieting features. The amount of business done through retailers at home shows no increase at all, and it is significant that the number of new booksellers applying to be listed in the Association's directory has fallen sharply." In June, 1960, the chairman of an important group of general publishers, referring to the " static condition " of bookshop sales, said: " British publishers must view with disquiet the relatively small increases in home business in recent years—if indeed, having regard to higher published prices due to increased costs, the home turnover has in real terms risen at all since 1956."

In such an uncertain economic climate the fortunes of the unestablished creative writer who does not expressly address himself to the requirements of the popular market become more hazardous, and the sponsorship of the experimental, " uncommercial " book of promise, upon the fostering of which the development of literature has always depended, less assured. With such considerations as these in mind an organization called the Phoenix Trust was founded towards the end of 1959 with the object of providing funds for literature and the arts. To further the Trust's objects in the field of literature a number of publishers agreed to contribute voluntary royalties on out-of-copyright books published by them. Interviewed by a newspaper, one supporting publishers said: " Of course the big question is 'Who's to get the money?' I suppose the queue is already forming."

Whatever vicissitudes may afflict the author, there can be no doubt that the general reader has never been more richly catered for than he is today. What has been called " the Paperback Revolution " maintains its spectacular progress, and in 1960, which saw the 25th birthday of Penguin Books (the first and still the greatest of the paperbacks) there were available to the reader more than 100 different series of paperbacks from more than 60 publishing houses. Ranging over the whole field of literature, from popular entertainment to the highest scholarship, these books (which in all categories sometimes achieve unprecedentedly large sales) constitute one of the most interesting phenomena of the present age.

Public Lending Right

Sir Alan Herbert produced in March a memorandum, " Public Lending Right: Authors, Publishers and Libraries ", which represented the findings and recommendations of a committee appointed by the Society of Authors under his chairmanship to examine ways of securing for authors and publishers some remuneration in respect of library borrowings. A draft Bill established a Public Lending Right under copyright law. The right proposed was one parallel to the public performing right, which should remain with the author, who would normally share it with his publisher, as the musicians do. The library authorities would, in return for the grant of Public Lending Right, make annual payment to an Authors' and Publishers' Lending Right Association, to be supervised by the Minister of Education. The fees received would be distributed in accordance with a points system similar to that in use by the Performing Right Society, by which points are awarded according to the character as well as the " popularity " of a work.

The object of the promoters of the measure was set out in the preamble to the draft Bill, which read: " Whereas the public lending of printed books and plays is an advantage to the community but not in every case to the authors and publishers of these works, and especially the free public libraries were established, and ought to be maintained, as powerful instruments of education, but through the great expansion of the public libraries and the increased lending of books to the people at small charge or no charge at all it is made continually more difficult for the producers of books both authors and publishers, to secure a due reward for their labours by the sale of books in the open market and so to provide good books at reasonable prices; and it is expedient that Parliament, which cares for education and provides free books for the people, should concern itself also with the welfare of the producers."

Opposition was at once forthcoming from some librarians, including the Library Association itself. In a letter to *The Times* of March 21, Sir Alan Herbert wrote: " The sour, superior, sterile response of the library world is not merely discouraging but disgusting." The Council of the Library Association felt that no useful purpose would be served by a meeting with Sir Alan's committee, and the promoters, who stated that they had nevertheless received constructive and friendly advice from many librarians and believed the main body to be sympathetic, proceeded alone. On July 21, Mr. Woodrow Wyatt, M.P., a member of the Society of Authors, introduced into the House of Commons a Libraries (Public Lending Right) Bill, which was ordered to be printed in preparation for its second reading during the next session.

The promoters based their calculation that the fees to be derived might be of the order of £1m. to £1½m. on the 1957–58 expenditure on public

libraries. This was a total expenditure of £15,050,000, expenditure on books being £3,435,000. In September the Library Association issued figures for the year 1958–59, showing that the total expenditure had risen to £18,773,033, and expenditure on books to £4,550,000.

The London Library

In October, 1959, the London Library appealed in the Court of Appeal against the decision of the Lands Tribunal that the Library ought no longer to enjoy the immunity from rate-paying which it has enjoyed for over a hundred years under the Scientific Societies Act of 1843. The decision was made on the ground that the Act required that to enjoy such immunity an institution should be instituted exclusively for the purposes of literature and that it should be " supported wholly or in part by voluntary contributions ". In a reserved judgment delivered on November 4th the Court of Appeal upheld the decision of the Lands Tribunal, finding that only a small part of the Library's income could be regarded as derived from annual voluntary contributions. An appeal for funds was at once launched by Mr. T. S. Eliot, O.M. and Mr. Rupert Hart-Davis, president and chairman of the Library respectively, who stated that the rating liability dating from 1956 and the legal costs amounted to a debt of more than £20,000. The widespread sympathy expressed for the Library included a message from Sir Winston Churchill. " The debt of those who have benefited over the years from the services of this famous institution is great, " he wrote. " The closing of this most worthy foundation would be a tragedy." Speaking of the results of the appeal at the Library's annual general meeting in July, Sir Harold Nicolson said that the biggest single benefactor had been Mr. E. M. Forster, who had presented the manuscript of " A Passage to India " for sale. It had fetched £6,500.

Prizes for Literature

The Nobel Prize for Literature, 1959, was awarded by the Swedish Royal Academy to the Italian poet, Salvatore Quasimodo, " for his lyrical poetry, which with classical fire expresses the tragic experience of life in our own times ".

The James Tait Black Prizes were awarded to Christopher Hassell for his " Edward Marsh " (biography) and Morris West for his " The Devil's Advocate " (fiction).

The Queen's Gold Medal for Poetry was awarded to John Betjeman.

The Heinemann Awards for 1959 were presented to Morris West for " The Devil's Advocate " and to C. A. Trypanis for his collection of poems, " The Cocks of Hades ".

The Library Association's Carnegie Medal for an outstanding book for children was awarded to Rosemary Sutcliff for her " The Lantern Bearers ". The Kate Greenaway Medal for the illustration of children's books went to William Stobbs.

The first W. H. Smith Literary Award of £1,000 was given to Patrick White for his novel " Voss ".

The William Foyle Poetry Prize of £250 was awarded to Robert Graves for his " Collected Poems " and his new translation of the Iliad " The Anger of Achilles ".

The Duff Cooper Memorial Award was given to Patrick Leigh-Fermor for his travel book " Mani ".

The John Llewellyn Rhys Memorial Prize was awarded to David Caute for his " At Fever Pitch ".

The Guinness Poetry Awards, 1959, were divided equally among W. H. Auden, Robert Lowell, the late Edwin Muir and Dame Edith Sitwell.

The first award of the literary prize for short stories by English and French writers instituted by the Municipality of Menton in memory of Katharine Mansfield was made to Frank Tuohy and Luce Amy.

BOOKS PUBLISHED

Among the books published between October, 1959, and October, 1960, were the following:

Biography

" Full Circle, The Memoirs of Sir Anthony Eden "; " The Life and Times of Ernest Bevin ", Vol. I by Alan Bullock; " Herbert Morrison, An Autobiography "; " Lord Derby," by Randolph S. Churchill; " Unofficial History," by Sir William Slim; " The Memoirs of the Rt. Hon. the Earl of Woolton "; " F.E.," by the Earl of Birkenhead; " The Inner Circle," by Sir Ivone Kirkpatrick; " The Private Papers of Hore-Belisha," ed. R. J. Minney; " Curzon, The End of an Epoch," by Leonard Mosley; " Lord Lothian," by Sir James Butler; " Friends," by Lord Beaverbrook; " Cyril Forster Garbett," by Charles Smyth; " The Memoirs of Lord Ismay "; " Auchinleck," by John Connell; " A Full Life," by Lt. Gen. Sir Brian Horrocks; " Gilbert Murray: An Unfinished Autobiography "; " Lonely But Not Alone," by H.R.H. Wilhelmina, Princess of the Netherlands; " Lugard: The Years of Authority," by Margery Perham; " The Observer and J. L. Garvin, 1908–1914," by A. M. Gollin; " Trumpets from the Steep," by Lady Diana Cooper; " Hons and Rebels," by Jessica Mitford; " Cider with Rosie," by Laurie Lee; " Sowing," by Leonard Woolf; " Married to Tolstoy," by Cynthia Asquith; " My Grandmothers and I," by Diana Holman Hunt; " The Truth about a Publisher," by Sir Stanley Unwin; " The Buried Day," by C. Day Lewis; " The Sign of the Fish," by Peter Quennell; " I Am My Brother," by John Lehmann; " Home and Away," by John Pudney; " That Great Lucifer," by Margaret Irwin; " Snake Man," by Alan Wykes; " The Passionate Sightseer," by Bernard Berenson; " Berenson," by Sylvia Sprigge; " The Macdonald Sisters," by A. W. Baldwin; " Frederick Delius," by Sir Thomas Beecham; " The Goncourt Brothers," by André Billy; " Dickens Incognito," by Felix Aylmer; " Fountain of the Elephants," by Desmond Young; " An Occupation for Gentlemen," by Frederic Warburg; " The Ante Room," by Lovat Dickson; " The Life and Work of Edmund Bishop," by Nigel Abercrombie; " Sickert," by Lilian Browse; " Rider Haggard," by Morton Cohen; " Joseph Conrad," by Jocelyn Baines; " The Brookes of Sarawak," by Sir Steven Runciman; " The White Rajahs of Sarawak," by Robert Payne; " In Pursuit of the English," by Doris Lessing; " Selfridge," by Reginald Pound; " Doctor Goebbels," by Roger Manvell and Heinrich Fraenkel; " Senator Joe McCarthy," by Richard Rovere; " Action This Day," by Admiral Sir Philip Vian; " Footprints in the Sea," by Capt. Augustus Agar; " Francis Thompson," by J. C. Reid; " Steps to Immaturity," by Stephen Potter; " Wilfred Grenfell," by J. Lennox Kerr; " A Hermit Disclosed," by Raleigh Trevelyan; " Marcel Proust," by R. H. Barker; " Marcel Proust," by G. D. Painter; " Act One," by Moss Hart; " Flora Robson," by Janet Dunbar; " Autobiography," by Cecil B. de Mille.

Fiction

" The Mansion," by William Faulkner; " Clea," by Lawrence Durrell; " Casanova's Chinese Restaurant," by Anthony Powell; " Trustee from the Toolroom," by Nevil Shute; " The Wayward Wife," by Alberto Moravia; " Two Weeks in Another Town," by Irwin Shaw; " The Affair," by C. P. Snow; " The Chinese Love Pavilion," by Paul Scott; " Jeeves in the Offing," by P. G. Wode-

house; "The War Lover," by John Hersey; "The Devil's Advocate," by Morris West; "Fuel for the Flame," by Alec Waugh; "Take a Girl Like You," by Kingsley Amis; "Advise and Consent," by Allen Drury; "Free Fall," by William Golding; "The Hooligan," by Rudolf Nassauer; "The Bachelors," by Muriel Spark; "The Ballad of Peckham Rye," by Muriel Spark; "The Sea Change," by Elizabeth Jane Howard; "A Number of Things," by Honor Tracy; "The Leopard," by the Prince of Lampedusa; "Aimez-Vous Brahms," by Françoise Sagan; "Guest of Honour," by Diana Raymond; "The Loneliness of the Long-Distance Runner," by Alan Sillitoe; "The Moon Through a Dusty Window," by John Lodwick; "Hawaii," by James Michener; "Tiara Tahiti," by Geoffrey Cotterell; "The Nylon Pirates," by Nicholas Monsarrat; "The Vodi," by John Braine; "When the Kissing Had to Stop," by Constantine Fitzgibbon; "Road Through the Woods," by Pamela Frankau; "Imperial Caesar," by Rex Warner; "The Visit of Brother Ives," by Ernest Raymond; "The Dean's Watch," by Elizabeth Goudge; "To Kill a Mockingbird," by Harper Lee; "The Grace Divorce," by Frank Swinnerton; "The Numbered Account," by Ann Bridge; "The Winston Affair," by Howard Fast; "Mr. Love and Mr. Justice," by Colin MacInnes; "A Kind of Loving," by Stan Barstow; "I Can Take it All," by Anthony Glyn; "Doctor and Son," by Richard Gordon; "When the Green Woods Laugh," by H. E. Bates; "An Aspidistra in Babylon," by H. E. Bates; "The Vicar's Daughter," by Angela Thirkell; "The Storms of Summer," by John Iggulden; "The Country Girls," by Edna O'Brien; "The Patriots," by James Barlow; "Watcher in the Shadows," by Geoffrey Household; "A Twist of Sand," by Geoffrey Jenkins; "The Venus of Konpara," by John Masters.

Literature and Criticism

"Boswell for the Defence, 1769–1774" (*The Boswell Papers*); "Literature and Western Man," by J. B. Priestley; "The Art of Writing," by André Maurois; "From Gautier to Eliot," by Enid Starkie; "The Necessary Angel," by Wallace Stevens; "The Writer and His World," (essays) by Charles Morgan; "A Critical History of English Literature," by David Daiches; "Shakespeare's Wooden O," by Leslie Hotson; "Image and Experience," by Graham Hough; "The Anger of Achilles," by Robert Graves; "A Reader's Guide to James Joyce," by William York Tindall; "Arnold Bennett and H. G. Wells," ed. Harris Wilson; "The Art of Rudyard Kipling," by J. M. S. Tompkins; "Six Thousand and One Nights," by W. A. Darlington; "The Letters of Stephen Crane," ed. R. W. Stallman and L. Gilkes.

Poetry

"Homage to Clio," by W. H. Auden; "The Solitudes," by Ronald Duncan; "Lupercal," by Ted Hughes; "Collected Poems," Vol. III, by Roy Campbell; "Collected Poems," by Lawrence Durrell; "Collected Poems," by William Plomer; "Poems," by Wilfrid Noyce; "Collected Poems, 1921–1958," by Edwin Muir; "The Gravel Ponds," by Peter Levi, S.J.; "Collected Poems of Gerald Bullett"; "The Prodigal Son," by James Kirkup; "The Atlantic Book of English and American Verse," ed. Dame Edith Sitwell.

Religion and Philosophy

"The Church of Apostles and Martyrs," by H. Daniel-Rops; "The Pastoral Sermons of Ronald A. Knox"; "Approaches to Christian Unity," by C.-J. Dumont; "The Gospel According to Thomas"; "The Monks of Qumran," by Edmund F. Sutcliffe; "The Religious Orders in England," Vol. 3, by D. Knowles; "St. Ignatius Loyola: Letters to Women," ed. Hugo Rahner, S.J.; "The Four Loves," by C. S. Lewis; "Fathers of the Kirk," ed. Ronald Selby Wright; "A Church History of Scotland," by J. H. S. Burleigh; "The Son of Man," by François Mauriac; "A Working Faith," by Joost de Blank; "Wittgenstein's Notebooks, 1914–16"; "The Secret Books of the Egyptian Gnostics," by Jean Doresse; "Victor and Victim," by J. S. Whale; "The Ladder of Temptations," by Canon Blair.

History

"The World of Rome," by Michael Grant; "Good-bye Dolly Gray," by Rayne Kruger; "The Defeat of the Spanish Armada", by Garrett Mattingly; "The First World War," by Cyril Falls; "A New History of the United States," by William Miller; "Herbert Hoover and the Great Depression," by Harris Gaylord Warren.

Travel

"A Time in Rome," by Elizabeth Bowen; "A Tourist in Africa," by Evelyn Waugh; "Riding to the Tigris," by Freya Stark; "Harvest of Journeys," by Hammond Innes; "From a Persian Tea-House," by Michael Carroll; "Paris," by John Russell; "Venice," by James Morris; "London," by Ivor Brown; "Edinburgh," by Eric Linklater; "Arabian Sands," by Wilfred Thesiger; "The Colossus of Maroussi," by Henry Miller; "Oriental Pilgrimage," by Martin Hürlimann; "Children of Lilith," by Guy Piazzini; "Gone Away," by Dom Moraes; "The White Spider," by Heinrich Harrer; "China in the Morning," by Nicholas Wollaston.

General

"For Victory in Peaceful Competition with Capitalism," Speeches by Nikita Khrushchev; "Khrushchev," by George Paloczi-Horvath; "The Communist Party of the Soviet Union," by Leonard Shapiro; "Stages of Economic Growth," by Walt Whitman Rostow; "Europe Will Not Wait," by Anthony Nutting; "The War, 1939–1945," ed. Desmond Flower and James Reeves; "The Longest Day," by Cornelius Ryan; "The Desert Generals," by Correlli Barnett; "The Fall of Singapore," by Frank Owen; "Abandon Ship!" by Richard F. Newcomb; "The Battle of Britain," by Edward Bishop; "The Price of Victory," by R. W. Thompson; "Out of the Smoke," by Ray Parkin; "Bamboo Doctor," by Stanley S. Pavillard; "The Foxes of the Desert," by Paul Carell; "Narvik," by Donald MacIntyre; "The Mind of an Assassin," by Isaac Don Levine; "The Lore and Language of Schoolchildren," by Iona and Peter Opie; "The Criminal Prosecution in England," by Patrick Devlin; "Weekend in Dinlock," by Clancy Sigal; "Look Back and Laugh," by A. P. Herbert; "Meeting with Japan," by Fosco Maraini; "Nelson's Atlas of the Classical World," ed. Van der Heyden & Scullard; "The Stones of Florence," by Mary McCarthy; "Turner," by Sir John Rothenstein and Martin Butlin; "The National Gallery," by Sir Philip Hendy; "The Art of Byzantium," by David Talbot Rice; "Born Free," by Joy Adamson; "Zoo Quest in Paraguay," by David Attenborough; "My Year with the Woodpeckers," by Hans Sielmann; "Ride a Rhino," by Michaela Denis; "Ring of Bright Water," by Gavin Maxwell; "A New Earth," by Elspeth Huxley; "Advertising: A New Approach," by Walter Taplin; "Clean and Decent," by Lawrence Wright; "What to See in a Country Church," by Lawrence E. Jones; "The Correspondence of Isaac Newton," ed. H. W. Turnbull; "Prohibited Immigrant," by John Stonehouse; "Sheila in the Wind," by Adrian Hayter; "The Court of St. James," by E. S. Turner; "The Status Seekers," by Vance Packard.

Principal Book Publishers and Their Addresses

More than 3,700 firms, individuals and societies have published one or more books in recent years. The list which follows is a selective one comprising, in the main, those firms whose names are most familiar to the general public. An interleaved list containing over 2,000 names and addresses is available, price 5s. cd. post free, from the publishers of "Whitaker."

Abelard-Schuman, 38 Russell Sq., W.C.1.
Aberdeen University Press, Aberdeen.
Adprint, 37 Hertford St., W.1.

BOOK PRODUCTION AND BOOK EXPORTS

Figures issued by The Publishers Association (based on information supplied to its Chartered Accountants by individual publishers) show a marked increase in book exports since the outbreak of war in 1939. The totals for the years 1948 to 1959 are shown below :—

Year	Total value of Books produced in U.K.	Total value of Books exported from U.K.
1948	£33,241,431	£8,739,236
1949	34,297,252	9,798,838
1950	37,158,652	11,394,220
1951	41,553,760	13,740,323
1952	42,790,387	14,482,036
1953	44,892,291	15,566,874
1954	£46,270,953	£16,527,054
1955	49,439,087	18,156,084
1956	56,659,484	20,870,554
1957	60,456,095	22,505,440
1958	63,608,654	23,817,453
1959	66,945,183	25,393,960

BOOKS PUBLISHED IN GREAT BRITAIN IN 1959

This Table, from *The Bookseller* of January 2, 1960, shows the books published in 1959 with the number of new editions, translations and limited editions.

Books and pamphlets priced at less than 6*d.* have been omitted, as are also all Government publications except the more important issued by H.M. Stationery Office.

COPYRIGHT

The Government Department dealing with Copyright is the *Industrial Property Department, Board of Trade*, 25 Southampton Bldgs., W.C.2.

Subject to the provisions of the Copyright Act, 1956, copyright subsists automatically in every original literary, dramatic, musical and artistic work and continues to subsist until the end of the period of fifty years from the end of the calendar year in which the author died and shall then expire. *No registration or other formalities are required in order to obtain the protection of the Act.* Protection is conferred not only against reproduction but also against the public performance of a work without permission. Copyright may also subsist in sound recordings, cinematograph films and television and sound broadcasts. Libraries entitled to receive free copies of books published in the United Kingdom, are the British Museum, the Bodleian Library, Oxford, University Library, Cambridge, the National Library of Wales, the National Library of Scotland and Trinity College, Dublin.

Voluntary Registration at Stationers' Hall.—Compulsory registration at Stationers' Hall terminated on Dec. 31, 1923, but in the following year the Stationers' Company established a *new* Register in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being 10*s.* for a Book, or a Fine Art; certified copies 10*s.* in either case. The fee for a search is 5*s.*

MUSIC AND OPERA OF 1959–60

(1959) **Oct. 2.** The City of Birmingham Symphony Orchestra appeared at the Festival Hall. **4.** The Deutschland Radio Singers, Berlin Radio Choir and East Berlin Radio Symphony Orchestra, on a visit to England, performed Beethoven's Mass in D at the Festival Hall. The conductor was Rolf Kleinert, and the soloists included Rolf Apreck, Hellmuth Kaphahn, Sona Cervena and Jutta Vulpius. On the following day the company sang Handel's oratorio *Belshazzar*, conducted by Helmut Koch, and on Oct. 6 repeated the performance at the Coventry Festival. **7.** At the B.B.C.'s first Festival Hall concert of the season, the conductor was the Swiss, Ernest Ansermet, and works by two Swiss composers, Honegger and Frank Martin, were performed. **13.** The Sadler's Wells opera season opened with a new production of Giordano's *Andrea Chenïev*. **18.** The first of two concert performances of *Don Giovanni* was given at the Festival Hall by the Philharmonia Orchestra, conducted by Colin Davis, with Eberhard Waechter, Giuseppe Taddei, Gottlob Frick, Joan Sutherland, Elisabeth Schwarzkopf and Graziella Sciutti as soloists. **25.** Sir Thomas Beecham conducted the Royal Philharmonic Orchestra at the Festival Hall. **26.** Dr. Otto Klemperer conducted the first of a series of Beethoven concerts at the Festival Hall in which the Philharmonia Orchestra presented all the symphonies and the chief concertos. Meyerbeer's *Les Huguenots* was revived by the Revival Opera Company at the Scala Theatre. **28.** The Winter Season at Covent Garden began with a performance of Verdi's *Un Ballo in Maschera*.

Nov. 15. The second half of the programme of the London Symphony Orchestra's concert at the Festival Hall was devoted to a performance of Strauss' tone-poem, *Also Sprach Zarathustra*, conducted by Rudolf Kempe. **24.** The annual St. Cecilia Concert took place in the Festival Hall in the presence of Queen Elizabeth the Queen Mother. The Bournemouth Symphony Orchestra under Charles Groves and the Bournemouth Municipal Choir took part, the programme including Elgar's *Cockaigne* overture and Beethoven's fourth piano concerto (with Dame Myra Hess as soloist). **26.** The Royal Choral Society, conducted by Sir Malcolm Sargent, sang Handel's *Israel in Egypt* at the Albert Hall.

Dec. 1. The Bach Choir sang Bach's B minor Mass in the Festival Hall; the soloists were William Herbert, Roger Stalman, John Carol Case, Elsie Morison and Helen Watts. **2.** The Swedish composer Karl-Birger Blomdahl's third symphony was performed for the first time in this country, at the Royal Philharmonic Society's concert in the Festival Hall, conducted by Norman Del Mar. **9.** A new production of *Tannhäuser* took place at Sadler's Wells, this being its first performance there since before the war. **10.** The Royal Choral Society gave the first of four concerts, conducted by Sir Malcolm Sargent, in the Albert Hall.

(1960). **Jan. 19.** David Oistrakh appeared at the Festival Hall, playing in Tschaikovsky and Sibelius violin concertos with the Royal Philharmonic Orchestra under Norman Del Mar. **21.** Yehudi Menuhin played in two violin concertos at the Festival Hall, one being Mozart's A major concerto and the other a posthumously published work by Bartok, composed about 60 years earlier, but not previously heard in London. On Jan. 24, Yehudi Menuhin took part in the London Philharmonic Orchestra's Beethoven concert at the Albert Hall. **31.** The Warsaw Philharmonic Orchestra appeared at the Festival Hall, under its regular conductor Witold Rowicki, after a tour of the provinces.

Feb. 2. Otto Klemperer, with the Philharmonia Orchestra, gave the first of three concerts at the Festival Hall devoted to Brahms. **16.** The Bach Choir sang Beethoven's Mass in C at the Festival Hall, together with Anthony Milner's cantata, *St. Francis*, heard in London for the first time. **17.** A new violin concerto by Edmund Rubbra was played in a B.B.C. concert at the Festival Hall, with Endre Wolf as soloist. **19** and **20.** The centenary of Hugo Wolf's birth and the 150th anniversary of the birth of Chopin were celebrated at the Festival Hall by a programme of Wolf's songs and a Chopin recital by Witold Malcuzynski.

March 31. Verdi's *Macbeth* was performed at Covent Garden for the first time. It was sung by the resident company, though Tito Gobbi took the part of Macbeth and the conductor was Francesco Molinari-Pradelli. The German pianist, Wilhelm Backhaus, returned to his country to play in a concert at the Festival Hall with the London Symphony Orchestra.

April 3. The Bach Choir sang the *St. Matthew Passion* in the Festival Hall, with Daniel Gailliver, Richard Standen, Duncan Robertson and Marjorie Thomas as soloists. **5.** The Hallé Orchestra played at the Festival Hall under Sir John Barbirolli. **15.** The Royal Choral Society, with Walter Midgley, James Milligan, Elsie Morison and Marjorie Thomas as soloists, the London Symphony Orchestra, and Sir Malcolm Sargent as conductor, gave its annual Good Friday performance of the *Messiah* in the Albert Hall. **24.** Sir Thomas Beecham returned to the Festival Hall to conduct the Royal Philharmonic Orchestra in a programme which included works by Haydn, Schubert, Delius and Saint-Saëns. **25.** The New Opera Company produced a double bill at Sadler's Wells of Schönberg's first opera, *Erwartung*, staged for the first time in Britain, and Stravinsky's *The Nightingale*, only once before presented in this country (by Sir Thomas Beecham in 1924). **26.** Humphrey Searle's opera, *The Diary of a Madman*—first produced at the Berlin Festival in 1959—received its British *première*, being performed at Sadler's Wells by the New Opera Company. **29.** As part of London's "French Fortnight" celebrations, a concert performance of Debussy's *Pelléas et Mélisande* was given at the Festival Hall, with the London Symphony Orchestra, conducted by the veteran composer Pierre Monteux and four French soloists, Camille Maurane, Michel Roux, André Vessières and Nadine Sautereau. M. Monteux had played the viola at the first performance of the work at the *Opéra-Comique* in Paris on April 30, 1902.

May 5. Sir Adrian Boult conducted the London Philharmonic Orchestra at the Festival Hall; the programme included the orchestral version of Vaughan Williams' variations for brass band, transcribed for symphony orchestra by Gordon Jacob. **13.** The Royal Philharmonic Society's season at the Festival Hall closed with a concert by the Hallé Orchestra under Sir John Barbirolli, which included Mahler's Ninth Symphony, in the centenary year of the composer's birth. **15.** Igor Oistrakh took part in the first of two Albert Hall concerts with George Hurst and the London Symphony Orchestra. **16.** At the Festival Hall there began the 10th (and last) annual series of Beethoven concerts, including the nine symphonies and five piano concertos, with Artur Rubinstein as soloist, given by the London Symphony Orchestra, conducted by Josef Krips. **19.** The London Philharmonic Society, under William Steinberg, marked Mahler's centenary year by playing his rarely heard sixth symphony in A minor at a Festival Hall concert. **20** and **22.** The Bath

Festival included a specially commissioned Concerto for small orchestra by Arnold Cooke and a concert in commemoration of Chopin, in which Yehudi Menuhin, Louis Kentner and Gaspar Cassado took part. This concert also included an arrangement for voices by Falla of Chopin's Ballade in F, performed for the first time, by the London Bach Group under John Minchinton. **24.** The new season at Glyndebourne opened with a production of Bellini's *I Puritani*. **28.** The Hague Philharmonic Orchestra, conducted by Willem van Otterloo, played in the Festival Hall.

June 3. Zoltan Kodaly conducted the second part of the concert given in his honour by the London Symphony Orchestra at the Festival Hall, which included a number of his own works. **10.** Banjamin Britten's new opera, *A Midsummer Night's Dream*, was produced at the Aldeburgh Festival. **12.** A festival service was held in Aldeburgh parish church, and in the afternoon the Netherlands Chamber Orchestra, directed by Szymon Goldberg, gave a Bach programme in Framlingham church. **20.** St. Paul's Cathedral Choir gave a concert at the Festival Hall in celebration of the 250th anniversary of the rebuilding of the cathedral. **21.** The Bach Choir sang Mozart's *Requiem* and Walton's *Belshazzar's Feast* in the Festival Hall. **28.** Leopold Stokowski conducted the London Symphony Orchestra at the Festival Hall.

July 3. The Cheltenham Festival opened. New works for the Festival included Richard Rodney Bennett's Five Pieces for Orchestra, Alexander Goehr's *Four Songs from the Japanese* for voice and orchestra, the late Arthur Benjamin's Divertimento for wind quintet, Francis Burt's *Espressione Orchestrale*, a sonata in three movements by Matyas Seiber specially commissioned by the B.B.C., a concerto for piano and orchestra by R. W. Wood, a set of six Chinese songs by Nicholas Maw, *Nocturne* for mezzo-soprano and chamber orchestra by the same composer, an oboe quartet by Richard Drakeford, a divertimento for horn and string quartet by John Wilks, a suite for violin and piano by Fred Turner, a violin sonata by Thea Musgrave, Reginald Brindle-Smith's *Cosmos*, a symphony in four movements, and Benjamin Frankel's first symphony. **3-4.** Sir John Barbirolli and the Hallé Orchestra gave two concerts at the Festival Hall; the first contained works by Delius, Tchaikovsky and Haydn; the second was devoted to Schubert. **5.** The Handel Opera Society produced Handel's *Hercules* at Sadler's Wells, and on the following evening the composer's *Radamisto*. **16.** The Covent Garden opera season ended. **23.** The sixty-sixth season of promenade concerts began at the Albert Hall. **26.** As part of the annual King's Lynn Festival, a song recital, attended by Queen Elizabeth the Queen Mother, took place at Holkham Hall.

Aug. 2. Britten's *Sinfonia da Requiem* was performed at the promenade concert by the London Symphony Orchestra, conducted by Colin Davis. **3.** Haydn's *Creation* was sung at the promenade concert, Sir Malcolm Sargent conducting the B.B.C. Symphony Orchestra and the choirs of the Royal Choral Society and the Croydon and Watford Philharmonic Societies. The soloists were William Herbert, Kim Borg and Mary Wells. **6.** Five Scottish dances by Iain Hamilton received their first London performance at the promenade concert. **8.** Electronic music was heard at a promenade concert for the first time—a recording of *Perspectives*, by Luciano Berio. **10.** An adaptation of German's *Merrie England*, by Dennis Arundell, was produced at Sadler's Wells. The Royal Liverpool Philharmonic Orchestra under John Pritchard played at the promenade concert on **Aug. 16**, and during the rest of the week. **23.** The revived Carl Rosa Opera Company began a season at the Princes Theatre. **29.** The Swedish Royal Opera Company opened a fortnight's season at Covent Garden.

Aug. 21.–Sept. 10. Edinburgh Festival. On the opening day, a Choral Concert was given in the Usher Hall, at which Verdi's *Requiem* was given by the Philharmonia Chorus and Orchestra under the Italian conductor Carlo Maria Giulini. On Aug. 23. the Chopin commemoration began with a recital at the Freemasons' Hall by Adam Harasiewiez. The Glyndebourne company produced Verdi's opera *Falstaff* on Aug. 24, and it was followed later in the week by Bellini's *Il Puritani*. Their third programme was a triple bill, Busoni's *Arlecchino*, Wolf-Ferrari's *Il Segreto di Susanna* and Poulenc's *La Voix humaine*. The Scottish National Orchestra presented two concerts conducted by Alexander Gibson, and on Sept. 2 the Royal Liverpool Philharmonic Orchestra, under John Pritchard, gave the first performance of a new symphony by Sir William Walton—his second—which the orchestra had specially commissioned. On the following evening, the same orchestra introduced Humphrey Searle's third symphony. The Leningrad Symphony Orchestra, conducted by Eugen Mravinsky, presented the first of its concerts in the Usher Hall on Sept. 6, playing the Fifth Symphonies of Shostakovitch and Tschaikovsky. On Sept. 9 the Russian cellist, Mstislav Rostropovitch, played with the orchestra in the concerto for cello and orchestra specially written for him by Shostakovitch in 1959, and on Sept. 10, the final evening of the Festival, the Leningrad Symphony Orchestra played Prokofiev's sixth symphony.

Sept. 4. The opening Service of the Three Choirs Festival took place in Worcester Cathedral. On the following day, two choral works were performed, Kodaly's *Budavari Te Deum* (in the presence of the composer) and Bruckner's Mass in E Minor, and Dennis Matthews played Beethoven's fourth piano concerto with the City of Birmingham Symphony Orchestra. On **Sept. 6**, Bach's *St. John Passion*, conducted by Melville Cook, and Elgar's *Dream of Gerontius* were sung. The soloists in the first included Eric Greene, John Carol Case and Eileen Poulter, and in the second David Galliver, Harvey Alan and Marjorie Thomas. A number of modern works were performed on **Sept. 7.** The City of Birmingham Orchestra under Meredith Davies played Hindemith's *Mathis der Maler*, and also in the day's programme were Vaughan Williams' *Hodie*, Walton's cello concerto and Butterworth's *A Shropshire Lad*, and Frank Martin's oratorio *In Terra Pax* received its first public performance in Britain. Two more works were heard for the first time in this country on **Sept. 8.**—Petrassi's *Magnificat* and Janacek's *The Eternal Gospel*—and Verdi's *Quattro Pezzi Sacri* also appeared on the programme. On the last day of the Festival, **Sept. 9**, there was, as in previous years, a recital of Church music by the combined choirs of the three cathedrals. **13.** Schönberg's last complete work, the *De Profundis* for mixed choir was performed in a promenade concert, with Graham Treacher conducting the New Music Singers and the B.B.C. Chorus. **17.** The promenade concert season ended at the Albert Hall. **20.** The Leningrad Symphony Orchestra came to London for the first of three concerts in the Festival Hall, and on **Sept. 23** gave the first performance in Britain of Shostakovitch's eighth symphony. **24.** After its three appearances in the Festival Hall, the Leningrad Symphony Orchestra gave a final concert in the Albert Hall, exclusively devoted to Tschaikovsky.

Seldom has a theatrical year seen so many brief runs as 1960, and the productions concerned were not entirely confined to the work of inexperienced dramatists. Happily, there were a number of new plays which met with a better fate. Among them were *Ross*, based on the life of Lawrence of Arabia. by Terence Rattigan, *The Amorous Prawn*, by Anthony Kimmins, *The Gazebo*, by Alec Coppel, and *The World of Suzie Wong*, based by Paul Osborn on a novel by Richard Mason. A successful "double" was achieved by Robert Bolt with *A Man For All Seasons* and *The Tiger and the Horse*, Noel Coward contributed a sentimental play, *Waiting In The Wings*, which provided several of our older players with an opportunity to prove that they could well bear comparison with the younger generation, and a musical version of *Oliver Twist* by Lionel Bart was successful. A new theatre, the Royalty, built on the site of the Stoll Opera House, was opened by Alfred Lunt and Lynn Fontanne with *The Visit* by Friedrich Dürrenmatt, and the Mermaid, the City's only playhouse, kept up its policy of unusual productions with a version of *Henry V* in battledress, and *Great Expectations*, founded on Charles Dickens' novel.

The following is a list of productions between Oct. 1, 1959, and Sept. 30, 1960:—

ADELPHI, Strand, W.C.2.—(1959) *Dec.* 26. *When In Rome . . .* musical play adapted from the Italian by Ted Willis and Ken Ferrey (Dickie Henderson, Frank Leighton, June Laverick and Eleanor Summerfield). THE FILMS, 1959–1960

While many cinemas throughout the country were obliged to close down, despite the removal of the entertainment tax in the Budget, British films and British players continued to play a large part in the London productions of the year. Among the many artistes who enhanced their reputations were Sir Alec Guinness, Peter Sellers, Kenneth More, Robert Morley, John Mills and Norman Wisdom, and actors of the stage such as Sir Laurence Olivier and Sir Ralph Richardson again appeared on the screen successfully. Films from British studios which won high praise included *Our Man In Havana*, *Sink The Bismarck*, *Conspiracy of Silence*, *The Angry Silence*, *School for Scoundrels* and *The Entertainer*. A curious situation arose with the almost simultaneous release of two films with Oscar Wilde as the central character, only one being given a West End presentation. A new version of the old classic, *Ben Hur*, proved to be one of the most popular of the American contributions and won a number of " Oscars ".

The following is a list of the principal films shown publicly in London from Oct. 1, 1959, to Sept. 30, 1960:—

ACADEMY, 165 Oxford Street, W.1.—(1959) *Nov.* 19. *Persons Unknown*, Italian, and *Charmants Garçons*, French. (1960) *Jan.* 18. *The Boyars' Plot*, Russian. *June* 13. *A Generation*, Polish.

ASTORIA, Charing Cross Road,—(1959) Oct. 27. *Solomon And Sheba* (Yul Brynner, George Sanders, Finlay Currie, David Farrar and Gina Lollobrigida). (1960) *May* 9. *The Big Fisherman* (Howard Keel, Herbert Lom and Susan Kohner). *July* 7. *Inherit The Wind* (Frederic March, Spencer Tracy and Gene Kelly). *Sept.* 1. *There Was A Crooked Man*, British (Norman Wisdom, Andrew Cruickshank and Alfred Marks). *Sept.* 22. *Too Hot To Handle*, British (Leo Genn and Jayne Mansfield).

BERKELEY, 30 Tottenham Court Road, W.1.—(1960) *Aug.* 29. *Come Dance With Me* (Brigitte Bardot). *Sept.* 29. *After School*, German.

CAMEO–POLYTECHNIC, Upper Regent Street, W.1.—*Oct.* 29. *Les Amants*, French, and *We Die Alone*, Norwegian. (1960) *Jan.* 25. *Waiting Women*, Swedish. *March* 21. *Lift To The Scaffold*, French. *Aug.* 25. *The Girl and The River*, French, and *The Fanatics*, French. *Sept.* 19. *Jazz On A Summer's Day*, record of Jazz Festival at Newport, Rhode Island.

WIRELESS DEVELOPMENT AND BROADCASTING, 1959–60

INTERNATIONAL CO-OPERATION

Plans for the future of the Eurovision network were heard at the annual meeting of the European Broadcasting Union in London in October, 1959. One of the aims mentioned was the exchange of daily news films between the countries in the network, so that edited versions of films shot earlier in the day could be included in evening news transmissions. Topical films were already exchanged among members of the network, but their showing was delayed by processing, transport and customs formalities. American delegates also expressed the growing interest in the U.S.A. in news and films from Europe, and the B.B.C. had offered the use of the transatlantic cable method which had been developed by the Corporation for speeding up the transmission of television pictures to America. It was also hoped that by 1961 Finland, Norway Spain, Portugal and perhaps North Africa would be included in the Eurovision network. Other subjects discussed were customs duties on the import and export of broadcasting apparatus and the question of performing rights, the aim in the latter case being to produce an international convention akin to that on copyright, so that the rights of broadcasting authorities, performers and record manufacturers could all be protected.

TELEVISION NEWS FOR U.S.A.

A practical example of international co-operation occurred in December, 1959, when the B.B.C. arranged to provide the National Broadcasting Company of America with television news pictures of the meeting of leaders of the Western powers in Paris. The method adopted was for pictures to be carried over the Eurovision circuit from Paris to the British Post Office terminal of the cross-Channel radio link at Tolsford Hill, near Folkestone. From here the picture signals passed over micro-wave radio links through the B.B.C. Crystal Palace television station to the Corporation's research department at Kingswood Warren in Surrey, where the pictures, hitherto in their original French television standards, were converted into American standards on equipment developed by the B.B.C. The picture signals were then sent by radio link to London Airport for recording on magnetic tape, and while these processes were taking place, the sound signals were being sent direct from Paris over a telephone circuit.

LINKS WITH THE COMMONWEALTH

In the autumn of 1959 it was also announced, by the Postmaster-General, that Britain and the Commonwealth countries were planning to lay cables round the world capable of carrying television as well as telephone services. A second cable across the Atlantic would be laid to Canada in 1961. A Post Office spokesman said that the television carried would be "delayed" television, relayed immediately after the event and taking about two hours in transmission. This type of television was first transmitted on the transatlantic cable when the Queen opened the St. Lawrence Seaway. It had been virtually agreed that the next link in the cable should be between Canada and Australia. It was hoped to complete this link by August, 1964, and its estimated cost was £24,000,000. The cost of the whole cable would eventually be between £70,000,000 and £80,000,000.

BROADCASTING INQUIRY

On July 13, the Postmaster-General announced in the Commons that the Government had decided to extend the B.B.C.'s charter and licence from June 30, 1962 to July 29, 1964, the date of expiry of the Television Act. He also announced the terms of reference of the committee of inquiry, to be set up, under the chairmanship of Sir Harry Pilkington, into the future of sound and television broadcasting. They were as follows: to consider the future of the broadcasting services in the United Kingdom, the dissemination by wire of broadcast-

ing and colour programmes, and the possibility of television for public showing; to advise on the services which should in future be provided in the United Kingdom by the B.B.C. and the I.T.A.; to recommend whether additional services should be provided by any other organisation; and to propose what financial and other conditions should apply to the conduct of all these services.

B.B.C. AIMS

The *B.B.C. Handbook* for 1960 again spoke of hopes for a second television service, which would enable the B.B.C. to increase its output of more thoughtful programmes, while at the same time providing lighter alternatives, the service being so planned that the viewer had a choice, at any time of the evening, between lighter and more substantial fare. Discussing stereophonic programmes, the Handbook said that the B.B.C.'s aim was to develop a system of broadcasting them so that listeners already equipped with stereophonic apparatus for the reproduction of gramophone records or tape recordings could enjoy stereophonic programmes simply by an addition to a normal v.h.f. receiver.

Mr. Hugh Carleton Greene, Director-General of the B.B.C., speaking at Manchester in March, said that he hoped that the unallocated television channels in Band III would be used to fill the gaps in the B.B.C.'s and I.T.V.'s national coverage to provide television to the 1 per cent. of the population of the United Kingdom still outside the range of any transmitter. In particular, he thought that Wales should become a separate entity with enough transmitters to cover the most remote mountain districts. In addition, if the technical problems of using ultra high frequency (Bands IV and V) were overcome, the B.B.C. and I.T.V. would each be able to have one or two additional programmes.

On sound broadcasting, Mr. Carleton Green said that over and above the regional network, the B.B.C. ought "to go more local," and he advocated the establishment of local sound broadcasting stations in the shape of low-power v.h.f. transmitters with a range of about four or five miles, which would give "city broadcasting" with coverage of local problems and local events.

NEW B.B.C. STATIONS

The second stage in the B.B.C. plan for better coverage was described in detail by the Postmaster-General on May 20. He said that 10 new television stations and 11 v.h.f. stations were proposed, which would bring television to more than 100,000 new viewers and would improve reception for 400,000 more. About 350,000 people could get the v.h.f. sound service, comprising the Home, Light and Third programmes, for the first time. It was hoped that 21 new stations would be in operation by March, 1964. This programme, at an estimated cost of £1,000,000, included low-power satellite television and v.h.f. sound stations in the areas of Forfar, Grantown-on-Spey, Lewis, Pitlochry-Aberfeldy, Shetland and Skye. Satellite television stations only would be established at Caernarvon, Hastings, Scarborough and Swindon, and satellite v.h.f. sound stations only in East Lincolnshire, Enniskillen, the Pembroke–Milford Haven area, Sheffield and South-West Scotland.

In the third stage of their development programme, the B.B.C. had in mind the possibility of installing a new type of very low-power translator, or relay station, to bring television and v.h.f. sound programmes to towns not yet served and to improve services in towns where reception was still unsatisfactory. The television satellite station for Hastings was to be an experimental installation of this type.

I.T.A. DEVELOPMENTS

Anglia T.V. started regular programmes from Norwich on Oct. 27, 1959, thus extending I.T.A. coverage to 90 per cent. of the country. Adjustments to the aerial system on the 1,000-ft. mast at Mendlesham, Suffolk, improved reception in the two "black spot" areas of Ipswich and Clacton and to avoid interference from French stations transmitting was made strongly directional, though it was necessary to double signals in the south-eastern part of the area in order to serve it adequately. The opening of the station gave many viewers a choice, at times, of three programmes, since its broadcasts could be received as far away as the eastern outskirts of London, as well as at Bedford and Peterborough in the East Midlands. Most of the 60 hours' programme per week was the same as on the rest of the I.T.A. network, but eight to nine hours were occupied with items of local origin, including regional news.

On Aug. 3, 1960, Sir Alexander King, Chairman of North of Scotland Television, which had been given the programme contract for the area, spoke of plans for commercial television in the North of Scotland. He said that his group would try to cater for the indigenous interests of people in the north and north-east, including the presentation of programmes in Gaelic, which was spoken by many people in the Inverness area. Two transmitters, the first to be started in Aberdeenshire in 1961 and the second in the Black Isle in 1962, would cover the region from a line through Perth and Elie to Helmsdale in the far north. A studio would be opened in Aberdeen in October 1961 and another might be built in Inverness if the need arose. At least 15 per cent. of the programmes would be of local origin, and local news and weather forecasts would be supplied.

On the following day, Sir Robert Fraser, Director-General of I.T.A., announced that the Authority proposed to create a new independent television service area in west and north-west Wales, and in the autumn of 1960 would be seeking to appoint a programme company for the area. There would be two stations, one on the Prescelly range in Pembrokeshire and the other in the Lleyn Peninsula in Caernarvonshire. About 300,000 people would be reached exclusively by these two stations, and in addition, there would be another 400,000 in the fringe areas, of whom many would also be receiving the St. Hilary station, on a better signal. Sir Robert said that only channels already allotted to the I.T.A. would be used and that they were part of the approved national plan. He hoped that the service could begin in 1962 or at worst in 1963.

END OF NINE O'CLOCK NEWS

The nine o'clock news, which had been broadcast at that hour since 1940, came to an end on September 28. Thereafter the evening news bulletin in the Home Service was broadcast at 10 p.m. The B.B.C. announced that from Monday to Friday the news bulletin would form part of a daily programme combining news and current affairs which would usually last for 30 minutes, though the time would be extended when circumstances required it. The B.B.C. felt that the change was necessary because a daily service of such a kind, to be as useful as possible to listeners, needed absolute regularity, and no such regularity could be guaranteed to a programme of half an hour's length earlier in the evening.

TEN MILLION T.V. LICENCES

In December, 1959, the number of combined television and sound receiving licences in Britain reached 10,000,000, only the United States having

a greater number of sets in use. The exact total of combined licences at the end of the year was 10,114,419, representing two out of three families in the country. Early in 1946, the Post Office estimated that 7,467 television sets were in existence in the United Kingdom, and at that time there were 10,763,144 sound licences. Sound licences began to decline in number in 1951 and have since decreased steadily, so that at the end of 1959, the number was 4,831,193, a decline of 1,032,356 from December, 1958. Since 1953 the annual increase of combined licences has remained steady at about 1,200,000, and during 1959 it was 1,215,067. The national coverage for B.B.C. television was estimated at 98 per cent. and for I.T.A. at 91 per cent.

BRITISH TELEVISION STANDARDS

The report of the Television Advisory Committee, published on June 1, recommended an upgrading of British television standards from the existing 405-line system to the 625-line definition standard in use on the Continent. The report said that colour television was not yet ready for introduction in Britain, and suggested that a decision on future monochrome line standards should precede the start of a colour service and that, if 625-line standards were adopted in the long-term interests of television development, colour when introduced should use the new line standards. The Postmaster-General, at a press conference to discuss the report, said that it showed the possible lines of development, based on purely technical considerations, and that if a decision were reached by 1962, the proposed highter definition system could be brought initially into limited service by 1964. To cover the whole of Britain would probably take four or five years.

BROADCASTING STATIONS

A select list of broadcasting stations in the United Kingdom and in various Commonwealth countries. (*F.*) = wave-length in metres followed by frequency in kilocycles per second.

Independent Television Authority

14 Princes Gate, S.W.7

Set up under the *Television Act*, 1954, the Authority is responsible for the provision of television services and for the control and development

of independent television in Great Britain; it owns and operates television stations, transmitting programmes provided by programme companies (*see below*) under contract to the Authority. Independent television is financed from advertising revenue and draws no income from licence fees or from other public funds. The Authority regulates the system under which the programme companies sell time for advertisements and has wide responsibilities for securing proper standards in the programmes. Independent television broadcasting was inaugurated on September 22, 1955, by a programme broadcast from the Authority's station at Croydon.

Transmitters

London (Beaulieu Heights, Croydon) (120 kw.). Vision: 194·76 mc/s. Sound: 191·27 mc/s. Channel 9. *Midlands* (Lichfield, Staffs.) (200 kw.). Vision: 189·75 mc/s. Sound: 186·25 mc/s. ART AND OTHER EXHIBITIONS, 1959–60

ITALIAN ART AND BRITAIN

The Royal Academy Winter Exhibition was this year entitled "Italian Art and Britain". The theme of the exhibition, which was open from January to March, was of the collection of Italian art by the British from the time of that great connoisseur, Charles I, to the present day. The first two galleries showed works which were already in this country before 1700 and the third and fourth, abandoning the chronological sequence, brought together Venetian and Florentine masterpieces respectively. The succeeding rooms illustrated the artistic connection between Italy and England from 1730 to about 1850, the period in which so many travellers made the Grand Tour and brought back purchases on a large scale, and a period also when many British painters went to Italy to pursue their studies, and Italian painters, like Canaletto, settled and worked in England, where they achieved great popularity. The inclusion of paintings of Italy by Sir Charles Eastlake, who became the first Director of the National Gallery in 1855, brought the visitor on to Gallery IX, where a splendid collection of Primitives, notably of the Sienese School. Eastlake himself was largely responsible for the foundation of such a collection.

Many of the works shown, originally in private ownership, have now of course been acquired by public galleries, but the exhibition once more called attention to the great wealth of paintings still in private houses and many of them still belonging to the descendants of those who originally brought them from Italy.

Her Majesty the Queen lent a number of pictures from the Royal Collection, including Giorgione's *Shepherd with a Pipe*, which belonged to Charles I and *Esther and Ahasuerus*, by Tintoretto, which was acquired by Charles II.

Two rooms in the Exhibition were devoted to drawings, in one of which the drawings were hung as far as possible in their original collections, notably those of the Earl of Arundel, Jonathan Richardson, Lord Somers and Sir Thomas Lawrence. Drawings by Leonardo da Vinci, Michaelangelo, Raphael and Paolo Veronese were included, and Canaletto was again very worthily represented.

KENWOOD EXHIBITIONS

Summer exhibitions in the admirably suitable setting of Kenwood House have now become a regular feature. In 1960 two displays were shown there concurrently—of silver and paintings. The silver was exhibited by the Goldsmiths' Company, who have done so much in recent years to delight the public by exhibitions at their own Hall, and it consisted of a selection from their own splendid and historic plate, a display of modern silver and a room in which pieces could be seen actually being made.

The artist chosen for commemoration on this occasion was Francis Hayman, known perhaps more for his friendship with Hogarth and his early influence on Gainsborough than for his own work.

He was, however, proficient in many ways, as this collection of paintings, prints, drawings and book illustrations by him showed. In particular, his decorations for the walls of the boxes at Vauxhall Gardens were famous in his day, and a set of eighteen engravings of them and four of the originals were shown at Kenwood, as well as an interesting engraving, lent by the M.C.C., of a painting by Hayman showing members of the Royal Academy Club playing cricket in Marylebone Fields.

THE RESTORATION

The tercentenary of the Restoration of the Monarchy in May 1960 naturally called forth a number of commemorative exhibitions, notably at the National Portrait Gallery and the London Museum, where opportunity was taken in the Museum's present shortage of space to show a selection of exhibits, which cannot always be put on view, of various aspects of Charles II's reign and London life of the time. The exhibition included books, manuscripts, pictures, costumes, glass, plate and pottery, among the last a cup of Lambeth Delft, made to celebrate the Restoration, on which the crowned head of Charles had been hastily set on an armour-clad body, apparently intended for Cromwell. The National Portrait Gallery display consisted of portraits of Charles, by Van Dyck, Dobson, Lely, Kneller and others, from all stages of his life. At the British Museum, also, the occasion was marked by an exhibition, divided into four sections, illustrative of history, literature, geography and science. Here the most interesting features were manuscripts from the hands of Dryden, Evelyn, Pepys, Marvell, Purcell and many other great figures of the reign.

THE ACADEMY SUMMER EXHIBITION

The 1960 Royal Academy Summer Exhibition will perhaps be recalled more for the memorial groups of paintings by the late Sir Stanley Spencer than for any other feature. This group included the unfinished main section of Spencer's great work, *Christ Preaching at Cookham Regatta*, with other studies from the same work and paintings from other periods of the artist's life, notably the early *Last Supper* and *The Centurion's Servant*, of 1915. Among the work of other artists whose death had been recently mourned, Eric Kennington's diploma work, a pastel of *Abd-el-Rahman*, Sir Alfred Munnings' *The Ford* and Sir Jacob Epstein's bronze bust of Princess Margaret were also noteworthy.

Augustus John sent two works to the exhibition, and Pietro Annigoni three paintings, including *La Strega* and a portrait of the Dowager Duchess of Bedford. Other notable portraits were Ruskin Spear's *Harry Locke* and Robert Buhler's striking study of Dame Edith Evans as Volumnia in *Coriolanus* at Stratford. David McFall showed the sketch model for his statue of Sir Winston Churchill at Woodford. Mention should also be made of Dame Laura Knight's *Ploughing*, William Roberts' fine satirical picture *TV.*, and Gilbert Spencer's diploma work, *From my Studio*.

The Architectural Rooms contained some notable designs for new university buildings, including Basil (now Sir Basil) Spence's College House, Brighton, and his science buildings for Exeter, and a small building for Worcester College, Oxford, by Sir Hugh Casson.

ANTIQUE DEALERS' FAIR

The twentieth Antique Dealers' Fair and Exhibition was held at Grosvenor House, Park Lane during June. The works of art and varied examples of fine craftsmanship, all made before 1830, ranged from a terra cotta group of the Hellenistic period (300 B.C.); the only known recorded alabaster plaque of the Stoning of St. Stephen, the work of the 15th century Nottingham school of carvers and a very pale green jade hatstand 17 inches high of Chi'en Lung period to a Regency water clock with a gold fish tank. Among outstanding exhibits were the Shrewsbury diamond necklace, the Upton House Adam suite of furniture with 18th century panels of coloured engravings, and the Madingley Hall (Cambridge) floral and rose pompadour suite of two sofas and eight armchairs which had just returned from America after 30 years. Her Majesty The Queen and other members of the Royal Family lent exhibits. Attention was much attracted to the loan from H.M. Queen Elizabeth the Queen Mother, which was an unfinished equestrian portrait by Sir Edwin Landseer of Queen Victoria. The Victoria and Albert Museum and the Temple Newsam Museum, Leeds, each acquired a walnut and gilt chair (*circa* 1740) formerly in the collection at Houghton Hall, Norfolk.

PICASSO AT THE TATE

The Picasso Exhibition, which opened at the Tate Gallery in July, surpassed many expectations in its popular appeal. The exhibition was organised by the Arts Council and the exhibits were chosen by Mr. Roland Penrose. No fewer than 268 works were shown, including the series of 58 on the theme of Velasquez' *Las Meninas*, which Picasso painted in 4½ months in 1957. The artist himself lent 100 of his pictures, but others were contributed from world-wide sources, including the Museum of Modern Art, Barcelona, the Musée des Beaux-Arts, Liége and many galleries and private collections in the United States. It was the largest exhibition of Picasso's work ever assembled and aimed to present the artist in all his many and varied styles and moods, covering altogether sixty-five years of creative work.

SPANISH ARMOUR

The Tower of London has long been famous for its displays of armour, permanent and temporary, and a remarkable exhibition of Spanish armour was to be seen there throughout the summer months. In particular, the Royal Armoury of Madrid lent some of its most outstanding possessions, selecting especially those which had a connection with England. This included the armour made by the celebrated craftsman Wolf of Landshut, for Philip II of Spain, which the latter wore when he came to England to marry Mary Tudor. With it was shown the matching armour made for his horse, and accompanying them was a portrait of Philip from the Fitzwilliam Museum, showing him wearing this armour. The Royal Armoury also lent armour belonging to Philip's father, the Emperor Charles V, and an early 17th century English crossbow, with gold enrichments, sent by James I as a present to Philip III of Spain. Other loans from Spain included the sword of Sancho IV, 13th century King of Castile, from Toledo Cathedral, found there in 1948. The Duke of Alba lent the armour in which his ancestor, the Count-Duke of Olivares, was painted in a well-known equestrian portrait by Velasquez.

BRITISH ARCHITECTURE OF 1959–60

THE UNIVERSITIES

A full review of the current university building programme cannot be contemplated in a short space and, although what is happening at Oxford and Cambridge is reflected in the powerful influence these two university towns exercise over British education, it is the trend towards scientific knowledge which has captured the imagination of the nation, and the universities have put in hand a large programme of expansion. The first scientific buildings to emerge as a result of this have now been occupied and many others are in the course of construction at our major university centres.

In common with others, Liverpool has a programme of expansion which began after the war under the leadership of Sir William Holford, who was appointed to advise the university authorities upon their redevelopment programme. The pattern of development is to extend the existing precincts, retaining Oxford Street and Brownlow Hill as main roads cutting across the site, within a programme scheduled for completion within the next decade. Professor Myles Wright, professor of Civic Design at Liverpool, has been appointed as consultant planner and a panel of leading British architects has been assembled to produce designs for the various new buildings which it is hoped will not only contribute to a new high level of scientific education but also show that architecture as an art and a science has a major part to contribute in the new university.

Already completed and occupied at Liverpool are the Physics Laboratories designed by Basil Spence and Partners and the Civil Engineering Laboratories by Fry, Drake, Drew & Lasdun. In the course of construction are other essential buildings, including Veterinary Sciences, also by Fry, Drake, Drew & Lasdun and the Mathematics Building, designed by Bryan & Norman Westwood & Partners, a section of which has been specifically planned to house an electronic computer, scheduled for completion in 1961.

Work on similar projects is in progress all over the country. A comprehensive programme at Oxford has already witnessed the completion and occupation of specialised buildings to house the departments of Organic Chemistry (an extension of the Dyson Perrins Laboratory), Metallurgy and Physical Chemistry, all designed by Ramsey, Murray, White & Ward, and the departments of Inorganic Chemistry and Human Anatomy in buildings designed by Lanchester & Lodge. In the course of construction and projected are the Pharmacology Building by Gollins, Melvin & Ward, and the Engineering and Micro-Biology Buildings also by Ramsey, Murray, White & Ward.

University Library, Sheffield

Sheffield's new university library, designed by Gollins, Melvin & Ward, would be a major architectural event in any city. It was the first building to be completed of a group which formed the subject of an open competition for the development of Sheffield University held as long ago as 1953. The site, which was made available to the University by the City Corporation, occupies a corner of Weston Park immediately north-east of the existing University buildings. The building takes the form of a low square 155 ft. along each side, straddling the steeply sloping site to show a height of 52 ft. on the campus to the east and 32 ft. to the west. It will thus become an admirable foil to the architectural composition of the proposed adjacent Arts block, construction on the full 16 storeys of which is expected to start in the near future, and the long low Chemistry building on the eastern side of the campus.

The main reading room has accommodation for approximately 76 tables and 280 readers, behind which and immediately next to the entrance is a two-tiered open-stack book store holding about 130,000 volumes. In the post-graduate reading room, accommodation has been made for three microfilm rooms of 48 readers at 12 tables and 55 private book lockers. The book stack, which lies immediately below the reading room, is fully air conditioned, the relative humidity of the air being kept at a maximum of 65 per cent. to ensure that the 870,000 or so books in the stack neither become over brittle nor deteriorate from mildew. This is achieved by refrigeration, but to overcome the demand on the refrigeration plant and reduce glare, the windows on the south and west are glazed with double anti-sun panels.

Students' Hostels

The biggest single item in the University building programme is said to be taken up by residential building in the form of College Halls of Residence, or more simply Students' Hostels. Living in college rather than at home or in lodgings is now generally regarded as an important factor in university education. This facet of building is bound to occupy the larger share of total university building budgets.

Weeks House, the recent hostel designed by Richard Sheppard Robson & Partners, is the first stage of the Imperial College of Science & Technology's Princes Gardens Hostel development. Planned as a separate entity in the north-east corner of the square, it has been designed to be linked with the projected adjacent north block by means of a transparent staircase and lift tower. It has been designed to create a human and domestic atmosphere, so important to students, within a large building. Study bedrooms have been placed in groups, catering for eight students, each group complete with its own pantry, bathroom, shower and lavatory. All such bedrooms have been raised above street level to provide a degree of privacy and quietness enhanced by views over gardens to the front and rear. The aim of the architects was to express as far as possible the essential domestic nature of the building, yet at the same time using external building materials which would be free from maintenance. The architectural conception may be likened to that of an eggcrate of individual cells encased in concrete, from which has emerged an eight-storied hostel with a penthouse on the roof providing a self-contained flat for the Warden of the Hall.

SCHOOLS

School at Richmond, Yorks.

This particular building is of commendable interest as being the twenty-fifth school to be completed by Mr. Clarke-Hall, almost exactly twenty years after the first school which he completed, namely the Richmond High School for Girls, which occupies the adjoining site. That school, which was the outcome of a far-reaching competition organized by the *News Chronicle* as long ago as 1937, can perhaps be regarded as the forerunner of many of our modern schools for which British architects have achieved distinction in the subsequent years. This new school is in complete contrast to the open type of plan pioneered by the architect in his early days,

representing as it does the more highly compact type of plan which was similarly pioneered by Mr. Clarke-Hall in the early fifties.

A four form entry Secondary Modern School, the building takes the form of two blocks, a main teaching wing of two- to four-storeys in height, 300 ft. long and 70 ft. wide, running across the contours of the site, and a contrasting single-storey workshop and laboratory block containing also a greenhouse, on the relatively flat ground to the west. The buildings are planned to make full use of the naturally sloping site and provide fine views over extensive playing fields and open farmland to the south and east. Although not large by some standards, provision has been made on the upper floors of the teaching block for 19 classrooms, two art rooms and library, the lower floor containing among other things a gymnasium, assembly hall, changing rooms and pupils' dining area. The design called for the use of reinforced concrete, forming structural bays of 25 ft. wide by 70 ft. in length giving rise to clear spans of 50 ft. with 10 ft. cantilevers on either side. This has the advantages of giving an unrestricted ceiling line below first floor level, making possible the minimum number of necessary supporting columns at ground floor level, where the assembly hall enjoys the freedom of an unrestricted clear span of 50 ft. Honey coloured random stone walls were chosen for the external appearance; dark blue bricks for the sides of the stage and exposed terra-cotta coloured aggregate panels for the gymnasium contrast to give a most pleasing appearance.

Central School of Arts and Crafts

Shortly to be completed at an estimated cost of £800,000, the Central School of Arts & Crafts is part of the vast L.C.C. schools programme, and is typical of the emphasis being placed on the need of buildings for further education.

The restricted site, of approximately ¾ acre in extent, lies at the rear of the present Central School fronting Red Lion Square, where it enjoys a position of prominence in relation to the busy thoroughfares of the Holborn-Kingsway road intersection scheme. The existing Central School has an extension planned to include a theatre seating 480 integrated into the lower five storeys of the new building, with the Holborn College accommodated in a multi-storey classroom block rising a further seven storeys above the extension. A two-level car park has been planned between the old and new buildings which will provide parking accommodation for 45 or 50 cars. The new building, which will be linked to the old by two completely enclosed bridges, is constructed in reinforced concrete faced with precast concrete facing panels and with metal windows set in timber frames.

A HOSPITAL IN NORTHERN IRELAND

Designed by Yorke Rosenberg & Mardall in association with H. W. Scatchard for the Northern Ireland Hospitals Authority, the hospital of Altinagelyin, Londonderry, is the first entirely new, complete general hospital to be finished in the United Kingdom since the war. Although planned too early to derive much benefit from the Nuffield Foundation's researches into the subject, it nevertheless serves to provide a valuable yardstick for future development in hospital planning and organization.

In planning, the architects were faced with the alternative of building vertically or horizontally. The 50-acre site on high ground outside the city of Londonderry with its fine views over open country to the south-east provided ample opportunity to pursue the latter course. Much of the research on single-storey hospitals was not then available, but the fact that it has now been established that the satisfactory maximum size for such a hospital is 300 beds, justifies the judgement of the architects at Londonderry in deciding to build vertically, since the hospital now open is to accommodate 390 beds with a possible future extension bringing the number up to 600. The hospital block, site work upon which, commenced in 1950, is in the form of a T, with the west wing scheduled as a future extension. The ten-storey east wing contains identical wards, with the exception of the maternity and children's wards, above the casualty floor and the north wing, the theatres, X-ray, physiotherapy and administration. The only single-storied portion is the outpatients' department which links the north and east wings and encloses a paved courtyard. The hospital is intended for acute cases and patients are not encouraged to go outside the building; consequently they lose very little by not being near or at ground level.

B.B.C. TELEVISION CENTRE

Derived from a closely detailed brief and sketches made by the architects, Norman and Dawbarn, almost ten years ago, the Television Centre at the White City provides the B.B.C. with its first studios actually to be designed and built with television in mind.

The original concept, which has been on the whole developed with remarkable consistency, envisaged a circular inner drum of offices surrounded by an outer band of studios, linked to a single scenery block by means of a circular runway, keeping artists, scenery and technicians all separate until they meet at the centre of activity, the studio floor.

The building is not scheduled for completion for a number of years, but the first phase to be completed has been designed to provide for the production of 1,500 hours of television programmes a year, which is roughly half the B.B.C.'s present output.

The main building, on which work was started in 1955, takes the form of an eight-storey ring-shaped building containing administrative offices, dining rooms, wardrobe and music departments, maintenance engineers' offices and staff recreation centre. All this surrounds a 150-ft.-diameter central courtyard dominated by a circular fountain, upon which stands a 40-ft.-high obelisk surmounted by a gilt-covered representation of the Sun God, Helios. Surrounding the inner ring, with their production floors at ground-floor level, are seven studios, the largest of which, 208 ft. × 100 ft. × 54 ft. high, is equipped with a large-scale tank which can be filled with water when the occasion demands. It has been said that the B.B.C. has come of technical age with this building which, with its advanced technical facilities and equipment, represents a great advance over the perhaps more intimate but chaotic life at Lime Grove.

HOUSING REDEVELOPMENT

Housing, in common with schools, has made the greatest advance since the war. Much good housing has been carried out where a first-rate architect has been in charge, supported by a progressive local authority. This is particularly apparent in London and Coventry, and in Scotland, the Hutchesontown Gorbals redevelopment at Glasgow is a further example of such progressive thinking. The Gorbals development comprises a predominantly residential area of 111 acres with an

average density per acre of 450 persons, on the south bank of the Clyde, between Crown Street to the west and Waddell Street to the east, bounded by the Caledonian Road to the south. It was designated in 1957 as a comprehensive development area by the Secretary of State for Scotland, establishing a framework for development areas in four five-year stages. In the first stage three development areas are dealt with, the first, consisting of 96 dwellings in four-storey maisonettes, designed by the Glasgow City Architect and Planning Officer, was completed in the summer of 1958. Work on the second area, designed by Robert Matthew and Johnson Marshall, began at the end of 1958 on a flat featureless site some 9½ acres in extent. The scheme is to provide 428 dwellings in four 17-storey blocks of flats, three four-storey maisonette and flat blocks, and two two-storey flat blocks. Included in the scheme are a nursery school, eight shops, 30 garages and two public houses. The use of continuous free space between the buidings is differentiated by the surface materials chosen to create a rugged colourful character suitable both to the climate and the personality of the people. Sunken gardens, play areas and small shops or community rooms are associated with the ground floors of the higher blocks, and provision is made for private balconies or walled gardens for the maisonette blocks. All dwellings are scheduled to have electric under-floor heating. The third development area, designed by Basil Spence, will, when completed, become the visual centre of the whole development, the dominating factor of which will be a 20-storey block which is expected to accommodate 400 separate dwellings. At the foot of this building is planned a comprehensive service area containing shops, offices, public houses, restaurants, a police station, post offices and possibly an assembly hall or cinema, with some provision for light industry.

BRITISH RAILWAYS

Officially opened in July 1960, the new railway station at Harlow may be considered to be a landmark in the development of British railway architecture. A complete breakaway from tradition, the dominating features of the new station are its triple lift towers each 50 ft. high, the spacious well-lit glass-walled booking hall, with its fully-mechanized ticket office and the passenger waiting room situated on the enclosed bridge spanning the station. Additional waiting space for passengers is provided by five glass-walled shelters on the platforms. The traditional railway waiting room fire has been dispensed with, all the station buildings being heated by means of hot water pipes embedded in the floor surfaces. A parking space has been provided for 400 cars and the station forecourt has been planned to form the nucleus of a small commercial centre.

The four-acre site occupied by the station is situated on low marshy ground and the land had to be completely drained before the 280 piles supporting the building could be driven. The passenger bridge straddling the main lines is constructed of prestressed concrete units resting upon reinforced concrete bearings cantilevered from the lift tower, an ingenious arrangement enabling the bridge to be built with the minimum of interference to rail services. The strong emphasis given by the architects to the roof lines and the use of horizontally decorated brickwork forming a base to the whole building show traces of a new classicism in railway architecture which is further displayed in a pre-occupation with general detailing. It is to be hoped that this fine example of modern building will not prove to be an isolated instance in the railways' programme of modernization.

FACTORY UNITS

Factory estates throughout the British Isles, occupied by small-scale manufacturing firms, have in past years been architecturally starved. The piecemeal development of many industrial estates has given rise to a miscellaneous collection of asbestos-cement clad structures, all straight out of catalogues, in many parts of the country. Even today there is continued evidence of neglect by estate developers to provide properly designed buildings which, while being functional, will not defile town and countryside alike.

Initially, the small-scale manufacturing firms usually require a relatively small floor area, perhaps two or three thousand square feet at the most, with the allowance of flexibility for expansion. Traditionally such firms have tended to start in decaying areas of large towns, or upon cheaply acquired land on the outskirts of new industrial centres, the attraction being that of low rentals. It is desirable that in the industrial areas of our new towns consideration should be given to the variety and size of manufacturing units, and that this particular type of firm should receive every encouragement.

The Basildon Development Corporation has made it its policy to provide this encouragement to the small firm and, in association with the Corporation's Chief Architect and Planner, J. M. Austin Smith & Partners have produced a design for a nine-bay terrace of small factories. Recently completed, these units are a highly successful exercise in low cost building and may be compared with other municipal enterprises of a similar nature, such as the Flatted Factories at Birmingham and Unit Workshops in Stepney, which, although multi-storied, fulfil a similar requirement.

The basic plan idea has already been adopted by the architects to the Development Corporation and applied to other previously constructed units in the industrial area. The terraced form has the advantage of reducing the area of external wall to a minimum and, by forming openings in the dividing walls, two or more units can be combined. Inherent in this form of planning is the provision of an additional rear access or service road, giving the added advantages of reducing frontage widths, easing the problems of car parking, and keeping the main approaches free of the external clutter usually associated with this type of building. It also means that large entrance doors are no longer required on the main frontage, making it possible to develop on this side a consistent scale of friendly domesticity.

CHURCHES

Ecclesiastical architecture has deservedly been receiving attention in recent years, not only in our new towns, but also in the rebuilding of churches demolished during the war as a result of enemy action.

Notable designs to emerge recently are to be found in the Church of St. John, South Hatfield, designed by Brett, Boyd & Bosanquet, St. Mary's, South Ruislip, by Lawrence King, and the New Methodist Church and Hall at Mitcham, Surrey, by Edward D. Mills. It is interesting that in all these examples apparent emphasis has been placed upon the free use of natural materials, both structurally and decoratively, combining to reduce day to day maintenance, while presenting a dignified yet lively appearance. Special care has been taken in landscaping the buildings to retain the natural features of the individual sites, the skill of the

architects being apparent in their handling of this essential problem. The Church of St. John particularly emphasises the care and attention by which the building has been married to its site. By virtue of its construction, the low-pitched roof over the entrance to the church provided an interesting and inviting approach from the east, yet rising to a steep and dramatic line against the sky to form, at the west end, a simple triangular outline from ground to apex emphasised by a sloping ridge and warped-roof plane.

It is noticeable that the traditional tower or spire, for centuries a predominant feature of our churches, has in many of the new designs been radically modified or indeed eliminated completely. The campanile form, presented in the modern manner, is still favoured by many architects, not only as a functional bell tower but as an architectural foil to the mass of the church buildings. Others maintain that the design form of the building alone precludes the use of a bell tower as such, and prefer to place the bells within the structural element of the church itself.

OFFICE BUILDINGS

Thorn House, designed by Basil Spence & Partners, can be considered as one of the most elegant and sophisticated prestige buildings to emerge in recent months. A new landmark in London's West End, this important office block occupied by Thorn Electric, rises in a light and airy 190-ft.-high slab tower, sited at right angles to the street, from the centre of a corner site in Upper St. Martin's Lane, dominating a long low showroom facing onto the street.

A basement car park for 40 cars has been provided and full use has been made of a landscaped forecourt, extending under the main building, to unify the site. The basic construction is the use of a reinforced concrete frame, the tower block being supported on 18 columns resting on block foundations, excavated to a depth of some 25 feet in the London clay.

The striking appearance of the office tower, dramatically crowned by the exposed concrete framework, is achieved by continuous glazing formed between horizontal bands of grey coloured glass mosaic on the north and south walls, direct solar heat being reduced by the inclusion in the upper panes of non-active glass. The windowless flank wall facing onto St. Martin's Lane is faced completely with Derbyshire stone, forming an admirable background for a work of sculpture by Geoffrey Clarke.

An acoustically controlled and air conditioned two-storey showroom facing the street and extending partially under the tower block was specially designed by John and Sylvia Reid for the demonstration and display of electrical equipment.

DEPARTMENT STORES

Although by no means the largest to be built in recent years, Peter Robinson's new department store in the Strand, designed by Denys Lasdun of Fry, Drew, Drake & Lasdun, is perhaps one of the most interesting. The first post-war building to make full use of bronze cladding, the upper three floors of the main façade have been faced with pressed bronze sections. The first floor showroom forms the main external feature, expressing on three sides of the building a reinforced concrete wall faced externally in reconstructed Portland Stone.

A clerestory window is incorporated which is gear controlled to open in lengths of 60 ft. in one operation, thus allowing the maximum flexibility of wall spaces for internal display purposes.

In common with the current continental practice, air barrier doors are installed at the main entrance beneath the illuminated cantilever canopy, allowing freedom of entry from the pavement at all times.

THEATRES

With the closing of so many well known theatres and music halls, the rare event of an old-established theatre reopening its doors after almost 20 years of enforced dusty inactivity is one which has been applauded by artists and theatre-goers alike.

During the war a bomb exploded in the foyer of the Queens Theatre, Shaftesbury Avenue, but without damaging the auditorium sufficiently to make complete rebuilding necessary. The reconstruction scheme, under the careful supervision of Bryan & Norman Westwood & Partners, comprised therefore an entirely new front to Shaftesbury Avenue containing foyers and bars, the interior *décor* of which was carried out jointly with Sir Hugh Casson; the refurbishing of the old Edwardian auditorium, the re-equipment of the stage and the remodelling of the dressing rooms. In addition, offices have been provided in the upper part of the front block.

The new front of the house has been re-designed to provide comfortable and quiet circulation spaces, using materials and methods of the present. By contrast, the cherubs, swags, etc. of the auditorium have been exploited to give, by bold colours and effective lighting, a very lively and pleasant atmosphere. There are now about 1,000 seats in the stalls, dress circle and upper circle.

The stage has been re-surfaced and a new safety curtain and new counterweighting have been provided. The lighting is remote controlled from a console in one of the boxes and follows the latest practice. A new heating and ventilating system was, of course, necessary and the space provided by galleries and stairs made redundant by the re-grouping of seats has been used for equipment.

CIVIC CENTRES AND BUILDINGS

Apart from the scope recently offered in the development of our new towns, the opportunity to design a complete new civic centre, as it were, entirely from scratch, is a rare occurrence. As far back as 1947, approval was given within the City of St. Albans for development of an open wooded site to the east of the city's main shopping and market street to provide such a centre. Under the careful supervision of Frederick Gibberd, in association with the City Engineer & Surveyor and County Planning Officer, the almost continuous façade of traditional buildings which flank the street have been retained, the entrances to the new area being through existing gaps. The proposed layout provides a civic square, terraces of shops, a town hall, municipal offices, police headquarters, and courthouse and possibly a cinema. Work has already started upon the shopping areas, but the first of the civic buildings to be erected will be an assembly hall, for which the architect is at present preparing his detailed drawings. This building has been planned to form the south side of the square and is designed to accommodate up to 1,000 people, seating 600 on the ground floor and 400 on a first-floor balcony cantilevered out to form an open air terrace on three sides. Incorporated in the design are a restaurant, stage block, dressing rooms, cloakrooms, and other auxiliary rooms which will enable the building to be used

for theatrical productions, banquets, concerts and similar functions.

Behind the assembly hall and scheduled to follow on in the building programme, will stand a four-storey block of municipal offices with a council chamber on the roof. Linked with it will be the Mayor's Parlour, members' rooms and roof gardens, the assembly hall being connected by a bridge and terrace. The police station, work upon which is likely to commence during the next financial year, will be closely followed by the Magistrates' courts, accommodating the Quarter Sessions, Petty Sessions and County Court. These buildings, designed by the County Architect in association with Mr. Gibberd, cover the eastern corner of the site and are to be so positioned that the Court House can be seen diagonally across the square, its main façade forming with the flank wall of the hall a secondary square. Other new buildings, although not yet programmed, will follow at a later date and will include other divisional departments which are now scattered all over the city, such as Education, Planning & Welfare, and the County Health Centre.

The more recent examples of civic architecture are to be found, not unnaturally perhaps, in the new towns, and of these the new Courthouse at Harlow, part of a group of civic buildings occupying a key position at the junction of the main approach roads south of the town centre, is outstanding as an example of integrated planning and landscaping. Simplicity can be said to be the keynote of this design by Frederick Gibberd in association with H. Conolly, Essex County Architect, in which a pair of identical Magistrates' Courts have been planned in mirror symmetry, contained on three sides by ancillary rooms and united on the fourth side by a main entrance concourse.

The building, which is single storied, with the Courts rising above the level of the surrounding rooms to obtain clerestory lighting and to be visible externally, forms a free standing composition with the adjacent police station, Crown Offices and an office block for professional people as a background. The buildings stand on a semi-elliptical concrete paved platform above the level of the roadway forming an island site reflecting the form of the approach roads, at the same time dissociating the buildings from passing traffic. The glass wall of the entrance concourse, running the full width of the building, does much to unify it with the forecourt and is in strong contrast with the solid forms of the rest of the building. The floor is in white marble, the actual Courts being expressed in the concourse by a facing of Hadene stone. The main external walls have been faced with grey Cornish granite alternating with grey rendered panel walls beneath metal windows, the whole topped by a cornice faced in crushed Derbyshire spar and mother-of-pearl with a slate coping.

SCIENCE, DISCOVERY AND INVENTION IN 1960

BRITISH, AMERICAN AND RUSSIAN EXPLORATION OF SPACE

The exploration of space, which was begun in the International Geophysical Year, was continued during 1960 by British, American and Russian scientists, acting in friendly co-operation. Each of them has an ambitious programme, but at present it is impossible to say to what extent their discoveries have a practical value.

A tentative timetable for American exploration of space was announced by the National Aeronautics and Space Administration. It planned 260 launchings in the next 10 years, an average of more than two per month, as follows:—

1960: Fire an astronaut in the nose cone of a rocket.

1961: Launch astronaut into orbit; hit the moon with instrument package; launch first powerful Centaur upper stage booster rocket.

1962: Launch first instrumented probe to near Venus or Mars or both; launch first 1,500,000 lb. thrust Saturn booster.

1963 or 1964: Send unmanned space craft to controlled landing on the moon; launch orbiting astronomical observatory.

1964: Send first unmanned space ship around the moon and back; attempt first reconnaissance of Mars or Venus with unmanned vehicle.

1965: Make first test flight of nuclear second stage rocket.

1965–67: Fire first rockets in a programme leading to manned flight around the moon and to a space station near the earth.

After 1970: Manned flights to the moon and back.

The Department of Scientific and Industrial Research announced an allocation of £184,540 to 16 research groups in British universities for the development of instruments for rockets and satellites. Among the subjects to be studied are—the measurement of winds and temperatures in the atmosphere, the intensity of light and other radiation from the sun, the variable density of electrons in the atmosphere, micro-meteorites in inter-planetary space, the faint glow of the dark sky, electrical particles in inter-planetary space, radio waves from satellites through the upper atmosphere of the earth, X-rays from the sun and stars, cosmic rays outside and within the atmosphere, the magnetic field of the earth high in the atmosphere, the measurement of infra-red radiation.

On March 11 the American Pioneer V satellite, weighing 94·8 lb. and 26 in. in diameter, was put into orbit round the sun between the paths of the earth and Venus. Jodrell Bank picked up signals at a range of 375,000 miles, and a high-pitched wavering whistle indicated that the satellite was running well at a speed estimated at 8,000 m.p.h. The signals were sent out by a 5-watt transmitter in the rocket which was operated for 45 minutes a day for the first week. After that a second transmitter of 150 watts was to be switched on and operated for five minutes a day and it was hoped that the telescope would receive its signals up to a range of 50,000,000 miles. The transmitter sends information about radiation, magnetism, temperature, and the impact of micro-meteorites. Part of this information is recorded on magnetic tape and part goes through a "Telebit" system, a device which punches the statistical details automatically and in code on a teleprinter tape. This tape is transmitted over the teleprinter system to scientific headquarters at Cape Canaveral and Los Angeles. It was estimated that the satellite would take 311 days to orbit the sun. Its closest distance to the sun would be 74,700,000 miles.

The significance of the information radioed by Pioneer V was pointed out by Dr. H. Elliot, of the

Imperial College, London. The space between the planets, he says, is not empty void. It contains hydrogen gas at a pressure much lower than that of the vacuum in the laboratory. There are probably only about a thousand hydrogen atoms to every cubic centimetre (compared with ten million million million atoms in a cubic centimetre of gas on the surface of the earth). The hydrogen is not like gas of the laboratory in which each atom consists of an electron travelling around a proton so that the negative and positive electric charges of the two particles are welded together into an electrically neutral whole. In inter-planetary space the sun's radiation tears the electrons away from the protons so that the two particles are almost independent. This means that the gas in interplanetary space, unlike the hydrogen on the earth, is an extremely good conductor of electricity. Electric currents must always be present in the gas and, since any electric current must produce a magnetic field, there must be a magnetic field extending thoughout the solar system.

Jodrell Bank equipment is being prepared for an attempt in 1961 to bounce radar signals off Venus when the planet passes the earth about 26 m. miles away. The object will be to obtain more reliable data on one of the basic dimensions of the solar system—the astronomical unit, the angle subtended by the earth when seen from the centre of the sun. Once this figure is known, the distances between the sun and the various planets can be calculated readily. Jodrell Bank scientists expect an error of only one part in 100,000.

Russian scientists are giving high priority to the task of sending a man into space and bringing him back safely. Such an achievement will lead to manned flights to the moon, Venus, Mars and beyond. To this end Russia put into orbit on May 15 a four and a half tons "spaceship satellite" with a dummy-man aboard. It was circling the earth every 91·2 minutes between 194 and 230 miles up and passing over major cities of the West, including Paris. As it passed over Denver, Colorada, "moonwatchers" sighted it shining as brightly as a star.

The space ship included a "cabin" weighing two and a half tons. No attempt was made to recover the cabin, with the dummy man inside. On May 20 Moscow announced that the space ship had separated from its carrier on orders from the ground. Instead of falling towards the earth and burning up as planned, the detached cabin and the space ship went into an elliptical orbit with their lowest point about 191 miles from earth and their highest about 249 miles from it, giving a transit time of 94·25 minutes. Before the fault the satellite was circling the earth every 91 minutes, about 200 miles up.

Russian scientists successfully launched a one-stage 4½ tons ballistic rocket carrying two dogs, Strelka and Belka, and a rabbit, the object being research into the upper layers of the atmosphere and cosmic space. The rocket reached a height of 208 kilometres (about 130 miles). The animals were returned to earth and were in good condition. The total weight of the apparatus, including power sources and the animals, was 2,100 kilogrammes (about 4,620 lb.). Valuable information was obtained on ionized clouds, the ion composition of the atmosphere and its electrical properties, radiation of the earth and the sun, and the effects on animals in conditions of weightlessness. A command from the ground caused the capsule to plunge back into the atmosphere on its eighteenth circuit of the earth, and it was down safely within six miles of the pre-selected point. The space ship was big enough to carry a man. For 24 hours in space the dogs were weightless, but gradually they got used to floating and started eating the jelly-like food automatically supplied to them twice a day, while scientists watched them through radio-television. Several mice and rats travelled with the dogs, and so did flies, plants, fungi, microscopic water plants and some seeds. The flies were housed in small plastic retorts, about 50 flies in each retort tube. They will be used to determine hereditary changes, and the effect of cosmic radiations on living organisms.

American scientists were also reported to be planning to send a man into space, and seven "Astronauts" had been in training for several months. But—animals first, and a small female monkey called Miss Sam survived a rocket flight in January in a capsule designed to take human beings into space. After being recovered from the Atlantic she was said to be friskier than before her ride. Miss Sam, aged 2½ years and weighing about 6 lb., was placed in a 125 lb. cylinder packed with instruments to measure her reactions, and was fired from the Virginia coast to an altitude of three miles. An escape rocket mounted above the capsule then left the six-engined booster and soared at greatly increased speed to a height of seven miles, at which point a stablizing parachute was released. The pressure on the capsule during these few seconds was between 800 lb. and 1,000 lb. a square inch. When the capsule had fallen to 10,000 ft. a bigger landing parachute opened and, eight minutes after the launching, Miss Sam and her cradle were recovered by a helicopter six miles offshore.

Echo I, a 100 ft. plastic balloon weighing 16 lb., and coated with vapour-deposited aluminium, was put into orbit from Cape Canaveral and circled the earth at 15,000 miles an hour, at an altitude of 1,000 miles, making one circuit every two hours. It was visible as bright as a star in the Plough. It bounced back a radio signal consisting of a recorded message by President Eisenhower, thus proving the possibility of using such a balloon satellite for world-wide telephone, wireless and televeision communications.

The United States Navy on April 13 put into orbit a satellite designed as a first step towards using satellites instead of stars for navigation. This satellite is the pioneer in a new system using satellites as all-weather, global navigation stations. It will enable ships and aircraft to fix their positions within an accuracy of one quarter of a mile. The greatest accuracy obtainable at present is about half a mile. The satellite's orbit will take it over all areas of the earth 50 degrees north and 50 degrees south of the Equator.

The first systematic attempt to search for signals from intelligent beings on other planets was begun on April 11 at the National Radio Astronomy Observatory, Green Bank, West Virginia. For a month the observatory's 85 radio telescopes were to be focused alternately on two stars that might have planets able to sustain life. They are Tau Ceti and Epsilion Erindi, each about 66 million million miles from the sun. It would take radio signals 11 years to bridge the distance.

The "moon's celestial highness" has also received attention, and an American astronomer has gone so far as to give 1969 as the year in which a man will land on the moon and return to earth. Manchester University is to receive grants of more than $120,000 (about £43,000) a year from the United States Air Force for a study of the moon and planets in collaboration with French astromomers at the Pic du Midi observatory in the Pyrenees. A new 40 in. reflecting telescope is being built there,

which will be the largest telescope mounted at such a height, nearly 10,000 ft., in the world.

The new reflector will produce an image of the moon about one foot across, and Venus will be enlarged to about the size of a sixpence. Both the moon and planets will be revealed more clearly than before. Normally the image would be impaired by currents of air in the telescope's tube, but Dr. James Ring hopes to overcome this by closing the top of the tube with a transparent material and filling the tube with gas—hydrogen or helium—to reduce the turbulence set up by any currents of gas inside. As well as the photographic survey of the moon, photographs of the planets will be taken through colour filters to ascertain precisely how the colour of each planet varies.

A 300 lb. payload to be landed on the moon in 1961 was ordered by the National Aeronautics and Space Administration from the aeronautics division of the Ford Motor Company. It is expected to cost about $3,500,000 (about £1,286,000), and will ride on a larger payload. The larger load will carry a television system, but will be destroyed when it hits the moon. The smaller load will detach itself and be slowed down with retro-rockets to a speed of about 300 miles an hour. A honeycomb structure on its base will cushion the impact and enable the instruments to transmit information from the moon, such as temperature and seismic disturbances.

The first conclusive radio waves from the planet Saturn and from a planetary nebula 3,000 light years away have been measured at the University of Michigan. Professor Fred T. Haddock said that such observations of the planets would be basic to their later study and would save millions of dollars in space exploration planning. The measurements were made with the university's 85 ft. radio telescope. Saturn's atmospheric temperature was found to be minus 283°F. The measurement might make possible study of the temperature and density of the rings of Saturn and of the distribution of gases in Saturn's atmosphere. Measurement of the radio waves from the planetary nebula could help to determine how stars age and die. Radio studies of Jupiter revealed intense radiation belts which could damage electronic and photographic equipment on a space probe. The surface temperature of Venus had been found by radio astronomers to be much hotter than expected—around 580°F. Only radio astronomy could discover this because the planet has a permanent cloud cover.

AMPHITHEATRE FOUND IN CYPRUS.—The Cyprus Department of Antiquities announced the discovery at ancient Salamis of the largest amphitheatre so far found in the island and one of the largest in the eastern Mediterranean area. The presence of the theatre was suspected some years ago owing to a particular formation of the ground. The diameter of its semi-circular orchestra is 27·5 metres (about 30 yards) as against 21 metres in the theatre at Epidaurus. What remains of the seats is quite impressive and as in the present state of preservation it could hold 1,000 spectators its original capacity must have been enormous. Four marble statues, which once adorned the stage, were discovered, dating from possibly the second century A.D. The general plan suggests that the theatre may have been built by Imperial Rome and that it may have succeeded an earlier theatre. It suffered at the hands of robbers who, in later periods, removed the stone of all the upper seats in the auditorium, leaving only the lower eight rows.

ANTARCTICA CO-OPERATION.—A treaty establishing scientific co-operation in Antarctica was signed in Washington on December 1, 1959, by representatives of Argentina, Australia, Belgium, Chile, France, Japan, New Zealand, Norway, the Union of South Africa, the Soviet Union, the United Kingdom, and the United States. The main effects will be to suspend all territorial claims and disputes in the area, to establish free use of the entire continent for scientific work, and to set up a mutual inspection system to prevent any military activities. Nuclear explosions and the disposal of radioactive waste will be prohibited pending "the conclusion of international agreements." The treaty runs for 30 years, but it can be modified at any time by unanimous agreement. It applies to the land areas and ice shelves, but not the high seas, south of latitude 60. The treaty includes the South Shetland Islands and the South Orkney Islands, which are administered by Britain but claimed by Argentina and, in the case of the South Shetlands, by Chile also. The area does not include the disputed Falkland Islands.

AQUEDUCT 760 MILES LONG.—California has embarked on a water programme that, when completed, will dwarf anything the Romans did and bring benefits greater than the harnessing of the Tigris and the Euphrates in Mesopotamia. It involves the construction of an aqueduct some 760 miles long. The water programme calls for the expenditure by state, federal, and local agencies of $14,000 m. (approximately £5,000 m.) during the next 100 years for 260 dams, hundreds of miles of aqueducts, pumping stations, and power houses. The irony is that California has ample water but it arrives in the wrong part of the state and usually at the wrong time of year. The northern third receives 70 per cent. of the state total, while the southern two-thirds needs 77 per cent. It reaches the extreme where the sparsely populated north-west corner of the state receives as much as 110 in. of rain a year while 700 miles away the south-east corner receives as little as 2 in. Engineers have stated that it will be possible to channel all the surplus water from the great watersheds of the north into one central pool and then carry it over an aqueduct to the deficient areas of the south. This is what the water programme is intended to do. The Los Angeles area will receive its first supply of new water in 1971. At present it is drawing water from the Colorado river, more than 242 miles away. Water demands are increasing because of the increase in population. Urban use of labour-saving devices such as dishwashers and washing machines has raised the average domestic consumption of water from 100 gallons a day per head to as much as 300 gallons.

ARTHRITIS MICROSCOPE.—Progress of research into arthritis and rheumatism has often been handicapped by lack of access to an electron microscope. To meet this need an electron microscope is to be established at St. Thomas' Hospital Medical School, London, by the Empire Rheumatism Council, at a cost of £12,000 to £15,000. The unit can magnify up to 150,000 times pieces of cartilage until now studied mainly with ordinary light microscopes at a magnification of up to 1,000 times. Cartilage is one of the few tissues, like the lens of the eye, which has no blood supply. Its structure therefore may be quite different from that of other tissues in the human body. Professor D. V. Davies, Professor of Anatomy at the medical school, will carry out research into cartilage and other tissues having direct bearing on arthritis. The instrument will also be available for use by other arthritis research workers in Britain.

ASTROLABE DATED FROM 1027.—An astrolabe made in the years 1026–27 has been added to the collection of rare time-reckoning instruments at the Royal Scottish Museum in Edinburgh. The museum authorities state that the instrument is the oldest dated " maghribi " astrolabe in existence. The specimen was presented by Mr. James H. Farr, who has a private museum. Investigation in the museum's technological department revealed its similarity to the earliest Islamic astrolabes.

AUSTRALIAN FAUNA EXPORT BAN.—A ban on the commercial export of all Australian fauna came into operation on January 1. The export of live koala bears, duck-billed platypuses, and lyre birds is not permitted for any purpose. Their skeletons, skins, and plumage may be exported for scientific research only. Other species of Australian birds and animals can be exported only for bona fide zoological and scientific purposes.

BARROW FINDS AT CRICHEL DOWN.—Barrows used for burials over a period of 2,000 years were opened during excavations at Crichel Down. The finds extend from crouched burials of the Beaker folk 3,000 years ago to pagan interments in Anglo-Saxon times, and provide evidence to confirm the new sequence of cultures in the Early and Middle Bronze Ages. Permission was given by the owners, Lt.-Cmdr. and Mrs. M. A. Marten, for two barrows to be opened before the land was ploughed. The larger barrow, 7 ft. high and 110 ft. wide, covered a larger pit-grave at the bottom of which lay two crouched burials of the Beaker period. A large shaft had been dropped through the centre of the mound and a third crouched burial was introduced into the upper filling of the grave. With the skeleton were a bone pin, a flint knife, and a wooden object of unknown use. Also found was part of a relief-decorated cremation urn of a type previously regarded as Late Bronze Age, but now proved to be at least 500 years older. Under one of the crouched burials was a trace of a rawhide or leather thong. It is believed that this helps to prove the theory that such burials were of dead persons whose bodies had been transported, perhaps on pack-ponies, wrapped into a tight bundle. The smaller barrow covered a large, oval grave of the earliest Bell-Beaker period The centre of the mound had been removed later and three young persons of the food-vessel culture buried. Traces were found of a second food-vessel burial close to the first pit and another Bell-Beaker interment. This mound had been extended and heightened to about 4 ft., and in the top filling were three cremations and the inhumed skeleton of a baby.

BRITISH ASSOCIATION—The British Association for the Advancement of Science held its 122nd annual meeting at Cardiff on August 31–September 7, under the presidency of Sir George Thomson, F.R.S., Master of Corpus Christi College, Cambridge, who has been in the forefront of the most striking developments in science from the early days of flight to the present search for thermonuclear power.

The subject of the presidential address was " The Two Aspects of Science,"—that science aimed at understanding the nature of things, and it was at one with religion and philosophy. The nature of the relationship was to him a mystery, but they were certainly not merely the product of the human mind. Scientists are not interested merely in making new drugs, television sets or weapons, but in enlarging the bounds of human knowledge. The ability to understand the world around him even to a limited extent was one of the powers of which man had good right to be proud. Indeed, it seemed to be the one which most divided him from the animals. The lark's song, the heroism of a plover luring an enemy away from her young, the cat who was seen to attack a grizzly bear in defence of her kittens—these were notable even by human standards; but he was not aware of any creature which even appeared to be trying to discover general principles.

The most amazing thing about science, and the most surprising and exciting fact about our world, was the connection between highly abstruse theoretical ideas and the matter of fact—the house wife boiling her kettle with power from atomic nuclei. He had no sympathy with those who regarded technology as intellectually a poor relation of science; to him, science without technology was incomplete and inconclusive. Scientific knowledge was influencing thought and the intellectual climate of the world. The quantum theory had produced a revolution in physics comparable with that prodouced in biology by Darwin. We had been forced to believe that at bottom the laws of physics were not statements of what *must* happen, but of the relative chances of a variety of alternatives—that the determinism of the planets occurred merely because planets are enormous on the atomic scale and their distance from the sun very large, and that the *Nautical Almanac* would be impossible if the solar system was reduced to the scale of a molecule. Certainty came with a massive body, or if the bodies were small one must have many of them so that statistics could manufacture near certainty out of highly uncertain events, as they did in life insurance.

Science, he said in conclusion, was providing new ideas tied closely to experience. It was surely something for beings so utterly insignificant compared with the smallest of the stars to be able to understand some of the principles which control their existence. To see these principles as manifest in the most varied phenomena; in the motions of the tides, the blue of the sky, the lightning flash, and the falling apple; to prove our understanding by creating compositions which use these principles in new ways of our own devising; to begin to see light on the nature of living matter and how living forms can transmit themselves to descendants: all these are worthy to rank with the achievement of sculpture, music or literature. Science was not merely the control, but also the understanding, of nature. Its two aspects must be held in equal honour.

The presidents of the sections and the subjects of their addresses were—Mathematics and Physics, Dr. R. van der Reit Woolley, F.R.S., Astronomer Royal, " Stellar motions "; Chemistry, Dr. James Taylor, " Chemistry is not enough "; Geology, Mr. G. F. Mitchell, " Pleistocene history of the Irish Sea "; Zoology, Dr. G. S. Carter, " Tropical climates and biology "; Geography, Prof. E. G. Bowen, " Welsh emigration overseas "; Economics, Prof. R. S. Sayers, " Monetary thought and monetary policy in Great Britain "; Engineering, Sir Alfred Pugsley, F.R.S., " Statics and the engineer "; Anthropology, Prof. E. Estyn Evans, " The peasant and the past "; Physiology and Biochemistry, Prof. W. Burns, " Physiology of hearing "; Psychology, Prof. R. C. Oldfield, " Experimental psychology "; Botany, Prof. T. M. Harris, F.R.S., " Origin of angiosperms, "; Forestry, Mr. T. R. Peace, " The dangerous concept of the natural forest "; Education, Prof. H. C. Dent, " Sixty years of English education "; Agriculture, Dr. William Davies, " Pastoral systems and world food supplies "; Sociology, Prof. D. V. Glass, " Population growth, fertility and problems of

policy": Assembly of Corresponding Societies, Mr. A. B. Oldfield-Davies, "Science broadcasting in sound and television."

Two evening discourses were delivered: Professor H. Bondi, F.R.S., "The structure of the universe"; Dr. E. B. Chain, F.R.S., "Microbiological development of drugs".

Professor Sir Wilfrid Le Gros Clark, F.R.S., an outstanding anatomist and student of the ancestry of man, was elected President of the association for 1961, when the annual meeting will be held at Norwich from August 30 to September 6. The meeting in 1962 will be in Manchester, and in 1964 in Southampton.

At the close of the meeting it was announced that membership had reached 4,100 and total attendance, including the young people's programme was about 7,000. It would be an advantage if meetings were attended by more working classes in the 30–40 age group. A committee had been appointed to bring the facts and implications of world food supplies and population to public notice.

CANBERRA ABLE TO MOVE SIDEWAYS.—The ability to move sideways is a remarkable new feature incorporated in the 45,000-ton liner *Canberra*, built in the Belfast shipyards of Harland and Wolff Ltd. for the P. and O. Line. This development, invaluable for berthing purposes, is achieved by means of a docking propeller mounted in an open transverse tunnel near the bow. The propeller can be withdrawn into a caisson space in the hull and overhauled while the vessel is at sea. *Canberra* is Britain's largest turbo-electric passenger ship built in the United Kingdom. The new vessel will carry 2,250 passengers, more than any other liner afloat, even though its tonnage is just over half that of the *Queen Mary*. The possibility of seasickness is said to be remote by reason of two sets of stabilizing fins which will operate electronically to reduce roll to the minimum.

CASPIAN SEA STILL FALLING.—It was stated in WHITAKER'S ALMANACK, 1958, that the level of the Caspian Sea had fallen by 2½ metres in the last 25 years. It is still falling, to an extent that warranted a conference in Moscow of biologists, hydro-electric engineers, and other scientists to discuss the increasing emptiness of the Caspian. The Caspian has an area of 170,000 square miles. Evaporation removes 400,000 m. cubic metres of water from the surface every year, and the recent construction of hydro-electric stations on the rivers that run into the Sea, and particularly of the Volga, has made the conditions worse. Each of these stations accumulates a large reservoir behind it, which often provides water for irrigation, for local industries and for power. Much of this water gets to the Caspian in the end, but later and in smaller quantities than it used to. The life of the fish is made more difficult by the Caspian's richness in minerals. The oilfields of Baku, which used to lie along the coast, are spreading farther off the shore, and it is now believed that almost the whole southern half of the Caspian is an oil-bearing area. The drilling rigs and the industrial waste that comes from them drive the fish away from their familiar haunts. The Caspian used to provide four-fifths of the world's sturgeon, but not now. The Sea is rapidly becoming the most important Soviet source for sodium and magnesium. A plan for filling up the Sea was suggested by a hydro-electric engineer. His idea is to divert the two rivers which flow north into the Arctic, the Pechora and the Vychegda, into a lake on the upper waters of the Kama river. This would involve a new dam seven miles long and 200 feet high, and a canal 60 miles long.

CHLOROPHYLL MADE IN LABORATORY.—Professor Marten Strell and Dr. Anton Kalojanoff, both of the Munich Technical College, have succeeded in producing chlorophyll in their laboratory. Chlorophyll A (blue-green) and chlorophyll B (yellow-green) were produced, following 20 years of research in Munich, Basle and Massachusetts. An American scientist has been successful in the quest. The discovery is likely to be of the greatest importance. Chlorophyll is the catalyst which makes possible the formation of carbohydrates, by which solar energy is converted into chemical energy, enabling plants to assimilate carbon dioxide and convert it into carbohydrates and oxygen. It is essential not only to the production of energy in plants, but also in such fuels as coal and oil that are of organic origin. The Association of the Chemical Industry stated that it might now be possible to reproduce the process of the formation of carbohydrates, and this could lead to the artificial production of food and the end of the world's food problem. Sir Hugh Taylor, Emeritus Professor of Physical Chemistry at Princeton University, stated that if chlorophyll can be produced in quantity in the laboratory, it may be as important as the German synthesis of indigo, where a synthetic product displaced a natural one which had been provided by India from the indigo plant. Here you had a case of a natural product being produced synthetically in the laboratory under controlled conditions and controlled purity.

COMMON COLD.—An advance in the study of the common cold is reported by the Medical Research Council Common Cold Research Unit. Successful propagation in the tissue culture of viruses derived from patients with colds is announced. The significance of this discovery is that hitherto the only way of recognizing common-cold viruses has been to try the suspected material in human volunteers and see whether it produced a cold in them. This procedure, which has been followed at the Common Cold Research Unit for 13 years, has added much to knowledge of the common cold. Now that a method has been evolved whereby viruses from patients with colds can be grown in tissue culture, more rapid progress and a more careful study of them may be made. Such advance has two implications of value. The first is that it should now be possible to decide whether the viruses which have been isolated by the Medical Research Council workers, and provisionally named the Salisbury viruses, are actually those of the common cold. The second arises from the observation that the Salisbury viruses interfere with the growth of other viruses. This suggests that the Salisbury viruses themselves may be susceptible to interferon, a viral antibiotic.

COMPUTER AID IN PUBLISHING.—The Cornell University Press, by using an electronic computer, has accomplished, to a saving of labour and money, what formerly would have taken years, the preparation and editing of materials for printing a massive concordance of the poems of Matthew Arnold. The work runs to 965 pages and an appendix, and contains the occurrences of 10,097 words of Arnold's vocabulary and 70,000 references. Preparation of 17,000 cards of the data that were fed to the computer took a key punch operator 69 hours and the editor, Professor Stephen Maxfield Parrish, of the Cornell University English department, about 80 hours. The computer read the data at the rate of 15,000 characters a

second and made 42,000 deductions a second. This took 38 hours and the printing 10 hours more. Then the computer print, spaced into pages, was reproduced for publication by the offset printing process.

CONTINENTS ON THE MOVE.—A new analysis of magnetic measurements of rocks was presented to the Royal Society by Professor P. M. S. Blackett. Recent measurements have shown that the magnetic field of many rocks are out of line with the present field of the earth. Such rocks are like enormous fossil compasses pointing in directions different from the magnetic north. Analysis of this "fossil magnetism" shows that the older the rocks the greater is this magnetic deviation from those of the present day. Professor Blackett says the theory of continental drift is the most plausible explanation of the enormous change.

The magnetic poles have remained near the north and south geographic poles where they are to-day, but the continents have drifted so that successive layers of rocks have been magnetised in new directions. All four land masses (Europe, America, Australia and India) have, he suggests, moved steadily northward in the last 200 m. years. Western Europe and North America were near the equator 300 m. years ago, and have rotated relative to each other. Australia, starting near the equator 400 m. years ago, moved down to the Antarctic, and then reversed 200 m. years ago to drift northward. India has moved faster than the others, from 50 deg. south up to the equator in 70 m. years and up to its present position at 20 deg. north in the last 80 m. years. The most direct confirmation of continental drift would come from a study of ancient climates. There are traces of glaciers in 200 m.-year-old rocks of India, Australia, South America and South Africa. The magnetic data suggest that these continents were near the Antarctic at the time. Sandstones of the same age found in Britain suggest a Saharan climate—and the magnetic data put Britain where the Sahara is now. (*see* WHITAKER'S ALMANACK, 1958).

COYPU COLONIES INCREASE.—Coypus, the large American water rats imported for breeding by East Anglian fur farmers 30 years ago, have increased their numbers to such an extent that they are becoming a nuisance to landowners in Norfolk and Suffolk. Their multiplication in the wild state has earned them official recognition as a pest, and rabbit-shooting societies in East Anglia now receive a 50 per cent. Government grant for shooting the destructive creatures. (*See* WHITAKER'S ALMANACK, 1957.) The increase is believed to be due to the favourable summer of 1959, the abolition of the gin trap, and the fall in the market value of their pelts. Four years ago skins fetched between 35s. and 50s. each, but plentiful supplies from the United States affected the trade. Coypus are orange-toothed rodents but are not usually aggressive. They live on reed shoots and aquatic vegetation and reach a length of 3 ft. and a weight of 20 lb. They eat crops, particularly sugar beet and vegetables and carrots and even potatoes are said to be to their taste. They are a prey to stoats and herons and are quite easy to catch in a trap baited with sugar beet or mangel wurzel roots. Coypus are edible, and people who like them say the flavour is between a hare and a chicken. During the 1930s there were probably as many as 40 coypu fur farmers in East Anglia, but the enterprise was abandoned on the outbreak of war and many of the animals were allowed to roam.

DIAMOND PROCESS REVEALED.—The General Electric Company, which a few years ago announced that it had produced industrial diamonds, has since revealed the method of their manufacture. In the process carbon and a catalyst metal in a pressure cell are subjected simultaneously to pressures of 800,000 lb. to 1,800,000 lb. a square inch and temperatures of 2,200 to 4,400 degrees Fahrenheit. The source of the carbon is probably pure graphite, and there is a wide choice of metals for the catalyst. It was found that the "essential breakthrough" in transforming carbon into diamonds came from the use of a molten metal catalyst, which acted as a thin film between the carbon and the growing diamond crystal. Tantalum was particularly effective for inducing the growth of small diamond crystals. It was discovered that a new diamond can form whether diamond seed crystals are present or not and that the diamond could grow at great speed. To make an industrial diamond (80 mesh or finer) took only a few minutes. According to Dr. Guv Suits, General Electric's director of research, it was the molten catalytic film and the development of new super-pressure and high-temperature apparatus, during four years of study, that made possible the long-sought transmutation of carbon into diamond. A discovery of significance regarding the making of diamonds for industrial uses was that the shape of the diamond crystal, the type of cubes produced, varies with the temperature during formation. Colour was governed by temperature, varying from dark shades at low temperatures to white at the highest heat. Although any of the physical characteristics of natural diamonds can be duplicated, the small size of the man-made diamonds keeps them within the range of industrial rather than gem stones.

DISCOVERY OF 1,000 MUMMIES.—An expedition from Cairo University, led by Dr. Abdel Moneim Aboubakr, excavating in Nubia found a large necropolis with more than 1,000 mummies—many of them those of children—dating back over 4,000 years. The condition of the mummies suggested they had been the victims of a massacre. Some were tied up and some had been strangled. Mummies in some 450 tombs still had hair, teeth, skin, and nails. In some of the tombs, dating back to 2,400 B.C., the women were wearing necklaces and rings of copper, gold, and silver. This important find sheds light on Nubian history from the prehistoric era until the end of the rule of the Pharaohs. Further important discoveries are expected before the area is submerged by the waters of the Aswan High Dam.

EARLY ANGIOSPERMS WANTED.—We want early angiosperms urgently, almost as a thirsty man wants water, Prof. T. M. Harris, F.R.S., told the British Association. No one had yet thrown convincing light on the origin of the angiosperm (plants which have their seeds enclosed in seed vessels). Fossil angiosperms could be traced back as far as the Cretaceous period, but a little above the middle of the Cretaceous there was virtually none. He believed angiosperms has an unbroken series of ancestors before the Cretaceous and were represented by fossils which are within the wit of man to understand. A moderate number of good and convincing Jurassic angiosperms would kill all theories but one. Why did they rise to dominance relatively suddenly, rather after the Middle Cretaceous? On land the dinosaurs remained, and the mammals had to wait in the background. There were no world-wide terrible volcanic eruptions or submergence of continents, or ice or desert ages.

Indeed, when terrible things happened, as in the Tertiary when the world's mountains were built or in the Quaternary with its ice ages, the plant world seemed to adapt itself easily.

EARTHQUAKES AND TIDAL WAVES.—Chile, Persia and Morocco were subject to earthquakes during the year, with great loss of life and enormous destruction of property. The range of the south Andean volcanoes came to life, and two new ones erupted. Near Rinihue the earth started to heat up and then sank more than 600 ft. for a length of two and a half miles. As surrounding trees burned to ashes in minutes, a gulf 28 miles long by three miles wide opened, and lava, stones, smoke and fire belched upward thousands of feet. Ashes spread for 45 miles. The toll of dead and missing in Chile was early estimated at nearly 6,000, with countless injured and half a million homeless under bitter winter conditions. The first estimates of damage were put at £100 m., half of Chile's annual income. Tidal waves set in motion by the earthquakes swept across the Pacific at between 400 and 500 miles an hour, with the energy of 1,000 nuclear explosions, striking Alaska, Hawaii, Japan, the Philippines, New Guinea, Australia and New Zealand. Off North Island, the seabed dropped sharply into an extension of a deep trench, and South Island had an eastern seabed which spread outward to the Chatham Islands at an average depth of 900 ft. Japan, with a heavy roll of dead, homeless and missing, ships sunk or washed away, suffered most from the huge waves which hit the coast. A severe earthquake visited south Persia in April and destroyed the towns of Lar and Herash. More than 3,000 inhabitants including 500 children were killed and several thousands injured. The menace of poisonous snakes added to the horror. They found their way under the debris, and attacked the trapped victims. In March an earthquake devastated the town of Agadir, in Morocco. A tidal wave which accompanied the earthquake added to the destruction. Evidence of the tremendous submarine upheaval off the coast came to light from naval soundings, which show in one case a depth of only 45 ft. where previously the water was charted at 1,200 ft. Nine miles from the shore soundings show a depth of 1,200 ft. instead of 4,500 ft. This will necessitate an extensive hydrographic survey.

ELECTRONICS AND HONEY.—After years of research Mr. E. F. Woods, a bee-keeper, of Esher, produced the apidictor, an electronic device which gives accurate warning of an impending swarm at least fifteen days before it takes place. The instrument selects the frequency of the note produced by bees in a hive (a bubbling sound like escaping bath water) so that action can be taken. It eliminates the opening of hives and the search for queen cells when no swarm is indicated, and provides in a few seconds information which would normally take up to half an hour to get. Mr. Woods stated that in America, where there are 10 million colonies a hive inspection is estimated to cost between $15 and $20 a year for labour. Much of that could be saved by electronic prediction, but there would be an equal saving in increased honey crops by reducing disturbance of hive activity. The apidictor is in use in New Zealand, India, and Germany. Some British producers use it too.

EVEREST—WITHOUT OXYGEN.—The successful climb of Everest by China was made by a three-man assault group led by Mr. Wang Fu-Chou, a Peking geologist, aged 25, who was accompanied by Chin Yin-hua, a lumberjack, and Konbu, a Tibetan soldier. The trio ran out of oxygen before they reached the summit, then discarded their breathing apparatus, and started on a hazardous journey, climbing above 28,960 feet without oxygen. (The height of Everest is commonly accepted as 29,002 feet.) Each step meant a gigantic exertion. Acute headache, troubled vision, excessive panting and feebleness and the extreme cold tortured them. It took the climbers over half an hour to tackle a three-foot high rock and long halts were needed between each step. When they eventually reached the summit Konbu placed the Chinese national flag and an eight-inch-tall bust of the Communist party leader, Mao Tse-tung. Wang Fu-Chou produced his notebook and pencilled the words: "Wang Fu-Chou, &c., three men, conquered Mount Jolmo Lungma (the Chinese name for Everest): 4 20, May 25th, 1960." He placed the message inside a woollen glove and put it with the flag and the bust.

FIREBALLS OF GLOWING GAS.—The existence of fireballs associated with thunderstorms has long been attributed to various natural phenomena. One of the difficulties of accounting for them has been that no debris has ever been proved to have come from the break-up of a fireball. That this should be so is not surprising, according to the theory of Mr. Kapitza, the Russian physicist, who says that a fireball is nothing more substantial than a pocket of glowing gas formed out of the material of the atmosphere. His theory has been supported by Dr. W. K. R. Watson, of California. A mechanism now proposed resembles closely the devices suggested for heating gases to temperatures at which thermo-nuclear reactions would occur. The source of the energy needed to maintain a fireball is primarily the electric and magnetic forces in the atmosphere before and during thunderstorms. It is supposed that part of these forces consists of waves of electro-magnetic radiation—essentially radio waves with a wavelength measured in metres—located between thunder clouds and the ground. These waves are stationary, the vibrations associated with them are like the vibrations on a violin string clamped at both ends. Dr. Watson states that, at places in the atmosphere where the electric vibrations are least intense, electrically charged particles would be confined in a volume a quarter of the size of the wave-length of the radiation. There they would rapidly break down atmospheric atoms into electrically charged particles, and the region of electricity thus created would rapidly absorb energy from the radiation, so that it became heated to a high temperature. This explanation accounts for many features of fireball behaviour, such as their passage through the sky and their explosion with a loud noise near the ground. One difficulty is that the electric field necessary for the production of fireball effects is a million volts in a metre. Equally high values are needed to account for lightning discharges.

GAMMA RAYS IN BUILDING.—The problem of locating a position corresponding to a known position on the other side of a cast concrete floor or ceiling has been solved by Percy Bilton, a firm of London building contractors, by the use of the radio-isotope caesium 137. The modern practice of casting concrete floors and party walls at the same time makes it difficult to use theodolite sighting, while reference grids spend time and tell-tale holes may weaken the structure. The problem is serious in the placing of supporting columns exactly

over those on the floor below. The new apparatus —developed by the firm in conjunction with the Physics Group of the Isotope Division at Harwell— consists of a portable scintillation counter and a capsule of caesium 137 shielded in a container which collimates the gamma rays emitted. The rays pass through the concrete and are detected on the other side by a crystal connected to the scintillation counter. It is claimed that positions can be located to within an accuracy of one-sixteenth of an inch through a nine-inch concrete floor, and that this accuracy is not seriously impaired when there are three one-inch diameter intersecting steel reinforcing bars embedded in the concrete.

GRASSLANDS NEGLECTED.—Dr. William Davies, director of the Grassland Research Institute, Hurley, told the British Association that much had to be learned about the use of the vast pastoral areas occupying nearly 5,000 m. acres and accounting for 86·4 per cent. of the world grassland. There was need for trained scientific staff to deal with a problem that was an essential part of feeding a rapidly increasing human population. Such centres as Brisbane, Kitale, Jamaica and St. Croix (West Indies), Dr. Grossman's station in southern Brazil, and others should offer training for grassland personnel. A number of students trained at Hurley were doing excellent work in several parts of the world. Grasslands in Britain were grossly undeveloped. We had within our own shores this underveloped countryside—17 m. acres of it—lying chiefly above the 800 ft. contour. In a reconnaissance survey made some years ago he found that upward of three-quarters of Wales above 1,000 ft. was represented by undulating land; the same was true of the elevated land elsewhere thoughout the British Isles. Upward of 10 m. acres of hill land lay on easy undulating slopes and were tractable.

HAY FEVER AND TENNIS.—People who suffer from hay fever should shut themselves away at the hour of danger, said Mr. H. Hyde, Keeper of Botany at the National Museum of Wales, at the British Association. If they emerged to play a strenuous game of tennis they would breathe in at least 500 times as much grass pollen—more, if the courts adjoined a hay field. In dry and sunny weather in June, especially between the 10th and 30th, they should stay indoors with the doors and windows closed. Pollen grains and tiny seeds of fungi spores floating in the air caused allergic disease. Every year, a quarter of a million people went sick from hay fever. Asthma, which affected one person in a hundred, was also due in some patients to inhaling plant dust. By trapping pollen grains from the air, it had been discovered that the most abundant type was that of the grasses; and the cloud was at its thickest in June and July. This thinned out over the largest towns and diminished in density on the mountains. Nowhere was the midsummer atmosphere free from grass polien, and even 30 miles out to sea there might be enough to cause hay fever. A visit to the seaside was not enough to ensure immunity.

HEBREW EPISTLE?—A 2,700-year-old letter, said to be the oldest Hebrew epistle ever found, was made public in Jerusalem. The script, inked on a potsherd, was addressed by a peasant to a prince. It was discovered in January, 1960, six inches below ground, at an ancient fort near the Mediterranean coast, one mile south of Yavneh Yam, by archæologists, headed by Mr. Joseph Naveh, Inspector of Antiquities in the Ministry of Education. There has been no earlier evidence of Hebrew occupation of that part of Palestine in the second half of the seventh century B.C. The biblical King Josiah of Judea took advantage of the decline of the Assyrian empire at that time to re-occupy part of northern Palestine and Mr. Naveh says his discovery suggests that the Judean king seized the political situation to expand his kingdom also along the coast. The earliest Hebrew letters previously unearthed were the sixth-century B.C. messages from the commandant at Lachish, discovered in 1935. Mr. Naveh said the new discovery is half a century older. The letter is an appeal by a peasant to his Prince denying accusations that he was in debt. It consists of fourteen lines of writing, but only seven lines have so far been deciphered. The Prince, whose name is not known, probably lived in the fort and was a contemporary of King Josiah. The peasant apparently had had his cloak confiscated for being in debt—a traditional punishment of the times. The letter begins with the customary formula: "May my Lord the Prince hear the word of his servant." The deciphered part of the letter continues: "and he took the cloak of your servant when I finished my harvest . . . and all my brothers will witness on my behalf truly I am innocent of any guilt." The Hebrew of the text is not as good as the handwriting, and it is believed that the peasant dictated the letter to a scribe.

HIROSHIMA REVELATION.—Cancer of many kinds —and not only leukaemia—is four times more common among those citizens of Hiroshima who were closest to the atomic bomb explosion there in 1945 than among their fellow-citizens who escaped the effects of radiation. Statistics collected by the Tumour Registry of the Hiroshima City Medical Association show that the incidence of malignant growths among those within one kilometre of the point where the bomb exploded (and who survived) has been four times as great as the incidence among the unexposed section of the population of the city. Leukaemia has become more frequent in Hiroshima since 1945. Those who survived exposure to the radiation also incurred enhanced risk of other types of malignant disease. The Tumour Registry investigated 1,750 cases from May, 1957, to December, 1958. The survivors are unusual in having experienced a single whole-body exposure, the dose varying according to distance from the hypocentre point directly beneath centre of the explosion and the degree of shielding. The Tumour Registry gives these figures for malignant growths in Hiroshima, from May, 1957, to December, 1958, (leukaemia is *not* included):—

Distance from hypocentre in metres	*Surviving population*	*Cases*	*Incidence per 100,000*
500–999	973	13	1,023·1
1,000–1,499	8,688	66	479·02
1,500–1,999	15,318	89	380·1
2,000–2,499	13,915	66	283·4
Non-irradiated	202,727	447	270·1

There is a clear relation between distance from hypocentre (i.e., dose) and incidence. Those within 1,000 metres of the hypocentre had four times as much cancer as the non-exposed (1,023 per 100,000 against 270 per 100,000). Of those within 2,500 metres (more than one and a half miles) of the hypocentre only about 30,000 have survived. Total deaths within this area in 1945 were estimated at 80,000. So far the increased incidence has been noted in cancer of the stomach, lung, breast, uterus and ovary. It has been doubted whether the power of radiation to cause cancer is directly related to dose. This analysis suggests that it is. (See WHITAKER'S ALMANACK, 1946.)

IRON ORE IN MAURITANIA.—Plans for one of the greatest schemes of development in West Africa north of the equator were outlined by a fournation, predominantly French, company, in agreement with the Islamic Republic of Mauritania. The objective is to mine deposits of high-grade iron ore, of which 215 million tons are estimated to be available in an 18-mile long *massif*, which rises 2,000 ft. above and to the east of Fort Gouraud. The estimated cost is £60 m. It is planned to develop open-pit mines at F'Derek and Tazadit, to construct 400 miles of railway linking the mines with the coast at Port Étienne and to provide loading facilities for ships of up to 60,000 tons. The initial target is 4,000,000 tons a year of ore containing not less than 63 per cent. of iron and not more than 8 per cent. of silica—comparable in quality with some Swedish ores. The ore is part of a larger system which extends for hundreds of miles to the north and south. Of pre-Cambrian age, the main mass of the orebody consists of ironstone. But along the Kedia d'Idjil *massif*, where the strata are heavily contorted, there are a number of lens-shaped masses in which the concentration of iron rises to between 55 and 70 per cent. There are more than 50 such outcrops at the surface. One outcrop at F'Derek can provide an output of ore suited to open-hearth furnaces. It covers an area at the surface of 725,000 square feet. The other, at Tazadit, consists of a chemically similar, but less dense, material. This is more than three times as big. In between there are other big areas—bringing the total to about a million square yards.

ISAAC WOLFSON GRANTS.—The council of the Royal Society accepted an offer by the Isaac Wolfson Foundation to create a special fund of £200,000 for the endowment of a research professorship. The chair is to be held by a distinguished British scientist who will devote the whole of his time to research in such fields as the President and Council of the Royal Society may from time to time think appropriate. The first holder will work in the physical sciences or their borderlines with biology. This generous grant marked, with great promise for the future, the opening of the Society's tercentenary year. The Imperial College of Science and Technology, South Kensington, accepted an offer of £350,000 from the Isaac Wolfson Foundation for the building and equipment of laboratories for biochemistry and chemical microbiology, and for the support of teaching and research. A new building, to be known as the Wolfson Laboratory, is to be erected at the western end of the Royal College of Science building. The new department will also occupy some laboratories in the main Royal College of Science building which will become vacant when the physics department moves into Prince Consort Road. The Wolfson Laboratory will include equipment and facilities not usually associated with biochemistry. Fermentation units of comparatively large size and workshops for advanced mechanical and electronic equipment are to be installed. Accommodation is to be provided for research in those subjects that lie between biochemistry and chemical engineering, and for research on the biochemical production of chemicals.

KARIBA DAM IN OPERATION.—The first stage of the Kariba hydroelectric scheme was completed on May 17 when Queen Elizabeth the Queen Mother declared the dam open. Her Majesty flicked a switch and 600 feet underground the turbo-generator began to turn as the waters of the Zambesi surged past its blades. On her flight to Kariba the Queen Mother had an aerial view of the lake already extending 150 miles behind the dam which, when filled in a few years' time, will cover 2,000 square miles. The dam has already entailed moving 50,000 of Africa's most primitive tribesmen and many thousands of animals.

KELVIN'S THEORY ON AIR TIDES.—Sir Edward Appleton, Principal of Edinburgh University, has suggested that there are tides in the atmosphere just as there are tides in the sea. Such air tides were not visible to the eye, but they could be discerned as minute rhythmic variations in the height of a barometer. These variations were especially evident in the tropics, where the barometer could rise and fall smoothly twice during a span of 24 hours. It was Lord Kelvin, he said, who first sought to explain why air tides should seem to respond to the influence of the sun, and not to that of the moon. In 1882 he advanced the theory that the earth's atmosphere might have a tendency to vibrate with a period of exactly twelve hours and make the atmosphere respond more markedly to the influence of the sun than to the influence of the moon. It was now clear that the atmospheric temperature varied so as to bring about the atmospheric tuning suggested by Lord Kelvin. His explanation of this phenomenon was today the accepted theory. It was not possible to be quite sure that the solar twelve-hour oscillation was as completely gravitational as its lunar counterpart on the sea. The sun had two effects on the atmosphere—thermal and gravitational; the moon exerted only a gravitational influence. The view at the moment was that the two influences of the sun on the atmosphere were approximately of the same magnitude.

KEW GARDENS.—Important developments have been planned for the immediate future of Kew Gardens. One of them has been the appointment of Dr. Keith Jones, from the Plant Breeding Station at Aberystwyth, to the post of cytogeneticist, for the study of heredity in plants. This study will supplement the work done in the Herbarium to shed light on plant relationships that are not obvious from dried specimens, and are thus particularly useful in complicated groups—for example, the saxifrages. Dr. Jones is the first scientist appointed to the staff especially for this work—for which Kew offers unrivalled opportunities, since its vast collection has never been investigated from this point of view. Another newcomer is Mr. A. L. Jewell, from the Educational Museum, Haslemere, who will survey the museums at Kew, and make recommendations for the more attractive display of exhibits. This appointment has been made to forward the reorientation of the Kew museums which was begun with the conversion of the Orangery, built in 1761 by Sir William Chambers, back to its original purpose. The Orangery is full of a varied collection of oranges and lemons, grown in tubs which are kept inside in winter and are taken outside in summer—the traditional way of growing oranges in England. Among other projects is the building, at an eventual cost of £85,000, of a new Jodrell Laboratory, which will be concerned with the anatomy of plants, particularly in relation to their classification. The plans will include a lecture hall, which may be used for external lectures, and for meetings of scientific societies who may wish to visit Kew. In the basement of the laboratory will be installed a series of "growth chambers" in which, by control of such factors as length of "day" and "night", light, moisture, and temperature, many different types of climate will be reconstructed. Many substances are sent to Kew for laboratory examination. Recently these have

included charcoal from prehistoric burials, and commercial products, sent to discover whether or not they are what they pretend to be. Cattle cake, imported as "pure ground-nut", proved to contain much poppy-seed. "Crushed mint" was discovered to be adulterated with leaves of the Tree of Heaven, *Ailanthus*. The so-called "Lycopodium powder" turned out to be nothing but chalk stained yellow.

LAKES ARE DISAPPEARING.—In 15,000 years or so there may be no more lakes in the Lake District. This conclusion may be gathered from a booklet by Professor F. J. Monkhouse based on the one-inch Ordnance Survey. Lakes, he says, are ephemeral features of the landscape. Some of our lakes have vanished; others are smaller than they were when the glaciers melted at the end of the Ice Age, ten thousand years ago. Once there were two large lakes, one above and the other below the village of Kentmere, north of Kendal. Some of the valleys opening into the southern shores of Ullswater once held lakes, and in the hills there are many former tarns now filled with peat, such as the one at the head of Tongue Gill near Grasmere. Derwentwater and Bassenthwaite were once a single lake, the land now separating them having been washed down and deposited by the River Greta and Newlands Beck. The area of many other lakes has been reduced by stones and alluvium from the streams that flow into them, and which lie thirty to forty feet deep on the floor of Windermere. At Wastwater the deltas from two becks are making promontories into its north-eastern end, and have laid down a mile of flat land on what was once part of the lake. This flat land is covered with gravel and boulders, over which the two becks which have brought them down from the mountains are continually changing their courses after heavy floods. In 1938, after a fall of nine inches in thirty-six hours, two grass fields at the head of Wastwater were left completely covered with stones and boulders.

LIFE WITHOUT OXYGEN.—Fish which have floating nests with air bubbles beneath for the young to breathe were described by Dr. G. S. Carter, in a presidential address to the British Association. The fish are dwellers of the Paraguayan Chaco swamps in tropical South America, which lie in an extension northwards of the pampas. In the central part even the surface water hardly ever in hot weather contains a measurable quantity of oxygen, and certainly less than 5 per cent. saturation. In the outer region, under a floating blanket of aerial plants, the water is almost always without measurable oxygen. It had a high content of free carbon dioxide, and black mud of the substratum is full of marsh gas. Yet all the fauna shows adaptation to life in a de-oxygenated habitat. The air-breathing lung-fish *Lepidosiren* is there, and some smaller fish eke out a living by nibbling at a film of oxygen on the surface. In the outer regions of the swamp, in the surface film, is a small oligochaete worm (*Aulophorus*), which needs a tube, and this it makes for itself from the spores of the water ferns. It carries this tube about with it. Another oligochaete (*Drilocrius*) lives in shallow water at the edge of the swamp, and burrows in the mud. From time to time it extends from its burrow to the surface of the water, where it captures a bubble of air in a modified part of its tail and then retreats into its burrow.

Lepidosiren lays its eggs in an L-shaped burrow in the mud guarded by a male, who aerates the nest with air brought from the surface and excreted from the vascular filaments on his pelvic fins during the breeding season.

MALARIA IN THE AMAZON BASIN.—The World Health Organization is carrying out a plan for the eradication of malaria the world over. Dr. M. Pinotti, the director of the National Malaria Services, Brazil, was asked to study endemic goitre, a serious health problem on the central plateau of that country. Experience had shown that goitre can be prevented by the use of common salt to which small amounts of iodides are added. Difficulties had been encountered in eradicating malaria by means of insecticides in the vast Amazon basin, an area of 1,500,000 square miles, with a population of about 5,000,000. Some of the dwellings had no walls to spray and there was a tendency for the malaria-carrying mosquito to develop resistance to DDT. Dr. Pinotti argued that if goitre could be prevented by adding iodides to salt, malaria might be prevented by adding anti-malaria drugs to salt. The drug which he and Dr. L. Palini chose for their investigations was chloroquine. The results were gratifying, and by 1959 the use of the salt had been extended to cover the whole Amazon basin. Typical of the results obtained are those in the town of Engenheiro Dolabela. After two months' use of the chloroquine-salt mixture, not a single case of malaria occurred during the six-month period December to May, when previously there had always been a marked increase in the incidence of malaria. A World Health Organization consultant is now travelling round the world to give advice on the use of medicated salt as a means of eradicating malaria. Difficulties are sure to be encountered. In New Guinea and the Philippines certain tribes do not use commercial salt. The substitute is wood ash, sea water, or even brackish water from wells with a high mineral content. In such areas it is necessary to distribute medicated salt free of charge to induce people to use it.

METEOROLOGICAL TEMPERATURE.—The Director-General of the Meteorological Office has decided that from January 1, 1961, the celsius (centigrade) scale of temperature will be used for all work carried out within the Office. At present the Fahrenheit scale is used for surface observations, such as air temperature, dewpoint, soil and earth temperatures. The decision to employ only the celsius scale in professional work is in line with the recommendations of the World Meteorological Organization, and that will bring the meteorological Office into line with all other European services and facilitate the international exchange of meteorological information. At present there is no intention to remove the degree Fahrenheit from published forecasts.

MICROSCOPE 3D.—At the International Instruments, Electronics and Automation Exhibition there was on view a model of a 3-D microscope which gives a three-dimensional image. Unlike the stereoscopic microscope, which gives an appearance of depth by producing a different picture to each eye, the new instrument gives a solid image, or luminous model, projected into a cube of space. Designed by a team led by Mr. R. Gregory at Cambridge University Physiological Laboratory it is intended particularly for use in biological research. The instrument also promises to be of value for the examination of crystal structures, and in the nuclear field for the presentation of particle tracks, in deep emulsion films. A normal microscope has little depth of focus, and to examine a thick specimen involves focusing successively through it. This limitation is put to use in the new "3-D" instrument and a solid image is built up by vibrating the focusing mechanism so that the thin plane of focus scans the object in depth. The

magnified image is formed in the " cube of space " swept by a small vibrating screen—it is quite steady because the rate of scan is too high for the flicker to be seen.

MOHOLE BORING PROJECT.—Probing downwards through the crust of the earth was now a matter of effort and finance, rather than a scientific pipe dream, said Dr. T. F. Gaskell to the British Association. The Mohole project to bore through the earth's crust to collect samples of underlying rock, had been mainly confined to the oil and the mining industries. Five-mile deep holes had been successfully completed by the oil industry. A hole 10 miles deep drilled on a Pacific island or a coral atoll would reach the mantle—the 2,000-mile thick belt of rock-like material that encloses the liquid core of the earth. The Mohole would be difficult to drill from the Continent as the earth's crust there was more than 20 miles thick. In the deep oceans, where there would be only four miles of rock to be penetrated, there was the added problem of operating a rock drill in three miles depth of water.

NATURAL HISTORY MUSEUM.—Two new features have been added to the British Museum (Natural History) South Kensington. The first is the Rowland Ward Pavilion, the gift of the Rowland Ward Trustees, in memory of the celebrated taxidermist. This pavilion contains three groups of large African mammals. The biggest shows a family of giraffes—male, female, and their calf—with a kudu, a party of baboons, and some Egyptian geese, gathered near the Guaso Nyiro river in the district north of Mount Kenya. On a smaller scale are other groups. One is a scene in a glade of the Ituri Forest in the Belgian Congo, where an okapi (a specimen given by the Governor-General of the Belgian Congo) is seen and a bongo (an animal midway between the antelope and the cow families). The other is set in Angola; a giant sable antelope of the very local Angola race surveys the country from the top of a termite colony's nest, while a brindled gnu and a pair of impala graze close by. The other new feature—illustrating mammal morphology—is intended primarily for students, to explain the functions, and the shapes, of the parts of a mammal's body. The series begins with the skin and its various modifications such as nails, claws, hair, scales, bristles and so forth—and continues with what is inside the skin. Muscles, the parts of the skeleton, the brain, the sense organs, the digestive and circulatory systems, are dealt with in variety. There is a specially long sequence devoted to teeth.

NICKEL PRODUCTION MADE EASIER.—A Greek scientist has devised simplified methods for the exploitation of the nickel mine at Larymna, central Greece, one of only two European mines yielding this valuable metal. Professor Moussoulos, head of the research department of the Greek chemical fertilizers company which owns the Larymna plant, announced that he had invented two processes allowing for the conversion of the nickel-bearing iron ore in Larymna into alloys of high nickel content and steel. The soundness of the discovery was established by research experts from the German firm of Krupp, whose findings have been accepted by the Greek Ministry of Industry. Nearly £3,500,000 has been invested in the Larymna works by the Greek company since 1952. About £1m. went to Krupps for the supply of machinery and installations. Technical advice from this German firm made it possible to produce ferrous alloy of low nickel content (about 6 per cent). Professor Moussoulos's low temperature process allows production of alloy of which one half is pure nickel—a condition in which it can readily be exported. An even more significant discovery was that the discarded iron ore can be used in its melted state for the production of steel at low cost without having recourse to the blast furnace.

NIGERIAN DISCOVERIES.—An important archaeological discovery was made at Igbo-Ukwu in Eastern Nigeria during excavations by Mr. C. Thurstan Shaw, of Cambridge, assisted by Nigeria's first trained archaeologist, Mallam Ciroma. Two feet deep was the equipment and regalia of a priest-king, stored for safety. Mr. Shaw has stated that the finds consisted of a number of bowls, resembling calabashes, with a single handle; narrow elongated bowls resembling " pinched " calabashes; two sword scabbards; two models of shells, bigger than life size and one surmounted by a bronze leopard; three or four animal heads (ram and elephant), hollow cast; a mask of a human face 3 in. high showing face scarifications; heavy coiled open-work ornaments, probably staff heads; coiled snakes ending in a spike; and a coiled potstand. The bronzes had elaborate decoration (often showing insects, such as crickets and flies) and a high standard of craftsmanship. In style they are unlike the work of Benin or Ife. In addition, there were two clearly marked postholes which may indicate the traditional type of house in the area, in which the roof timbers are supported on the earth walls. One of the bronzes consists of a water-pot set on an openwork potstand, and the whole enclosed in a knotted rope-work pattern attached below the rim of the pot and to the base. In another part of the area was found a cylindrical bronze potstand, with wide flanges at top and bottom and openwork panels on either side; one panel portrays a male, the other a female, human figure, with markedly Negroid features. In a stretch of yellow sand, contrasting with the redness of the surrounding Benin sand, was a rich burial which, from the iron nails and clamps and traces of wood, seems to have been placed in a timber-lined chamber. The bones were in a bad state of preservation, their consistency being that of soft putty, softer than the earth in which they lay. The whole of the skull except for the facial area, with the jaw articulated in position, was recovered. Perhaps the most interesting find was the remains of a large and elaborate headdress consisting of a double circle of bronze bosses set in a wooden hoop, with a central bronze ornament.

NORFOLK BROADS ARE PEAT WORKINGS.—Scientific research into the history of the Norfolk Broads disposes of the theory that they are relics of an invasion by the sea in Romano-British times. The five scientists engaged on the work show that the Broads are not natural lakes, but the flooded diggings of the peat or turf used for fuel in the Middle Ages. Some 900 m. cubic feet of peat were excavated in 500 years to make the 2,600 acres of the Broads. The area was almost uninhabited in pre-historic times; but Guthrum, the Danish leader, settled his army, defeated by Alfred, on a treeless tract of land in Lothingland and Flegg. Digging for peat continued till the thirteenth century, when the land began to sink and the extensive turf pits were flooded. Dr. J. M. Lambert, a botanist, first put forward the theory that the Broads were flooded peat workings. Aided by Mr. J. N. Jennings, a physiographer, she made 2,000 borings in the peat and found that all the Broads have steep, man-made sides and that many ancient boundaries are still represented by strips of uncut peat. Mr. C. T. Smith, an historical geographer, found ample

evidence from ancient records that large sales of peat were made from many Broadland parishes between the twelfth and fifteenth centuries; and the case was completed by Mr. Charles Green, an archaeologist, and Mr. J. N. Hutchinson, a civil engineer, who proved that in the early Middle Ages the land was thirteen feet higher than it is today, thus explaining why the diggings were not flooded earlier. A full explanation of this scientific work is to be found in *The Making of the Broads*, by Dr. J. M. Lambert and others, published by John Murray for the Royal Geographical Society.

NYLON TANKS ON OCEAN FLOOR.—A new system of underwater storage was demonstrated in Florida to experts from oil companies. It consists of rubberized nylon tanks anchored to the bed of the ocean and remotely operated. The makers say that they can be used to store fuel, water, munitions, medical supplies, food, clothing, and machinery. Some of the advantages over existing methods of storage are that the goods are protected from atomic radiation, infection, insects, changes in temperature, weather and to some extent from enemy attack or even reconnaissance. It is claimed that the system can be used in offshore drilling and for loading super-tankers where the water is too shallow for them to approach the coast. The nylon tanks can be towed in large numbers on the surface or beneath it. They can be made in different shapes and sizes, but the standard ones can hold 10,000 American gallons (8,330 imperial gallons). When empty, the tanks can be rolled up and transported by trucks.

OCTOPUS: WHAT IT CANNOT DO.—By means of training experiments we can find out which features of things seen, touched or tasted can be distinguished by the octopus, said Mr. Martin J. Wells, Demonstrator in Zoology at Cambridge, in the Darwin lecture at the British Association. The world of the octopus is very different from ours, because its central nervous integrative machinery uses the information in more limited ways. It can catch crabs but it can never open a beerbottle. The key to the difference is that an octopus, with eight arms and 2,000 suckers, makes no use, in forming its picture of things, of internal information about the state of contraction or tension of its own muscles. Whereas a human art critic may tilt his head to get a better view of the picture, an octopus keeps its eyes level with the horizontal in whatever position it may be. This is necessary for its interpretation of what it sees. It can distinguish the texture of objects that it touches, but cannot distinguish a heavy object from a light one. In compensation for this, each of its 2,000 suckers is as sensitive to the tastes of sourness, bitterness and sweetness as is the human tongue and taste must play a large part in the life of an octopus. Unlike a human being it can distinguish the plane of vibration of light waves, although it is not known whether it makes use of this ability. Colours it probably recognizes, but it is stone deaf.

OPERATION MAGELLAN.—More than 400 years after Ferdinand Magellan sailed around the world for the first time, the United States atomic submarine *Triton*, the largest submarine ever built (7,750 tons), completed a 41,519-mile round voyage underneath the sea. The *Triton* with a crew of 150, made hydrographic, oceanographic, and magnetic surveys. The voyage, which took Magellan three years, was accomplished in 83 days, 10 hours and 15 minutes, at an average speed of 18 knots.

PACIFIC OCEAN SEVEN MILES DEEP.—The United States Navy's bathyscaphe, Trieste, carrying the Swiss scientist, M. Jacques Piccard and Lieut. Don Walsh, set a world record on Saturday, January 23, with a descent of more than seven miles to the greatest known ocean depth, the bottom of the Marianas Trench in the Pacific Ocean. The depth reached, 36,960 ft., was considerably greater than the record of 24,000 ft. set by the same craft on January 7; it was 2,800 ft. greater than had been indicated for the trench in soundings by a Soviet oceanographic ship in 1957. The bathyscaphe consists of a 58-ft. long tank, resembling a small submarine, with a ball-shaped gondola 6 ft. in diameter underneath it. It carried equipment to measure currents, temperature, the salinity of the water, depth indicators, a tape-recorder, and still and movie cameras. The gondola was packed with 40 bags of absorbent silica gel to keep the instruments dry. Through 8-in. windows made of a special glass, which under pressure becomes plastic, the scientists made their observations. To give the bathyscaphe surface buoyancy its compartments were loaded with 30,000 gallons of high octane fuel. The buoyancy was lessened gradually during the descent by admitting sea water into two of the compartments which equalized the pressure at great depths inside and outside the float. The craft carried 13 tons of iron pellets and the gradual return to the surface was made by discharging these pellets at a rate of about a ton for every 3,000 ft. of ascent. On the way down there came twilight at 600 ft., when it was impossible to tell colours apart, and at 1,000 ft. the light had gone completely. Formless plankton streamed past, giving the sensation of great speed. At 15,000 ft. the explorers lost voice contact with the underwater telephone above them, but recovered it at the bottom of the descent. At 27,000 ft. the rate of descent was checked to 2ft. per second by dumping ballast. At the bottom, a white fish a foot long, shaped like a sole, with a protuberent eye on each side, came into view. The descent was made in four hours and 42 minutes. The bathyscaphe remained at the bottom (temperature 45 deg. F.) under a pressure of nine tons per square inch, for half an hour. The journey back to the surface was made in three hours and 27 minutes. A practical reason given for investigating these deep-sea trenches is that they might provide dumping ground for radioactive waste.

The Australian Navy frigate *Diamantina* found a trench in the Indian Ocean 620 miles west of Cape Leeuwin which is 4,400 fathoms, or nearly five miles deep, the greatest depth yet found in the Indian Ocean. The trench has been named the Diamantina Deep. It descends steeply from a depth of 2,500 fathoms to 3,400 fathoms in two minutes' steaming time and then plunges to 4,400 fathoms. The Sunda Trench, south of Java, is 3,828 fathoms deep.

PEANUTS AND HAEMOPHILIACS.—By experiments on himself an American scientist, Dr. Bruce Boudreaux, of Louisiana State University, has discovered a new method of controlling the bleedings from which many haemophiliacs suffer. This treatment is simply for the patient to eat peanuts. Dr. Boudreaux lacks what is known as the "antihaemophilic factor" in his blood. As a result, he has suffered from haemorrhages after trivial injuries all his life. During bleeding from one of his knee joints during May, 1957, he ate a large handful of roasted peanuts. Without further treatment he had no more trouble. Since then he has eaten peanuts in all available forms during each haemophilic episode, and on every occasion

the clinical symptoms were relieved in one or two days. This remarkable statement was confirmed by Dr. Vernon Frampton, of the U.S.A. Department of Agriculture; he reported the case of three haemophiliacs who controlled their haemorrhages within two days by taking peanut flour.

PLANT ATLAS OF BRITAIN.—A plant atlas of Britain, the first of its kind, has been made by the Botanical Society of the British Isles. Two thousand people took part in producing the map, a five-year task financed by a grant of £10,000 from the Nuffield Foundation. Dr. F. H. Perring directed the work from Cambridge University's botanic gardens, where several million records of plant life have been made. A punched card system, sorting machines, and an automatic tabulator were used in the production of the map. Among the discoveries about plant life in the British Isles are that military orchid blooms in East Anglia: there is a new location in Devon of "Irish Lady's Tresses"; the New Zealand willow herb and the Oxford ragwort have spread in recent years. Common daisies, bulbous buttercups, chickweed, and ling are among the plants with the widest distribution.

PLANT LIFE ON MARS?—The death of Professor Gavril Tikhov, the Russian astronomer, called attention to the work being done on the constitution of Mars. Tikhov was regarded as the founder of astrobotany. He spent years in the study of this and of astrobiology. In 1947 he found that certain plants showed increased brightness in the red, and particularly the infra-red, part of the solar spectrum and used this as basis for a theory that plants emit infra-red rays and their emissions could be calculated. Through studies of plant life in the northern hemisphere and the light phenomena of vegetation on Mars, he came to the conclusion that plant life on Mars had adapted itself to the severe climatic conditions there.

PLIGHT OF WILD ANIMALS.—Several efforts, fostered in England by the British Association, have been made to draw attention to the plight of wild animals in Africa. There is plenty of evidence to indicate that within a decade all the larger animals will have disappeared from central Africa and among the early casualties will be gorillas and chimpanzees. It is stated that now there are left fewer than 500 mountain gorillas, which is now regarded as far less ferocious than formerly. During the last few years Mr. Lee Merriam Talbot, an American ecologist, has been investigating the status of several animals, nearly all Asiatic, which were threatened with extinction. The work was done on behalf of the International Union for the Conservation of Nature and Natural Resources. The result of his investigations is to show that some of our larger animals are so reduced in numbers as to make him wonder if the species can be saved from extinction. Of the great Indian elephant, only about 400 specimens survive, of which 260 are in a single Assam reserve of 166 square miles. Of the Javan rhinoceros there may be fewer than four dozen; of the Sumatran two-horned rhinoceros from 35 to 45 in Burma, which is the largest number surviving in any country within its former range from India to Borneo. The lion, which once ranged from Asia Minor to India and over most of Arabia, is restricted to 500 square miles of the Gir Forest in Kathiawar, where 300 may be found. That splendid antelope, the Arabian oryx, is in danger of speedy extinction, being hunted from motor cars and aeroplanes; the wild asses of Syria and the Arabian ostrich have gone. The worst enemy of the rhinoceros is the superstitious belief in the medical, magical, or aphrodisiac qualities of every part of its body and especially its horn; but the Burmese thamin, a kind of deer, almost exterminated in the Second World War, owes its partial recovery to a belief that to eat its flesh causes leprosy or even venereal disease. This is stated to be an exception.

PRIMITIVE MAN LIVED IN THE SEA.—Sir Alister Hardy, F.R.S., put forward a new theory that man at one period of his evolution went through a sub-aqueous stage, that he may once have lived in the sea. In expounding his new theory Sir Alister, whose scientific career has been closely connected with the sea, said he believed that a stock of primitive, ape-like animals were forced to seek their food by the sea-shore. At first they waded and groped for food, but in time ventured into deeper water and learned to swim. Probably about a million years ago the race learned to use its hands, to walk erect, and to use tools. Their hands were lengthened by having to feel along the sea-bed for food, and as they waded into deeper water they learned to stand upright. The question of how man stood erect has never been answered. Apes, with their slouching gait, had never managed to achieve it. On the beaches the race hit shellfish with stones and discovered how to make stones into tools. An evolutionary period by the sea would explain why modern man was nearly hairless, like many aquatic animals. Perhaps he retained the hair on his head to protect it from the tropical sun as he swam in the water. Sir Alister's theory would explain why men could swim so well and for so long. "Why do we love to go to the seaside?" he asked. "Isn't it because we are aquatic animals at heart and always have been?" When aquatic man returned to the land he achieved his dominant position in the animal world. With food supplies getting shorter, as the population increased, man would be forced to go back to the sea to farm the sea-bed. Frogmen, going down in teams like miners on a shift, would drive submarine tractors dragging huge tools over the sea-bed to round up the fish.

RADIOGEOLOGY: A SCIENCE.—If a man and his wife move from Edinburgh to Aberdeen, they will expose themselves to nearly twice as much radioactivity as that which they have been experiencing. If they leave Aberdeen, let them avoid certain coastal towns of Kerala, in South-east India, for the inhabitants of that district endure an annual radiation more than forty times higher than that absorbed by citizens of Dundee. These reflections are suggested by an address on radiogeology by Professor C. F. Davidson, at the Inter-University Geological Congress at Liverpool. Radiogeology or nuclear geology, he says, has become a science in its own right, with no less influence on human affairs than nuclear physics, radiochemistry, and radiobiology. Owing to the search for the raw materials of atomic energy more effort and more wealth have been poured into this field of geological study than into any other. The crust of the earth is extensively and sometimes quite intensively radio-active. Although we may smile about scares, gout, and goitre, there can be no doubt on the extent of radiation risks, but so far there has been no conclusive demonstration that these high dosages of natural radiation have any pathological effect on the health of dwellers in Kerala. Radiogeological studies, he said, also provide surprising information about the age of our planet and some of its rocks. By means of an ingenious dating technique, based upon the constant and immutable

rates of decay of certain radioactive elements, it has been established that Middle Cretaceous rocks are about 100 million years old; those of the Upper Carboniferous were laid down 300 million years ago; 600 million years is about the age of the Lower Cambrian; and some of the so-called Proterozoic rocks, notably those of the Witwatersrand system in South Africa, have been in existence for at least 2,000 million years. But the more astonishing discovery concerning these ancient rocks is not simply their vast age; it is the fact that they were formed by the same natural processes as those which operate to-day. Difficult though it is to imagine even non-living contemporary mechanisms at work 2,000 million years ago, it is even harder to believe that for something like half that period the delicate processes of living organisms have also been possible. Until now it has been thought that before 800 million years ago life could not develop because there was not enough oxygen in the atmosphere. Radiogeological evidence contradicts this theory. Unmistakable traces left by living organisms can be discerned in rocks as old as 850 or even 1,245 million years.

RHEUMATISM COSTS 27,000,000 DAYS.—The Empire Rheumatism Council undertook to finance a survey of the incidence of rheumatic conditions in the working population. Every year 27,000,000 working days are lost through the complaint. The survey will be conducted by Dr. J. J. R. Duthie, Edinburgh University, and Director of the Edinburgh Rheumatic Unit, who will study the industries in which there is a high incidence of rheumatic complaints. Official returns in various occupations have disclosed that in engineering, shipbuilding, metal and electrical trades the annual loss of working time was 160,000 days, involving the loss of £265,500 in wages. Aggravation of many forms of rheumatism may be related to occupation factors, and the survey will first seek to obtain a more accurate picture of the incidence of rheumatic complaints in specific industries. Then they will estimate the financial implications, and investigate working conditions in aggravating the complaints.

ROADS MADE SAFER BY HEATING.—Mr. W. I. J. Price, of the Road Research Laboratory, showed the British Association how garage ramps and highways can be freed from snow and ice. He sprayed a model with water to bring into action a wetness detector—part of the equipment which automatically switches on heaters in road surfaces. Several such systems have been laid at Slough, Edinburgh, and Kingston-upon-Thames. They cost £2 a square yard if the cost of electricity at the site is included. Running them costs each year between 2*s.* and 2*s.* 6*d.* a square yard in England and Wales or three times the price of the cost to grit well. Even with the best gritting surface accidents were caused by the sudden occurrence of ice before a remedy could be applied. Much relief was possible by heating short sections as at roundabouts, traffic lights, on ramps, steep hills, bridges, underpasses and flyovers.

ROMAN-SAXON LINK AT CANTURBURY.—Recent excavations at Canterbury, under the supervision of Mr. Sheppard S. Frere of the Institute of Archaeology, London University, provide evidence of continuous habitation from the Romans to the Saxon period. Three weeks' digging in the Simon Langton School yard, uncovered parts of a Roman house and parts of two fifth century Saxon huts. These finds were considered so important that the digging was carried on by Miss M. A. Wilson, to amplify the discoveries and complete the plan. In all, six huts were found, which, with one exception, were destroyed by fire. The pottery was partly Anglo-Frisian and partly the coarser, normal Saxon ware with grass-backing; and one sherd carried a pattern of roughly stamped semi-circles not previously discovered in Canterbury. The pottery dates the huts to the fifth century A.D. and to the very early years of Saxon settlement and the huts seem to be in a definite relationship to the nearby Roman street. This throws new light upon conditions in the dark ages and evidence for the continuity of life in Canterbury from the Roman to the historical Saxon period. The huts are reported to be rare and valuable additions to our knowledge of early Saxon domestic architecture (*see* WHITAKER'S ALMANACK, 1958).

ROYAL SOCIETY TERCENTENARY.—Within a few months of his restoration in 1660 King Charles II encouraged a small group of philosophers to form a society to enquire into natural phenomena. The society became the Royal Society of London for Improving Natural Knowledge, which, has been one of the principal means of creating the modern scientific age. Its roll of Fellows contains the names of Isaac Newton, Christopher Wren, Michael Faraday, Charles Darwin, and many others who have contributed significantly to a fuller understanding of nature. The tercentenary of the Royal Society was celebrated in July last. The Queen, herself a Fellow of the Society, opened the celebrations in the Royal Albert Hall, in the presence of about 400 guests, representing scientific societies and universities in Britain, and 250 from similar organizations in 47 other countries, including China and the Soviet Union. In her opening address the Queen said that the Royal Society had more than fulfilled the hopes of its founder King Charles II. The names of Newton and Darwin in pure science, and of Watt, Kelvin and Charles Parsons in engineering science are evidence of the society's success. Their contributions shine like beacons for all men to see, but let us not forget the many hundreds of Fellows whose devoted work has been indispensable to the general advance of knowledge. One change in the Society had given her special pleasure and that was the admission of women to the Fellowship. The President of the Society, Sir Cyril Hinshelwood, in his address, said that the task for men of science was to go ahead undeterred by any of the uncertainties which clouded the future. Faith in science was not incompatible with or exclusive of any other kind of faith. The celebration centred round an exhibition of outstanding achievements in British science in the last ten years, and lectures by ten British Fellows—Genetics and the structure of biology, Professor C. D. Darlington; evolution of nuclear power plant design, Sir Christopher Hinton; problems of transplantation of tissues, Professor P. B. Medawar; physics and chemisty of nervous conduction, Professor A. L. Hodgkin; nuclear interactions at very great energies, Professor C. F. Powell; new horizons in organic chemistry, Sir Alexander Todd; molecules in crystals, Dr. Dorothy Hodgkin; investigation of the universe by radio astronomy, Professor A. C. B. Lovell; metamorphosis of insects, Professor V. B. Wigglesworth; aeronautical science and engineering, Sir Arnold Hall.

RUSSIANS DISCOVER NEW PLANET.—The discovery of a new planet, beyond the orbit of Pluto, was announced by Russian astronomers. It has long been suspected that the solar system has a much wider extent than was supposed; one of the reasons

being that the orbits of comets reach out to far greater distances than those of the known planets. The great difficulty of detecting these outer planets, such as Pluto, lies in their faintness and in the fact that they show no discs, and are quite indistinguishable from stars in appearance. It is only their motion that can lead to their recognition as planets, and photography is the only practicable method of search. The case of the minor planets, of which over 2,000 have been detected, is simple. They lie mostly between the orbits of Mars and Jupiter, fairly close to the earth; so that their real and apparent motions are relatively rapid. Hence they appear as trails on photographs of quite short exposure. But the motions of planets beyond Neptune are so slow that no trailing of the image is apparent, and the change of position can be detected only by the comparison of two photographs, taken at least a few days apart. The two photographs are compared in a blink microscope, and while the field of stars remains stationary any moving object appears to jump backwards and forwards equal to its motion in the sky between the dates of the two exposures.

SAXON TAMWORTH: NEW LIGHT.—The year 1960 was the anniversary of the charter granted to Tamworth by Queen Elizabeth I, and also the 1000th anniversary of the death of the town's patron saint, Editha. To mark the double occasion the Corporation decided on archæological excavations of a small portion of Saxon Tamworth, the "capital" of the great Midland Kingdom of Mercia. Work in the castle grounds, once the bailey of the castle, did not reveal any trace of the palace which King Offa was supposed to have had there, but part of the defensive bank and ditch which protected Tamworth against the Danes in Anglo-Saxon times was revealed. It had been supposed that they were part of Offa's dyke, but now there is reason to believe that this fortified boundary was thrown up in 913 by Æthelflæd, Lady of the Mercians. The most interesting single find during the excavation was a single cut half-penny of the period 973–979. It was minted at Torksey during the reign of either Edgar or Edward the Martyr, and the moneyer's name was probably Thorketel. It is the third coin known with certainty to have been minted at Torksey. It was first seen by Miss Celia Ann Fudge, a volunteer assistant in the paving of a road which ran along the inner side of the bank and ditch, and it tends to confirm the view that this defensive structure was built by Æthelflæd in 913.

SEASHELLS SORTED BY THE WAVES.—The chance observation that the sea sorts sea shells into right and left-hand varieties won for Dr. J. Lever, Professor of Biology at the Free (Calvinist) University of Amsterdam, the first award of the Royal Dutch/Shell prize worth £1,000. While on holiday on the island of Texel Dr. Lever collected several thousand shells-with-a-hole—the holes being drilled in one of the valves by marine snails of the Natica species to enable them to eat the mollusc inside—and found that there were many more right-hand valves with a hole in than left-hand valves. Elsewhere on the Dutch coast he found that left-hand and right-hand valves, drilled or otherwise, were washed up in different proportions at different places. After various experiments he found that in a given current the right-hand valves reveal a deviation to the left, and the left-hand valves a deviation to the right. In each experiment the slope of the inclines and local differences in level were of great importance. The significance of the discovery is that it will assist geologists in determining the direction of currents when prehistoric seas laid down sedimentary formations.

SILVER: NEW ATOMIC WEIGHT.—A new value of the atomic weight of silver—a key element in determining atomic weights of other elements—has been obtained by the National Bureau of Standards, and the Atomic Energy Commission. The new value results directly from more accurate determination of the absolute isotopic abundance ratio of silver using the techniques of mass spectrometry. The new atomic weight is 107·8731 plus or minus 0·0028 on the chemical scale, and 107·9028 plus or minus 0·0011 on the physical scale. The work on the atomic weight was part of a programme, the purpose of which is to obtain more accurate values of fundamental constants in order to meet the demands of science and industry for more precise measurements. Natural silver consists of two isotopes of approximately equal abundance: Ag^{107} and Ag^{109}. Although the mass of each isotope is known in relative atomic units, until recently the isotopic abundance ratio has not been measured accurately—that is, by using synthetic mixtures of silver isotopes as calibration samples. While the discovery could lead to changes in the atomic weights listed in the textbooks it is said to have little effect on the practical applications of physics or chemistry.

SMOKING A STIMULUS TO THOUGHT.—A new theory of the way in which nicotine may act as a stimulus to thinking was put forward by Professor J. H. Burn, F.R.S., Emeritus Professor of Pharmacology in the University of Oxford, at the British Association. Research began with the discovery that smoking a cigarette reduces the flow of blood through the hand for half an hour, and that the temperature of the skin is reduced. Nicotine caused a release of a substance, noradrenaline, which stimulates the transmission of impulses in that part of the nervous system called into action by danger—as when a cat sees a dog. Dr. Marthe Vogt, at Oxford found that most noradrenaline in the brain was in the hypothalamus—an area necessary for consciousness—and showed that here, too, nicotine released noradrenaline from store. There were many reasons, Professor Burn said, for smoking cigarettes, but a stimulating effect on thought, especially when alone, and even more when short of sleep, was what would be expected if nicotine was acting in the hypothalamus and other areas of the brain.

SOLAR ENERGY HAS MANY USES.—Solar energy is being put to more uses than ever before. Hopes of a new chemical industry based on reactions caused by the ultraviolet radiation of sunlight are raised by experiments at a solar energy laboratory at Algiers, by means of a shearable aluminium mirror, a paraboloid 27 ft. in diameter mounted in the same way as a telescope, which can be made to follow the sun. One of the products which can be made in this way is nitric acid. The raw materials are nitrogen and oxygen from the air, and water; and from this combination nitrate fertilizers can be made. Another possible product is the insecticide benzene hexachloride, formed from chlorine and benzene. Nitrogen oxides—the first step to nitric acid—are best made at temperatures above 5,000 deg. F., but in making benzene hexachloride the temperature must be little more than the boiling point of water, and the central reaction chamber is protected by a layer of water, in which most of the sun's heat rays are filtered out. Solar energy is used to cool a building at Reggan, the French atomic testing site, 150 miles south of Timimoun in the northern Sahara. Here solar heat is

used for refrigeration and the noon rise of temperature in the hottest season has been kept down to 95 deg. F., but an improvement on the temperature of 120 deg. F. which would otherwise have been reached. The suggestion has been made that solar factories should be set up in the Atlas Mountains or in the northern fringe of the Sahara.

SPEEDBOAT WITH NO PROPELLER.—A new type of high-speed motor boat which has neither propeller nor rudder was demonstrated at South Cerney, Gloucestershire by Mr. Donald Campbell. This highly manoeuvrable craft, capable of a maximum speed of 35 m.p.h. is jet propelled. A two-stage jet unit draws water into a turbine through a steel grid fixed flush with the bottom of the boat and ejects it at force through the transom. The boat is forced through the water by the reaction from this jet and is steered by the deflection of the jet by two steering vanes. This new type of propulsion, is claimed to be 10 per cent. more efficient than that of a comparable propeller-driven boat. An outstanding feature of this 14½ ft. glass fibre speedboat is its safety for swimmers, divers and water skiers. Mr. Campbell stated that the ordinary marine screw was nothing but a rotating knife. If a person in the water were to be accidentally run over by this new craft, it was unlikely that any harm would be done. This hitherto unknown degree of safety is possible by the absence of exposed moving parts on the turbocraft and the absence of any protuberance beneath the hull. The boat has a draught of nine inches, but can be safely driven in as little as four inches of water.

STONEHENGE BURIAL FINDS.—Excavations have been conducted near Stonehenge by Miss E. V. W. Field for the Ministry of Works. The skeletons of seven children and three adults, and a cremation, about 3,800 years old were discovered in a small round barrow. One remarkable find in this 9 in. high barrow was the skeleton of a child buried with an earring made from the tusk of a wild boar, a ring on the left hand, and a beaker. Of particular interest was a deep grave beside the grave of the child with the earring. It was covered with a cairn of flints and below this and in the grave were fragments of a beaker. Two other fragments had been placed below a whetstone behind the head of the skeleton of a young man or woman. The grave had four wooden posts at the corners and probably a wooden lid, as traces of decayed wood were found. The barrow was constructed originally with a large central grave and an irregular sorrounding ditch. The central grave contained two adult skeletons and a cremation. The inner ditch of the barrow, 40 ft. in diameter, contained four burials, all of children, and three of these were accompanied by beakers. Between the central grave and the inner ditch was a burial of a baby with a small urn. One grave was cut partly in chalk and partly in the filling of the outer ditch, and it contained a child's skeleton and beaker, both badly disturbed by rabbits. As all the pottery except the urn, was of the beaker type, it is thought that the burials were made about 1900 B.C. A second barrow, thought to be a pond barrow, is an enigma. Instead of a hollow scooped out of the chalk as expected, a deep shaft appeared and this unique ancient monument, 20 ft. in diameter at the top, was taken down to about 18 ft., at which level the hole had narrowed to 6 ft. in diameter.

SUN-POWERED ELECTRIC CAR.—A sun-powered brougham was driven round in London, as an example of the possibilities of solar energy. The car, a 1912 Baker electric brougham had been adapted by the International Rectifier Corporation, of El Segundo, California, to utilize solar energy by means of 10,000 silicon solar cells in a 26 sq. ft. panel on the roof. The sunlight energizes electrons in the cells, which are wired together in a circuit, to charge the batteries powering the vehicle. Dr. Charles Escoffery, technical adviser to the corporation, explained that such cars were not commercially practicable, but the vehicle employed the same type of solar cells used to power transmitting equipment in space satellites. The cells are similar in function to those used to open automatic doors and in camera exposure meters, except that they are made of silicon instead of selenium. Among the uses to which solar cells are being put are salt water conversion, transistor radio sets, lighthouse beacons (as supplementary battery chargers) and road warning lamps, telephones, and remote radio links such as forest stations. Every day, Dr. Escoffery said, as much energy falls on the earth from the sun as has been used in the whole history of our civilization. Ultimately the earth's natural resources for producing energy will be exhausted. Atomic energy will be used for large-scale supplies, but solar energy will be invaluable as well.

TIDES TO BE RECORDED.—The hydrographic department of the Navy has begun a 25-year survey of the tidal conditions of the waters around the British Isles. In the past it has only been at large ports that accurate records of tidal conditions have been maintained. For other parts of the coast, except in isolated instances, tide tables have been compiled from scanty observations. The errors arising from such methods have been small, but in more recent times there has grown a need for more accurate data. A section of the coast will be selected each year for the survey. The first to be undertaken was between Portsmouth and Eastbourne. Nine stations, each about five miles apart, were established and mechanical gauges, measuring time and water heights simultaneously, were installed for a month and checked periodically by surveying recorders.

WORLD'S CHANGING CLIMATE.—In a discourse on the world's changing climate, Mr. H. H. Lamb, of the research department of the Meteorological Office, said that since Victorian times there had been a general improvement of climate which had affected limits of forests in northern lands, shifted the fishing grounds and extended shipping seasons in the Arctic seas. The period about 1800 was one of the culminating phases of what had been called the Little Ice Age, when the northern and alpine glaciers, and probably the Arctic sea ice, reached their most advanced positions since the end of the last great Ice Age 10,000 years ago. Within the last 1000 years two important climatic changes must be stressed: a period of climate warmer than now between A.D. 1000 and 1250, and then the little Ice Age, roughly from 1550 to 1850. The decline between these two extremes affected the migration of the herring from Norway and the Baltic to our own shores. Climatic variation is always going on, but it is doubtful whether the trend is still in the direction of greater warmth, and any accurate forecast for the remainder of the century is impossible until we have fuller knowledge of the terrestrial and solar influences affecting world temperature and the circulation of the atmosphere. Observations by sputniks are expected to amend our ideas of the total strength of the sun's radiation before it encounters the earth's atmosphere and of how it varies at times of sunspots and solar flares. Schemes for modifying the climate by melting or shattering the Arctic ice or

by the creation of vast lakes in continental interior regions, might become feasible within a generation or so. The aims are alluring enough: opening up the Arctic lands and sea routes and raising total food production to feed the world's rapidly rising population.

WORLD POPULATION AND ITS FOOD.—Can the food supply keep up with the increased population of the world was the question discussed during a whole day by the British Association. Speakers had little doubt on four points: that the technical knowledge needed to forestall a world food shortage during the next 20 years already existed; that the problems were political, economic and social; that help was being given through the Food and Agriculture Organization; but that, in a phrase used by Professor Blackett, in winding up, "the social drive must come from the countries themselves". Sir George Thompson, the President, said that in the long run the answer to the problem was the voluntary restriction of births to match the falling death rate. The yearly increase of the world's population was roughly equal to the population of Britain. Limits of food production by present methods had not been reached. Dr. N. C. Wright, deputy Director-General of the Food and Agriculture Organization said that world production of cereals would need to be increased by not less than one-third by 1980 and that of animal products doubled. The yield of rice in the Far East was now less than half of that in Italy and Spain, and the combined output of meat and milk by cattle in Africa and India produced only one-eighth or one-tenth as much as cattle in Western Europe. Half the population of the world to-day was either under-nourished or malnourished. He rejected the idea that the world could rely on food surpluses or vegetarianism to keep all its peoples in food. The only effective solution was to secure the necessary increase in the less developed countries; and this might be done by the application of scientific and technical knowledge. Contrary to widely held belief, world food production was increasing faster than world population, but production increases were not uniform in all regions. While international trade in food had slightly improved, supplies to less developed countries in the last 20 years had been almost negligible in relation to needs. In countries which had known undernutrition varying from wartime food shortages to semi-starvation people had shown irritability, depression, apathy and lack of creative thought. Those characteristics had been observed along with loss of weight and lethargy. In extreme instances such symptoms led to a loss of moral standards and social ties. Sir Alexander Fleck, F.R.S., a past president of the Association, said that agricultural technology offered practical measures that could be undertaken in the next ten years. Just as most people were starved of food so most crops were starved of those essential elements—nitrogen, phosphorus and potassium. Though world production of fertilizer nitrogen was now running at some 10 million tons a year the fixation of nitrogen ranked as one of the most underexploited discoveries of all time, having regard to its potentialities for promoting human wellbeing. An extra seven million tons in the Far East—present consumption there is less than two million tons a year—would achieve a vast improvement in social conditions, as well as greatly increased food. Estimates of the nitrogen needed to maintain food supplies for the world population at the end of the century ranged from 30 million tons to 60 million tons a year. The call for more fertilizer and more water was much more urgent than that for labour-saving equipment. Though the technical resources of the world would be equal to flooding Africa and Asia with tractors and enormously increasing the man output it would be of much more use to manufacture a simple bullock-drawn plough digging a deeper furrow than those in use, or to replace the clumsy appliances now worked by hand with simple implements of sound design, light yet durable. Prof. D. V. Glass, of London University, said that they could not count too heavily on a contribution from birth control during the present century. United Nations indicated that world population would increase from 2,500 million to more than 6,000 million by the year 2000. Growth would be proportionately greatest in regions of low current levels of living—over two and a half times in Africa; nearly three times in Asia; and over three and a half times in Latin America. For the rest of the world, population would increase to about 1·7 times the present level. Professor W. A. Lewis, President of the University College of the West Indies, said that in nearly every underdeveloped country the post of Minister of Agriculture had been filled by a political nobody. The United States could and should make grants and loans to the poorer countries of the world for the next 25 years. Aid should take the form of shipments of food, but this could not be a permanent solution. When aid ceased, Asia would only be able to buy food if the United States accepted Asian exports.

WORLD TIME LAG OF 31 SECONDS.—Soviet astronomers who held the opinion that the world has been running behind time since the beginning of the century have now corrected the inaccuracy of 31 seconds. Such inaccuracy, said Mr. Kheino Potter, of the Pulkovo Observatory, resulted from unevenness in the rotation of the earth, which could be studied by observing the orbital movement of the moon. Using a lunar camera, with which the position of the moon could be photographically established, the staff of the Ephemerid time service obtained 300 plates showing the moon and the surrounding stars. Nearly 100 of the photographs were measured, and the astronomers said that 31 seconds should be added to the world time.

X-RAYS OF THE SUN.—Dr. Herbert Friedman, Superintendent of the United States Naval Research Laboratory, announced that the Laboratory had taken the first photograph of the X-ray emitting areas of the sun. These X-rays do not penetrate the atmosphere below an altitude of 60 miles. Since X-rays cannot be focussed by lenses or mirrors, a simple camera with a pinhole only five thousandth of an inch in diameter was used. To keep the visible and ultra-violet light from the sun out of the camera the pin-hole was covered by a thin aluminium-coated plastic film that let only the X-rays through. The camera was sent up 130 miles by rocket and allowed a three-minute time exposure. The image on the negative, one-twentieth of an inch, revealed enough to upset the common opinion that the X-rays coming from the sun are produced uniformly in the corona, with local hot-spots making only a small contribution. The photograph showed clearly that virtually all the X-rays came from the local hot-spots. The average temperature of the corona is about one million degrees, but local hot-spots may reach ten million degrees. At these temperatures, the electrons in the corona race about at such high speeds that their collisions with the heavy nuclei produce X-radiation.

WEATHER IN THE UNITED KINGDOM, 1959–1960

(1959) August.—Remarkably fine weather, a feature of the previous three months, continued over most of the British Isles during August, although there were local outbreaks of thundery rain. August ranked as the warmest month of the year, whereas usually this is July. The first three days were rather cool and showery with north-westerly winds. Anticyclonic weather then prevailed with some rain and drizzle in the north, but by the 8th fine weather extended to the whole of the British Isles and maximum temperatures exceeded 80° F. in many places in the south. While anticyclonic conditions prevailed in the north, shallow depressions drifted slowly from France and thunderstorms developed. Stations in Cornwall and Somerset reported more than 4 in. of rain for the 10th. At Newquay over 2½ in. fell in 75 min. and another 2¼ in. fell there on the 11th in thundery rain. More general rain occurred in southern England on the 12th, associated with a small depression moving along the English Channel. A deep depression brought gales and widespread rain to north-western districts on the 13th to 14th, when minimum temperatures fell to 37° F. in Londonderry. The remainder of the month was dominated by anticyclones, with mainly fine weather, although thunderstorms again developed locally in England and Wales during the 20th–21st. On the 20th screen temperatures reached 88° F. at Bromley (Kent), Finningley (Nottingham) and York, while 83° F. was recorded in southern Scotland on the 20th and 21st. At Victoria Park (London) 2·38 in. occurred on the 21st and later rainfall was heavy in parts of Kent and Surrey. By the 23rd weather was fine and warm in central and eastern districts, but cloudy with rain and drizzle in Scotland and northern England. From the 26th fine but cooler weather prevailed with light northerly winds and scattered showers. The total rainfall for the month was below the average, except in localities where there were severe thunderstorms. There was less than 10 per cent. of average in parts of the northern half of England. Over the country generally the Augusts of 1955 and 1947 were drier and warmer. In many areas it was the sunniest August since that of 1947, but the month was mainly dull in the north-west. Over England and Wales there have been only four warmer Augusts this century, those of 1955, 1947, 1933 and 1911.

September.—The weather was sunny, warm and unusually dry. In the Midlands and East Anglia a few stations reported no measurable rain for 48 days, from August 14 until the end of September, while at Lowestoft (Suffolk) and Finningley (Nottinghamshire) the period without measurable rain lasted 57 days until October 10. The longest drought on record in the British Isles occurred in the spring of 1893 at places in the south-east of England and lasted for 60 days. As in the preceding four months anticyclonic conditions predominated during September. Each of the first 9 days brought more than 10 hours of bright sunshine to many places and temperatures rose steadily, exceeding 80° F. somewhere in the country each day from the 6th to 12th. Temperatures rose to 84° F. at stations in the Midlands and south-west England. Subsequently light north-easterly winds brought cooler weather, with some scattered showers in eastern districts, but temperatures reached 70° F. locally. Rain occurred in western Scotland, Northern Ireland and north-west England on the 20th, more generally on the 21st although amounts were small in the south, and locally from the 23rd to 25th. Subsequently many places received more than 10 hours sunshine a day, and the last few days were generally fine, warm and dry with mainly southerly winds. The total rainfall was less than the monthly average everywhere in the United Kingdom and less than 5 per cent. over most of southern, eastern and central England. The month was easily the driest September over England and Wales since 1870 and probably since 1754; over Scotland since 1894, although 1933 was about as dry; over Northern Ireland since 1941. The mean temperature was above the average for the eighth consecutive month and generally more than 2° F. above the 1921–50 average, giving the warmest September since that of 1949. The excess temperatures were contributed more by high day than high night temperatures. Over England and Wales the month ranked as the sunniest September since that of 1911; over Scotland since 1933 and over Northern Ireland since 1949. At Eastbourne, with a daily mean of 8·9 hours, it was the sunniest September since 1895; while Plymouth, with a daily mean of 9·2 hours, recorded nearly 2 hours more than the average there for June. The winds were generally light, but gale force wind was recorded in the extreme north of Scotland towards the end of the month.

October.—During the first week the weather continued warm, sunny and mainly dry, but subsequently became changeable with widespread rain and gales. Maximum temperatures reached 83° F. at Mildenhall (Suffolk), Rugby and Faversham (Kent), the highest temperature recorded in October in Britain since 1921. The break in the dry weather occurred on the 6th in south-west England and South Wales, when falls of rain exceeding 1 inch were recorded, and a few days later in other parts of England. Anticyclonic weather returned during 13th–16th, with afternoon temperatures reaching 70° F. locally, but with fog at night which became widespread and dense in places on the 14th and persisted all day in parts of south-east England and the Midlands, and also in south Yorkshire throughout the 15th. During the night of 17th–18th a vigorous depression brought severe gales to southern England with widespread rain. At Kendal 3 in. of rain fell during the 17th–19th, more than was recorded there during the whole of August and September. Unsettled weather, with fair periods and frequent showers, persisted from 19th to 24th. The first snow of the autumn fell in the Scottish Highlands on the 20th, while in the last week snow spread south to the mountains of South Wales. An intense depression moved across northern Scotland on the night of 26th–27th, accompanied by heavy and widespread rain, and gales reaching 83 knots at Rannoch and Tiree in Scotland, 79 knots also being recorded at Dover. Changeable weather with some sunny periods but occasional showers persisted during the remainder of the month. On the 29th the screen temperature fell to 23° F. at Moor House (Westmorland). The total rainfall was less than 75 per cent. of the 1916–50 average over the upper Thames Valley, over much of East Anglia and around the Wash, but more than 150 per cent. in eastern Cornwall and parts of Northern Ireland. The mean temperature was generally more than 4° F. above the average, giving the warmest October over England and Wales since that of 1921, and over Scotland since 1908. Over England and Wales October recorded as much sunshine as the average for September during the period 1921–50. It was the sunniest October since before 1906 over England and Wales, and since 1939 over Scotland. Winds were mainly

between south and south-east during the first half of the month, mainly south-west and west from 17th–26th and mainly north and north-west until the end of the month.

November.—During the month a number of depressions passed across or to the north of the country. There were a few rather cold foggy spells but on the whole wet, mild weather prevailed. Following two mild days (with a maximum of 65° F. at Usk, Monmouthshire) cold northerly winds brought a marked fall of temperature with showers to most districts. By the 5th winds became light, evening fog widespread, and dense locally during the next two nights, persisting all day in industrial areas. A vigorous depression brought strong winds to most districts on the 8th and 9th, with heavy rain in places. By the 10th showery weather developed with local hail and thunder, and some snow in the north. Frost and fog were widespread on the evening of the 11th with screen temperatures falling to 19° F. at Gatwick, Birmingham and Aberdeen. Fog persisted in parts of eastern England on the 12th with temperatures below freezing all day. At Alwen Reservoir (Denbigh) the temperature fell to 14° F. A vigorous depression cleared the fog, bringing strong winds and heavy rain on the 14th and 15th, especially in Pembrokeshire. On the 16th fog returned to much of England, becoming thicker and more persistent next day. A depression moving northward from the Bay of Biscay brought heavy rain to southern England on the 18th. Snow fell in parts of Scotland and the high winds caused drifting, which blocked many roads. Southerly winds until the 24th brought dull, mild weather with temperatures between 50° F. and 60° F. over most of the country. The 25th and 26th were generally wet, especially in South Wales and Devon. Fog with quiet weather returned to many eastern districts on the 27th. The remainder of the month was mainly cloudy with periods of rain, thundery in places. The total rainfall exceeded twice the average in parts of Devon, South Wales and Northumberland, but large areas recorded less than the average, e.g. in the Thames Valley, East Anglia, the Midlands, Northern Ireland and north-west Scotland. Over the United Kingdom generally it was the wettest November since 1954. Mean temperatures exceeded the average, but the recent Novembers of 1955, 1953 and 1951 were all milder over the country as a whole. Apart from Northern Ireland sunshine totals were usually below the average. Gales occurred on 17 days of the month and were widespread on the 13th and 19th.

December.—Mainly cyclonic weather, which prevailed during the last three weeks of November, continued throughout December, which was mild, wet and stormy. Fog over much of England on the 1st was dispersed ahead of a fast-moving depression, but returned to the Forth–Clyde Valley on the 3rd, persisting for about 36 hours. At first winds over the British Isles, although light, were mainly westerly. On the and air temperatures fell below 25° F. locally in southern England, and to 22° F. at Alwen Reservoir (Denbigh). From the 6th to 11th easterly winds predominated, with heavy rain and gales in many parts of the south of England and Wales and snow on high ground in the north. During the night 12th–13th frost and fog occurred over much of central and southern England. With the approach of an intense depression weather became milder with widespread rain and gales, but by the 15th fog re-formed.

For the remainder of the month deep depressions moved towards Scotland, the associated fronts bringing frequent rains to most districts. The highest screen temperature of the month was recorded at Shaftesbury (Dorset) on the 20th. Rainfall was heavy in southern England and the Lake District during the Christmas period and in Scotland later in the month. At Ross-on-Wye the total rainfall exceeded that of any other December in a hundred years of records, except for that of 1929. The total rainfall exceeded the average everywhere apart from parts of northern Scotland and Northern Ireland, and more than twice the average was recorded over much of southern England, the central Pennines and around the Tay estuary. Over England and Wales it was the wettest December since 1934 and the wettest month of any name since November, 1954. Over Scotland the Decembers of both 1955 and 1954 were wetter. The mean temperature for December exceeded the average by 1–2° F. in the north and by about 3° F. in the south. This was the eleventh consecutive month with mean temperature above average. Over England and Wales it was the mildest December since 1954, and over Scotland since 1956. The total sunshine was in most districts appreciably below average, but duller Decembers have occurred in recent years. Thunder was heard somewhere in England and Wales on 16 days and in Scotland on 7 days; it was widespread on the 26th.

Year 1959.—The main features of the weather of 1959 were the long and brilliant summer, the cold January, dry February and the wet, stormy December. Over England and Wales there have been 10 drier years this century, the most recent being 1955; over Scotland 1955 and many earlier years were drier than 1959. In the present century over England and Wales as a whole only 1949 and 1921 were warmer than 1959, while over Scotland 1959 ranks as the warmest year. Worthing recorded the warmest year in the series of records there since 1852. The sunshine statistics since 1906 show 1959 as the sunniest year over England and Wales, but over Scotland six years were sunnier, including 1955. At Kew (London) 1959 was the sunniest year since records began in 1881. The weather of the brilliant summer of 1959 was comparable with that experienced in the earlier outstanding summers, including those of 1949, 1947, 1933, 1921 and 1911. For the period May to September over England and Wales 1959 ranks easily as the driest; 1947 and 1911 were warmer and 1949 equally warm; and only 1911 was sunnier. General monthly values of rainfall, temperature and sunshine are given, both for England and Wales, and also Scotland, in the accompanying table.

(1960) January.—The weather was variable, with some sunny and mild days but with cold winds and snow during the middle of the month. Over England and Wales wet and mainly dull weather predominated. After a period of south-westerly winds, an anticyclone developed over the British Isles by the 5th, with sunny cold periods by day and fog by night. Fog persisted over much of England from the 6th to 8th. As the anticyclone moved to Scandinavia cold, dry, easterly winds prevailed with snow showers spreading inland from the North Sea, and temperatures little above freezing in south-east England. By the 11th winds were from the north and long periods of snow occurred in south-east England and East Anglia. By the 15th undrifted snow lay 10 in. deep at Ramsgate, Marlborough and Cirencester, and 12 in. deep at Hastings. Temperatures rose little above the freezing point. At Lincoln the screen temperature fell to 12° F. on the 14th. As the anticyclone declined and moved to the west of the British Isles winds became north-westerly and the weather generally less cold, with thunderstorms in parts of England and Wales on the 19th. There were, however, severe snowstorms in east and north-east Scotland, 18th–19th, with undrifted snow 2–3 ft. deep in Aberdeenshire and some villages isolated by the severe drifting. Temperature on grass fell to −4° F. on the 20th at Dalwhinnie, in central Scotland. By the 21st the weather changed completely to give temperatures in the upper fifties over most of the British Isles on the 22nd, reaching 59° F. in Leicestershire and at Llandudno and 62° F. on the Isle of Rhum, to the south of Skye. Heavy rain occurred on the 23rd, with more than 1 in. over much of southern England and 2½ in. at Princetown. In parts of north-east Scotland more than 7 hr. of bright sunshine was recorded on the 25th, although other parts of the country experienced widespread fog. The remainder of the month brought prolonged and general rains, with more than 4 in. in parts of Wales on the 29th, and more than 2 in. in western Scotland on both the 30th and 31st. Flooding occurred, especially in the Midlands. The total rainfall for the month exceeded twice the average from Worcester to Nottingham, and also in the East Riding of Yorkshire, but less than half the average occurred in the north-west of Scotland. Mean temperature was generally above average, while sunshine was above average in Scotland, but below over England and Wales and Northern Ireland.

February.—The weather was variable, with extremes of warmth and cold, total rainfall and sunshine both being generally above average. Initially south-westerly winds predominated, with mild, wet weather and gales in the north and west. On the 2nd widespread rain occurred in north Wales, north-west England and west Scotland, with as much as 5·03 in. at Great Langdale, in the English Lake District and over 3 in. on Snowdon. With the development of an anticyclone over the British Isles by the 5th weather became generally quiet, fine and sunny, with fog at night. Dense fog persisted around Glasgow on the 6th. On the 10th very cold northerly winds spread into Scotland and Northern Ireland bringing heavy falls of snow. During the following week snow fell widely, even reaching the Scilly Isles. On the 14th–18th undrifted snow lay 1–2 ft. deep in parts of Scotland, Northern Ireland and northern England and 4–8 in. deep in parts of Wales and central England. Drifting snow blocked many roads in the north and villages were isolated. Screen temperatures fell to −8° F. at Grantown-on-Spey on the 18th and 5° F. at Renfrew on the 19th. More than 3 in. of rain was recorded in North Wales for the 19th. Between the falls of snow many districts experienced sunny, although cold days. During the 15th–21st many places along the south coast of England recorded 50 hours of sunshine. Subsequently milder, wet weather predominated. Continuous rain spread along the south coast during the night 21st–22nd and heavy falls occurred in the west on the 24th, 25th and 26th. The last three days were unusually mild, temperatures exceeding 60° F. over much of the country, reaching 65° F. in parts of Essex and north-west Wales on the 28th and 61° F. in parts of the eastern half of Scotland on the 29th. The total rainfall exceeded twice the average locally in north-east Scotland, but failed to reach average in small areas between North Wales and Scarborough, from the Peak District to Wiltshire and along the coast of East Anglia. Over England and Wales it was the wettest winter (December to February) since that of 1914–15. Mean temperature for February was just below

average over England and Wales, but below by 2–3° F. over Scotland and Northern Ireland. Along the east coast the total sunshine was about average, but most places recorded much more than average, especially in the west. At Rothesay the total sunshine reached twice the average there.

March.—Frequent east and north-east winds brought mainly dull, dry weather. While mean maximum temperatures were rather below average the frequent cloudy nights resulted in mean minimum temperatures generally above average. South-westerly winds prevailed during the first three days, with mild weather and afternoon temperatures in many places around 60° F. The 4th and 5th were generally sunny, and temperatures exceeded 60° F. in the north-west of Scotland. With the development of high pressure to the east of the British Isles winds during the remainder of the month were mainly easterly, apart from a spell of southerly winds from the 10th to 15th. The 7th and 8th became generally dull and cold, with scattered snow showers. Temperatures rarely rose above 45° F. and by the 8th much of northern England and Scotland was covered by slight snow. Stations at high altitudes gave low minimum temperatures for the 9th, *e.g.* 22° F. at Moor House (Westmorland) and 14° F. at Lowther Hill (Lanarkshire). Snow fell over much of north-eastern Scotland on the 8th and 9th, undrifted snow being 2–3 in. deep in parts of Aberdeenshire. Mild weather brought a general thaw on the 10th and temperatures continued to rise in southern England during the next four days, reaching almost to 60° F. in places. Easterly winds brought much lower temperature on the 16th and little sunshine, except in the extreme west. On the 18th parts of Cornwall recorded more than 2 in. of rain and warmer sunnier weather spread to much of the country, except the east coast, by the 20th. Many stations had 6–8 hr. of sunshine for several days, and by the 24th afternoon temperatures exceeded 60° F. in the west and Midlands, 63° F. being recorded at Chivenor, near Barnstaple, and at Sellafield, on the Cumberland coast. Heavy rain occurred later in southern England, especially during the night of 28th–29th, with more than 1 in. over parts of Dorset, and 2.40 in. at Abbotsbury. During the last two days moderate rain spread slowly northwards. The total rainfall for the month exceeded the average over much of southern England and southern Scotland, but there was less than half the average around Manchester, the English Lake District and the north-west of Scotland. Mean temperature was generally rather above average, but below average in north-east England and eastern Scotland. Sunshine was nearly everywhere below average, and at Worthing it was the dullest March this century.

April.—The weather of the first half of the month was changeable with rather warm south-south-westerly winds and rain at times in all districts. Dry and mainly sunny weather developed over much of the country during the Easter weekend, anticyclonic weather prevailing until the end of the month. More than 1 in. of rain fell in parts of Cornwall on the 1st and over much of western Scotland on the 2nd. Later afternoon temperatures reached 60° F. locally in southern England. The 4th was generally sunny, but the next few days were dull with periods of rain in England and Wales. A depression brought heavy rain to central England on the 10th and heavy rain also occurred in north-west England and western Scotland on the 12th. Gales became widespread over the northern half of the country on the 13th, and continued on the 14th. On the 15th, Good Friday, heavy rain fell in parts of south-west England, but on the 16th the general pattern of the weather changed. Large amounts of sunshine were recorded, especially in the west and extreme south of England, daily amounts reaching 11 hours from 16th to 22nd in parts of Devon. By the 20th temperatures were about 10° F. above the average for the time of year, 68° F. being recorded at many places in England. 65° F. was recorded at Fort William on the 27th and 28th and at Armagh (Northern Ireland) on the 28th. As the anticyclone became centred to the west of Ireland northerly winds spread over the country and persisted for the remainder of the month. The total rainfall was less than half the average to the east of a line roughly from the Isle of Wight to Leeds and along the east coast from Flamborough Head to Edinburgh, but twice the average from Greenock to Pitlochry, in central Scotland. Mean temperature was everywhere above average. The total sunshine was also above average, except over Northern Scotland and in parts of south-east and central England.

May.—Pleasant spring weather prevailed over most of the British Isles, with few extremes of temperature, the shortage of sunshine during the first three weeks being compensated by days of almost unbroken sunshine at the end. The mainly dry weather of the latter part of April continued into May over much of the country. The first two days of the month were rather cool, temperature falling to 22° F. at Balmoral on the 1st. Temperatures rose steadily, reaching 77° F. at Hampton, to the west of London, on the 7th. Thunderstorms developed on the 8th and heavy rain fell in parts of Devon and Cornwall on the 10th, the first rain there for 24 days. Rain was heavy on the 12th in the west Midlands and Cheshire Plain, and on the 13th in northern England and central Scotland. Bright periods with scattered thunder showers followed the rain, but by the 16th sunny, dry weather prevailed, although fog developed along the east coast, spreading inland at night, especially in Scotland from the 14th to 17th. During the 18th to 20th the easterly winds freshened and backed towards north-east, with generally lower temperatures and frequent rain in much of south-east England. By the 21st south-west winds developed, with heavy rain in north-west England and western Scotland on the 23rd, but the 24th was generally fine and sunny as an anticyclone developed in the south. As much as 15 hours of bright sunshine occurred somewhere in the British Isles on most days during the last week, temperatures on the 26th reaching 78° F. at Wakefield and 77° F. at Lairg, in north-east Scotland. The total rainfall was less than half the average along the east coast from Suffolk to the north of Scotland, around the Severn estuary and near Birmingham, while parts of the coasts of Kent and Essex recorded 150 per cent. of average. Mean temperature was generally 3° F. above average, giving in Scotland the warmest May this century, apart from that of 1936. Sunshine totals were below average in parts of south and west Scotland and over much of the south-eastern half of England.

June.—Over most of the British Isles the month was mainly warm and sunny, but the fine weather was broken locally by thunderstorms, sometimes with hail. The warm dry anticyclonic weather of the end of May continued during the first week of June. This was followed by a fortnight of changeable weather, with westerly winds, and then by a return to anticyclonic conditions. Afternoon temperatures exceeded 80° F. widely on the 4th and reached 85° F. locally in the eastern half of England on the 5th. At Kew (Surrey) the 4th was the warmest Whit Saturday there this century. By the 4th many places in East Anglia had had up to

20 days without measurable rain. Thunderstorms developed in parts of south-west England, Wales and Scotland on the 4th and 5th to give heavy rain during Whit Sunday and Monday (5th and 6th) locally in the west and north, with extensive flooding in the Midlands. Heavy rains also occurred in western districts on the 7th and 8th, and again on the 11th and 12th, while thunderstorms occurred in southern England on the 14th. On the 16th a warm moist air-stream spread over the southern half of the country, giving temperatures exceeding 80° F. in many districts and 87° F. on the 18th at Wyton (Huntingdonshire). A severe thunderstorm developed in the south-west late on the 22nd with heavy rains from Dorset through Oxford into Suffolk; 4 in. of rain fell in 5 hours at Oxford. Local thunderstorms also occurred on the 24th, when Ipswich in Suffolk recorded 1·5 in. in 15 minutes. At Grantown-on-Spey the temperature rose to 85° F. on the 24th. The remainder of the month was generally fine, but with scattered showers. The total rainfall was less than one quarter of the average between Lincoln and Tyneside, and less than half the average over much of Northern England, the north coast of Wales, near Edinburgh and around Exeter. Twice the average occurred in parts of Staffordshire, Oxfordshire, Buckinghamshire and Suffolk. Mean temperature was generally above 3° F. above average, and sunshine was as much as 150 per cent. of average in parts of north-west England.

July.—The weather over much of the British Isles was unusually cool, wet and cloudy, with frequent thunderstorms. The sunny but cool weather, prevailing at the end of June, continued into July, but from the 4th periods of prolonged rains alternated with showery weather, as depressions passed near the British Isles from the Atlantic every few days. At Moor House, in Westmorland, some rain fell on every day. The highest shade temperature of the month, 77° F., occurred at Mansfield, Nottinghamshire, on the 4th. The rainfall for the 6th exceeded 5 in. near Slaidburn, in the west of Yorkshire. The next few days were generally sunny with local showers. Rain was widespread on the 10th and 11th, thunderstorms occurring mainly on the 8th and 12th. The weather from the 13th to 19th was changeable, with widespread rain on the night of the 16th–17th, especially in south-west England and western Scotland. The 20th was generally dry but a small whirlwind caused structural damage at Taversham, near Northwich, Cheshire. Widespread rain, with thunderstorms, occurred on the 22nd, with hail in places. Generally dull and mild weather, with coastal fog in the south-west, prevailed on the 23rd and 24th followed by widespread rain in southern England on the night of 27th–28th. The 28th was warm and humid, bright showery weather prevailing for the remainder of the month. The total rainfall was below average over most of Scotland, less than half the average occurring in central Inverness-shire and in Orkney. There was more than twice the average in north-west England, the Isle of Man and the Channel Isles. Mean temperature was almost everywhere below average, and over England and Wales this was mainly due to low maximum temperatures. At Kew and Hastings the maximum temperatures were lower than recorded in July in any earlier year. The total sunshine exceeded the average in the Western Isles and north of Aberdeen, and locally in Cornwall and North Wales.

Further details are given in the Monthly Weather Report (Meteorological Office) published by H.M.S.O.

TEMPERATURE AND RAINFALL RECORDS

GENERAL: The *maximum shade temperature* of the air on record is 136° F. at Azizia (Uzzizia) in Tripoli on Sept. 13, 1922; the *extreme lowest recorded temperature* is −90·4° F. (122° below freezing point) at Verkhoyansk, Siberia, on Feb. 5 & 7, 1892 and at Oymekon, Siberia, on Feb. 6, 1933. In the upper air temperatures as low as −133° F. have been recorded—*e.g.* over Agra (India), at a height of 16½ kilometres (54,000 feet).

The *wettest place* in the world is considered to be the neighbourhood of Cherrapunji in Assam where annual averages exceeding 400 inches have been obtained, of which 90 per cent. usually falls in the six months April to September, and annual totals have reached 670 inches.

U.K.: The *maximum shade temperature* recorded in the air at 4 feet above the ground is 100° F. at Greenwich Observatory (Aug. 9, 1911).

The *lowest shade temperatures* are −17° F. at Braemar (Feb. 11, 1895) and −16° F. at Kelso (Dec. 3, 1879).

The *greatest rainfall* recorded in a day was at Martinstown, near Dorchester, 11·00 inches in the 24 hours commencing 9 am. (July 18, 1955). *Annual totals* exceeding 240 inches were recorded at The Stye, Borrowdale, in 1872, 1923, 1928 and 1954; at Ben Nevis Observatory in 1898 and at Llyn Llydaw, Snowdon, in 1909. The *smallest annual total* is 9·29 inches at Margate in 1921 and the largest may be regarded as 257 inches at Sprinkling Tarn in 1954.

The *maximum wind-velocity* on record occurred on the top of Costa Hill, Orkney, on December 12, 1956, in a gust of 127 miles per hour.

TEMPERATURE AND SUNSHINE
AT VARIOUS PLACES IN GREAT BRITAIN

Mean Temperature of the air (° F.) and Bright Sunshine (as mean hours per day) at representative British Health Resorts and Towns during the year July, 1959, to June, 1960, and the calendar year 1959. Also height of Climatological Station above mean sea level, altitude being given in feet. Fuller details of the weather are given in the *Monthly Weather Report* published by the Meteorological Office.

Stations reporting the highest number of hours of bright sunshine in 1959 included: Jersey, 2,291; Guernsey, 2,263; Shanklin, 2,235; Ventnor, 2,172; Littlehampton, 2,146; Eastbourne, 2,133; Worthing, 2,124; Weymouth, 2,085 and Bournemouth, 2,078. In 1959 England and Wales had 18 per cent., Scotland 8 per cent. and Northern Ireland 15 per cent. more than the average amount of sunshine.

TEMPERATURE AND SUNSHINE AT VARIOUS PLACES IN GREAT BRITAIN

Mean Temperature of the air (° F.) and Bright Sunshine (as mean hours per day) at representative British Health Resorts and Towns during the year July, 1959, to June, 1960, and the calendar year 1959. Also height of Climatological Station above mean sea level, altitude being given in feet. Fuller details of the weather are given in the *Monthly Weather Report* published by the Meteorological Office.

Entries of Maximum Temperature cover day period 9–21 h.; Minimum Temperature night period 21–9 h. and are entered to day of reading; Rainfall the 24 hours commencing at 9 h. on day of entry; Sunshine the 24 hours 0–24 h.; Pressure and Wind are recorded at 9 h.; Wind is recorded in degrees, E = 90°, S = 180°, W = 270° and N = 360°. Pressure is corrected and reduced to M.S.L. Rainfall 1000 mm. = 39·37 in. Averages refer to the following standard periods:—Temperature, Pressure and Sunshine 1921–50; Rainfall, 1916–1950.

NATIONAL INSURANCE AND ASSISTANCE

For Combined Contributions, see p. 1130.

The State insurance and assistance schemes in force since July 5, 1948, comprise schemes of national insurance and industrial injuries insurance, national assistance and non-contributory old age pensions, and family allowances. The two insurance schemes and the family allowances scheme are administered by the Ministry of Pensions and National Insurance, and the national assistance scheme and non-contributory old age pensions by the National Assistance Board.

NATIONAL INSURANCE

The National Insurance Scheme operates under the National Insurance Act, 1946, as amended by the National Insurance Acts of 1949, 1951, 1953, 1954, 1955, 1956, 1957 and 1959, the National Insurance (No. 2) Act, 1957, the Family Allowances and National Insurance Acts, 1952, 1956 and 1959, and the National Health Service Contributions Acts, 1957 and 1958, and Regulations made under these Acts.

The National Insurance Act, 1959, extends the existing flat-rate scheme by providing, for employed persons over 18, a system of contributions graduated according to earnings, with related graduated additions to retirement pensions. Employees with equivalent occupational pension rights may be contracted out of this graduated part of the scheme. These changes are planned to begin in April, 1961 (see pp. 1125, 1130). Provision is also made for higher Exchequer supplements, and for four quinquennial increases in contribution rates beginning in 1965.

INSURED PERSONS AND CONTRIBUTIONS

Subject to certain statutory exceptions, every person living in Great Britain who is over school leaving age and under pension age becomes insured under the Acts.

There are three classes of insured persons namely:

(*a*) Class 1. Employed persons, i.e. persons who work for an employer under a contract of service or are paid apprentices.

(*b*) Class 2. Self-employed persons, i.e. persons gainfully occupied but not working under the control of an employer.

(*c*) Class 3. Non-employed persons, i.e. persons who are not gainfully occupied.

Regulations made under the Acts give married women and widows, upon certain conditions, the choice whether to pay contributions or not.

The estimated number of persons in respect of whom contributions were payable in 1958 was as follows: employed, 22·3 million; self-employed, 1·4 million; non-employed, 0·3 million.

National Insurance contributions are payable by insured persons, by employers of employed persons, and out of moneys provided by Parliament (see p. 1130).

Men aged 70 and over and women aged 65 and over in classes (1) and (2) pay no National Insurance contribution. Men aged 65 to 70 and women aged 60 to 65 in these classes, with certain exceptions, are liable to pay contributions if they have not retired from regular employment. Normally no contributions are payable by men over 65 or women over 60 in class (3).

Regulations state the cases in which insured persons may be excepted from paying National Insurance contributions, and the conditions upon which contributions are credited to persons who are excepted.

Contributions are paid by means of stamps on a single insurance card; the stamp also covers the National Health Service contribution and, in the case of employed persons, the Industrial Injuries contribution.

From April, 1961, employed persons over age 18 earning more than £9 in any week (who are not contracted out as members of approved occupational pension schemes) and their employers will pay a minimum contribution covering earnings up to £9 a week, supplemented by a graduated contribution for earnings over £9 and up to £15 a week (see pp. 1125, 1130). In April, 1965 and at five-yearly intervals thereafter up to March, 1980, all National Insurance contributions will be increased.

The Exchequer contribution comprises (a) a supplementary payment (currently ranging from 7*d*. to 3*s*. 3*d*.) in respect of each contribution paid by an insured person or employer, and (b) additional sums paid into the National Insurance Fund, viz., for the period of seven years beginning with April 1, 1955, sums not exceeding a total of £325 million. A payment of £39 million was made under (b) in the year ended March 31, 1959.

From April, 1961, the yearly Exchequer contribution, subject to a minimum of £170 million a year, will be equal to one-quarter of the national insurance portion of the contributions paid by employers and employed persons (excluding graduated contributions) and one-third of the national insurance portion of self-employed and non-employed contributions.

BENEFITS

The Acts give the following benefits:

Unemployment benefit.
Sickness benefit.
Maternity benefits, including maternity grant, home confinement grant and maternity allowance.
Widow's benefits, including widow's allowance, widowed mother's allowance and widow's pension.
Child's special allowance
Guardian's allowance.
Retirement pension.
Death grant.

The benefits available to the various classes of insured persons are as follows:

Employed persons....	All benefits.
Self-employed persons.	All benefits *except* unemployment benefit.
Non-employed persons	All benefits *except* unemployment and sickness benefits and maternity allowance.

There is one system of adjudication on all claims for benefit under the Acts; with certain exceptions, questions as to the right to benefit are decided by independent statutory authorities, consisting of insurance officers, local tribunals and the Commissioner and Deputy Commissioners.

UNEMPLOYMENT BENEFIT

The *standard weekly rates of benefit* from Feb. 6, 1958, are as follows:

	s.	*d.*
Man, single woman or widow over 18...	50	0
Married woman over 18: ordinary rate	34	0
If maintaining an invalid husband, or not living with and unable to obtain any financial assistance from her husband..	50	0
Person under 18 (other than a married woman): ordinary rate.....	28	6
If entitled to an increase of benefit in respect of a child or adult dependant.	50	0

	s.	d.
Married women under 18: ordinary rate.	28	6
If entitled to an increase of benefit in respect of a child or adult dependant...	34	0
If supporting an invalid husband, or if entitled to an increase of benefit in respect of a child or adult dependant other than her husband and not residing with and unable to obtain any financial assistance from her husband.....	50	0
Increase of benefit for only child or elder or eldest child (where payable).....	15	0
Increase of benefit for each additional child (where payable).....	7	0
Increase of benefit for adult dependant (where payable).....	30	0

Normal Contribution Conditions.—The claimant must have paid 26 Class 1 contributions since July 5, 1948, and, to be entitled to benefit at the standard rate during a benefit year, must have paid or had credited 50 Class 1 contributions during the preceding contribution year.

Waiting Period.—Benefit is not payable for the first three days of a spell of unemployment or sickness unless the claimant has twelve days or more of unemployment or sickness within a period of 13 weeks beginning with the first of these days. Odd days of unemployment or sickness count for benefit only where any two or more of them fall within a period of six consecutive days, excluding Sundays, and such spells of two or more days are treated as "linked up" if not separated by more than 13 weeks.

Duration of Benefit.—A claimant can draw in respect of any period of interruption of employment 180 days of unemployment benefit, together with additional days of benefit, assessed on his record of contributions and benefit.

Requalification for Benefit.—A person who has exhausted his standard benefit, including any additional days, requalifies therefor when he has paid 13 Class 1 contributions.

Disqualifications.—As in the former scheme, there are disqualifications for receiving benefit, e.g. for a period not exceeding six weeks if a person has lost his employment through his misconduct, or has voluntarily left his employment without just cause, or has, without good cause, refused an offer of suitable employment.

Numbers Unemployed.—During the year 1959 the average number of persons registered as unemployed in Great Britain was 475,200. On November 3, 1958, 334,000 persons were receiving unemployment benefit.

SICKNESS BENEFIT

Standard Rates of Benefit.—Same as for unemployment benefit.

Normal Contribution Conditions.—Same as for unemployment benefit, except that Class 2 as well as Class 1 contributions are counted.

Waiting Period.—Same as for unemployment benefit. Days of sickness are "linked up" with days of unemployment falling within the same period of 13 weeks.

Duration of Benefit.—A person who has paid 156 Class 1 or Class 2 contributions receives sickness benefit of unlimited duration. If he has paid less than 156 such contributions, benefit is limited to 312 days (one year); but he will requalify for benefit when he has paid contributions for 13 weeks.

Disqualifications.—Regulations provide for disqualifying a person for receiving sickness benefit for a period not exceeding six weeks if he has become incapable of work through his own misconduct, or if he fails without good cause to attend for or submit himself to prescribed medical or other examination or treatment, or if he acts in a way which would retard his recovery.

Number of Claims.—During 1958, 7,887,000 new claims for sickness benefit were received. The number of claimants incapacitated owing to sickness varied during the year from under 790,000 in August to 1,077,000 in January.

MATERNITY BENEFITS

The National Insurance Act, 1953, made changes in the structure of maternity benefits provided by the principal Act. Increases in the benefits under the National Insurance (No. 2) Act, 1957, took effect as from Feb. 3, 1958.

Maternity Grant.—A cash grant of £12 10s. is payable on the mother's own insurance or on her husband's. Extra grants are payable, in certain circumstances, if more than one child is born. The normal contribution conditions for this grant are (i) that the mother or her husband has paid not less than 26 contributions of any class since his or her entry into insurance, and (ii) that not less than 26 contributions of any class have been paid by or credited to that person during the previous contribution year, or the mother has satisfied the contribution conditions for a maternity allowance at the standard rate or at a reduced rate.

Home Confinement Grant.—An additional grant of £5 is payable to women who are confined at home or elsewhere at their own expense.

Maternity Allowance.—A woman who is gainfully occupied receives in addition a maternity allowance of 50s. a week normally for 18 weeks beginning eleven weeks before the expected week of confinement, provided that she abstains from work. The rate of allowance is increased where the woman has dependants. The normal contribution conditions for this benefit are (i) that the claimant has paid or had credited 50 Class 1 or 2 contributions during the 52 weeks ending 13 weeks before the expected week of confinement; and (ii) that in the same 52 weeks at least 26 Class 1 or 2 contributions have been paid.

During 1958 maternity grants were paid for about 815,000 births; in addition, the home confinement grant was paid in about 323,000 cases, and about 187,000 women received weekly maternity allowances.

WIDOW'S BENEFITS

This benefit in any of its three forms is payable to the widow of any class of insured person. The normal contribution conditions to be satisfied by the husband are (*a*) that he had paid not less than 156 contributions of any class since his last entry into insurance (104 if he was married before July 5, 1948, and insured from before September 30, 1946), and (*b*) that the yearly average of the contributions paid by or credited to him since his insurance started was not less than 50. Increases in this benefit under the National Insurance (No. 2) Act, 1957, became payable as from Jan. 28, 1958.

Widow's Allowance.—A woman who at her husband's death is under 60, or, if the husband had not qualified for a retirement pension, is over 60, receives (during the first 13 weeks of widowhood) a cash allowance usually of 70s. a week, with an increase of 20s. for the first or only child and 12s. for each other child.

Widowed Mother's Allowance.—When the 13 weeks of widow's allowance have elapsed, a widow who is left with one or more dependent children receives a cash allowance usually of 70s. a week so as long she has a child of qualifying age, and in addition 12s. a week for each child other than the first. A widowed mother's personal allowance, usually 50s. a week, is payable to widows who have

living with them a child under 18 who has left school and is not an apprentice.

Widow's Pension.—A widow who is under pensionable age or, being over pensionable age, has not retired from regular employment, receives a widow's pension usually of 50*s.* a week (i) when widow's allowance ends, if she was over 50 at the time of her husband's death and had been married for not less than three years; or, (ii) when her widowed mother's allowance comes to an end, if she is then over 50 (40 if widowed before February 4, 1957) and not less than three years have elapsed since marriage.

Widow's benefit of any form ceases upon remarriage. A 50*s.* widow's pension is reduced by sixpence for each shilling of any net earnings in excess of 70*s.* and a further sixpence for each shilling of net earnings in excess of 90*s.* A widowed mother's allowance is reduced by sixpence for each shilling of any net earnings in excess of 100*s.* and a further sixpence for each shilling of net earnings in excess of 120*s.*; but it must not be reduced in any week by more than 50*s.*

If a woman, who was married before July 5, 1948, to a man insured under the old scheme immediately before that date does not qualify for widow's benefit under the new scheme, she may qualify for a widow's basic pension, usually of 10*s.* a week.

At the end of 1958, about 488,000 widows were receiving widowed mother's allowance, widow's pension or widow's 10*s.* pension, and about 20,000 widow's allowances were current.

CHILD'S SPECIAL ALLOWANCE

The National Insurance Act, 1957, as amended by the National Insurance (No. 2) Act, 1957, provides for a special allowance for a woman whose marriage has been dissolved or annulled and who has not remarried, to be payable on the ex-husband's death if the woman has in her family a child to whose maintenance the ex-husband had before his death been contributing at least 5*s.* a week in cash or its equivalent. The amount of the allowance is equal to the amount of the ex-husband's contribution, subject to a maximum of 20*s.* a week for the first or only child *plus* 12*s.* for each other child in addition to Family Allowances. The contribution conditions for the allowance are substantially the same as for widow's benefit. The increase in this allowance under the National Insurance (No. 2) Act, 1957, took effect as from Jan. 27, 1958.

GUARDIAN'S ALLOWANCE

Where the parents of a child are dead, and one at least of them was an insured person, any person who has the child in his family receives a guardian's allowance of 27*s.* 6*d.* a week while the child is of school age. The increase in this benefit under the National Insurance (No. 2) Act, 1957, took effect as from Jan. 28, 1958. At the end of 1958 about 5,800 allowances were being paid.

RETIREMENT PENSIONS

A flat-rate retirement pension is payable for life to an insured person who (*a*) is over pension age (65 for a man and 60 for a woman), (*b*) has retired from regular employment, and (*c*) has paid the prescribed number of contributions. Men aged 70 and over and women aged 65 and over are not required to satisfy condition (*b*).

The basic rate of pension as from Jan. 26, 1958 (under the National Insurance (No. 2) Act, 1957) is 50*s.* a week, plus 30*s.* for a dependent wife, plus 15*s.* for the first or only child and 7*s.* for each other child.

Where the insured person postpones retirement beyond minimum pension age, the weekly rate of pension is increased, when he or she finally retires or reaches the age of 70 (65 for women), in respect of contributions paid as an employed or self-employed person during the five years after reaching minimum pension age. After Aug. 3, 1959, the increment to pension is 1*s.* for every 12 contributions. A retirement pensioner between the ages of 65 and 70 (60 and 65 for women) can choose to be treated as not retired and thus earn pension increments by temporarily foregoing his pension and paying contributions during employment or self-employment.

A man aged 65 to 70 (or a woman aged 60 to 65) who has qualified for pension will have it reduced by sixpence for each shilling of net earnings in excess of 70*s.* and a further sixpence for each shilling of net earnings in excess of 90*s.*

The Normal Contribution Conditions are (*a*) that 156 contributions of any class have been paid (104 if insurance began before September 30, 1946), and (*b*) that the yearly average of contributions paid or credited is not less than 50.

Special Provisions as to Women.—Subject to certain conditions, a married woman on reaching 60 or a woman on marriage after that age receives by virtue of her husband's insurance a retirement pension of 30*s.* a week. A widow over the age of 60 when her husband dies will usually qualify for a retirement pension of 50*s.* a week from her husband's insurance instead of a widow's pension. A retirement pension payable to a woman by virtue of her husband's insurance is increased by 6*d.* for every 12 contributions paid by the husband after Aug. 3, 1959, as an employed or self-employed person while he is over 65 and under 70 and she is over 60, but if he should die before her, any 6*d.* increase he earns for her will then be paid at the 1*s.* rate. The pension of a woman under 65 is reduced by sixpence for each shilling of her net earnings in excess of 70*s.* and a further sixpence for each shilling of her net earnings in excess of 90*s.*

Unemployment and sickness benefit is payable to men between 65 and 70 and women between 60 and 65 who have not retired from regular employment at the same rate as the retirement pension they would have been entitled to had they retired from regular employment.

At the end of 1958 retirement pensions, or contributory old age pensions under the old Acts, were being paid to approximately 5,330,000 persons. On July 5, 1958, about 300,000 "late-age entrants" (persons who were within ten years of pension age at July 5, 1948, and who had not previously been insured) and their wives became entitled to retirement pensions.

THE NEW GRADUATED PENSION SCHEME

From April, 1961, when the new graduated pension scheme is brought into operation under the National Insurance Act, 1959, National Insurance contributions and retirement pensions will be graduated, within specified limits, according to earnings. The scheme will not apply to employed persons under 18, or to self-employed or non-employed persons, who will, during the period up to April, 1965, pay contributions at the present rates for the present flat-rate benefits and pensions (see p. 1130).

Graduated contributions.—For employed persons over 18 (including men over 65 and under 70, and women over 60 and under 65, who have not retired), unless contracted out as members of occupational pension schemes satisfying certain conditions, there will be a minimum weekly contribution covering earnings up to £9 a week, plus a graduated contribution on all earnings over £9 and up to £15 a week.

During the period from April, 1961, to April, 1965, the minimum contribution, which includes the separate National Health Service and Industrial Injuries contributions, will be lower than the present flat-rate contribution, viz. 15s. 4d. for an employed man (of which the employee will pay 8s. 4d. and the employer 7s.) and 13s. 6d. for an employed woman (of which the employee will pay 7s. 2d. and the employer 6s. 4d.) (see p. 1130).

During the same period, on earnings above £9 and up to £15 a week the graduated contribution will be 8½ per cent. of earnings, divided equally between employer and employee. On earnings above £15 a week the graduated contribution will be the same as on earnings of £15 a week, viz., 10s. 2d., divided equally between employer and employee.

The graduated contribution will be the same for men and women. Employed married women, and widows receiving certain benefits, will still be able to choose not to pay the minimum contribution (other than the 5d. Industrial Injuries contribution), but, unless contracted out, they will have to pay their share of the graduated contribution on their earnings between £9 and £15 a week.

The graduated contributions will in general be payable on the gross earnings (including overtime pay, bonus, etc.) received in each week (or month, etc.) taken separately, and not on the cumulative total over the year (see Leaflet N.I. 115, obtainable at Pensions and National Insurance Offices).

Contracted-out employees (whatever their earnings) and their employers will, during the period up to April, 1965, pay the present Class 1 contributions for the present flat-rate pensions and benefits (see p. 1130).

The minimum contribution, and the flat-rate contribution of contracted-out employees, of juveniles, and of the self-employed and non-employed, will be paid by means of a combined weekly stamp. The graduated contributions will be collected through the P.A.Y.E. system, in association with income tax (see Leaflet N.I. 115).

The National Insurance Act, 1959, provides for increases in the minimum contribution and the graduated contributions, and in the flat-rate contributions, in April, 1965, and at five-yearly intervals thereafter up to April, 1980.

The graduated pension.—The graduated addition to the flat-rate retirement pension for each contributor will be at the rate of 6d. a week for each unit of graduated contributions paid by him or her since the start of the new scheme. A unit of contributions during the period from April, 1961, to April, 1965, will be £7 10s. for men, and £9 for women, of graduated contributions paid by the employee. A widow over age 60 will get a graduated addition to her flat-rate retirement pension equal to half of any graduated addition earned by her late husband, plus any addition earned by her own graduated contributions.

Graduated additions will be subject to the usual condition of retirement and initially will be subject to the same earnings rules as the flat-rate retirement pension (see p. 1125). Persons who defer retirement will continue to pay graduated contributions until they retire or reach 70 (65 for women) whether retired or not, when they will qualify for graduated additions to pension in respect of graduated contributions they have paid. In addition, half of the graduated additions they have forgone by deferring retirement will be treated as extra graduated contributions paid by them and will count towards further graduated pension (see Leaflet N.I. 111).

Contracting out.—Adult employees who have retirement pension rights in an occupational pension scheme can be contracted out of the graduated part of National Insurance retirement pensions if the following conditions are satisfied:

(1) the occupational scheme is financially sound;
(2) it provides the employees contracted out with retirement pension rights at least equal to the maximum graduated pension that could have been earned in the State scheme for a corresponding period of service up to age 65 (women 60);
(3) pension rights at least up to this amount are preserved should the employee change his job.

To be contracted out, an employee must be in an employment covered by a Certificate of Non-participation issued to his employer by the Registrar of Non-participating Employments. In general, the application for a certificate must come from the employer. An employer who wishes to contract out all or particular groups of employees must first give notice to the employees and others (e.g., trustees, insurers, committee of management) concerned and allow a period for consultation, and the Registrar can defer the issue of a certificate to allow time for further consultation. There will be a right of appeal to the Adjudicator against a refusal by the Registrar to issue a certificate.

If an application is not made in sufficient time, graduated contributions will be payable from April, 1961, until a certificate is issued and takes effect. It is important that an employer who is thinking of contracting out should get in touch with the Registrar as early as possible, and it is open to him to seek the Registrar's advice as to whether a pension scheme is suitable for contracting out before a formal application is made. A leaflet R 1, which explains the arrangements for contracting out and for modifying schemes for the purpose of satisfying the contracting out conditions can be obtained from the Registrar of Non-participating Employments, 10 John Adam Street, London, W.C.2.

DEATH GRANT

A death grant is payable on the death of an insured person or of his wife, child or widow or, if the insured person is a woman, of her husband, child or widower. The normal grant (since Feb. 3, 1958) is for an adult £25, a child aged 6–17 £18 15s., a child aged 3–5 £12 10s., a child under 3 £7 10s. For the deaths of people who on July 5, 1948, were between 55 and 65 (men) or between 50 and 60 (women) the grant is £12 10s.

The normal contribution conditions for death grant are that (*a*) not less than 26 contributions of any class have been paid by or credited to the deceased or the person by virtue of whose insurance the grant is claimed since July 5, 1948, and (*b*) either not less than 45 contributions of any class have been paid by or credited to him in the previous contribution year, or the yearly average of the contributions paid or credited since July 5, 1948 (or 16th birthday if later) is not less than 45. No grant is payable for deaths of persons already over pension age on July 5, 1948. For deaths in 1957 about 258,000 grants were awarded.

The grant is paid to the deceased person's executors or administrators, if any; otherwise it is paid to the person who meets the funeral expenses or to the next of kin.

FINANCE

Under the Act of 1946 two funds are set up, viz. the National Insurance Fund, and the National Insurance (Reserve) Fund. The income from contributions, Exchequer grants and interest from both funds are paid into the National Insurance

Fund, and payments are made out of the Fund to meet the cost of benefits and administration. Under the National Health Service Contributions Act, 1957, payments hitherto made from the Fund towards the cost of the National Health Service, which were equivalent to 10*d.* out of each total weekly National Insurance contribution for men, 8*d.* for women, and 6*d.* for boys and girls, were discontinued; consequential reductions were made in the rates of National Insurance contributions, and provision was made for separate National Health Service contributions, yielding twice the amount of the payments previously made from the National Insurance Fund to the National Health Service, to be collected in conjunction with the National Insurance contributions. Increases in the rates of National Health Service contributions under the National Health Service Contributions Act, 1958, took effect as from July 7, 1958. (*See* p. 1130.)

Approximate receipts and payments of the National Insurance Fund for the year ended March 31, 1959, were as follows:—

Receipts	£'000
Balance, April 1, 1958	353,819
Contributions from employers and insured persons	694,363
Exchequer contribution	163,172
Income from investments	11,702
Transfer from the Reserve Fund of income from investments, etc.	40,369
Other receipts	307
	1,263,731

Payments	£'000	£'000
Benefit:—		
Unemployment benefit	49,428	
Sickness benefit	133,463	
Maternity benefit	19,700	
Widow's benefit	57,500	
Guardian's allowance	450	
Child's special allowance	9	
Retirement pension	617,397	
Death grant	5,042	
		882,989
Contribution to the National Health Service		140
Administration expenses		35,940
Other payments		6,598
Balance, March 31, 1959		338,064
		1,263,731

The changes in the rates of contributions and benefits and of Exchequer supplement introduced by the National Health Service Contributions Act, 1957, and the National Insurance (No. 2) Act, 1957, were in effect during the whole of 1958–59. Payments exceeded receipts during the year by £15·8 million. Compared with 1957–58, receipts increased by £168·1 million and payments by £186·3 million. The increase in payments was mainly due to a rise of £200·1 million in benefit payments (of which retirement pensions accounted for £135·3 million), partly offset by the fall of £18·0 million in the contribution from the Fund to the National Health Service resulting from the introduction of separate National Health Service contributions.

The balance in the Reserve Fund at March 31, 1959, was £1,167·7 million.

The Government Actuary estimated in April, 1960, that the financial provisions of the National Insurance Act, 1959, should, on the Government's assumptions about future trends in unemployment, earnings, etc. produce small annual deficits up to the mid-70's and increasing annual surpluses thereafter.

INDUSTRIAL INJURIES INSURANCE

The National Insurance (Industrial Injuries) Act, 1946, substituted for the Workmen's Compensation Acts, 1925 to 1945, a system of insurance against personal injury caused by accident arising out of and in the course of a person's employment and against prescribed diseases and injuries due to the nature of a person's employment. The scheme, which insures against personal injury caused and prescribed diseases and injuries developed on or after July 5, 1948, operates under the Act of 1946, as amended by the National Insurance (Industrial Injuries) Acts, 1948 and 1953, the National Insurance Acts, 1951, 1954 and 1957, the National Insurance (No. 2) Act, 1957, and the Family Allowances and National Insurance Acts, 1952, 1956 and 1959, and Regulations made by the Minister under those Acts. Increases in the rates of contributions and benefits took effect, under the National Insurance (No. 2) Act, 1957, on Jan. 27, 1958 in the case of death benefit, and on Feb. 3, 1958 in the case of other benefits and of contributions.

The Workmen's Compensation Acts, including the Workmen's Compensation (Temporary Increases) Act, 1943, (which is now made permanent) continue to apply, subject to certain amendments, to cases arising before the new scheme started.

The Workmen's Compensation (Supplementation) Scheme, 1951, which came into operation on July 11, 1951, provides for the payment out of the Industrial Injuries Fund of allowances supplementing workmen's compensation where the accident or disease happened before 1924.

The Pneumoconiosis and Byssinosis Benefit Scheme, 1952, provides for payment of benefits out of the Industrial Injuries Fund for those totally disabled by pneumoconiosis or byssinosis, and for dependants of those who died from one of those diseases, after December 31, 1949, if they are not covered by either the Workmen's Compensation Acts or the Industrial Injuries Acts. This Scheme was extended by the Amendment Scheme, 1954, to cases of partial disablement as a result of either disease, and was further amended by the Amendment Schemes, 1957 and 1958.

The Industrial Diseases (Miscellaneous) Benefit Scheme, 1954, provides for payment of benefit out of the Industrial Injuries Fund to or in respect of certain persons who are disabled or die or have died after December 31, 1949, as a result of certain malignant and other diseases due to occupational exposure to carcinogens, in cases where neither workmen's compensation nor benefit under the Industrial Injuries Act is payable.

As from August 28, 1956, under the Workmen's Compensation and Benefit (Supplementation) Act, 1956, a supplementary benefit of 17*s.* 6*d.* a week became payable out of the Industrial Injuries Fund to the classes of totally disabled persons mentioned in the Act who are receiving workmen's compensation.

INSURED PERSONS

The persons covered by the Industrial Injuries scheme correspond closely to the class of "employed persons" under the National Insurance Act, 1946 (excluding members of the Forces), and numbered in 1957 over 21½ million, of whom about one-third were women.

CONTRIBUTIONS

Contributions are payable by insured persons and their employers, unless exempted, and the Exchequer contributes an amount equal to one-fifth of the combined contributions of insured persons and employers.

The normal weekly rates of contributions payable

by insured persons and employers respectively are 8*d*. and 9*d*. for men over 18, 5*d*. and 6*d*. for women over 18, 4*d*. and 5*d*. for boys under 18, and 3*d*. and 3*d*. for girls under 18. Normally contributions are paid by means of stamps on a single insurance card, the same stamp also covering National Insurance and National Health Service contributions.

There are no contribution conditions for the payment of benefits. Persons employed in insurable employment are covered from the time of starting work, but if employed while of school age pay no contributions.

BENEFITS

Injury Benefit is payable for not more than the first 26 weeks of incapacity; no payment is made for the first three days unless there are a further nine days of incapacity within the injury benefit period. Benefit is payable to persons over 18 and to juveniles with dependants allowances, at the weekly rate of 85*s*. (days being paid for at one-sixth of the weekly rate), *plus* 30*s*. for one adult dependant, *plus* 15*s*. for the first or only child and 7*s*. for each other child. Juveniles not entitled to a child or adult dependant's allowance receive benefit at half the adult rate if under 17 and at three-quarters the adult rate if 17 and under 18.

Disablement Benefit is payable if at or after the end of the injury benefit period the insured person suffers from loss of physical or mental faculty such that the resulting disablement is assessed at not less than one per cent. (In cases of pneumoconiosis and byssinosis disablement benefit is paid from the start without a period of injury benefit.) The amount of disablement benefit varies according to the degree of disablement (in the form of a percentage) assessed by a medical board or medical appeal tribunal by reference to the claimant's disabilities (incurred as a result of the loss of faculty) as compared with a normal person of the same age and sex. In cases of disablement of less than 20 per cent., benefit normally takes the form of a *gratuity* paid according to a prescribed scale, but not exceeding £280. Where the degree of disablement is 20 per cent. or more, the benefit is a weekly *pension* payable either for a limited period or for life according to the following scale:

Degree of disablement	*Weekly Rate*
	s. *d.*
100 per cent	85 0
90 ,, ,,	76 6
80 ,, ,,	68 0
70 ,, ,,	59 6
60 ,, ,,	51 0
50 ,, ,,	42 6
40 ,, ,,	34 0
30 ,, ,,	25 6
20 ,, ,,	17 0

These are basic rates applicable to adults and to juveniles entitled to an increase for a child or adult dependant; other juveniles receive one-half the adult rate if under 17, and three-quarters of the adult rate if 17 and under 18.

Basic rates of pension are not related to the pensioner's loss of earning power, and are payable whether he is in work or not. Upon prescribed conditions, however, pension is supplemented for unemployability and in cases of special hardship. There is provision also for increases of pension during approved hospital treatment or if the pensioner requires constant attendance. An increase of 30*s*. for an adult dependant and of 15*s*. for the first or only child and 7*s*. for each other child is also payable where the pensioner is either entitled to an unemployability supplement or receiving approved hospital treatment. Subject to certain exceptions, a pensioner who is not in receipt of unemployability supplement can draw other national insurance benefits in full in addition to disablement pension.

Death Benefit, in the form of a pension, a gratuity or a weekly allowance for a limited period, available for widows and other dependants in fatal cases, depends in amount upon their relationship to the deceased and their circumstances at the time of death and not upon the deceased's earnings. A widow who was living with her husband at the time of his death receives a pension of 70*s*. a week for the first 13 weeks and thereafter of 56*s*. or 20*s*. a week according to circumstances, *plus* 20*s*. for the first or only child and 12*s*. for each other child.

Regulations impose certain obligations on claimants and beneficiaries and on employers, including, in the case of the former, that of submitting to medical examination and treatment and attending courses of vocational training or rehabilitation approved by the Ministry of Labour and National Service.

Industrial Diseases, etc.—The Act of 1946 extends insurance to prescribed industrial diseases and prescribed personal injuries not caused by accident, which are due to the nature of an insured person's employment and developed on or after July 5, 1948.

Determination of Questions and Claims.—Provision is made for the determination of certain questions (*e.g.*, as to insurability and liability to contribute) by the Minister, and of "disablement questions" by a medical board (or a single doctor) or medical appeal tribunal or, on appeal on a point of law, by the Industrial Injuries Commissioner, subject to leave. Claims for benefit and certain questions arising in connection with a claim for or award of benefit (e.g., whether the accident arose out of and in the course of the employment) are determined by an insurance officer appointed by the Minister, or a local appeal tribunal consisting of a chairman appointed by the Minister and equal numbers of members representing employers and insured persons, or, on appeal, by the Commissioner.

About three-quarters of a million new awards of injury benefit are made each year. The number of awards of disablement benefit and of special hardship allowance has increased year by year. The number of disablement pensions in payment rose during the year ended October 31, 1957, from 143,500 to 148,300; of those in payment at the end of the period 40,900 were in respect of pneumoconiosis. During the same year the number of special hardship allowances in payment increased from 80,800 to 85,500. The annual number of awards of death benefit slightly exceeds 2,000; at the end of 1957, about 15,500 pensions and 12,700 allowances were in payment.

FINANCE

Contributions from employers, insured persons and the Exchequer are paid into, and benefits and administrative expenses are paid out of, a fund established under the Act of 1946, viz., the Industrial Injuries Fund.

Receipts, 1958–59	£'000	£'000
Balance, April 1, 1958		173,320
Contributions from employers and insured persons		63,087
Exchequer contribution		12,690
Income from investments		6,963
Other receipts		9
		256,070
Payments, 1958–59		
Benefit:—		
Injury	17,390	
Disablement (*a*)	24,340	
Death (*a*)	2,850	
Other benefits (*b*)	1,258	
		45,838

Payments, 1958–59 (*continued*)

	£'000
Administration expenses	5,398
Other payments	23
Balance, March 31, 1959	204,811
	256,070

(*a*) Division estimated. (*b*) Allowances paid under the Workmen's Compensation (Supplementation) Scheme, 1951, allowances and death benefit paid under the Pneumoconiosis and Byssinosis Benefit Scheme, 1952, as amended by the Pneumoconiosis and Byssinosis Benefit Amendment Scheme, 1954, or under the Industrial Diseases (Miscellaneous) Benefit Scheme, 1954, and allowances paid under the Workmen's Compensation and Benefit (Supplementation) Act, 1956.

As the Industrial Injuries scheme in general applies to cases arising after July 4, 1948, expenditure on benefits will not reach maturity for many years.

NATIONAL ASSISTANCE

The National Assistance Act, 1948, was designed, from July 5, 1948, to substitute for certain existing services provided by the State or by local authorities a unified State service of financial assistance according to need. The service is administered by the National Assistance Board, the ultimate responsibility to Parliament resting with the Minister of Pensions and National Insurance.

Application for assistance may be made by any person aged 16 or over who is not in full-time work and is in need, including a person who needs assistance in supplementation of a pension or insurance benefit. The National Assistance Acts, 1948 and 1959, and the National Assistance (Determination of Need) Regulations, 1948, as amended, lay down how the need of an applicant shall be determined, and for this purpose how his requirements and resources shall be computed.

The scale rates for requirements other than rent, prescribed by the amending Regulations which came into operation on September 7, 1959, are as follows:

	Ordinary	Special (*a*)
	s. d.	*s. d.*
Husband and wife	85 0	107 6 (*b*)
Single householder	50 0	
Other persons:—		
Aged 21 or over	46 0	72 6
Aged 18–20	36 0	55 0
Aged 16–17	30 0	45 0
Aged 11–15	23 0	23 0
Aged 5–10	19 0	19 0
Aged under 5	16 0	16 0

(*a*) For blind and certain tuberculous persons.

(*b*) 122*s.* 6*d.* when both husband and wife are in the special classes.

The amount to be added for rent, if the applicant, or his wife or her husband, is a householder, or if the applicant is living alone, will be the net rent payable, or such a part thereof as is reasonable in the circumstances. If an applicant over the age of 18 is a member of a household but is not himself the householder, the amount to be added for rent will be a reasonable share of the rent payable by the householder, subject to a minimum addition of 2*s.* 6*d.* a week and a maximum of 15*s.* a week.

The rules for the computation of resources contain provisions for the treatment of capital and earnings and certain statutory disregards.

The amount to be paid by way of assistance is settled by the local officer of the Board; an applicant who is dissatisfied with the amount granted has a right of appeal to the local Appeal Tribunal, whose decision is final.

On July 5, 1948, national assistance had to be given to some 800,000 persons who had previously been receiving unemployment assistance (321,000), supplementary pensions (512,000), outdoor relief (200,000), blind domiciliary assistance (40,000), or tuberculosis treatment allowances (20,000). The number of weekly assistance allowances in payment rose from 1,011,000 at the end of 1948 to 1,810,000 in February, 1955. By the end of September, 1955, the number had fallen to 1,595,000, due mainly to the increase in benefit rates under the National Insurance Act, 1954. Subsequently, the number fluctuated, and during 1959 there was an increase of 117,000. At the end of 1959 the number was 1,766,000, when the needs of 2,573,000 persons were being provided for wholly or in part. At the end of 1959 about 154,000 recipients were registered at the Employment Exchange; most of the rest were old, sick or otherwise incapable of work. More than two-thirds of the allowances were paid in supplementation of insurance benefits. During 1959 the Board also made single payments amounting to £4,380,000. In addition, assistance amounting to £1,942,000 was given to meet charges raised under the National Health Service for prescriptions, spectacles, dentures and dental treatment, and surgical appliances.

The total net expenditure of the Board during 1959 was about £157,796,000, as compared with £139,120,000 in 1958 and £60,760,000 in 1948. Included in the figure for 1959 were payments of national assistance £135,800,000 and payments of non-contributory old age pensions £12,200,000.

NON-CONTRIBUTORY OLD AGE PENSIONS

The maximum non-contributory old age pension payable under the Old Age Pensions Act, 1936, to persons aged 70 and over, and under the Blind Persons Act, 1938, to blind persons aged 40 and over, was increased in October, 1946, from 10*s.* a week to 26*s.* a week for single persons of either sex and married men and 16*s.* a week for married women. Pension was payable at the maximum rate where the yearly means calculated in accordance with the provisions of the Act, did not exceed £26 5*s.* 0*d.* Where the yearly means were between £26 5*s.* 0*d.* and £89 5*s.* 0*d.* pension was payable at rates varying from 24*s.* (16*s.* for married women) to 2*s.* Where the yearly means exceeded £89 5*s.* 0*d.*, no pension was payable. As from Jan. 27, 1958, when, under the National Insurance (No. 2) Act, 1957, the issue of weekly tobacco tokens to pensioners ceased, non-contributory pensions were increased by an amount equal to the current value of the tokens, i.e., 2*s.* 4*d.*

The National Assistance Act, 1948, which charged the National Assistance Board with the administration of non-contributory old age pensions, assimilated the pensions procedure to the national assistance procedure, and the Board has power to supplement old age pensions by national assistance in case of need.

The number of pensions in payment fell from 453,000 at the end of 1948 to 205,000 at the end of 1958, and declined further to 179,000 by the end of 1959. At the latter date, pensions were supplemented by national assistance in 121,000 cases. The award of new non-contributory pensions will eventually be brought to an end by the provisions of section 74 of the National Insurance Act, 1946, under which sighted persons will not qualify unless they reach the age of 70 by October 1, 1961.

FAMILY ALLOWANCES

The Family Allowances Act, 1945, which was brought into operation from August 6, 1946, provided for a payment by the Minister of National Insurance out of moneys provided by Parliament of an allowance of 5*s.* a week for each child in a family other than the elder or eldest. From September 2, 1952, under the Family Allowances and National Insurance Act, 1952, the allowance was increased to 8*s.* From October 2, 1956, under the Family Allowances and National Insurance Act, 1956, the allowance for the third and each younger child was increased to 10*s.* The allowance is payable (through the Post Office) while a child is of school age or, if handicapped, under 16, and up to the age of eighteen years if he or she is undergoing full-time instruction in a school or is an apprentice. Claim forms for allowances can be obtained at any post office or local Pensions and National Insurance Office. Claims are decided by the National Insurance adjudication authorities.

At the end of January 1959, about 5,436,000 allowances were in payment for nearly 3½ million families. It is estimated that in 1958 £124 million was paid in allowances (excluding administrative expenses), as compared with £63 million in 1951 and £122 million in 1957.

COMBINED WEEKLY CONTRIBUTIONS

Contributions to National Insurance, the National Health Service and, in the case of employed persons, Industrial Injuries Insurance are paid by means of stamps on a single insurance card.

	Employed Person	Employer*	Total	Self-employed Person	Non-employed Person
	s. d.	*s. d.*	*s. d.*	*s. d.*	*s. d.*
Men 18 and over	9 11	8 3	18 2	12 0	9 7
Women 18 and over	8 0	6 9	14 9	10 0	7 7
Boys under 18	5 5	4 11	10 4	6 9	5 5
Girls under 18	4 8	4 0	8 8	5 11	4 6

* The special rates of contribution payable by employers for certain employed married women, widows and people over pension age are:—Women: 18 or over, 7*s.* 2*d.* (5*d.*); under 18, 4*s.* 3*d.* (3*d.*); Men, 8*s.* 11*d.* (8*d.*). The amount in brackets is the employee's share. Full details are given in Leaflet N.I. 103, available at all Pensions and National Insurance Offices.

Distribution of Combined Weekly Contributions

	Employed Person				Employer			
	Men	Women	Boys	Girls	Men	Women	Boys	Girls

THE NEW GRADUATED PENSION SCHEME (see pp. 1125–26)

During the period from April, 1961, until April, 1965, the minimum and maximum rates of weekly contribution to National Insurance, the National Health Service and Industrial Injuries Insurance for employed adults who are not contracted out of the Graduated Pension Scheme will be as follows:

	Employed Person		Employer		Total	
	Men	Women	Men	Women	Men	Women
	s. d.	*s. d.*	*s. d.*	*s. d.*	*s. d.*	*s. d.*
Weekly Earnings £9 or less	8 4	7 2	7 0	6 4	15 4	13 6
£15 or more	13 5	12 3	12 1	11 5	25 6	23 8

Under the new Scheme the minimum contributions will be paid by means of a combined weekly stamp. The graduated contributions will be collected in association with P.A.Y.E. income tax. Fuller details are given in Leaflet N.I. 111, available at Pensions and National Insurance Offices.

NATIONAL HEALTH SERVICE

The National Health Service was inaugurated on July 5, 1948, by the Minister of Health under the *National Health Service Act*, 1946, "to promote the establishment in England and Wales of a comprehensive Health Service designed to secure improvement in the mental and physical health of the people of England and Wales and the prevention, diagnosis and treatment of illness." There are separate Acts for Scotland and Northern Ireland, where the Health Services are run on very similar lines.

The National Health Service is available to everybody in the country and is a charge on the National Income. Everyone is entitled to use any complete part or all of the services and no Insurance qualification is necessary. The cost of the Service is met by the National Exchequer, by contributions collected by the Ministry of Pensions and National Insurance together with National Insurance contributions (*see* p. 1130) and by charges for the Service. About half the expenses of the local health services fall on local rates.

Under the 1946 Act, the only charges falling on the patient for any of the services were in certain cases for the renewal or repair of glasses or for the replacement of dentures; for domestic help, for bedding or nursery requisites, etc. required at home, extra food at home, blankets, etc.; and for accommodation and treatment in private wards in hospitals. It was open to anyone, if they wished, in certain cases to pay the extra cost of more expensive glasses, more expensive dental treatment than is clinically necessary, and artificial limbs. In May, 1951, and May, 1952, charges were introduced for certain items in the National Health Service.

The *National Health Service* (*Amendment*) *Act*, 1949, had empowered the Minister *inter alia* to introduce a charge for prescriptions; a charge of 1*s.* for each prescription form was introduced on June 1, 1952, and this was increased to a charge of 1*s.* for each item on a prescription form on December 1, 1956. The *National Health Service Act*, 1951, authorized the making of charges to meet part of the cost of dentures and spectacles supplied through the Service. These charges came into force on May 21, 1951. The *National Health Service Act*, 1952, authorized the making of charges for medicines and certain appliances supplied to hospital out-patients, for dental treatment (excluding examination) provided under the General Dental Services and for day-nurseries run by local health authorities. These charges were effective from June 1, 1952. *Patients who are unable without hardship to meet charges under these Acts may apply to the National Assistance Board and there are also some exemptions from charges made to out-patients and for dental treatment.*

THE HEALTH SERVICES

Family Doctor Service

The Family Doctor Service is organized by 138 Executive Councils which also organize the Dental, Pharmaceutical and Supplementary Eye Services for their areas. There is an Executive Council for each County and County Borough area, but in some cases one Council coyers two areas. Members, who serve voluntarily, are appointed by local doctors, dentists and pharmacists (12), the Local Health Authority (8) and the Minister of Health (5). Any doctor may take part in the Family Doctor Scheme, provided the area in which he wishes to practise has not already an adequate number of doctors, and about 20,000 out of some 21,000 general practitioners do so. They may at the same time have private fee-paying patients. Health Service doctors are paid on a capitation basis, *i.e.* an annual fee in respect of each patient accepted.

Everyone aged 16 or over can choose his doctor (parents or guardians choose for children under 16) and the doctor is also free to accept a person or not as he chooses. A person may change his doctor if he wishes, either at once if he has changed his address or obtained permission of the doctor on whose list he is, or by informing the local Executive Council (in which case a delay of about 14 days is usual). When people are away from home they can still use the Family Doctor Service if they ask to be treated as "temporary residents," and in an emergency, if a person's own doctor is not available, any doctor in the service will give treatment and advice.

Patients are treated either in the doctor's surgery or when necessary, at home. Doctors may prescribe for their patients all drugs and medicines which are medically necessary for their treatment and also a certain number of surgical appliances (the more elaborate being provided through the hospitals).

Drugs, Medicines and Appliances.—The number of chemists (including drug stores and appliance suppliers) in England and Wales, within the National Health Service at December 31, 1959, was 15,843. 214,029,087 prescriptions were dispensed in 1959. Since December 1, 1956, there has been a charge of 1*s.* in respect of each item on a prescription form made out by the family doctor and presented for dispensing. The only exception is where the doctor prescribes elastic hosiery, in which case the patient pays 5*s.* or 10*s.* on each article. In those country areas where the doctor does his own dispensing, the charge is paid to the doctor.

Dental Service

Dentists, like doctors, may take part in the Service and may also have private patients. About 10,400 of the dentists available for general practice have joined the National Health Service. They are responsible to the Executive Councils in whose areas they provide services.

Patients are free to go to any dentist taking part in the Service and willing to accept them, and do not require to register with any particular dentist. Dentists receive payment for items of treatment for individual patients, instead of the capitation fee received by doctors. There is no need for the patient to obtain a recommendation before seeking dental treatment. The dentist is able to carry out at once all normal conservative treatment (*e.g.* fillings), emergency treatment and ordinary denture repairs; he seeks prior approval from the Dental Estimates Board before undertaking treatment when it involves the removal of teeth necessitating replacement by denture; provision of dentures; extensive and prolonged treatment of the gums; inlays; crowns; special appliances and oral surgery and certain other items.

A dentist may, with the approval of the Dental Estimates Board, charge his patient a prescribed sum for such types of treatment as crowns, inlays or metal dentures where these are not clinically necessary, if the patient wishes to have them. Where a denture supplied under the Service has to be replaced because of loss or damage the whole or part of the cost may be charged to the patient if he has been careless. In May, 1951, charges were introduced for dentures whereby the patient has to pay £1 to £2 10*s.* for the supply of one denture or up to £4 5*s.* for a set. In June, 1952, a charge of £1, or the full cost of any treatment if less than £1, was introduced. No charge is made for the clinical examination of a patient's mouth. Charges for dental treatment (other than the usual charges for dentures) are not made in the case of anyone under 21 years of age or expectant mothers or mothers who have had a child during the preceding twelve months.

Supplementary Ophthalmic Service

Supplementary Ophthalmic Services which are run by the Executive Councils, form part of the Eye Services available under the National Health Service, and provide for the testing of sight and supply of glasses only. Any ophthalmic medical practitioner or ophthalmic optician who has joined the Service may be consulted. The first time a person uses the Service he must obtain a recommendation from his doctor that his sight needs testing. After this he can use the Service direct without first obtaining a note from his doctor.

Until 1951 there were no charges under the Supplementary Ophthalmic Service except, in certain cases, for the renewal or repair of glasses or where the patient chose a more expensive spectacle frame than one of the standard frames available free, or asked to be supplied with special lenses where only flat lenses were necessary. In May, 1951, charges to patients of 10s. for each lens, plus the actual cost of the frames, were introduced. Children's glasses in the standard type of children's frame remain free of charge.

Hospitals and Specialists

On July 5, 1948, ownership of 2,688 out of 3,040 voluntary and municipal hospitals in England and Wales was vested in the Minister of Health. The remaining hospitals were disclaimed; many were run by religious orders. The hospital service, of which the specialist and consultant facilities are a part, includes general and special hospitals; maternity accommodation; tuberculosis sanatoria; infectious diseases units; provision for chronic sick; mental hospitals and mental deficiency institutions; accommodation for convalescent hospital treatment and medical rehabilitation, and all forms of specialized treatments—for example, plastic surgery, cancer, orthopædic and ear, nose and throat treatment, together with the provision of most surgical and medical appliances.

In the main, this part of the Service is organized by 15 Regional Hospital Boards (*see* p. 381); in 14 of these regions there is a University having a teaching hospital or medical school. In March, 1960, hospitals were administered on behalf of the Boards by 381 Hospital Management Committees. The only hospitals in the Service outside the Regional Boards' immediate responsibility are the teaching hospitals which provide facilities for undergraduate and post-graduate medical or dental education and which are administered by Boards of Governors. There are 26 Boards of Governors in London and 10 in the rest of the country.

Specialists and consultants who take part in the Service (and nearly all of them are doing so) hold hospital appointments. They can take up whole-time or part-time service and those who have part-time appointments can still accept fee-paying patients outside the Service.

Certain hospitals have accommodation in small wards or single rooms which, if not required for patients who need privacy for medical reasons, may be made available to patients who desire it as an amenity. Amenity bed charges are fixed under Regulations and are at present 6s. or 12s. per day. In such a case the patient pays nothing for the cost of treatment or the normal cost of maintenance. In some hospitals a number of pay-beds has been placed at the disposal of part-time specialists taking part in the Service for use by private patients who agree to pay full hospital maintenance costs, and (usually) private fees to the specialist as well. The fees that may be charged by specialists to patients occupying private pay-beds are normally restricted to 75 guineas to cover everything. For exceptionally long or complicated treatment this limit may be raised to 125 guineas and special arrangements may be made in a limited proportion of pay-beds for patient and doctor to agree to fees outside these limits.

Arrangements to obtain the service or advice of a hospital specialist are made by the patient's family doctor as in the past. A specialist usually sees a patient at the hospital or clinic at which he works, but arrangements will be made for the specialist to visit the patient at home if he is unable, for medical reasons, to be taken to hospital. No charges are made to National Health Service in-patients (except for amenity beds as above), but since December 1, 1956, a charge of 1s. has been made to out-patients for each item on a prescription form for drugs and medicines (unless administered at hospitals). Exemptions from this charge are made in the case of patients receiving National Assistance or their dependants; war pensioners receiving medicines for their accepted disability; and patients attending V.D. clinics who receive medicines as part of their treatment. Also since June, 1952, hospital out-patients have to pay fixed charges for elastic hosiery, surgical abdominal supports, surgical footwear (and heeling and soling repairs), dentures, glasses and wigs. Exceptions are made in the case of a child under 16 years of age or at full-time attendance at school, to National Assistance recipients and their dependants and to war pensioners in respect of their accepted war disabilities.

In June, 1960, there were 76 hospitals providing distribution centres where hearing aids can be obtained after recommendation by a specialist.

Local Health Authority Services

The Local Health Services, mainly concerned with the care of patients in their own homes, are the responsibility of the major local authorities—County Councils and County Borough Councils. There are 146 Local Health Authorities in England and Wales.

Local Health Services provide such services as midwifery; ante-natal, post-natal and infant welfare clinics, and dental services where practicable for expectant and nursing mothers and young children; health visiting; home nursing; ambulances; provision of domestic help on health grounds; special care and after-care of the sick; local mental health services; and also vaccination and immunization. It will also fall to the Local Health Authorities to develop Health Centres.

All these services are free of charge except for domestic help and, in certain cases, provision of residential accommodation, meals, nursing requisites, bedding, etc., for which a charge may be made according to means. Since June, 1952, Local Health Authorities have also had power to make charges for the use of day nurseries. The Local Health Authorities may only charge what is reasonable, having regard to the means of the users.

Cost of the Service

	England and Wales	Scotland	Northern Ireland
	£	£	£
1948–49†..	179,281,787	22,360,725	5,660,000

† July 5—March 31. * Estimated.

Legal Notes

ADOPTION OF CHILDREN

In England and Wales the adoption of children is regulated mainly by the Adoption of Children Acts, 1926 to 1949, and the Adoption Act, 1958. An order of court is necessary to legalize the adoption. Adoption puts the child adopted practically on the same footing as a child born to the adopter in lawful wedlock, in all matters of custody, education and maintenance; further, it is provided by the Act of 1958 that an adopted child shall be treated as the child of the adopter (and not the child of its natural parents) for the purpose of the devolution of property on an intestacy occurring, or under any disposition made, after the date of the adoption order. Applications are made to the High Court (Chancery), County Court, or Magistrates Court. Orders will not usually be made for a man to be *sole* adopter of a girl, and the applicant must be either:—

(*a*) Twenty-five years of age or over; or
(*b*) Twenty-one years of age or over and a relative (as defined in the Act of 1958) of the infant; or
(*c*) the mother or father of the infant.

Two spouses may jointly adopt an infant, but unless one of them is the mother or father of the infant, condition (*a*) or (*b*) above must be satisfied in respect of one of the applicants *and* the other spouse must have attained the age of twenty-one.

The consent of the child's parents or guardian is required before an adoption order will be made, but in certain circumstances (e.g., where the parent or guardian has ill-treated or neglected the child) the Court may dispense with this consent. Since the 1949 Act, marriage between the adopter and the adoptee is prohibited, but marriages of that kind, solemnized before the passing of the Act, are not thereby invalidated.

The 1958 Act places restrictions on societies which make arrangements for the adoption of children.

Scotland.—The Adoption of Children (Scotland) Acts, 1930 to 1949, and the Adoption Act, 1958, cover the law relating to the adoption of children in Scotland, where an Adopted Children Register is maintained. Applications are made to the Court of Session, or the Sheriff Court within whose jurisdiction either the applicant or the child resides at the date of application. The Adoption Act, 1958, which is a consolidating Act, also applies, with modifications, to Scotland. Owing to divergence of the laws of England and Scotland there is not, however, complete uniformity in this branch of the law in both countries. Thus, in regard to property rights, an adopted child in Scotland remains a member of the family of his actual parents, and an adoption order does not deprive him of any legal rights competent to him in the estate of his parents, nor are any rights conferred on him as the child of the adopter.

All adoptions in Great Britain are registered in the Registers of Adopted Children kept by the Registrars General in London and Edinburgh respectively. Certificates from these registers, including short certificates which contain no reference to adoptions, can be obtained on conditions similar to those relating to birth certificates. (See below.)

BIRTHS (REGISTRATION)

When a birth takes place, personal information of it must be given to the Registrar of Births and Deaths for the sub-district in which the birth occurred, and the register signed in his presence, by one of the following persons:—
1. The father or mother of the child. If they fail; 2. the occupier of the house in which the birth happened; 3. a person present at the birth; or, 4. the person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. The mother is responsible for the registration of the birth of an illegitimate child. The registration is required to be made within 42 days (*Scotland* 21 days) of the birth. Failure to do this, without reasonable cause, involves liability to a penalty of forty shillings (in Scotland the penalty is £1). The registration of a birth will be free when it takes place within 42 days (in *Scotland* 21 days). In England or Wales, the informant, instead of attending before the registrar of the sub-district where the birth occurred, may make a declaration of the particulars required to be registered in the presence of any registrar. The fee payable for this is 3*s.* 0*d.* There are special provisions relating to late registration. Under the Public Health Act, 1936, and the Public Health (London) Act, 1936, notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. *This is in addition to the registration already mentioned.*

A "Stillbirth" must be registered and a certificate signed by the doctor or midwife who was present at the birth or has examined the body of the child must be produced to the registrar.

The re-registration of the birth of a person legitimated by the subsequent marriage of the parents is provided for in the Births and Deaths Registration Act, 1953. In *Scotland* re-registration of a child legitimated *per subsequens matrimonium* or whose birth entry is affected by a Decree of Court respecting status or paternity is provided for by the Registration of Births, etc. (Scotland), Amendment Act, 1934.

Birth at Sea: The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth Abroad: Consular Officers are authorized to register births of British subjects occurring abroad. Certificates are procurable in due course at Registrar General's office, London.

The registration of births occurring out of the United Kingdom among members of the armed forces, or occurring on board H.M. ships and aircraft, is provided for by the Registration of Births, Deaths and Marriages (Special Provisions) Act 1957, applicable also to Scotland.

CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS

England and Wales.—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 5*s.* 3*d.*, viz., 1*s.* 6*d.* for search, and 3*s.* 9*d.* for the certificate. (When application is made by post the charges are 7*s.* 6*d.*) They can also be obtained from the Superintendent Registrar having the legal custody of the register containing the entry of which a certificate is required. Certificates of marriages can also be obtained from the incumbent of the church in which the marriage took place (the customary fee being 3*s.* 9*d.*); or from the Nonconformist minister (or other "authorized person") where the marriage takes place in a registered building (See *post* under Marriage).

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament, and under Births and Deaths Registration Act, 1953, a modified form of birth certificate, showing the names, sex and date of birth and certain other particulars, but not the parentage, may be obtained from the Registrar General, or the appropriate Superintendent Registrar or Registrar, on payment of a fee of 9*d*. (inclusive of search) and on furnishing certain particulars.

English Registers.—Records of births, deaths and marriages registered in England and Wales since 1837 are kept at the General Register Office, Somerset House. *The Society of Genealogists*, 37 Harrington Gardens, S.W.7, possesses many records of Baptisms, Marriages and Deaths prior to 1837, including copies, in whole or in part, of about 4,000 Parish Registers.

Scottish Registers of Births, Deaths and Marriages.—Certificates of births, deaths or marriages registered from 1855 when compulsory registration commenced in Scotland can be obtained at the General Registry Office, New Register House, Edinburgh, or from the appropriate local Registrar, on payment of the fee of 5*s*. 3*d*., viz.:—1*s*. 6*d*. for search and 3*s*. 9*d*. for the certificate. Certificates are issued at reduced rates for specified purposes as in England & Wales and similar provision exists for abbreviated birth certificates (fee 9*d*.).

There are also available at the General Registry Office old parish registers of date prior to 1855, which were formerly kept under the administration of the Established Church of Scotland. An extract of an entry in these registers may be obtained at the fee of 5*s*. 3*d*. A fee of 20*s*. is payable for a general search of all the Scottish registers.

BRITISH NATIONALITY AND CITIZENSHIP OF THE UNITED KINGDOM AND COLONIES

General.—The law as to British Nationality is now to be found mainly in the British Nationality Act, 1948, which came into force on Jan. 1, 1949. The Act introduces a new term, "citizenship." Every person who under the Act is a citizen of the United Kingdom and Colonies, or any citizen (by virtue of legislation in that country) of Canada, Australia, New Zealand, India, Pakistan, Ghana or the Federation of Malaya (hereafter referred to as "the Dominions") has by virtue of that citizenship the status of a British subject, and may be known either as a British Subject or as a Commonwealth citizen. Under s. 2 of the Newfoundland (Consequential Provisions) Act, 1950, potential citizens of Newfoundland under the British Nationality Act, 1948, are deemed to have been potential citizens of Canada.

Nationality *before* Jan. 1, 1949, was determined mainly by the British Nationality and Status of Alien Acts, 1914–1943, though these Acts did not affect the status of any person born *before* Jan. 1, 1915.

Retention of nationality by persons born in or who are citizens of Eire (now by virtue of the Ireland Act, 1949, styled the Republic of Ireland).

By the Ireland Act, 1949, a person who was born before Dec. 6, 1922, in what is now the Republic of Ireland (Eire) and was a British subject immediately before Jan. 1, 1949, is not deemed to have ceased to be a British subject unless either (i) he was domiciled in the Irish Free State on Dec. 6, 1922, or (ii) was on or after April 10, 1935, and before Jan. 1, 1949, permanently resident there, or (iii) had before Jan. 1, 1949, been registered as a citizen of Eire under the laws of that country.

In addition by the British Nationality Act, 1948, any citizen of Eire who immediately before Jan. 1, 1949, was also a British subject can retain that status by submitting at any time a claim to the Home Secretary on any of the following grounds: (*a*) he has been in the service of the United Kingdom government; (*b*) he holds a British passport issued in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory; (*c*) he has associations by way of descent, residence or otherwise with any such place; or on complying with similar legislation in any of the "Dominions."

Citizenship of the United Kingdom and Colonies.

In the majority of cases, a person who is a British subject becomes also a "citizen," either of one of the "Dominions" by virtue of legislation in that country, or of the United Kingdom and Colonies under the 1948 Act. In the latter case, citizenship is acquired by:—

1. *Birth* on or after Jan. 1, 1949, in the United Kingdom and Colonies (which term does not include the "Dominions"), except

(*a*) children born to non-citizen fathers enjoying diplomatic immunity from suit or legal process;

(*b*) children born to fathers who are enemy aliens in enemy occupied territory.

2. *Descent*, if the father was a citizen by *birth*. If the father was a citizen by *descent* only, the child acquires citizenship by descent if either:—

(*a*) the child is or his father was born in a protectorate, protected state, mandated territory or trust territory, or in a foreign country where Her Majesty then had jurisdiction over British subjects; or

(*b*) the birth (occurring elsewhere than (*a*)) is registered at a United Kingdom consulate within one year; or

(*c*) the father is at the time of birth in the service of the Crown under Her Majesty's United Kingdom government; or

(*d*) the child is born in one of the "Dominions" in which a citizenship law has then taken effect and does not become a citizen thereof by birth.

3. *Registration* by the Home Secretary upon application by:—

(*a*) a citizen of one of the "Dominions" or of the Republic of Ireland who can show either that he is ordinarily resident in the United Kingdom and has been so resident for a period of twelve months, or is in Crown service under the United Kingdom government, or, in certain circumstances, if he is serving under an international organization of which the United Kingdom Government is a member, or is in the employment of a body established in the United Kingdom;

(*b*) a woman married to a United Kingdom, etc, citizen. If she is a British protected person or an alien she must take an oath of allegiance. (A woman who marries on or after Jan. 1, 1949, does not by virtue of that marriage acquire citizenship.)

A minor child of a citizen can be registered upon application being made by his parent or guardian.

4. *Naturalization.*—In order to be eligible for a certificate of naturalization an alien must:—

(*a*) during the eight years preceding his application have resided for not less than five years (of which not less than one year immediately preceding the application

must have been spent in the United Kingdom) in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory, or have been for five years in the service of the Crown; and

(*b*) be of good character and have a sufficient knowledge of the English language; and

(*c*) intend to reside in the United Kingdom or any colony, etc., or to enter or continue in the service of the Crown or in the service of certain organizations.

A British protected person who satisfies (*b*) and (*c*) above can apply for naturalization if he can show either that he has resided in the United Kingdom for the twelve months (or such shorter period as the Home Secretary may allow) immediately preceding his application, or that he is in the service of the Crown under Her Majesty's United Kingdom Government.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application which may be obtained from H.M. Stationery Office.

5. *Incorporation of Territory* when citizenship is granted to such persons as are specified by Order in Council.

6. *Transitional Provisions*, which confer citizenship on a person who was a British subject immediately before Jan. 1, 1949, if either:—

(i) (*a*) he would, if born after that date, have qualified for citizenship by birth; or
(*b*) he is a person naturalized in the United Kingdom and Colonies; or
(*c*) he became a British subject by reason of annexation of territory which on Jan. 1, 1949, was included in the United Kingdom and Colonies; or

(ii) at the time of his birth his father was a British subject and possessed any of the above qualifications; or

(iii) he was born within territory comprised on Jan. 1, 1949, in a protectorate, protected state or United Kingdom trust territory; or

(iv) he was not on that date a citizen or potential citizen of one of the "Dominions"; or

(v) being a woman, had before Jan. 1, 1949, been married to a man who becomes, or would but for his death have become, a citizen.

A British subject who is merely a potential citizen of one of the "Dominions" continues as a British subject without citizenship until he becomes a citizen of such "Dominion" or of the Republic of Ireland, or an alien. If none of these has happened at the date when a citizenship law is passed in the country of which he is potentially a citizen, he becomes a citizen by descent of the United Kingdom and Colonies.

A woman who lost British nationality by reason of marriage to an alien regained it on Jan. 1, 1949.

By the Adoption Act, 1958, an adopted child becomes a citizen of the United Kingdom and Colonies as from the date of the adoption order if the adopter or, in the case of a joint adoption, the male adopter, is a citizen of the United Kingdom and Colonies.

Citizenship of the United Kingdom and Colonies can be lost:—

(i) by declaration in the prescribed manner by a person who is also a citizen of a "Dominion" or of the Republic of Ireland or a national of a foreign country. The Home Secretary can withhold registration of the declaration in time of war;

(ii) where the Home Secretary is satisfied that citizenship by registration or naturalization was obtained by fraud, false representation, etc.;

(iii) by the Home Secretary depriving a *naturalized* person of citizenship if such person has:—
(*a*) shown himself by act or speech to be disloyal or disaffected towards Her Majesty; or
(*b*) in time of war, traded with the enemy; or
(*c*) within five years after becoming naturalized, been sentenced in any country to a term of twelve months imprisonment; or
(*d*) continuously resided in foreign countries for seven years, and during that period has neither at any time been in the service of the Crown or of certain international organizations, nor registered annually at a United Kingdom consulate his intention to retain citizenship;
and the Home Secretary is satisfied that it is not conducive to the public good that such person should retain his citizenship;

(iv) where a naturalized person is deprived of citizenship of a "Dominion" or of the Republic of Ireland, the Home Secretary can also deprive him of citizenship of the United Kingdom and Colonies.

(v) Under sect. 2 of the British Nationality Act, 1958, which contains special provisions with regard to citizens of Ghana.

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but he may not hold public office, exercise the franchise or own a British ship or aircraft. The Republic of Ireland Act, 1949, declares that the Republic, though not part of H.M. Dominions, is not a foreign country, and any reference in an Act of Parliament to foreigners, aliens, foreign countries, etc., shall be construed accordingly.

CROWN—PROCEEDINGS AGAINST

Before 1947 proceedings against the Crown were generally possible only by a procedure known as a petition of right, which placed the litigant at a considerable disadvantage and which was not normally available at all in cases of tort (i.e., civil wrongs other than breach of contract). Thus, no proceedings would normally lie against the Government if a subject were injured by the negligent driving of a Government vehicle (although the driver could be sued) or if a Government employee were injured by the defective condition of the Crown premises on which he worked. Now, however, by the Crown Proceedings Act, 1947, which came into operation on Jan. 1, 1948, the Crown, in its public capacity, is largely placed in the same position as a subject, although some procedural disadvantages remain. Among exceptions to the Act are the following: (*a*) No action lies in tort against the Crown or *the individual Crown servant* for anything done or omitted to be done in relation to any postal packet or telephone communication, except for loss or a registered in and postal packet (in which case the action must be brought within one year of posting), not being a telegram. (*b*) The Crown *and any member of the armed forces* are immune from liability in tort in respect of death of, or

personal injury to, another member of the armed forces on duty, provided that the death or injury is attributable to service for purposes of pension.

Scotland.—The Act extends to Scotland and has the effect of bringing the practice of the two countries as closely together as the different legal systems will permit. While formerly actions against the Crown, when permissible, were confined to the Court of Session, proceedings may now be brought in the Sheriff Court. The Lord Advocate is the proper defender in proceedings against the Crown.

The Act lays down that arrestment of money in the hands of the Crown or of a Government Department is competent in any case where arrestment in the hands of a subject would have been competent, but an exception is made in respect of Post Office Savings Bank deposits. On the other hand, the former rule that the wages and salaries of the servants of the Crown are not arrestable remains unaltered.

DEATHS, BURIAL AND CREMATION

DEATHS

(For Certificates, *see* under BIRTHS)

In England and Wales.—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the disposal of the body. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar. If the deceased was attended during his last illness by a registered medical practitioner, a certificate of cause of death must be sent by the doctor to the registrar. The doctor must give to the informant of the death a written notice of the signing of the certificate, which must be delivered to the registrar. It is essential that a certificate for disposal should be obtained from the registrar before the funeral and delivered to the clergyman or other person in charge of the churchyard or cemetery. No fee is chargeable for this certificate. If the death is not registered within five days (or fourteen days if written notice of the occurrence of the death is sent to him) the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods. After twelve months no death can be registered without the Registrar General's consent and on payment of fees amounting to fifteen shillings.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered or received notice of the death, or (2) until the Coroner has made a disposal order (*Births and Deaths Registration Act*, 1926, s. 1).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib.* s. 3).

"Still-born" child. (*See* under Births (Registration), p. 1133.)

Death at Sea.—The master of a British ship must record any death on board and send particulars to the Registrar General of Shipping.

Death Abroad.—Consular Officers are authorized to register deaths of British subjects occurring abroad. Certificates are procurable at the Registrar General's Office, London. If the deceased was of *Scottish* domicile, particulars are sent to the Registrar General for Scotland.

With regard to the registration of deaths of members of the armed forces, and deaths occurring on H.M. ships and aircraft, see the Registration of Births, etc. Act, 1957.

In *Scotland*, the rules of registration are similar, but (1) the death must be registered within 8 days, failure to do so involving a penalty of from £1 to £2; (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, &c. (Scotland) Act, 1854, within 7 days; (3) the informant of a death receives from the Registrar a certificate that the death has been registered. This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases. The Registration of Births, etc., Act, 1957, applies without modification to Scotland.

BURIAL

The duty of burial is incumbent on the deceased person's Executors (if any appointed); it is also a recognized obligation of the husband of a woman, and the parent of a child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should immediately be taken to ascertain the deceased's wishes from the above sources. If the wishes are considered objectionable, they are not necessarily enforceable: legal advice should be taken. A person may legally leave directions for the anatomical examination of his body. As to the place of burial—unless closed by Order in Council—the parish churchyard is the normal burying place for parishioners, or any person dying in the Parish, but nowadays this will apply only in villages and the smaller towns. In populous districts cemeteries and crematoria have been established either by the local council, or a private company, and burials will take place there in accordance with the regulations. For an exclusive right to a burial space in the churchyard a faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by the local authority. As to the necessity for obtaining a registrar's certificate or authority from the Coroner for disposal, *see* above.

CREMATION

Under the Cremation Acts, 1902 and 1952, regulations are made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards.

If Cremation is desired it is advisable for instructions to be left in writing to that effect. Cremation may not take place if deceased has prohibited that form of disposal.

To arrange for Cremation the Executor or near relative should instruct the undertaker to that effect and obtain from him the Statutory Forms required as given in the Cremation Regulations issued in 1930 (Statutory Rules and Orders, 1930, No. 1016).

DIVORCE, ETC.

Preliminary.—Matrimonial Suits may be conveniently divided into three classes, viz. (1) those

in which a declaration that there has never been a marriage is sought; (2) those in which the duties arising from marriage are sought to be upheld; and (3) those in which, the marriage being admitted, it is sought to end the marriage or the duties arising from it.

(1) *Nullity of Marriage.*—Marriage is void *ab initio* if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no sufficient consent on the part of one or both of the parties, if one of the parties was insane, or if one of the parties was under the age of consent, *i.e.*, 16 —Marriage Act, 1949. Where the *formalities* of the marriage were defective, the marriage is generally void if *both* parties knew of the defect (*e.g.*, where marriage took place otherwise than in an authorized building). But absence of the consent of parents or guardians (or of the Court or other authority, in lieu thereof) in the case of minors does not invalidate the marriage. Inability to consummate a marriage may also be a ground for a nullity decree; but in this case, the marriage is only voidable and remains valid until the decree is made.

Under the Matrimonial Causes Act, 1950, which does not apply to Scotland, a marriage is also voidable (*i.e.*, a decree of nullity may be obtained) on the following grounds—(*a*) respondent's wilful refusal to consummate the marriage; (*b*) that either party at the time of marriage was mentally defective or subject to recurrent fits of insanity or epilepsy; (*c*) that at the time of marriage the respondent was suffering from communicable venereal disease; (*d*) that at the time of the marriage the respondent was pregnant by another man. In cases, (*b*), (*c*) and (*d*), the petitioner must have been ignorant of the grounds at the date of the marriage and must not have agreed to intercourse taking place since discovering the grounds, and proceedings must be instituted within a year of the marriage.

By the Matrimonial Causes Act, 1950, and, as to Scotland, by the Law Reform (Miscellaneous Provisions) Act, 1949, it is provided that a decree of nullity in respect of a voidable marriage shall not operate so as to bastardize any child, who would have been the legitimate child of the parties to the marriage if the marriage had been dissolved instead of annulled.

A spouse's insistence upon the use of contraceptives will not constitute wilful refusal to consummate within (*a*) above, even though there has been no normal intercourse, but it may in certain circumstances enable a petition for *Divorce* to be brought on the grounds of cruelty (as to which see below). Further it has been allowed as a *defence* to a charge of desertion against the aggrieved party.

In one High Court case the judge held that a husband's insistence on the practice of *coitus interruptus* amounted to wilful refusal to consummate the marriage, where there had been no other intercourse. In other High Court cases the judges have disagreed with this view, but held that, in the circumstances of the particular cases, a divorce could be granted on the ground of legal cruelty.

(2) *Restitution of Conjugal Rights.*—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights is a ground for obtaining judicial separation.

(3) *Judicial Separation and Divorce.*—The third class of suit includes a suit for judicial separation (which does not dissolve a marriage) and a suit for divorce (which, if successful, dissolves the marriage altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the same grounds as those for divorce and also on the ground specified in (2) above.

Divorce.—Complete divorce is now obtainable by either husband or wife upon any one of the following grounds: adultery of respondent since marriage; desertion by respondent for 3 years immediately before petition; cruelty to petitioner; incurable insanity (under certain conditions); and by the wife, also on commission by the husband of certain criminal sexual offences. Matrimonial Causes Act, 1950, s. 2.

The foregoing is subject to a clause prohibiting any petition for divorce (but not for judicial separation) before the lapse of three years from the date of marriage, except in the case of exceptional hardship (upon petitioner) or of exceptional depravity of respondent.

Cruelty, in a legal sense, is conduct of such a character as to have caused injury or a reasonable apprehension of injury to life, limb, or health (bodily or mental). A course of conduct calculated to break the spirit of the sufferer, continued until health breaks down or is likely to break down under the strain, constitutes legal cruelty.

Desertion may be defined as a voluntary withdrawal from cohabitation by one spouse without just cause and against the wishes of the other. Where one spouse is guilty of conduct of a serious nature which forces the other to leave, the party at fault is said to be guilty of constructive desertion.

If, upon disputes arising, the parties *agree* to live apart, then in general neither can be said to have deserted the other.

When the decree will be refused—A decree *must* be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. (There is no such thing in the Divorce Court as judgment against the respondent by default.) Other *absolute* bars to relief are (i) connivance at the *adultery* of the respondent; (ii) collusion, as where the initiation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion); (iii) condonation of the respondent's *adultery or cruelty*, *i.e.*, complete forgiveness which restores the *status quo* (although the offence may be revived by later misconduct). There are also certain *discretionary* bars, as *e.g.*, where the petitioner has been guilty of adultery; of unreasonable delay; of cruelty; or of wilful neglect or misconduct conducing to the adultery, insanity, or desertion alleged. (1950 Act, s. 4.)

Intervention by Queen's Proctor.—At any time during the progress of a suit, and before the decree *nisi* is made absolute, the Queen's Proctor may intervene.

Decree Absolute.—Every decree of dissolution or nullity is in the first instance a decree *nisi*. The marriage subsists until the decree is made absolute, usually three months after decree *nisi*. After that date either spouse may marry again; but as to marriage within "Prohibited Degrees" see Marriage—Miscellaneous Notes, pp. 1145–7. By the Matrimonial Proceedings (Children) Act, 1958 a decree *nisi* cannot be made absolute until the Court is satisfied that arrangements have been made for the care and upbringing of every child of the family who has not attained the age of sixteen which are satisfactory or the best which can be devised in the circumstances or that it is impracticable for the parties before the Court to make any such arrangements.

Maintenance, etc.—The Court has wide powers to make orders as to maintenance or alimony (usually payable to an innocent wife), and as to costs. The husband can be ordered to pay his wife's costs, even if she is unsuccessful in her suit or defence. A guilty

co-respondent may be ordered to pay costs and damages.

By the Matrimonial Causes Act, 1950, the High Court in England may, where the husband has wilfully neglected to provide reasonable maintenance for the wife or children, order the husband to make provision for them, *even though* no matrimonial suit is pending between the parties to the marriage, and while such an order is in force the Court may also deal with custody of and access to the children.

CUSTODY OF CHILDREN

In suits for nullity, divorce or judicial separation, whether the suit succeeds or is dismissed, the Court can make orders as to the custody of and access to the children and as to their upkeep and education, and these orders can be made not only in respect of children of the marriage but also in respect of a child of one party who has been accepted as one of the family by the other party. A guilty spouse will normally be entitled to reasonable access to the children and may even be awarded the custody if the Court thinks fit. The paramount consideration is always the welfare of the child.

A spouse who has been deprived of the custody of a child will not thereby be deprived of his other rights as the child's *guardian* unless the Court expressly so orders.

SEPARATION BY AGREEMENT

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. It is most desirable to consult a solicitor in every such case.

MAGISTRATE'S SEPARATION AND MAINTENANCE ORDERS

When a husband has been guilty of adultery or of certain assaults or has deserted his wife, or has been guilty of persistent cruelty to her or to an infant child of the family, or of wilful neglect to maintain her or such a child, or where he is an habitual drunkard or drug addict, or insists on having intercourse while suffering from a venereal disease, or compels her to submit herself to prostitution, the wife may obtain relief from the local magistrates' court. A husband may apply on similar grounds, so far as they are applicable to him. The Court may declare that the complainant is no longer bound to cohabit with the defendant. It may order the husband to pay a weekly sum not exceeding £7 10*s.* to the wife and may order her to make a similar payment to him if his earning capacity is impaired by age or illness. Provision may be made for legal custody of and access to any child of the family who is under the age of 16 years and for payment by either or both of the spouses of up to 50*s.* weekly to the person entrusted with legal custody in respect of each child of the family up to the age of 16. If the court thinks the child would still be a dependant although over that age, similar payments may be ordered for support of the child up to the age of 21. The court cannot make an order that the parties need no longer cohabit or that either spouse shall support the other where the complainant has committed adultery during the marriage, unless the defendant has condoned or connived at, or by wilful neglect or misconduct conduced to, that act of adultery. The court has wide powers of revocation, revival and variation of orders already made. The order must be revoked if the parties have resumed cohabitation, and must be revoked, except so far as the order relates to the children, if the complainant is subsequently proved to have committed adultery since the marriage and the defendant has not condoned or connived at or by wilful neglect or misconduct conduced to that act of adultery. Complaints based on desertion or failure to maintain can be made whilst the offence continues. Complaints based on adultery must usually be made within 6 months of the complainant discovering it, all other complaints within 6 months of the offence itself. The Magistrates' Courts Act, 1952, separates the hearing of matrimonial disputes from ordinary Court business; specifies the persons allowed to be present; limits newspaper reports, etc., etc.

SCOTLAND

DIVORCE

Proceedings are brought in the Court of Session and it is necessary that the husband be domiciled in Scotland, or, he not being domiciled in the United Kingdom or in the Channel Islands or the Isle of Man, that the wife is resident in Scotland and has been ordinarily resident there for a period of three years immediately preceding commencement of proceedings.

The following are the grounds for divorce:—

1. *Adultery.*—A mere confession by the defender is of itself insufficient; there must be proof of the facts. Direct evidence is not required, if facts can be established which give rise to an inevitable inference of adultery. There must be no collusion between the parties, and the pursuer is required to swear to this. It is not collusion, however, for a guilty spouse to give information of an act of adultery already committed. It is a defence to an action of divorce for adultery to plead that the innocent spouse has condoned the misconduct on which the action is founded.

2. *Desertion.*— The defender must have wilfully and without reasonable cause deserted the pursuer and persisted in such desertion for a period of not less than three years. It must be shown that the desertion was without reasonable cause, and that the pursuer has throughout the period been willing to adhere. Refusal by one spouse to have marital relations with the other for any period of three years without any overt act of desertion does not constitute desertion. Here also, collusion is fatal to the success of the action.

3. *Incurable Insanity.*—The defender must, for five years preceding the raising of the action, have been under care and treatment as an insane person.

4. *Cruelty.*—The degree of cruelty to be established depends on the circumstances of each individual case, but the test, generally speaking, is that the conduct complained of must be such as to endanger the health of the pursuer. Cruelty may take the form of habitual drunkenness on the part of one of the spouses.

5. *Unnatural Sexual Offences.*—An extract of the criminal conviction is sufficient proof.

Effect of Divorce on Property.—A husband or wife obtaining decree of divorce against the other, except on the ground of incurable insanity, is entitled to claim his or her legal rights, *jus relicti*, however, being excluded, as if the offender was dead. Where there has been a successful cross-action the effect is the same as though both spouses had died at the date of decree.

Nullity of Marriage.—A declaration of nullity of marriage may be obtained on the ground of any impediment, viz., consanguinity and affinity, subsistence of a previous marriage, non-age of one of the parties, incapacity or insanity of one of the parties, or by the absence of genuine consent.

SEPARATION

A decree of judicial separation may be obtained by one spouse against the other on the grounds of

(*a*) adultery, (*b*) cruelty. This entitles the parties to live apart, but does not dissolve the marriage. The husband, if the guilty party, is liable for aliment.

CUSTODY OF CHILDREN

In actions for divorce and separation, the Court has a discretion in awarding the custody of the children of the parties. The welfare of the children is the paramount consideration, and the mere fact that a spouse is the guilty party in the action does not of itself deprive him or her of the right to claim custody, though where the considerations of welfare are equally balanced the Court will have regard to the element of guilt.

HIRE-PURCHASE

ENGLAND AND WALES

Protection of the purchaser against unscrupulous dealings is given by the Hire-Purchase Act, 1938 (as amended by the Hire-Purchase Act, 1954), which applies to a hire-purchase agreement under which the hire-purchase price *i.e.*, the total sum payable by the hirer to complete the purchase of the goods, does not exceed £1000 for livestock, or £300 in any other case.

Before any agreement is made, the owner of the goods must state in writing to the hirer the cash price at which the goods can be purchased, and there must be a memorandum of the agreement signed by the hirer himself and by or on behalf of the owner and any guarantor. The memorandum must contain (i) the cash price, (ii) the hire-purchase price, (iii) the amount of each instalment, (iv) when each instalment falls due, (v) a list of the goods, and (vi) a notice informing the hirer of his right to terminate the agreement (*below*), and of the restrictions on the owner's right to recover the goods (*below*), and a copy of the memorandum must be sent to the hirer within seven days of the agreement being made. In breach of any of these conditions the owner can neither recover the goods nor enforce the agreement or any security given, although the Court can dispense with any of these requirements save that as to the signed memorandum. The same result ensues (while default continues) if the owner fails without reasonable cause within four days after written request (with a tender of 1*s.* for expenses) to supply to the hirer a copy of the agreement and a statement of amounts paid, in arrear, and not yet payable. Before the last instalment becomes due, the hirer may by writing determine the agreement, and, although he will not thereby escape liability for any instalments which have already become due he will be under no further obligation *under the agreement*. Under the Act, however, he must allow the owner to retake the goods and, if one-half of the hire-purchase price exceeds the total of the sums paid and due, he must pay the difference to the owner. These rights of the hirer cannot be taken away from him, but he can enforce more favourable rights (if any) under the agreement.

Any provision in the agreement giving the owner a right to enter any premises for the purpose of seizing the goods is invalidated by the Act. Further, even though the agreement may have been terminated because the hirer has broken it, or because the owner has exercised a right to terminate it, if one-third of the hire-purchase price has been paid or tendered, the owner cannot recover the goods otherwise than by action in a County Court, in which the Court can ensure that the hirer is fairly treated. If the owner disregards this provision, the hirer cannot recover the goods, but can recover all sums paid under the agreement.

SCOTLAND

The Hire Purchase and Small Debt (Scotland) Act, 1932, provides that no contract of hire purchase to which the Act applies is binding on the hirer unless (1) it is signed by him and (2) either a copy is acknowledged by him to have been delivered at the time of his signature or sent to him by registered post within fourteen days thereafter. Any contract which limits any right conferred by the Act on the hirer is void to that extent. The hirer may terminate the contract at any time by (1) re-delivery of the article in a good state of repair, fair wear and tear excepted, and (2) paying any instalment then due together with the amount, if any, by which one-third of the total payments stipulated for in the contract by way of instalment exceeds the *cumulo* amount of the instalments due. Even after the owner has obtained decree of delivery of an article, the hirer is entitled to retain it in his possession or to recover it if, within fourteen days of the decree, he pays the whole instalment which is due, with expenses.

The above Act was extended by the Hire Purchase Act, 1954, to apply to articles exceeding £300 in value.

ILLEGITIMACY AND LEGITIMATION

ENGLAND AND WALES

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Public Assistance Authority where the child becomes chargeable to the local authority, and the justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 50*s.* a week. The evidence of the woman must be *corroborated* in a material particular. The mother has the custody of her bastard children. *Prima facie* every child born of a married woman during a marriage is legitimate; and this presumption can only be rebutted by strong, distinct, satisfactory and conclusive evidence.

LEGITIMATION.—By the *Legitimacy Act*, 1926, which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry, or have married, whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate as from Jan. 1, 1927, or from the date of the marriage, whichever last happens. Under the Act of 1959, marriage legitimates a person even though the father or mother was married to a third person at the time when the illegitimate person was born. It is the duty of the parents to supply to the Registrar General information for re-registration of the birth of a legitimated child.

Declarations of Legitimacy.—A person claiming that he, his parent, or any remoter ancestor has become legitimated, may petition the High Court or the County Court for the necessary declaration.

Rights and Duties of Legitimated Persons.—A legitimated person, his spouse or issue may take property under an intestacy occurring after the date of legitimation, or under any disposition (*e.g.*, a will) coming into operation after such date, as if he had been legitimate.

He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

SCOTLAND

Illegitimate Children (Scotland) Act, 1930.—The mother of an illegitimate child may raise an action of affiliation and aliment against the father, either in the Court of Session or, more usually, in the Sheriff Court. Where in any such action the Court finds that the defender is the father of the child, the Court shall, in awarding inlying expenses, or aliment, have regard to the means of the parties, and the whole circumstances of the case. The Court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen years.

By Scots Law an illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognized by International Law so far as the laws of particular countries allow it and is valid to that extent in England. By the Legitimacy Act, 1926, an illegitimate child may, in certain circumstances, succeed on intestacy. By the Registration of Births, Deaths and Marriages (Scotland) Amendment Act, 1934, a child so legitimated, who has already been registered as illegitimate, may, in certain circumstances be re-registered as legitimate. The consent of the father of an illegitimate child to its adoption is not required.

INTESTACY

ENGLAND AND WALES

As regards deaths on or after January 1, 1953, the position is governed by the Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952. The latter Act considerably increased the benefits of a surviving spouse of an intestate, and also extended the provisions of the Inheritance (Family Provision) Act, 1938 (*see under* "Wills"), to intestacies. These notes deal with the position under the 1952 Act, so that if the death occurred before 1953 reference must be made elsewhere. If the intestate leaves a spouse and issue, the spouse takes (i) the "personal chattels"; (ii) £5,000 with interest at 4 per cent. from death until payment; and (iii) a life interest in half of the rest of the estate. This life interest can be capitalized at the option of the spouse. "Personal chattels" are articles of household use or ornament (including motor-cars), not used for business purposes. The rest of the estate goes to the issue. If the intestate leaves a spouse and no issue, but leaves a parent or brother or sister of the whole blood or issue of such brothers and sisters the spouse takes (i) the "personal chattels"; (ii) £20,000 with interest at 4 per cent. from death until payment, and (iii) half of the rest of the estate absolutely. The other half of the rest of the estate goes to the parents, equally if more than one, or, if none, to the brothers and sisters of the whole blood. If the intestate leaves a spouse, but no issue, no parents and no brothers or sisters of the whole blood or their issue, the spouse takes the whole estate absolutely. If resident therein at the intestate's death, the surviving spouse may generally require the personal representatives to appropriate the interest of the intestate in the matrimonial home in or towards satisfaction of any absolute interest of the spouse, including the capitalized value of a life interest. In certain cases, leave of Court is required. On a partial intestacy, any benefit (other than personal chattels specifically bequeathed) received by the surviving spouse under the will must be brought into account against the statutory legacy of £5,000 or £20,000 as the case may be. If there is no surviving spouse, the estate is distributed among those who survive the intestate in the following order (those entitled under earlier numbers taking to the exclusion of those entitled under later numbers):—(1) issue; (2) father or mother (equally, if both alive); (3) brothers and sisters of the whole blood; (4) brothers and sisters of the half blood; (5) grandparents (equally, if more than one alive); (6) uncles and aunts of the whole blood; (7) uncles and aunts of the half blood; (8) the Crown.

In cases (1), (3), (4), (6) and (7) the persons entitled lose their interests unless they or their issue not only survive the intestate, but also attain twenty-one or marry under that age, their shares going to the other persons (if any) within the same group who do attain twenty-one or marry. Moreover, in the same cases, succession is not *per capita*, but *per stirpes*, *i.e.*, by stocks or families. Thus, if the intestate leaves one child and two grandchildren, being the children of a child of the intestate who pre-deceased the intestate, the two grandchildren represent their deceased parent and take between them one-half of the issue's share, the remaining half going to the surviving child. Similarly, nephews and nieces represent a deceased brother, and so on.

When the deceased died partially intestate (*i.e.*, leaving a will which disposed of only part of his property), the above rules apply to the intestate part.

Children must bring into account (hotchpot) any substantial advances received from the intestate during his lifetime before claiming any further share under the intestacy. Special hotchpot provisions apply to partial intestacy.

Note that the old rule of primogeniture no longer applies.

For further details, *see* Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952.

The Legitimacy Act, 1926, contains special provisions concerning the intestacy of an illegitimate child or the mother of an illegitimate child.

SCOTLAND

Heritage.—The lines of succession are: (1) descendants; (2) collaterals; (3) ascendants and their collaterals and so on in the ascending scale. Males have preference over females and the rule of primogeniture obtains. Regard is had, however, to the right of representation; thus, if the eldest son of the deceased, being his heir, has predeceased him leaving issue, the issue (whether male or female) are preferred to the younger sons of the deceased. Daughters only succeed if there are neither sons nor the issue of predeceasing sons, and where there are more than one, they share equally. There being no descendants, brothers, etc., will succeed, those of the full blood excluding those of the half blood. Among collaterals it is noted that the deceased's immediate younger brother is preferred to an elder brother. Failing a younger brother and his issue the estate ascends to the next elder brother and so on. If there are no brothers and sisters, nor the issue of brothers and sisters, the estate goes to the father and failing him to his collaterals; failing these the estate ascends to the paternal grandfather and his collaterals. The succession never ascends to the mother and her

relations; even the mother's own estate, after vesting in her son or daughter, never ascends to the maternal line again.

By the Intestate Husband's Estate (Scotland) Acts, 1911, 1919 and 1959, the widow of a man dying intestate and without lawful issue is entitled to the whole estate both heritable and moveable if under £5,000 in value; if over that amount, she takes £5,000 with interest at 4 per cent. from the date of death, out of the heritable and moveable estate rateably before any division is made, and without prejudice to her rights of terce and *jus relictæ* (see *post*, p. 1150). Section 5 of the Law Reform (Miscellaneous Provisions) (Scotland) Act, 1940, gives like rights to a surviving husband. The same section covers the case of partial intestacy.

Moveable.—One-third of the moveable estate goes to the surviving spouse as *jus relicti* (*relictæ*); one-third to surviving children as *legitim* (see *post*, p. 1150); and one-third to surviving children and issue of predeceasing children *per stirpes*, *i.e.*, the share which would have fallen to a predeceased parent, if alive, is divided equally among the children. Where no children or issue of children survive, half of the estate goes to the surviving spouse and half to the heirs *in mobilibus*, *i.e.*, nearest heirs including representatives of predecessors, subject to the spouse's right to £5,000 (*supra*). The lines of succession are the same as in heritable succession, but the right of representation (*supra*) only applies where there are next of kin or the issue of predeceasing next of kin. Intestate Moveable Succession (Scotland) Act, 1855 (amended 1919). Beyond that relationship heirs take *per capita*. Where an intestate leaves no issue and is predeceased by his father, his mother is entitled to the same rights as the father would have had on survivance (1919 Act).

JURY SERVICE

Liability to Jury Service depends upon inclusion in the local Jury Book. This is compiled from the Electors Lists for each year (see *post* under "Voters' Qualifications"). The names of all persons who are on 10th October qualified and liable to serve as jurors are marked with the letter "J" on the Electors Lists. The marked Electors Lists are published, and anyone whose name is improperly marked may before the following 17th December claim that, although *qualified* to serve [see below] he is *exempt* from service [see below]; the marks will be removed from the names of exempted persons. The remaining marked names are thereafter included in the Jury Book. No one whose name actually appears in the Jury Book may claim exemption on any ground whatever except illness or, if a woman, for medical reasons.

QUALIFICATIONS

England and Wales—Every man and woman between the ages of 21 and 60 years [persons over 60 are exempt but not disqualified] residing in England or Wales being the owner, legally or under a trust, of freehold land worth £10 a year or more, or of leasehold land worth £20 a year or more (if the lease is for at least 21 years) in the county in which they live; or being a householder rated in respect of premises of a net annual value of at least £20 (or in London or Middlesex £30); is qualified and liable to serve on juries in the superior courts (civil and criminal), and at Assizes in their own county, and on petty juries in the local County Court or Quarter Sessions. Also all burgesses of boroughs having separate quarter sessions or a borough civil court are qualified and liable to serve on juries therein. Special regulations govern the qualifications and method of listing common jurors in the City of London; and jurors for a coroner's inquest. By the Juries Act, 1949, a person attending for jury service is entitled to be paid travelling and subsistence allowances together with compensation for loss of earnings and other loss or expenses.

Disqualifications.—Any person who has been attainted of treason or felony, or convicted of any infamous crime (unless he has obtained a free pardon) is disqualified from service on all juries.

Exemptions.—The persons who are exempt from serving on juries (including coroner's juries) include: peers; M.P.'s; judges; ministers of religion (Christian and Jewish); practising lawyers; officers of the Courts; coroners; prison, etc., officers; asylum keepers; practising M.R.C.S.'s, M.R.C.P.'s and L.R.C.P.'s; practising apothecaries, doctors and chemists (and registered practising dentists at their option); midwives; members of the armed forces; members of the Territorial Army (in certain cases) or the Royal Auxiliary Air Force; members of the Mersey Docks and Harbour Board, and of the Port of London Authority; certain members of Trinity House, Deptford Strond; masters of buoy and light vessels under the Trinity Houses, and all licensed water pilots; household servants of the Crown; officers of the Post Office, customs and excise; sheriff's officers; police officers; special constables; metropolitan magistrates and their court clerks and servants; officers of the Houses of Parliament; Registrars of births, deaths, and marriages.

As to their own counties: members of the L.C.C., and commissioners of income tax.

As to their local counties: borough councillors and J.P.'s., town clerks and borough treasurers; burgesses of boroughs having separate Quarter Sessions are exempt from serving on the County Sessions.

As to their own area of jurisdiction: J.P.'s.

Moreover a juror can never be called upon to serve oftener than once in each year; this period of exemption is longer in certain counties.

JURY SERVICE IN SCOTLAND

It is the duty of the Sheriff in each county to make up a list of persons qualified and liable to serve as jurors. The list is compiled from information which every householder is required to provide. From this list the General Jury Book is made up. Part II of the Juries Act, 1949 (amended by the Juries Act, 1954), applies only to Scotland and provides, *inter alia*, for the payment of travelling expenses and subsistence allowances to jurors, and for compensation for loss of earnings, recently increased.

QUALIFICATIONS

Every man or woman between the ages of 21 and 60 is qualified, who is possessed of heritable property of the yearly value of at least £5, or of moveable property of the value of at least £200 sterling.

Exemptions.—The persons who are exempt from serving on juries include: peers, judges of the supreme courts, sheriffs, magistrates of Royal Burghs, ministers of religion, parochial schoolmasters, practising lawyers, clerks and officers of court, prison officers, university professors, physicians, surgeons and dentists, officers in the Navy or Army on full pay, customs officers, messengers-at-arms and other officers of the law, lighthouse keepers and their assistants, soldiers, members of the Territorial Army and the Auxiliary Air Force (in certain circumstances), Inland Revenue officials and officers of the Post Office.

Jurors failing to attend without good cause are liable to a penalty.

LANDLORD AND TENANT

ENGLAND AND WALES

Although basically the relationship between the parties to the lease is governed by the lease itself, the law on this subject is complicated by the mass of legislation thereon, and no attempt is made here to deal in any detail with that legislation. Some of the statutes which govern specific aspects of the topic are set out at the end of this note with brief particulars. The few points dealt with may show the desirability of seeking professional assistance in these matters. Important statutes include:—

(1) As to agricultural holdings—the Agricultural Holdings Act, 1948. Among other things, this Act regulates the length of notice necessary to determine an agricultural tenancy, the tenant's right to remove fixtures on the land, his right to compensation for damage done by game, for improvements and for disturbance, and his right to require the consent of the Agricultural Land Tribunal to the operation of a notice to quit.

(2) As to business premises—the Landlord and Tenant Acts, 1927 and 1954, which do not extend to Scotland. Part II of the 1954 Act gives security of tenure to the tenant of most business premises, and in effect he can only be ousted on one or more of the seven grounds set out in the Act. In some cases, where the landlord can resume possession, the tenant is entitled to compensation.

(3) As to unfurnished dwelling houses—the complicated mass of legislation generally known as the Rent Acts. If a house is within these Acts, the tenant may have a personal right to reside in the house and can only be ousted on certain grounds. Further, each house within the Acts has a rent limit, and the rent recoverable by the landlord is limited to this rent. Details of how this rent limit is determined are contained in the Rent Act, 1957 (*see below*). The Landlord and Tenant (Furniture and Fittings) Act, 1959, makes it an offence in connection with a grant, renewal or assignment of a tenancy of a house within the Rent Acts on terms which require the purchase of furniture to offer the furniture (which includes fittings and other articles) at a price which the vendor knows or ought to know is unreasonably high. It is also an offence under the Act to fail to furnish to a person seeking to obtain or retain such accommodation and who is provided with particulars of the tenancy a written inventory of the furniture, specifying the price sought for each item.

Houses let at a rent which includes board or substantial attendance or furniture are governed by the Furnished Houses (Rent Control) Act, 1946, as amended by the Landlord and Tenant (Rent Control) Act, 1949, if within the limits of rent control imposed by the Rent Act, 1957 (see below).

Since the Rent Act, 1957, the Rent Acts do not apply to a lease of a dwelling house granted for a term certain exceeding twenty-one years, but Part I of the Landlord and Tenant Act, 1954, gives protection in such cases, provided the rateable value does not exceed £100 in London and elsewhere in England and Wales, £75. Under this Act, the contractual tenancy is automatically extended until brought to an end in the manner prescribed by the Act, and in effect the landlord can only get possession on one of the grounds specified in the Act.

The Rent Act, 1957, has made considerable inroads into the importance of rent control by removing many houses from control altogether and fixing new maximum rent limits for all houses which remain subject to control. The principal changes effected by this Act are as follows:

1. Any house whose rateable value on November 7, 1956, exceeded £40 in London and elsewhere £30, is automatically decontrolled (and the operation of the Furnished Houses (Rent Control) Act is restricted to houses within the same limits of rateable value). However, the landlord cannot recover possession earlier than the date specified in a notice served by him, which must not be earlier than six months after service of the notice, and to recover possession the landlord must bring court proceedings. If, in these proceedings, the tenant can satisfy the court as to certain matters, the court can suspend the execution of the order for possession for a certain period. There are special provisions with regard to the rent payable by the tenant after the date specified in the landlord's notice. (Landlord and Tenant (Temporary Provisions) Act, 1958, which remains in force until 1st August, 1961.)

2. No tenancies beginning on or after July 6, 1957, are subject to control unless the person to whom the tenancy is granted is already a protected tenant of that house.

3. For all houses remaining subject to control the maximum rent is determined by reference to the gross value shown in the rating valuation list on November 7, 1956. The maximum rent is then computed as follows:—(*a*) where the tenant is not responsible for repairs other than internal decorative —twice the 1956 gross value; (*b*) where the landlord is responsible for all repairs including internal decorative—7/3 of the gross value; (*c*) where the tenant is responsible for all repairs—4/3 of the gross value. (There are varying proportions in certain other cases.) In all cases there may be added, (*a*) rates borne by the landlord; (*b*) a reasonable charge for services provided by the landlord.

4. In order to obtain any increase in the rent of premises remaining subject to control, the landlord must serve notice of increase in the prescribed form which will take effect from the date specified therein; this date must be at least three months after service of notice, and the rent cannot be increased by more than 7*s*. 6*d*. a week during the nine months following service of the notice.

5. A notice to quit *any* dwelling house must be given at least four weeks before it is to take effect.

SCOTLAND

A Lease is a Contract, the relationship of the parties being governed by the terms thereof. As is also the case in England (see the foregoing Section) legislation has played an important part in regulating that relationship. Thus, what at Common Law was an Agreement binding only the parties to the deed, becomes in virtue of Statute 1449 c. 17, a contract binding the landlord's successors, as purchasers or creditors, provided the following four conditions are observed; (1) the lease, if for more than one year, must be in writing, (2) there must be a rent, (3) there must be a term of expiry, and (4) the tenant must have entered into possession.

It would be impracticable in a brief section of these Notes to enter upon a general discussion of this branch of the law and, accordingly, the plan adopted in the preceding Section of quoting a few important Statutes is followed here.

The Agricultural Holdings (Scotland) Act, 1949, which is a consolidating act applicable to Scotland, contains provisions similar to those in the English Act, alluded to in the preceding Section. It cannot here be analysed in detail.

It is of interest to note that the Small Landholders Act, 1911, provided for the setting up of the Land Court which has jurisdiction over a large proportion of agricultural and pastoral land in Scotland.

In Scotland business premises are not controlled by Statute to so great an extent as in England, but the Tenancy of Shops (Scotland) Act, 1949, gives a measure of security to tenants of shops. This Act enables the tenant of a shop who is threatened with eviction to apply to the Sheriff for a renewal of the tenancy. If the landlord has offered to sell the subjects to the tenant at an agreed price the application for a renewal of the tenancy may be dismissed. Reference should be made to Section 1 (3) of the Act for particulars of other circumstances under which the Sheriff has a discretion to dismiss an application. The Act applies to premises held by the Crown or Government Departments, either as landlord or tenant.

The series of complicated statutes known as The Rent and Mortgage Interest (Restrictions) Acts, 1920 to 1939, largely govern the relations between landlord and tenant in regard to certain unfurnished houses—including parts thereof if let as separate dwellings—and it is important to note that notwithstanding conditions in the lease of a controlled house providing for the removal of the tenant, it is not possible to contract out of the Acts. The Landlord and Tenant (Furniture and Fittings) Act, 1959 (*ante*, under England and Wales), applies to Scotland. Employees occupying premises by virtue of their employment are not tenants and so cannot claim protection. The Housing (Repairs and Rents) (Scotland) Act, 1954, provides for increase in rent of a controlled dwelling house on which repairs of a certain value have been carried out. The Rent of Furnished Houses Control (Scotland) Act, 1943 contains provisions applicable to houses or parts of houses let with furniture and with or without services, as also to unfurnished premises let with services. These Acts have however been substantially altered or modified by The Rent Act, 1957. The changes in the law are *inter alia* as follows:—(1) Dwelling houses, the rateable value of which was on November 7, 1956, over £40, are released from control. (2) All tenancies coming into operation on or after July 6, 1957, are free from control, except where a new tenancy is granted to a statutory tenant already in occupation. (3) Provision is made for the increase of rent by a maximum of one quarter of all controlled houses. (4) The repairs increase of two-fifths provided for in the 1954 Act is increased to one-half.

The Rent Act, 1957, further provides that a notice to quit a dwelling house (furnished or unfurnished) must be sent at least four weeks before the date on which it is to take effect. It should be noted, however, that transitional provisions operate when a house is to be decontrolled: thus a landlord cannot recover possession earlier than 15 months after the date of decontrol and during this interim period the landlord cannot impose an increase in rent. Further, to obtain possession, he must serve a notice specifying the date when the tenancy will terminate, and must, under the Landlord and Tenant (Temporary Provisions) Act, 1958, bring court proceedings for possession. (See further *ante*, under England and Wales.)

The Landlord and Tenant Act, 1954, referred to in the preceding section, does not apply to Scotland.

LEGAL AID

LEGAL AID IN CIVIL PROCEEDINGS

The Legal Aid and Advice Act, 1949, is designed to make legal aid and advice more readily available for persons of small and moderate means. The main structure of the new service is contained in the Act itself and the Regulations made thereunder, but the administrative details are embodied in a scheme made by the Law Society.

Legal aid is at present limited to proceedings (including matrimonial causes) in the High Court and Court of Appeal, proceedings in any County Court and in certain local courts *e.g.*, the Liverpool Court of Passage. Legal aid is *not* available in civil proceedings before Magistrates save that it is to be extended to matrimonial proceedings in magistrates' courts during the financial year 1960–61. In any event, an application for legal aid will not be approved if it appears that the applicant would gain only a trivial advantage from the proceedings. Further, proceedings wholly or partly in respect of defamation, breach of promise of marriage, seduction, inducement of one spouse to leave or remain apart from the other are excepted from the scheme, as are also relator actions, election petitions and proceedings by way of judgment summons.

Eligibility for legal aid in civil proceedings depends upon an applicant's "disposable income" and "disposable capital." Legal aid cannot be granted if the former exceeds £700 per annum, and a person may be refused assistance if he has a disposable capital of more than £500 and it appears that he can afford to proceed without legal aid. Even so, the applicant *may* be required to contribute up to one third the excess of his disposable income above £250, together with the whole excess of his disposable capital above £125. Disposable income is calculated by making deductions from gross income in respect of certain matters such as dependants, interest on loans, income tax, rates, rent and other matters for which the applicant must or reasonably may provide. Disposable capital is calculated by excluding from gross capital the value of the house in which the applicant resides, of furniture and household possessions; a deduction of up to £75 may be made in respect of dependants. Except in matrimonial proceedings or cases where the spouses are living apart, any resources of a person's wife or husband are to be treated as that person's resources. These figures will be assessed by the National Assistance Board, and will be certified to a Local Committee, who will determine whether reasonable grounds exist for the grant of a civil aid certificate. Appeal from refusal of a certificate lies to an Area Committee. A person resident in England or Wales desiring legal aid may apply for a certificate to any Local Committee; if resident elsewhere, application should be made to the Local Committee for London. However, if the application is made in respect of proceedings in an *appellate* court and the applicant is resident in England or Wales, application should generally be made to any *Area* Committee—if resident elsewhere, to the *Area* Committee for London. If a certificate is granted, the applicant may select his solicitor, and, if necessary, counsel, from a panel. However, in matrimonial causes, where the applicant has disposable capital not exceeding £85, and disposable income not exceeding £130, his case will generally be conducted by a solicitor employed whole time by the Law Society to deal with such cases.

LEGAL ADVICE

Legal advice from a solicitor on the Legal Aid Panel is now available to anyone over the age of sixteen. Persons on National Assistance can get it free of charge, whilst those whose means are within the limits set out below can get it for *2s. 6d.* An application form should be obtained from a Citizens' Advice Bureau, Court Office or from one of the Law Society's Legal Aid Offices, or from a solicitor whose name is on the panel, and, after completing the form, it should be taken to a solicitor on the panel and an interview requested. A person is

entitled to advice on any one legal question only from one solicitor; and for not more than one hour and thirty minutes, but application for further advice may be made to the Area Committee. Lists of solicitors concerned may be consulted at the places mentioned above.

Legal advice is available for *2s. 6d.* to a person whose capital is £125 or less and whose income has not been more than £7 10*s.* during the seven days up to and including the day of application for legal advice. Capital and income of husband and wife must be added together for this purpose, unless they are living apart or the applicant seeks advice on a matter in which the spouse has a contrary interest. In working out capital, the value of the applicant's house, its contents and the value of clothing and tools can be ignored. In working out income, a deduction of £2 5*s.* may be made for a spouse living with or maintained by the applicant, of £1 7*s.* for each child maintained by the applicant, and of £2 5*s.* for any other adult person maintained by the applicant. There may also be deducted any income tax and any National Insurance, Industrial Injuries or National Health contributions paid by the applicant during the week immediately before the date of obtaining legal advice.

Quite apart from the above statutory scheme for legal advice, there exists a voluntary scheme under which any person may apply to a solicitor who is on the panel for advice for a fee of £1 for up to thirty minutes. If the matter cannot be disposed of in thirty minutes, the solicitor should give an estimate of the approximate cost of any further advice or steps which may be necessary.

It should be mentioned that under both schemes a solicitor, even though he is on the panel, is entitled to decline to give advice to the applicant without giving any reason to the applicant.

OTHER LEGAL AID

Neither of the advice schemes covers further action such as writing letters. If however a person wants something more than advice but something less than proceedings, he may obtain a certificate to take steps to assert or dispute a claim where the question of proceedings has not yet arisen, but if it did arise legal aid could be granted for those proceedings. This type of legal aid could cover writing letters, obtaining evidence, and negotiating settlements. The certificate limits the amount to be spent under it, and does not cover any step in proceedings, nor can counsel be instructed. It is available to a person whose disposable capital does not exceed £125 and who was either receiving National Assistance at the date of his application or has a disposable income not exceeding £325 per annum. In assessing disposable capital deductions are made in respect of dependents, and further deductions for them are made in assessing disposable income. Where the applicant's disposable income exceeds £253 he must pay a contribution of up to £1 for each £3 above £250.

LEGAL AID IN CRIMINAL CASES

The Poor Prisoners' Defence Act, 1930, provides for free legal aid in criminal proceedings in specified cases, and official lists are kept of solicitors and barristers willing to undertake the defence of poor prisoners. On trial for an *indictable offence* (*i.e.*, before the higher courts, such as Assizes or Quarter Sessions) the person charged may have free legal aid, if Justices, on committal for trial, or Judge of trial court grant a *Defence Certificate*. If the person's means are insufficient, such Certificate *may* be granted in cases where desirable, and *must* be given for a murder charge. In Magistrates' Courts, a Defence Certificate may be granted to a person of insufficient means if it is considered desirable to do so owing to gravity of charge or exceptional circumstances. The Legal Aid and Advice Act, 1949, provides that application for free legal aid under the Poor Prisoners' Defence Act, 1930, may be made by letter by any person arrested or summoned for an offence, as well as by a person charged with an offence. The letter should be addressed to the clerk to the Justices and must give particulars of the offence charged and set out the grounds of the application. Refusal of a legal aid certificate by a Justice after such application does not prevent the applicant being granted a legal aid certificate at the hearing. Legal aid is also available under the 1930 Act in proceedings on the question of the sentence to be passed, and after as well as before the defendant has pleaded or been found guilty.

Provision is also made for applications for legal aid in the event of an appeal under the Criminal Appeal Act, 1907, and the Summary Jurisdiction (Appeals) Act, 1933.

In any application for aid under the Poor Prisoners' Defence Act, 1930, the Summary Jurisdiction (Appeals) Act, 1933, or the Criminal Appeal Act, 1907, if any doubt exists as to whether the applicant can afford to provide his own legal aid, or whether it is desirable in the interests of justice that he should have free legal aid, such doubt is to be resolved in favour of the applicant. Further, the Justices have an almost absolute discretion in deciding applications.

SCOTLAND

Civil Proceedings

The Legal Aid and Solicitors (Scotland) Acts, 1949 and 1960 provide a scheme which is limited to civil actions in the Court of Session and in the Sheriff Courts except actions in respect of defamation or verbal injury, breach of promise of marriage, the inducement of one spouse to leave or remain apart from the other, election petitions (under the Parliamentary Elections Act, 1868, or the Elections (Scotland) (Corrupt and Illegal Practices) Act, 1890), and small debt proceedings (*i.e.*, under £20) and proceedings for summary removing, in both of which liability for the debt and the amount thereof are admitted.

As to those to whom legal aid is available, the same considerations as to income and capital apply in Scotland as in England. (See the preceding paragraph.) A person believing himself to be eligible may instruct any solicitor of his own choice who is on the official lists, or he may apply for a solicitor to one of the various Legal Aid Committees which are set up to administer the scheme. Application for a certificate granting legal aid is thereafter made to the appropriate Committee by the applicant's solicitor, who is required to prepare, for the signature of the applicant, a memorandum setting forth the grounds of the proposed action. Investigation into the applicant's financial means is carried out by the National Assistance Board after the Committee has considered the memorandum and, on a suitable contribution, if any, by the applicant being approved, a Certificate is granted enabling the applicant to proceed with his action.

LEGAL ADVICE

Since March, 1959, legal advice, as distinct from legal aid in proceedings, is available to anyone in Scotland on terms similar to those stated in a preceding paragraph dealing with legal advice in England. Application forms are available in the offices of all Legal Aid Committees and Citizens' Advice Bureaux.

Criminal Proceedings

In every sheriffdom there are Solicitors for the poor, and in the Court of Session there are Counsel and Solicitors for the poor, all of whom act gratuitously. No Court dues are payable in the first instance. The means that preclude a person from the benefit of the Poors' Roll are not fixed, and each application depends on its own circumstances.

MARRIAGE

A.—MARRIAGE ACCORDING TO RITES OF THE CHURCH OF ENGLAND

1. MARRIAGE BY BANNS.—The Marriage Act, 1949, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony during morning service or, if there is no morning service on a Sunday on which the banns are to be published, during evening service. Where the parties reside in different parishes, the banns must be published in both. Under the Act, banns may be published and the marriage solemnized in the parish church, *which is the usual place of worship* of the persons to be married or either of them, although neither of such persons dwells in such parish; but this publication of banns is *in addition* to any other publication required by law and does not apply if the church or the residence of either party is in Wales. The Act provides specially for the case where one of the parties resides in Scotland and the other in England, the publication being then in the parish in England in which one party resides, and, according to the law and custom in Scotland, in the place where the other party resides. After the lapse of three months from the last time of publication, the banns become useless, and the parties must either obtain a licence (see below), or submit to the republication of banns.

2. MARRIAGE BY LICENCE.—Marriage licences are of two kinds:—

(i) *A Common Licence*, dispensing with the necessity for banns, granted by the Archbishops and Bishops through their Surrogates, for marriages in any church or chapel duly licensed for marriages. A Common Licence can be obtained in London by application at the Faculty Office (1 The Sanctuary, Westminster, S.W.1) and (for marriages in London) at the Bishop of London's Diocesan Registry (1 Dean's Court, Doctors' Commons, E.C.4), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for *all* England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings. [The cost of licences through a clerical Surrogate in the country (*see below*) is £21 5*s*.] *No previous notice is required and the licence is available as soon as it is issued.* Before a licence can be granted one of the parties must make an affidavit that there is no legal impediment to the intended marriage; and also that one of such parties has had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the parish or ecclesiastical district of the church in which the marriage is to be solemnized, *or* the church in which the marriage is to be solemnized is the usual place of worship of the parties or one of them. In the country there may generally be found a parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some dioceses it is necessary for the Surrogate to procure the licence from the Bishop's Registry.) The licence continues in force for three months from its date.

(ii) *A Special Licence* granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, etc.; but the reasons assigned must meet with his Grace's approval. Application must be made to the Faculty Office. Fees for licence, etc., £25.

3. MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE.—A marriage may be performed in church on the Superintendent Registrar's Certificate (as to which see below) without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the ecclesiastical parish of the church in which the marriage is to take place unless the church is the usual place of worship of the parties or one of them.

MARRIAGE FEES.—The Church Commissioners settle tables of fees for all parishes. The usual fees are paid although a stranger-clergyman be invited to perform the service.

B.—MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE

The following marriages may be solemnized on the authority of a Superintendent Registrar's Certificate (either with or without a licence):—

(*a*) A marriage in a registered building (*e.g.*, a nonconformist church registered for the solemnization of marriages therein).
(*b*) A marriage in a register office.
(*c*) A marriage according to the usages of the Society of Friends (commonly called Quakers).
(*d*) A marriage between two persons professing the Jewish religion according to the usages of the Jews.
(*e*) A marriage according to the rites of the Church of England (see above—in this case the marriage can only be *without* licence).

NOTICE.—Notice of the intended marriage must be given as follows:—

(i) Marriage by certificate (*without* licence)—If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party. If the parties reside in different registration districts, notice must be given by each to the Superintendent Registrar of the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before either notice can be given.

(ii) Marriage by certificate (*with* licence)—One notice only is necessary, whether the parties live in the same or in different registration districts. Either party may give the notice, which must be given to the Superintendent Registrar of any registration

district in which one of the parties has resided for the period of fifteen days immediately preceding the giving of notice, but both parties must be resident in England or Wales on the day notice is given.

The notice (in either case) must be in the prescribed form and must contain particulars as to names, marital status, occupation, residence, length of residence, and the building in which the marriage is to take place. The notice must also contain or have added at the foot thereof a solemn declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law (*see below*) has been duly given, and that the residential qualifications (mentioned above) have been complied with. A person making a false declaration renders himself or herself liable to prosecution for perjury. The notice is entered in the marriage notice book.

ISSUE OF CERTIFICATE:

(i) *Without* licence.—The notice (or an exact copy thereof) is affixed in some conspicuous place in the Superintendent Registrar's office for 21 days next after the notice was entered in the marriage notice book. After the lapse of this period the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three months from the date of the entry of the notice.

(ii) *With* licence.—The notice in this case is not affixed in the office of the Superintendent Registrar. After the lapse of one whole day (other than a Sunday, Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three months from the date of entry of the notice.

SOLEMNIZATION OF THE MARRIAGE:

(i) *In a Registered Building.*—The marriage must generally take place at a building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship. Further, if there is not within the district of residence of one of the parties a registered building within which marriages are solemnized according to the rites and ceremonies which the parties desire to adopt in solemnizing their marriage, it may take place in an appropriate registered building in the nearest district.

The presence of a Registrar of Marriages is not necessary at marriages at registered buildings which have adopted the provisions of section 43 of the Marriage Act, 1949. This section provides for the appointment of an "authorized person" (a person, usually the minister or an official of the building, certified by the trustees or governing body as having been duly authorized for the purpose) who must be present and must register the marriage.

The marriage must be solemnized between the hours of 8 a.m. and 6 p.m. with open doors in the presence of two or more witnesses. The parties must at some time during the ceremony make the following declaration—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." Also each of the parties must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]," *or*, if the marriage is solemnized in the presence of an authorized person without the presence of a Registrar, each party may say in lieu thereof: "I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

(ii) *In a Register Office.*—The marriage may be solemnized in the office of the Superintendent Registrar to whom notice of the marriage has been given. The marriage must be solemnized between the hours of 8 a.m. and 6 p.m., with open doors in the presence of the Superintendent Registrar and a Registrar of the registration district of that Superintendent Registrar, and in the presence of two witnesses. The parties must make the following declaration: "I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.," and each party must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." No religious ceremony may take place in the Registry Office, though the parties may, on production of their marriage certificate, go through a subsequent religious ceremony in any church or persuasion of which they are members.

(iii) *Other Cases.*—If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorized by the Society of Friends to solemnize their marriage in accordance with its usages, they may be married in a Friends' meeting-house. The marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of a Registrar of Marriages is not necessary.

If both parties are Jews they may marry according to their usages in a synagogue, which has a certified marriage secretary, or private dwelling-house at any hour; the building may be situated within or without the district of residence. The marriage must be registered by the secretary of the synagogue of which the man is a member. The presence of a Registrar of Marriages is not necessary.

FEES OF SUPERINTENDENT REGISTRARS.

	s.	*d.*
For entering notice of a marriage by certificate (with or without licence) in the marriage notice book	1	6
For a certificate for marriage (with or without licence)	1	6
For a licence for marriage	45	0
For a marriage by certificate (without licence) in the presence of a Registrar	7	6
For a marriage by certificate (with licence) in the presence of a Registrar	15	0

MISCELLANEOUS NOTES

Consanguinity and Affinity.—A marriage between persons within the prohibited degrees of consanguinity or affinity is void. Relaxations have, however, been made by various statutes which have

now been replaced by the Marriage Act, 1949 (see the 1st Schedule to the Act) and the Marriage (Enabling) Act, 1960. It is now permitted to contract a marriage with:—

Sister, aunt or niece of a former wife (whether living or not). Former wife of brother, uncle or nephew (whether living or not).

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister.

Minors.—Persons under 21 years of age are generally required to obtain the consent of certain persons (see Marriage Act, 1949, section 3 and 2nd Schedule). Where both parents are living, both must consent; where one is dead, the survivor, or, if there is a guardian appointed by the deceased parent, the guardian and the survivor. No consent is required in the case of an infant's second marriage. In certain exceptional cases consent may be dispensed with, *e.g.*, the insanity of a parent. If consent is refused the Court may, on application being made, consent to the marriage; application can be made for this purpose to the High Court, the County Court, or a Court of Summary Jurisdiction. The Act *prohibits* any marriage where either party is under 16 years of age.

C.—MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR NORTHERN IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should either apply to the session clerk to publish banns or give notice of marriage to the registrar; as regards Northern Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by Certificate *with* licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES IN SCOTLAND

According to the law of Scotland, marriage is a contract which is completed by the mutual consent of parties.

Impediments to marriage: These render the marriage null and void. (*a*) Age: If either party is under the age of 16. (*b*) Forbidden Degrees: If the parties are within certain degrees of relationship. (*c*) Subsisting previous marriage. (*d*) Impotency of either party. (*e*) Non-residence, *i.e.*, if the legal requirement of prior residence of one or other of the parties in Scotland have not been complied with. (*f*) Insanity of either party.

No consent of parents or guardians is necessary.

Marriages may be regular or "irregular."

Regular Marriages.

A regular marriage is one which is celebrated by a Minister of religion or authorized Registrar after due notice by the proclamation of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must either have his or her usual residence in the Registration District, or have resided there for at least 15 days before the ceremony or have a parent so residing there. No form, place or hours are prescribed by law. There are no canonical hours as in England. Public proclamation is made by (*a*) banns or (*b*) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made twice, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 3s. A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act, 1878, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns, but a minister of the Church of Scotland is not bound, although he is entitled, to celebrate a marriage not preceded by banns. The statute is limited to persons with qualifying residence in Scotland or having parents so residing. Exhibition is made for 7 consecutive days, during which time any person may appear personally and lodge an objection in writing subscribed by him. If no objections are lodged the Registrar issues a certificate: fees, 3s. Such certificate of publication is only valid for three months. The Naval Marriages Act, 1908, regulates the publication of banns or of notice on board H.M. ships and the granting of certificates by the Officer-Commanding.

Marriage before Registrar: After obtaining a certificate of due publication as above, it is competent for the parties to contract the marriage in the office of the authorized Registrar in his presence and in the presence of two witnesses. Such a marriage is regular and valid in all respects.

Marriage by Licence: In unforeseen and exceptional circumstances—see Section 2 of the Marriage (Scotland) Act, 1939—where normal methods of publication cannot be carried through, the Sheriff, on application by the parties may grant a licence which is deemed in all respects to be equivalent to a certificate of publication.

Irregular Marriages.

Since the passing of the Marriage (Scotland) Act, 1939, only one form of irregular marriage is recognized, viz. marriage by co-habitation and habit and repute. If parties live together constantly as husband and wife, and if they are held to be such by the general repute of the neighbourhood, then there may arise a presumption from which marriage can be inferred. Before such marriage can be registered, however, a decree of declarator of marriage must be obtained from the Court of Session.

MASTER AND SERVANT

Wages and Holidays

Under the Truck Acts, it is in general forbidden for an employer to pay wages other than in current coin of the realm, and it is illegal for an employer to deduct from the employee's wages sums alleged to be due to the employer. However, the application of these Acts is confined to workmen, and domestic servants are specifically excluded from their operation. Even in the case of payments to workmen certain deductions, including rent and the price of food to be consumed on the employers' premises, are not forbidden where the employee's written consent is obtained. Further, under the Payment of Wages Act, 1960, it is permissible for wages to be paid otherwise than in cash at the request of the employee. The Truck Acts did not relate to the amount of wage to be paid to the employee, but to-day minimum wage rates for particular trades are prescribed by numerous

statutes. The Wages Councils Act, 1945, established Wages Councils, which are given power to fix minimum wages in respect of a number of trades and industries. The Councils may also direct as to the length of holidays for workers in such trades and industries, and for payment of wages during holidays, under the Holidays with Pay Act, 1938. Subject to this Act, a servant's right to a holiday is a matter of contract. The terms of the contract may be express or implied; but if there is a right to a holiday once in a year and the servant is rightfully dismissed before the end of that year, he cannot successfully claim pay in respect of the loss of the holiday.

RECEIPTS

Receipts should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, etc., received.

In *Scotland*, as in England, inability to produce receipts does not necessarily bar defence to an action for payment.

TOWN AND COUNTRY PLANNING

The Town and Country Planning Act, 1947, contains very far-reaching provisions affecting the liberty of an owner of land to develop and use it as he will. A person has generally to get planning permission before carrying out any development on his land from the Local Planning Authority. Development charge is not payable in respect of operations begun or uses of land instituted on or after the 18th November, 1952.

What is Development:—

(*a*) Carrying out of building, engineering, mining or other operations.

(*b*) Making a material change in use.

It is expressly provided that if one dwelling-house is converted into two or more dwelling-houses, this involves a material change in use.

Examples of what is not Deemed Development:—

(*a*) Maintaining, improving or altering the interior of a building (except works for making good war damage), provided there is no material change to the exterior.

(*b*) Change of use of property within the curtilage of a dwelling-house for a purpose incidental to the use of the dwelling-house as such. (It will, however, be development if building operations are carried out.)

Application can be made to the Local Planning Authority to determine whether or not an operation or change of use constitutes development.

Planning Permission.—Application for such permission is not always necessary, as the Minister may make Development Orders giving general permission for a specified type of development. Thus a General Development Order of 1950 specified a number of types of development for which no permission is required *e.g.*, enlargement of a dwelling-house (including erection of a garage), so long as the cubic content of the original dwelling (external measurement) is not exceeded by more than 1,750 cubic feet or one-tenth whichever is greater, subject to a maximum of 4,000 cubic feet.

Appeal against refusal of permission lies to the Minister, and from the Minister, in limited circumstances, to the High Court. If the result of the appeal is unsatisfactory, an applicant may in certain circumstances require the Council to purchase the land.

Enforcement Notice.—If development is carried out without permission, or in defiance of conditions attached to such permission, the Local Planning Authority may serve an enforcement notice on the owner of the land calling upon him to demolish or alter any building, or to discontinue the use of land, or to comply with the said conditions. If the notice is not complied with, the Local Planning Authority may take appropriate steps to enforce it, recovering their expenses from the owner for the time being of the land. Appeal against an enforcement order lies to a Court of Summary Jurisdiction and thence to Quarter Sessions.

For further details and other provisions of the planning law, the Act of 1947 and the Orders made under the Act, the Town and Country Planning (Amendment) Act, 1951, and the Town and Country Planning Acts, 1953, 1954 and 1959, should be consulted. Elaborate provisions as to payments for loss of development value by reference to established claims on the £300 million fund (established under the 1947 Act) are contained in the 1954 Act.

Scotland.

In Scotland special provisions, on similar lines, have been made by the Town and Country Planning (Scotland) Act, 1947, which incorporates certain provisions of the Town and Country Planning (Scotland) Act, 1945, all other earlier planning Acts being repealed. The financial provisions of the 1947 Act, have, however, been amended by the Town and Country Planning Act, 1953, which abolished development charges, and by the Town and Country Planning (Scotland) Act, 1954, which set up a new Scheme of compensation. *See also* the Town and Country Planning (Scotland) Act, 1959.

VOTERS' QUALIFICATIONS

The franchise is governed by the Representation of the People Acts, the latest of which, the Acts of 1948 and 1949, have made important changes in the law. Those entitled to vote as electors at a parliamentary election in any constituency are those resident there on the qualifying date who, at that date and on the date of the poll, are British subjects of at least twenty-one years of age and not subject to any legal incapacity to vote; but registration as an elector in the register to be used at the election in question in that constituency is a prerequisite, and at a general election no person may vote in more than one constituency. Since the Electoral Registrars Act of 1949, the registers are prepared once in each year only. Under the Electoral Registers Act, 1953, the Register (of parliamentary and local government electors or, in Northern Ireland, of parliamentary electors) is published not later than February 15 in each year and is for use in the period of 12 months commencing on February 16. The qualifying date referred to is, in England, Wales and Scotland the preceding October 10, and in Northern Ireland the preceding September 15. It is, however, provided that any person who is not of full age on the relevant qualifying date, but is of full age on June 15, and is otherwise duly qualified, is entitled to vote at elections held in Great Britain between October 2 of that year and February 15 of the following year. Detailed provisions are laid down as to the meaning of "residence" in doubtful cases.

The Act of 1948 abolished the university constituencies and the business premises vote.

The Register is prepared by the Registration Officer in each constituency in Great Britain. It is the registration officer's duty to have a house to house or other official inquiry made as to the persons entitled to be registered and to publish preliminary electors lists showing the persons appearing to him to be entitled to be registered. Any person whose name is omitted may claim registration, and any person on the list may object to the inclusion

therein of other persons' names: the registration officer determines the claims and objections. The procedure is slightly different for Northern Ireland.

Special provision is made for "Service voters," who include wives of Service voters resident with their husbands outside the United Kingdom. Such persons may make a Service declaration in a prescribed form and are then treated as resident at the address specified in the declaration. Service voters may vote by post or by proxy, on making the necessary application to the registration officer.

Certain other persons (*e.g.*, those unable to go in person to the polling station owing to the general nature of their occupation, blindness or other physical incapacity, etc.) may vote by post or, in some cases, by proxy as "absent voters."

The local government franchise now depends upon either residence in the area or the possession of a non-resident qualification, *i.e.*, occupation as owner or tenant of rateable lands or premises of the yearly value of not less than £10, excluding occupation of furnished dwelling-houses let for less than nine weeks and excluding occupation as a lodger. There are provisions, similar to those relating to the parliamentary franchise, for the preparation of registers, etc., and in fact the same register is used, as far as possible, with a mark indicating those persons entitled to vote for local government purposes only.

The Acts apply generally to Scotland where certain matters relating to local government and parliamentary elections are further regulated by Representation of the People (Scotland) Regulations, 1949.

WILLS

IMPORTANT NOTE.—*The following notes must be read subject to the provisions of the Inheritance (Family Provision) Act, 1938, which is liable to affect or modify the will of any person (domiciled in England) dying after July 13, 1939.* This Act empowers the High Court to order maintenance out of the testator's estate for the benefit of certain "dependants," *i.e.*, a surviving wife or husband; an unmarried (or invalid) daughter; an infant (or invalid) son. Such order can be made if the will does not itself make "reasonable provision" for the maintenance of the dependant who seeks the order. An application must normally be made within six months of probate. A legally adopted child comes within the definition of a "son" or "daughter" under the Act. For further details as to the limits or an order, the Act itself should be consulted.

Since the object of the Act is to provide *maintenance* for dependants, an application is not likely to be successful where the estate is very small, *e.g.*, two or three hundred pounds.

There are similar provisions under the Matrimonial Causes (Property and Maintenance Act), 1958, whereby the court may order provision out of a deceased's estate for the support of a *former* husband or wife where the marriage has been dissolved or annulled.

REASONS FOR MAKING A WILL.—Every person should make a will. However small the estate, it is safer in every case to protect the interests of the survivors by a will, and by the appointment of one or more trustworthy persons as executors to carry the testator's wishes into effect. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—*e.g.*, the income being paid to his widow and the capital being ultimately divided among his children, for this requires the skill of a practised lawyer. When property is thus "settled," there may be a saving in death duties. Assuming a lawyer is not employed, a person having resolved to make a will must remember that it is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed (see below) an alteration *may* be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration *of any kind whatever* must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is best to make a new will, revoking the old one. The use of *codicils* should be left to the lawyer. *A will should be written in ink and very legibly, on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following forms may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others.

Nothing more complicated should be attempted. The forms should be studied in conjunction with the notes following.

This is the last will and testament of me [*Thomas Smith*] of [*Vine Cottage, Silver Street, Reading, Berks*] which I make this [*thirteenth*] day of [*February, 1961*] and whereby I revoke all previous wills and testamentary dispositions.

1. I hereby appoint [*John Green of —— and Richard Brown of ——*] to be the executor(s) of this my will.

2. I give all my property real and personal to [*my wife Mary* or *my sons Raymond and David equally* or as the case may be].

Signed by the testator in the presence of us both present at the same time who, at his request, in his presence and in the presence of each other have hereunto set our names as witnesses.

Thomas Smith
Signature of Testator:

William Jones (*signed*) of Green Gables, South Street, Reading, tailor.

Henry Morgan (*signed*) of 16, North Street, Reading, butcher.

Should it be desired to give legacies and or gifts of specific property, instead of giving the whole estate to one or more persons, the form above should be used with the substitution for clause 2 of the following clauses:—

2. I give to —— of —— the sum of £—— and to —— of —— the sum of £—— and to —— of —— all my books (*or as the case may require*).

3. All the residue of my property real and personal I give to —— of ——.

TERMS.—Real property includes freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like. The words "my money," apart from the context, will normally only include actual ready money. The expression "goods and chattels" should not be used. In giving *particular* property, ordinary

language is sufficient, *e.g.*, "my house, Vine Cottage, Silver Street, Reading, Berks." Such specific gifts fail if not owned by the testator at his death.

RESIDUARY LEGATEES.—It is well in all cases where legacies or specific gifts are made, to leave to some person or persons "the residue of my property," although it may be thought that the whole of the property has been disposed of in legacies, etc., already mentioned in the will. *It should be remembered that a will operates on property acquired after it has been made.*

EXECUTION OF A WILL, AND WITNESSES.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately afterwards sign their names in his and in each other's presence. A person who has been left any gift or share of residue in the will, or whose wife or husband has been left such a gift, should not be an attesting witness. Their attestation would be good, but they would forfeit the gift. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same."

A *blind person* may make a will in Braille. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. A blind person cannot witness a will.

If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," etc. Any omission in the observance of these details may invalidate the will. *The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.*

EXECUTORS.—It is usual to appoint two executors, although one is sufficient; any number up to and including four may be appointed. The name and address of each executor should be given in full. An executor may be a legatee. Thus a child of full age or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not essential; but it is desirable here as elsewhere, to avoid ambiguity or vagueness.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy generally lapses and falls into the residue. Where a residuary legatee pre-deceases the testator, his share of the residuary estate will not generally pass to the other residuary legatees, but will pass to the persons entitled on the deceased's intestacy. In all such cases it is desirable to make a new will.

TESTAMENTARY CAPACITY.—A minor cannot make a will except, in certain circumstances, if he be a soldier, sailor or airman. A married woman (married on or since January 1, 1883) may dispose by will of any real or personal property as if she were a man.

REVOCATION.—A will is revoked by a subsequent will (but, if it does not expressly revoke former wills, only so far as such subsequent will operates as an implied revocation as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing or otherwise *destroying* the same with the intention of revoking it. Such destruction must either be by the testator or by some other person in his presence and at his direction. *It is not sufficient to obliterate the will with a pen.* Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in contemplation of a particular marriage (Law of Property Act, 1925, s. 177); so that after marriage a new will should be made, except in this last case.

PERSONAL APPLICATION FOR PROBATE OR LETTERS OF ADMINISTRATION

Application for probate or for letters of administration may be made *in person* at the Principal Probate Registry, or at a district registry, by the executors or persons entitled to a grant of administration. Applicants should bring (1) the will, if any; (2) a certificate of death; (3) particulars of property liable to estate duty; and (4) generally, a list of debts and funeral expenses. In an application for administration, the applicant will be required to enter into a bond for due administration, generally with two sureties who must attend at the Registry, although they need not do so at the same time as the applicant.

WHERE TO FIND A PROVED WILL

A will proved since 1858 must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read on payment of a search fee of one shilling. In the latter case, the original will proved in the District Registry, is there kept, and may be seen or a *copy* obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probates and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year.

SCOTS LAW OF WILLS

A domiciled Scotsman, unlike a domiciled Englishman, cannot in certain circumstances dispose of the entirety of his estate. If he leave a widow and children, the widow is entitled to a one-third share in the whole of the moveable estate (her *jus relictae*), and the children are entitled to another one-third share equally between them (their *legitim*). If he leave a widow but no children —or children but no widow—the *jus relictae* or *legitim* is increased to a one-half share in the estate.

The remaining portion is known as the *dead's part*. The widow is also entitled to terce, *i.e.*, a life rent in one-third of her husband's heritable property. A surviving husband and children have comparable rights in the wife's estate. The *dead's part* is the only portion of which the testator can freely dispose. All burdens falling upon the representatives in moveables are payable out of the whole of the moveables before any division. Burdens in the nature of legacies are payable out of the *dead's part*. Pupils cannot make wills. Minors may dispose of moveables without the consent of any other person; but minors (unless they be serving in H.M. forces) cannot dispose of heritage. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 Scots (£8 6s. 8d. sterling) and may be typewritten or even in pencil. A will may be either (1) *holograph*, *i.e.*, written by the testator himself, in which case no witnesses are necessary; a printed form filled up by the testator is not necessarily *holograph* but may be made effectual when it has clearly been adopted as *holograph*. Words written on erasure or marginal additions or interlineations in *holograph* writings, if proved to be in the handwriting of the maker of the deed, are valid; (2) *tested*, i.e., signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, or is blind, his will may be authenticated by a notary and two witnesses. It is better that the will be not witnessed by a beneficiary thereunder, although this circumstance will not invalidate the attestation of the will or (as it would in England) the gift. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh. The original deed may be inspected on payment of a small fee and a certified official copy may be obtained. A Scottish will is not revoked by the subsequent marriage of the testator. The subsequent birth of a child, no testamentary provision having been made for him, may revoke a will in whole or in part. A will is revoked by a subsequent will, either expressly or by implication; but in so far as the two can be read together both wills have effect.

"Confirmation," the Scottish equivalent of Probate, is obtained in the Sheriff Court of County in which the deceased was domiciled at the date of his death or, where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must first be given up. In estates under £300 confirmation is obtained under a simplified procedure at reduced fees.

NORTH ATLANTIC TREATY ORGANIZATION

Headquarters: Porte Dauphine, Paris, 16.

Secretary-General and Chairman of the North Atlantic Council, M. Paul-Henri Spaak (Belgium).

The North Atlantic Treaty was signed on April 4, 1949, by the Foreign Ministers of twelve nations. The twelve are Belgium, Canada, Denmark, France, Iceland, Italy, Luxemburg, the Netherlands, Norway, Portugal, the United Kingdom and United States. Greece and Turkey acceded to the Treaty in 1952 and the Federal Republic of Germany upon the coming into force of the Paris Agreements in 1955.

The original machinery set up to carry out the provisions of the Treaty has undergone considerable modification during the passage of the North Atlantic Treaty Organization from the planning to the implementing stage. Since April, 1952, the North Atlantic Council, the principal body of the Treaty Organization, has been in continuous session in Paris. Member Governments are represented by permanent representatives, who head national delegations of advisers and experts. Ministerial meetings of the Council are held periodically. Heads of Governments may attend meetings of the Council in person. A meeting of Heads of Governments took place in December, 1957. Otherwise, at ministerial meetings, Governments are represented by their Ministers for Foreign Affairs, or by other ministers, according to the nature of the agenda. Each year a Foreign Minister is President of the Council; the Secretary-General is Chairman.

The Council is now directly responsible for the tasks performed before April, 1952, by the former Council Deputies, Defence Production Board and Financial and Economic Board. Specialized functions, such as those assigned to the Planning Board for Ocean Shipping, to the Petroleum Planning Committee, and to other subsidiary bodies, are directed by the Council.

The Secretary-General is appointed by and is responsible to the Council. He has direct access to all NATO agencies and to member Governments, and is responsible for organizing the work of the international Secretariat.

The Secretary-General is assisted by a Deputy Secretary-General, Signor Alberico Casardi (*Italy*), and by three Assistant Secretaries-General, who are: R. Hooper (*U.K.*) for Political Affairs; M. François-Didier Gregh (*France*) for Economic and Financial Affairs; R. Fiske (*U.S.A.*) for Production and Logistics.

The senior military authority in NATO is the Military Committee (composed of a Chief-of-Staff of each member country). Its executive agency is the Standing Group which meets in Washington. The Standing Group is composed of one representative each of France, the U.K. and the U.S.A.—currently Air Chief Marshal Max Gelee (*France*), Air Marshal Sir George Mills (*U.K.*) and Gen. Clark L. Ruffner (*U.S.A.*). It is responsible for higher strategic direction throughout the North Atlantic Treaty area.

Of the five original Regional Planning Groups one remains: the Canada-U.S.A. Regional Planning Group, with headquarters in Washington. The functions of three of the remainder have been taken over by SHAPE (Supreme Headquarters Allied Powers in Europe, under General Lauris Norstad, *U.S.A.*) and its regional commands. The fourth has been absorbed in the Atlantic Command (SACLANT) under Admiral Robert L. Dennison (*U.S.A.*). The Allied Command Channel is exercised by Admiral Sir Manley Power, K.C.B., C.B.E., D.S.O. (*U.K.*).

PROFESSIONAL FEES

The following notes on the Fees and Charges of various Professions are based on information supplied by the appropriate professional Societies and Institutes.

SOLICITORS

Solicitors and their clients may (subject to certain rules designed to prevent undercutting) make special agreements as to remuneration in non-contentious business (including conveyancing) under Section 57 of the Solicitors Act, 1957. In the absence of any such agreement the solicitor's remuneration is governed by Orders made under Section 56 of that Act. There are two methods of charging under the Orders. The more usual is by a scale based upon the amount of money involved; the other is by a charge (usually known as a Schedule II charge) determined by reference to all the circumstances of the case, the amount of money involved being only one factor amongst many. Usually a scale charge is payable in conveyancing matters, provided the transaction has not been abortive, but a solicitor has an option to elect, before undertaking any business, to be paid a Schedule II charge instead. For negotiating sales or purchases the charges are always under Schedule II. *In addition to solicitors' charges, disbursements such as Government stamp duty, search fees and Land Registry fees may be payable.*

The Solicitors' Remuneration Order (1959) and The Solicitors' Remuneration (Registered Land) Order, 1959, increased the scales of permitted charges in the case of certain conveyancing transactions where the consideration does not exceed £1,000.

In sales by auction further charges may be payable, which will be computed under Schedule II below, *e.g.* for preparing or perusing Particulars of Sale and poster and attending the sale.

The following sections illustrate the scales o charges on sales, purchases and mortgages based upon the amount of money involved:—

I. For Unregistered Land

(Land, including houses, having a title which is not registered at the Land Registry).

For the following, charges are the same:—

Vendor's solicitor for deducing title to freehold or leasehold property, and perusing and completing conveyance (including preparation of contract or conditions of sale, if any);

Purchaser's solicitor for investigating title to freehold or leasehold property, and preparing and completing conveyance (including perusal and completion of contract, if any);

Mortgagor's solicitor for deducing title to freehold or leasehold property, perusing mortgage and completing;

Mortgagee's solicitor for investigating title to freehold or leasehold property, and preparing and completing mortgage.;

Scale of Charges

Value of Land or Amount of Charge	Scale of Remuneration
Under £100	£9 9s.
£100 or over, but not exceeding £150	£10 10s.
Over £150 but not exceeding £200	£11 11s.
Over £200 but not exceeding £300	£12 12s.
For each additional £50 thereafter up to £1,000	15s. per £50
For the second and third £1,000	£1 10s. per £100
For the fourth and each subsequent £1,000 up to £10,000	15s. per £100
For the remainder without limit	10s. per £100

Vendor's solicitor for conducting a sale of property by public auction, including the conditions of sale:—

When the property is sold:—For the first £1,000, 30s. per £100; for the second and third £1,000, 15s. per £100; for the fourth and each subsequent £1,000 up to £10,000, 7s. 6d. per £100; for the remainder without limit, 3s. 9d. per £100. When the property is not sold, half the scale rates are charged on the reserved price.

NOTE:—A minimum charge of £7 10s. is to be made whether a sale is effected or not.

Mortgagor's solicitor for negotiating loan:—For the first, second and third £1,000, 26s. 10½d. per £100; for the fourth and each subsequent £1,000 up to £10,000, 5s. 7½d. per £100; for the remainder without limit 3s. 9d. per £100. These charges apply equally to land having a registered title.

Mortgagee's solicitor for negotiating loan:— For the first, second and third £1,000, 33s. 9d. per £100; for the fourth and each subsequent £1,000 up to £10,000, 11s. 3d. per £100; for the remainder without limit, 7s. 6d. per £100.

Title registered after completion.—Where the title is registered under the Land Registration Act, 1925, after completion, charges under Schedule II are payable in addition in respect of the first registration.

II. For Registered Land

(Land including houses having a title registered at the Land Registry.)

Scale of solicitor's charges for Transfers on Sale, Charges, Sub-Charges, Mortgages, Sub-Mortgages and Transfers thereof.

Value of Land or Amount of Charge	Scale of Remuneration
(1) Up to and including £100	£5 15s. 6d.
Over £100 to £150	£6 6s.
Over £150 to £200	£7 7s.
Over £200 to £300	£8 8s.
Over £300 to £350	£8 10s.
For each additional £50 thereafter up to £1,000	10s. per £50
For the second and third £1,000	£1 per £100.
For the fourth £1,000	10s. per £100.
For each subsequent £1,000 up to £13,000	7s. 6d. per £100.
For each subsequent £1,000 up to £17,000	5s. per £100.
For the remainder without limit	4s. per £100.
(2) Above £1,000, fractions of £100 under £50 are to be reckoned as £50, fractions of £100 above £50 are to be reckoned as £100.	

ACCOUNTANTS

The Councils of the three Institutes of Chartered Accountants and of the Association of Certified and Corporate Accountants have not laid down any scale of fees for their members. There are no statutory scales of fees except for certain special appointments such as

Approved Auditors under the Industrial and Provident Societies Act.

Accountancy and auditing.—The Council of the Institute of Chartered Accountants in England and Wales has stated that accountants' charges should generally be calculated on the basis of the type of work involved, the seniority of the persons necessarily engaged on the work and the time occupied by each person engaged. The normal practice is therefore to calculate charges at an appropriate rate per day for the principal and for each of the clerks engaged on the work.

Special work.—The general basis referred to above will not usually be applicable to special types of work involving a special degree of skill or calling for priority, for example, prospectus reports and special investigations. For this type of work special fees are usually agreed with the client.

Receivers, Liquidators and Trustees in Bankruptcy.—Usually a percentage on the amount realized and on the amount distributed in dividend.

The remuneration of a liquidator of a company in a members' voluntary winding-up is fixed by the company in general meeting. In the case of a creditors' voluntary winding-up remuneration is fixed by the Committee of Inspection, or, if there be no such committee, by the creditors. In either case application may be made to the Court to fix the remuneration.

Taxation.—The rates charged for taxation matters are generally higher than those for audits. The Councils of the accountancy Institutes have all intimated that a member undertaking taxation work on the basis that he should be remunerated by a percentage on the amount recovered, or receive no remuneration if no recovery results would be liable to be regarded as acting discreditably.

ARCHITECTS

A.

Conditions of Engagement

1. Members of the R.I.B.A. are governed by the Charters, Bye-laws and Code of Professional Conduct of the Royal Institute.

2. The Architect shall give such periodical supervision and inspection as may be necessary to ensure that the works are being executed in general accordance with the contract; constant supervision does not form part of the duties undertaken by him.

3. In cases where constant superintendence is required a Clerk of Works shall be employed for this purpose. He shall be nominated or approved by the Architect, and appointed and paid by the Client. He shall be under the Architect's direction and control.

4. The Architect shall not make any material deviation, alteration, addition to or omission from the approved design without the knowledge and consent of the Client.

5. The Architect has authority to give orders on behalf of the Client if such are necessitated by constructional requirements provided that the Client shall be immediately notified thereof.

6. The Architect shall, if requested to do so, at the completion of the work, prepare free of charge to the Client, drawings sufficient to show the main lines of drainage and other essential services as executed.

7. The following Architects' charges do not include for Surveyors' work for which see Clauses B 11 to B 16 which are those of the Royal Institution of Chartered Surveyors adopted by the R.I.B.A.

8. The employment of Consultants shall be at the Architect's discretion in agreement with the Client and Consultants shall be nominated or approved by the Architect, and appointed and paid by the Client. Where it is agreed to retain the services of Consultants in no case shall the Architect's fee be reduced by more than one-third on the cost of the work upon which the services of the Consultants are retained, provided always that the Architect's fee on the cost of the whole scheme shall not be reduced by more than one-sixth.

9. An engagement entered into between the Architect and the Client may be terminated at any time by either party upon reasonable notice being given.

10. Copyright in all drawings and in the work executed from them will remain the property of the Architect.

11. Under these Conditions of Engagement, the fees and charges payable to the Architect shall be in accordance with the following Scale of Charges.

B

Scale of Charges

NOTE.—*Apart from the two copies of the drawings and documents provided for in Clause B 1 and the drawings specified in Clause A 6, the fees as set out in this Scale of Charges are in all cases exclusive of the cost of all prints and other reproductions of drawings and documents, travelling and hotel expenses, and other reasonable disbursements.*

1. *New Works*

For taking the Client's instructions, preparing sketch designs, making approximate estimate of cost by cubic measurement or otherwise, submitting applications for building or other licences and town planning, bye-law or other approvals, preparing working drawings, specification or such particulars as may be necessary for the preparation of bills of quantities by an independent Quantity Surveyor, or for the purpose of obtaining tenders, advising on tenders and preparation of contract, nominating and instructing Consultants (if any), preparing, and supplying for the use of the Contractor, two copies of all drawings, specification, or other particulars and of such further details as are necessary for the proper carrying out of the works, giving general supervision as defined in the Conditions of Engagement, issuing certificates for payment, and certifying accounts, exclusive of the services enumerated in Clauses B 5 and B 14, the charge is to be a percentage on the total cost of all executed works as follows:

Total Cost of Executed Works	*Percentage Fee*	*Minimum*
(i) Up to £500	10	
£500–£1,000	9½	£50
£1,000–£1,500	9	£95
£1,500–£2,000	8½	£135
£2,000–£2,500	8	£170
£2,500–£3,000	7½	£200
£3,000–£3,500	7	£225
£3,500–£4,000	6½	£245
Over £4,000	6	£260

(ii) When work is executed wholly or in part with old materials, or where material, labour or carriage is provided by the Client, the percentage shall be calculated as if the works had been executed wholly by the Contractor supplying all labour and materials.

(iii) In addition to a percentage on the total cost of executed works, the Architect is entitled to charge in respect of all works included in the tenders, but subsequently omitted, two-thirds of the charge which would have been payable had they been executed.

2. Variations of Charges

The above Scale of Charges is subject to variation by prior written agreement between Client and Architect in respect of the following:

(i) Repetitive Works: In the case of extensive works of a simple repetitive character, the charge may be reduced by one-sixth.

(ii) Works to Existing Buildings: In the case of works to existing buildings a higher percentage is chargeable, not exceeding twice the amount payable under the Scale for new works of the same cost, and depending upon the intricacy of the work involved.

(iii) Special Works: In works involving special services in respect of fittings, furniture, decorations, exhibitions, garden or landscape design, special fees appropriate to the circumstances are chargeable.

3. Partial Services

In cases where the Architect performs partial services for any reason, including the abandonment, deferment, substitution or omission of any project and/or works, or part thereof, or if the services of the Architect are terminated, the charges in respect of the services performed are as follows:

(i) For taking Client's instructions and preparing preliminary sketch designs to illustrate possibilities of a site or cost of a scheme the charge is on *quantum meruit*.

(ii) For taking Client's instructions, preparing sketch designs sufficient to indicate the Architect's interpretation of the Client's instructions (but not in detail adequate to enable bills of quantities to be prepared) and making approximate estimate of cost, the charge is on *quantum meruit* and shall not exceed one-sixth of the percentage due under Clause B 1 or B 2 (as the case may be) on the estimated cost of such works.

(iii) For taking Client's instructions, preparing sketch designs sufficient to indicate the Architect's interpretation of the Client's instructions, and preparing drawings and particulars sufficient to enable applications to be made for Town Planning, Bye-law and/or Building Act approvals, the charge is one-third of the percentage due under Clause B 1 or B 2 (as the case may be) on the estimated cost of such works.

(iv) For taking Client's instructions, preparing sketch designs, making approximate estimate of cost by cubic measurement or otherwise, and preparing working drawings, specification, or such particulars as may be necessary for the preparation of bills of quantities by an independent Quantity Surveyor, or for the purpose of obtaining tenders, the charge is two-thirds of the percentage due under Clause B 1 or B 2 (as the case may be) on the estimated cost of such works.

(v) If the project or any part thereof is abandoned or deferred or any part omitted or substituted on the Client's instructions during the preparation of the working drawings, the charge is two-thirds of the appropriate percentage on the estimated cost of such works less a *quantum meruit* charge for bringing the working drawings and other particulars up to the stage defined in Clause B 3 (iv).

(vi) In all cases where fees are assessed on the basis of *quantum meruit* regard must be had to all relevant factors.

4. Mode and Time of Payment

The Architect is entitled to payment in stages as follows:

(i) On the completion of sketch designs one-sixth of the total fees payable.

(ii) On the completion of the drawings and particulars sufficient to enable applications to be made for Town Planning, Bye-law and/or Building Act approvals, one-third of the total fees payable less the amounts of any payments already received by the Architect pursuant to sub-clause B 4 (i).

(iii) During the preparation of working drawings and other particulars instalments consistent with the amount of work completed by the Architect.

(iv) On completion of the said working drawings and other particulars, two-thirds of the total fees payable less the amount of any payments already received by the Architect pursuant to sub-Clauses B 4 (i), B 4 (ii) and B 4 (iii).

(v) The remaining one-third of the total fees to be paid by instalments as the building work proceeds consistent with the value of the said building work as certified from time to time.

5. Services not Included in the Scale

Charges assessed on the basis of *quantum meruit* in accordance with Clause B 3 (vi) shall be payable in respect of any additional services involved:

(i) In advising as to the selection and suitability of sites. Negotiating as to sites or buildings. Surveying sites or buildings and taking levels, and making surveys, measurements, and plans of existing buildings.

(ii) In preparing for the use of the Client special drawings in addition to working drawings, and preparing drawings for negotiations with ground landlords, adjoining owners, public authorities, licensing authorities or others.

(iii) In amending working drawings or preparing new working drawings to give effect to alterations of the Client's instructions or changes in design due to causes outside the control of the Architect.

(iv) In negotiations arising from applications for building or other licences, town planning, bye-law or other approvals, and negotiations in connection with Party Walls, Rights of Light and other easements, reservations or restrictions.

(v) Arising out of delay in building operations due to causes outside the control of the Architect.

6. Inspections and Reports

For making inspections, preparing reports or giving advice on the condition of premises, the charge is on *quantum meruit* in accordance with Clause B 3 (vi).

7. Litigation and Arbitration

For qualifying to give evidence, settling proofs, conferences with Solicitors and Counsel, attendance in Court or before Arbitrations or other tribunals, and for services in connection with litigation, the charge is based upon the time occupied in accordance with Clause B 10.

Architects acting as Arbitrators are recommended to base their charges upon the total time occupied in dealing with a case at the rate of £3 3s. an hour exclusive of out-of-pocket expenses and other disbursements.

8. Dilapidations

For preparing schedule and settling the amount if required, the charge is 5 guineas per cent. on the amount of the settlement, or on the estimated cost of complying with the Schedule. (Minimum fee, 5 guineas.)

9. Travelling Time

An additional charge may be made by prior written agreement if the work should be at such a distance as to lead to an exceptional expenditure of time in travelling.

10. Time Charges

In cases in which charges are based upon time occupied the minimum fee is 1½ guineas per hour exclusive of charges for Assistants' time.

NOTE.—*Clauses dealing with the following subjects*

are in accordance with the Schedule of Professional Charges of the Royal Institution of Chartered Surveyors and are adopted by the Royal Institute of British Architects.

11. For approving plans submitted by lessees and inspecting buildings during progress.

12. The laying out or development of estates.

13 For land surveying and the preparation of plans and maps.

14. Preparing bills of quantities and valuing work executed.

15. Valuation of freehold or leasehold properties.

16. Work under the Lands Clauses Consolidation Act or other Acts for the compulsory acquisition of property.

STRUCTURAL ENGINEERS

The following charges are those usually in operation among Consulting Structural Engineers who are not connected with any firm of contractors and who receive remuneration for their services directly from their clients. Full details of the scales which it authorizes can be obtained from the Institution of Structural Engineers, 11 Upper Belgrave Street, S.W.1.

Reports, Advisory Work and Surveys

For inspections, professional advice, opinions and reports: a fee of Three Guineas per hour upwards, minimum three hours at rate agreed, plus any necessary expenses for travel and services of Engineer's staff.

Constructional Work

A fee of £25, plus (1) for Reinforced Concrete, 7½ per cent. on total cost of work, with an additional 1 per cent. on the first £20,000; for preparation of Bending Lists, 5 per cent. on cost of steel bent and fixed in work; (2) for Structural Steelwork and other work except (1) above, 6 per cent. on total cost of work, with additional 1 per cent. on first £20,000; (3) an additional fee where the Engineer is required to give advice or accept responsibility for the strength or safety of brickwork or other items not covered by (1) and (2) above.

The above scale is governed by conditions regarding constructional emergencies, remuneration for work done to the Engineer's Specification and/or Drawings, remuneration for works varied or abandoned, travelling and out-of-pocket expenses, etc.

Bills of Quantities, etc.

A fee of from 1½ per cent. to 2½ per cent. (depending on the size and complexity of the work) of the total actual cost or, in the case of abandoned work, the total estimated cost. Measuring and making-up accounts for variations upon contracts, including pricing and agreeing totals with contractors: 2½ per cent. upon the amount of the additions and 1½ per cent. upon the amount of the omissions, less the provisional sums or work omitted as a whole.

Technical Evidence

For "qualifying," considering documents, preparing proof of evidence, attending consultations, appearing before Parliamentary Committees, Courts of Law, Arbitration Tribunals and Official Enquiries: (1) a fee of Three Guineas per hour upwards, varying in accordance with the standing of the Engineer and the importance of the case, with a minimum of three hours at whatever rate is agreed; (2) a charge for the time spent by the Engineer's assistants; (3) a refresher for each day for which the Engineer is requested to hold himself in readiness to attend but is subsequently not required, at the rate agreed for one hour per day; (4) fees at the agreed hourly rate for time occupied in travel, together with travelling and out-of-pocket expenses.

Valuations and Negotiations for Purchase

For valuation of, and negotiations for the purchase of, engineering undertakings less than £10,000: a percentage charge dependent on the amount of work and responsibility involved; £10,000 or more: a fee in accordance with Ryde's Scale, *i.e.* Thirteen Guineas, plus one-half of one Guinea per cent. of the total.

CONSULTING ENGINEERS

The fees payable to Consulting Engineers for design and supervision are based on a percentage scale and for project reports, inspections, etc., on a lump sum or time scale. Full details can be obtained from the Association of Consulting Engineers (Incorp.), Abbey House, 2 Victoria Street, S.W.1.

A booklet "Professional Rules and Practice and Scales of Fees" which gives full details of fees in addition to containing Model Forms of Agreement between a Client and a Consulting Engineer is issued at 5s. per copy. The Model Forms of Agreement contained in this booklet are:—

Form "A"—For Design and Supervision of Works of Civil Engineering Construction.

Form "B"—For Design and Supervision of Works Principally of an Electrical and Mechanical Nature (not being Electrical or Mechanical Installation Work for Buildings or other Structures to which Model Form "D" applies).

Form "C"—For Design and Supervision of Structural Engineering Work in Buildings and other Structures (where an Architect has been appointed by the Client).

Form "D"—For Design and Supervision of Electrical and Mechanical Installation Work for Buildings and other Structures.

QUANTITY SURVEYORS

In general Quantity Surveyors' fees are calculated as a percentage upon the estimated cost of the work or are based upon the time involved. Details of the scales of charges which they authorize can be obtained from:—

THE ROYAL INSTITUTION OF CHARTERED SURVEYORS, 12 Great George Street, S.W.1., and THE INSTITUTE OF QUANTITY SURVEYORS, 98 Gloucester Place, W.1.

STOCKBROKERS

The Rules and Regulations drawn up by the London Stock Exchange Council are voluminous and technical. On British Government stocks the scale of brokerage is ⅜ per cent. on Stock up to £10,000 Stock and ¼ per cent. on Stock on any balance in excess of £10,000 Stock. On shares not exceeding 15s. the brokerage is ¼d. to 2½d. per share,

Not exceeding	2os.	3d.	per share
"	" 3os.	3¾d.	"
"	" 4os.	4½d.	"
"	" 5os.	6d.	"
"	" 6os.	7½d.	"

and so on. There are minimum charges of 5s. on less than £20; 10s. on less than £100; and £1 on £100 and over. In certain circumstances the above charges may be modified. Copies of the Rules and Scale of Commission may be obtained from the Secretary.

SHIPBROKERS

A scale of Minimum Agency Charges became operative for members of the Institute of Chartered

Shipbrokers (*Office*, 25 Bury Street, E.C.3) from 1920, and has been revised from time to time. Copies (price 6*d.* post free) may be obtained from the Secretary.

AUCTIONEERS AND ESTATE AGENTS

(*Summary based on the Scales of Charges of the Professional Societies. In all cases expenses are excluded*)

Sales by Private Treaty or by Auction

Freehold Property and Leasehold Property, where the rent is less than 2/3rds. of the rateable value, including in the case of auctions the preparation of particulars and advising as to reserves:—On the first £500, 5 per cent.; on the next £4,500, 2½ per cent.; on the residue, 1½ per cent.

In addition to the above charges:—On payments for goodwill, 5 per cent. on the first £1,000 and 2½ per cent. on the residue; and on amounts paid by the purchaser for *Chattels*, *Fixtures*, *Fittings*, *Furniture*, *Trade Stocks*, and other *Movable Effects*, *Timber*, and *Tenant-right*, 5 per cent. to include inventory and valuation if required.

Where the division of an estate into a number of lots involves substantial additional work, an extra fee may be charged.

Sales before Auction

After acceptance of instructions, whether sale arranged by auctioneer or not, the same scale as for sale by auction.

Non-Sale

In the event of non-sale at the auction, a fee, the amount of which is a matter of arrangement, is payable.

Sales within 3 Months after Auction

Whether arranged by auctioneer or not, same commission as for sale by auction merging any fee for non-sale previously paid.

Disposal of Leasehold Property.—On disposing of all leases (other than those to which the foregoing sale scale applies and building leases) either by private treaty or by auction (whether effected by assignment, surrender or otherwise):—On the rent, the same commission as for a letting (*see below*); *and*, on the premium and any consideration equivalent thereto, 5 per cent. on the first £1,000 and 2½ per cent. on the residue; *and*, where the necessary instructions are held, on payments for goodwill, 5 per cent. on the first £1,000 and 2½ per cent. on the residue; and on payments for *Chattels*, *Fixtures*, *etc.*:—As for Freehold Property (*see above*).

NOTE.—Where two Agents are co-operating at the request of the owner, the commission shall be at the rate of a scale and a half.

Purchases

Freehold and Leasehold Property.—For seeking and negotiating the purchase of a property to suit a client's requirements:—2½ per cent. on the first £5,000; 1½ per cent on the next £10,000; and 1 per cent. on the residue. In the case of leaseholds, in addition to the foregoing a fee on the rent equal to that payable under the appropriate letting scale (*see below*). For abortive work a fee to be fixed by arrangement. For negotiating the purchase of a particular property named by the client:—1½ per cent. on the first £15,000; and 1 per cent. on the residue. In the case of leaseholds, in addition to the foregoing, a fee on the rent equal to three-quarters of that payable under the appropriate letting scale (*see below*). If no purchase is effected, the usual scale for valuation should be charged: one guinea per cent. on first £1,000; half a guinea on next £9,000; and a quarter of a guinea per cent. beyond on the residue. Minimum fee, £7 17*s.* 6*d.*

Lettings

NOTES.—(*a*) Should the rent be a progressive one, the commission is based on the average rent for the period up to the first possible break of the tenancy. (*b*) When a property, which an Agent has been instructed to let or sell, is let with an option to purchase, and the tenant afterwards exercises his option, or becomes the purchaser within the period of the option, the commission for selling, less the commission already paid on the letting, will then become payable. (*c*) "Letting" includes a letting to a sitting tenant (including negotiating and agreeing a new rent) or to a nominee of the landlord. (*d*) For the purposes of these scales "rent" means (except where otherwise stated) the rent reserved by the letting plus any regular payments made to the landlord for which the tenant is responsible.

(1) *Unfurnished Premises.*—(*a*) Where there is a premium or any equivalent consideration and the rent (exclusive of any payment in respect of rates, heat, light, water, service or other incidental charges) is less than two-thirds of the rateable value, the same commission as is payable for the sale of such property (*see above*); (*b*) in all other cases, 10 per cent. on 1 year's rent, or, in the case of a letting for less than a year, 10 per cent. on the amount of rent payable under the letting, and *in addition* a commission on the premium or goodwill as for the disposal of leasehold property (*see above*).

(2) *Furnished Premises*, including collection of rent, if required, but excluding the making and checking of inventories: (*a*) for lettings of six weeks or less, 10 per cent. on the amount of rent payable under the letting; (*b*) for lettings of more than six weeks, 7½ per cent. on the amount of rent payable, with a minimum of the amount payable under (*a*) if the letting had been for six weeks.

(3) *Sporting Rights*, including collection of rent if required—10 per cent. on one year's rent or, where letting is for less than one year, 10 per cent. on the amount of rent payable under the letting.

(4) *Farms and Agricultural Land.*—10 per cent. on the first £250 and 7½ per cent. on the residue, of 1 year's rent.

(5) *Land on Building Lease, or at a Fee Farm Rent.*—100 per cent. on the first £100; 50 per cent. on the next £900; and 25 per cent. on the residue, of one year's ground rent; *and in addition* where a premium is paid, a Commission of 5 per cent. on the first £1,000 and 2½ per cent. on the residue.

TAXES, STAMP DUTIES AND LICENCES

INCOME TAX 1960–61

Income Tax is a tax on annual income, not capital, represented by money, or money's worth. In general, the charge to tax is on the full amount of income arising, subject to the deductions authorized by the Income Tax Acts: but the profits or gains of a trade or profession are as arrived at on ordinary accountancy principles, and then adjusted for tax purposes. The income of a married woman living with her husband is aggregaged with his income, but separate assessment may be claimed.

The year of assessment is the fiscal year which runs from 6th April in one year to 5th April in the next. The amount on which tax is assessed depends upon the income of the relevant "basis year." For Schedule D, the "basis year" is normally the year preceding the year of assessment, otherwise the "basis year" is the same as the year of assessment: i.e. tax is charged on the income of the actual year of assessment. An individual carrying on a business or profession can use his own accounting year which ends in the year preceding the year of assessment as the "basic year."

Income Tax is imposed at the rates specified by the annual Finance Acts. There are graduated rates of tax, the principal rate being called the "Standard Rate," which for 1960/61 is 7/9*d.* in the £. There is an additional income tax on higher incomes called "Sur-tax." Tax is imposed on United Kingdom residents in respect of all sources of income, wherever arising, subject to double taxation relief. The enactments relating to income tax were consolidated in the Income Tax Act, 1952, as amended by subsequent Finance Acts.

The Tables which follow show the tax payable on the amount of income specified, after deduction of the personal allowance and, in the case of earned income, the earned income relief. The taxpayer, however, may be entitled to further reliefs which would reduce the tax payable below the amounts shown in the Tables.

STATUTORY INCOME is computed as follows:—

Under Schedule A.—Assessed on an actual year basis, the annual value of Houses, Lands, Tenements, etc., including houses occupied by the owner. Net assessment is computed by deducting scale allowance for repairs, insurance, etc., from rack rental, *i.e.* rent payable when landlord undertakes all repairs and maintenance and tenant pays rates. Owner-occupied houses are usually assessed by reference to rating valuation.

Scale allowance for repairs by reference to gross assessment.

Lands ..... one-eighth

Houses: Where assessment does not exceed £40 ..... one-quarter
Exceeds £40, but not £50 .. £10
Exceeds £50, but not £100 one-fifth
Exceeds £100 ..... £20 plus one-sixth of excess over £100

Maintenance Relief.—Repayment or relief may be claimed for any year where average cost of previous five years' maintenance, etc., exceeds scale allowance for that year. The cost of insurance and agents' charges are allowable. In regard to recently acquired property there may be claimed the excess of the actual year's maintenance over scale allowance, provided this basis is used for first five years of ownership. Except in the case of agricultural property, relief cannot exceed the net annual value.

Under Schedule B.—Assessments are on one-third Schedule A annual value in respect of amenity lands —parks, gardens, etc., not used for husbandry. Also on woodlands, although these can be assessed on actual profits under Sch. D. Case I, if taxpayer so elects.

Under Schedule C.—Dividends, interest, annuities from public revenue on actual year basis. Income Tax is deducted at source.

Under Schedule D.—Profits of Trades, Businesses, and Professions. All interest of money, but interest on Post Office Savings Bank and Trustee Savings Bank accounts up to £15 is exempt from income tax. Such amount of interest has to be included for Sur-tax purposes, grossed at the standard rate.

Income from Foreign or Commonwealth securities, rents and possessions. For persons domiciled and ordinarily resident in Great Britain this income is assessable whether remitted or not. Persons not domiciled or British subjects not ordinarily resident in Great Britain are assessable only on remittances to the United Kingdom of this income in any year in which they become technically resident. Income from Trades or Professions, carried on abroad is assessable only to extent that it is remitted and then only when person entitled thereto is technically resident in United Kingdom.

Profits from letting of Furnished Houses, etc., and Excess Rents (arisin; when rent of unfurnished house less attributable repairs allowance exceeds net Schedule A assessment).

Under Schedule E.—Income from all Offices, Employments and Pensions, including Salaries, Wages, Emoluments, Directors Fees, etc. Taxed by deduction on payment under system known as PAYE on actual year basis. Necessary expenses are allowable, including fees and subscriptions to certain professional bodies and learned societies.

Tax is charged on the emoluments of an office or employment if the holder is resident, and ordinarily resident within the United Kingdom, provided the duties are not performed wholly abroad. A person not resident (or if resident, then not ordinarily resident) in the United Kingdom is charged only on emoluments for duties performed in the United Kingdom.

Income from employments exercised abroad assessable only to the extent that it is received in the United Kingdom, and then only when employee is resident in United Kingdom.

Unemployment, sickness and maternity benefit

and grant; and death grant payable under the National Insurance Acts are not assessable to income tax.

Expense allowances and payments in kind (less expenses incurred in performance of duties) to Directors and employees enjoying emoluments of £2,000 p.a. or more are assessable. Certain payments made on retirement or removal from a person's office or employment (in excess of £5,000) are assessable to tax on him.

TAXABLE INCOME is Statutory Income less Allowances and Deductions as under:

Personal Allowance.—To single person... £140

To married man living with or normally maintaining his wife..... £240

When either husband or wife is absent from United Kingdom throughout a complete fiscal year they are treated as separate entities for tax purposes, each entitled to Single Personal Allowance. A married woman permanently separated from her husband is treated as a *feme sole.*

Allowances for Children.—For each child under 16 (or over that age at the beginning of the fiscal year receiving full time education at a recognized educational establishment) and who does not have income in that year exceeding £100 in his own right, the allowances are:—

(*a*) Child over 16 at commencement of fiscal year..... £150
(*b*) Child over 11 at commencement of fiscal year..... £125
(*c*) Other children (each)..... £100

Scholarship or bursary does not count for this purpose. "Child" includes step-child and adopted child.

Child Allowance may also be claimed when child over 16 years is articled or apprenticed, provided emoluments (exclusive of premiums returned) do not exceed £100 in the year.

When a husband and wife are divorced or permanently separated, relief in respect of any children of the marriage can be given to either the father or the mother or divided between them in any way they may mutually agree. Alternatively, the relief will be divided in the ratio in which they each contribute to the children's maintenance and education, but disregarding any payments which the father makes under an Order of Court or Separation Agreement for the benefit of the children.

The "Family Allowance" for children ranks as the father's income subject to Earned Income Allowance.

Allowance for Dependent Relatives.—A maximum deduction for each dependent relative of £75.

This allowance is reduced by £1 for every £1 by which the relative's own income (excluding voluntary allowance) exceeds £135. Claimant must maintain relative who must be incapacitated by old age or infirmity from maintaining himself or herself, except in the case of his or his wife's widowed mother (which includes any woman living apart from her husband, or whose marriage has been dissolved or annulled). If more than one person gives support to the dependent relative then allowance is divided *pro rata.* The dependent person must not be in receipt of an income exceeding £210.

A person who by reason of his or her own age or infirmity, has to retain the *services of a daughter* resident with him or her is entitled to an allowance of £40.

Allowance for Housekeeper or person looking after children: £75.

Married Couples with Three Children—Earned Income.

The allowance of £75 is granted to:—

(*a*) any male taxpayer entitled to single personal allowances, any female tax-payer who was either working full time in some employment or business or was totally incapacitated throughout the year, and a married man entitled to high personal allowance whose wife is totally incapacitated throughout the whole of the year, who has a female person resident with and maintained or employed by him or her for the purpose of having care of any child or children for whom the taxpayer is entitled to claim child relief.

(*b*) a widow or widower who has a female relative (or, if no relative is available, a female person) resident with her or him in the capacity of Housekeeper.

A widow or widower (and certain other persons) entitled to the allowance for children but with no resident-housekeeper, is entitled to an allowance of £40.

Earned Income.—Allowance of the following fractions of earned income (after deducting allowances for necessary expenses, superannuation, etc.):—

Up to £4,005—Two-ninths.
The next £5,945—One-ninth.

Married woman earning income in her own right has deduction of two-ninths of such earnings and, in addition, an allowance equal to seven-ninths of her earnings subject to a maximum of £140 plus Reduced Rate Reliefs as shown below.

Age Relief.—Allowance of two-ninths of unearned income where taxpayer (or his wife) attains 65 years subject to total income not exceeding £800. Where the total income exceeds £800, marginal relief is given so that the full tax on the investment income scale is not payable until the marginal relief runs out.

Age exemption.—Persons over 65 years of age are exempt from tax if their total incomes do not exceed :—

Single person..... £275
Married couple (either being over 65)..... £440

Marginal relief is given as in Age Relief (above).

Pension Contributions.—Contributions by both employed and self-employed persons to "approved" superannuation fund or for the provision of a life annuity in old age are allowed as deduction from income.

National Insurance Contributions.—Certain deductions are allowable in respect of contributions payable under the graduated contribution scheme by employed, self-employed and non-employed persons respectively. Taxpayer paying "employer's" contribution in respect of personal or domestic servants may deduct whole of such contribution from his income.

Life Assurance Premiums.—Relief is given on premiums paid for Life Assurance or for Contracts for Deferred Annuities on life of taxpayer or his wife. In all cases, except those of policies or contracts taken up in connection with a Superannuation Scheme, a capital sum must be payable at death. Where date of policy or contract is after 22nd June, 1916, and total premiums available for relief to taxpayer and his wife do not exceed £25 an amount of £10 or total premiums, whichever is less, may be deducted from assessable income. Where total premiums exceed £25 relief given at two-fifths of standard rate. For policies or contracts dated before 22nd June, 1916, following rates of relief apply :—

Where total income does not exceed £1,000. Half standard rate (maximum 3s. 6d.).

Income between £1,000 and £2,000. Three-quarters standard rate (maximum 5s. 3d.).

Income exceeding £2,000. Full standard rate (maximum 7s.).

Where annual premium exceeds 7 per cent. of capital sum assured relief is limited to sum equal to 7 per cent. Relief also given on sums paid under Act of Parliament or under terms of employment for securing deferred annuity to widow or provision for children after death of the taxpayer. Relief is given as for life policy or deferred annuity premiums above, except that there is no restriction on amount of standard rate. Total relief under either of these headings limited to one-sixth of total income.

Payments for Retirement Annuities, made under a contract approved by the Inland Revenue, and subject to certain statutory limits, may be deducted from total income for income-tax and sur-tax purposes.

Purchased Life Annuities.—The capital element of such annuities, whenever purchased, is not treated as income, and is not taxable. The annuities concerned are those, for a term referable to a life, which are purchased for money or money's worth from a person whose business is to grant annuities. The capital element, which is constant, is calculated actuarially, and is agreed between the grantor of the annuity and the Revenue. These provisions do not apply—

(*a*) To annuities which are already treated as having a capital element.
(*b*) To annuities bought with sums which have ranked for relief from Income Tax (*e.g.*, retirement annuity premiums).
(*c*) To annuities under wills or settlements.
(*d*) To annuities under sponsored superannuation schemes or purchased in recognition of services in any office or employment.

Reduced Rate Relief.—Rates of tax on taxable income are:—

	in the £
On first £60	1s. 9d.
On next £150	4s. 3d.
On next £150	6s. 3d.
On balance	7s. 9d.

Small Income Relief.—All incomes up to £300 are treated as Earned Income. Marginal relief is given where total income exceeds £300 but does not exceed £405.

Building Society Interest.—Majority of societies operate under special arrangement with Inland Revenue and interest is paid to depositors and shareholders "free of income tax." While there is thus no liability to income tax on such interest it must be included in taxpayer's total income for assessment to sur-tax, grossed at the standard rate.

Sur-tax.—No sur-tax is chargeable on the first £2,000 of total income. Married men add to that exempt portion the difference between Single and Married Personal Allowance (£100). Child, Housekeeper and Dependent Relative Allowance and similar reliefs can also be taken into account.

Incomes over the exempt portion are charged on a sliding scale as follows:—

On each £ of next	£500	2s. in the £
,,	£500	2s. 6d. ,,
,,	£1,000	3s. 6d. ,,
,,	£1,000	4s. 6d. ,,
,,	£1,000	5s. 6d. ,,

,,	£3,000	9s. 6d. ,,
of remainder		10s. in the £

Seven-year Covenants.—Where covenant to pay annual sums of money is made for other than valuable and sufficient consideration, the period of the covenant must be for a term which can exceed six years if the Covenantor wishes to divest himself of such income for income tax purposes. Any such covenant entered into after 10th April, 1946, must be in favour of an individual, not employed in any way by Covenantor (and not, for example, a charitable body) in order to divest the Covenantor of the income for Sur-tax purposes.

Settlements in favour of taxpayer's own infant children.—The Income of any such Settlement made since 22nd April, 1936, is treated as that of the Settlor for all income tax purposes if:—

(*a*) the Settlement can be revoked within a period of six years (unless the child becomes bankrupt).
(*b*) the income can be paid to or for the benefit of the child during the lifetime of the settlor. This ceases to apply at the end of the fiscal year in which the child attains 21 years or marries.

Agreements for the Avoidance of Double Taxation have been made between the United Kingdom and Aden Colony, Antigua, Austria, Australia, Barbados, Basutoland, Bechuanaland, Belgium, British Guiana, British Honduras, British Solomon Islands Protectorate, Brunei, Burma, Canada, Ceylon, Cyprus, Denmark, Dominica, Falkland Islands, Federation of Rhodesia and Nyasaland, Fiji, Finland, France, Gambia, Germany (Rep.), Ghana, Gilbert and Ellice Islands, Greece, Grenada, Guernsey, Ireland (Rep.), Isle of Man, Israel, Jamaica, Jersey, Kenya, Malaya, Mauritius, Montserrat, Netherlands, New Zealand, Nigeria, North Borneo, Norway, St. Christopher and Nevis, St. Lucia, St. Vincent, Sarawak, Seychelles, Sierra Leone, Singapore, Swaziland, Sweden, Switzerland, Tanganyika, Trinidad, Uganda, Union of South Africa, United States of America, Virgin Islands, and Zanzibar.

Double Taxation Relief.—Relief may be obtained by residents of the United Kingdom in respect of any income tax payable in any other Country, Colony or Dominion, not covered by the specific Agreements referred to above, when that income is also liable to British income tax. A credit against the British tax liability on the doubly taxed income is given at a rate equal to the rate paid outside the United Kingdom subject to a limit of the taxpayer's average or effective rate of British tax.

Persons Resident Abroad.—Persons normally resident outside the United Kingdom are not liable to United Kingdom Tax on income arising outside the United Kingdom (including Dominion, Colonial and Foreign Loans issued in London). They are liable, in general, in respect of income from United Kingdom sources but not on the interest from:—

3% War Stock 1955–59; 4% Victory Bonds; 4% Funding Loan 1960–90; 2½% and 3% Defence Bonds (all issues except the 5th); 3% Savings Bonds (all issues); 5½% Funding Loan 1982–84.

Such persons become technically resident in the United Kingdom if they visit for a period or periods exceeding six months in any fiscal year. Also if they visit for any period in a year in which they have retained a place of abode in the United Kingdom, except such persons as are engaged in full-time employment abroad. They would then be liable to United Kingdom Tax on all remittances of income arising abroad. If they visit the United Kingdom in four consecutive years for periods averaging three months or more per annum they would be regarded as ordinarily resident there.

A person who is not resident in the United Kingdom who has income which is liable to United Kingdom tax cannot claim any of the normal income tax allowances unless he is:

(*a*) a British subject;
(*b*) a present or former servant of the Crown; or widow of a former Crown servant;
(*c*) employed by any missionary society controlled from the United Kingdom or a servant of a native State under British protection;
(*d*) a resident of the Isle of Man or the Channel Islands or
(*e*) was previously resident in the United Kingdom but resides abroad for the sake of his health or the health of a member of his family.

Post War Credits.—Those Credits arising out of the temporary reduction of certain income tax allowances during the years 1941–42 to 1945–46 inclusive are repayable to women over 58 and men over 63 years of age, and to widows entitled to Credits in their own right. Where a man or woman has died, repayment is made to personal representatives or beneficiaries, irrespective of age.

Holders of Credits are also entitled to repayment if certified as blind persons or in-patients of hospitals or nursing homes, or if in receipt of any of the following: National Assistance, Constant Attendance Allowance or Unemployability Supplement, Sickness or Injury Benefit, Disablement Pensions, Workmen's Compensation 1956 Supplement; or if registered as unemployed. There is a qualifying period of 26 weeks in certain categories (12 weeks for National Assistance). Interest will be added to the sum repayable. Forms for claiming repayment may be obtained at any Post Office.

INCOME TAX ADMINISTRATION

Income Tax under Schedules A, B, D and E, is assessed by H.M. Inspector of Taxes. Schedules A and B assessments are made by H.M. Inspector for the district in which the land or property is situated. Assessments under Schedule D (Profits of Trades and Professions) and under Scheduie E are made by H.M. Inspector of Taxes for the district in which Trade, Profession or Employment is carried on, or from which the Pension is paid, otherwise assessments are made in the District in which the taxpayer resides. Notices of Assessment are sent to taxpayer who should make a formal appeal against any assessment which he disputes direct to H.M. Inspector by whom the Notice was issued within the time limit for such appeals, as stated on the notice. The grounds of appeal should be given. If the assessment cannot be agreed with H.M. Inspector, the appeal will be heard by the General Commissioners. Alternatively, certain appeals are made to the Special Commissioners. An appeal may be made by way of Case Stated from the appeal Commissioners' decision to the High Court on points of law.

Income Tax is payable to the Collector of Taxes.

Sur-tax is assessable by the Special Commissioners of Income Tax to whom returns of total income are made, except where a full return of income is made to H.M. Inspector of Taxes. Appeals are made to the Special Commissioners and thence to the Courts by way of Case Stated.

Penalties may be incurred for failure to make proper returns of income.

Every person chargeable to income tax must give notice of chargeability within one year (unless an income tax return has been already made).

PAYE

Income Tax payable under Schedule E is deducted by employer, who accounts for it to the Collector of Taxes. The amount of tax deduction from each payment of salary, wage, pension, etc., is determined by reference to Tax Tables issued by H.M. Inspector of Taxes to employer, in conjunction with the taxpayer's Code Number. This Code Number is an interpretation of the taxpayer's Allowances and Reliefs. Notices of Coding are issued by H.M. Inspector of Taxes and they may take into account income assessable under other Schedules. Notice of Coding should be checked on receipt and H.M. Inspector of Taxes informed of any necessary amendment in order that no considerable over or under-deduction of income tax may take place. The tax deductions are on a cumulative basis and can be carried on by successive employers should changes in employment take place during fiscal year. When leaving one employment a statement (Form P45) showing code number, remuneration, and tax deductions to date should be obtained from old employer and handed, in due course, to new employer. At the end of fiscal year employer should give employee a statement (Form P60) showing total remuneration and tax deductions for the year.

DEDUCTION OF TAX

Tax is deductible at the standard rate from annual interest, annuities and annual payments such as ground rents and mortgage interest. The tax deducted may be retained by the payer unless he has not borne tax himself to an equivalent amount, in which case he must account to the Revenue for the tax deducted. Interest payable to a bank or building society (under the special arrangement with the Revenue) is paid in full. Such payments are deductions in computing total income. The tax paid under Schedule A by an occupier is normally deductible from the rent paid by him to the landlord.

STANDARD RATES OF INCOME TAX SINCE 1900

The standard rate of income tax, as imposed by the Income Tax Act, 1842, was 7*d.* in the £. Rates since 1900 are as follows:—

	s.	*d.*		*s.*	*d.*		*s.*	*d.*		*s.*	*d.*
1900–1	1	0	1915–16	3	0	1931–34	5	0	1941–46	10	0
1901–2	1	2	1916–18	5	0	1934–36	4	6	1946–51	9	0
1902–3	1	3	1918–22	6	0	1936–37	4	9	1951–53	9	6
1903–4	0	11	1922–23	5	0	1937–38	5	0	1953–55	0	0
1904–9	1	0	1923–25	4	6	1938–39	5	6	1955–59	8	6
1909–14	1	2	1925–30	4	0	1939–40	7	0	1959–60	7	9
1914–15	1	8	1930–31	4	6	1940–41	8	6	1960–61	7	9

OTHER TAXES AND STAMP DUTIES

NOTE.—(1) The instruments for which the use of adhesive postage stamps is "permitted" include:—Agreements liable to the duty of 6d.—s. 22. Bills of exchange (including cheques), for payment of money on demand—s. 34 (1). Policies of Insurance (not life)—s. 99. Receipts—s. 101 (2).

(2) The Commissioners as a general rule allow deeds, etc., to be stamped after execution:—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY:

Deeds and instruments not otherwise excepted, within 30 days of *first* execution.

NOTE.—Where wholly executed *abroad*, the period begins to reckon from the date of arrival here.

PENALTIES ENFORCEABLE ON STAMPING, IN ADDITION TO DUTY:—

	£	s.	d.
Agreements under hand only. Attested copies or contracts: after 30 days from their first execution	10	0	—
Receipts, within 14 days after they have been given	5	0	0
Receipts, after 14 days, but within one month	10	0	0
Other Instruments presented after the proper time (subject to special provisions in some cases)	10	0	0

	£	s.	d.
AGREEMENT for Lease, *see* LEASES.			
AGREEMENT FOR SALE OF PROPERTY—charged with *ad val.* duty as if an actual conveyance on sale (see *post*, pp. 1164–5) with certain exceptions, *e.g.* agreements for the sale of land, stocks and shares, goods, wares or merchandise, or a ship (*see* s. 59 (1), Stamp Act, 1891). If *ad val.* duty is paid on an agreement in accordance with this provision, the subsequent conveyance or transfer is not chargeable with any *ad val.* duty and the Commissioners will upon application either place a denoting stamp on such conveyance or transfer or will transfer the *ad val.* duty thereto. Further, if such an agreement is rescinded, not performed, etc., the Commissioners will return the *ad val.* duty paid.			
AGREEMENT, not otherwise charged with duty, under hand only	0	—	6
N.B.—The following agreements are exempt:—			
(*a*) Where the value of the subject-matter is less than £5.			
(*b*) For the hire of any labourer, artificer, manufacturer, or menial servant.			
(*c*) For the sale of any goods, wares, or merchandise (but hire purchase agreements, *post*, p. 1166, are not exempt).			
Not otherwise charged with duty, under seal or with clause of registration	0	10	0

"Marketable Security" includes the Registered Bonds and Debentures, generally, of Companies, Corporations, and Public Bodies.

Where a transfer is made to a body of persons established for charitable purposes only, or to the trustees of a trust so established, the maximum rate of duty is £1 per cent.; and a conveyance or transfer on sale of local authority stock issued by a local authority after the beginning of 1953, is chargeable at one-half of the above rates.

CONVEYANCE OR TRANSFER ON SALE (in the case of a Voluntary Disposition, *see* below, p. 1167) of any property (*except* stock or marketable securities for which, *see* above), where the consideration for the sale does not exceed £3,500 ..... nil

				£	s.	d.
Exceeds £3,500 but does not exceed £4,500 for every £50 and any fraction of £50.....				0	5	0
Exceeds £4,500, but does not exceed £5,250 for every £50 and any fraction of £50.....				0	10	0
Exceeds £5,250, but does not exceed £6,000 for every £50 and any fraction of £50.....				0	15	0
Exceeds £6,000, for every £50 and any fraction of £50.....				1	0	0

If the consideration does not exceed £3,500 (or £4,500, or £5,250, or £6,000, as the case may be) the Conveyance or Transfer on Sale must contain a certificate of value certifying that the transaction does not form part of a larger transaction or series of transactions in respect of which the amount or value or the aggregate amount or value of the consideration exceeds £3,500 (or £4,500 or £5,250 or £6,000, as the case may be).

If the Conveyance or Transfer on Sale does not contain the appropriate statement duty at the full rate of £1 for every £50 or fraction of £50 will be payable whatever the amount of the consideration.

However, if the consideration does not exceed £300, and the instrument does not contain a certificate of value, then if the consideration for the sale does not exceed £5, for every 25s. or part thereof of the consideration..... 0 0 6

£5,250 ..... ⅝ " " " "
£6,000 ..... ¾ " " " "

Where a transfer is made to a body of persons established for charitable purposes only, or to the trustees of a trust so established, the maximum rate of duty is £1 per cent.

CONVEYANCE OR TRANSFER of any other kind ..... fixed duty 0 10 0

Included under this head are Transfers for nominal consideration within any of the following categories:—

(*a*) Transfers vesting the property in trustees on the appointment of a new trustee of a pre-existing trust, or on the retirement of a trustee.

(*b*) Transfers, where no beneficial interest in the property passes, (i) to a mere nominee of the transferor, (ii) from a mere nominee of the transferee, (iii) from one nominee to another nominee of the same beneficial owner.

(*c*) Transfers by way of security for a loan or re-transfer to the original transferor on repayment of a loan.

(*d*) Transfer to a residuary legatee of stock, etc., forming part of the residue divisible under a will.

(*e*) Transfers to a beneficiary under a will of a specific legacy of stock, etc. (*Note.*—Transfers by executors in discharge, or partial discharge, of a pecuniary legacy (unless made under an express power of appropriation) are chargeable with *ad valorem* duty on the amount of the legacy so discharged.)

(*f*) Transfers of stock, etc., forming part of an intestate's estate to the person entitled to it.

(*g*) Transfers to a beneficiary under settlement on a distribution of the trust funds of stock, etc., forming the share or part of the share of those funds to which the beneficiary is entitled in accordance with the terms of the settlement.

(*h*) Transfers on the occasion of a marriage to trustees of stocks, etc., to be held on the terms of a settlement made in consideration of marriage.

(*i*) Transfers by the liquidator of a company of stocks, etc., forming part of the assets of the company to the persons who were shareholders, in satisfaction of their rights on a winding-up.

The evidence necessary to establish that a transfer is liable to the fixed duty of 10*s.* should take the form of a certificate setting forth the facts of the transaction. In cases falling within (*b*) or (*c*) such a certificate should be signed by (1) both transferor and transferee or (2) a member of a Stock Exchange or a solicitor acting for one or other of the parties or (3) an accredited representative of a bank; in the last case when the bank or its official nominee is a party to the transfer, the certificate, instead of setting out the facts, may be to the effect that "the transfer is excepted from Section 74 of the Finance (1909–10) Act, 1910." A certificate in other cases should be signed by a solicitor or other person (*e.g.*, a bank acting as trustee or executor) having a full knowledge of the facts. £ s. d.

Registering Officers will in any case in which a Marking Officer's certificate has not been given require such evidence in order to satisfy themselves that a transfer stamped with the 10*s.* fixed duty is duly stamped.

COVENANT—For repayment of money, *see* MORTGAGE.

For original creation and sale of any annuity, *see* CONVEYANCE.

For an annuity (except on original creation and sale) or other periodical payments, *see* BOND.

750,000	1,000,000	75
1,000,000		80

Lower rates of duty are payable in certain circumstances on property passing on two deaths occurring within 5 years of one another. (Finance Act, 1958.)

A reduction of 45 per cent. of the above rates is applied to the "agricultural value" of agricultural property; and (as respects deaths on and after 30th July, 1954) to certain business assets, viz.: "industrial hereditaments" and "machinery or plant" (Finance Act, 1954, s. 28).

Gifts made by deceased during his life for public or charitable purposes are liable for duty, unless made more than twelve months before death; other gifts are liable for duty, unless made more than five years before death, although graduated rates are provided by the Finance Act, 1960; gifts made in consideration of marriage, or as part of deceased's reasonable normal expenditure, excepted. Gifts not exceeding £100 in value or amount (or in certain circumstances £500) also excepted.

Payment of Estate Duty may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

Interest at 2 per cent. per annum is also payable on the Estate Duty on personalty from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and 2 per cent. interest is charged on all unpaid instalments from twelve months after death.

FEES are taken in all Public Departments by means of Stamps: such payments are accounted for to the Exchequer under the heading of Miscellaneous Revenue.

Exc. £500, and not exc. £1,000, for every £100 or fractional part of £100	0	1	0
Exc. £1,000, for every £1,000 or any fractional part of £1,000	0	10	0

LEASES:—Lease or tack of any dwelling-house or part thereof for any definite term not exceeding a year at a rent not exceeding £40 per annum, 1*d.*, but if there is a consideration other than rent, the duty is 2*d.*; for any definite term less than a year of any furnished dwelling-house or apartments where the rent for such term exceeds £25, 5*s.*, unless there is a consideration other than rent, or the average rate of rent exceeds £100 per annum, when the duty is 10*s.*; of any lands, tenements, etc., in consideration of any rent, according to the following table:—

Annual rent not exceeding	* Term not exceeding 35 years			* Term not exceeding 100 years			Term exceeding 100 years		
£	£	s.	d.	£	s.	d.	£	s.	d.
5	0	1	0	0	12	0	1	4	0
10	0	2	0	1	4	0	2	8	0
15	0	3	0	1	16	0	3	12	0
20	0	4	0	2	8	0	4	16	0
25	0	5	0	3	0	0	6	0	0
50	0	10	0	6	0	0	12	0	0
75	0	15	0	9	0	0	18	0	0
100	1	0	0	12	0	0	24	0	0
Exceeding £100, for every £50 or fraction of £50	1	0	0	6	0	0	12	0	0

* If the term is indefinite the same duty is payable as if the term did not exceed 35 years. However, if the term does not exceed 35 years and the annual rent does not exceed £100, but there is a consideration other than rent, the duty is double that shown in the first column.

Agreement for lease not exceeding 35 years, same as actual lease.

Where a consideration other than rent is payable and duty is charged on that consideration at conveyance rates, the same graduation applies where the consideration does not exceed £6,000 as under Conveyance or Transfer on Sale (except stock or marketable securities), provided that any rent payable does not exceed £50 a year.

	£	s.	d.
MINERAL RIGHTS DUTY.—This is payable in respect of minerals which are the subject of a mining lease, or which are being worked by the proprietor of the minerals. Duty is payable annually on the rental value of all rights to work minerals and of all mineral wayleaves. Rate, per 20*s.* of the rental value	0	1	0
MORTGAGE under hand only, *see* EQUITABLE MORTGAGE.			
MORTGAGE, BOND, ETC., not exceeding £10	0	0	6

„ „ 250	0 12 6
„ „ 300	0 15 0
Exceeding £300, for every £100 and fractional part of £100	0 5 0
Transfer of Mortgage (except marketable securities), for every £100	0 1 0
Reconveyance, Release, etc., per £100	0 1 0

No stamp duty is payable on discharge of a Building Society mortgage, or on the discharge of a local authority mortgage.

Collateral, or auxiliary, or additional, or substituted security (other than an equitable mortgage), when the principal security is duly stamped; for every £100, or fraction of £100, 1s. 6d., up to a maximum of 0 10 0

POWER OF ATTORNEY, etc., for receiving certain prize-money or wages 0 1 0

For the receipt of any money, or bill, or note, not exceeding £20, or of any periodical payments not exceeding £10 annually 0 5 0

For the receipt of dividends or interest of any stock, if for one payment only 0 1 0

Ditto in any other case 0 5 0

Power of attorney of any other kind 0 10 0

An order, request, or direction under hand only from the proprietor of any stocks or shares to any Company or to any officer of any Company or to any banker to pay the dividends or interest arising therefrom to any person therein named is not chargeable with duty.

PROCURATION, Deed, etc., of 0 10 0

PROMISSORY NOTE, *see* BILLS OF EXCHANGE.

PROPERTY AND INCOME TAX, *see* INCOME TAX, pp. 1157–62.

RECEIPTS, £2 or upwards 0 0 2

RECEIPTS FOR SALARIES, Wages, and Superannuation, and other like allowances are exempted by Sect. 36 Finance Act, 1924.

	£ s. d.
REVOCATION of any Trust of Property not being a Will	0 10 0
SETTLEMENTS.—Any instrument whereby any definite sum, or stock, or security, is settled or agreed to be settled in any manner: for every £100 or part of £100	0 5 0
SHARE CERTIFICATE, FOREIGN, to Bearer in first negotiation in U.K., for every £25, or fraction of £25	0 0 6

SHARE WARRANT and Stock Certificate to Bearer:—

Issued under the provisions of the Companies Acts—three times the *ad valorem* Duty chargeable on a Transfer for a consideration equal to the nominal value of the Shares or Stock.

STOCK CERTIF., *see* SHARE WARRANT.

SURTAX, *see* p. 1161.

TRANSFER OF STOCK, *see* CONVEYANCE.

VOLUNTARY DISPOSITION *inter vivos*:—

On any instrument being a voluntary disposition (*inter vivos*) of any property (except stock or marketable securities, *see ante*, under Conveyance or Transfer) where the value of the property conveyed or transferred does not exceed £3,500	nil
Exceeds £3,500, but does not exceed £4,500, for every £50 and fraction of £50	0 5 0
Exceeds £4,500, but does not exceed £5,250, for every £50 and fraction of £50	0 10 0
Exceeds £5,250, but does not exceed £6,000, for every £50 and fraction of £50	0 15 0
Exceeds £6,000, for every £50 and fraction of £50	1 0 0

The instrument must contain similar certificates of value as a Conveyance or Transfer on Sale (*see*, pp. 1164–5), with the substitution of the words "property conveyed or transferred" for the word "consideration."

If the value of the property does not exceed £300, the same graduated rates apply as under Conveyance or Transfer on Sale (except Stock or marketable securities).

N.B.—The instrument is not deemed to be duly stamped unless it has been adjudicated, *i.e.* the instrument has been lodged with the Commissioner who will adjudge the value of the property and the duty payable.

LOCAL TAXATION LICENCES

DOG, GAME AND GUN LICENCES

In England and Wales, Dog, Game and Gun Licences are administered by the respective County Councils and County Borough Councils and the proceeds retained by them; and in Scotland by the Commissioners of Customs and Excise. Licences are issued for the Councils by the Post Office.

	£ s. d.
DOGS, of any kind (annually, from first day of month of issue), Great Britain	0 7 6

Dogs under 6 months of age, and those kept solely for the purpose of tending sheep or cattle on a farm, or by shepherds, or by blind persons for their guidance, exempt from Duty.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springs; proprietors, or tenants, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own enclosed land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, airmen, territorial soldiers, or constables, *on duty or at practice*, need not take out a gun licence, nor need

occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits.

The rates of duty are as follows:—

	£	s.	d.
GAME LICENCES, if taken out after 31st July and before 1st Nov., to expire on 31st July following	3	0	0
After 31st July, to expire 31st Oct.	2	0	0
After 31st Oct., to expire 31st July	2	0	0
For a continuous period of 14 days	1	0	0
Gamekeeper's (Great Britain), to expire 31st July	2	0	0
Game-Dealer's Licence, to expire 1st July, annually	2	0	0
GUN LICENCES (gun, air gun or pistol)	0	10	0

A *Firearm Certificate* (5/– for the first, 2/6 subsequently—renewable every 3 years) is also necessary (with certain exceptions) for any person in possession of a firearm, other than a smooth bore gun with a barrel not less than 20 inches in length, or an air weapon.

A person under 17 may not purchase or hire and (with certain exceptions) a person under 14 may not have in his possession a firearm.

Firearm regulations are strictly enforced.

OTHER LOCAL LICENCES

Power to levy the duties on the following licences was transferred to county and county borough councils by the Finance Act, 1949.

	£	s.	d.
HAWKERS, annual licence	2	0	0
MONEYLENDERS, annual licence (to July 31)	15	0	0
February to July	10	0	0
PAWNBROKERS, annual licence	7	10	0
REFRESHMENT HOUSES, annual licence	1	1	0

An abatement of 17*s.* 10*d.* may be obtained by a person also taking out a wine retailer's on-licence in respect of a refreshment house not open after 10 p.m.

MECHANICALLY PROPELLED VEHICLES

Road licences and driving licences for mechanically-propelled vehicles are issued in England and Wales by county councils and by county borough councils (Scotland, 4 cities and Greenock, Motherwell, Paisley and Wishaw), on behalf of the Ministry of Transport. Renewal licences are issued in certain circumstances by the Post Office.

	£	s.	d.
Bicycles (other than electrically propelled):			
(*a*) If the cylinder capacity of the engine does not exceed 150 cubic centimetres	†0	17	6
(*b*) Exceeds 150 c.c. but does not exceed 250 c.c.	†1	17	6
(*c*) Exceeds 250 c.c.	*3	15	0
Bicycles which are electrically propelled	0	17	6
†Additional if used for drawing trailer or side-car	0	10	0
* Additional if used for drawing trailer or side-car	1	5	0

Reduced duty on certain bicycles.—Where the cylinder capacity of the engine of a bicycle exceeds 250 c.c. and the bicycle (*a*) is one in respect of which a licence was taken out before Jan. 1, 1933, and (*b*) does not exceed 224 lb. unladen weight, the bicycle shall be treated for the purpose of the above table as if the cylinder capacity of the engine exceeded 250 c.c. but not 350 c.c.

	£	s.	d.

Having a seating capacity for not more than 4 persons	12	0	0
Having a seating capacity exceeding 4, but not exceeding 20 persons	12	0	0
For each additional person over 20	0	10	0

Licensing of Public Vehicles.

Public vehicles and also the persons concerned with driving and conducting them must be licensed. Vehicles are licensed by the Traffic Commissioners; licensing of personnel is effected by the authority in the area in which they live—not the area where the vehicle is to operate. Addresses of the Licensing Authorities can be obtained from local Police Stations. See also *Driving Licence Rates*, p. 1169.

Tractors, Cranes, Excavators, Agricultural Vehicles, etc.

	£	s.	d.
Locomotive ploughing engines, tractors, agricultural tractors and other agricultural engines, not used for hauling on roads any objects except their own necessary gear, etc.	2	0	0
Vehicles designed, constructed and used for the purpose of trench digging or any kind of excavating or shovelling work which (1) are used on public roads only for that purpose or for the purpose of proceeding to and from the place where they are to be used for that purpose, and (2) when so proceeding neither carry nor haul any load other than such as is necessary for their propulsion or equipment	2	0	0
Vehicles designed and constructed as mobile cranes which (1) are used on public roads only either as cranes in connection with work being carried on at a site in the immediate vicinity or for the purpose of proceeding to and from a place where they are to be used as cranes; and (2) when so proceeding neither carry nor haul any load other than such as is necessary for their propulsion or equipment	2	0	0
Mowing machines	2	0	0

Vehicles (other than vehicles in respect of which duty is chargeable under the foregoing provisions) which are constructed and used on public roads for haulage solely and not for the purpose of carrying or having superimposed upon them any load except such as is necessary for their propulsion or equipment:—

	£	s.	d.

Not exceeding 1 oz. ..... 6*d.*
For each further oz., or less ..... 4*d.*

WEIGHT LIMITS:—Inland, none; Elsewhere, 4 lb.

SIZE LIMITS: (*a*) If in roll form:—Inland and elsewhere length, 32 in.; length + twice diameter, 39 in. (*b*) not in roll form:—(i) United Kingdom, Irish Republic, British Commonwealth, territories under British Trusteeship and British Postal Agencies in Bahrain, Muscat, Qatar and the Trucial States, 24 × 18 × 18 in.; (ii) Elsewhere, length, 24 in. length + width + depth, 36 in. Envelopes must be at least 4 × 2½ in. for inland destinations. To all overseas destinations the minimum limits for letters in the form of a roll are 6½ inches for the length and twice the diameter combined (at least 4 inches for the greatest dimension), unless provided with a strong address label at least 6½ inches in length and width combined and 1½ inches in width. For letters other than in the form of a roll the minimum limits are one surface 4 inches in length, 2½ inches in width, unless provided with a strong address label of the dimensions mentioned above.

POST CARDS (p. 1175).

Inland, British Commonwealth etc. in (a) above:—
Single ..... 2½*d.*
Reply paid (2½*d.* stamp on each part) ..... 5*d.*

Elsewhere abroad:—
Single ..... 4*d.*
Reply paid ..... 8*d.*
Limit of size for all destinations, inland or abroad: maximum, 5½ inches in length, 4½ inches in width; minimum, 4 inches in length, 2½ inches in width.

PRINTED PAPERS, BOOKS (p. 1175).

Inland:—
Not exceeding 2 oz. ..... 2*d.*
Not exceeding 4 oz. ..... 4*d.*
For each further 2 oz., or less ..... 1*d.*

British Commonwealth and Foreign:—
For first 2 oz. ..... 2*d.*
For each further 2 oz., or less ..... 1*d.*

Exceptionally, newspapers, periodicals, books, pamphlets, maps and sheets of music which comply with the conditions shown in the Post Office Guide under *Printed Papers at Reduced Rates* may be sent abroad at the prepaid rate of 2½*d.* for the first 2 ounces and 1*d.* for each additional 2 ounces or fraction thereof.

LIMITS: Size, as for Letters; Weight: Inland, 2 lb. All destinations abroad, 6½ lb.; but a packet of books, sewn or bound, up to 11 lb. may be sent abroad.

Unless stamped at least 2½*d.*, printed papers posted after a prescribed hour are liable to be held over until next day.

MAGAZINE POST

Canada and by *direct* steamship *only*:—
Not exceeding 6 oz. ..... 1*d.*
Over 6 oz. to 1½ lb. ..... 1½*d.*
Each further ½ lb. (up to 5 lb.) ..... ½*d.*
Size limit: 24 × 18 × 18 in.

COMMERCIAL PAPERS

British Commonwealth and Foreign only:—
Not exceeding 10 oz. ..... 6*d.* (minimum charge)
Every further 2 oz., or less ..... 1*d.*
Limits: Size, as for Printed Papers; Weight, Brit. Commonwealth, Territories under British Trusteeship and British Postal Agencies in Bahrain, Muscat, Qatar and the Trucial States, 5 lb.; *Elsewhere*, 4 lb.

NEWSPAPERS

(*See also* p. 1175).

Inland (Newspapers "Registered at G.P.O."):—
Not exceeding 6 oz. ..... per copy 2½*d.*
Every further 6 oz., or less ..... per copy 1½*d.*
Limits: 2 lb. in weight; in size as *Letters*.

Inland: Newspapers registered at the G.P.O. may be sent at printed paper rate; newspapers not registered are sent at the printed paper rate.

British Commonwealth and Foreign: See printed papers.

SAMPLES (*See also* p. 1175).

Inland (not to Irish Republic):—
Not exceeding 2 oz. ..... 2*d.*
Not exceeding 4 oz. ..... 4*d.*
Every additional 2 oz. or less ..... 1*d.*

British Commonwealth and Foreign:—
Not exceeding 2 oz. ..... 2*d.*
For each further 2 oz. or less ..... 1*d.*

LIMITS: Inland: As for letters, weight 8 oz.; Abroad: British Commonwealth, territories under British Trusteeship and British Postal Agencies in Bahrain, Muscat, Qatar and the Trucial States, 24 × 12 × 12 in., 5 lb. Elsewhere: as for Letters a ii, 1 lb. If in form of roll, everywhere as for letters, A. To all overseas destinations the minimum limits of size are as for letters.

SMALL PACKETS (*See also* p. 1175).

(*British Commonwealth and Foreign*—certain countries only)
Not exceeding 10 oz. ..... 10*d* (minimum charge)
For each further 2 oz. or less ..... 2*d.*
LIMITS: Maximum size, as for letters A and Bii. Minimum limits of size as for letters; Weight, 2 lb.

INSURED BOXES (*See also* p. 1174).

(*British Commonwealth and Foreign*—certain countries only)
Not over 10 oz. ..... 1*s.* 8*d.* (minimum charge)
For each further 2 oz. or less ..... 4*d.*
Plus appropriate fee for insurance.
LIMITS: Maximum size, 12 × 8 × 4 in. Minimum size limits as for letters other than in the form of a roll; weight, 2 lb.

PARCELS

Should be marked "Parcel Post," and must be handed across the counter; postage must be prepaid by stamps, affixed by the sender. On Sundays parcels are not accepted or (except during Christmas) delivered. The name and address of sender should be inside and (not too prominent) on the outside of every parcel, and preferably be to the left of and at right angles to the name and address of the addressee.

A rural postman will accept any packets he can conveniently carry, except overseas parcels or overseas letters intended for insurance; but if on foot or cycle not more, without notice, than 15 lb. from one person. He may weigh parcels on request. Mail-drivers need not accept between regular stopping points.

Parcels to or from Irish Republic, Channel Is. or I. of Man are liable to customs duty: except in last case, the sender must declare contents when posting. Addressee must pay clearance fees (1*s.* or 2*s.*) if any duty be payable. Senders can undertake to pay customs charges of Irish Republic

and some overseas countries a deposit is required. The sender of a parcel from the Channel Islands may also pay the customs charges etc., at the time of posting.

Inland:—(Limit of size: length, 3 ft. 6 in.; length and girth combined, 6 ft.):—

U.K. and Isle of Man only:—

Not over	1 lb.	1s. 6d.	Not over	6 lb.	2s. 6d.
" "	3 lb.	1s. 9d.	" "	7 lb.	2s. 9d.
" "	4 lb.	2s. 0d.	" "	8 lb.	3s. 0d.
" "	5 lb.	2s. 3d.	" "	11 lb.	3s. 3d.
	Not over 15 lb. (limit)			3s. 6d.	

AIR MAIL SERVICES

For mode of packing, prohibitions, limits of size, &c., see Post Office Guide.

Normal regulations as to make up and acceptance of various categories of postal packets and parcels apply equally to air mail items. A blue air-mail label, obtainable free from post offices, must be affixed to each air mail item except letters, letter packets and postcards for Europe. Air mail labels should not be fixed to these latter items or delay will result. Special air-mail rates apply to correspondence for members of H.M. Forces overseas (see leaflet PL80).

AIR LETTERS, postage 6*d*., written on special Air Letter forms may be sent to all countries. The special forms may be obtained at post offices.

SECOND CLASS MAIL. Printed papers, Commercial Papers, Samples, Small Packets may be sent by air to countries outside Europe at the rates shown in col. 4 below. Minimum charges: Commercial Papers, 6*d*.; Small Packets, 10*d*. NEWSPAPERS. Publications registered at the G.P.O. as newspapers may be sent at the reduced rates indicated in the footnote below. There is no Second Class air mail service to Europe.

European Countries

Letters, letter packets and postcards for all European countries, except those for which overseas rates are quoted below, are normally despatched daily by air or surface transport, whichever offers earlier delivery. The rates are:—

Letters, 6*d*. for the first ounce;
4*d*. for each additional ounce.

Postcards, 4*d*.

For Gibraltar and Malta the rates are:—

Letters, 5*d*. for the first ounce;
3½*d*. for each additional ounce.

Postcards, 2½*d*.

Air mail labels should not be used.

Air Parcel Post to Europe. Rates are included in the Overseas Parcel Post tables, see pp. 1169–81.

Overseas Countries Outside Europe

Rates for letters, postcards and second class mail appear below; for air parcel rates, see pp. 1169–81.

COUNTRIES OUTSIDE EUROPE

For air mail services to Europe, see above. Air Parcel Rates, pp. 1169–81. For details of insurance and times of postings at London Chief Office and of transmission to principal cities, see G.P.O. Air Mail Leaflet, from Post Offices (*free*).

GENERAL REGULATIONS

EXPORT RESTRICTIONS.—Under Board of Trade regulations many kinds of goods, including certain foodstuffs, may be sent abroad (including Irish Republic) only under the authority of an export licence. Enquiries in the matter should be addressed to the Controller, Export Licensing Branch, Board of Trade, Gavrelle House, 14, Bunhill Row, London, E.C.1.

Under the Defence (Finance) Regulations, senders of trade letter packets or parcels exceeding £500 in value to most foreign countries, including the U.S.A., and also to Canada (including Newfoundland), must furnish with the parcel a currency declaration (form C.D.3) which, together with explanatory notices, may be obtained from banks.

Senders of private gift packets or parcels exceeding £100 in value must furnish with the packet or parcel a currency declaration C.D.3.

PROHIBITED AND DUTIABLE ARTICLES.—Among prohibitions are offensive or dangerous things, packets likely to impede the P.O. sorters, and certain kinds of advertisement. To Channel Islands, and I. of Man dutiable articles must be sent in Parcels. Abroad generally they may be sent in Parcels, in Insured Boxes and Small Packets (to those countries which accept them) or (where the "Green Label" system applies) in Letters and in some cases sample packets.

CERTIFICATE OF POSTING.—Given as a matter of course for registered and insured items. May also be obtained for ordinary parcels (no charge) and other unregistered packets (fee, 1*d.*).

RECORDED DELIVERY (inland, *not to Irish Republic*).—A new service to be available in 1961 provides for a certificate of posting and a receipt on delivery. Money and jewellery will not be allowed, and other contents must not exceed £2 in value. The service does not apply to parcels.

UNPAID PACKETS, except Business Reply packets and redirected parcels are charged *double postage* on delivery; UNDERPAID PACKETS, *double the deficiency.*

UNDELIVERABLE POSTAL PACKETS.—*Inland packets chargeable with a postage of 3d. or more*, undelivered, are returned to sender without charge, if his address is found either outside or inside. If the sender's address is not available, letters containing nothing of value are destroyed; packets containing anything of value, and parcels, if not applied for, are generally disposed of after 3 months, or if perishable are dealt with as requisite. *Packets chargeable with postage not exceeding 2½d.* are returned to sender only on payment of a second postage, and if name, address and request for return appear on outside; those without such request are disposed of. *British packets undelivered abroad* are returned to sender here on payment of charges due; printed papers of no value only if request for return appears outside in a language known in the country of destination. Magazine Post packets are charged with return Postage, when return is requested. Parcels further incur other charges unless abandonment is requested *at the time of posting.*

REPLY COUPONS, for the purpose of prepaying replies to letters, are exchangeable abroad for stamps representing the minimum letter postage rate from the country concerned to the U.K. Price (valid in all countries of the Universal Postal Union), 1*s.*; (valid within the Commonwealth and Irish Republic only), 5*d.* Sold at chief offices.

POSTE RESTANTE (solely for the accommodation of travellers, and for three months only in any one town).—A packet may be addressed as a rule to any Post Office except Town Sub-Offices, and should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, fictitious names, or Christian name only, it is treated as undeliverable. Applicants must furnish sufficient particulars to ensure delivery to the proper owner. Redirection from a Poste Restante is not undertaken for more than 14 days unless longer (up to 3 months) is applied for. Letters at a seaport for an expected ship are kept 2 months; otherwise letters are kept for 2 weeks—or for 1 month if originating from abroad—at the end of which time they are treated as undeliverable, unless bearing a request for return at or before the end of the period.

REDIRECTION.—(1) By agent of addressee: *Packets other than parcels and business reply* may be reposted free not later than the day after delivery (not counting Sundays and public holidays) if unopened and not tampered with, and if original addressee's name is unobscured. *Parcels* may be redirected free of charge, within the same time limits, only if the original and the corrected addresses are both within the same Town Delivery Area (or within the London Postal Area). *Registered packets*, which must be taken to a Post Office, are *re-registered* free only up to day after delivery. (2) By the Post Office (not undertaken when other persons remain at the address). Requests for redirection of *letters*, &c., should be on printed forms, obtainable from the postmaster, and must be signed by the persons to whom the letters are to be addressed. Redirection is free for 3 months (except for parcels re-directed to a different Town Delivery Area, see above); thereafter for each different surname and each new address costs 5*s.* for 12 months, and 10*s.* for each subsequent year. Separate forms must be filled in for the forwarding of *telegrams.*

REGISTRATION, INLAND.—All kinds of postal packets intended for registration should be marked "Registered" in bottom left-hand corner, and *must be handed to an officer of the Post Office, and a receipt taken.* The packets must be made up in a reasonably strong cover appropriate to their contents. Parcels (or the string with which they are tied) and letters must be fastened with adhesive (if tape is used it must be transparent and each piece must be signed or distinctively marked), or sealed with wax, lead, &c. Minimum fee 1*s.* 6*d.*, exclusive of postage. Advice of delivery, a further 3*d.* The latest time for registering is usually half an hour before the latest time for posting ordinary packets. Compulsory registration is applied to (*a*) any packet apparently meant for registration and wrongly posted (1*s.* less any prepaid excess postage); (*b*) packets found open (or undeliverable) and containing any bank or currency note, coin, jewellery, stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, &c., in each case 10*s.* or more in value (1*s.*).

COMPENSATION, INLAND.—Subject to certain prescribed regulations which are fully set forth in the Post Office Guide, the Post Office pays compensation for (i) loss of or damage to registered letters and parcels, (ii) though not as a legal right, for loss of or damage to unregistered parcels and for unregistered packets conveyed by Express Messenger all the way. The onus of making up properly any packet sent by post and of packing adequately any article or articles enclosed therein lies on the sender, and the Post Office does not accept any responsibility for loss arising from faulty or inadequate packing. No compensation is paid for consequential injury or damage arising in respect of anything sent by post. *Registered letters and parcels* (*including items sent to the Irish Republic*): The fees for registration are 1*s.* covering compensation up to £10; 1*s.* 1*d.*, £20; and 1*d.* for each additional £20 up to the maximum of 2*s.* 8*d.* for £400. (No legal right to compensation exists in respect of registered letters and parcels sent to and from Irish Republic.) *Unregistered parcels and unregistered packets conveyed by Express Messenger all the way:* Maximum compensation £5 (£4 for unregistered parcels sent to or received from Irish Republic).

Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, etc.) is only given if the money is sent by *registered letter* post in one of the special envelopes sold officially (see p. 1175) and, in the case of paper money, if particulars (for identification) are kept; the

maximum compensation for coin, which must be packed so as not to move about, is £5. Compensation cannot be paid for loss or damage in the case of any packet containing anything not legally transmissible by post; and for fragile articles only if they have been adequately packed and the cover is conspicuously marked "Fragile, with care." No compensation is paid for deterioration due to delay of perishable articles or for damage to exceptionally fragile articles, liquids or semi-liquids sent by letter or parcel post to or from Irish Republic whether registered or not.

REGISTRATION, BRITISH COMMONWEALTH AND FOREIGN (except for parcels and a magazine post packet for Canada, including Newfoundland), is in force to all countries with the exception of Chagos Islands, North Korea and North Viet-Nam. Valuable articles may not be sent in unregistered letters. Fee, 1*s.* 6*d.* If claimed within a year, compensation (in the U.K., £2 18*s.*) is paid to the sender for entire loss of registered packets while in the custody of a country in the Universal Postal Union, subject to certain conditions.

INSURANCE, BRITISH COMMONWEALTH AND FOREIGN, may be effected on packets to many countries at the following rates:—1*s.* 8*d.* for £24; 2*d.* each further £12 up to 6*s.* 10*d.* for £396 and 7*s.* for £400 (lower maxima in many countries). For *H.M. Ships abroad and also members of H.M. Army and Air Force overseas using closed Forces addresses* (e.g. British Forces Post Office followed by a number) only parcels are insurable, up to £50. Packets containing no articles (besides correspondence) but valuable papers (banknotes, &c.) or valuable documents (plans, &c.) can be insured as *letters*; other valuable articles should be sent as insured parcels, or as "insured boxes."

COMPENSATION up to a maximum of 93*s.* may be given for loss or damage in the U.K. to *uninsured* parcels to or from most Commonwealth and Foreign Countries, if certificate of posting is produced.

No compensation will be paid for any loss or damage due to the act of the Queen's Enemies.

INSURED BOX POST.—Jewellery and precious articles (*not* letters or paper valuables) may be sent in insured boxes to certain countries. Customs declarations must be filled in.

CASH ON DELIVERY SERVICE, INLAND (*not* to or from Irish Republic, nor to H.M. Ships.)—A sum (Trade Charge) up to £40 can, under certain conditions, be collected from addressee and remitted to sender of a parcel or registered letter posted at a Money Order Office, or of goods consigned by railway. Fees (extra to usual postal or rail charges): For Trade Charge up to £1, 1*s.* 2*d.*; £2, 1*s.* 4*d.*; £5, 2*s.* 6*d.*; and for each further £5 or part thereof, 2*d.* An additional charge of 6*d.* is made on consignments sent by rail.

CASH ON DELIVERY, BRITISH COMMONWEALTH AND FOREIGN.—Applicable to parcels only, but not to all countries, nor to H.M. Naval and Military Forces and R.A.F. serving overseas. Fees for collection: 4½*d.* for Trade Charge (amount to be collected) not exceeding £1, with 2½*d.* extra for each additional £1 of Trade Charge up to the maximum, which is usually £40 (fee 8*s.* 6*d.*), but in some countries less. Addressee has also to pay on delivery, besides Customs, if any, a further fee (4*d.* in U.K.) not prepayable. If Trade Charge cannot be collected, the rules for undeliverable parcels apply.

EXPRESS and SPECIAL SERVICES (INLAND).—In general the express services are limited to the hours of telegraph business, but the times vary according to the service used and local conditions. No. (4) (*below*) is available on Sundays only. Waiting fees: 10 minutes free, each further 10 minutes or less, 4*d.*:—(1) *All the way*, by P.O. messenger, of packets, conspicuously marked "Express" above the address, handed over the counter. Inclusive charge, 1*s.* per mile, or part of a mile, with 3*d.* on each *separate* packet after the first. Live animals, liquids, and money may be delivered by this service. (2) *After transmission by post*, on *addressee's* application (1*s.* per mile, or part of a mile, and 2*d.* for every ten or less additional packets). (3) *After transmission by post*, at *sender's* request "Special Delivery" from the ordinary delivery office, if messengers are available (1*s.*+ postage). Packets must be marked "Express," and letters bear a broad blue or black vertical line back and front. (4) *Special delivery on Sundays of postal packets (except parcels) handed in on Saturdays.* Limited inter-city services, for London, Belfast, and certain provincial cities (except that the service is not in operation from Southampton to Belfast) are available *only*: (1) Sundays: reciprocally between certain towns as shown in the Post Office Guide; (2) Good Friday: *to* London only *from* towns in (1). Delivery is made from offices only during periods when they are open for telegraphic business. The handing-in offices in London are:—The London Chief Office, King Edward St., E.C.1., W. and S.W. District Offices, and (Branch Offices) Camberwell Green, Clapham Common, Hammersmith Broadway, Holloway, Leicester Square, Stratford, and Swiss Cottage. Packets, marked "Express: Sunday Delivery," must be handed in in time to catch *preceding* night mails (in London 5.15 p.m.—6.30 p.m. for provincial towns). The latest time of posting to Belfast should be ascertained at selected office of posting. Fee is 3*s.* 0*d.* in addition to postage. Not available for parcels. (5) ("*Railex.*") Postal packets not liable to registration are despatched by rail, met, and specially delivered in Britain, Douglas (I.O.M.), Northern Ireland, Jersey and Guernsey. Inclusive charges, 2 oz., 6*s.*; 1 lb. (maximum) 7*s.* 0*d.*; but packets handed in in Northern Ireland or forwarded from Jersey and Guernsey to Britain, Douglas or N. Ireland may not exceed 2 oz. (6) *A Railway Parcel* is similarly accelerated at the cost of a telegram, of railway charges, and of Service (1) at both ends of its journey.

RAILWAY LETTERS, &c.—A letter, not liable to registration, may be handed in at the parcel or booking office of a railway station, at any time when the station is open to the public, for conveyance by the next available train. A railway letter may either be addressed to be called for at a station, or to the residence of the addressee in which case it is posted at the station named in the address. The service is available between any two stations in Great Britain and Northern Ireland, between Great Britain and Jersey, Guernsey and Douglas (I.O.M.), and from Great Britain and Northern Ireland to the Irish Republic. It is not available at or to stations of the London Transport Executive. Fees (besides postage): at stations in Great Britain, Jersey, Guernsey and Douglas (I.O.M.), 2 oz., 1*s.* 0*d.*; 4 oz., 1*s.* 8*d.*; 1 lb. (maximum), 2*s.* 7*d.*; at stations in Northern Ireland, 2 oz. (maximum), 7*d.* The maximum weight for letters to the Irish Republic is 2 oz. Except on Sundays, or in Irish Republic, the letter can be delivered Express under Service (3), or directly from the station (Service (1)) by wiring for messenger to meet it. For other combinations of rail and express, *see* preceding paragraph, Services (5) and (6).

AIRWAY LETTERS. — On certain internal air routes operated by the British European Airways Corporation, letters may be handed in at the airport or

town terminal for conveyance by the next available direct air service to be transferred to the post at the distant town terminal or to be called for at the airport or town terminal. Fees (besides postage): 2 oz., 11*d*.; 4 oz., 1*s*. 6*d*.; 1 lb. (maximum), 2*s*. 4*d*. The conditions on which this service operates are, in general, similar to those applying to the Railway Letter Service. The service is not available to the Irish Republic or to any country overseas. Full information can be obtained from any office of B.E.A.C.

INTERNATIONAL EXPRESS SERVICE.—Delivery by special messenger of correspondence (including parcels) to or from certain countries. In some cases the service is restricted to certain towns. 1*s*. is paid by the sender, the rest, if any, by addressee, according to the local regulations. (*See* P. O. Guide.)

POST CARDS.—Minimum size 4×2⅜ in., maximum 5⅜×4¼ in. The left-hand half of the address side may be used for correspondence, inland or abroad. Plain cards, if as stiff as official cards and not under $\frac{1}{10}$th inch thick, may also be used both inland and abroad.

Reply Post Cards for abroad must have the heading *Carte Postale avec réponse payée* on first part, and on the second part (valid only to country of origin) *Carte Postale—Réponse*.

BUSINESS REPLY SERVICE (Inland, excluding Irish Republic). This service enables a person or firm to receive cards, letters, etc. from clients without prepayment of postage, the postage together with a fee of 2*d*. being paid by the addressee on each card or letter delivered.

A licence to use the service must be obtained from the Post Office.

PRINTED PAPER POST (including former BOOK POST).—For certain printed or written matter (p. 1170).

By this post may be sent books and other works of a literary character, with or without written dedications, and in the inland service any other *written*, *typed* or *printed* matter not being *in the nature of a letter*, drawings, paintings, photographic prints, engravings, maps, &c., together with normal non-fragile binding and anything necessary for safe transmission. Commercial printed forms, legal documents, printers' copy and proofs, examination papers, answers and corrections, the writing on which refers solely to the subject matter of the document, Christmas and picture cards with date, names and addresses of sender and addressee, and with conventional formulas not exceeding 5 words or initials, are also admitted, and circulars (if in characters resembling typewriting, only under special conditions). To overseas, only printed matter in general is admitted as Printed Papers; items written or drawn, such as receipts, invoices and statements of account, admissible in the inland printed post service, go only as Commercial Papers, and there are other differences. Written chess-moves and puzzle-solutions, also blank stationery, are inadmissible. Printed papers being subject to examination in the post, the cover, if any, must be capable of easy removal and replacement for purposes of examination, *i.e.* without breaking, tearing, ungumming, or cutting. (For full conditions see the Post Office Guide *or* free leaflet P. 386.)

ARTICLES FOR THE BLIND (Inland, including Irish Republic). Books, papers, literature and specified articles specially adapted for the use of the blind are admissible subject to certain conditions. A packet should bear on the outside the indication "Articles for the Blind" and the name and address of the sender. Packets must be capable of easy examination in the post. Rate:—2 lb., ½*d*.; 5 lb., 1*d*.; 8 lb., 1½*d*.; 11 lb., 2*d*.; 15 lb., 2½*d*. Limits: weight, 15 lb.; size, as for letters.

BLIND LITERATURE, COMMONWEALTH AND FOREIGN (in other respects treated as Printed Papers):—Papers, periodicals and books, if printed in special type (also plates for embossing blind literature, and voice recordings and special paper intended solely for the use of the blind) subject to certain conditions of posting, marked outside "Blind Literature", with name and address of sender. Packets must be capable of easy examination in the post. They may be sent post free by surface route to all parts.

SAMPLE POST (not to Irish Republic).—Restricted to bona-fide *Trade* Samples, without saleable value; but keys sent unaccompanied, printers' blocks, fresh cut flowers, and certain scientific specimens can be sent *abroad* by Sample Post. Packets must be capable of easy examination in the post. (*See* p. 1170.)

SMALL PACKETS POST (Commonwealth & Foreign).—For small articles of merchandise by Printed Paper mails. Registration is allowed; not insurance. Available only to certain countries. A green Customs label must be affixed and, in certain cases, Customs declarations prepared. (*See* p. 1170.)

NEWSPAPER POST (INLAND).—For newspapers "registered at the G.P.O." (p. 1170).

The cover, if any, must be open at both ends and easily removable, and copies should be folded so that title is readily inspected. No writing or additional printing is permitted, other than the words "with compliments", name and address of sender, request for return if undelivered, and a reference to a page.

Newspapers not "registered at G.P.O." or supplements to registered newspapers apart from their ordinary publications should be sent at printed paper rate.

STAMPS, ENVELOPES, POST CARDS, &c.

Stamps of reigns before that of King George V are no longer valid.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties) are sold for the respective values of ½*d*., 1*d*., 1½*d*., 2*d*., 2½*d*., 3*d*., 4*d*., 4½*d*., 5*d*., 6*d*., 7*d*., 8*d*., 9*d*., 10*d*., 11*d*., 1*s*., 1*s*. 3*d*., 1*s*. 6*d*., 2*s*. 6*d*., 5*s*., 10*s*., and £1. Books containing 6 3*d*., 6 1½*d*., 6 1*d*. and 6 ½*d*. stamps, 3*s*., or containing 18 3*d*. stamps, 4*s*. 6*d*., or containing 12 3*d*. and 6 each of 2½*d*., 1*d*. and ½*d*. stamps, 5*s*. Rolls of ½*d*., 1*d*., 1½*d*., 2*d*., 2½*d*., 3*d*. or 4*d*. stamps are also sold, joined lengthwise or sideways and rolls of 6*d*. stamps joined lengthwise.

REGISTERED LETTER ENVELOPES with a 1*s*. 3*d*. embossed stamp (1*s*. for registration and 3*d*. for postage), are of four sizes: F 5¼ in.×3¼ in. or G. 6¼ in.×3⅝ in., 1*s*. 4½*d*. each; H. 8 in.×5 in., 1*s*. 5*d*. each; K. 11½ in.×6 in., 1*s*. 7½*d*.

FORCES AIR LETTER FORMS issued against purchase of 3*d*. stamp.

LETTER CARDS with 3*d*. stamp: 4*d*. each.

POST CARDS, with impressed 2½*d*. stamp: 3*d*. each. *Reply*: double the *Single* figures.

EMBOSSED ENVELOPES with 3*d*. stamp: "A" (4¾×3⅝ in.) or "Commercial" (5⅛×3¼ in.), 4*d*. each. Air Letter Forms impressed with 6*d*. stamp, 6*d*. each.

Embossed or impressed postage stamps cut out of envelopes, post cards, letter cards, air letter forms, newspaper-wrappers, or telegram forms, may be used as adhesive stamps in payment of postage or telegrams provided they are not imperfect, mutilated, or defaced in any way.

MONEY ORDERS

Advice of Payment: 6*d*. inland (and to Irish Republic), 3*d*. overseas orders (to certain countries). Payment may be stopped (fee 9*d*.); or deferred up to 10 days in case of Ordinary Inland Money Orders. Inland orders (including those for Irish Republic) may be crossed for payment through a bank.

Inland Ordinary Money Orders (and to Irish Republic).

The poundage charged is, for sums not exceeding £10, 1*s*. 0*d*.; and for each additional £10, 2*d*., to

£50 (maximum), 1s. 8d. No order may contain a fractional part of 1d. The rules and regulations are on the forms issued. No poundage is charged for M.O. in payment of many Revenues (*e.g.*, Income Tax) if demand note is produced.

Inland Telegraph Money Orders (and to Irish Republic).

Money may be transmitted by this means from most Money Order offices which despatch telegrams, and paid at most of those which also deliver telegrams, and at some other offices. On Sundays, Christmas Day and Good Friday and in Scotland on New Year's Day, Inland telegraph money orders for amounts not exceeding £5 are issued at all Money Order Offices which transact telegraph business at the times when these offices are open for telegraph counter business and sums up to £5 are payable at, or in the delivery areas of, London Chief Office, the District Offices, and some Branch Offices in London, and during the hours when telegraph business is transacted at those offices outside London which open on Sunday.

Poundage at the same rate as for Ordinary Inland Money Orders, *plus* supplementary fee of 6d., and cost of official Telegram of Advice, 3s. 0d. for Inland Orders and 3s. 6d. for Irish Republic Orders.

Ordinary Money Orders for Abroad.

Poundage, up to £2, 2s; £5, 3s.; £10, 4s., and thereafter 2s. per £10 or part thereof. Limits of amount vary according to destination but in any case may not exceed £40; validity, normally 12 months.

At present, not more than £10 per day per remitter can be sent to Canada or any other country outside the *Scheduled Territories* (formerly known as the Sterling Area), and then only when the purpose of the remittance is declared on a special form and permission has previously been granted by the Accountant General's Department, G.P.O. (Postal Remittance Branch I).

Telegraph Money Orders or Abroad.

Only to certain countries, *e.g.*, Australia, Canada, India, New Zealand, S. Africa, U.S.A Poundage as in last paragraph, *plus* cost of official Telegram of Advice (at Letter Telegram rate, if desired, to certain countries) *plus* a supplementary fee. For restrictions, see the preceding paragraph.

POSTAL ORDERS

Postal Orders (British pattern) are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and paid in most countries within the Commonwealth. Transmission of postal orders to Canada or any other country outside the Scheduled Territories (formerly known as the Sterling Area) is prohibited except to members of H.M. Forces under special arrangements, particulars of which may be obtained at any Post Office transacting Postal Order business. They are *paid* (but not *issued*) in Irish Republic. They are printed with a counterfoil, for every multiple of 6d. up to 5s., for 6s., and by 1s. steps up to £1 1s. then for £2 and every multiple of £1 up to £5. Adhesive, unmarked current British Postage Stamps not exceeding two in number, if affixed in the 2 spaces provided, increase the value of an Order by not more than 5d. (orders up to 4s. 6d.) or 12d. (orders of 5s. and upwards). Poundage: 6d and 1s., 2d.; 1s. 6d. to £1 1s., 3d.; £2 to £5, 6d. The name of payee must be inserted. If not presented within six months of the last day of the month of issue, Orders must be sent to the local Head Postmaster, or in London to the District Postmaster, for verification, and commission equal to the original poundage will be charged.

INLAND TELEGRAMS

Telegrams are accepted during counter business hours at any post office or railway station at which telegraph business is transacted. They may also be handed with the necessary payment to messengers delivering telegrams or express letters. Telegrams may be tendered by telephone at all times. Rate, 12 words or less 3s. 0d. (to Irish Republic 12 words or less 3s. 6d.), each further word 3d. Standard Greetings telegrams on appropriately designed forms in golden decorative envelopes cost 3s. 6d. for 12 words or less, each extra word 3d. Greetings telegrams for special occasions on a large *de luxe* folded card with matching envelope cost 5s. 0d. for 12 words or less, each extra word 3d. Greetings telegrams may be tendered by telephone or handed in any day prior to day of delivery. Priority rate (not available to or from Irish Republic) 1s. extra. A redirection charge of 3s. 0d. per telegram is made if the original and new addresses are in the same place, delivery area or London Postal District. In all other cases the redirection charge is at the ordinary inland rate. Telegrams, except Press telegrams, handed in on *Sundays* and (exc. Scotland) *Good Friday* or *Christmas Day* are charged 1s. 6d. extra. Replies may be prepaid up to 12s.; the reply vouchers may be used in payment or part payment of any Post Office telegram or any telegraph or telephone account rendered by the Post Office, or its value refunded to sender of original telegram. Receipt for charges free on request. Certified copy 1s. 6d. There is no charge for delivery in the United Kingdom. In the Irish Republic delivery is free to addresses within 1 mile of the delivery office; beyond that any necessary charge will be collected on delivery.

TELEGRAPH OFFICES ALWAYS OPEN IN LONDON:— Chief Office (King Edward Street, E.C.1), Leicester Sq., Charing Cross Road, W.C.2.

COMMONWEALTH AND FOREIGN TELEGRAMS

The charges for ordinary or FULL RATE telegrams from the United Kingdom to places abroad are shown below and on pp. 1179–81. The minimum charge for an ordinary telegram is as for 7 words. To any place in the British Commonwealth the full rate does not exceed 1s. 10d. per word. Urgent telegrams may be sent at double the ordinary rate.

For telegrams of a social character the GLT (Commonwealth Social Telegram) service is available to Commonwealth countries. The charge is 9s. 2d. for 12 words or less (including the indicator =GLT=), and 12d. for each word after 12 except to Canada, Cyprus, the British West Indies, Bermuda, British Guiana, and British Honduras to which lower charges apply; to Burma it is 10s. 0d.

Most countries admit Letter Telegrams at half the full rate but there is a minimum charge as for 22 words. Letter Telegrams, which must be written in plain language, are subject to delay in transmission in favour of ordinary telegrams.

Phototelegrams, i.e. pictures, photographs, drawings, plans, printed, typed or written documents may be telegraphed in Facsimile to many European and extra-European countries. Full particulars of all telegraph charges and services available to any country will be given on enquiry at any Postal Telegraph or Post Office Cable & Wireless Office.

RADIOTELEGRAMS

Radiotelegrams for transmission to ships at sea in any part of the world may be handed in at any Postal Telegraph Office or dictated over for telephone. The standard rate of charge the messages sent to ships through coast stations in the British Isles is 1s. 8d. a word; there is a reduced

rate of 1*s.* a word for messages to ships regularly engaged on short voyages to or from ports in the British Isles. The address should contain (1) the name and/or rank of the addressee, (2) the name of the ship, and (3) either the name of a British coast station if the sender knows that the ship is within range of that station, or, if the sender does not know the name of the appropriate coast station, standard rate messages should be addressed to Portishead Radio or "Wireless", and reduced rate messages to Wick Radio.

Radiotelegrams may be sent to service personnel on board H.M. Ships in foreign waters at a charge of 11½*d.* a word and in the Home Fleet at a charge of 6½*d.* a word. The address should contain (1) the name of the addressee and his rank or rating, (2) the word "Warship" (or "Submarine") (3) the name of the ship (or identifying letters and number) and (4) the word "Admiraltyradio" (or, in the case of the Home Fleet, the words "Homewaters Admiraltyradio").

Radiotelegrams may also be sent to R.A.F. vessels at a reduced rate of 6½*d.* per word. Such radiotelegrams should be addressed in the same way as for commercial vessels and in addition should include the words R.A.F. Vessel before the name of the ship.

INLAND TELEPHONES

The quarterly rental for single exclusive lines for residential subscribers is £3, for business subscribers it is £3 10*s.*; if over 3 miles from the exchange, an extra 10*s.* a quarter is payable in respect of each furlong or part thereof beyond the 3 miles. Shared service, in which two subscribers use one line but enjoy nearly all the facilities of exclusive line service, is offered under certain conditions. For this service a rebate of 10*s.* 0*d.* is allowed from the normal quarterly rental for a single exclusive line. Calls to exchanges within the local call area are charged 2½*d.* from residence telephones and 3*d.* from business telephones (4*d.* from a call office). Trunk call charges (*viz.*, to exchanges outside the local call area) vary with distance but do not exceed 3*s.* 6*d.* by day (for 3 minutes) and 2*s.* during the cheap rate period which is 6 p.m. to 6 a.m. weeknights and 6 p.m. Saturdays to 6 a.m. Mondays (7*s.* 6*d.* and 3*s.* 3*d.* to Irish Republic). Call office charge 3*d.* extra. Personal calls (to specified person) 1*s.* 6*d.* extra (cheap rate period 9*d.*); if the person cannot be found nothing further is charged. Where subscriber trunk dialling facilities are provided local and dialled trunk calls are charged in 2*d.* units (3*d.* from a call office); the length of time per unit depends on the distance of the call, from 3 minutes for local calls to 12 seconds for distances over 50 miles (the time allowance is increased during the cheap rate period). For fuller information see Preface to Telephone Directory.

TELEX SERVICE

Annual rental of teleprinter, associated equipment and line to Telex exchange is £160 per annum in most cases. Where nearest Telex exchange is more than 30 miles distant an additional rental based on the excess mileage applies. Charges for inland calls between exchanges 35 miles or more apart are about half equivalent charges for daytime telephone calls. International calls to European countries are about two-thirds of equivalent charges for telephone calls; to United States of America and to South Africa charges are the same as for telephone calls, *i.e.* £1 per minute (minimum three minutes). Automatic equipment allowing messages to be sent at the maximum speed of 66 words per minute can be rented in addition. Descriptive booklet available from all Telephone Managers; for local address see telephone directory.

GENERAL SUNDAY AND HOLIDAY ARRANGEMENTS

(For Express services see p. 1174)

On SUNDAY *THROUGHOUT THE U.K. no Parcel Post, non-telegraphic Money Order, Postal Order* business is transacted, nor is there a delivery of letters, &c. There is a collection for night despatch in most places. *IN LONDON*, the Chief Office and Leicester Square Branch Office are open always, and some other offices are open from 9 a.m. to 1 p.m. for stamps, telegrams, and with some exceptions telegraph money orders up to £5, savings bank withdrawals up to £10, and National Savings Stamps encashment up to £3. *OUTSIDE LONDON*, most Head Offices and some country telegraph Sub-offices open 9–10.30 a.m. (Scotland 9–10 a.m.) for stamps, telegrams, registration and with some exceptions telegraph money orders up to £5, Savings Bank withdrawals up to £10, and National Savings Stamps encashment up to £3; but all town Sub-offices, and most non-telegraph country offices, are closed.

Christmas Day, Boxing Day and Good Friday

London: One delivery of letters and parcels on Christmas Day; none on Boxing Day and Good Friday. Most offices are closed on Christmas Day. Selected offices open from 9 a.m. to 1 p.m. for all classes of business on Boxing Day and for "Sunday" business on Good Friday.

Outside London: In Scotland, normal weekday deliveries; offices open as usual on Boxing Day and Good Friday; on Christmas Day some town sub-offices are shut, and after 1 p.m. many chief offices are open only for telegraph business. In England, Wales and Northern Ireland one delivery of letters and parcels on Christmas Day and Good Friday; none on Boxing Day; offices are closed on Christmas Day; head offices and some country telegraph sub-offices are open from 9 a.m. to 10.30 a.m. for all classes of business on Boxing Day and for "Sunday" business on Good Friday.

Other Public Holidays

In Scotland on New Year's Day office hours and classes of business are as on Sundays; no delivery of letters and parcels and no collection. Post Office counter and postal services on other public holidays in the U.K. vary in accordance with local conditions—details may be obtained from the local Head Postmaster.

OVERSEAS TELEPHONES

The caller should ask for CONTINENTAL or INTERNATIONAL Service. Callers in London with Dial Telephones with letters should dial "CON" or "INT." The charges shown are minimum rates for a call of three minutes duration, each further minute or part thereof costing one-third of this charge. Transferred charge calls are possible with certain countries. Details of countries and rates will be advised by the Continental and International Exchange.

Continental Service.

The rates quoted are for calls from all places in Great Britain, Northern Ireland, the Isle of Man and the Channel Islands to the first zone of the country concerned. For *Personal Calls* an additional charge equivalent to one minute's conversation is made.

International Service.

Minimum rates, the same from all parts of Great Britain, Northern Ireland, the Isle of Man and the Channel Islands are shown below. Hours of Service to most countries are limited. A *person to person call* may be booked without extra charge; if it fails (or call is cancelled) a *Report Charge* is made (4*s.* to 6*s.*) but not if call matures. On Radio Services a time allowance is made for interruption by adverse conditions. A *limited duration* facility (minimum 3 mins.) is available enabling connection to be terminated after a specified period of effective conversation. *A reduced rate* (10 p.m. to 10 a.m. on weekdays and all day on Sundays) is available on services with Canada, U.S.A., Cuba and Mexico. Reduced Sunday rates apply also in certain other services.

Ship's Services

Long, Medium and Short Range Ships' Services are also available between telephone subscribers in the United Kingdom and suitably equipped ships (*see* Post Office Guide).

OVERSEAS TELEPHONE CHARGES

WEIGHTS AND MEASURES

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

New definitions for an *international yard* and *pound* were adopted on Jan. 1, 1959, by the standards laboratories of the United Kingdom, Canada, Australia, New Zealand, South Africa and the United States:

international yard = 0·914 4 metre.
international pound = 0·453 592 37 kilogramme.

All non-metric calibrations carried out by the laboratories in science or technology are now made in terms of the new definitions, which have, however, no statutory force in the United Kingdom and may not be used for trade purposes in this country.

Apothecaries' Weight

Measures of Weight.

20 grains = 1 scruple (℈1).
3 scruples = 1 drachm (ʒ1).
8 drachms = 1 ounce.

Measures of Capacity.

60 minims (*min.*) = 1 fluid drachm.
8 fluid drachms = 1 fluid ounce.
5 fluid ounces = 1 gill.
4 gills = 1 pint.
8 pints = 1 GALLON.

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' *drachm* is not the same as the Avoirdupois *dram*, and is spelled differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437·5 grains). A fluid *drachm* (54·6875 grains) is equal in weight to TWO Avoirdupois *drams*.

Avoirdupois Weight

7000 grains (*gr.*) = 1 pound (*lb.*).
16 drams (*dr.*) = 1 ounce.
16 ounces = 1 POUND.
14 pounds = 1 stone.
28 pounds = 1 quarter (of a *cwt.*).
4 quarters (112 *lb.*) = 1 hundredweight (*cwt.*).
20 hundredweight (2,240 *lb.*) = 1 ton.

Troy Weight

24 grains = 1 pennyweight (*dwt.*).
20 dwt = 1 Troy ounce.

For gold and silver the ounce, divided decimally, and *not* into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce = 480 Avoirdupois grains (31·1035 *Grammes*) in weight. There is *no* Troy POUND.

Jewellers' Weight

The metric *carat* of 200 *milligrammes* is the legal standard of weight for precious stones and pearls.

Measures of Capacity

4 gills = 1 pint.
2 pints = 1 quart.
4 quarts = 1 GALLON.
1 gallon = 160 fluid ounces
= 277·274 cubic inches.
2 gallons = 1 peck.
4 pecks = 1 bushel.
8 bushels = 1 quarter.
A chaldron is 36 bushels = 4½ quarters.

Measures of Length

1 mil = 1/1000 inch.
12 inches (*in.*) = 1 foot (*ft.*).
3 feet = 1 yard (*yd.*).
6 feet = 1 fathom.
5½ yards = 1 rod or pole or perch.
22 yards = 1 chain = 100 links.
10 chains = 1 furlong.
8 furlongs = 1 mile = 1,760 yards.

Square or Surface Measure

144 sq. inches = 1 sq. foot.
9 sq. feet = 1 sq. yard.
30¼ sq. yards = 1 sq. rod, or pole or perch.
40 sq. rods = 1 rood.
4 roods = 1 acre.
10 square chains = 1 acre = 4,840 sq. yards.
640 acres = 1 square mile.

Cubic Measure

1,728 cubic inches = 1 cubic foot.
27 cubic feet = 1 cubic yard.

Angular or Circular Measure

60 seconds (″) = 1 minute (′).
60 minutes = 1 degree (°).
90 degrees = 1 right angle or quadrant.
Diameter of circle × 3·1416 = circumference.
Diameter squared × ·7854 = area of circle.
Diameter squared × 3·1416 = surface of sphere.
Diameter cubed × ·5236 = solidity of sphere.
One degree of circumference × 57·3 = radius.*
Diameter of cylinder × 3·1416; product by length or height, gives the surface.
Diameter squared × ·7854; product by length or height, gives solid content.

* Or, one radian (the angle subtended at the centre of a circle by an arc of the circumference equal in length to the radius) = 57·3 degrees, nearly.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Water Measures.

Cubic inch..... = 252·458 grains.
Gallon (277·274 cu. in.) ... = 10 lb. (distilled).
Cubic foot..... = 62·32 lb.
35·943 cubic ft. (224 gals.) = 1 ton.
Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.
An *Inch of Rain* on the surface of an acre (43,560 sq. feet) = 3,630 cubic feet = 100·992 tons.
Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186·963 gallons, weighing 16 cwt. 2 qrs. 21·6 lbs. in addition to its own weight.

Million, Billion, etc.

Value in the United Kingdom

Million.....thousand × thousand (10^6)
Billion.....million × million (10^{12})
Trillion.....million × billion (10^{18})
Quadrillion.....million × trillion (10^{24})

Value in U.S.A

Million.....thousand × thousand (10^6)
Billion.....thousand × million (10^9)
Trillion.....million × million (10^{12})
Quadrillion.....million × billion U.S. (10^{15})

United Kingdom (and other European) usage above follows the decision of the 9th Gen. Conference on Weights and Measures, 1948.

THERMOMETER COMPARISONS

Comparison between Scales of Fahrenheit Réaumur, and Centigrade.

CONVERSION.
Let F = Fahr. " C = Cent. " R = Réaum.

$F = \frac{9}{5}C + 32$ $\quad C = \frac{5}{9}(F - 32)$

$F = \frac{9}{4}R + 32$ $\quad R = \frac{4}{9}(F - 32)$

$F \quad C+R+32 \quad R \quad 4(F-32)/9$

NOTE.—The *normal* temperature of the *human body* is 98·4° F., or 37° (36·9°) C., or 29·5° R. *Freezing* point = 32° F. = 0° C. = 0° R.; *Boiling* point = 212° F. = 100° C. = 80° R. "*Absolute Temperature*" is Temperature reckoned from "*Absolute Zero*," which is at 273° C. below 0° C., 459·4° below 0° F., and 218·4° below 0° R. and is denoted by the letter "K."

* Below 32° F. *subtract* 32.

METRIC WEIGHTS AND MEASURES

See also "Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1. Measures of Length

10 millimetres = 1 centimetre = 0·393 701 inch. (*mm.*) (*cm.*)

10 centimetres = 1 decimetre = 3·937 011 inches. (*dm.*)

10 decimetres = 1 METRE (*m*) = 1·093 614 yards.

10 metres = 1 dekametre = 10·936 143 yards. (*dam.*)

10 dekametres = 1 hectometre = 109·361 43 yards. (*hm.*)

10 hectometres = 1 kilometre = 0·621 371 mile. (*km.*)

A kilometre is approximately *five-eighths* of a mile, so that 8 kilometres (4·970 82 miles) may be regarded as 5 miles.

2.—Measures of Surface

1 sq. centimetre = 0·155 sq. inch.

1 sq. METRE = 10·763 9 sq. feet = 1·195 99 sq. yds.

1 are (*a*) = 0·098 8 rood.

1 hectare (10,000 sq. metres) (*ha*) = 2·471 05 acres.

1 sq. kilometre = 0·386 102 sq. mile.

3.—Measures of Capacity and Volume

1 centilitre (*cl.*) = 0·070 4 gill.

1 decilitre (*dl.*) = 0·175 98 pint.

1 LITRE* (1/1,000 cubic metre) (*lit.*) = 1·759 8 pints = 0·88 Imp. quart = 0·22 Imp. gallon = 61·025 5 cu. inch = 0·035 315 7 cu. ft.

1 hectolitre (*hl.*) = 21·997 5 Imp. gallons = 26·417 1 U.S. gallons = 2·749 7 Imp. bushels = 2·837 7 U.S. bushels.

1 cubic metre = 35·314 7 cu. ft. = 1·307 95 cu. yds. (*cbm.* or m^3.)

(1 stere (= 1 cu. metre) is used as a unit of measurement of timber).

1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

A new standard metric measure of 25 millitres was introduced in 1959 following approval by Order in Council.

* The volume occupied by the mass of 1 kilogramme of pure water at its temperature of maximum density and under a pressure of one standard atmosphere (14·696 lb. per sq. inch).

4.—Measures of Weight

1 centigram (*cg.*) = 0·154 32 grains.

1 decigram (*dg.*) = 1·543 2 grains.

1 gramme (*grm.*) = 15·432 4 grains.

1 dekagram (*dag.*) = 5·643 8 drams.

1 hectogram (*hg.*) = 3·527 4 oz.

1 KILOGRAM kg. = 32·1507 oz. Troy = 35·273 4 oz. Avoirdupois = 2·204 62 lb. Avoirdupois.

1 myriagram = 22·046 2 lb. Avoirdupois.

1 quintal (*q.*) = 100 kg. = 220·5 lb. Avoirdupois = 1·968 4 cwt.

1 tonne (*t.*) = 0·984 207 U.K. or long ton = 1·102 31 U.S. or short ton.

Metric Weights—*continued*

1 hectolitre.....2·749 69 bushels.
1 hectolitre per hectare=1·11 bushels per acre.
1 quintal.....=3·6743 bushels.
1 quintal per hectare..1·49 bushels per acre.

NAUTICAL MEASURES

Distance is measured in nautical (or sea) miles. The nautical mile is traditionally defined as the length of a minute of arc of a great circle of the earth; but as this length varies in different latitudes (owing to the fact that the earth is not a perfect sphere), 6,080 feet, a "rounded off value" of the mean length, has been adopted in British practice as the standard length of the nautical mile. On this basis 33 nautical miles exactly equal 38 statute miles; the statute (land) mile contains 5,280 feet. A *cable*, as a measure used by seamen, is 600 feet (100 fathoms) approximately one-tenth of a nautical mile. *Soundings at sea* are recorded in fathoms (6 feet).

6 feet=1 fathom.
100 fathoms=1 cable length.
10 cables=1 nautical mile.

Note.—Some other countries, including the United States in 1954, have adopted the nautical mile of 1,852 metres as recommended by the International Hydrographic Bureau in 1929.

Speed is measured in *nautical miles per hour*, called *knots*. A knot is a measure of speed and is not used to express distance. A ship moving at the rate of 30 nautical miles per hour is said to be "doing 30 knots" and as the nautical mile is longer than the land or statute mile this represents a land speed of over 34½ miles per hour. In 1945 the *Royal Air Force* adopted the knot and the nautical mile as the standard measurements for speed and distance.

Knots	m.p.h.	Knots	m.p.h.	Knots	m.p.h.
1	1·1515	15	17·2727	29	33·3939
2	2·3030	16	18·4242	30	34·5454
3	3·4545	17	19·5757	31	35·6969
4	4·6060	18	20·7272	32	36·8484
5	5·7575	19	21·8787	33	38·0000
6	6·9090	20	23·0303	34	39·1515
7	8·0606	21	24·1818	35	40·3030
8	9·2121	22	25·3333	36	41·4545
9	10·3636	23	26·4848	37	42·6060
10	11·5151	24	27·6363	38	43·7575
11	12·6666	25	28·7878	39	44·9090
12	13·8180	26	29·9393	40	46·0606
13	14·9696	27	31·0908	41	47·2121
14	16·1212	28	32·2424	42	48·3636

Gross tonnage.—The total volume of all the enclosed spaces of a vessel, the unit of measurement being a ton of 100 cubic feet.

Net tonnage.—The gross tonnage less certain deductions for crew space, engine room, water ballast and other spaces not used for passengers or cargo.

FUEL AND POWER MEASURES

British Thermal Unit (B. Th. U.)=The amount of heat required to raise 1 lb of water through 1 degree Fahrenheit at or near 39·1 degrees F.
Unit of electricity (kilowatt-hour)=Output of 1,000 watts for one hour. 1 k.w.h.=3,413 B.Th.U.
Therm=100,000 B.Th.U.=29·3 k.w.h.
Atmosphere=pressure of 14·223 lb. per sq. in.=1 kilogram per sq. cm.

Petroleum

Barrel=35 Imperial gallons=42 U.S. gallons.

Petroleum products are commonly quoted in metric tonnes, the conversion to barrels varying slightly according to the specific gravity of the product, e.g. the metric tonne in the major oil producing states (U.S.A., Venezuela, Persian Gulf, Saudi-Arabia, Iraq, etc.) varies from 7·0 barrels per metric tonne to 7·7 barrels, and in the smaller oil producing states (e.g., Albania) is as low as 6·7 barrels per tonne. Crude petroleum in the United Kingdom, 7·355 barrels per metric tonne (2,205 lbs.); 7·472 barrels per long ton (2,240 lbs.).

LOST PROPERTY IN LONDON

Property Lost on London Transport

Enquiries about property left in London Transport Trains, Buses, Trolleybuses, or Green Line Coaches, should be made at the *Lost Property Office of London Transport*, 200–202 Baker Street, N.W.1. Office hours are 10 a.m. to 6 p.m. from Monday to Friday, and 10 a.m. to 1 p.m. on Saturday. The office is *not open* on Sundays, Good Friday, Christmas Day and Bank Holidays. Enquiries may be made by letter. Articles left in London Transport vehicles in the country area can be claimed at the nearest London Transport Country Garage within 48 hours.

Property Lost in Cabs

Enquiries as to property lost in a taxicab should be made at the *Lost Property Office of the Metropolitan Police District*, 109 Lambeth Road, S.E.1. Office hours are 10 a.m. to 4 p.m. (Saturdays, 10 to 1.) The office is *not open* on Sundays, Good Friday, Christmas Day and Bank Holidays.

ROMAN NUMERALS

1.....I	11.....XI	30.....XXX	400.....CD
2.....II	12.....XII	40.....XL	500.....D
3.....III	13.....XIII	50.....L	600.....DC
4.....IV	14.....XIV	60.....LX	700.....DCC
5.....V	15.....XV	70.....LXX	800.....DCCC
6.....VI	16.....XVI	80.....LXXX	900.....CM
7.....VII	17.....XVII	90.....XC	1000.....M
8.....VIII	18.....XVIII	100.....C	1500.....MD
9.....IX	19.....XIX	200.....CC	1900.....MCM
10.....X	20.....XX	300.....CCC	2000.....MM

Other Examples: 43=XLIII; 66=LXVI; 98=XCVIII.
339=CCCXXXIX; 619=DCXIX; 988=CMLXXXVIII; 996=CMXCVI.
1674=MDCLXXIV; 1961=MCMLXI.

A bar placed over a numeral has the effect of multiplying the number by 1,000, *e.g.*:
6,000=$\overline{\text{VI}}$; 16,000=$\overline{\text{XVI}}$; 160,000=$\overline{\text{CLX}}$; 666,000=$\overline{\text{DCLXVI}}$.

CONVERSION TABLES FOR WEIGHTS AND MEASURES

NOTE.—The central figures in heavy type represent either of the two columns beside them, as the case may be. *Examples:*—1 centimetre = 0·394 inch and 1 inch = 2·540 centimetres. 1 metre = 1·094 yards and 1 yard = 0·914 metre. 1 kilometre = 0·621 mile and 1 mile = 1·609 kilometres.

Music	=	14 × 10½	,,

NOTE.—*Folio* means a sheet folded in half, *quarto* folded into four, and so on; thus, a crown 8vo page is one-eighth the size of a crown sheet. Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, or 10 reams per 1,000 copies, the odd 16 sheets in each ream being allowed as waste. Newspapers (and some books in editions of 50,000 or over) are printed on rotary presses, for which the paper is supplied in continuous reels.

Sizes of Types

The type size chiefly used in "Whitaker" is 5½ point, or *Ruby*, set on a 6 point "body." The column contains 78 lines, and is 12 Pica ems wide; on an average every column contains about 3,100 letters, or 710 words.

Today type up to 14 point size is usually set by a keyboard machine, and mechanically cast in single letters or in complete lines of type (e.g. Monotype and Linotype). All type is cast to one uniform height ("type high"), which is $\frac{1}{1\frac{1}{2}}$ inch. Individual letters vary in *breadth*, but the "body" of each character is of uniform *depth* throughout the alphabet in each size. The unit of *breadth* is the Pica M (*Em*) 6 of which, side by side, occupy one inch of space. The unit of *depth* is the Point (72 Points = 1 inch), so that 6 lines of 12 Point occupy 1 inch in depth. The names of the various sizes are:—

Brilliant (3½ point). A column the size of this in "Whitaker," if set in Brilliant would contain 132 lines, and about 1,450 words.

Printing is the art of producing impressions, from characters or figures

Diamond (4½ point) is the next size; the column would contain 102 lines, and about 1,020 words.

Printing is the art of producing impressions, from characters or figures

5 point (*Pearl*), 92 lines, 830 words—

Further point sizes used are 24, 30, 36, 42, 48, 60 and 72.

CORRECTING FOR THE PRESS

Copyright by WILLIAM CLOWES & SONS, LTD., Printers of "WHITAKER'S ALMANACK."

The following extract is set up incorrectly in order to explain the conventional methods of correcting for the Press:—

1. Is the mark for changing the wrong letter in the word process.
2. To substitute one word for another.
3. and 24. The first is the method of marking a short insertion, the second of marking a long one
4. To have a space put between the two words.
5. To turn a letter which has been placed upside down.
6. To close the word in which a space has been improperly left.
7. and 8. To take away (*dele*, blot out) a superfluous letter or word.
9. 12, and 22. Different marks for transposing the arrangement of letters, words, or sentences.
10. To have no fresh paragraph.
11. To substitute a comma for a full-point or period.
13. To commence a new paragraph.
14. 19, 21, and 27. To insert points and marks of quotation.
15. To have any particular part printed in Italic.
16. To have words or letters printed in 'lower case,' or small letters; Roman is always understood, unless otherwise directed.
17. To have a word remain, which has been accidentally or erroneously marked. *Stet* is the Latin for 'let it stand.'
18. Points out a letter which does not match with the others: a 'wrong fount.'
20 and 23. To have certain parts printed in small or full capitals.
25. To set straight whatever may stand crooked.
26. To remove the unnecessary black mark between the words, which arises from what should form the space not having been pushed down.

EQUIVALENT INVESTMENTS

Examples:—To ascertain the yield of Consols at a price of £83 6*s.* 8*d.* look in the column headed 2½ per cent. for 83¼, and it will be seen that the yield (column headed Return Per Cent.) is £3 0*s.* 0*d.* Similarly, shares paying a fixed dividend of 6 per cent., if purchased at £189, will yield £3 3*s.* 6*d.* per cent.; while 5 per cent. shares at £152 10*s.* 0*d.* yield £3 5*s.* 7*d.* per cent.

Result at age 70 (Death assumed)	£1,005	£841	£699	£577	£475	£386

WHITAKER'S ALMANACK: PP. 522, 1934, *and* 524, 1935

"The selection of the office best suited to requirements and likely to produce the best results should be carefully made, but the study of any tables or suggestions is not sufficient to enable persons without technical knowledge to gauge the respective merits of the various companies. . . . and large sums may be saved or earned by intending proposers through obtaining reliable advice before a proposal is made."

£10 Annual Endowment Premium	Age at Entry	Age at Maturity	Yield †
	21	60	£1,032
	30	60	£600
	40	65	£426

† World-wide policies.

COST PRICE ASSURANCE, Price 1/6 post free. A guide to Policies yielding 4 to 5 per cent (compound), according to age at entry. By T. A. Rose. Apply to T. A. Rose, 78 Granville Road, Southfields, London, S.W.18.
"The subject is treated in a masterly way. The science of assurance from the standpoint of the Policy-holder could scarcely have been illustrated and explained with greater ability."—*City Press.*

Aviation Policies and Annuities carefully selected.

A pillar of strength

The tympanum surmounting the Royal Exchange consists of seventeen allegorical figures. In the centre stands the great figure of Commerce holding the Charter of the Royal Exchange. This famous building has given its name to the Royal Exchange Assurance. For nearly 250 years the Royal Exchange has provided policies for every form of insurance requirement for the home or business life.

PRINCIPAL CHARITABLE BEQUESTS OF THE YEAR

The appended list shows the principal charitable bequests noted during the year. These bequests are not necessarily payable during the year and are subject to the payment of legacies, charges, duty, etc., in calculating the residue falling to the various institutions and causes shown in the list. In certain cases the bequests are also subject to life interests as shown.

The leading beneficiaries in this year's list are societies for the care of orphans and children and the institutions for research into, and the defeat of, cancer. Benefits for the blind, old people, church institutions and societies for the care of animals also figure in the list, and other societies benefit under the numerous small legacies noted but not listed here.

An unusual legacy is shown in the £20,000 estate, not listed here, of a Devon woman who left one farthing for every day of her life for the purchase or part purchase of a new playground site in a city or town " as a token of sympathy for the children in our over-crowded cities and towns who have no playground but the streets ".

Other interesting bequests include that of Mr. George P. Brazil, food manufacturer, who started his business in a converted shed with a second-hand sausage machine as equipment, and left £497,239, of which £40,000 is to provide dwellings for needy persons, preference being given to former employees of his company. Mr. Charles Y. Hopkins, former company chairman, of Birmingham, left £10,000 to Birmingham Council for Old People for the establishment of a Home or Homes, and Miss Margaret K. Freshfield, last surviving daughter of Rev. J. M. Freshfield, left some £50,000 to the Church of England Pensions Board. Another large bequest is the £10,000 left to the Fairbridge Farm Schools under the Will of Mrs. Agnes M. Grieve, of Leek, Staffs. The Imperial Cancer Research Fund receive the residue of the £211,206 estate of Mr. David L. Sewell, the former Manchester Royal Infirmary surgeon. Miss Florence A. Morton, who directed that her burial be " preferably after sunset " left over £12,000 to Muller's Orphanages and over £20,000 falls to other children's societies under the Will of Miss Ivy M. Rhymes, of Bournemouth. The residue of the £84,825 estate of Mr. Benjamin R. Shorthouse, of Bournemouth, is left to the National Playing Fields Association, and the R.N.L.I. receive the remainder of the estate of Mr. William G. Yole to " build and place on any part of the South Coast of the County of Devon a Lifeboat."

In these days of heavy estate duty and fluctuating bank rates it is perhaps well to remember that the many charitable legacies are made under many difficulties. This is shown in Wills from time to time in phrases varying from " Owing to the heavy taxation " in varying degrees to " in these days of inflation caused by profligate national finance " and the fact that the Treasury collected £187,000,000 in death duties in the last figures published, certainly underlines these comments. The magnificent response to the World Refugee Year Appeal by the British public this year seems, however, the true answer in respect of charitable intentions despite all such difficulties.

Name	Gross Value	
Mr. George Priest Brazil, of Little Kingshill, Bucks.	£497,239	£40,000 to found a charitable trust for the purchase of land in or around Amersham and the erection of dwellings for needy persons or families.
Mrs. Emily Charlotte Eva Buckle, of Walton-on-the-Naze	£12,501	The residue upon trust for premises in the Parish of Kirby le Soken for the benefit of aged men or women of that Parish.

Name	Gross Value	
Mrs. Martha Ann Buckley, of Harrogate	£83,820	£5,000 to the British Empire Cancer Campaign, and the residue equally between N.S.P.C.C., R.S.P.C.A., R.N.L.I., and Rochdale (Lancs.) societies for the benefit of the poor, the deaf and dumb and children.
Miss Mary Eliza Conyers, of Dungourney, Cork	£58,188	The residue equally between St. Dunstan's and the National Council for the Blind of Ireland.
Miss Sophie Ffowke Craig, of Windsor Avenue, Belfast	£367,179	The residue upon trust to augment the salary and stipend of the lowest paid Clergymen of the Presbyterian Church in Ireland.
Mr. Joseph Drake, of Guiseley	£23,087	The residue to the Bramhope Branch of the National Children's Home and Orphanage.
Mr. John William Fearnsides, of Exeter	£90,172	The residue equally between Dr. Barnardo's Homes and the Fairbridge Society Inc.
Miss Margaret Keble Freshfield, of Martyr Worthy, Hants.	£107,355	All of her property to the Church of England Pensions Board.
Miss Mildred Octavia Gaitskell, of Sutton, Surrey	£15,176	The residue to the Church Army.

(*continued on page x*)

THEY LOOK TO YOU FOR HELP

There is still all too much hardship among ex-soldiers and bereaved wives and children. Many are in financial difficulties. They must rely on the benevolent funds of Corps and Regimental Associations—which in turn rely on the Army Benevolent Fund, the central fund of all military charities.

This is a really good cause that *deserves* your support. Through the Army Benevolent Fund you can give help where it is most needed.

Donations and Legacies should be made payable to :—

THE ARMY BENEVOLENT FUND

CENTRAL COUNCIL FOR THE CARE OF CRIPPLES

34, ECCLESTON SQUARE, S.W.1

FOUNDED 1919

(*Registered in accordance with the National Assistance Act, 1948*)

* * *

The Central Council for the Care of Cripples has, for 40 years, since 1919, brought help to those suffering from crippling conditions.

The Council has set itself high targets and aims . . . typical of these is a new research programme for children suffering from hydrocephalus (water on the brain). £4,000 is needed to carry out this project.

Where the State services leave off the Council is at work—whether it is its Hesley Hall School for severely handicapped children or the Travelling Exhibition of simple aids which has brought a new concept of living to thousands of the disabled.

The Central Council carries out vital work for the nation entirely financed by bequests and gifts, and will be happy and proud to send full details of its work to well-wishers.

* * *

DEPENDENT UPON VOLUNTARY CONTRIBUTIONS

It would be hard to find a Society with such a fine record

of progressive achievement in almost every field of Evangelistic and Social Welfare work as

THE CHURCH ARMY

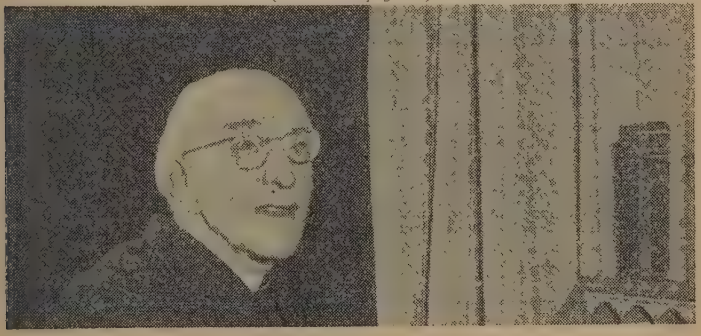
FIGHT THE GOOD FIGHT

There are: **Homes for old people.**
Holiday Homes for poor mothers and their children.
Rehabilitation and Training Centre for the Disabled.
Girls' Training Homes.
Hostels for Men and Youths.
Youth and Social Centres.
Mother and Baby Homes.
Moral Welfare Work.
Clubs and Centres at Home and in Germany for H.M. Forces.

There are also: **Winter Relief (Fuel, clothes, extra foods, etc).**
Help . . . for the needy; for prisoners' Families.

Evangelistic work includes:—

News Teams. Prison Missions. Summer Seaside Crusades. Mission Vans. Children's Missions, and work in Parishes, etc., and Overseas Missions.



This Great **CHRISTIAN WORK** has touched for the better the lives of **COUNTLESS THOUSANDS**

They count on us . . . can we count on you?

THE FAMILY PLANNING ASSOCIATION

64 Sloane Street, London, S.W.1. Telephone: BELgravia 7575/8

THE FAMILY PLANNING ASSOCIATION has over 320 clinics throughout Britain where patients can be referred for contraceptive advice. At many of these, medical help is also available to childless couples and those with marital difficulties.

All clinics are staffed by specially trained doctors and nurses holding the F.P.A. Certificate.

The FAMILY PLANNING ASSOCIATION in addition,

★ has a Centre at Headquarters in London for the investigation and treatment of male-subfertility and laboratories for seminal analysis.

★ has a Pregnancy Diagnosis Centre at Headquarters in London. The Hogben test is used and results are obtained within 24 hours.

★ has standardised methods of teaching contraception. It arranges training sessions at clinics and also lectures for medical practitioners, students and nurses.

★ has devised standard tests for manufacturers' products and has set up an approved list of those which have passed the test. This list is available on application to Headquarters in London. Contraceptive products are not listed in the British Pharmacopoeia.

★ has a quarterly journal, FAMILY PLANNING, price 9d.

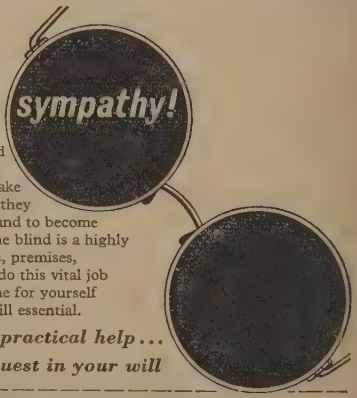
THE FORCES HELP SOCIETY AND LORD ROBERTS WORKSHOPS



President: Field Marshal Viscount Alanbrooke, K.G., G.C.B., O.M., G.C.V.O., D.S.O.

Practical assistance for serving and Ex-Service men and women in need of help in sickness, convalescence, in personal and domestic difficulties, or old age. Car park attendant schemes, clinics, and training for the disabled in the Lord Roberts Workshops.

This vital work relies entirely on Voluntary Contributions

Gifts and enquiries to: 122 Brompton Road, London, S.W.3

They need more than sympathy!

The blind are full of enthusiasm and hope for the future. They are determined to find self-reliance and to make four senses do the work of five. But they must have the opportunity to *learn* and to become skilled in craft or trade. Teaching the blind is a highly specialised task. It needs instructors, premises, equipment, and it needs *money*. To do this vital job properly—as you would want it done for yourself or your family—*voluntary* help is still essential.

Turn your sympathy into practical help... by a donation or a bequest in your will

Founded 1840.

Registered in accordance with the National Assistance Act

Patron: H.M. THE QUEEN
President: THE ARCHBISHOP OF CANTERBURY

AREA OF WORK: LONDON, MIDDLESEX, SURREY, ESSEX AND WEST KENT

There are more than 6,000 Deaf and Dumb in this area

OBJECTS:

To promote the spiritual, social and general welfare of the Deaf and Dumb.
Association has established 12 Centres of its own and hires rooms for services, lectures, clubs, etc.

Gifts and Legacies gratefully acknowledged by: Secretary, R.A.D.D., 55 Norfolk Square, W.2.

DEAFNESS
means a lifetime of isolation

THE NATIONAL INSTITUTE FOR THE DEAF strives to alleviate this grievous handicap by every possible means. Its welfare activities are constantly expanding.

The N.I.D. administers residential Homes for deaf and deaf-blind people and a Hostel for deaf working youths near London. More Homes are urgently needed for the aged, lonely deaf; and for young children who suffer from additional physical handicaps.

Practical assistance is given in employment and other personal problems, including those of the deafened ex-serviceman and woman.

Gifts and legacies are earnestly needed to help maintain and extend our work.

CANCER RELIEF APPEAL

The National Society for Cancer Relief is helping thousands of poor persons who have been overtaken by the cancer scourge, and has brought a measure of cheer and comfort into countless homes. Grants, pensions, etc., now total approximately £111,000 a year.

The N.S.C.R. also endeavours to spread established knowledge as to the nature and incidence of cancer, its symptoms and diagnosis, and the measures that can be taken to prevent it, or curtail its activities.

YOU can share the privilege of giving at least a measure of cheer to our huge family of patients. They are of all ages, and are in all parts of the British Isles. A donation of £10 would qualify you for Life Membership in this work of mercy, but every shilling is welcome.

Patron: HER MAJESTY THE QUEEN

Will you please help to give a poor child like this a seaside holiday? 30/- will ensure a week's holiday for a child who may otherwise never have a change from drab surroundings.

Please DO remember children in your Will

Will you please send gifts to:—

TOWER HOUSE, SOUTHAMPTON ST., LONDON, W.C.2

By Will or Codicil or Covenant...

May we suggest to Legal or Financial Advisers that when questions of their clients' benefactions arise the worthiness of the Royal Air Force Benevolent Fund may be wholeheartedly and deservedly commended.

Briefly, The Royal Air Force Benevolent Fund provides help to R.A.F. personnel disabled while flying or during other service. It assists the widows and dependants of those who lose their lives and helps with the children's education. It gives practical assistance to those suffering on account of sickness and general distress.

The need for help in nowise lessens in peace or war. Our immeasurable gratitude to that "Immortal Few" can hardly cease while memory itself endures.

THE ROYAL COLLEGE OF NURSING

PATRON: HER MAJESTY THE QUEEN

The College works unceasingly to promote the science and art of nursing. Funds are urgently needed for

expansion, research, maintenance.

Remember the nurses who help you in times of sickness. Help them to maintain their College which serves the public through the nursing profession.

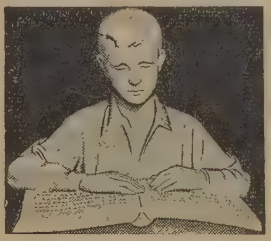
Please send a subscription or donation NOW or make a bequest.

All gifts gratefully received by

THE APPEALS SECRETARY, THE ROYAL COLLEGE OF NURSING,
HENRIETTA PLACE, CAVENDISH SQUARE, W.1

A handful of help

JUST THE SIMPLE ACTION OF WRITING, even holding a pen, is a thing of the precious past to many patients at the Royal Hospital and Home for Incurables. They will never again decide on the spur of the moment to write a letter, to take the dog for a walk—for they cannot . . . their bodies no longer respond. And many of these courageous men and women are touchingly young.



Even the smallest contribution helps so much. The Royal Hospital and Home for Incurables is not State-aided in any way. They need your help—now.

ROYAL HOSPITAL AND HOME FOR INCURABLES
PUTNEY, LONDON, S.W.15

THE ROYAL LONDON SOCIETY FOR THE BLIND

PATRON: HER MAJESTY THE QUEEN

Established 1838

Incorporated 1915

Founded 123 years ago and to-day one of the oldest and largest *voluntary* organisations in the Country catering for the needs of blind people of all ages, The Royal London Society for the Blind relies on the financial support of a generous public and asks you particularly to remember its great work when making your will.

The Society's activities comprise the following:

The education of blind children from five to sixteen years of age.
The industrial training of adults.
The employment in workshops of blind men and women.
The supervision of blind workers in their own homes.
The maintenance of two residential homes for blind adult trainees and employees.

LEGACIES, DONATIONS AND SUBSCRIPTIONS ARE URGENTLY NEEDED FOR THE MAINTENANCE AND EXTENSION OF OUR WORK

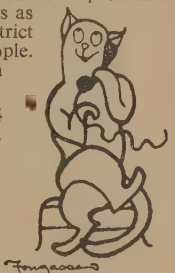
A Happy Childhood

"Happy? Of course I am. It's grand to be at Spurgeon's and to know that someone really cares. Now, I'm having every chance to make something of my life. Three Cheers for Spurgeon's!"

Spurgeon's is responsible for the Christian upbringing of 200 boys and girls. Please safeguard their future by supporting this voluntary Christian work. £1000 is needed weekly, and there is no State aid. Kindly send a donation now to Mr. Percy Hide, Secretary.

Spurgeon's Homes

38, Haddon House, Park Road, Birchington, Kent.



I've found that address you wanted — it's UFAW . . .

that stands for the Universities Federation for Animal Welfare, 7a Lamb's Conduit Passage, W.C.1.

Yes, they're sound people, they believe the problems of animal welfare need hard heads as well as soft hearts, so they restrict their membership to university people. A lot of the top-rank scientists are working with them . . .

You'd better have their prospectus—it's got 24 Fougasse illustrations. I'll give you the name again . . .
